SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- ... figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- ... nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

ABBREVIATIONS

NOTES TO USERS

1. "Explanatory Notes" on selected statistical terms may be found at the back of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.
2. Principal statistics of establishments classified by size group, based on total employed, were omitted from industry reports for the years 1968-1971 and principal statistics of establishments by type of organization were last published in the 1967 industry reports. However, this information is available on request from the Manufacturing and Primary Industries Division. In the case of an extensive request, involving a large number of industries or years, it may be necessary to levy a charge.
3. Users interested in obtaining the value of production (manufacturing activity) can do so by adding cost of materials and supplies used (manufacturing activity), cost of fuel and electricity, and value added (manufacturing activity).

NOTES AU LECTEUR

1. On trouvera à la fin de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.
2. Les tableaux renfermant les statistiques principales des établissements par tranche de taille mesurée par les effectifs ont été supprimés des publications de 1968 à 1971. Les statistiques principales des établissements selon la forme juridique ont été données pour la dernière fois dans les publications de 1967. On peut toutefois obtenir ces renseignements en s'adressant à la Division des industries manufacturières et primaires. Les demandes élaborées visant un grand nombre d'industries ou d'années pourront entraîner la facturation des frais.
3. Il suffit au lecteur qui désire connaître la valeur de la production (activité manufacturière) d'additionner le coût des matières et fournitures utilisées (activité manufacturière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité manufacturière).

SECTION I

SAWMILL AND PLANING MILLS
S.I.C. 2513

SCIERIES ET ATELIERS DE RABOTAGE
C.A.E. 2513

1974

Establishments primarily engaged in sawing and planing lumber and those producing ties, spoolwood, lath and other mill products such as cooperage stock and box shocks from round wood are included in the Sawmill and Planing Mill Industry.

The Sawmill and Planing Mill Industry began to slip in 1974 as the value of shipments of goods of own manufacture dropped 8.9% from \$2,558,540,000 in 1973 to \$2,329,835,000 in 1974. Most of this decrease was the result of a drop just under 6% in the average unit value of sawn lumber together with a drop of 11% in the quantity of lumber shipped. Lumber shipments, when compared to 1973, decreased 10.7% to 13,136,632 M ft.h.m., and the value of these shipments dropped 15.7% from the 1973 figure of \$2,227,156,000 to \$1,877,695,000 in 1974. Export shipments of Canadian lumber fell off by 17% as compared to 1973 while the value of these exports tumbled 38%. Shipments to Canada's single most important customer, the United States of America dropped 22% from 8,324,418 M ft.b.m. (valued at \$1,284,935,000) in 1973 to 6,497,553 M ft.b.m. (valued at \$899,861,000) in 1974.

Of the total value of shipments of goods of own manufacture of the establishments classified to this industry, British Columbia accounted for 66%, Quebec 16% and Ontario 8%. These respective percentages have not changed substantially from those of the past few years.

Production and related workers decreased 8.3% from 53,643 in 1973 to 49,194 in 1974 and they were paid \$489,521,000 in salaries and wages. This represents 50% of the value added by manufacturing activity of this industry in the 1974 year (35.6% in 1973, 42.8% in 1972 and 53.3% in 1971).

Establishments classified to the Sawmill and Planing Mill Industry increased slightly from 1,519 in 1973 to 1,530 in 1974. This increase apparently reversed, at least temporarily, the downward trend (unbroken since 1961) in the number of establishments classified to this industry.

Users of these statistics are cautioned to the fact that in line with the policy of Statistics Canada to reduce the response burden of small establishments a standard short form questionnaire was used to survey small establishments in 1974. This resulted in the loss of some commodity detail particularly for lumber and ties. In 1973, small establishments accounted for about 1.3% of total lumber shipments.

Les établissements dont l'activité principale est le sciage et le rabotage du bois et la fabrication de traverses, de bois à fuseaux, de lattes et d'autres produits de scierie, tels que le bois de tonnelerie et les planchettes à houfes à partir de bois rond sont inclus dans l'industrie des scieries et ateliers de rabotage.

L'industrie des scieries et ateliers de rabotage a commencé à ralentir en 1974 puisque la valeur de ses produits de propre fabrication a fléchi de 8.9 %, passant de \$2,558,540,000 en 1973 à \$2,329,835,000 en 1974. Cette diminution est due en grande partie à une baisse d'un peu moins de 6 % de la valeur moyenne unitaire du bois scié et d'un recul de 11 % des livraisons de bois de construction. Si on les compare à celles de 1973, les livraisons de bois de construction en 1974 ont subi une baisse de 10.7 % pour s'établir à 13,136,632 milliers de p.m.p. alors que leur valeur diminueait de 15.7 % pour se fixer à \$1,877,695,000 (\$2,227,156,000 en 1973). Les exportations de bois de construction canadien ont marqué une baisse de 17 % en 1974, tandis que la valeur de ces livraisons fléchissait de 38 %. Les livraisons vers les États-Unis, le plus important client de Canada, ont régressé de 22 %, passant de 8,324,418 milliers de p.m.p. (évalués à \$1,284,935,000) en 1973 à 6,497,553 milliers de p.m.p. (évaluées à \$899,861,000) en 1974.

La Colombie-Britannique, le Québec et l'Ontario sont intervenus respectivement pour 66 %, 16 % et 8 % de la valeur totale des livraisons de produits de propre fabrication des établissements classés dans cette industrie. Depuis quelques années, ces pourcentages n'ont subi que de légères variations.

Le nombre de travailleurs de la production et assimilés est passé de 53,643 en 1973 à 49,194 en 1974, une diminution de 8.3 %; les traitements et salaires versés ont atteint \$489,521,000. Ce montant représente 50 % de la valeur ajoutée par les établissements de cette industrie en 1974 (35.6 % en 1973, 42.8 % en 1972 et 53.3 % en 1971).

Le nombre d'établissements classés dans l'industrie des scieries et ateliers de rabotage a légèrement augmenté, passant de 1,519 en 1973 à 1,530 en 1974. Cette progression renverse, du moins temporairement, la tendance à la baisse (ininterrompue depuis 1961) du nombre d'établissements de cette industrie.

Conformément à la décision de Statistique Canada de réduire le fardeau de réponse des petits établissements, il convient de rappeler à nos utilisateurs qu'un questionnaire abrégé a servi en 1974 pour tous les petits établissements. Nous avons donc perdu certains détails sur des produits tels que le bois de construction et les traverses. En 1973, les petits établissements ont figuré pour environ 1.3 % des livraisons totales de bois de construction.

SECTION 2

SHINGLE MILLS
S.I.C. 2511

USINES DE BARDEAUX
C.A.E. 2511

1974

This industry includes establishments whose major activity is shingle and shake manufacturing.

The value of shipments of goods of own manufacture of the establishments classified to this industry decreased 26.9% from \$68,223,000 in 1973 to \$49,844,000 in 1974. Most if not all of this decrease can be attributed to a drop of 23% in the volume of export shipments of shingles and shakes coupled with a decrease of approximately 13% in average unit values.

In 1974, exports of shingles and shakes amounted to 2,083,360 squares valued at \$54,323,000 as compared to the 1973 figures of 2,692,547 squares valued at \$80,232,000.

The number of production and related workers decreased 18.9% to 2,841 in 1974 from 3,415 in 1973 and they were paid \$16,639,000 in salaries and wages. This represents 70.8% of the value added by manufacturing activity of this industry up sharply from the 53.2% figure recorded in 1973.

Cette industrie comprend les établissements dont l'activité principale est la fabrication de bardaues et de bardaues fendus.

La valeur des livraisons de produits de propre fabrication de ces établissements est tombée de \$68,223,000 en 1973 à \$49,844,000 l'année suivante, une baisse de 26.9 %. Cette diminution est attribuable en grande partie, voire entièrement, à un fléchissement de 23 % du volume des exportations de bardaues et de bardaues fendus accompagné d'une baisse de 13 % environ des valeurs unitaires moyennes.

En 1974, les exportations de bardaues et de bardaues fendus ont atteint 2,083,360 carrés évalués à \$54,323,000 contre 2,692,547 carrés totalisant \$80,232,000 l'année précédente.

Le nombre de travailleurs de la production et assimilés est passé de 3,415 en 1973 à 2,841 en 1974, marquant une baisse de 18.9 %. Leurs traitements et salaires ont progressé sensiblement pour atteindre \$16,639,000 soit 70.8 % de la valeur ajoutée par l'activité manufacturière au regard de 53.2 % en 1973.

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment — Smallest operating unit capable of reporting certain specified input and output data; usually a plant or mill.

Large Establishments

Cost of materials and supplies, fuel and electricity — Generally, consumption of purchased items only, at laid-down cost. Includes inter-company and intracompany transfers, contract work by others, fuel used by vehicles.

Value of shipments of goods of own manufacture — Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown in place of shipments in tables on principal statistics. Integrated smelters' work on own ore valued at imputed charge to mine.

Value added — Net output as measured by gross output less purchased commodity inputs used and contract work by others.

(a) **Value added, manufacturing activity:** Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

(b) **Value added, total activity:** Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends, interest.

Employees, salaries and wages — Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use; beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

Inventories — Book value of owned inventory held in Canada, including goods in transit and on consignment.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services, and "total revenue excluding interest and dividends received" is used for both shipments of goods of own manufacture and gross output, total activity; value added is calculated using these figures and net change in total inventory, and is thus identical for manufacturing and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units — Included in the individual industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data).

NOTES EXPLICATIVES

Les notes succinctes ci-après s'arrêtent uniquement aux points saillants et à certaines extensions ou restrictions pouvant nécessiter une explication. Sur simple demande, on pourra obtenir les "Concepts et définitions" détaillés; se reporter aux "Notes au lecteur".

Établissement — Plus petite unité exploitante en mesure de fournir certaines données sur ses facteurs de production (entrées) et sur sa production (sorties); en général: usine ou fabrique.

Grands établissements

Coût des matières et fournitures, du combustible et de l'électricité — De manière générale, concerne uniquement la consommation de produits achetés, au prix franc. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat et la consommation de carburant, par les véhicules.

Valeur des livraisons de produits de propre fabrication — Concerne les produits fabriqués par l'établissement enquêté, ou pour son compte, à partir de matières lui appartenant, déduction faite des rabais, des retours de marchandises, des remises, des taxes de ventes, des taxes et des droits d'accise, des emballages consignés, des frais de livraisons payés à des transporteurs publics ou sous contrat (mais non des frais de livraisons de l'établissement même). Comprend les recettes de réparations et de contrats, les transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits donnés en location par l'établissement. Les livraisons sans vente en consignation au Canada sont prises en compte dans les stocks. En ce qui concerne l'industrie de la fabrication d'éléments de charpente métallique, les fabricants d'aéronefs et de pièces, les fabricants de matériel ferroviaire roulant ainsi que l'industrie de construction et réparation de navires, la valeur de la production remplace les livraisons dans les tableaux relatifs aux statistiques principales. Pour déterminer la valeur du travail effectué par une fonderie intégrée sur du minerai lui appartenant, on calcule le coût qu'il faudrait imputer à la mine.

Valeur ajoutée — Sortie nette, soit sortie brute moins consommation de biens achetés et travaux exécutés par d'autres sous contrat.

a) **Valeur ajoutée, activité manufacturière:** valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.

b) **Valeur ajoutée, activité totale:** comprend (1) la valeur ajoutée par l'activité manufacturière et (2) la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les éléments d'actif amortissable produits par la main-d'œuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors-exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Salariés, traitements et salaires — Les traitements et salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et des avantages sociaux des employés; ils comprennent les heures-hommes payées (heures normales, supplémentaires et congés payés) ainsi que les gratifications, commissions, etc. versées aux salariés. Les travailleurs de la production et assimilés classés dans l'activité non manufacturière comprennent les bûcherons, les ouvriers de la construction pour le compte de l'établissement, etc., lorsqu'ils ont été déclarés séparément; à partir du recensement de 1970, les ouvriers à la pièce de l'extérieur, autrefois classés dans certaines industries, ne sont plus compris dans la statistique de l'emploi et leur rémunération a été prise en compte au titre des travaux sous contrat exécutés par des tiers. Les employés à la vente et à la distribution comprennent tout le personnel imputé aux frais de vente, certains chauffeurs, etc.

Stocks — Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignation.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", le coût des matières, fournitures et services comprend, à partir des données de 1970, tous les services achetés, et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons de marchandises de propre fabrication et pour la production brute de l'activité totale; la valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité manufacturière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires — Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir des données de 1970).
