# THE FRUIT AND VEGETABLE PREPARATIONS INDUSTRY

1953

From a very modest beginning just before the turn of the century, commercialized canning has developed into an industry which is now firmly rooted in every province of this Dominion. The Fruit and Vegetable Preparations Industry, in addition to providing an annual outlet for enormous quantities of agricultural products, has succeeded in marketing an extensive and varied range of wholesome appetizing foods. After slightly more than fifty years of operation, the urban or rural consumers may select their favourite brand in a choice of several grades and sizes to meet their immediate need. In addition to the Canadian market, the industry annually exports large quantities of its products to foreign countries, notably Great Britain and the United States.

In 1953 this industry had a total value of production of \$205,119,469, a drop from the all-time high of \$211,787,559 which was attained in 1952. During the decade immediately preceding the war the volume of fruit and vegetable preparations produced increased over 54%. In spite of curtailment of supplies during the war years the production trend continued upward. In 1949 there was a slight falling off, due partly to the large carryover of these commodities and partly to economic conditions. From 1952 to 1953 the number of plants in operation decreased from 462 to 454. The average number of employees decreased from 16,020 to 15,385, with an increase in salaries and wages from \$31,992,856 to \$32,838,899. Cost of materials used decreased from \$120,602,514 to \$119,911,000.

The statistics published in the present report include only the statistics of establishments engaged in canning, evaporating, preserving and freezing of fruits and vegetables and the manufacture of vinegar, cider, pickles, catsups, etc. Statistics relating to specific products are not to be regarded as the total production for Canada, since many products, such as peanut butter, jelly powders, etc., are also found as secondary products of other industries. For the total production, reference should be made to the alphabetical list of products appearing in the report "The Manufacturing Industries of Canada" published annually.

The most important branch of this industry is the canning of fruits and vegetables which is carried on most extensively in Ontario, British Columbia and Quebec where climatic conditions for the growing of fruits and vegetables are most favourable. The canning season begins in June and continues throughout the summer and autumn until October, being at its height in September. In September of 1953 there were 27,428 wage-earners employed in this industry, while in March, the month of lowest employment, there were only 6,611 employed.

In 1953 the gross value of production of the industry decreased by 3.15 per cent and the volume of production by 4 per cent. There was an increase of 29.57 per cent in the volume of canned fruits, 10.26 per cent in jams, jellies and marmalades, and 5.51 per cent in pickles. At the same time a decrease of 16.04 per cent in canned vegetables, 4.29 per cent in canned soups, and 27.63 per cent in catsup was experienced.

The tables following give detailed statistics of products made, materials used, employment, salaries and wages paid, imports and exports, etc. For the first time since 1948, statistics were collected in 1953 for power equipment and fuel consumption. These figures are shown in Tables 14 and 15.

1. Fewer than three establishments reporting.

2. Quantity for "all other products" cannot be shown by provinces, but dollar value for all Canada is given in Table 3.

The table below gives the statistics of the domestic pack of canned fruits and vegetables in the Province of Quebec in 1952 and 1953. These figures are based on reports received from 1,509 permit holders in 1952 and 1,293 in 1953 and do not include

products canned for own use. It should be noted that these figures are not included in any of the tables of this report, but are shown here in order to give a more comprehensive picture of the industry. Similar figures for Ontario are shown in Table 5 (b).
