ICE CREAM PRODUCTION IN CANADA, 1942

The production of ice cream is carried on chiefly by the dairy and confectionery industries, whilst a further production is also reported by the baking industry. Statistics of production by quantity and value since 1922 are shown for the above-named industries in the following tables.

NOTE: The above table does not include the production of ice cream in hotels, restaurants and ice cream parlours, and also Ice cream mix (unfrozen) and novelties. The total production and consumption of ice cream is, therefore, materially higher than the figures shown in the present report.

REPORT OF THE COMMISSIONER OF THE BUREAU OF LABOR STATISTICS
ON THE STATE OF THE ECONOMY IN 1922

DEPARTMENT OF LABOR AND INDUSTRY
BUREAU OF LABOR STATISTICS
WASHINGTON, D. C.

THE STATE OF THE ECONOMY IN 1922

The following table shows the change in the volume of production of the principal industries of the United States during the year 1922, as compared with 1921. The figures are based on the index of industrial production, which is a measure of the quantity of goods and services produced in the United States.

NOTE: The above table does not include the production of the principal commodities, but only the volume of production of the principal industries. The figures are based on the index of industrial production, which is a measure of the quantity of goods and services produced in the United States.

Production of ice cream by provinces is shown in table 2 by quantity and value for the calendar years 1937 to 1942. In 1942 the Province of Ontario led in production, contributing almost 43 per cent of the total gallonage.

CONSUMPTION OF ICE CREAM BY PROVINCES, AND QUANTITY, 1937 to 1942

The per capita consumption of ice cream is shown by quantity in table 3 for Canada and the provinces for the calendar years 1937 to 1942. The per capita consumption was 1.11 gallons in 1941 and 1.17 gallons in 1942 an increase of .06 gallons or approximately 7 per cent.

The provinces showing the highest per capita consumption were: British Columbia with 1.59 gallons, Ontario and Nova Scotia with 1.53 and 1.41 gallons, respectively, whilst the lowest per capita is shown by Prince Edward Island with .72 gallons and Quebec with .75 gallons.
