THE FRUIT AND VEGETABLE PREPARATIONS INDUSTRY IN CANADA, 1944.

The development of the canned foods industry has effected a great change in the relation of foods to seasons. Fruits and vegetables of many kinds are to be had at all times of the year, not always with all the flavour of the freshly gathered products, but with much of their original freshness and flavour. The producers in the country are provided with an enormously extended market for their products and the consumers in both city and country with cheap and wholesome food in great variety.

The number of plants in operation increased from 382 in 1943 to 458 in 1944, partly due to the inclusion of some sixty plants in Quebec, which had previously been reporting as "domestic canners". The average number of employees per annum increased from 11,894 to 15,368, salaries and wages increased from \$12,350,468 to \$16,411,988. The value of production rose from \$72,228,697 to \$107,335,254 and the amount paid for materials also increased from \$44,564,481 to \$63,223,982. During the decade preceding the war the volume of fruit and vegetable preparations produced increased over 54 per cent. This growth is indeed remarkable and represents a substantial increase in the domestic demand for these products. The industry, besides supplying the domestic market, also has a substantial exportable surplus.

The statistics published in the present report include only the statistics of establishments engaged in canning, evaporating, preserving and freezing of fruits and vegetables and the manufacture of vinegar, cider, pickles, catsups, etc. Statistics relating to specific products are not to be regarded as the total production for Canada, since many products, such as peanut butter, jelly powders, etc., are also found as secondary products of other industries. For the total production reference should be made to the alphabetical list of products appearing in the report "The Manufacturing Industries of Canada" published annually.

The most important branch of this industry is the canning of fruits and vegetables which is carried on most extensively in Ontario, British Columbia and Quebec where climatic conditions for the growing of fruits and vegetables are favourable. The canning season begins in June and continues throughout the summer and autumn until October, being at its height in September. In September of 1944 there were 28,725 wage-earners employed in this industry, while in April, the month of lowest employment, there were only 7,258 employed.

The physical volume of production of canned fruits, canned vegetables and other products made by the industry during 1944 was about 41 per cent higher than in the previous year, while the dollar value of the output increased by 48.6 per cent. There was thus a slight rise in the selling value of the products made. There was an increase of 80 per cent in the volume of canned vegetables, 69 per cent in canned fruits, 46 per cent in catsup and sauces, 40 per cent in canned soups, 13 per cent in jam, jellies and marmalades, etc.

The tables following give detailed statistics of products made, materials used, capital invested, employment, salaries and wages, etc.

THE FRUIT AND VEGETABLE PREPARATIONS INDUSTRY IN CANADA, 1944.

^x The apparent increase in employment for these years is due to a change in the method of computing the average annual employment of wage-earners.

Note: Profits or losses cannot be estimated from Census figures, as no data are collected for certain expense items, such as interest, rent, depreciation, taxes, insurance, advertising, etc.

THE FRUIT AND VEGETABLE PREPARATIONS INDUSTRY IN CANADA, 1944

The table below gives the statistics of the domestic pack of canned fruits and vegetables in the Province of Quebec in 1943 and 1944. These figures are based on reports received from 1,741 permit holders in 1943 and 1,775 in 1944 and do not include products canned for own use. It should be noted that these figures are not included in any of the tables of this report, and are shown here in order to give a more comprehensive picture of the industry. Similar figures for Ontario are shown in Table 5(b).
