NOTES TO USERS

1. "Explanatory Notes" on selected statistical terms may be found at the back of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.

2. Principal statistics of establishments classified by size group, based on total employed, were omitted from industry reports for the years 1968-1971 and principal statistics of establishments by type of organization were last published in the 1967 industry reports. However, this information is available on request from the Manufacturing and Primary Industries Division. In the case of an extensive request, involving a large number of industries or years, it may be necessary to levy a charge.

3. Users interested in obtaining the value of production (manufacturing activity) can do so by adding cost of materials and supplies used (manufacturing activity), cost of fuel and electricity, and value added (manufacturing activity).

NOTES AU LECTEUR

1. On trouvera à la fin de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.

2. Les tableaux renfermant les statistiques principales des établissements par tranche de taille mesurée par les effectifs ont été supprimés des publications de 1968 à 1971. Les statistiques principales des établissements selon la forme juridique ont été données pour la dernière fois dans les publications de 1967. On peut toutefois obtenir ces renseignements en s'adressant à la Division des industries manufacturières et primaires. Les demandes élaborées visant un grand nombre d'industries ou d'années pourront entraîner la facturation des frais.

3. Il suffit au lecteur qui désire connaître la valeur de la production (activité manufacturière) d'additionner le coût des matières et fournitures utilisées (activité manufacturière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité manufacturière).

SCIERIES ET ATELIERS DE RABOTAGE
C.A.E. 2513

1973

Establishments primarily engaged in sawing and planing lumber and those producing ties, spoolwood, lath and other mill products such as cooperage, stock and box shooks from roundwood are included in the sawmill and Planing Mill industry.

The sawmills and planing mills industry continued to boom in 1973 as the value of shipments of goods of manufacture increased 35.1% from \$1,893,573,000 in 1972 to an unprecedented \$2,558,546,000 in 1973. Just about all of this increase resulted from an increase of about 30.5% in the average unit value of lumber coupled with an increase of about 5% in the total volume of lumber shipped.

Exports of Canadian lumber continued their upward trend as shipments rose some 2% to 9,968,405 M ft. b.m. in 1973 from 9,791,841 in 1972. Exports to the U.S.A., Canada's single most important customer fell off by 3% from 8,555,275 M ft. b.m. in 1972 to 8,324,628 M ft. b.m. in 1973. However, the value of these shipments increased 26% from \$1,018,033,000 in 1972 to \$1,284,982,000 in 1973.

Production and related workers increased 8.6% from 49,387 in 1972 to 53,643 in 1973 and they were paid \$454,797,000 in salaries and wages. This represents 35.6% of the total value added of this industry in the 1973 year, down 7.2% from the 42.8% recorded in 1972 (53.3% in 1971).

The continuing trend of the decline (unbroken since 1961) in the number of establishments classified to this industry is evident again this year. Establishments classified to the sawmills and planing mills industry decreased 3.1% to 1,519 in 1973 from 1,567 in 1972.

Les établissements dont l'activité principale est le sciage et le rabotage du bois et la fabrication de traverses, de bois à fuseaux, de lattea et d'autres produits de scierie, tels que le bois de tonnellerie et les planchettes à boîtes à partir de bois rond sont inclus dans l'Industrie des scieries et ateliers de rabotage.

L'industrie des scieries et ateliers de rabotage a continué sa progression en 1973 puisque la valeur des livraisons de produits de propre fabrication a augmenté de 35.1%, passant de \$1,893,573,000 en 1972 à un niveau sans précédent de \$2,558,546,000 en 1973. Cette hausse provient en grande partie d'une augmentation d'environ 30.5% de la valeur unitaire moyenne du bois d'œuvre et d'une autre d'environ 5% au titre du volume total des livraisons de bois d'œuvre.

Poursuivant leur tendance à la hausse, les exportations de bois d'œuvre canadien ont progressé d'environ 2%, passant de 9,791,841 milliers de p.m.p. en 1972 à 9,968,405 milliers de p.m.p. en 1973. Les exportations vers les États-Unis, qui sont le plus important client du Canada, ont baissé de 3%, passant de 8,555,275 milliers de p.m.p. en 1972 à 8,324,628 milliers de p.m.p. en 1973. Toutefois, la valeur de ces livraisons a augmenté de 26% pour s'établir à \$1,284,982,000 en 1973 (\$1,018,033,000 en 1972).

Le nombre de travailleurs de la production et assimilés est passé de 49,387 en 1972 à 53,643 en 1973, une augmentation de 8.6%, et ils ont gagné \$454,797,000 sous forme de traitements et salaires. Ce montant, qui représente 35.6% de la valeur totale ajoutée par cette industrie en 1973, est une baisse de 7.2% par rapport aux 42.8% enregistrés en 1972 (53.3% en 1971).

La baisse du nombre des établissements de cette industrie s'est poursuivie cette année encore. Cette tendance se prolonge depuis 1961. Le nombre d'établissements classés dans l'industrie des scieries et ateliers de rabotage a connu une baisse de 3.1%, passant de 1,567 en 1972 à 1,519 en 1973.

SECTION 2

SHINGLE MILLS
S.I.C. 2511

USINES DE BARDEAUX
C.A.E. 2511

1973

This industry includes establishments whose major activity is shingle and shake manufacturing.

The value of shipments of goods of own manufacture of the establishments classified to this industry increased 22.6% to \$68,223,000 in 1973 from \$55,657,000 in 1972. As was the case in 1972, this increase resulted from substantial increases in average unit values of shingles and shakes. On an all industry basis, average unit values of shingles and shakes increased 24.2% from \$24.44 per square in 1972 to \$30.35 per square in 1973. During this same period quantities shipped dropped slightly from 2,766,302 squares in 1972 to 2,723,804 squares in 1973.

Exports of shingles and shakes also fell off slightly to 2,692,547 squares in 1973 from 2,704,283 squares in 1972.

The number of production and related workers increased 3.8% to 1753 in 1973 and they were paid \$16,639,000 in salaries and wages. This represents 53.2% of the value added by manufacturing activity of this industry.

Cette industrie comprend les établissements dont l'activité principale est la fabrication de bardeaux et de bardeaux fendus.

La valeur des livraisons des produits de propre fabrication déclarée par les établissements de cette industrie a augmenté de 22.6 %, passant de \$55,657,000 en 1972 à \$68,223,000 en 1973. Comme ce fut le cas en 1972, cette hausse provient d'augmentations appréciables de la valeur unitaire moyenne des bardeaux et bardeaux fendus. Dans l'ensemble des industries, les valeurs unitaires moyennes des bardeaux et bardeaux fendus ont augmenté de \$24.44 en 1972 à \$30.35 par carré en 1973, ce qui représente une progression de 24.2 %. Au cours de la même période, les quantités livrées ont diminué légèrement pour s'établir à 2,723,804 carrés en 1973 (2,766,302 carrés en 1972).

Les exportations de bardeaux et bardeaux fendus ont également subi un léger fléchissement puisqu'elles sont passées de 2,704,283 carrés en 1972 à 2,692,547 carrés en 1973.

Le nombre de travailleurs de la production et assimilés a augmenté de 3.8 % en 1973 pour se chiffrer à 1753, alors que les traitements et salaires payés atteignaient \$16,639,000. Ce montant représente 53.2 % de la valeur ajoutée par l'activité manufacturière de cette industrie.

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment — Smallest operating unit capable of reporting certain specified input and output data, usually a plant or mill.

Large Establishments

Cost of materials and supplies, fuel and electricity — Generally, consumption of purchased items only, at laid-down cost. Includes inter-company and intracompany transfers, contract work by others, fuel used by vehicles.

Value of shipments of goods of own manufacture — Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown in place of shipments in tables on principal statistics. Integrated smelters' work on own ore valued at imputed charge to mine.

Value added — Net output as measured by gross output less purchased commodity inputs used and contract work by others.

(a) **Value added, manufacturing activity:** Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

(b) **Value added, total activity:** Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends, interest.

Employees, salaries and wages — Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use; beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

Inventories — Book value of owned inventory held in Canada, including goods in transit and on consignment.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services, and "total revenue excluding interest and dividends received" is used for both shipments of goods of own manufacture and gross output, total activity; value added is calculated using these figures and net change in total inventory, and is thus identical for manufacturing and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units — Included in the individual industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data).

NOTES EXPLICATIVES

Les notes succinctes ci-après s'arrêtent uniquement aux points saillants et à certaines extensions ou restrictions pouvant nécessiter une explication. Sur simple demande, on pourra obtenir les "Concepts et définitions" détaillés; se reporter aux "Notes au lecteur".

Etablissement — Plus petite unité exploitante en mesure de fournir certaines données sur ses facteurs de production (entrées) et sur sa production (sorties), en général, usine ou fabrique.

Grands établissements

Coût des matières et fournitures, du combustible et de l'électricité — De manière générale, concerne uniquement la consommation de produits achetés, au prix franco. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat et la consommation de carburant, par les véhicules.

Valeur des livraisons de produits de propre fabrication — Concerne les produits fabriqués par l'établissement enquêté, ou pour son compte, à partir de matières lui appartenant, déduction faite des rabais, des retours de marchandises, des remises, des taxes de ventes, des taxes et des droits d'accise, des emballages consignés, des frais de livraisons payés à des transporteurs publics ou sous contrat (mais non des frais de livraisons de l'établissement même). Comprend les recettes de réparations et de contrats, les transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits donnés en location par l'établissement. Les livraisons sans vente en consignation au Canada sont prises en compte dans les stocks. En ce qui concerne l'industrie de la fabrication d'éléments de charpente métallique, les fabricants d'aéronautes et de pièces, les fabricants de matériel ferroviaire roulant ainsi que l'industrie de construction et de réparation de navires, la valeur de la production remplace les livraisons dans les tableaux relatifs aux statistiques principales. Pour déterminer la valeur du travail effectué par une fondue intégrée sur du minerai lui appartenant, on calcule le coût qu'il faudrait imputer à la mine.

Valeur ajoutée — Sortie nette, soit sortie brute moins consommation de biens achetés et travaux exécutés par d'autres sous contrat.

(a) **Valeur ajoutée, activité manufacturière:** valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.

(b) **Valeur ajoutée, activité totale:** comprend (1) la valeur ajoutée par l'activité manufacturière et (2) la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les éléments d'actif amortissable produits par la main-d'œuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors-exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Salariés, traitements et salaires — Les traitements et salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et des avantages sociaux des employés; ils comprennent les heures-hommes payées (heures normales, supplémentaires et congés payés) ainsi que les gratifications, commissions, etc., versées aux salariés. Les travailleurs de la production et assimilés classés dans l'activité non manufacturière comprennent les bûcherons, les ouvriers de la construction pour le compte de l'établissement, etc., lorsqu'ils ont été déclarés séparément; à partir du recensement de 1970, les ouvriers à la pièce de l'extérieur, autrefois classés dans certaines industries, ne sont plus compris dans la statistique de l'emploi et leur rémunération a été prise en compte au titre des travaux sous contrat exécutés par des tiers. Les employés à la vente et à la distribution comprennent tout le personnel imputé aux frais de vente, certains chauffeurs, etc.

Stocks — Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignation.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés, et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons de marchandises de propre fabrication et pour la production brute de l'activité totale; la valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité manufacturière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires — Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir des données de 1970).
