

Ottews, Novamber 22, 1963. (3 p.tis)- Reductions from tha Septanber setinatess of Cauabra 1943 proauction of gratn cirpss. ajrountlig to $2,500,000$ bushels of wheat. $17,000,000$ bushels of oats, and $7,000,000$ bushels of barley, are indicated in the second estimate of this yearis field crops issued today by the Dominion Bureau of Statistics. The 1943 wheat crop is now placed at $293,704_{2}, 000$ bushels, the oats crop at $482,860,000$ bushels, and barley production at $215,816,000$ bushels. Harvesting operations are completed, except in Saskatchewan and New Brunswick where threshing of grain crops is unfinished.

Lower yields in Alberta, attributable in rart to killing September frosts which caught late grain in the central and northern areas of the province, account largely for the reduced estimates. Alberta's wheat crop is now shown to be $5,000,000$ bushels below the September estimate, the oats crop $13,000,000$ bushels smaller, and the barley crop $8,000,000$ bushels less. In liantoba, an upward revision has been made in all three crops while in Saskatchewan the wheat crop has been slightly raised and the oats and barley crops lowered. Changes are made also in the grain crops of the other six provinces but they are of a minor character.

Flexseed production is revised slightly upward to $17,700,000$ bushels but the crop in the three Prairie Provinces, estimated in September at $17,400,000$ bushels, remains unchanged. It is indicated in reports from Saskatchewan that approximately 7 per cent of the $12,000,000$ bushals of flaxseed produced in the province remains to be threshed. The rye crop, both spring and fall sown, is reduced by $1,334,000$ bushels and the totel of $7,144,000$ bushels is iess than 30 per cent of the 1942 harvest. Fall wheat production. ostimated for Ontario orly, is now placed at $13,222,000$ bushels, a reduction of 600,000 bushels from the first estimate.

The second estimates of the production of peas, beans and corn for husking show very little change froin figures released about a month ago. Only minor revisions are made also in the production of mixed grains and buckwheat. The crop of peas is now placed at $1,594,000$ bushels and beans at $1,402,000$ bushels. In the case of peas this is 100,000 bushels less than the 1942 production and in the case of beans 150,000 bushels less.

Production of potatoes in 1943 is now estimated to be less than in 1942 。 The late dicgings have been disappointing and blight has taken heavy toll in Nova Scotia and elsewhere. The crop is now estimated at $42,197,000 \mathrm{cwt}$. Turnips and other roots for feeding show an increase over the first estimate and are now placed at $34,779,000$ cwt.

The hay and clover crop estimated at $17,035,000$ tons is almost $1,000,000$ tons in excess of the 1942 harvest. While alfalfa et $3,893,000$ tons is 162,000 tons above the 1942 crop. Fodder corn shows a slight decrease from a year ago at 4,104,000 tons, While sugar beot production now estimated at 472,000 tons is not only recuced from the first estimate but the crop is only about two-thirds of the 1942 harvest.

AREA AND CONDITION OF FALI GHEAT AND FAIL RYE
The area sown to fall wheat in the gutum of 1943 is estimatedat 735,000 acres, an increase of 28,000 acras or 4 per cent as compared with the area sown in 1942, Viz.. 707,000 acres. The condition at cctober 31 was reported at 84 per cent of the long-time average yield par acre as compared with 94 per cent in $1942^{\circ}$.

Fall rye sowings in Canada in 1943 are estimated at 273,200 acres, a decrease of 114,000 acres or 30 per cent as compared with 387,200 acres somn in 1942 . By provinces the acreages are as follows, with last year's figures within brackets: Ontario 65,000 (74,000); Manitoba 38,000 (47,000); Saskatchewas 122,000 (206,000); Alberta $48,200(60,200)$. The condition at October 31 in percentage of the long-time average yield per acre is reported as follows. with last yearis condition at the same date within brackets: Canade 78 (89); Ontarlo 85 (95); Manitoba 88 (91); Saskatchewan 72 (87): Albexta 81 (95).

All Canada－The total production of the principal grain crops in Canada in 1943 is now estimated，in bushels，as follows，with the 1942 figures within brackets： Wheat $293,704,000(592,684,000)$ ；oats $482,860,000(651,954,000)$ ；barley $215,816,000$ $(259,156,000)$ ；гye $7,144,000(24,742,000)$ ；peas $1,594,000(1,692,202)$ ；beans $1,402,000$ $(1,553,000)$ ；buckwheat $6,225,000(5,207,000)$ ；mixed grains $35,906,000(68,622,000)$ ；flax－ seed $17,700,000(14,992,000)$ ；corn for husking $10,366,000(14,372,000)$ ．The average yields per acre，in bushels，are estimated as follows，with the 1942 figures within brackets：Wheat $16.8(27.5)$ ；oats $31.3(47.3)$ ；barley $25.7(37.2)$ ；rye 12.4 （18．5）peas 15.3 （18．8）；beans 16.5 （19．3）；buckwheat $21.8(21.7)$ ；mixed grains 24.5 （40．8）；flaxseed $6.3(10.0)$ ；corn for husking $40.3(40.1)$ ．

The production of root and fodder crops in 1943 is now estimated as follows， with the 1942 figures within brackets：Potatoes $42,197,000 \mathrm{cwt}$ ．（ $42,882,000 \mathrm{cwt}$ ）；turnips， etc． $34,779,000 \mathrm{cwt}$ 。 $(32,866,000 \mathrm{cwt}$ 。）；hay and clover $17,035,000$ tons（ $16,061,000$ tons）； alfalfa $3,893,000$ tons（ $3,731,000$ tons）；fodder corn $4,104,000$ tons（ $4,401,000$ tons）； sugar beets 472,000 tons（ 716,000 tons）．The average ylelds per acre are as follows，with last year＇s figures within brackets：Potatoes 79 cwt ．（ 85 cwt ）；turnips，etc． 214 cwt ． （208 cwt．）；hay and clover 1.74 tons（ 1.65 tons）；alfalfa 2.52 tons（ 2.59 tons）；fodder corn 8.64 tons（ 9.08 tons）；sugar beets 8.99 tons（ 11.31 tons）．

Prairie Provinces－According to the second estimate，the production of the five principel grain crops in the Prairie Provinces，is，in bushels，as follows，with the 1942 figures within brackets：Three Provinces－Wheat $277,000,000(565,000,000)$ ；oats $392,000,000(500,000,000)$ ；barley 204，000，000（241，000，000）；rye 5，870，000（23，000，000）； flaxseed $17,400,000(14,700,000)$ ．Marítoba－Wheat $41,000,000(52,000,000)$ ；osts $63,000,000$ $(70,000,000)$ ；barley $68,000,000(74,000,000)$ ；rye $836,000(3,600,000)$ ；flaxseed $2,800,000$ $(2,000,000)$ ．Saskatchewan－Wheat $156,000,000(335,000,000)$ ；oats $200,000,000(255,000,000$ barley $80,000,000(92,000,000)$ ；rye $3,800,000(15,000,000)$ ；flaxseed $12,000,000(10,500,000)$ Alberta－Wheat $80,000,000(178,000,000)$ ；oats $129,000,000(175,000,000)$ ；barley $56,000,000$ $(75,000,000)$ ；rye $1,234,000(4,400,000)$ ；flaxseed $2,600,000(2,200,000)$ ．

## FALL PLOUGHING

Of the land intended for the next year＇s crop， 37 per cent is estimate to have been ploughed at october 31 as compared with 32 per cent at the same date last year． By provinces the percentages are as follows，with the 1942 figures within brackets： Prince Edward Island 51（72）；Nova Scotie 32（53）；New Brunswick 56 （56）；Quebec 52（78）； Ontario 48 （72）；Manitoba 78 （53）；Saskatchewan 18 （2）；Alberta 31 （12）；British Columbia 37 （40）。

## TARKETINGS IN THE PRAIRIE PROVINCES

Deliveries of wheat from $f$ arms in western Canada have been comparatively light this season to date，but the marketings of oats and barley are at record levels for this time of year，while flaxseed has moved freely to market in the first quarter of the current season．Rye has not figured very prominently so far in the primary movement． All of these crops with the exception of flaxseed are governed in their movement to market by delivery quotas established by the Canadian Wheat Board．In the case of wheat，the delivery quotas at a number of points have recently been raised to 10 bushels per ＂authorized＂acre．This should result in heavier wheat deliveries in the near future． A summary of farmers marketings is tabulated below：
