MISCELLANEOUS WOOD-USING INDUSTRIES, 1929-30.

Ottawa, January, 1932. - A report has just been issued by the Forest Products Branch of the Dominion Bureau of Statistics dealing with a number of miscellaneous wood-using industries. This Branch of the Census of Industries publishes annually about fourteen special reports dealing with the more important wood-using industries including the manufacture of sash, doors and millwork, furniture, cooperage, boxes, wood-turning, woodenware, carriages and wagons, sporting goods, boats and canoes, lasts and trees, coffins and caskets, excelsior and hardwood flooring. The present report deals with firms which specialize more or less in the manufacture of beekeepers' and poultrymen's supplies, wooden piping, foundry patterns, pulleys, children's toy vehicles, wooden pumps, baby carriages and sleighs, wooden rules, spinning wheels and wood preservation. In cases where there are less than three firms engaged in a wood-using industry the details of production are included under the general item "All other wooden products".

There were 105 establishments engaged in turning out miscellaneous wooden products in Canada in 1930 with a capital investment of \$12,890,586. They employed 2,214 workers and distributed \$2,210,768 in salaries and wages. The fuel used by these firms was valued at \$147,617 and their power requirements were 10,795 H.P. Raw materials were valued at \$4,566,671 and the total gross value of production was \$9,770,749.

Out of the total of 105 establishments, 59 were located in Ontario and 24 in Quebec. British Columbia had 11, the Prairie Provinces 8 and the Maritime Provinces 3.

The most important single items of production were baby carriages \$279,402, children's vehicles \$246,650, wooden pipes \$146,572, patterns and models \$274,673, furniture and other cabinet work \$90,006, children's sleighs \$95,054, garment hangers \$90,619, wood pulleys \$57,923 and beekeepers' supplies \$31,086.

In most cases these figures and those given in Table 4 of the report give the greater part of the production of the commodities mentioned but in some cases these products are manufactured as side lines to one of the fourteen specified industrial groups referred to above, in which case additional figures will be found in the separate reports on the industries in question. Among the products reported by the firms in this group will be found a number of commodities which properly belong under one of the larger industries such as the manufacture of sash and doors. Any sash and doors included in Table 4 of this report were manufactured as a side line to one of the miscellaneous industries.

In the case of wood-using industries there are so many firms which make a large variety of products that an exact separation of these establishments into distinct industries is sometimes difficult or impossible. The present report is more or less a gathering-up of the loose ends in order to present a series of reports on wood-using industries which will be as complete as possible.

MISCELLANEOUS WOOD USING INDUSTRIES 1929-1930.

Table 1. - Principal Statistics, 1929-1930.

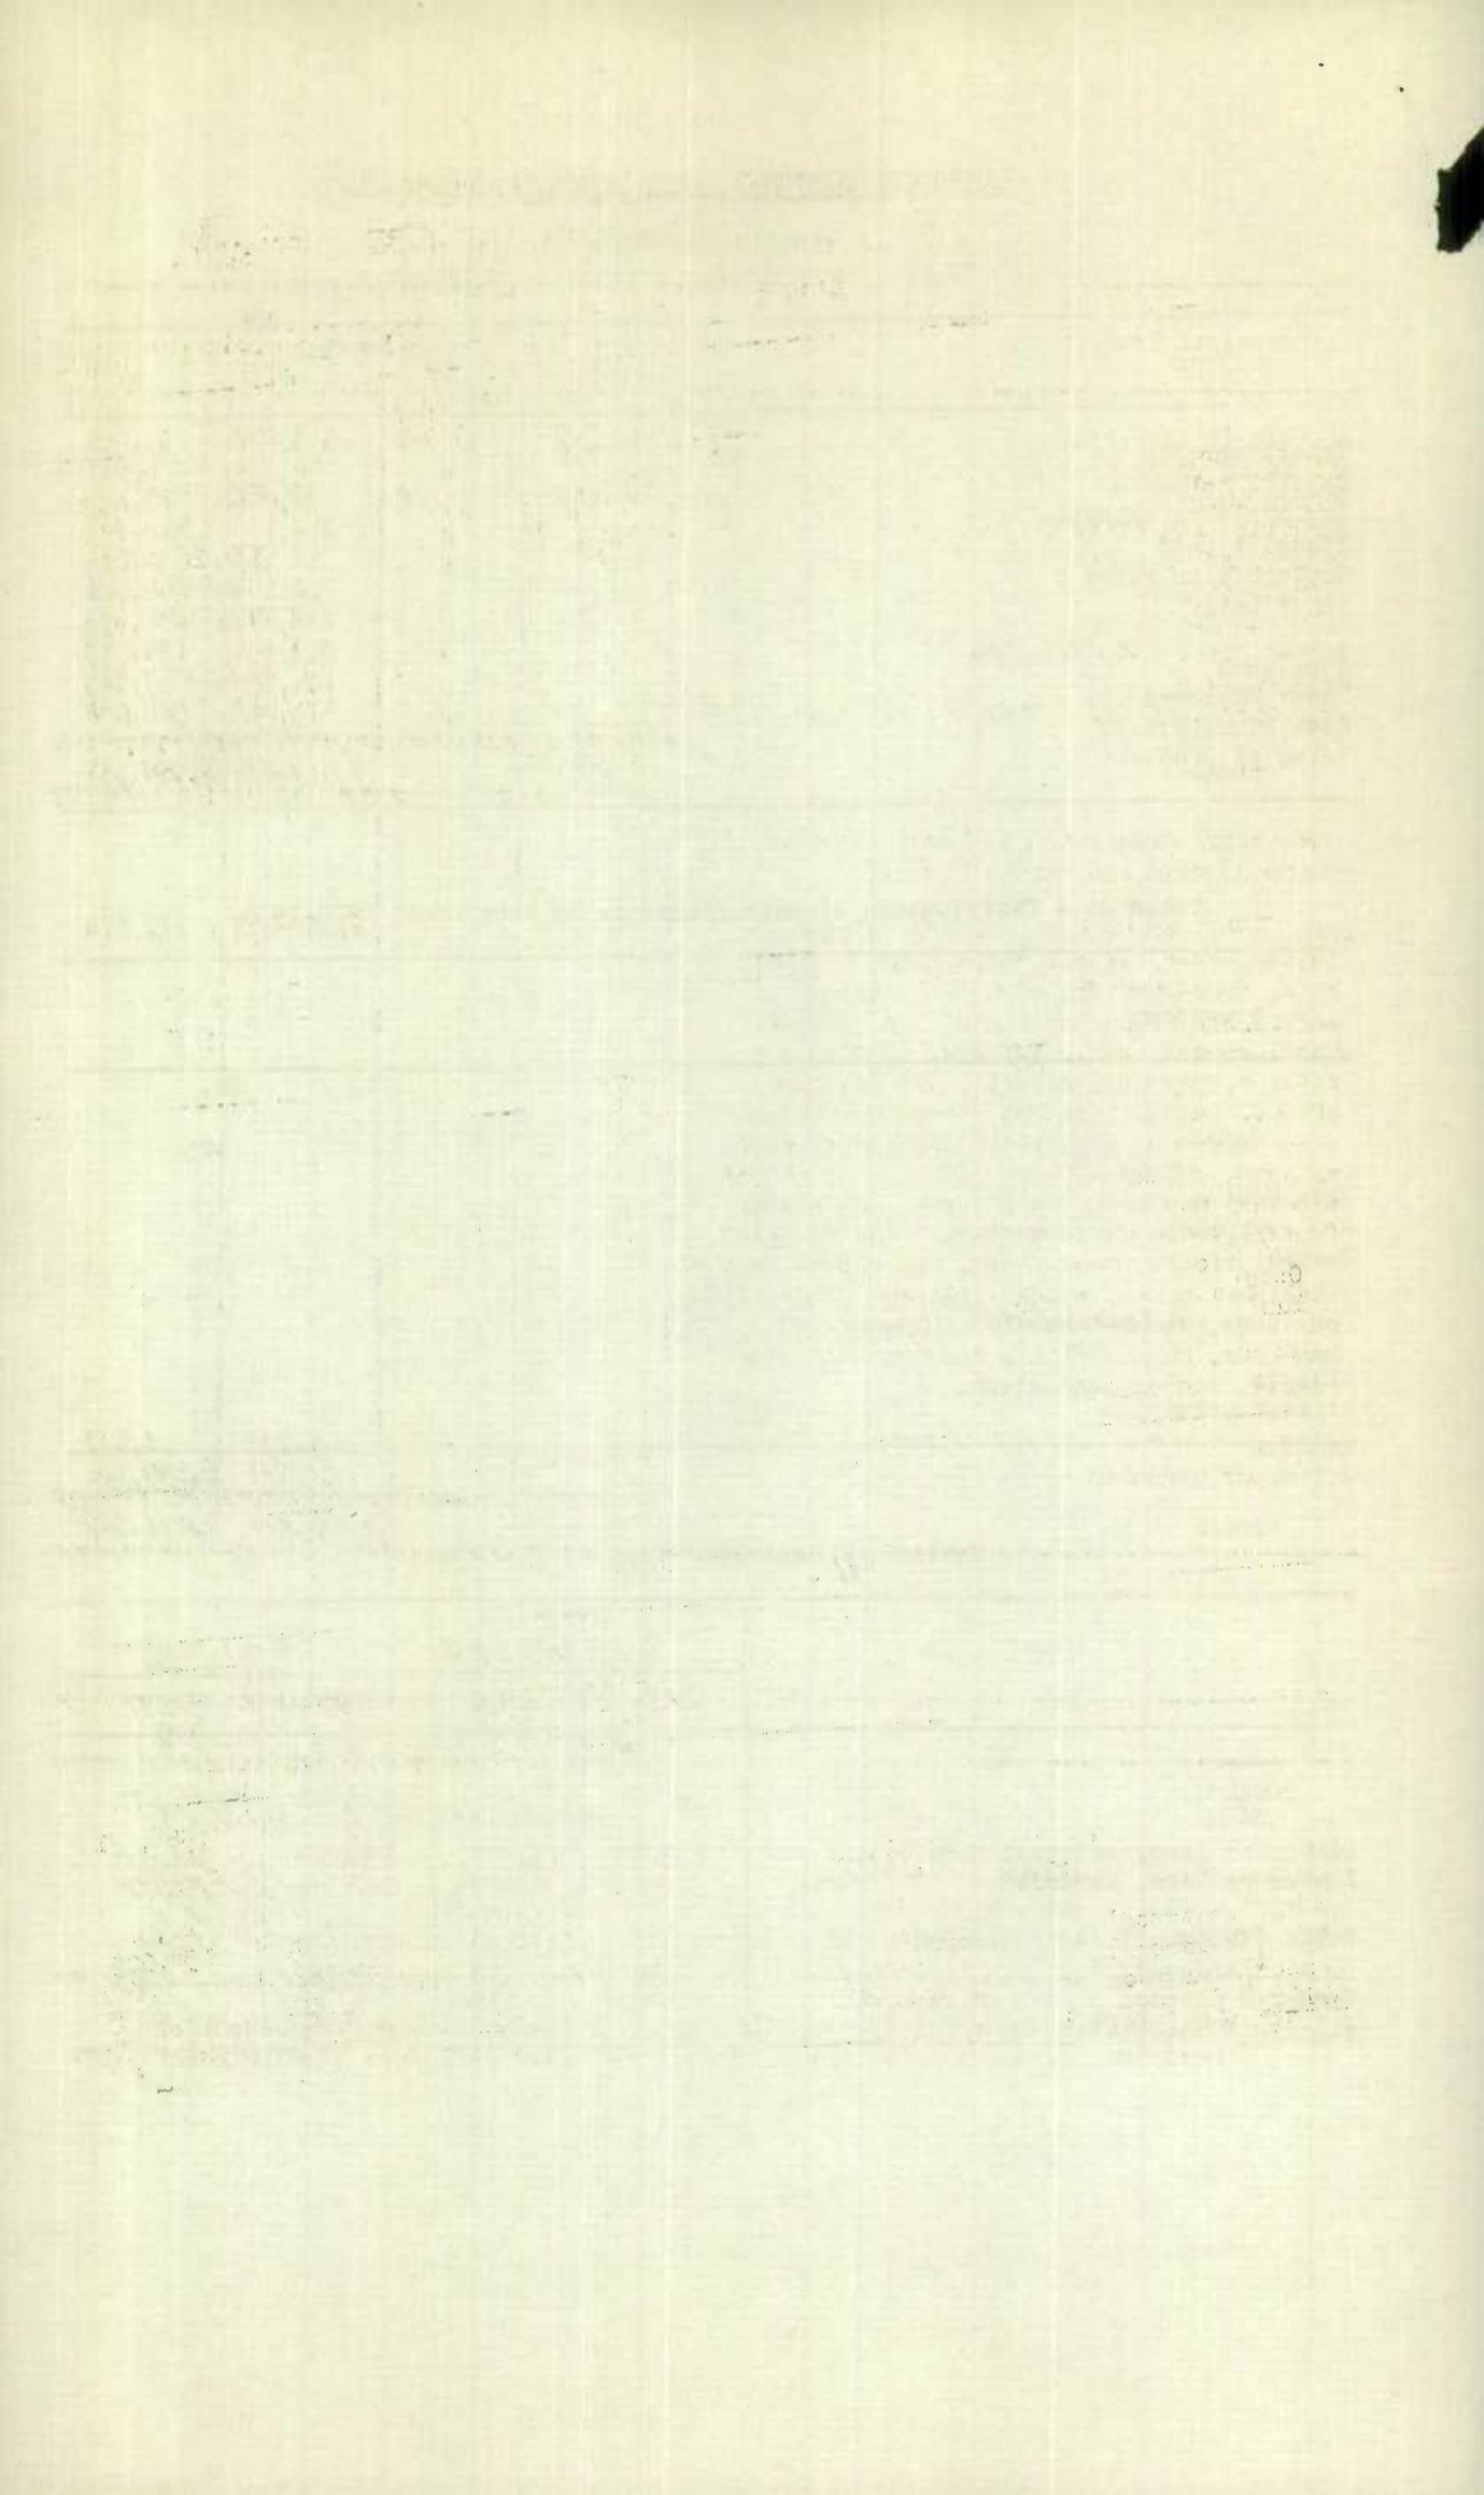

Items		1929	1930
Establishments	No.	90	105
Capital invested	\$	10,966,248	12,890,586
Employees on salaries	No.	18	158
Salaries paid	\$	384,735	330,641
Employees on wages	No.	1,830	2,056
Wages paid	\$	1,893,477	2,210,768
Fuel used	\$	128,685	147,617
Power employed	H.P.	4,706	10,795
Cost of materials	\$	4,896,236	4,566,671
Value of products	\$	9,381,802	9,770,749
