REVISED FIGURES

It would be appreciated if the following revisions were made to the above-mentioned publication.

PAGE 7

Value of beer sales for Ontario - 1957 - should read 150,941; total sales for Ontario should read 292,843. Beer sales - 1957 total - should read 387,689. Total sales - 1957 - should read 770,829.

Volume of beer sales for Ontario - 1957 - should read 87,662.
Total sales for Ontario - 1957 - should read 95,028.

THE CONTROL AND SALE OF ALCOHOLIC BEVERAGES IN CANADA

(Fiscal Year Ended March 31, 1957)

Revenue is derived by government in Canada from the control, sale and taxation of alcoholic beverages. The statistics presented in this report set out this revenue in detail, and present as well subsidiary information on sales operations (by dollars and volume), inventories, production, warehousing, and imports and exports.

Certain other revenues in the form of corporation income taxes, real estate taxes, and business taxes, are received from the producers and distri-

butors of alcoholic beverages. A federal general sales tax, and provincial sales taxes in five provinces are imposed on liquor sales to consumers. These are not regarded as specific taxes on alcoholic beverages, and are not included herein; nor would it be possible to wholly isolate them for reporting purposes.

The assistance of the various government officials concerned is gratefully acknowledged.

EXPLANATORY COMMENT

Table 1. Revenue from Administration of Liquor Control by Provincial and Territorial Governments.

The purpose of this table is to record the revenue resulting from liquor control, whether collected by the liquor authorities or directly by a government. Revenues resulting from the imposition of a general retail sales tax on alcoholic beverages, such as in Newfoundland, New Brunswick, Quebec (except beer), Saskatchewan and British Columbia, are excluded. As noted above, only specific taxes levied on alcoholic beverages are included in this table.

A description of items 1 to 4 and 6 in the table follows:

(1) Net income from retail sales

This item represents the net income of liquor control authorities from the sale of alcoholic beverages. Income of the nature described in items 2 to 5 are excluded from item 1, although the expenses connected with the collection of items 2 to 5 have been charged to item 1. Certain expenses, not considered to be connected with liquor control revenue and not commonly included in the operations of the liquor control authority, have been deleted. These expenses are shown as items 5 to 8 of table 2.

(2) Sales tax

This item represents taxes levied at the time of retail sale of alcoholic beverages, exclusively. As pointed out previously, general retail sales taxes are excluded.

(3) Licences and permits

This is the amount collected in the nature of licences and permits to manufacture, sell or consume alcoholic beverages. It includes the income from gallonage "taxes" or "duties" not chargeable directly to the consumer, such as those levied against brewers and retailers in some provinces.

(4) Fines and confiscations

This is the total income realized from fines, penalties or confiscations, collected by the liquor authority or by the provincial government.

(6) Total revenue

This represents total revenues collected by the liquor authority or directly by the provincial government without deducting items 5 to 8 of table 2 or expenses relating to those revenues collected directly by the provincial government.

Attention is drawn to certain inconsistencies in the data contained herein, due to differences in the administration and accounting systems followed:

(i) Costs incidental to collection of licences, permits, etc.

Where these miscellaneous revenues are collected by the liquor authority the costs of administering and collecting them are also borne by the liquor authority. In some instances, such costs are kept separate and applied against the revenue in question while in others they are included with administration expenses of the authority concerned. For purposes of comparability, items 2 to 4 inclusive are shown on a gross basis and the costs of collection as a general expense of administration, i.e. as a deduction in arriving at item 1. Where, however, any such revenues from liquor control are collected directly by the government concerned, the costs of collection are not available and a similar adjustment to the above cannot be made. The net effect of this inconsistency of treatment is that item 1 will be slightly greater by comparison in those provinces where the province itself collects any of the items 2 to 4. The amounts involved are, however, not important in relative magnitude.

(ii) Capital expenditures

The method of accounting for the cost and use of fixed assets in the financial statements of the liquor authorities varies. In some cases fixed

assets are purchased by the provincial government and not reflected in financial statements of the liquor authority. Where the liquor authority does purchase some or all of its fixed assets the cost in some instances is absorbed by a charge to operations of the total cost in the year of purchase, while in others it is amortized according to commercial practice by an annual charge for depreciation against operations.

Net income from sales as shown in table 1, is after deducting the amount of depreciation or capital expenditure charged for the current year and reflected in the financial statement of the liquor authority. These deductions are footnoted in the table.

(iii) Revenue collected by, or paid to, local governments.

In some cases local governments are paid, or are allowed to retain, a portion of certain liquor control revenue, such as licences or fines. For example, in Nova Scotia liquor fines imposed and collected by the local government authorities are retained by the local government; other liquor control fines are included in the income of the liquor control authority. In Ontario, 20% of the revenue from licences and fees collected by the liquor authority is paid to those municipalities signing the required agreement and, where there is an agreement between the province and a municipality, all fines resulting from prosecutions by municipal police officers revert to the municipality. Where there is no such agreement, liquor fines are collected by magistrates on behalf of the liquor authority. In Alberta, while all liquor fines are collected by the Attorney General's Department, a portion thereof is paid to municipalities.

Where such revenues have been collected by the province as in Alberta, or by the liquor authority, and a portion thereof paid to municipalities, the gross amount (before deducting the portion paid to municipalities) is reflected in table 1. However, where such revenues have been collected by local government authorities on their own behalf and retained by them, as in Nova Scotia, they are not included in table 1 because the appropriate amounts cannot be determined.

Table 2. Reconciliation of Total Revenue from Liquor Control with Revenue Reported by Liquor Control Authority.

This table shows the adjustments that have been made to the revenue reported by liquor authorities to arrive at a total revenue from liquor control on a basis comparable for all provinces.

The first group of adjustments represents revenues not included in the net profit or earnings reported by the liquor control authority. Some of these amounts were collected by the province directly; some by local government authorities on behalf of the liquor authority; and some by the liquor authority on behalf of the provincial government and not included in the operating statement of the liquor authority.

The second group of adjustments represents expenditures by the liquor authority for services which generally are met by the provincial governments through budget appropriations and not charged against revenues from any specific source.

Tables 3, 3(a), and 3(b). Sales of Alcoholic Beverages by Value.

Tables 3 shows, by province, the value of alcoholic beverage sales. It includes the value of all alcoholic beverages, both domestic and imported, sold (i) by liquor authorities to the final consumer and to holders of licences to resell (ii) by wineries and breweries to holders of licences to resell, and (iii) by wineries' and brewers' retail outlets. However, the figures shown do not represent the final selling price to the consumer in all instances, as there is, of course, a mark-up by retailers.

Tables 3(a) and 3(b) have been introduced to expand the information in Table 3 to show separate figures for Canadian and imported beverages respectively. The term "Canadian" applies to those beverages which are produced or blended in Canada. Imported produce means those beverages which are imported in bottles, or in bulk for bottling by liquor authorities.

Table 4. Sales of Wine and Beer through Wineries' and Brewers' Retail Outlets.

This table shows the value and volume of direct sales by wineries and breweries, which are not reflected in the operations of the liquor authority. Except in Newfoundland, Quebec, Ontario and Manitoba, all wine and beer is sold by the liquor authority either direct to the consumer or to holders of licences to resell.

In Newfoundland, beer is sold by breweries, as well as by the Liquor Commission, to authorized licence holders who resell to consumers.

In Quebec, beer is sold by breweries to permittees authorized by the Liquor Commission to sell to consumers. These include grocery stores, in cities or towns only, for sale by the bottle for home consumption. In rural districts the breweries sell to their representatives who must be licensed by the Commission to operate a warehouse, and these representatives sell to permittees who sell to the consumer. Only beer imported from outside Canada is sold by the Quebec Liquor Commission.

In Ontario, wine and beer are sold through government liquor stores, but most sales of domestic wine and beer are made to the consumer through wineries' and brewers' retail stores. Wine and beer are also sold by wineries and breweries to holders of licences to resell.

In Manitoba, beer is purchased from the brewers by the Commission, and is sold to consumers through government liquor stores, brewers' retail stores and other licensed vendors. Breweries, when authorized by the Commission, may make direct delivery to purchasers.

Tables 5, 5(a) and 5(b)

These tables are included to show the same transactions, in terms of gallons, as those which are shown by dollar value in Tables 3, 3(a) and 3(b). As an indication of the consumption of alcoholic beverages, however, it must be remembered that in these figures is included the volume of sales to the holders of licences to resell rather than the actual gallonage sold by those licencees.

Table 6. Government Liquor Authorities' Stocks on Hand at End of Year.

This table shows the value of stocks on hand as at March 31, 1957, and consists of stock for sale and stock in bond. Stock for sale includes the value of stock in transit which has been purchased by the Board or Commission but has not been placed in warehouse at year-end.

Table 7. Specified Revenue of the Government of Canada from Alcoholic Beverages.

Revenue of the Government of Canada from alcoholic beverages, consisting of excise duties, excise taxes, customs duties and certain fees and licences, is shown in this table. Federal government revenues from the general sales tax, which is levied on alcoholic beverages, is not included in this table, as explained in the introduction. The total shown as excise duty is after deduction of collections on liquor imported for blending purposes, which deductions are included with import duty.

Table 8. Production of Alcoholic Beverages.

For spirits and beer, this table covers the years ended March 31, 1953 to 1957; in the case of fermented wine, however, figures are not available on a fiscal year basis and the data contained herein are for the calendar years ended December 31st, 1952 to 1956.

Table 9. Warehousing Transactions in Spirits.

This table provides a record of the movement of spirits during the year in terms of warehousing transactions. Item 2, warehoused during year, shows the amount of spirits entered in warehouse during the year directly from the distillery. This should not be confused with production figures as shown in table 8. The amount warehoused includes not only the amount of spirits produced during the year but also spirits re-entered in warehouse; for example, spirits may be taken out of warehouse for redistillation (item 9), and re-entered in the warehouse in a later period.

Item 3, otherwise warehoused, refers to spirits taken back into warehouse after having been recorded in a preceding year among items 5 to 9.

Entered for consumption, items 5 and 6, means the total amount released from warehouse, for the purpose of domestic consumption, duty paid. It

will be seen that the fluctuation between years in spirits entered for consumption in terms of proof gallons does not agree with the fluctuation in the amount of excise duty on spirits collected by the Government of Canada, table 7, item 1. While the excise duty is paid only on spirits entered for consumption, the rate of duty varies according to the nature of the spirits and the uses to which they are put. For example, on most spirits the excise duty rate is \$12 per proof gallon; on Canadian brandy it is \$10 per gallon; and on spirits declared for use in the manufacture of pharmaceutical products the rate is \$1.50 per proof gallon. It should also be remembered that excise duties are only paid on spirits entered for consumption. That is to say, no excise duty is paid on spirits exported in bond, taken for redistillation or otherwise accounted for.

Item 7, exported in bond, differs from the total export of domestic stock shown in table 10. This item records the transaction at the time the spirits are released from the warehouse for export, whereas table 10, item 8, records the transaction when the physical movement of the spirits takes place.

Item 8, otherwise accounted for, represents spirits taken from the warehouse other than for domestic consumption or for export in bond, for example, transfers to other distillers.

Table 10. Imports and Exports of Alcoholic Beverages.

This table is a summary, in value and volume, of tables 11 to 14. It differs from the presentation in previous years to the extent that exports of imported stock are not included. These can be found by reference to the footnotes in tables 13 and 14 of this and the immediately preceding year's report; for the years ended March 31, 1953 to 1955 reference should be made to tables 14 and 15 of the relative reports.

Table 11. Value of Imports of Alcoholic Beverages by Country.

The data contained herein shows the value of imports of alcoholic beverages for the fiscal year ended March 31, 1957 in detail by country.

Table 12. Volume of Imports of Alcoholic Beverages by Country.

This table embraces the same transactions as are reflected in table 11, in terms of gallons.

Table 13. Value of Exports of Alcoholic Beverages by Country.

Figures in this table represent the value of spirits, wines and beer of domestic production exported during the fiscal year ended March 31, 1957. They do not include the re-export of foreign produce as in previous years. However these re-exports are shown in the footnotes to this table.

Table 14. Volume of Exports of Alcoholic Beverages by Country.

This table projects table 13, in terms of gallons.

The following symbols have been used in the tables to indicate:

- .. figures are not available
- ... not appropriate or applicable
- nil or zero

The expression "Proof Strength" or "Proof Spirit" as used in Canada and other British Empire countries, means an arbitrarily adopted standard of the alcoholic strength of liquids, the primary pur-

pose of which is the computing of Excise and Customs duties. "Proof" strength (which must not be confused with "Pure Alcohol") is determined by an instrument known as Sikes' Hydrometer, and indicates the degree of alcoholic strength possessed by a liquid containing 57% of alcohol and 43% of water by volume, at a temperature of 51 degrees Fahrenheit¹.

The expression "Proof Gallon" as used in this report, means an imperial gallon of spirits of "Proof Strength".

1. A Handbook on The Beverage Distilling Industry in Canada—The Association of Canadian Distillers, 1957—Page 30.

1957 OPERATIONS

Government revenue from the control and taxation of alcoholic beverages in the fiscal year ended March 31, 1957, amounted to \$392 million, an increase of \$28 million over the previous fiscal year.

For comparative purposes this information is presented in the following table for the latest five years and for the tenth year prior to the latest year. The figures for 1947 were computed according to substantially the same concepts.

Government Revenue from Control and Taxation of Alcoholic Beverages

Fiscal Years Ended March 31¹

Government	1957	1956	1955	1954	1953	1947
	(\$'000's)

4. Fiscal year ended October 31, 1946.

5. Revised.

6. 11 months—fiscal year end changed from April 30 to March 31.

7. Exclusive of General Sales Taxes on alcoholic beverages.

Sales

The figures contained in the first table on the next page do not represent the final retail selling price of alcoholic beverages. For a complete explanation see explanatory comment on table 3.

Volume of sales, as shown in the second table, is a more realistic indicator of trends in consumption

although as a measure of personal consumption by Canadians it is also subject to the same qualifications as dollar sales in respect of purchases by non-residents. Since the volume of sales of alcoholic beverages has not been reported by all authorities, totals cannot be given for comparative purposes. The data available, however, are as follows:

Value of Sales of Alcoholic Beverages¹

Fiscal Years Ended March 31

2052

Consumer Expenditure

Consumer expenditure on alcoholic beverages is used in the calculation of consumer expenditure on goods and services, which is an important component of the statistics on gross national expenditure of the Canadian economy, as shown in the Bureau publication "National Accounts, Income and Expenditure".

The sales of alcoholic beverages which form the basis of the estimated consumer expenditure figures shown here include expenditures by foreign visitors to Canada and by business, government, etc., but exclude expenditures by Canadians abroad. Nevertheless they are the most reliable figures available and are therefore included herein.

Number of Retail Stores

The number of retail stores operated by government liquor authorities is as follows:

	Number of stores in operation	
	March 31, 1956	March 31, 1957
Newfoundland	9	9
Prince Edward Island	7	7
Nova Scotia	47	51
New Brunswick	39	39
Quebec	129	133
Ontario.....	208	210
Manitoba	21	22
Saskatchewan	76	76
Alberta	68	69
British Columbia	103	106
Yukon	4	4
Northwest Territories	4	4

Estimated Consumer Expenditures on Alcoholic Beverages¹

Calendar year	Millions of dollars
1935	102
1936	115
1937	134
1938	155
1939	163

1944	345
1945	429
1946	516
1947	564
1948	609
1949	642
1950	672
1951	732
1952	833
1953	869
1954	890
1955	925
1956	965 ²
1957	1,042 ²

1. Since these figures are partially estimates they are subject to revision, particularly for recent years.
2. Preliminary.

Imports and Exports

Increases in the value of imports of alcoholic beverages for the fiscal year ended March 31, 1957 over the previous fiscal year were as follows:

Spirits — from \$15,459,852 to \$16,506,457
 Wines — from \$4,245,573 to \$4,670,540
 Beer — from \$308,577 to \$331,101

The value of domestic spirits exported increased from \$62,303,777 to \$68,332,114 but exports of domestic wines and beer decreased as follows:

Wines — from \$5,196 to \$2,866
 Beer — from \$3,673,649 to \$3,637,360

For a detailed breakdown including re-exports of imported stock, see Tables 10 to 14 of this report.

STATISTICAL TABLES

TABLE 1. Revenue from Administration of Liquor Control by Provincial and Territorial Governments¹
