THE CONTROL AND SALE OF ALCOHOLIC BEVERAGES IN CANADA

(Fiscal Year Ended March 31, 1958)

Revenue is derived by government in Canada from the control, sale and taxation of alcoholic beverages. The statistics presented in this report set out this revenue in detail, and present as well subsidiary information on sales operations (by dollars and volume), inventories, production, warehousing, and imports and exports.

Certain other revenues in the form of corporation income taxes, real estate taxes, and business taxes, are received from the producers and distributors

of alcoholic beverages. A federal general sales tax, and provincial sales taxes in five provinces are imposed on liquor sales to consumers. These are not regarded as specific taxes on alcoholic beverages, and are not included herein; nor would it be possible to wholly isolate them for reporting purposes.

The assistance of the various government officials concerned is gratefully acknowledged.

SUMMARY OF 1957-58 OPERATIONS

Government revenue from the control and taxation of alcoholic beverages in the fiscal year ended March 31, 1958, amounted to \$421 million, an increase of \$29 million over the previous fiscal year.

For comparative purposes this information is presented in the following table for the latest five years and for the tenth year prior to the latest year. The figures for 1948 were computed according to substantially the same concepts.

Government Revenue from Control and Taxation of Alcoholic Beverages
Fiscal Years ended March 31

Government	1958	1957	1956	1955	1954	1948
	thousands of dollars					
Provincial and Territorial Governments:

Totals All Governments	421,231	392,124	363,834	337,897	343,645	267,365

¹ Newfoundland became a Canadian province on April 1, 1949.

² Sale of alcoholic beverages prohibited except for medicinal purposes until July 1, 1948.

³ Fiscal year ended November 30, 1947.

⁴ Fiscal year ended October 31, 1947.

Sales

The figures contained in the first table below do not represent the final retail selling price of alcoholic beverages. For a complete explanation see explanatory comment on Table 3.

Volume of sales, as shown in the second table, is a more realistic indicator of trends in consumption

although as a measure of personal consumption by Canadians it is also subject to the same qualifications as dollar sales in respect of purchases by non-residents. Since the volume of sales of alcoholic beverages has not been reported by all authorities, totals cannot be given for comparative purposes.

Number of Retail Stores

The number of retail stores operated by government liquor authorities is as follows:

	Number of stores in operation	
	March 31, 1958	March 31, 1957
Newfoundland	10	9
Prince Edward Island	7	7
Nova Scotia	52	51
New Brunswick	38	39
Quebec	140	133
Ontario	217	210
Manitoba	34	22
Saskatchewan	77	76
Alberta	74	69
British Columbia	107	106
Yukon	5	4
Northwest Territories	4	4

Imports and Exports

Increases in the value of imports of alcoholic beverages for the fiscal year ended March 31, 1958 over the previous fiscal year were as follows:

Spirits — from \$16,506,457 to \$18,682,635
 Wines — from \$ 4,670,540 to \$ 5,457,081
 Beer — from \$ 331,101 to \$ 420,544

The value of domestic spirits exported decreased from \$68,332,114 to \$68,090,724, but exports of domestic wines and beer increased as follows:

Wines — from \$ 2,866 to \$ 7,289
 Beer — from \$3,637,360 to \$4,042,886

For a detailed breakdown by country, see Tables 10 to 14 of this report.

EXPLANATORY COMMENT

Table 1. Revenue from Administration of Liquor Control by Provincial and Territorial Governments.

The purpose of this table is to record the revenue resulting from liquor control, whether collected by the liquor authorities or directly by a government. Revenues resulting from the imposition of a general retail sales tax on alcoholic beverages, such as in Newfoundland, New Brunswick, Quebec (except beer), Saskatchewan and British Columbia, are excluded. As noted above, only specific taxes levied on alcoholic beverages are included in this table.

A description of items 1 to 4 and 6 in the table follows:

(1) Net income from retail sales

This item represents the net income of liquor control authorities from the sale of alcoholic beverages. Income of the nature described in items 2 to 5 are excluded from item 1, although the expenses connected with the collection of items 2 to 5 have been charged to item 1. Certain expenses, not considered to be connected with liquor control revenue and not commonly included in the operations of the liquor control authority, have been deleted. These expenses are shown as items 5 to 8 of Table 2.

(2) Sales tax

This item represents taxes levied at the time of retail sale of alcoholic beverages, exclusively. As pointed out previously, general retail sales taxes are excluded.

(3) Licences and permits

This is the amount collected in the nature of licences and permits to manufacture, sell or consume alcoholic beverages. It includes the income from gallonage "taxes" or "duties" not chargeable directly to the consumer, such as those levied against brewers and retailers in some provinces.

(4) Fines and confiscations

This is the total income realized from fines, penalties or confiscations, collected by the liquor authority or by the provincial government.

(6) Total revenue

This represents total revenues collected by the liquor authority or directly by the provincial government without deducting items 5 to 8 of Table 2 or expenses relating to those revenues collected directly by the provincial government.

Attention is drawn to certain inconsistencies in the data contained herein, due to differences in the administration and accounting systems followed:

(i) Costs incidental to collection of licences, permits, etc.

Where these miscellaneous revenues are collected by the liquor authority the costs of administering and collecting them are also borne by the liquor authority. In some instances, such costs are kept separate and applied against the revenue in question while in others they are included with administration expenses of the authority concerned. For purposes of comparability, items 2 to 4 inclusive are shown on a gross basis and the cost of collection as a general expense of administration, i.e. as a deduction in arriving at item 1. Where, however, any such revenues from liquor control are collected directly by the government concerned, the cost of collection are not available and a similar adjustment to the above cannot be made. The net effect of this inconsistency of treatment is that item 1 will be slightly greater by comparison in those provinces where the province itself collects any of the items 2 to 4. The amounts involved are, however, not important in relative magnitude.

(ii) Capital expenditures

The method of accounting for the cost and use of fixed assets in the financial statements of the liquor authorities varies. In some cases fixed

assets are purchased by the provincial government and not reflected in financial statements of the liquor authority. Where the liquor authority does purchase some or all of its fixed assets the cost in some instances is absorbed by a charge to operations of the total cost in the year of purchase, while in others it is amortized according to commercial practice by an annual charge for depreciation against operations.

Net income from sales as shown in Table 1, is after deducting the amount of depreciation or capital expenditure charged for the current year and reflected in the financial statement of the liquor authority. These deductions are footnoted in the table.

(iii) Revenue collected by, or paid to, local governments.

In some cases local governments are paid, or are allowed to retain, a portion of certain liquor control revenue, such as licences or fines. For example, in Nova Scotia liquor fines imposed and collected by the local government authorities are retained by the local government; other liquor control fines are included in the income of the liquor control authority. In Ontario, 20% of the revenue from licences and fees collected by the liquor authority is paid to those municipalities signing the required agreement and, where there is an agreement between the province and a municipality, all fines resulting from prosecutions by municipal police officers revert to the municipality. Where there is no such agreement, liquor fines are collected by magistrates on behalf of the liquor authority. In Alberta, while all liquor fines are collected by the Attorney General's Department, a portion thereof is paid to municipalities.

Where such revenues have been collected by the province as in Alberta, or by the liquor authority, and a portion thereof paid to municipalities, the gross amount (before deducting the portion paid to municipalities) is reflected in Table 1. However, where such revenues have been collected by local government authorities on their own behalf and retained by them, as in Nova Scotia, they are not included in Table 1 because the appropriate amounts cannot be determined.

Table 2. Reconciliation of Total Revenue from Liquor Control with Revenue Reported by Liquor Control Authority.

This table shows the adjustments that have been made to the revenue reported by liquor authorities to arrive at a total revenue from liquor control on a basis comparable for all provinces.

The first group of adjustments represents revenues not included in the net profit or earnings reported by the liquor control authority. Some of these amounts were collected by the province directly; some by local government authorities on behalf of the liquor authority; and some by the liquor authority on behalf of the provincial government and not included in the operating statement of the liquor authority.

The second group of adjustments represents expenditures by the liquor authority for services which generally are met by the provincial governments through budget appropriations and not charged against revenues from any specific source.

Tables 3, 3A, and 3B. Sales of Alcoholic Beverages by Value.

Table 3 shows, by province, the value of alcoholic beverage sales. It includes the value of all alcoholic beverages, both domestic and imported, sold (i) by liquor authorities to the final consumer and to holders of licences to resell (ii) by wineries and breweries to holders of licences to resell, and (iii) by wineries' and brewers' retail outlets. However, the figures shown do not represent the final selling price to the consumer in all instances, as there is, of course, a mark-up by licencees.

Tables 3A and 3B have been introduced to expand the information in Table 3 to show separate figures for Canadian and imported beverages respectively. The term "Canadian" applies to those beverages which are produced or blended in Canada. Imported produce means those beverages which are imported in bottles, or in bulk for bottling by liquor authorities.

Table 4. Sales of Wine and Beer through Wineries' and Brewers' Retail Outlets.

This table shows the value and volume of direct sales by wineries and breweries, which are not reflected in the operations of the liquor authority. Except in Newfoundland, Quebec, Ontario and Manitoba, all wine and beer is sold by the liquor authority either direct to the consumer or to holders of licences to resell.

In Newfoundland, beer is sold by breweries, as well as by the Liquor Commission, to authorized licence holders who resell to consumers.

In Quebec, beer is sold by breweries to permittees authorized by the Liquor Commission to sell to consumers. These include grocery stores, in cities or towns only, for sale by the bottle for home consumption. In rural districts the breweries sell to their representatives who must be licensed by the Commission to operate a warehouse, and these representatives sell to permittees who sell to the consumer. Only beer imported from outside Canada is sold by the Quebec Liquor Commission.

In Ontario, wine and beer are sold through government liquor stores, but most sales of domestic wine and beer are made to the consumer through wineries' and brewers' retail stores. Wine and beer are also sold by wineries and breweries to holders of licences to resell.

In Manitoba, beer is purchased from the brewers by the Commission, and is sold to consumers through government liquor stores, brewers' retail stores and other licensed vendors. Breweries, when authorized by the Commission, may make direct delivery to purchasers.

Tables 5, 5A, and 5B.

These tables are included to show the same transactions, in terms of gallons, as those which are shown by dollar value in Tables 3, 3A and 3B. As an indication of the consumption of alcoholic beverages, however, it must be remembered that in these figures is included the volume of sales to the holders of licences to resell rather than the actual gallonage sold by those licencees.

Table 6. Government Liquor Authorities' Stocks on Hand at End of Year.

This table shows the value of stocks on hand as at March 31, 1958, and consists of stock for sale and stock in bond. Stock for sale includes the value of stock in transit which has been purchased by the Board or Commission but has not been placed in warehouse at year-end.

Table 7. Specified Revenue of the Government of Canada from Alcoholic Beverages.

Revenue of the Government of Canada from alcoholic beverages, consisting of excise duties, excise taxes, customs duties and certain fees and licences, is shown in this table. Federal government revenues from the general sales tax, which is levied on alcoholic beverages, is not included in this table, as explained in the introduction.

Effective July 1, 1957 excise duties on imported "blending liquor" are recorded separately from import duties, largely accounting for the decrease in the revenue shown under import duties and the corresponding increase in excise duties.

Table 8. Production of Alcoholic Beverages.

For spirits and beer, this table covers the years ended March 31, 1954 to 1958; in the case of fermented wine, however, figures are not available on a fiscal year basis and the data contained herein are for the calendar years ended December 31st, 1953 to 1957.

The term "proof gallon" as used in this and succeeding tables means an imperial gallon of spirits of "proof strength." "Proof strength" or "proof spirit" indicates the degree of alcoholic strength possessed by a liquid containing 57% of alcohol and 43% of water by volume, at a temperature of 51 degrees Fahrenheit. This standard of the alcoholic strength of liquids is used in computing excise and

customs duties. Proof strength can be determined by the use of an instrument known as a Sykes' Hydrometer.

Table 9. Warehousing Transactions in Spirits.

This table provides a record of the movement of spirits during the year in terms of warehousing transactions. Item 2, warehoused during year, shows the amount of spirits entered in warehouse during the year directly from the distillery. This should not be confused with production figures as shown in Table 8. The amount warehoused includes not only the amount of spirits produced during the year but also spirits re-entered in warehouse; for example, spirits may be taken out of warehouse for redistillation (item 9), and re-entered in the warehouse in a later period.

Item 3, otherwise warehoused, refers to spirits taken back into warehouse after having been recorded in a preceding year among items 5 to 9.

Entered for consumption, items 5 and 6, means the total amount released from warehouse, for the purpose of domestic consumption, duty paid. It will be seen that the fluctuation between years in spirits entered for consumption in terms of proof gallons does not agree with the fluctuation in the amount of excise duty on spirits collected by the Government of Canada, Table 7, item 1. While the excise duty is paid only on spirits entered for consumption, the rate of duty varies according to the nature of the spirits and the uses to which they are put. For example for the fiscal year ended March 31, 1958, the excise duty rate on most spirits was \$12 per proof gallon; on Canadian brandy it was \$10 per gallon; and on spirits declared for use in the manufacture of pharmaceutical products the rate was \$1.50 per proof gallon. It should also be remembered that excise duties are only paid on spirits entered for consumption. That is to say, no excise duty is paid on spirits exported in bond, taken for redistillation or otherwise accounted for.

Item 7, exported in bond, differs from the total export of domestic stock shown in Table 10. This item records the transaction at the time the spirits are released from the warehouse for export, whereas Table 10, item 8, records the transaction when the physical movement of the spirits takes place.

Item 8, otherwise accounted for, represents spirits taken from the warehouse other than for domestic consumption or for export in bond, for example, transfers to other distillers.

April 17, 1959.
