DEPARTMENT OF TRADE AND COMMERCE DOMINION BUREAU OF STATISTICS - CANADA INTERNAL TRADE BRANCE
(Issued August i2, 1939)

The Investors dally price index for 95 common stocks dropped from 98.7 on August 3 to 96.6 on August 10, erasing all gains since the middle of July. Greatest recessions occurred on August 9 and 10, accompanied by heavier trading. They coincided with weakness at New York and increased tension regarding the Danzig situation. All divisions of the composite index, with the exception of milling, shared in the decline. Losses were headed by pulp and paper issues followed by industrial mines, building materials, transportation, beverages and textiles. The industrial index closed at 158.0 for a net decrease of 42 points, utilities were down 0.6 to 42.3 , and banks 0.3 to 85.0 .

## MINING STOCK PRICES

Moving in line with world security markets, price movements on Canadian mining marikets were mainly downward during the week ended August 10. The general price index of twenty-five mining issues receded to 155.0 on that day from 158.7 on August 3. The decline was mostly concentrated in the final two days of trading when developments at Danzig proved unsettling. However losses were moderate and there was no great selling pressure. Golds moved lower from 118.2 to 116.2 between August 3 and 10 and base metals fell from 326.9(a high for the current year) to 321.2. Losses were less extensive in the weekly averages: golds declined one point to 117.4 and base metals 0.9 to 324.0 . Compared with indexes of a year ago, gold stocks were about $6.7 \mathrm{p}, \mathrm{c}$ 。 lower, while base metels showed an increase of nearly $10 \mathrm{p} . \mathrm{c}$.

## LONG-TERM BOND PRICES AND YIELDS

For the third successive week Dominion of Canada long-term bond prices moved lower, and the Dominion Bureau of Statistics index declined from 117.? for the week ending August 3 to 117.6 for the week ending August 10 . This was the lowest point touched since the week of May 25, but was only 0.2 below the corresponding week of last year. Losses were small but fairly general, approximating $1 / 8$ to $1 / 4$ in most instances. In the provincial list, prices held firm in quiet trading. British Consols moved narrowly, closing unchanged at $663 / 8$, while the Dow-Jones average of selectec United States bonds fell from 90.53 to 89.68 . The Bureau's index. Co Cominion of Cunada long-term bond yields rose from 60.4 for the week ending hugust 3 to 60.6 for the wəek ending August 10, and the average yield of the issues incluajed in this index increased from 2.93 to 2.94 .
(Quotations are Montreal $\frac{\text { FOFEIGN EXGINGE }}{\text { noon }}$ rates unless otherwise specified)
With the exception of the Netherlands florin, leading foreign currencies were unchanged to lower at the close of the week erded August 10. United States funds remained at par while sterling spot rates held steady at about $\$ 4.6806$. Effects of the disturbed international outlook were, however, reflected in sharply increased discounts for sterling forward rates. At the close of the week 90 -day forwards, New York on Iondon had widened to a discount of $21 / 2 \phi$ over spot compared with $111 / 16 \phi$ on August 3. French
 florin, which advanced 16 points to $53.35 \phi$ between 3 en: 10 , was attributed to reports that a new uabinet would be formed shortly under the leadership of Dr. D. J. deGeer. Far Eastern exchanges were again featured by another slump in the Shanghai dollar, from $8.46 \phi$ on August 3 to $6.92 \phi$ on the 10th. A recent ernouncement that the United States Treasury had contracted to buy $\$ 2,000,000$ worth of Chinese silver had little sustaining effect on the rate.
