THE COOPERAGE INDUSTRY, 1938

Ottawa, January, 1940. - The Cooperage industry includes all establishments engaged wholly or principally in the manufacture of barrels, casks, kegs, tubs, etc. Some of these plants manufacture their own staves and heading in the same establishment as that in which the barrels are assembled and sometimes dispose of surplus cooperage stock, but for the most part they purchase such stock from the stave, heading and hoop mills belonging to the sawmill industry. There are also a number of establishments classified in other industries which manufacture stock and assemble barrels as a side line or for their own use. It should therefore be borne in mind that the figures herein given refer only to those establishments whose main business is the production of complete barrels and similar containers.

There were 68 establishments in this group in 1938, distributed as follows: Nova Scotia 28, Ontario 23, Québec 7, New Brunswick 4, British Columbia 4, and Manitoba 2.

The table below gives the principal statistics of the industry for 1937 and 1938 and shows decreases in all items.

Complete figures on the production of cooperage and cooperage stock by all industrial groups and further details concerning this group will be given in a later report on the wood-using industries as a whole.

Principal Statistics

Principales statistiques

Item	Unit	1937	1938	Unité	Item
