Acting Chief, Agricultural Branch:	Ian McArthur, M.Sc.
Grain Statistician:	James McAnsh.

CAPACITY AND LOCATION OF FLOUR MILLS IN CANADA

1944

A total of 200 mills engaged in the production of wheat flour in Canada reported their operations to the Dominion Bureau of Statistics during the past year. Of this number, 90 were in Ontario, 102 in the three Prairie Provinces and the remaining eight in Quebec, the Maritime Provinces and British Columbia. The location of these mills and their daily capacity for the production of flour are listed on the pages that follow.

Capacity figures shown against each mill represent, in the great majority of cases, the rated capacity in barrels of 196 pounds each, per 24 hours of operation. Thus, the 200 mills listed could, in a single day, working three shifts of 8 hours each, produce a total of 92,500 barrels of flour. But this rate of daily output could not be maintained throughout the year in view of Sundays, holidays, breakdowns and stoppages necessary for the overhaul and repair of machinery.

Many of these mills estimate that they could maintain their rated daily capacity for 300 days or more in the year, others estimate between 200 and 300 days and still others indicate a maximum of less than 200 days annually. The average would appear to be in the neighbourhood of 285 days per year, and this would represent an output of 26,366,000 barrels of flour annually.

The calendar year 1943 witnessed the heaviest production of wheat flour in the history of the Canadian milling industry. A total of 24,474,696 barrels of 196 pounds each, was produced in the 12 months ended December last, according to preliminary figures. This was equal to 93 per cent of the maximum production capacity indicated for 1944. Some mills operated on a seven-day week for extended periods during 1943 under the pressure of export orders from the United Nations.

A summary of the reporting mills by size groups, and their rated capacity per 24 hours, is shown below:

<u>Rated Daily Capacity</u>	<u>Number of Mills</u>	<u>Barrels of Flour Per 24-hour Day</u>
5,001 to 12,000 barrels	4	33,000
1,001 to 5,000 barrels	16	36,920
501 to 1,000 barrels	6	4,525
301 to 500 barrels	7	2,800
101 to 300 barrels	36	6,973
51 to 100 barrels	59	5,382
50 or less barrels	72	2,919
T o t a l	200	92,519

On the pages that follow, the mills have been summarized by provinces and rated capacity to give a quick picture of the provincial location and sizes of mills. They are then grouped by size and listed alphabetically by name, showing town or city and province of location. Finally the mills are listed by size groups within each province.

PROVINCIAL DISTRIBUTION BY SIZE GROUPS

T o t a l	30	40	32	1	200

A number of mills which have not been reporting the production of wheat flour during the past year, but are shown on the records of the Dominion Bureau of Statistics to possess machinery for the production of flour, are listed separately. Lack of power to operate the flour mill, the need of some new machinery, and shortage of skilled help are among the reasons given for non-operation of these mills.

RYE FLOUR MILLERS IN CANADA

The record of drawback payments made to millers producing rye flour for domestic consumption in Canada and reports received by the Dominion Bureau of Statistics show that the following companies were engaged in the production of rye flour or meal during the past year. The volume of rye flour produced in Canada is not very large. In 1942, the last complete year for which figures are available, the output was 52,600 barrels of 196 pounds each.

Ontario is the location of three mills producing rye flour and meal, including the largest single producer, while in Manitoba there are two, in Alberta two, and in Saskatchewan one, a total of eight mills. Since the rye subsidy went into effect in May 1943, these mills have been paid claims on 26,000 barrels of rye flour and meal, but in a number of cases the payments include only part of a year.

The names and locations of the mills reporting production of rye flour and meal are listed below:

Maple Leaf Milling Co. Ltd.,
Port Colborne, Ontario.

Morris Milling Co. Ltd.,
Morris, Manitoba.

Elder Flour Mills Ltd.,
1050 King St. W., Toronto, Ontario.

Melville Milling Co.,
Melville, Saskatchewan.

E. L. Smith & Sons,
Scotland, Ontario.

Green Star Mill Ltd.,
Lethbridge, Alberta.

North Eastern Flour Mills Ltd.,
Beausejour, Manitoba.

United Grain Growers,
Edmonton, Alberta.

FLOUR MILLS NOT REPORTING ANY FLOUR PRODUCTION

The mills named on this supplementary list report that they possess flour milling machinery but are not reporting any production of flour. In some cases the lack of wheat is the reason given for non-production of flour, others lack water power, while in a number of cases labour and machinery troubles are responsible for no flour being produced.

By provinces, these mills and their location are tabulated as follows:
