Note.— Production figures as given in this bulletin do not necessarily represent the total output in Canada of the commodities listed as there may be also a considerable production in other industrial groups. For complete information this bulletin must be read with the rest of the series on paper-using industries and other publications of the Census of Industry.

MISCELLANEOUS PAPER PRODUCTS INDUSTRIES  
IN CANADA

1926 - 1927.

Ottawa, March 12, 1929. - A report on the Miscellaneous Paper Products industries in Canada for 1926 and 1927 has been completed by the Forest Products Branch of the Dominion Bureau of Statistics. This group of industries includes the manufacture of paper boxes, building and roofing paper, stationery and envelopes, wall paper, and other miscellaneous paper products. These five groups are fairly distinct, there being few cases of one establishment manufacturing products included under two or more groups.

Table I which accompanies this report gives a summary of the principal statistics of the five groups included. The first section covers the manufacture of paper boxes, bags and other containers. There were 117 such establishments in Canada in 1927 of which 67 were located in Ontario, 29 in Quebec, seven in Manitoba, seven in British Columbia, four in New Brunswick, two in Nova Scotia and one in Alberta. The raw materials used in this industry are chiefly paperboard and paper with the necessary adhesives, water-proofing, and reinforcing materials and printing ink. The products are boxes, cartons, mailing tubes, bags, corrugated paper and wrappers, milk bottle caps, envelopes, egg case fillers and flats, drinking cups, soda straws, round paper board containers, and waxed paper. This group of industries employed 4,706 people in 1927 and paid \$1,394,324 in wages and salaries. The capital invested amounted to \$16,681,256.

Details of materials used and products manufactured are given in Tables 2 and 3.

The second group of industries includes those manufacturing roofing and building paper of which 12 were in operation in Canada in 1927, 4 being located in Ontario, 3 in Quebec, 3 in British Columbia and one each in New Brunswick and Manitoba. Generally speaking these firms purchase felt papers from the paper mills and treat these with different water-proofing and fire-resisting preparations to render them suitable for roofing and insulating purposes in building construction. Several of these firms operate paper mills and manufacture their own felts and others are engaged in tar distillation and produce their own saturation materials. On this account it is difficult to make an exact separation between the statistics of this group of industries and the pulp, paper and coal tar distillation industries. The principal raw materials are paper felt, paperboard, wood pulp, other fibre and rags, together with tar, asphalt, flux oil and certain fire-resisting chemicals. A large quantity of mineral surfacing is used for composition roofing consisting of magnesite, silico sand, dolomite, crushed slate, and other stone, talc, feldspar, marble dust, asbestos and asbestos sand. The products are, composition roofing in rolls or squares, composition shingles, saturated felt and sheathings and other products. Composition roofing is usually sold in rolls containing 108 square feet of material sufficient to cover one "square" or an area of one hundred square feet with an allowance for joints. The shingles and slates are also sold by the square. Ordinary building paper is sold by the roll, each roll containing on an average the equivalent of four "squares." Saturated felt is sold by the pound or ton. This industry employed 459 people in 1927 with a payroll of \$755,061. A total of \$5,016,586 was invested in the industry in 1927.

Tables 4 and 5 give the details of materials and products for this industry.

19. 1. 18.

Dear Mr. & Mrs. G. W. Ladd,  
I am sorry to say that I have

not been able to get any information concerning the authorship of the manuscript. It is a very interesting one, and I would like to know who wrote it. I have tried to find out from various sources, but have not been successful. I would appreciate any information you can give me. Thank you.

Very truly yours,  
John D. Ladd  
Professor of History  
University of Michigan  
Ann Arbor, Michigan  
January 19, 1898

Establishments that specialize in the manufacture of stationery and envelopes are dealt with in the third group, which included in 1927, 27 firms distributed as follows:- Ontario 14, Manitoba 4, Quebec 5, and British Columbia 4. The materials are similar to those used in the paper box industry from which this group cannot be entirely separated. Paper, paperboard and the necessary adhesives form the bulk of the materials, while envelopes, note paper and writing tablets form the bulk of the products, with some other products as side lines. There were 1,269 employees, mostly female, in 1927. The wages and salaries amounted to \$1,430,814 and the capital invested to \$4,359,769.

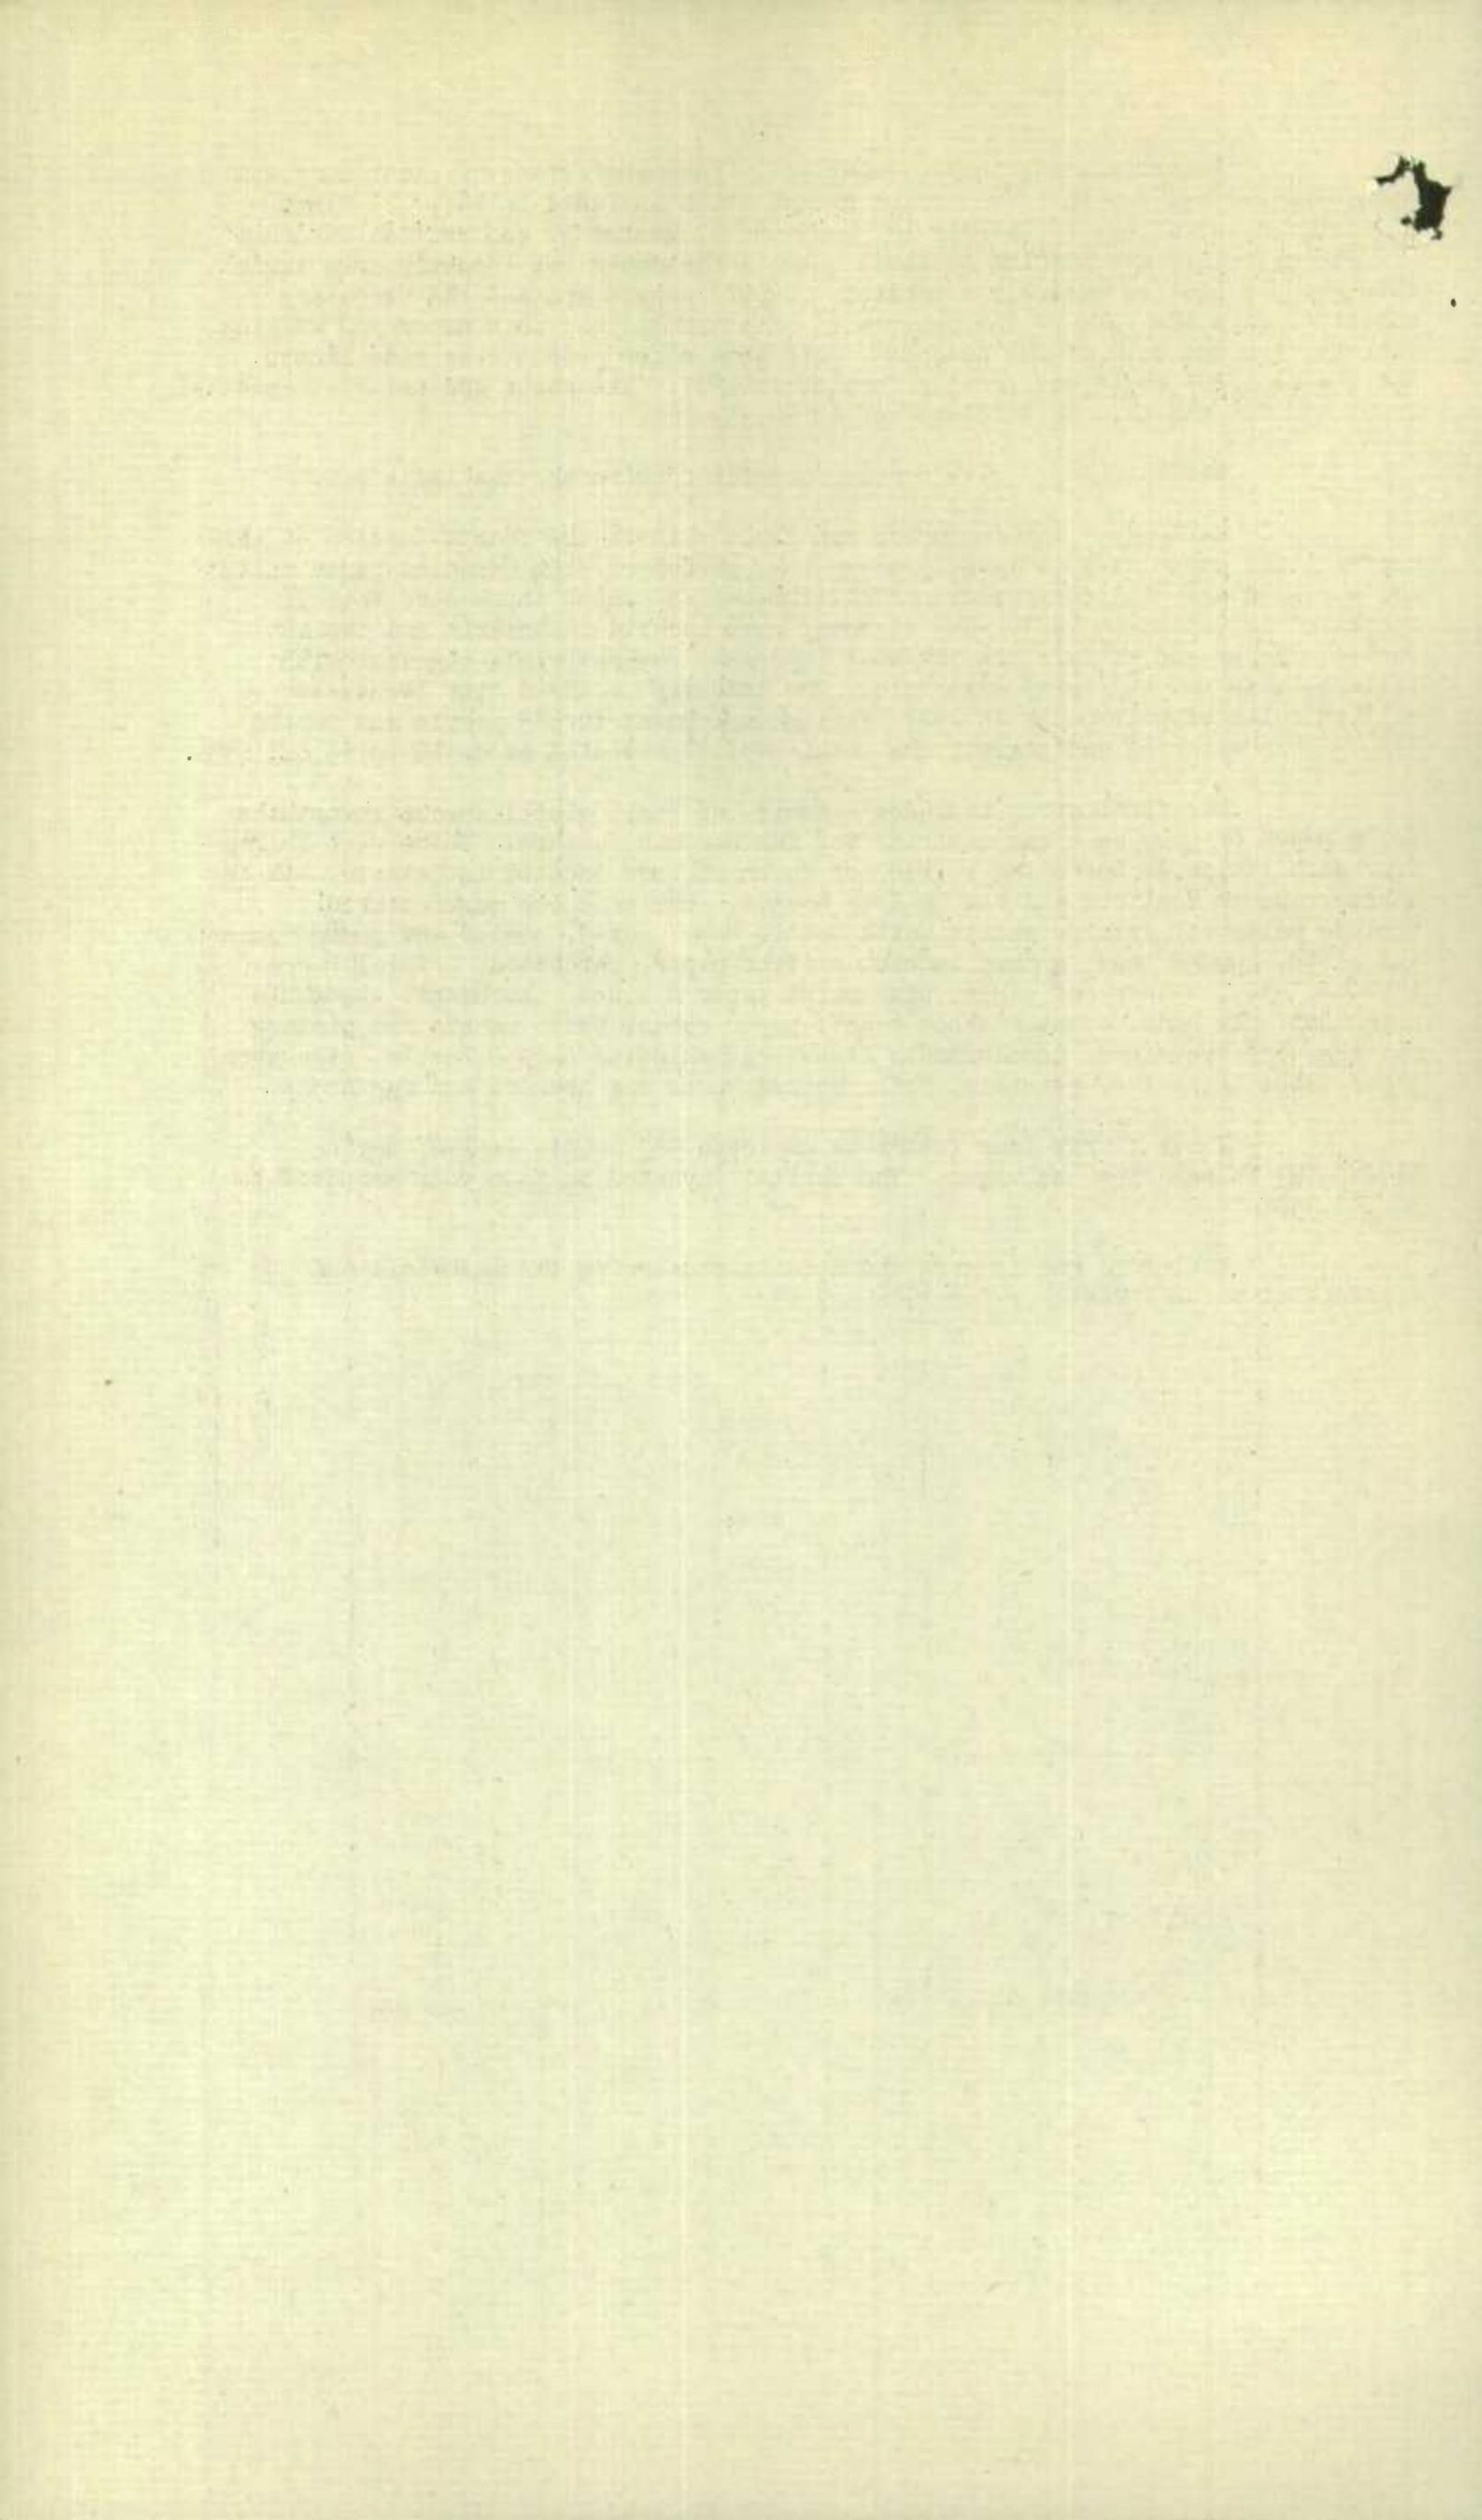

Tables 6 and 7 give further details concerning this industry.

Wall paper manufacturers are dealt with in the fourth section of this report. The paper used is largely newsprint, purchased from Canadian paper mills and surfaced and printed in these establishments, of which there were four in operation in Canada in 1927. Two of these were located in Ontario and two in Quebec. Paper and colours are the most important raw materials together with fillers, size and surfacing materials. The industry produced over twenty-two million rolls of wall paper in 1927, giving employment to 685 people and paying \$986,927 in salaries and wages. The total capital invested amounted to \$3,823,553.

The final group includes a number of small miscellaneous industries using paper or pulp as a raw material for further manufacture. There were thirty-four such factories operating in 1927 of which 26 were located in Ontario, six in Quebec, one in Manitoba and one in Nova Scotia. The products manufactured include patterns, fashion sheets, milk bottle caps, waxed, coated and gummed paper and cloth, gummed tape, gummed labels, writing paper, cardboard, bristol board, tickets, etc., waterproof paper, blue print paper & linen, parchment, vegetable parchment, fly pads, counter check books, paper cores, photo mounts and picture matting, dry transfers, decalcomania transfers, shipping tags & labels, cigarette paper tubes, glassine, glassoid, foil, hooked rugs, rug hookers and rug hooks.

These thirty-four factories employed 983 people in 1927 paying \$1,248,189 in salaries and wages. The capital invested in that year amounted to \$6,142,352.

Tables 10 and 11 give the details concerning the materials and products of these industries for 1926 and 1927.
