Chef de la Branche Forestière:
R. G. Lewis, B.Sc.F.

THE LUMBER INDUSTRY IN CANADA, 1939.

Ottawa, June 1941. - The lumber industry as covered by this report includes the production of sawn lumber of all dimensions, shingles, sawn ties, box shocks, veneer, spool-wood, pickets, staves, heading and hoops and the cutting-up and barking or rossing of pulpwood. The gross value of production in this industrial group increased from \$92,855,906 in 1938 to \$100,132,597 in 1939, an increase of 7.3 per cent. There were increases in quantity and value for all the principal products except slabs and edgings, pulpwood, ties, lath and poles, and the total value of miscellaneous products also increased.

Accurate annual statistics on lumber production in Canada were first collected in 1908. Since that date the greatest production was reported for 1911 amounting to 4,918,202 M ft.b.m. A second peak was reached in 1920 and amounted to 4,298,804, and a third in 1929 amounting to 4,741,941. This was followed by annual decreases down to the minimum in 1932 amounting to 1,809,884. The production in 1939, amounting to 3,976,882 M ft.b.m. valued at \$78,331,839 represents increases of 5.2 per cent in total volume and 7.3 per cent in total value from the 3,768,351 M ft.b.m. valued at \$72,633,418 reported for 1938. The average value of sawn lumber of all kinds increased from \$19.27 in 1938 to \$19.70 in 1939.

The production of shingles increased in total quantity and total value from 2,761,978 squares valued at \$6,894,694 in 1938 to 3,469,411 squares valued at \$9,048,876 in 1939. The average value rose from \$2.50 to \$2.61.

Sawn ties numbered 4,482,007 and were valued at \$2,321,469 in 1939, as against 4,699,331 ties valued at \$2,344,596 reported in 1938, decreasing in number and in total value, while the average value increased.

Ottawa, juin 1941. - L'industrie du bois dont traite ce rapport comprend la production de bois de sciage de toutes dimensions ainsi que la production de bardaues, traverses de voie ferrée, planchettes à boîtes, bois déroulé, bois à fuseaux, piquets, douves, fonds et cercles, et le débitage et l'écorçage du bois à pulpe. La valeur brute de la production de ce groupe industriel a passé de \$92,855,906 en 1938 à \$100,132,597 en 1939, soit une augmentation de 7.3 p.c. Il y eut augmentation de la quantité et de la valeur totale de tous les produits principaux sauf les dosses et rognures, le bois à pulpe, les traverses, les lattes et les poteaux. La valeur totale des produits divers a aussi augmenté.

La statistique annuelle de la production du bois au Canada a été recueillie pour la première fois en 1908. Depuis cette date, c'est en 1911 que la production de bois de sciage atteignit son maximum, soit 4,918,202 M p.m.p. En 1920 cette production atteignit un deuxième sommet avec 4,298,804 M p.m.p. et en 1929 elle en toucha un troisième avec 4,741,941 M p.m.p. Suivirent ensuite des diminutions annuelles jusqu'au minimum de 1,809,884 M p.m.p. en 1932. La production en 1939 s'élève à 3,976,882 M p.m.p. valant \$78,331,839 et représente des augmentations de 5.2 p.c. en volume et de 7.3 p.c. en valeur totale, comparativement aux 3,768,351 M p.m.p. valant \$72,633,418 rapportés en 1938. La valeur moyenne du bois de sciage de toutes sortes a augmenté de \$19.27 en 1938 à \$19.70 en 1939.

La production de bardaues a augmenté en volume et en valeur totale en 1939. La production cette année-là s'est élevée à 3,469,411 carrés valant \$9,048,876, comparativement à 2,761,978 carrés valant \$6,894,694 en 1938. La valeur moyenne a monté de \$2.50 à \$2.61.

Les traverses sciées sont au nombre de 4,482,007 en 1939, comparativement à 4,699,331 en 1938. Elles sont évaluées à \$2,321,469 en 1939, comparativement à \$2,344,596 l'année précédente. Cela représente des diminutions en volume et en valeur totale, mais la valeur moyenne a augmenté.

The cutting-up and barking or rossing of pulpwood is carried on as a side line in many Canadian sawmills and is therefore included as part of the lumber industry. Prepared pulpwood comes fourth in importance with 230,980 cords valued at \$2,124,914 in 1939, as compared with 379,535 cords valued at \$3,775,-583 in 1938, decreasing in volume and total value and also in average value.

In the case of lath the total quantity decreased from 239,467 M in 1938 to 163,686 M in 1939 and the total value decreased from \$656,320 in 1938 to \$476,252 in 1939. However, the average value per thousand rose from \$2.74 to \$2.91.

There were more mills in operation in 1939 than in 1938 but the average production of lumber per mill was lower. The 3,610 mills reporting lumber in 1938 had an average annual output of 1,080 M feet board measure, while the 3,706 mills reporting in 1939 produced an average of 1,073 M feet. Mills producing shingles numbered 882 in 1939 against 952 in 1938, and the average annual production per mill was 3,934 squares in 1939, against 2,901 squares the previous year. Sawn ties were produced in 399 establishments, as compared with 460 in 1938, the annual average per mill increasing from 10,216 to 11,233. Laths were reported by 144 mills in 1939 or 59 less than the previous year, and the average annual production per mill was 1,136 M, against 1,180 M in 1938.

The total number of employees in all mills on salaries and wages increased from 31,182 in 1938 to 32,399 in 1939. The total pay-roll increased from \$25,345,064 to \$26,396,308.

The cost of fuel used in the industry amounted to \$518,261 in 1939, as against \$497,242 in 1938. Electricity purchased cost \$314,420 in 1939, against \$305,890 in 1938. The power equipment of all mills, including stand-by or emergency equipment, was rated at 336,324 h.p. in 1939, as compared with 330,822 h.p. in 1938.

Raw materials in this industry, which are in the form of logs, bolts and rough cordwood, were valued at \$54,447,549 in 1939, compared with \$52,788,246 in 1938. The value added by manufacture was \$44,852,358 and the total cost of raw materials formed 54.4 per cent of the total value of the finished products in 1939, as compared with 56.8 per cent in 1938.

Le débitage et l'écorçage du bois à pulpe se pratique en à côté dans plusieurs scieries canadiennes et fait ainsi partie de l'industrie du bois. Le bois à pulpe préparé occupe la quatrième place parmi les produits de cette industrie en 1939 avec 230,980 cordes valant \$2,124,914. L'année précédente on en a préparé 379,535 cordes valant \$3,775,583. Il y eut donc diminution en volume et en valeur totale, et aussi en valeur moyenne.

La quantité de lattes sciées a diminué, passant de 239,467 M en 1938 à 163,686 M en 1939 et la valeur totale est tombée à \$476,252 en 1939, comparativement à \$656,320 en 1938. Toutefois la valeur moyenne a monté de \$2.74 à \$2.91.

Il y avait plus de scieries en activité en 1939 qu'en 1938 mais la production moyenne par établissement a diminué. Les 3,610 scieries rapportant la production de bois de sciage en 1938 avaient une production moyenne de 1,080 M p.m.p. par années, tandis que les 3,706 scieries recensées en 1939 ont produit en moyenne 1,073 M p.m.p. En 1939 il y avait 882 moulins à bardeaux contre 952 en 1938, et la production moyenne par établissement a été de 3,934 carrés, comparativement à 2,901 carrés l'année précédente. Les traverses sciées ont été produites dans 399 établissements comparativement à 460 en 1938, et la moyenne a monté de 10,216 à 11,233 traverses par année. La production des lattes en 1939 provient de 144 établissements, soit 59 de moins que l'année précédente, et la moyenne annuelle a été de 1,136 M par établissement, contre 1,180 M en 1938.

Le nombre des employés dans l'industrie du bois a passé de 31,182 en 1938 à 32,399 en 1939. Le montant des salaires et gages payés au cours de l'année a augmenté, passant de \$25,345,064 en 1938 à \$26,396,308 en 1939.

Le coût du combustible s'est élevé à \$518,261 en 1939, comparativement à \$497,242 en 1938. L'électricité achetée a coûté \$314,420, contre \$305,890 en 1938. La force motrice de tous les établissements de l'industrie du bois, y compris la force motrice en réserve ou inactive, avait une puissance collective de 336,324 h.p. en 1939, comparativement à 330,852 h.p. en 1938.

Les matières premières transformées dans cette industrie, consistant en billots, billotins et bois à pulpe non écorcé, ont été évaluées à \$54,447,549 en 1939, comparativement à \$52,788,246 en 1938. La valeur ajoutée par la fabrication est de \$44,852,358 et le coût des matières premières forme 54.4 p.c. de la valeur totale des produits en 1939, comparativement à 56.8 p.c. en 1938.

The ratio of the cost of these raw materials to value of products for the last ten years is as follows: -

| | |
|------------|------|
| 1930 | 60.2 |
| 1931 | 59.4 |
| 1932 | 60.8 |
| 1933 | 58.0 |
| 1934 | 53.8 |
| 1935 | 54.5 |
| 1936 | 54.3 |
| 1937 | 54.6 |
| 1938 | 56.8 |
| 1939 | 54.4 |

The capital invested in the industry decreased from \$88,812,313 in 1938 to \$85,-628,394 in 1939.

British Columbia heads the list in the production of sawn lumber, laths, shingles and pulpwood. Ontario comes first in the production of ties. The total value of products increased in all provinces except Quebec and Alberta.

Les chiffres qui suivent montrent le pourcentage du coût des matières premières à la valeur brute des produits pour les dix dernières années: -

| | |
|------------|------|
| 1930 | 60.2 |
| 1931 | 59.4 |
| 1932 | 60.8 |
| 1933 | 58.0 |
| 1934 | 53.8 |
| 1935 | 54.5 |
| 1936 | 54.3 |
| 1937 | 54.6 |
| 1938 | 56.8 |
| 1939 | 54.4 |

Les capitaux engagés dans l'industrie du bois ont diminué, passant de \$88,812,313 en 1938 à \$85,628,394 en 1939.

La Colombie Britannique tient la tête pour la production du bois de sciage, des lattes, des bardes et du bois à pulpe. Ontario occupe la première place pour la production des traverses. La valeur totale des produits de l'industrie du bois a augmenté dans toutes les provinces sauf le Québec et l'Alberta.

NOTE

The statistics given in this report have been compiled from reports received from regularly operated mills engaged primarily in the production of sawn lumber and similar sawmill products. The production figures represent all but a small part of the total Canadian production under most headings. They do not, however, include the production of these commodities when reported as side lines or by-products in industries other than the lumber industry nor the production of small portable mills which do not operate regularly nor confine their operations to a more or less definite area. In the case of lath a large part of the total production is carried on in small mills of this character and the figures given for lath production in this report are, therefore, less complete than in the case of other sawmill products.

NOTA

Les statistiques contenues dans ce bulletin sont la compilation des rapports reçus de moulins fonctionnant régulièrement et s'occupant principalement de la production de bois de sciage et de produits semblables. Les chiffres de la production représentent la quasi-totalité de la production totale canadienne sous chaque en-tête. Ils ne comprennent pas, toutefois, la production de ces articles rapportés en à côté ou comme sous-produits dans d'autres industries que celle du bois, ni la production des petits moulins portatifs qui ne fonctionnent pas régulièrement et ne limitent pas leurs opérations à une région plus ou moins définie. Une grande partie de la production totale de lattes provient de tels établissements et les chiffres s'y rapportant sont donc moins complets que ceux des autres produits des scieries.

LIST OF CANADIAN SAWMILLS

LISTE DES SCIERIES CANADIENNES

The following is a list of sawmills operating in Canada in 1939, which have reported to the Dominion Bureau of Statistics.

The letters appearing after some of the names serve to identify establishments reporting other products in addition to sawn lumber, in accordance with the key below. Section VI includes mills producing less than 1,000,000 feet of sawn lumber and also a number of establishments which produce no such lumber but specialize in the production of laths, shingles, sawn ties, pulpwood, etc.

KEY

F - CUSTOM OR TOLL GRINDING AND MILLING
 C - CUSTOM CARDING
 L - LATHS
 P - PULPWOOD (cut-up, barked or rossed)
 S - SHINGLES
 T - SAWN TIES
 M - OTHER PRODUCTS (See Table 2)
 H O - HEAD OFFICE

La liste ci-dessous donne les noms et adresses des scieries canadiennes en exploitation en 1939, qui ont fait rapport au Bureau Fédéral de la Statistique.

Les lettres que l'on trouve à la fin de certains noms servent à identifier les établissements rapportant d'autres produits, en plus du bois de sciage, d'après la clef ci-dessous. La section VI comprend les scieries produisant moins de 1,000,000 de pieds de bois de sciage et aussi un certain nombre d'établissements ne produisant pas de tel bois mais se spécialisant dans la production de lattes, bardeaux, traverses, bois à pulpe, etc.

CLEF

F - MOUTURE DU GRAIN POUR LE PUBLIC
 C - CARDAGE À FAÇON
 L - LATTES
 P - BOIS À PULPE (Tronçonné ou écorcé)
 S - BARDEAUX
 T - TRAVERSES SCIÉES
 M - AUTRES PRODUITS (Voir Tableau 2)
 H O - SIÈGE SOCIAL

I - Mills producing over 20,000,000 feet per year

I - Scieries dont la production dépasse 20,000,000 de pieds par année
