LOCATION AND CAPACITY  
OF  
FLOUR AND FEED MILLS  
IN  
CANADA  
1938

---

The location and capacity of the flour and feed mills of Canada are given in the following pages of this report. The list covers 401 flour mills with a total 24-hour capacity of 102,992 barrels and 943 feed mills. Ontario is the leading province in this industry. Thirty-five per cent of the flour mills, fifty-nine per cent of the feed mills and forty-seven per cent of the flour milling capacity in Canada are located in Ontario. Quebec ranks second as far as the number of flour and feed mills is concerned, but in flour milling capacity Saskatchewan is second to Ontario, followed by Quebec, Alberta and Manitoba. The Maritime Provinces and British Columbia have a small flour milling capacity.

In the flour section there are eleven fewer mills than for the year 1937 and a decrease in capacity of 770 barrels. Feed mills gained forty-nine in number, Quebec accounting for forty-four of this increase.

The Prairie Provinces show only minor changes in milling conditions since the publication of last year. Mills in the drought areas of the province of Saskatchewan have not been able to resume operations. These mills are included but have been marked idle.

The total capacity of the flour mills in Canada includes milling machinery in active use and also some which may be idle at the time or withdrawn from use for a more extended period. Some large mills may be closed entirely or have certain units of the machinery covered and idle. Small mills are not built in units and, therefore, must be either active or idle. Their operations may be seasonal or continuous, but there is usually a post-harvest rush in custom mills and the highest percentage of Canadian milling capacity is in operation during the fall and early winter months.

In all cases, capacity is shown in terms of 24-hour operation, but a plant may run only a day shift or perhaps full time with one out of two equal-sized units closed and thus be operating at half its total capacity.

These reservations should be kept in mind when studying the capacity of Canadian flour mills.

SUMMARY

---

Province	<u>Number of Mills</u>			<u>Barrels per day</u>
	<u>Flour</u>	<u>Feed</u>	<u>Total</u>
