THE LUMBER INDUSTRY IN CANADA, 1935.

Ottawa, March, 1937. - The lumber industry as covered by this report includes the production of sawn lumber of all dimensions, shingles, sawn ties, box shooks, veneer, spoolwood, pickets, staves, heading and hoops and the cutting-up and barking or rossing of pulpwood. The gross value of production in this industrial group increased from \$54,819,071 in 1934 to \$65,905,132 in 1935, an increase of 20 per cent. There were increases in quantity for all the principal products except pulpwood, staves, pickets and heading, and increases in total value in all but pulpwood, box shooks, pickets and heading.

Accurate annual statistics on lumber production in Canada were first collected in 1908. Since that date the greatest production was reported for 1911 amounting to 4,918,202 M ft. b.m. A second peak was reached in 1920 and amounted to 4,298,804, and a third in 1929 amounting to 4,741,941. This was followed by annual decreases down to the minimum in 1932 amounting to 1,809,884. The production in 1935, amounting to 2,973,169 M ft. b.m. valued at \$47,911,256 represents increases of 15.3 per cent in total volume and 18.3 per cent in total value over the 2,578,411 M ft. b.m. valued at \$40,509,600 reported for 1934. The average value of sawn lumber of all kinds increased from \$15.71 in 1934 to \$16.11 in 1935.

The production of shingles increased in total quantity and total value from 2,408,616 squares valued at \$4,422,578 in 1934 to 3,258,253 squares valued at \$7,593,765 in 1935. The average value rose from \$1.84 in 1934 to \$2.33 in 1935.

Sawn ties numbered 5,641,673 and were valued at \$2,635,373 in 1935 as against 3,776,646 ties valued at \$1,686,519 reported in 1934, increasing in number as well as total and average value.

The cutting-up and barking or rossing of pulpwood is carried on as a side line in many Canadian sawmills and is therefore included as part of the lumber industry. Prepared pulpwood comes fourth in importance with 280,409 cords valued at \$2,061,280 in 1935 as compared to 438,464 cords valued at \$3,435,708 in 1934, decreasing in volume as well as total and average value.

In the case of lath the total quantity increased from 177,988 M in 1934 to 226,854 M in 1935 and the total value increased from \$412,844 in 1934 to \$536,087 in 1935, accompanied by an increase in average value.

There were more mills in operation in 1935 than in 1934 and the average production of lumber per mill was higher. The 3,303 mills reporting lumber in 1934 had an average annual output of 780 M feet board measure, while the 3,437 mills reporting in 1935 produced an average of 865 feet. Mills producing shingles numbered 922 in 1935 against 908 in 1934, and the average annual production per mill was 3,534 squares in 1935 against 2,652 squares the previous year. Sawn ties were produced in 484 establishments as compared with 348 in 1934, the annual average per mill increasing from 10,352 to 11,656. Laths were reported by 197 mills in 1935 or 27 less than the previous year, but the average annual production per mill was 1,152 M against 795 M in 1934.

The total number of employees in all mills on salaries and wages increased from 22,605 in 1934 to 25,727 in 1935. The total pay-roll increased from \$14,118,200 to \$17,711,657.

The cost of fuel used in the industry amounted to \$346,159 in 1935, as against \$406,620 in 1934. Electricity purchased cost \$305,799 in 1935 against \$153,732 in 1934. The power equipment of all mills including stand-by or emergency equipment was rated at 287,870 h.p. in 1935 as compared with 283,692 h.p. in 1934.

Raw materials in this industry, which are in the form of logs, bolts and rough cordwood, were valued at \$35,927,884 in 1935 as compared to \$29,487,086 in 1934. The value added by manufacture was \$29,325,290 and the total cost of raw materials formed 54.5 per cent of the total value of the finished products in 1935 as compared with 53.8 per cent in 1934.

The ratio of the cost of these raw materials to value of products for the last ten years is as follows:-

1926	58.4
1927	58.0
1928	57.7
1929	57.0
1930	60.2
1931	59.4
1932	60.8
1933	58.0
1934	53.8
1935	54.5

The capital invested in the industry increased from \$71,649,186 in 1934 to \$75,973,627 in 1935.

British Columbia heads the list in the production of sawn lumber, pulpwood and shingles. New Brunswick comes first in lath production. The production of lumber increased in all provinces.

NOTE: - The statistics given in this report have been compiled from reports received from regularly operated mills engaged primarily in the production of sawn lumber and similar sawmill products. The production figures represent all but a small part of the total Canadian production under most headings. They do not, however, include the production of these commodities when reported as side lines or by-products in industries other than the lumber industry nor the production of small portable mills which do not operate regularly nor confine their operations to a more or less definite area. In the case of lath a large part of the total production is carried on in small mills of this character and the figures given for lath production in this report are, therefore, less complete than in the case of other sawmill products.

L'INDUSTRIE DU BOIS AU CANADA, 1935.

Ottawa, mars 1937. — L'industrie du bois dont traite ce rapport comprend la production de bois d'œuvre de toutes dimensions ainsi que la production de bardeaux, traverses de voie ferrée, planchettes à boîtes, bois déroulé, bois à fuseaux, piquets, douves, fonds et cercles, et le débitage et l'écorçage du bois à pulpe. La valeur brute de la production de ce groupe industriel a passé de \$54,819,071 en 1934 à \$65,905,132 en 1935, soit une augmentation de 20 p.c. Il y eut augmentation quantitative de tous les produits principaux, sauf le bois à pulpe, les douves, les piquets et les fonds; la valeur de la production de chaque produit augmenta dans tous les cas, sauf pour le bois à pulpe, les planchettes pour boîtes, les piquets et les fonds.

La statistique annuelle de la production du bois au Canada a été recueillie pour la première fois en 1908. Depuis cette date, c'est en 1911 que la production de bois d'œuvre atteignit son maximum, soit 4,918,202 M p.m.p. En 1920 cette production atteignit un deuxième sommet avec 4,298,804 M p.m.p. et en 1929 elle en toucha un troisième avec 4,741,941 M p.m.p. Suivinrent ensuite des diminutions annuelles jusqu'au minimum de 1,809,884 M p.m.p. en 1932. La production en 1935 s'élève à 2,973,169 M p.m.p. valant \$47,911,256 et représente des augmentations de 15.3 p.c. en volume et de 18.3 p.c. en valeur totale comparativement aux 2,578,411 M p.m.p. valant \$40,509,600 rapportés en 1934. La valeur moyenne du bois d'œuvre de toutes sortes a passé de \$15.71 en 1934 à \$16.11 en 1935.

La production de bardeaux a augmenté en volume et en valeur totale en 1935. La production cette année-là s'est élevée à 3,258,253 carrés valant \$7,593,765 comparativement à 2,408,616 carrés valant \$4,422,578 en 1934. La valeur moyenne monta à \$2.33 en 1935.

Les traverses sciées sont au nombre de 5,641,673 en 1935 comparativement à 3,776,646 en 1934. Elles sont évaluées à \$2,635,373 en 1935 comparativement à \$1,686,519 l'année précédente. Cela représente une autre augmentation en volume, en valeur totale et en valeur moyenne.

Le débitage et l'écorçage du bois à pulpe se pratique en à côté dans plusieurs scieries canadiennes et fait ainsi partie de l'industrie du bois. Le bois à pulpe préparé occupe la quatrième place parmi les produits de cette industrie en 1935 avec 280,409 cordes valant \$2,061,280. L'année précédente on en a préparé 438,484 cordes valant \$3,435,708. Il y eut donc diminution en volume, en valeur totale et en valeur moyenne.

La quantité de lattes sciées a passé de 177,988 M en 1934 à 226,854 M en 1935 et la valeur totale s'est élevée à \$556,087 en 1935 comparativement à \$412,844 en 1934. La valeur moyenne a aussi augmenté.

Il y avait un plus grand nombre de scieries en activité en 1935 qu'en 1934 et la production moyenne par établissement a augmenté. Les 3,303 scieries rapportant la production de bois d'œuvre en 1934 avaient une production moyenne de 780 M p.m.p. par année tandis que les 3,437 scieries recensées en 1935 ont produit en moyenne 865 M p.m.p. En 1935 il y avait 922 moulins à bardeaux contre 908 en 1934 et la production moyenne par établissement a été de 3,534 carrés en 1935 comparativement à 2,652 carrés l'année précédente. Les traverses sciées ont été produites dans 484 établissements comparativement à 348 en 1934 et la moyenne a passé de 10,852 à 11,656 traverses par année. La production des lattes en 1935 provient de 197 établissements, soit 27 de moins que l'année précédente, mais la moyenne annuelle a été de 1,152 M par établissement contre 795 M en 1934.

Le nombre des employés dans l'industrie du bois a passé de 22,605 en 1934 à 25,727 en 1935. Le montant des salaires et gages payés au cours de l'année a aussi augmenté et s'est élevé à \$17,711,657 en 1935 comparativement à \$14,118,200 l'année précédente.

Le coût du combustible s'est élevé à \$346,159 en 1935, comparativement à \$406,620 en 1934. L'électricité achetée a coûté \$305,799 contre \$153,732 en 1934. La force motrice de tous les établissements de l'industrie du bois, y compris la force motrice en réserve ou inactive, avait une puissance collective de 287,870 h.p. en 1935 comparativement à 283,682 h.p. en 1934.

Les matières premières transformées dans cette industrie, consistant en billots, billotins et bois à pulpe non écorcé, ont été évaluées à \$35,927,884 en 1935 comparativement à \$29,487,086 en 1934. La valeur ajoutée par la fabrication s'élève à \$29,325,290 et le coût des matières premières forme 54.5 p.c. de la valeur totale des produits en 1935 comparativement à 53.8 p.c. en 1934.

Les chiffres qui suivent montrent le pourcentage du coût des matières premières à la valeur brute des produits pour les dix dernières années:

1926	58.4
1927	58.0
1928	57.7
1929	57.0
1930	60.2
1931	59.4
1932	60.8
1933	58.0
1934	53.8
1935	54.5

Les capitaux engagés dans l'industrie du bois ont augmenté, passant de \$71,649,186 en 1934 à \$75,973,627 en 1935.

La Colombie Britannique tient la tête pour la production du bois d'œuvre, du bois à pulpe écorcé et des bardeaux. Le Nouveau Brunswick occupe la première place pour la production des lattes. La production du bois d'œuvre a augmenté dans toutes les provinces.

REMARQUE: Les statistiques contenues dans ce bulletin sont la compilation des rapports reçus de moulins fonctionnant régulièrement et s'occupant principalement de la production de bois d'œuvre et de produits semblables. Les chiffres de la production représentent la quasi-totalité de la production totale canadienne sous chaque en-tête. Ils ne comprennent pas, toutefois, la production de ces articles rapportés en à côté ou comme sous-produits dans d'autres industries que celle du bois, ni la production des petits moulins portatifs qui ne fonctionnent pas régulièrement et ne limitent pas leurs opérations à une région plus ou moins définie. Une grande partie de la production totale de lattes provient de tels établissements et les chiffres s'y rapportant sont donc moins complets que ceux des autres produits des scieries.

LIST OF CANADIAN SAWMILLS

The following is a list of sawmills operating in Canada in 1935, which have reported to the Dominion Bureau of Statistics.

The letters appearing after some of the names serve to identify establishments reporting other products in addition to sawn lumber, in accordance with the key below. Section VI includes mills producing less than 1,000,000 feet of sawn lumber and also a number of establishments which produce no such lumber but specialize in the production of laths, shingles, sawn ties, pulpwood, etc.

LISTE DES SCIERIES CANADIENNES

La liste ci-dessous donne les noms et adresses des scieries canadiennes en exploitation en 1935, qui ont fait rapport au Bureau Fédéral de la Statistique.

Les lettres que l'on trouve à la fin de certains noms servent à identifier les établissements rapportant d'autres produits, en plus du bois de sciage, d'après la clef ci-dessous. La section VI comprend les scieries produisant moins de 1,000,000 de pieds de bois de sciage et aussi un certain nombre d'établissements ne produisant pas de tel bois mais se spécialisant dans la production de lattes, bardaques, traverses, bois à pulpe, etc.

SERIE DE L'INDUSTRIE DU BOIS (toutes les publications ci-dessus) .50

TOUTES LES PUBLICATIONS DE LA BRANCHE FORESTIERE 3.00

NOTA

Les chiffres de la production, tels que donnés dans ce bulletin ne représentent pas nécessairement la production totale canadienne sous chaque en-tête, parce que ces produits peuvent aussi être fabriqués en quantité considérable dans d'autres groupes industriels. Pour compléter ces renseignements il faut lire les bulletins de la série des industries utilisant le bois et les autres publications du Recensement Industriel.
