NOT FOR LOAN
NE S'EMPRUNTE PAS

The Cost of Living Commissioner reports as follows to the Honourable Minister of Labour concerning stocks of food in cold storage and in process of cure on August 1st, 1919.

There are 20,043,991 pounds of creamery and 1,486,031 pounds of dairy butter in storage. This is approximately one and one quarter million pounds more than the total reported for a year ago, while the records for August 1917 show that only 12,250,124 pounds were reported at that time. Moreover, from our winter's supply of last year over six million pounds were commandeered from fall production besides the large amounts taken out of wholesale stocks for the British Ministry of Food in the summer and early fall by the Canada Food Board.

Oleomargarine stocks, as usual, are about equal to one-third of a month's domestic requirements, viz; 344,942 pounds.

The cheese stocks amount to 14,697,041 pounds. It is natural that stocks of cheese are increased over last month, but they are also 23.51% greater than a year ago. Now that the British price has dropped for cheese, this leaves a large amount of good food that should be made available for Canadian consumption at reasonable prices.

The eggs in cold storage amount to about the same as last month, 12,444,971 dozen. This is 18.62% above the amount stored last August in spite of the extremely high prices at which the eggs have gone into storage this year. Eggs on hand other than in cold storage amount to 1,019,154 dozen. This is 111.07% greater than on July 1st and 49.09% greater than a year ago. The stocks of frozen eggs, which are a product for commercial confectioners amount to 510,108 pounds.

The total stocks of pork on hand amount to 39,467,704 pounds. This is about the average of the stock carried during these last two years. A somewhat larger proportion is in process of cure this year than last, although about the same amount as last month. This amount in process of cure, or in the process of being manufactured, is by far the largest single item and about one-half the total amount, viz; 19,109,852 pounds. The frozen pork stocks are 6,570,760 pounds; unfrozen equals 1,932,187; dry salted equals 3,008,093 pounds, and sweet-pickled equals 8,846,812 pounds. These stocks are not likely to do the poor Canadian consumer much good until the price of pork and live hogs as well comes down materially.

The stocks of beef total 20,014,417 pounds. This is about one-third of the greatest amount recorded as being in storage at any one time in Canada during these last two years. Of this quantity 453,263 pounds are in process of cure and not in cold storage; 514,462 pounds are cured; 3,666,255 pounds are unfrozen fresh beef, and 15,380,437 pounds are frozen fresh beef. We are happy to note that there has been monthly a material drop in the wholesale price of beef. The consumers and retailers should see to it that this is carried out to the consumers' price.

Mutton and lamb stocks total 1,191,121 pounds. This is 25.9% less than a month ago and 45.73% less than a year ago. Of this total 991,438 pounds are frozen, while 199,683 pounds are not frozen.

Poultry in storage amounts to 1,201,384 pounds. This is 27.78% less than last month, but 432.32% more than last year. The stocks are classified as follows:- Broilers, 53,496 pounds; chickens, 712,009 pounds; fowl, 624,295 pounds; turkeys, 125,188 pounds; classified, 108,503 pounds; ducks, 11,825 pounds; and geese, 1,069 pounds.

The fish in cold storage amount to 21,044,744 pounds and on hand other than in cold storage to 3,587,743 pounds.
