WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Activity continued in the mining section of the Canadian stock market, with both gold and base metals groups showing marked gains. The general index of twenty-three mining issues mounted from 164.4 for the week of December 10 to 168.3 for the week of December 17. This index was 133.3 for the corresponding period in 1935.

Up to Tuesday, December 15, each day brought new increases for the gold stocks, but on the following days, conflicting trends appeared. At the end of the week, gains and losses were about equally divided. As the result the index of the gold stocks advanced from 129.9 for the week of December 10 to 131.4 for the week of December 17. The index was 117.2 for the same week in 1935.

Base metals stocks figured prominently in the upward movement with pronounced gains in this group reflecting further increases in actual base metal prices. The index attained 320.5 for the week of December 17, the maximum for this year, as compared with 306.9 for the preceding week. The comparable figure for the week of December 19, last year was 199.3.

Listed below is a table of average prices, as computed by the Dominion Bureau of Statistics for the weeks of December 17 and 10, 1936, and December 19, 1935.
