Chief, Agricultural Branch: ERNEST H. GODFREY, F.S.S.

FIELD CROPS AND LIVE STOCK OF CANADA.

Ottawa, November 21, 1921.- The Dominion Bureau of Statistics issued to-day a bulletin giving (1) the final estimate for the year 1921 of the areas sown to the principal field crops of Canada; (2) the usual provisional estimate of the yield of field crops in 1921, and (3) the numbers of farm animals in Canada on or about the 15th of June last. The areas sown to field crops are estimated from the returns of about 160,000 farmers throughout Canada, collected in June last under arrangements made between the Dominion and Provincial Governments. In preparing the estimates of totals, partial use has been made this year of preliminary Census data showing the total number of farms in Canada. These are found to have increased in the three Prairie Provinces by from 10 to 26 p.c. (Manitoba 10 p.c., Saskatchewan 16 p.c., and Alberta 26 p.c.), as compared with the Census of 1916. The effect is to increase considerably the areas estimated to be sown to wheat this year, as compared with the final estimate of 1920, the difference being partly due to correction by use of the Census data and partly to actual increase as compared with 1920. This increase in the wheat area, as compared with 1920, is confined practically to the three Prairie Provinces, as in eastern Canada the effect of using the Census data has been to show a decrease in the area under wheat. That there has however evidently been a large increase in the western wheat acreage this year over last year is shown by the compilation of the actual returns received. Its extent may be gauged by the fact that if the total number of farms used last year for the three Prairie Provinces had been applied this year, the estimate of the wheat area in these provinces would have shown an increase of 3,066,573 acres; so that of the total increase shown in this year's wheat area of the three Prairie Provinces, viz., 5,340,155 acres, 3,066,573 acres are due to actual increase over last year, and 2,273,582 acres are due to correction by use of the latest Census data in the estimation of totals. A considerable actual increase in the wheat area of the Prairie Provinces this year, as compared with last year, was to be anticipated, because the lateness of the seeding season of 1920 occasioned a large decrease in the area sown to wheat for that year as compared with 1919.

Areas under Field Crops.- The total areas estimated as sown in Canada to the principal field crops for 1921 are, in acres, as follows, the areas reported for 1920 being given within brackets: Wheat 23,261,224 (18,232,374); oats 16,949,029 (15,849,928); barley 2,795,665 (2,551,919); rye 1,842,498 (649,654); peas 192,749 (186,348); beans 62,479 (72,163); buckwheat 360,758 (378,476); flaxseed 533,147 (1,428,164); mixed grains 878,663 (811,634); corn for husking 296,866 (291,650); potatoes 701,912 (784,544); turnips, etc. 227,690 (290,286); hay and clover 10,614,951 (10,379,292); grain hay 57,603 (60,612); alfalfa 254,717 (238,556); fodder corn 585,395 (588,977); sugar beets 28,367 (36,288).

Yield of Principal Field Crops.- According to the reports of Crop Correspondents, the average yields per acre, as compared with those of 1920 given in brackets, are in bushels as follows: Wheat 14 $\frac{1}{4}$  (14.50); oats 30 (33 $\frac{1}{2}$ ); barley 23 (24 $\frac{3}{4}$ ); rye 14 (17 $\frac{1}{2}$ ); peas 16 $\frac{1}{2}$  (19); beans 17 $\frac{3}{4}$  (17 $\frac{1}{2}$ ); buckwheat 23 $\frac{1}{2}$  (23 $\frac{3}{4}$ ); flaxseed 8.20 (5.60); mixed grains 25 $\frac{5}{8}$  (40); corn for husking 48 (49 $\frac{1}{4}$ ); potatoes 158 (170 $\frac{1}{2}$ ); turnips, etc. 330 $\frac{1}{4}$  (401). Tons: Hay and clover 1.10 (1.30); grain hay 2.70 (2.25); alfalfa 2.55 (2.45); fodder corn 9.65 (9.60); sugar beets 8.90 (11.37). The provisional estimate of the total yields of these crops in bushels is as follows: Wheat 329,835,300 (263,189,300); oats 510,093,000 (530,709,700); barley 64,252,800 (63,310,550); rye 25,800,400 (11,306,400); peas 3,182,400 (3,528,100); beans 1,105,300 (1,265,300); buckwheat 8,451,500 (8,994,700); flaxseed 4,364,500 (7,997,700); mixed grains 22,614,500 (32,420,700); corn for husking 14,220,000 (14,334,800); potatoes 110,895,000 (133,831,400); turnips etc. 75,185,200 (116,390,900). Tons: Hay and clover 11,587,400

(13,338,700); grain hay 155,500 (136,400); alfalfa 646,800 (583,790); fodder corn 5,637,600 (5,641,750); sugar beets 252,500 (412,400).

Grain Yields of Prairie Provinces. - The following is the provisional estimate of the total grain yields in bushels of the three Prairie Provinces, as compared with the final totals reported for 1920, given within brackets: Wheat 308,925,000 (234,138,300); oats 363,185,000 (314,297,000); barley 48,619,000 (40,760,500); rye 23,113,000 (8,273,600); flaxseed 4,175,000 (7,588,800). By provinces the estimated yields are: Manitoba, Wheat 48,142,000 (37,542,000); oats 60,112,000 (57,657,000); barley 22,688,000 (17,520,000); rye 4,125,000 (2,318,600); flaxseed 540,000 (1,157,800); Saskatchewan, Wheat 201,995,000 (113,135,300); oats 211,353,000 (141,549,000); barley 13,289,000 (10,501,500); rye 16,433,000 (2,535,000); flaxseed 3,500,000 (5,705,000). Alberta, Wheat 58,788,000 (83,461,000); oats 91,720,000 (115,091,000); barley 12,642,000 (12,739,000); rye 2,555,000 (3,420,000); flaxseed 135,000 (726,000).

Potato Harvest of 1921. - Upon an acreage of 701,912, as compared with 784,544 last year, the total yield is 110,895,000 bushels, as against last year's record of 133,831,400 bushels. The yield per acre this year is 158 bushels as against 170 $\frac{1}{2}$  bushels last year, and 151 $\frac{1}{4}$  bushels, the average for the ten years 1911-20. By provinces, the average yield per acre is highest in New Brunswick with 216 $\frac{1}{4}$  bushels, as compared with 198 bushels last year, and 183 $\frac{1}{4}$  bushels, the decennial average. The provinces next in order, with the averages of last year and of the decennial period 1911-20 in brackets, are as follows: Prince Edward Island 201 $\frac{1}{2}$  (170, 174 $\frac{1}{2}$ ); Saskatchewan 176 $\frac{1}{2}$  (127 $\frac{1}{2}$ , 147 $\frac{1}{4}$ ); British Columbia 176 (165, 203 $\frac{1}{2}$ ); Manitoba 166 $\frac{1}{2}$  (92 $\frac{1}{2}$ , 146 $\frac{3}{4}$ ); Nova Scotia 163 $\frac{3}{4}$  (203 $\frac{1}{2}$ , 191 $\frac{1}{2}$ ); Quebec 162 $\frac{1}{2}$  (185 $\frac{1}{2}$ , 153); Alberta 158 $\frac{1}{2}$  (166, 155); Ontario 103 $\frac{1}{2}$  (152, 119 $\frac{1}{2}$ ). The total value to farmers of the potato crop of 1921 is estimated at \$85,677,000, as compared with \$129,803,300 last year, the average price per bushel being this year 77 cents as against 97 cents in 1920. The provincial average prices in bushels per bushel are as follows, last year's prices being given within brackets: Prince Edward Island 44 (65); Nova Scotia 95 (98); New Brunswick 76 (70); Quebec 80 (100); Ontario 113 (97); Manitoba 51 (136); Saskatchewan 50 (125); Alberta 60 (100); British Columbia 90 (128).

Numbers of Farm Live Stock. - The total number of horses in Canada on June 15 last is estimated at 3,813,921, as compared with 3,400,152 in 1920. Mules number 10,424, as against 9,051 last year. Cattle number 10,206,205 as against 9,572,196, sheep 8,675,860 as against 8,720,703, and swine 3,904,895 as against 3,516,678. All descriptions have therefore increased since last year, excepting sheep, which for the first time since 1917 show a decrease, this amounting to 44,923. Poultry show large increases as compared with 1920, hens from 25,942,105 to 34,340,474; turkeys from 791,766 to 1,199,494; geese from 754,455 to 880,014 and ducks from 617,638 to 762,135. Rabbits in British Columbia number 65,789 this year as against 82,146 last year. By provinces, horses have increased in the Prairie Provinces and in British Columbia but show a decrease in the remaining provinces. Cattle have increased in all parts except the Maritime Provinces and Quebec. Sheep show a decrease, except in Prince Edward Island, Saskatchewan, Alberta and British Columbia, where there is an increase. Swine show a decrease in the Maritime Provinces, Ontario and British Columbia, and an increase in the other provinces. Poultry show an increase, except only in Nova Scotia and New Brunswick. As in the case of field crops, the differences are due partly to correction by Census data and partly to actual change.

Fall Wheat and Fall Ploughing for 1922. - The total area estimated as sown to fall wheat in Canada for the season of 1922 is 842,400 acres, as compared with 792,200 acres sown in 1920 for 1921 and with 720,635 acres, the area harvested. The area sown this fall represents an increase of 50,200 acres, or 6 p.c. over the area sown last year and of 121,765 acres, or 17 p.c. over the area harvested. In Ontario the area sown is 790,200 acres, as compared with 738,500 acres, or an increase of 7 p.c. In Alberta there is a decrease shown of from 38,800 acres to 36,100 acres, or 7 p.c. In British Columbia the area sown is 16,100, an increase of 8 p.c. as compared with 14,900 acres last year. The condition of the crop on October 31 in percentage of the decennial average with the corresponding percentages for 1920 in brackets is for Canada 102 (102); for Ontario 102 (102); for Alberta 87 (93); and for British Columbia 91 (104). Good progress has been made with the fall

ploughing of land intended for next year's crops. In the Maritime Provinces the proportion is 84 in Prince Edward Island, as compared with 81 last year; in Nova Scotia 56 against 57; in New Brunswick 81 against 69. In Quebec the percentage is 69 against 88; in Ontario 77 against 73; in Manitoba 83 against 83; in Saskatchewan 32 against 45; in Alberta 41 against 29, and in British Columbia 54 against 65. For the whole of Canada the proportion is 67 p.c. as against 71 p.c. last year.

I.- Areas and Provisional Estimate of the Yield of Field Crops for 1921, as compared with the Final Estimate of 1920.
