THE LUMBER INDUSTRY IN CANADA, 1936.

Ottawa, March, 1938.- The lumber industry as covered by this report includes the production of sawn lumber of all dimensions, shingles, sawn ties, box shocks, veneer, spoolwood, pickets, staves, heading and hoops and the cutting-up and barking or rossing of pulpwood. The gross value of production in this industrial group increased from \$65,905,132 in 1935 to \$80,343,291 in 1936, an increase of 22 per cent. There were increases in quantity for all the principal products except shingles, ties, slabs and edgings, veneer and heading, and increases in total value in all but shingles, ties, box shocks, staves and heading.

Accurate annual statistics on lumber production in Canada were first collected in 1908. Since that date the greatest production was reported for 1911 amounting to 4,918,202 M ft.b.m. A second peak was reached in 1920 and amounted to 4,298,804, and a third in 1929 amounting to 4,741,941. This was followed by annual decreases down to the minimum in 1932 amounting to 1,809,884. The production in 1936, amounting to 3,412,151 M ft.b.m. valued at \$61,965,540 represents increases of 14.8 per cent in total volume and 29.3 per cent in total value over the 2,973,169 M ft.b.m. valued at \$47,911,256 reported for 1935. The average value of sawn lumber of all kinds increased from \$16.11 in 1935 to \$18.16 in 1936.

The production of shingles decreased in total quantity and total value from 3,258,253 squares valued at \$7,593,765 in 1935 to 3,019,031 squares valued at \$6,754,788 in 1936. The average value fell from \$2.33 in 1935 to \$2.24 in 1936.

Sawn ties numbered 5,191,967 and were valued at \$2,590,974 in 1936 as against 5,641,673

L'INDUSTRIE DU BOIS AU CANADA, 1936.

Ottawa, mars 1938.- L'industrie du bois dont traite ce rapport comprend la production de bois d'œuvre de toutes dimensions ainsi que la production de bardage, traverses de voie ferrée, planchettes à boîtes, bois déroulé, bois à fusains, piquets, douves, fonds et cercles, et le débitage et l'écorçage du bois à pulpe. La valeur brute de la production de ce groupe industriel a passé de \$65,905,132 en 1935 à \$80,343,291 en 1936, soit une augmentation de 22 p.c. Il y eut augmentation quantitative de tous les produits principaux, sauf les bardages, les traverses, les dosses et rognures, le bois déroulé et les fonds; la valeur de la production de chaque produit augmenta dans tous les cas, sauf pour les bardages, les traverses, les planchettes pour boîtes, les douves et les fonds.

La statistique annuelle de la production du bois au Canada a été recueillie pour la première fois en 1908. Depuis cette date, c'est en 1911 que la production de bois d'œuvre atteignit son maximum, soit 4,918,202 M p.m.p. En 1920 cette production atteignit un deuxième sommet avec 4,298,804 M p.m.p. et en 1929 elle en toucha un troisième avec 4,741,941 M p.m.p. Suivirent ensuite des diminutions annuelles jusqu'au minimum de 1,809,884 M p.m.p. en 1932. La production en 1936 s'élève à 3,412,151 M p.m.p. valant \$61,965,540 et représente des augmentations de 14.8 p.c. en volume et de 29.3 p.c. en valeur totale comparativement aux 2,973,169 M p.m.p. valant \$47,911,256 rapportés en 1935. La valeur moyenne du bois d'œuvre de toutes sortes a passé de \$16.11 en 1935 à \$18.16 en 1936.

La production de bardages a diminué en volume et en valeur totale en 1936. La production cette année-là s'est élevée à 3,019,031 carrés valant \$6,754,788 comparativement à 3,258,253 carrés valant \$7,593,765 en 1935. La valeur moyenne baissa à \$2.24 en 1936.

Les traverses sciées sont au nombre de 5,191,967 en 1936 comparativement à 5,641,673 en

ties valued at \$2,635,373 reported in 1935, decreasing in number and in total value, but increasing in average value.

The cutting-up and barking or rossing of pulpwood is carried on as a side line in many Canadian sawmills and is therefore included as part of the lumber industry. Prepared pulpwood comes fourth in importance with 289,911 cords valued at \$2,118,642 in 1936 as compared to 280,397 cords valued at \$2,061,253 in 1935, increasing in volume and total value, but decreasing in average value.

In the case of lath the total quantity increased from 226,854 M in 1935 to 286,323 M in 1936 and the total value increased from \$536,087 in 1935 to \$874,231 in 1936, accompanied by an increase in average value.

There were fewer mills in operation in 1936 than in 1935 but the average production of lumber per mill was higher. The 3,437 mills reporting lumber in 1935 had an average annual output of 865 M feet board measure, while the 3,394 mills reporting in 1936 produced an average of 1,005 M feet. Mills producing shingles numbered 915 in 1936 against 922 in 1935, and the average annual production per mill was 3,300 squares in 1936 against 3,534 squares the previous year. Sawn ties were produced in 458 establishments as compared with 484 in 1935, the annual average per mill decreasing from 11,656 to 11,336. Laths were reported by 215 mills in 1936 or 18 more than the previous year, and the average annual production per mill was 1,332 M against 1,152 M in 1935.

The total number of employees in all mills on salaries and wages increased from 25,727 in 1935 to 28,760 in 1936. The total pay-roll increased from \$17,711,657 to \$21,357,038..

The cost of fuel used in the industry amounted to \$406,093 in 1936, as against \$346,159 in 1935. Electricity purchased cost \$355,675 in 1936 against \$305,799 in 1935. The power equipment of all mills, including stand-by or emergency equipment, was rated at 305,155 h.p. in 1936 as compared with 287,870 h.p. in 1935.

Raw materials in this industry, which are in the form of logs, bolts and rough cordwood, were valued at \$43,598,856 in 1936 as compared to \$35,927,884 in 1935. The value added by

1935. Elles sont évaluées à \$2,590,974 en 1936 comparativement à \$2,635,373 l'année précédente. Cela représente des diminutions en volume et en valeur totale mais une augmentation en valeur moyenne.

Le débitage et l'écorçage du bois à pulpe se pratique en à côté dans plusieurs scieries canadiennes et fait ainsi partie de l'industrie du bois. Le bois à pulpe préparé occupe la quatrième place parmi les produits de cette industrie en 1936 avec 289,911 cordes valant \$2,118,642. L'année précédente on en a préparé 280,397 cordes valant \$2,061,253. Il y eut donc augmentation en volume et en valeur totale et diminution en valeur moyenne.

La quantité de lattes sciées a passé de 226,854 M en 1935 à 286,323 M en 1936 et la valeur totale s'est élevée à \$874,231 en 1936 comparativement à \$536,087 en 1935. La valeur moyenne a aussi augmenté.

Il y avait moins de scieries en activité en 1936 qu'en 1935 mais la production moyenne par établissement a augmenté. Les 3,437 scieries rapportant la production de bois d'œuvre en 1935 avaient une production moyenne de 865 M p.m.p. par année tandis que les 3,394 scieries recensées en 1936 ont produit en moyenne 1,005 M p.m.p. En 1936 il y avait 915 moulins à bardeaux contre 922 en 1935, et la production moyenne par établissement a été de 3,300 carrés comparativement à 3,534 carrés l'année précédente. Les traverses sciées ont été produites dans 458 établissements comparativement à 484 en 1935 et la moyenne a passé de 11,656 à 11,336 traverses par année. La production des lattes en 1936 provient de 215 établissements, soit 18 de plus que l'année précédente, et la moyenne annuelle a été de 1,332 M par établissement contre 1,152 M en 1935.

Le nombre des employés dans l'industrie du bois a passé de 25,727 en 1935 à 28,760 en 1936. Le montant des salaires et gages payés au cours de l'année a aussi augmenté et s'est élevé à \$21,357,038 comparativement à \$17,711,657 l'année précédente.

Le coût du combustible s'est élevé à \$406,093 en 1936, comparativement à \$346,159 en 1935. L'électricité achetée a coûté \$355,675 contre \$305,799 en 1935. La force motrice de tous les établissements de l'industrie du bois, y compris la force motrice en réserve ou inactive, avait une puissance collective de 305,155 h.p. en 1936 comparativement à 287,870 h.p. en 1935.

Les matières premières transformées dans cette industrie, consistant en billots, billoittins et bois à pulpe non écorcé, ont été évaluées à \$43,598,856 en 1936 comparativement à

manufacture was \$35,982,667 and the total cost of raw materials formed 54.3 per cent of the total value of the finished products in 1936 as compared with 54.5 per cent in 1935.

The ratio of the cost of these raw materials to value of products for the last ten years is as follows:-

| | | |
|------|-------|------|
| 1927 | | 58.0 |
| 1928 | | 57.7 |
| 1929 | | 57.0 |
| 1930 | | 60.2 |
| 1931 | | 59.4 |
| 1932 | | 60.8 |
| 1933 | | 58.0 |
| 1934 | | 53.8 |
| 1935 | | 54.5 |
| 1936 | | 54.3 |

\$35,927,884 en 1935. La valeur ajoutée par la fabrication s'élève à \$35,982,667 et le coût des matières premières forme 54.3 p.c. de la valeur totale des produits en 1936 comparativement à 54.5 p.c. en 1935.

Les chiffres qui suivent montrent le pourcentage du coût des matières premières à la valeur brute des produits pour les dix dernières années:-

| | | |
|------|-------|------|
| 1927 | | 58.0 |
| 1928 | | 57.7 |
| 1929 | | 57.0 |
| 1930 | | 60.2 |
| 1931 | | 59.4 |
| 1932 | | 60.8 |
| 1933 | | 58.0 |
| 1934 | | 53.8 |
| 1935 | | 54.5 |
| 1936 | | 54.3 |

Les capitaux engagés dans l'industrie du bois ont augmenté, passant de \$75,973,627 en 1935 à \$78,294,341 en 1936.

British Columbia heads the list in the production of sawn lumber, pulpwood, shingles and ties. New Brunswick comes first in lath production. The total value of products of the lumber industry increased in all provinces except Prince Edward Island, Nova Scotia and Saskatchewan.

La Colombie Britannique tient la tête pour la production du bois d'œuvre, du bois à pulpe écorcé, des bardes et des traverses. Le Nouveau-Brunswick occupe la première place pour la production des lattes. La valeur totale des produits de l'industrie du bois a augmenté dans toutes les provinces sauf l'Île du Prince-Edouard, la Nouvelle-Ecosse et la Saskatchewan.

NOTE

The statistics given in this report have been compiled from reports received from regularly operated mills engaged primarily in the production of sawn lumber and similar sawmill products. The production figures represent all but a small part of the total Canadian production under most headings. They do not, however, include the production of these commodities when reported as side lines or by-products in industries other than the lumber industry nor the production of small portable mills which do not operate regularly nor confine their operations to a more or less definite area. In the case of lath a large part of the total production is carried on in small mills of this character and the figures given for lath production in this report are, therefore, less complete than in the case of other sawmill products.

NOTA

Les statistiques contenues dans ce bulletin sont la compilation des rapports reçus de moulins fonctionnant régulièrement et s'occupant principalement de la production de bois d'œuvre et de produits semblables. Les chiffres de la production représentent la quasi-totalité de la production totale canadienne sous chaque en-tête. Ils ne comprennent pas, toutefois, la production de ces articles rapportés en à côté ou comme sous-produits dans d'autres industries que celle du bois, ni la production des petits moulins portatifs qui ne fonctionnent pas régulièrement et ne limitent pas leurs opérations à une région plus ou moins définie. Une grande partie de la production totale de lattes provient de tels établissements et les chiffres s'y rapportent sont donc moins complets que ceux des autres produits des scieries.

LIST OF CANADIAN SAWMILLS

The following is a list of sawmills operating in Canada in 1936, which have reported to the Dominion Bureau of Statistics.

The letters appearing after some of the names serve to identify establishments reporting other products in addition to sawn lumber, in accordance with the key below. Section VI includes mills producing less than 1,000,000 feet of sawn lumber and also a number of establishments which produce no such lumber but specialize in the production of laths, shingles, sawn ties, pulpwood, etc.

LISTE DES SCIERIES CANADIENNES

La liste ci-dessous donne les noms et adresses des scieries canadiennes en exploitation en 1936, qui ont fait rapport au Bureau Fédéral de la Statistique.

Les lettres que l'on trouve à la fin de certains noms servent à identifier les établissements rapportant d'autres produits, en plus du bois de sciage, d'après la clef ci-dessous. La section VI comprend les scieries produisant moins de 1,000,000 de pieds de bois de sciage et aussi un certain nombre d'établissements ne produisant pas de tel bois mais se spécialisant dans la production de lattes, bardeaux, traverses, bois à pulpe, etc.

KEY

F - CUSTOM OR TOLL GRINDING AND MILLING
 L - LATHS
 P - PULPWOOD (cut-up, barked or rossed)
 S - SHINGLES
 T - SAWN TIES
 M - OTHER PRODUCTS (cf. Table 2)
 H O - HEAD OFFICE

CLEF

F - MOUTURE DU GRAIN POUR LE PUBLIC
 L - LATTES
 P - BOIS À PULPE (tronçonné ou écorcé)
 S - BARDEAUX
 T - TRAVERSES SCIÉES
 M - AUTRES PRODUITS (cf. Tableau 2)
 H O - SIEGE SOCIAL

I - Mills producing over 20,000,000 feet per year

I - Scieries dont la production dépasse 20,000,000 de pieds par année
