THE SECRETARY OF THE DEPARTMENT OF STATISTICS

32-D-01

COLD STORAGE REPORT FOR JUNE 1st.

Ottawa, June 17, 1919.

The Cost of Living Commissioner reports as follows to The Honourable Minister of Labour concerning goods in cold storage and in process of cure for the first of June:

Unsettled conditions in the West have somewhat delayed the report and have made it impossible to include as complete totals as ordinarily. The list of firms which have failed to report for the month is appended. The comparative figures for the Dominion are made up excluding Manitoba. Totals including all holdings reported.

The butter stocks reported consist of 2,026,671 pounds of creamery and 146,980 pounds dairy. Comparative figures show this to be an increase over last month of 167.5% in the case of creamery butter and 76.95% in the case of dairy butter, but even so these stocks are 24% less than a year ago in each case. In other words, butter for next winter's use is going into storage more slowly than last year and at very much higher prices. The outlook for next winter is very bad.

The oleomargarine stocks are 351,118 pounds, a small amount compared with our consumption.

The cheese stocks reported are 2,983,438 pounds. Comparative figures show this to be one and three-quarters more than last month but 12% less than last year.

Eggs in cold storage have increased to 7,549,451 dozen. Comparative figures show this to be 214.8% more than a month ago and 10.22% more than last year. Eggs in warehouse other than cold storage amount to 883,400 dozen, and frozen eggs amount to 237,922 pounds. While these stocks look well for next winter's supply, the price at which they are being laid down will make them a luxury next winter.

The total stocks of pork reported are 35,084,771 pounds. Comparative figures show this to be 3.42% less than a month ago and 10.47% less than a year ago. The stocks include 5,080,413 pounds frozen pork, 2,149,665 pounds not frozen, 2,222,825 pounds dry salted, 9,012,992 pounds sweet pickled and 16,618,876 pounds in process of cure. It will then be seen that nearly one half of the total amount is still in process of cure and not in cold storage.

The total stocks of beef reported are 26,113,350 pounds. Comparative figures show this to be 27.24% less than a month ago and 37.9% more than a year ago. These stocks include 22,563,061 pounds of frozen beef, 2,527,074 pounds unfrozen fresh beef, 583,951 pounds of cured beef, and 439,264 pounds in process of cure.

The stocks of meat in storage indicate that for all our shipments overseas we still have plenty left for our own consumption.

STATISTICS STATISTIQUE  
CANADA CANADA

JUN 16 2010

LIBRARY  
UNIVERSITY OF TORONTO LIBRARY

The stocks of mutton and lamb reported are 2,030,048 pounds. Of this 2,004,892 pounds are frozen. Comparative figures show this to be 21.32% less than a month ago and 44.34% more than a year ago.

The total stocks of poultry in storage reported are 1,950,632 pounds. Comparative figures show this to be 31.82% less than a month ago and 279.48% more than a year ago. The stocks are divided as follows:-

Broilers.....	93,471	pounds
Chickens.....	578,903	"
Fowl.....	788,264	"
Ducks.....	22,054	"
Geese.....	84,999	"
Turkeys.....	206,644	"
Unclassified.....	176,297	"

The fish reported amounts to 18,039,200 pounds, of which 14,987,983 pounds are in cold storage. This is 16.55% more than last year and 3.85% more than last month.

These large stocks of fish should be moved out and used up. They are most excellent food; in fact, experts tell us that this fish, if frozen immediately it leaves the water and kept frozen until it is thawed out in cold water in the kitchen, is in reality superior to the fresh fish which is moved these hot days only in iced cars. We have taken pains to ascertain as to whether or not the cold storage men are to blame for holding back these fish. We are thoroughly convinced that they are not to blame, but are most eager to move the fish and have it used. They offer their stocks at a real sacrifice and yet the fish is not going into consumption as it should. The trouble is that the householders are not buying fish as they should, but instead are buying very much more expensive meat. If we do not soon use up some of this fish it will spoil, in spite of the fact that it is being offered at half price.

Respectfully submitted,

R. J. McFall

The following firms have not sent in their June 1st,  
1919 Inventory Statements.

Locksport Cold Storage	Locksport, N. S.
