

College bachelor's degree holders earn more than university graduates two years after graduation

College bachelor's degree holders earned on average \$55,187 annually two years after graduation. This was over 10% more than university bachelor's degree holders and about 40% more than college diploma and certificate holders. From three to five years following graduation, however, university bachelor's degree holders were earning about \$3,000 more annually than college bachelor's degree holders.
