ICE CREAM PRODUCTION IN CANADA, 1935.

Ice cream as an article of food is of such growing importance that a separate monograph dealing with it appears to be warranted. It possesses all the elements of a real food, being easily digested, palatable and highly nutritive.

The production of ice cream is carried on chiefly by the dairy and confectionery industries, whilst a further production is also reported by the baking industry. Statistics of production by quantity and value since the inception of the annual census of manufactures are shown for the above-named industries in the following table.

Table 1. - Ice Cream Production, by Industries, 1917-1935.

Year	Bread and Other Bakery Products		Biscuits, Confectionery, Etc.		Dairy Industry		Total Production	
	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value

1935	34,007	58,066	795,187	969,776	5,758,469	7,023,241	6,587,663	8,051,083

1/ Included with "Bread and Other Bakery Products" in 1917 and 1918.

**NOTE:** - It should be remembered that the above table does not include the production of ice cream in hotels, restaurants and ice cream parlours. The total production and consumption of ice cream is, therefore, materially higher than the figures shown in the present report.

ICE CREAM PRODUCTION IN CANADA, 1935.

Production of ice cream by provinces is shown in table 2 by quantity and value for the calendar years 1930 to 1935. In 1935 the Province of Ontario led in production, contributing 49.3 per cent of the total gallonage and 47.8 per cent of the total value.

CONSUMPTION OF ICE CREAM BY PROVINCES, QUANTITY AND VALUE, 1930 to 1935.

The per capita consumption of ice cream is shown by quantity and value in table 3 for Canada and the provinces for the calendar years 1930 to 1935. The per capita consumption increased from .55 gallons in 1934 to .60 gallons in 1935, an increase of 9.1 per cent.

The provinces showing the highest per capita consumption were: Ontario with .88 gallons, British Columbia and Nova Scotia with .76 and .62 gallons respectively, whilst the lowest per capita is shown by Saskatchewan with .32 and Prince Edward Island with .31 gallons respectively.
