22-002 no. 35 1946

c. 1

y Authority of the Hon. James A. Mackinnon, M.P., Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS - CANADA AGRICULTURAL DIVISION \$2.00 per year.

Dominion Statistician: Director, Agricultural Division: Grain Statistician: Herbert Marshall, O.B.E., B.A., F.S.S. J. B. Rutherford. W. D. Porter.

## SECOND ESTIMATE 1946 FIELD CROPS OF CANADA

Ottawa, November 14, 1946 (3 p.m.) - Canada's 1946 wheat crop is placed at 418.8 million bushels in the second estimate of production of field crops issued today by the Dominion Bureau of Statistics. Oat production for this year is estimated at 399.5 million, barley at 159.9 million, rye at 6.9 million and flaxseed at 7.7 million bushels. The production estimates presented in this report are based upon yield data supplied by crop correspondents in late October and early November, together with the acreages compiled from the June survey.

The second estimates of production of grain crops, as compared with the first estimates released on September 12, are generally lower, the reduction in the wheat estimate amounting to nearly 22 million bushels. This decline may be largely attributed to unfavourable harvesting conditions in Saskatchewan and Alberta subsequent to the September estimate, but may also be due in part to earlier underestimates of the extent of damage caused by the July frosts.

The outturn of wheat in Saskatchewan is now placed at 198 million bushels as compared with 216 million bushels in the first estimate. Alberta's wheat crop now stands at 137 million bushels, down 5 millions from the first estimate, while the estimate for Manitoba has been increased to 63 million bushels, up one million from the earlier estimate.

Unsatisfactory harvesting weather and frosts also largely account for a reduction in the oat estimate of some 12 million bushels as well as for declines of 4.3 million bushels in the barley estimate, over one million bushels in the flaxseed figure and 675,000 bushels for the rye estimate. Despite these reduced estimates, production of all of the major grains is above that of last year, the increase being most marked in the case of wheat. It is of interest to note that the all Canada average yields for 1946 of the five principal grain crops each vary less than one bushel per acre from their long-time (1908-45) average.

The second estimates of production of both peas and dry beans show slight reductions from the first estimate but the estimated outturns of 2,242,000 and 1,566,000 bushels respectively are substantially above last year's level of production for these crops.

Small increases have been registered as between the two estimates for the production of buckwheat, mixed grains, shelled corn, fodder corn and hay and clover. The alfalfa estimate has declined by 60,000 tons to a figure of 3,203,000 tons, nearly 700,000 tons below last year's production. The hay and clover crop, too, is significantly below last year's level being estimated now at 14,697,000 tons as compared with a production of 17,724,000 tons in 1945. Particularly poor yields of hay and clover have been experienced in large areas of the Maritimes and Quebec, and in Manitoba.

The second estimate of the 1946 potato crop indicates an outturn of 48,031,000 cwt., which is an increase over the first estimate of 1,032,000 cwt., and is 12,045,000 cwt. above last year's crop. The sugar beet estimate is increased over the first estimate by 19,000 tons to a figure of 721,000 tons, which is just over 100,000 tons above last year's production. The outturn of root crops included under the category of turnips, etc., is now estimated at 27,375,000 cwt., an increase of nearly 2 million cwt. above the 1945 crop.

### AREA AND CONDITION OF FALL WHEAT AND FALL RYE

The area sown to fall wheat in the autumn of 1946 is estimated at 693,000 acres, an increase of 106,000 acres or 18 per cent as compared with the area sown in 1945, viz., 587,000 acres. The condition at October 31 was reported at 101 per cent of the long-time average yield per acre as compared with 81 per cent in 1945.

Fall rye sowings in Canada in 1946 are estimated at 382,000 acres, an increase of 33,000 acres or 9 per cent as compared with 349,000 acres sown in 1945. By provinces the acreages are as follows, with last year's figures within brackets:

Ontario 55,000 (54,000); Manitoba 16,000 (17,000); Saskatchewan 218,000 (185,000); Alberta 93,000 (93,000). The condition at October 31 in percentage of the long-time average yield per acre is reported as follows, with last year's condition at the same date within brackets: Canada 97 (93); Ontario 99 (87); Manitoba 93 (88); Saskatchewan 95 (95); Alberta 99 (94).

# CROP ESTIMATES

All Canada - The total production of the principal grain crops in Canada in 1946 is now estimated, in bushels, as follows, with the 1945 figures within brackets: Wheat 418,758,000 (305,912,000); oats 399,483,000 (381,596,000); barley 159,912,000 (157,757,000); rye 6,913,000 (5,888,000); peas 2,242,000 (1,363,000); beans 1,566,000 (1,294,000); buckwheat 4,748,000 (5,246,000); mixed grains 54,924,000 (46,927,000); flaxseed 7,651,000 (7,593,000); shelled corn 10,542,000 (10,365,000). The average yields per acre, in bushels, are estimated as follows, with the 1945 figures within brackets: Wheat 16.2 (13.1); oats 30.3 (26.5); barley 23.8 (21.5); rye 13.3 (12.1); peas 18.8 (14.6); beans 17.1 (13.4); buckwheat 21.8 (20.1); mixed grains 39.3 (32.3); flaxseed 7.6 (7.2); shelled corn 42.8 (43.7).

The production of root and fodder crops in 1946 is now estimated as follows, with the 1945 figures within brackets: Potatoes 48,031,000 cwt. (35,986,000 cwt.); turnips, etc. 27,375,000 cwt. (25,493,000 cwt.); hay and clover 14,697,000 tons (17,724,000 tons); alfalfa 3,203,000 tons (3,880,000 tons); fodder corn 3,962,000 tons (3,637,000 tons); sugar beets 721,000 tons (619,000 tons).

The average yields per acre are as follows, with last year's figures within brackets: Potatoes 92 cwt. (71 cwt.); turnips, etc. 210 cwt. (185 cwt.); hay and clover 1.44 tons (1.73 tons); alfalfa 2.08 tons (2.44 tons); fodder corn 8.38 tons (7.38 tons); sugar beets 10.79 tons (10.43 tons).

Prairie Provinces - According to the second estimate, the production of the five principal grain crops in the Prairie Provinces, is, in bushels, as follows, with the 1945 figures within brackets: Three Provinces - Wheat 398,000,000 (282,000,000); oats 276,000,000 (273,500,000); barley 145,000,000 (144,000,000); rye 5,725,000 (4,476,000); flaxseed 7,475,000 (7,338,000). Manitoba - Wheat 63,000,000 (40,000,000); oats 55,000,000 (54,500,000); barley 48,000,000 (52,500,000); rye 415,000 (379,000); flaxseed 3,360,000 (2,800,000). Saskatchewan - Wheat 198,000,000 (162,000,000); oats 117,000,000 (143,000,000); barley 46,000,000 (54,500,000); rye 3,300,000 (2,620,000); flaxseed 3,350,000 (3,800,000). Alberta - Wheat 137,000,000 (80,000,000); oats 104,000,000 (76,000,000); barley 51,000,000 (37,000,000); rye 2,010,000 (1,477,000); flaxseed 765,000 (738,000).

# FALL PLOUGHING

Of the land intended for the next year's crop, 50 per cent is estimated to have been ploughed at October 31 as compared with 43 per cent at the same date last year. By provinces the percentages are as follows, with the 1945 figures within brackets: Prince Edward Island 53 (55); Nova Scotia 60 (48); New Brunswick 64 (65); Quebec 65 (60); Ontario 67 (48); Manitoba 71 (64); Saskatchewan 30 (23); Alberta 54 (53); British Columbia 43 (47).

## MARKETINGS IN THE PRAIRIE PROVINCES

Total deliveries of grain from farms in Western Canada during the first 14 weeks of the new crop year are at their highest level in recent years. Wheat marketings have been particularly heavy with 173.8 million bushels being delivered by the end of October. Among the factors contributing to this situation have been generally ample country elevator space and relatively satisfactory hauling weather. In addition, threshing was completed quite early in Manitoba and in southern Saskatchewan and Alberta, thus permitting the grain movement from farms to get away to an early start. Nearly all points are now on an open quota for wheat while oats and barley were still restricted to a 10-bushel quota as at November 8.
