LOCATION AND CAPACITY OF FLOUR MILLS IN CANADA

1 9 4 8

November 1, 1948 - The latest revised list of wheat flour mills in Canada compiled by the Dominion Bureau of Statistics is presented herewith. The list numbers 174 flour mills with a total daily capacity of 107,034 barrels in 24 hours. Of this number, five mills (three in Ontario, one in Saskatchewan and one in British Columbia) did not use the flour milling machinery but operated as feed mills only.

Although there were seven fewer flour mills listed this year than were published for 1947, an expansion in some plants raised the total daily capacity by some 5,500 barrels. Mills in the province of Ontario accounted for 48.9 per cent of the total available capacity for all Canada. During the summer of 1948 some mills for the first time in recent years were able to close for a period of thirty days to allow for the overhaul and repair of machinery.

Accelerated by the heavy export demand for Canadian flour, the industry experienced a record production of 28,057,463 barrels in the calendar year 1947, topping the previous year's output of 27,307,256 barrels. Production during 1948 will fall below the high levels reached in the two preceding years.

A summary of the mills by size groups, and their rated capacity per 24 hours, is shown below:

<u>Rated Daily Capacity</u>	<u>Number of Mills</u>	<u>Barrels of Flour Per 24-hour Day</u>
5,001 to 13,000 barrels	5	39,100
1,001 to 5,000 barrels	16	39,520
501 to 1,000 barrels	11	8,950
301 to 500 barrels	14	5,840
101 to 300 barrels	42	7,810
51 to 100 barrels	47	4,195
50 or less barrels	39	1,619
<u>T o t a l</u>	<u>174</u>	<u>107,034</u>

On the pages that follow, the mills have been summarized by provinces and rated capacity to give a quick picture of the provincial location and sizes of mills. They are then grouped by size and listed alphabetically by name, showing town or city and province of location. Finally the mills are listed alphabetically within each province.
