Chief, Crop Branch: W. D. Porter.

CAPACITY AND LOCATION OF FLOUR MILLS IN CANADA

1946

A total of 178 mills with machinery for the production of wheat flour in Canada are listed by the Dominion Bureau of Statistics during the past year. Of this number, six mills (four in Ontario) did not use the flour milling machinery but operated as feed plants only, while four in the Western Provinces were closed or idle. The location of these mills and their daily capacity for the production of flour are listed on the pages that follow and capacity not in use is indicated.

Capacity figures shown against each mill represent, in the great majority of cases, the rated capacity in barrels of 196 pounds each, per 24 hours of operation. Thus, the 178 mills listed could, in a single day, working three shifts of 8 hours each, produce a total of 97,105 barrels of flour. But this rate of daily output could not be maintained throughout the year in view of Sundays, holidays, breakdowns and stoppages necessary for the overhaul and repair of machinery.

Many of these mills estimate that they could maintain their rated daily capacity for 300 days or more in the year, others estimate between 200 and 300 days and still others indicate a maximum of less than 200 days annually. The average would appear to be in the neighbourhood of 285 days per year, and this would represent an output of 27,675,000 barrels of flour annually.

The calendar year 1945 witnessed the heaviest production of wheat flour in the history of the Canadian milling industry. A total of 25,059,218 barrels of 196 pounds each was produced in the 12 months ended December 1945, according to preliminary figures. The revised production for 1944 was 24,265,594 barrels.

A summary of the mills by size groups, and their rated capacity per 24 hours, is shown below:

<u>Rated Daily Capacity</u>	<u>Number of Mills</u>	<u>Barrels of Flour Per 24-hour Day</u>
5,001 to 12,000 barrels	4	33,000
1,001 to 5,000 barrels	17	40,470
501 to 1,000 barrels	7	5,325
301 to 500 barrels	10	4,185
101 to 300 barrels	40	7,520
51 to 100 barrels	51	4,535
50 or less barrels	49	2,070
<u>T o t a l</u>	<u>178</u>	<u>97,105</u>

On the pages that follow, the mills have been summarized by provinces and rated capacity to give a quick picture of the provincial location and sizes of mills. They are then grouped by size and listed alphabetically by name, showing town or city and province of location. Finally the mills are listed alphabetically within each province.

PROVINCIAL DISTRIBUTION BY SIZE GROUPS

The six mills which have not been reporting the production of wheat flour during the past year, but are shown on the records of the Dominion Bureau of Statistics to possess machinery for the production of flour are marked (*). These have a capacity of 300 barrels per 24 hours. Four mills marked closed or idle have a capacity of 255 barrels per 24 hours.
