ESTIMATES OF PRODUCTION AND DISAPPEARANCE OF MEATS, 1973

Note: This publication includes the 1966-1971 intercensal revisions for per capita disappearance. Estimates have been revised to be in line with the latest Census data.

Disappearance of red meats in 1973 was 159.8 pounds per capita compared to 165.8 pounds in 1972. Decreases in per capita disappearance occurred in all meats but was most marked in pork. Beef disappearance per person decreased only slightly from 92.5 pounds in 1972 to 91.8 in 1973. Per capita disappearance of veal, and mutton and lamb decreased from 3.5 and 4.7 pounds in 1972 to 3.1 and 3.7 pounds respectively in 1973. Pork disappearance decreased from 61.0 pounds per person in 1972 to 57.6 pounds in 1973.

Domestic production of red meats for 1973 (Table 2) is estimated at 3.4 billion pounds, down slightly from 3.5 billion pounds in 1972. This production estimate includes slaughter plus meat equivalent of animals exported alive, minus the meat equivalent of live animals imported for slaughter.

Output of meats and offal from animals slaughtered in Canada (Table 3) which includes live imports for slaughter (and excludes live exports) remained practically unchanged.

Poultry Meat. — Disappearance of poultry meat in 1973 was estimated at 46.9 pounds per capita. The per capita estimates for the different categories are as follows: fowl and chicken, 36.1 pounds; turkey, 10.2 pounds; goose, 0.19 pounds; and duck 0.37 pounds.

ESTIMATIONS DE LA PRODUCTION ET DE LA DISPARITION DES VIANDES, 1973

Nota: La présente publication contient les révisions intercensitaires de 1966-1971 relativement à la disparition par tête. Les estimations ont été révisées en fonction des dernières données de recensement.

La disparition de viandes rouges en 1973 a été de 159.8 livres par tête à comparer à 165.8 livres en 1972. La diminution de la disparition par tête a touché toutes les viandes, et surtout le porc. La disparition de boeuf par personne n'a diminué que légèrement, tombant de 92.5 livres en 1972 à 91.8 livres en 1973. La disparition par tête de veau et de mouton et d'agneau est tombée de 3.5 et 4.7 livres en 1972 à 3.1 à 3.7 livres respectivement en 1973. La disparition de porc est passée de 61.0 livres par personne en 1972 à 57.6 livres en 1973.

La production intérieure de viandes rouges en 1973 (tableau 2) est estimée à 3.4 milliards de livres, soit un peu moins qu'en 1972 (3.5 milliards de livres). Cette estimation de production comprend les abattages, plus l'équivalent de viande des animaux exportés vivants, moins l'équivalent de viande des animaux vivants importés pour l'abattage.

La production de viandes et d'issues d'animaux abattus au Canada (tableau 3), qui comprend les importations d'animaux vivants pour l'abattage (ce qui exclut les exportations d'animaux vivants), est demeurée à peu près inchangée.

Viande de volaille. — On a estimé à 46.9 livres par habitant la disparition de viande de volaille en 1973. Voici les statistiques sur l'estimation par habitant pour les diverses catégories: poule et poulet, 36.1 livres; dindon, 10.2 livres; oie 0.19 livres; canard, 0.37 livres.
