THE CONTROL AND SALE OF ALCOHOLIC BEVERAGES IN CANADA

(Fiscal Year Ended March 31, 1953)

This publication contains statistics on the operations of government authorities concerned with the control and sale of alcoholic beverages in Canada, and other related data consisting mainly of the principal revenues of the Government of Canada that are derived from the taxation of alcoholic beverages.

The current publication, while continuing the main elements of the statistics heretofore published in this series, contains a number of important changes. In previous reports the information relating to provincial liquor authority operations was taken largely from their published reports, supplemented by such data as could be obtained by correspondence. As a result it was not possible to present the statistics on a basis comparable for all provinces.

Following discussions with representatives of the government liquor authorities a revised system was established whereby a standard form of questionnaire would be used for obtaining statistics of their operations. This same statistical return also provided for information needed by other sections of the Bureau and thus eliminated a certain amount of duplication or overlapping which had occurred in the past.

The new standard form of questionnaire was put into use for reporting transactions of the government liquor authorities for their fiscal year ended March 31, 1953, the period covered by this report. Because of the new basis for the statistics thus introduced and the resulting incomparabilities with data published for prior years, the retroactive series of statistics is not contained in this report. Annual comparisons will, however, be introduced in suc-

ceeding reports and when a sufficient body of figures is available on the new basis it is planned to resume publication of at least summaries of annual data for selected prior years.

In addition, some information previously given has been omitted and the form of tabular presentation varied somewhat in other instances. In particular, the section describing the changes in duties and taxes imposed by the Government of Canada on alcoholic beverages has been discontinued. It is not feasible to give, in this way, detailed and up-to-date information that may be useful in relation to the statistics and completely current information on this subject can in any event be obtained direct from the Government of Canada revenue authorities concerned. Also, the section "Apparent Consumption of Alcoholic Beverages" has been deleted because of the lack of complete information on this subject, and, the figures resulting from the former estimates of consumption were subject to being used in relation to the data given for sales by the government liquor authorities.

The remaining changes are mainly in the form of tabular presentation, but it will also be noted that additional tables on imports and exports of alcoholic beverages have been included to show the countries of origin and destination, respectively, for the current year.

The statistics contained herein were compiled from information supplied by provincial and territorial governments, the Department of National Revenue, Ottawa, and other Divisions of the Bureau. The assistance of the various officials concerned is very much appreciated.

EXPLANATORY COMMENT

Table 1—Revenue from Administration of Liquor Control by Provincial and Territorial Governments

This table is intended to show all revenue resulting from liquor control whether collected by the liquor authority or directly by the government. In addition to the revenues shown, however, the retail sales tax in Newfoundland, New Brunswick, Quebec, (except beer), Saskatchewan and British Columbia applies also on alcoholic beverages. Such tax collections by the provincial governments are not segregated however, and insufficient data are available to enable a reliable estimate to be made.

A description of the components making up the total is shown below this table. Attention is drawn,

however, to certain inconsistencies in the data in this table due to differences in the administration and accounting systems followed.

(a) Costs incidental to collection of licences, permits, etc.

Where these miscellaneous revenues are collected by the liquor authority, the costs of administering and collecting them are also borne by the liquor authority. In some instances, such costs are kept separate and applied against the revenue in question while in others they are merged with other administration expenses of the authority concerned. For purposes of comparability, however, the former have been adjusted to the latter method so as to

show the miscellaneous revenues on a gross basis and the costs of collection as a general expense of administration, i.e. a deduction in arriving at item 1. Where, however, any such revenues from liquor control are collected directly by the government concerned, the costs of collection are not available and a similar adjustment to the above cannot be made. The net effect of this inconsistency of treatment is that item 1 will be slightly greater by comparison in those provinces where the province itself collects any of the items 2 to 4. The amounts involved are, however, not important in relative magnitude.

(b) Capital Expenditures

The method of accounting for the cost and use of fixed assets in the financial statements of the liquor authorities varies. In some cases fixed assets are purchased by the provincial government and not reflected in financial statements of the liquor authority. Where the liquor authority does purchase some or all of its fixed assets the cost in some instances is absorbed by a charge to operations of the total cost in the year of purchase, while in others it is amortized according to commercial practice by an annual charge for depreciation against operations. No attempt has been made to adjust net income from retail sales on this account although the amounts of depreciation or capital expenditure charged for the current year are footnoted in the table.

(c) Revenue collected by, or paid to, Local Governments

In some cases local governments are paid, or are allowed to retain, a portion of certain liquor control revenue, such as licences or fines. For example, in Nova Scotia, liquor fines imposed and collected by local government authorities, are retained by the local government; other liquor fines are included in the income of the liquor control authority. In Ontario, 20% of the revenue from licences and fees collected by the liquor authority is paid to those municipalities signing the required agreement and, where there is an agreement between the province and a municipality all fines resulting from prosecutions by municipal police officers revert to the municipality. Where there is no such agreement, liquor fines are collected by magistrates on behalf of the liquor authority. In Alberta, while all liquor fines are collected by the Attorney General's Department, a portion thereof is paid to municipalities.

Where such revenues have been collected by the province as in Alberta, or by the liquor authority, and a portion thereof paid to municipalities, the gross amount (before deducting the portion paid to municipalities) is reflected in table 1. However, where such revenues have been collected by local government authorities on their own behalf and retained by them, as in Nova Scotia, they are not included in table 1.

Table 2 – Reconciliation of Total Revenue from Liquor Control with Revenue Reported by Liquor Control Authority

This table shows the adjustments that have been made to the revenue reported by liquor authorities to arrive at a total revenue from liquor control on a basis comparable for all provinces. The first group of adjustments represent revenues not included in the net profit or earnings as reported by the liquor control authority. Some of these amounts were collected by the province directly; some by local government authorities on behalf of the liquor authority; and some by the liquor authority on behalf of the provincial government and not included in the operating statement of the liquor authority.

The second group of adjustments represents expenditures by the liquor authority for services which generally are met by the provincial governments through budget appropriations and not charged against revenues from any specific source.

Table 3 – Sales of Alcoholic Beverages by Value

This table shows the value of alcoholic beverage sales by provinces. It includes the value of sales by breweries and wineries to licensees for resale; the value of sales by breweries' and wineries' retail outlets; and also the value of alcoholic beverages sold by liquor authorities to the final consumer as well as to licensees for resale. It will thus be appreciated that the figures shown do not represent the final selling price to the consumer in all instances.

Table 4 – Sales of Beer and Wine Through Breweries' and Wineries' Retail Outlets

This table shows, in gallons and dollars, the amount of beer and wine sold by breweries and wineries directly and not reflected in the operations of the liquor authority. In Quebec, beer is sold by breweries to permit holders, who are authorized to sell to consumers; a very small amount of beer is sold by the Liquor Commission. In Ontario, beer and wine may be purchased through government liquor stores, but most sales of beer and domestic wine are made through breweries' and wineries' retail stores to the consumer. Beer and wine are also sold by breweries and wineries to licensees to sell at retail. In Manitoba, beer is purchased by the Commission from the brewers, and sold to consumers through the following outlets: (a) government liquor stores; (b) brewery stores; (c) hotels and other retail outlets licenced to sell beer only.

With the exception of Quebec, Ontario and Manitoba, all beer and wine is sold by the liquor authority either direct to the consumer or to licensees for resale.

Table 5 – Sales of Alcoholic Beverages by Volume

This table embraces the same transactions as are reflected in table 3, in terms of gallons. As an indication of consumption however, it includes the

volume of sales to licensees for resale, rather than the actual amount sold by the licensees.

Table 7 – Specified Revenue of the Government of Canada from Alcoholic Beverages

Revenue of the Government of Canada from alcoholic beverages comprising excise duties, excise taxes, customs duties and certain fees and licences in that connection are shown in this table. Federal government revenues from the general sales tax on alcoholic beverages are not available. The total shown as excise duty is after deducting collections on liquor imported for blending purposes which are included in this table as import duty.

Table 8 – Production of Alcoholic Beverages

In the case of spirits and beer, this table covers the years ended March 31, 1949 to 1953; in the case of fermented wine, however, figures are not available on a fiscal year basis and the table shows the information for the twelve months ended December 31st, 1948 to 1952.

Table 9 – Warehousing Transactions in Spirits

This table provides a record of the movement of spirits during the year in terms of warehousing transactions. Item 2, "warehoused during year", shows the amount of spirits entered in warehouse during the year directly from the distillery. This should not be confused with production figures as shown in Table 8. The amount warehoused includes not only the amount of spirits produced during the year but also (a) spirits imported as shown on table 11 and (b) spirits re-entered in warehouse, for example, spirits may be taken out of warehouse for redistillation, (item 9), and re-entered in the warehouse in a subsequent year.

Item 3, "otherwise warehoused", refers to spirits taken back into the warehouses after having been recorded in a preceding year among items 5 to 9.

"Entered for consumption", items 5 and 6, means the total amount released from warehouses for the purpose of domestic consumption. It will be seen that the fluctuation between years in spirits entered for consumption in terms of proof gallons does not agree with the fluctuation in the amount of excise duty on spirits collected by the Government of Canada, table 7, item 1. While the excise duty is paid only on the spirits entered for consumption, the rate of duty varies according to the nature of the spirits and the use to which they are put. For example, on most spirits the excise duty rate is \$12 per proof gallon; on brandy it is \$10 per gallon; it is only 60 cents per gallon, of spirits used in the manufacture of vinegar; and on spirits declared for use in the manufacture of pharmaceutical products the rate is \$1.50 per gallon. It should also be remembered that excise duties are only paid on

spirits entered for consumption. That is to say, no excise duty is paid on spirits exported in bond or on spirits released from warehouses for any of the other reasons outlined in this table.

The amount shown in this table as exported in bond (item 7) differs from the total export of domestic stock shown in table 11 for two reasons. First, the amount shown as exported in bond includes exports of imported stock (see table 11, item 3) and secondly, it records the transaction at the time the spirits are released from the warehouse for export, whereas table 11, items 2 and 3, records the transactions when the physical movement of these spirits takes place.

Item 8, "otherwise accounted for" represents spirits taken from the warehouse other than for domestic consumption or exported in bond, for example, transfers to other distillers.

Table 10 – Warehousing Transactions in Dutiable Beer

Item 6 of this table shows the volume of beer exported in bond. As most beer exported during this year did not go through bond, the figure represents only a small part of total exports of domestic beer. See table 11, item 17.

The volume of dutiable beer warehoused, as shown in this table, has no direct relationship to the excise duty collected on beer as shown in table 7. Beer is warehoused only if intended for export, when it is not subject to excise duty. Table 7 shows the excise duty collected on all beer entered for domestic consumption. However, if such beer is later taken out of warehouse for domestic consumption, the excise duty is then paid. Item 5, of this table 10, therefore refers to beer which has been taken out of warehouse for domestic consumption only.

It might also be explained here that excise duty is levied on all beer entered for domestic consumption which was manufactured from rice, barley or any other product except malt. Malt used for the manufacture of beer is taxed as malt in which case the final product is not subject to excise duty.

(Commencing April 7, 1954, excise duty on malt used in the manufacture of beer is discontinued and there is an excise duty on all beer produced for domestic consumption.)

The following symbols have been used in the tables:

- .. to indicate figures are not available
- to indicate nil

1953 OPERATIONS

REVENUES

Revenues of the provincial and federal governments from the control and taxation of alcoholic beverages (exclusive of general sales taxes) amounted to \$343 million for the fiscal year ended March 31st, 1953, an increase of \$33 million over the previous year, when they totalled \$310 million.

The federal government share of the total revenues rose from \$162.7 million for 1952 to \$183.3 million for 1953, an increase of \$20.6 million. Provincial and territorial governments derived \$147 million in 1952 and \$159.6 million in 1953, an increase of \$12.6 million.

A breakdown by governments concerned is as follows:

Liquor Revenue	Fiscal Years Ended March 31			
	1953	%	1952	%
	\$000		\$000	
Total¹	342,859	100	309,731	100
Government of Canada	183,279	53.5	162,706	52.5
Provincial and Territorial Governments	159,580	46.5	147,025	47.5

British Columbia	20,883	6.1	20,157	6.5
Sub-Total	158,638	46.2	146,156	47.2
Yukon	653	.2	595	.2
Northwest Territories	289	.1	274	.1

1. Exclusive of general sales taxes on alcoholic beverages.

SALES

Sales of alcoholic beverages reported by liquor control authorities amounted to \$682 million for the fiscal year ended March 31, 1953. This represents an increase in sales of \$89 million over sales of

\$593 million in the previous year. It is not possible to give a complete breakdown of these totals between spirits, wines and beer as not all liquor authorities reported this detail. The information available for each of the years is as follows:

Value of Sales of Alcoholic Beverages¹
Fiscal Years Ended March 31

	Spirits		Wines		Beer		Total	
	1953	1952	1953	1952	1953	1952	1953	1952

Northwest Territories	438	..	23	..	305	360	766	760

1. See Table 3.

These figures do not represent the final retail selling price of alcoholic beverages because in the case of sales to licensees, only the selling price to the licensee is known. Furthermore, because sales to non-residents visiting Canada and sales to businesses, governments, and foreign embassies in Canada, are included, these sales figures should not be construed as representing the amount spent by individual Canadian consumers.

Volume of sales is a more realistic indicator of trends in consumption although as a measure of personal consumption by Canadians it is also subject to the same qualifications as dollar sales in respect of purchases by non-residents. Since the volume of sales of alcoholic beverages has not been reported by all authorities, totals cannot be given for comparative purposes. The data available, however, are as follows:

Volume of Sales of Alcoholic Beverages¹
Fiscal Years Ended March 31

	Spirits		Wines		Beer		Total	
	1953	1952	1953	1952	1953	1952	1953	1952

1. See Table 5.

CONSUMER EXPENDITURE

In addition to their value and use as statistics concerning the control and sale of alcoholic beverages in Canada, the data reported in this survey are also used in calculating consumer expenditure on goods and services, which is an important component of the statistics on gross national expenditure of the Canadian economy. Such expenditures on alcoholic beverages have in the past appeared in the Bureau publication "National Accounts, Income and Expenditures", but owing to changes in publication policy the separation of consumer expenditures on alcoholic beverages has been temporarily discontinued there.

Although such estimates are subject to the qualifications previously referred to in relation to sales of alcoholic beverages, e.g., they include expenditures by foreign visitors to Canada and by business, government, etc., and in addition, exclude expenditures by Canadians abroad, they nevertheless are the most reliable figures available and are therefore included herein.

Estimated Consumer Expenditures* on Alcoholic Beverages

Calendar Year	Million Dollars
1930	165
1935	102
1936	115
1937	134
1938	155

Yukon	3	3
Northwest Territories...	2	2
	<hr/> 634	<hr/> 650

IMPORTS AND EXPORTS

Imports of alcoholic beverages during the fiscal year ended March 31, 1953 increased over the previous year. The value of spirits imported rose from \$14,928,000 in the previous year to \$17,238,000; in the case of wines the figures were \$2,533,000 in the previous year and \$3,032,000; and imports of beer increased from \$242,000 to \$259,000. The value of exports of domestic spirits increased in these years from \$53,725,000 to \$56,373,000; exports of domestic wine increased from \$3,754 to \$4,860; exports of domestic beer, however, decreased from \$2,248,000 to \$2,146,000. Table 11 provides the value and volume of imports and exports of alcoholic beverages for the years 1949 to 1953. Tables 12 to 15 show the value and volume of imports and exports for the fiscal year ended March 31, 1953 in detail by country.

STATISTICAL TABLES

TABLE 1. Revenue from Administration of Liquor Control by Provincial and Territorial Governments¹
Fiscal Year Ended March 31, 1953

No.		Newfoundland	Prince Edward Island	Nova Scotia	New Brunswick	Quebec
		\$	\$	\$	\$	\$
1	Net income from retail sales ²	2,202,937	895,975	9,179,324	6,377,969	21,643,113
2	Taxes	—	273,675	—	—	1,490,979
3	Licences and permits ³	598,013 ⁴	31,956	278,101	1,970	11,975,916
4	Fines and confiscations ³	18,814	17,650	73,657	24,929	178,890
5	Commission on general sales tax collections	4,656	—	—	21,419	..
6	Total Revenue	2,824,420	1,219,256	9,531,082	6,426,287	35,288,898

1. Including revenues collected directly by the provincial governments as well as revenues of the liquor authorities.

2. After provision for depreciation on fixed assets or for capital expenditure met out of operating income as follows: Newfoundland—\$967; Prince Edward Island—\$1,000; Nova Scotia—\$39,187; New Brunswick—\$150,240; Quebec—\$60,276; Ontario—\$1,048,202; Manitoba—\$28,419; Saskatchewan—\$27,670; Alberta—\$42,585; British Columbia—\$137,784; Yukon—; Northwest Territories—; and after deducting expenses incurred by liquor authorities in the collection of other revenue which they administer.

3. Before deducting any payments to municipalities out of liquor control authority revenue.

4. Included \$536,396 commission on beer sold direct from local provincial breweries to public through licensed outlets under controlled price.

Explanation of terms

Net Income from Retail Sales—This item represents the net income of liquor control authorities from the sale of alcoholic beverages. Income of the nature described in items 2 to 5 are, of course, excluded from item 1, although the expenses connected with the collection of items 2 to 5 have been charged to item 1. Certain expenses, not considered to be connected with liquor control revenue, and not commonly included in the operations of the liquor control authority, have been deleted. These expenses are shown as items 5 to 8 of table 2.

TABLE 2. Reconciliation of Revenue from Liquor Control with Earnings reported by Liquor Authority
Fiscal Year Ended March 31, 1953

Taxes — This item represents taxes levied at the time of retail sale of alcoholic beverages, exclusively. General retail sales taxes, levied on alcoholic beverages as well as on other consumer goods, are not included. See explanatory comment.

Licences and Permits — This is the amount collected in the nature of licences or permits to manufacture, sell or consume alcoholic beverages. It includes all income described by liquor authorities as "taxes", where the levy is applied before arriving at retail selling prices, such as brewers taxes and levies paid by retailers which are not directly chargeable to the purchaser. An example of the latter are the retailers' taxes in the province of Quebec.

Fines and Confiscations — This is the total income realized from fines, penalties or confiscations, collected by the liquor authority or the provincial government as the case may be.

Total Revenue — This represents total revenue collected by the liquor authority or directly by the provincial government without deducting (a) items 5 to 8 of table 2 or (b) expenses relating to those revenues collected directly by the provincial government.

5. This item only includes provision for special reserves which were included in the operating expenses of the liquor authority before arriving at net earnings. However in certain other provinces, transfers to reserves are shown in a subsidiary statement after arriving at net earnings. The Quebec Liquor Commission transferred \$850,000 to its Working Capital Reserve, Saskatchewan appropriated \$78,056 for the purchase of real property and transferred \$750,000 to the Contingent Reserve, while Alberta transferred \$750,000 to its General Reserve. This table only reconciles to the amount declared as net earnings by the Liquor Authority, so the provisions just mentioned do not enter into the statement.
