## Field Crop Reporting Series - No. 17

### AUGUST FORECAST OF PRODUCTION OF PRINCIPAL FIELD CROPS, CANADA, 1974

Forecasts of average yields per seeded acre in this report are based on returns from Statistics Canada's corps of crop correspondents, reporting on conditions on or about August 15, and on information supplied by officials responsible for agricultural statistics in the Provinces. All yields are reported on a field-run basis and no allowance is made for dockage which varies from year to year and for different crops. Estimates of acreages seeded to the various crops are those published in the bureau's July 26 crop report with the exception of oats and barley in the Prairie Provinces. This report contains estimates of the area of oats and barley to be harvested for grain.

On the basis of yields indicated at August 15, production in Canada of the major cereals and oilseed crops this year, with 1973 totals and the ten-year (1963-1972) averages, respectively, in brackets, in millions

Note: Excluding Newfoundland for which data are not available.

## Série de rapports sur les grandes cultures - N° 17

### PRÉVISIONS D'AOUT POUR LA PRODUCTION DES PRINCIPALES GRANDE CULTURES, CANADA, 1974

Les prévisions des rendements moyens par acre ensemencée, données dans le présent rapport, sont fondées sur les déclarations des correspondants agricoles de Statistique Canada, selon la situation aux environs du 15 août, et sur des renseignements fournis par les responsables de la statistique agricole des provinces. Tous les rendements sont basés sur la récolte brute; on n'a pas tenu compte des déchets, dont la proportion varie d'une année à l'autre et selon le genre de culture. Les estimations des superficies ensemencées des diverses cultures sont celles dont les chiffres ont été publiés dans le rapport agricole de Statistique Canada du 26 juillet, à l'exception du chiffre de la superficie ensemencée en avoine et en orge dans les provinces des Prairies. Le présent rapport renferme des estimations de la superficie ensemencée en avoine et en orge à grain.

Selon les chiffres de rendements qui nous ont été communiqués le 15 août, la production au Canada des principales céréales et graines oléagineuses en millions de boisseaux, s'établirait comme suit cette année (les résultats de 1973 et les moyennes pour dix ans (1963-

Nota: Sans Terre-Neuve, dont les chiffres ne sont pas connus.

of bushels is forecast as follows: all wheat, 542.2 (604.7, 611.0); oats for grain, 293.7 (326.9, 359.4); barley for grain, 431.1 (469.6, 338.3); all rye, 18.9 (14.3, 15.6); flaxseed, 18.0 (19.4, 23.4) and rapeseed 54.7 (53.2, 37.2).

For the Prairie Provinces the first forecast of grain crops, in millions of bushels is as follows with 1973 totals and 1963-72 averages, respectively, within brackets: wheat, 518.0 (585.0<sup>r</sup>, 591.0); oats for grain, 232.0 (273.0, 255.1); barley for grain, 403.0 (444.0<sup>r</sup>, 317.6); rye, 17.5 (12.9, 14.0); flaxseed, 18.0 (19.4, 23.4); and rapeseed, 53.8 (53.2, 37.2).

The forecasted average yield of all wheat per seeded acre in the Prairie Provinces, on the basis of conditions at August 15, is 22.6 bushels per acre, with the Manitoba average 20.0, Saskatchewan 22.4 and Alberta 25.1 bushels per acre. Production of wheat in each of these provinces in millions of bushels, with last year's estimate in brackets, is as follows: Manitoba, 60.0 (80.0); Saskatchewan, 345.0 (375.0<sup>r</sup>) and Alberta, 130.0<sup>r</sup>). Relatively small amounts of winter wheat are included in these forecasts for the Prairie Provinces.

1972) sont indiqués entre parenthèses): tout blé 542.2 (604.7, 611.0); avoine à grain, 293.7 (326.9, 359.4); orge à grain, 431.1 (469.6, 338.3); tout seigle, 18.9 (14.3, 15.6); graine de lin, 18.0 (19.4, 23.4) et colza, 54.7 (53.2, 37.2).

Les premières prévisions des céréales dans les provinces des Prairies, en millions de boisseaux, sont les suivantes (les résultats de 1973 et la moyenne de 1963 à 1972 sont indiqués entre parenthèses): blé, 518.0 (585.0<sup>r</sup>, 591.0); avoine à grain, 232.0 (273.0, 255.1); orge à grain, 403.0 (444.0<sup>r</sup>, 317.6); seigle, 17.5 (12.9, 14.0); graine de lin, 18.0 (19.4, 23.4) et colza, 53.8 (53.2, 37.2).

Le rendement prévu pour tout blé, par acre ensemencée dans les provinces des Prairies, selon la situation au 15 août, est de 22.6 boisseaux l'acre, ce qui représente les moyennes suivantes: Manitoba, 20.0 Saskatchewan, 22.4 et Alberta, 25.1 boisseaux l'acre. La production de blé dans chacune de ces provinces, en millions de boisseaux, est la suivante (les chiffres de l'année dernière sont indiqués entre parenthèses): Manitoba, 60.0 (80.0); Saskatchewan, 345.0 (375.0<sup>r</sup>) et Alberta, 113.0 (130.0<sup>r</sup>). Dans ces estimations pour les provinces des Prairies sont comprises des quantités relativement faibles de blé d'hiver.

(1) As indicated on basis of conditions on or about August 15.

(1) D'après les conditions régnant le ou vers le 15 août, selon les indications.

(2) Includes relatively small acreages of winter wheat in all provinces other than Ontario.

(2) Comprend de petites superficies de blé d'hiver pour l'ensemble des provinces, sauf l'Ontario.

(3) Both 1973 and 1974 acreage figures refer only to potatoes grown mainly for sale.

(3) Toutes les données sur les surfaces ensemencées en 1973 et en 1974 portent uniquement sur les pommes de terre destinées à la vente.

(4) Includes small quantities of spring rye.

(4) Comprend de petites quantités de seigle de printemps.

(5) Estimated areas for harvest as grain.

(5) Superficies estimées, pour la moisson, comme grain.

r Revised figures.

r Chiffres revisés.
