## Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Horticultural Crops Unit,  
Agriculture Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-8727) or to the Statistics Canada reference centre in:

|            |            |           |            |
|------------|------------|-----------|------------|
| St. John's | (772-4073) | Winnipeg  | (983-4020) |
| Halifax    | (426-5331) | Regina    | (780-5405) |
| Truro      | (893-7251) | Edmonton  | (495-3027) |
| Montréal   | (283-5725) | Calgary   | (292-6717) |
| Ottawa     | (951-8116) | Vancouver | (666-3691) |
| Toronto    | (973-6586) |           |            |

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

## Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographique sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinaire et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Unité de l'horticulture,  
Division de l'agriculture,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-8727) ou au centre de consultation de Statistique Canada à:

|            |            |           |            |
|------------|------------|-----------|------------|

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

n.e.s. - Not elsewhere specified.

This publication was prepared under the direction of:

- **Michael Trant**, Chief,  
Crops Section
- **Paul Murray**, Unit Head,  
Horticultural Crops Unit
- **Linda Brazeau**  
Horticultural Crops Unit

Please contact us if you would like to receive this information via **ENVOY 100** or a similar electronic messaging system by calling 613-951-8717.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

n.d.a. - Non désigné ailleurs.

Cette publication a été rédigée sous la direction de:

- **Michael Trant**, chef,  
Section des cultures
- **Paul Murray**, chef de sous-section,  
Sous-section de l'horticulture
- **Linda Brazeau**  
Sous-section de l'horticulture

Si vous désirez recevoir cette information via **ENVOY 100** ou un système de message électronique semblable, s'il-vous-plaît nous le faire savoir en téléphonant 613-951-8717.

## HIGHLIGHTS

Canadian processors have contracted 158,780 acres of vegetables for processing in 1990, compared with 164,465 acres in 1989. Area planted to tobacco increased by 6.9% from 1988 (71,997 acres) to 1989 (76,949 acres). Results of the 1990 Fruits and Vegetable Area Survey which was conducted in May are now available via a Statistical Bulletin. To receive a copy or for more information contact J. Heimbecker, Horticultural Crops Unit of Statistics Canada, Ottawa, at (613) 951-0573

## INTRODUCTION

The contents of this statistical publication represent the most recent information available at the time of printing on selected fruits and vegetables produced in Canada. All data are prepared in consultation with representatives of the Federal and Provincial Departments of Agriculture and are subject to revision as more information becomes available.

Current year area, production and value figures are preliminary while historical data are estimates based on more complete marketings. Data are generally concerned with total production and do not take into account wastage, etc. With the availability of market and wastage information the estimates more closely reflect commercial production.

Data shown in this publication are on a crop year basis. In the case of mushrooms and greenhouse tomatoes and cucumbers, however, the data are on a calendar year basis. All value data are those obtained at the "farm gate" and are concerned with returns to growers. To prevent disclosure of confidential material such data are included in regional or Canada totals. Estimates are provided in both imperial and metric units.

## Fruits

Production and value data are provided for the eleven most commercially significant fruits grown in Canada. The published fruit data come from a variety of sources.

## FAITS SAILLANTS

Les transformateurs canadiens ont faits des contrats pour 158,780 acres en légumes de transformation en 1990, en comparaison avec 164,465 acres en 1989. La superficie ensemencée en tabac a augmenté de 6.9% entre 1988 (71,997 acres) et 1989 (79,949 acres). Les résultats de l'Enquête sur la superficie en fruits et légumes menée en mai sont maintenant disponible sous forme de Bulletin statistique. Pour recevoir une copie ou pour plus d'information communiquez avec J. Heimbecker, Sous-section de l'horticulture de Statistique Canada, Ottawa, au (613) 951-0573.

## INTRODUCTION

Le présent bulletin statistique contient les renseignements les plus récents (au moment de l'impression) sur la production de certains fruits et légumes au Canada. Toutes les données sont préparées en consultation avec des représentants des ministères fédéral et provincial de l'Agriculture et sont sujettes à des rectifications au fur et à mesure qu'on dispose de nouvelles données.

Les données de l'année courante sur la superficie, la production et la valeur sont provisoires, alors que les données chronologiques sont des estimations basées sur des données plus complètes des ventes. Les données portent généralement sur la production totale et ne tiennent pas compte des pertes, etc. Étant donné qu'on disposait de renseignements sur la mise en marché et les pertes, les estimations représentent mieux la production commerciale.

Toutes les données présentées dans cette publication sont basées sur l'année-récolte. Dans le cas des champignons et des tomates et concombres de serre, toutefois les données sont sur une base d'année civile. Les données relatives à la valeur représentent la valeur à la ferme, c'est-à-dire les recettes des producteurs. Pour éviter la divulgation de renseignements confidentiels, ces valeurs sont groupés sous formes de totaux régionaux ou nationaux. Les estimations paraissent en unités impériales et métriques.

## Fruits

Les données sur la production et la valeur des fruits concernent les onze cultures commerciales les plus importantes au Canada. Les données publiées proviennent de diverses sources.

The Horticulture Branch of the British Columbia Ministry of Agriculture and Fisheries provides estimates of fruit production and value several times a year. Statistics Canada, as a member of the Ontario Fruit and Vegetable Statistics Committee, obtains provincial fruits data during committee meetings.

Quebec fruit estimates are supplied by the provincial Bureau of Statistics whose data are based on Statistics Canada's berry surveys (mailed to all known strawberry and raspberry growers) and several provincial surveys.

The Truro Regional Office of Statistics Canada is responsible for Maritime fruit estimates. Commercial fruit data (fresh and processed combined) are listed in Tables 1, 2 and 3.

### Vegetables

All commercial vegetable data that appear in this publication are prepared in consultation with representatives of Federal and Provincial Departments of Agriculture. Only vegetable crops grown commercially are included; no data are available on vegetables grown for home consumption.

The Horticulture Branch of the British Columbia Ministry of Agriculture and Fisheries supplies Statistics Canada with vegetable acreage, production and value data for the province.

In Manitoba and Quebec, provincial agencies base their vegetable estimates on two mail surveys conducted by Statistics Canada.

Results of acreage questionnaires (mailed in July) and yield and price questionnaires (mailed in November) are compiled by the respective provincial agencies.

Maritime commercial vegetable data are prepared by the Truro Regional Office of Statistics Canada and are based on two mail surveys conducted by the agency. In Ontario, the Fruit and Vegetable Statistics Committee is responsible for the preparation of the province's vegetable data.

La direction de l'horticulture du ministère de l'Agriculture et des pêcheries de la Colombie-Britannique fournit des estimations de la production et de la valeur des cultures fruitières plusieurs fois par année. À titre de membre du Comité ontarien de la statistique des fruits et légumes, Statistique Canada obtient des données provinciales sur les fruits au cours des réunions du Comité.

Dans le cas du Québec, les estimations sont fournies par le Bureau provincial de la statistique à partir d'enquêtes de Statistique Canada sur les petits fruits (enquêtes postales auprès de tous les producteurs connus de fraises et de framboises) et de plusieurs enquêtes provinciales.

Le bureau régional de Statistique Canada à Truro s'occupe des estimations concernant les provinces Maritimes. Les données sur la production commerciale de fruits (frais et de conditionnement réunis) figurent aux tableaux 1, 2 et 3.

### Légumes

Toutes les données sur les légumes commerciaux qui paraissent dans ce bulletin sont préparées en consultation avec des représentants de ministères fédéral et provincial de l'Agriculture. Ne sont prises en compte que les cultures commerciales; on ne possède pas de données sur les légumes cultivés pour être consommés à la maison.

La direction de l'horticulture du ministère de l'Agriculture et des pêcheries de la Colombie-Britannique fournit à Statistique Canada des données sur la superficie, la production et la valeur des cultures maraîchères dans cette province.

Dans le cas du Manitoba et du Québec, les organismes provinciaux fondent leurs estimations sur deux enquêtes postales menées par Statistique Canada.

Les questionnaires sur la superficie (enquête de juillet) et les questionnaires sur les rendements et les prix (enquête de novembre) sont dépouillés par les organismes provinciaux.

Les données sur les légumes commerciaux dans les Maritimes sont préparées par le bureau régional de Statistique Canada à Truro et sont fondées sur les résultats de deux enquêtes postales de Statistique Canada. En Ontario, c'est le Comité de la statistique des fruits et légumes qui s'occupe de la préparation des données sur les légumes.

Data on greenhouse vegetable production are obtained from an annual survey of the Greenhouse Industry conducted by Statistics Canada.

Processing vegetable data - which appear in Table 5 - are derived from the result of two processor survey conducted and compiled by Statistics Canada. All known processors receive questionnaires twice a year.

Actual contracted acreages are published in August, while measures of harvested area, production and value appear in May. A breakdown of domestic and imported purchases acquired by processors appears in Table 6. These data are drawn from results of the harvested survey.

A survey of the mushroom industry is conducted annually by Statistics Canada. Questionnaires are mailed to all known mushroom growers and are returned to Ottawa for compilation. Results of the survey are listed in Table 8.

#### **Leaf Tobacco Area, Production and Value Survey, 1989**

The results of the 1989 Tobacco Survey are presented in Table 7. All data pertain to the crop year ending September 30. Value data are determined by figures obtained from annual tobacco auctions. The statistics are the totals of the data as reported by the correspondents on the questionnaire.

In 1989, the marketed production of leaf tobacco in Canada was 75 573 tonnes, an increase of about 23% from the 1988 level. The total farm value of the 1989 tobacco crop was \$325,367,000.

Production of flue-cured tobacco was 74 456 tonnes valued at \$321,457,000.

#### **Conversion Factors**

In some cases data that are received by Statistics Canada are in different units of measurement from those which appear in the publication. For the Maritimes and Quebec, the fruit estimates are

Les données sur la production des légumes de serre sont tirées de l'enquête annuelle sur les cultures de serre menée par Statistique Canada.

Les données sur les légumes de conditionnement (tableau 5) sont calculées par Statistique Canada à partir des résultats de deux enquêtes menées auprès des entreprises de conditionnement. Tous les conditionneurs connus reçoivent des questionnaires deux fois par année.

Celles sur les superficies réelles sous contrat sont publiées en août et celles sur la superficie récoltée, la production et la valeur paraissent en mai. Le tableau 6 donne une ventilation des achats des entreprises de conditionnement (produits canadiens et importés). Ces données sont tirées des résultats de l'enquête sur les récoltes.

Statistique Canada mène chaque année une enquête sur la culture des champignons. Tous les producteurs connus de champignons reçoivent un questionnaire qu'ils renvoient à Ottawa en vue du dépouillement. Les résultats de l'enquête figurent dans le tableau 8.

#### **Tabac en feuilles - Superficie, production et valeur, 1989**

Les résultats de l'enquête de 1989 sur le tabac en feuilles sont présentés au tableau 7. Toutes les données se rapportent à la campagne agricole se terminant le 30 septembre. Les données sur la valeur sont déterminées par les chiffres obtenus grâce aux ventes annuelles aux enchères de tabac. Les statistiques représentent les totaux des données déclarées sur le questionnaire par les correspondants.

En 1989, la production commercialisée de tabac en feuilles au Canada s'établissait à 75 573 tonnes métriques, soit une augmentation d'environ 23% par rapport au niveau de 1988. La valeur totale à la ferme de la récolte de tabac de 1989 s'établissait à \$325,367,000.

La production de tabac jaune séché à l'air chaud était 74 456 tonnes métriques et la valeur s'établissait à \$321,457,000.

#### **Facteurs de conversion**

Dans certains cas, Statistique Canada reçoit ces données dans des mesures différentes de celles qui paraissent dans ce bulletin. Pour ce qui est des Maritimes et du Québec, les estimations des fruits sont converties de

converted at the following rates:

- 1 bushel of apples = 42 pounds
- 1 quart of strawberries or raspberries = 1.25 pounds
- 1 bushel of all other tree fruits = 50 pounds (net weights).

In Ontario, corn and lettuce production estimates are converted at the following rates:

- 1 dozen ears of corn = 6 pounds;
- 1 dozen heads of lettuce = 15 pounds;
- 1 dozen greenhouse cucumbers = 13 pounds;

The following metric conversion factors are used in this publication:

|            |  |
|------------|--|
| Area       | 1 acre = 0.404 685 hectare                   |
| Production | 1 ton (short 2,000 pounds) = 0.907 185 tonne |
|            | 1 pound = 0.453 592 kg                       |

Further supplemental information will be presented in the publication as follows:

|           |  |
|-----------|--|
| May:      | Canadian Mushroom Growers' Survey                  |
| August:   | Leaf Tobacco Survey                                |
| October:  | Niagara Sour Cherry Objective Yield Survey Results |
| December: | Estimated Sales of Fruit to Processors             |

la façon suivante:

- 1 boisseau de pommes = 42 livres
- 1 pinte de fraises ou de framboises = 1.25 livres;
- 1 boisseau de tout autre fruit de verger = 50 livres (poids net).

Les estimations de la production de maïs et de laitue de l'Ontario sont converties selon les taux suivants:

- 1 douzaine d'épis de maïs = 6 livres;
- 1 douzaine de laitues (pommées) = 15 livres;
- 1 douzaine concombres de serre = 13 livres.

On a utilisé les taux suivants pour convertir les unités impériales en unités métriques:

|            |  |
|------------|--|
| Superficie | 1 acre = 0.404 685 hectare                               |
| Production | 1 tonne courte (2,000 livres) = 0.907 185 tonne métrique |
|            | 1 livre = 0.453 592 kg                                   |

De plus amples renseignements complémentaires seront présentés dans la publication au cours des mois suivants:

|           |  |
|-----------|--|
| Mai:      | Enquête sur les producteurs de champignons canadiens                         |
| Août:     | Enquête de tabac   |
| Octobre:  | Résultats de l'enquête sur les rendements prévus de cerises aigre du Niagara |
| Décembre: | Ventes estimatives de fruits aux conditionneurs                              |

(1) Canada total excludes confidential data.

(2) Includes leaf lettuce.

(3) The quantity sold to processors in 1988 is included with Ontario.

Note: Area estimates for 1988 and 1989 will be reviewed in light of the results from the Fruit and Vegetables Area Survey conducted in May 1990.

TABLEAU 4. Superficie, production et valeur à la ferme de tous légumes commerciaux au Canada, par province, 1988 et 1989 - fin

(1) Le total du Canada n'inclus pas les données confidentielles.

(2) Inclus la laitue en feuille.

(3) Le volume des ventes aux conserveries en 1988 est inclus avec l'Ontario.

Nota: Les estimations de superficie pour 1988 et 1989 seront examinées en vue des résultats de l'Enquête sur la superficie en fruits et légumes menée en mai 1990.

TABLE 5. Area, Production and Value of Processing Vegetables, Contracted and Harvested by or for Canadian Processors, 1989 and 1990

(1) Comme l'enquête a été effectuée presque au même moment que les semences, les chiffres de la superficie cultivée sera susceptible d'être rectifié. En outre, même si la plus grande partie des terres font l'objet d'un contrat, les légumes non cultivés sous contrat qu'achètent les conditionneurs entraîneront peut-être une hausse de niveau de production.

(1) Beginning in 1985 Quebec area planted is used as area harvested in order to calculate a national yield figure.

(1) Commencant en 1985, la superficie ensemencée est employée comme superficie récoltée au Québec pour calculer un rendement national.

(2) Average yield is based on harvested area. Prior to 1985, average yield is based on planted area.

(2) Rendement moyen est établi d'après la superficie récoltée. Pour les années avant 1985, le rendement moyen est établi d'après la superficie ensemencée.
