# THE CONTROL AND SALE OF ALCOHOLIC BEVERAGES IN CANADA <br> 1961 

(Fiscal Year Ended March 31, 1962)

Revenue is derived by government in Canada from the control, sale and taxation of alcoholic beverages. The statistics presented in this report set out this revenue in detail, and present as well subsidiary information on sales operations (by value and volume), inventories, production, warehousing, imports, exports, and assets and liabilities of provincial government liquor commissions.

Certain other revenues in the form of corporation income taxes, real estate taxes, and business taxes,
are received from the producers and distributors of alcoholic beverages. A national federal general sales tax, and provincial general sales taxes in eight provinces were levied on liquor sales to consumers in the year under review. These are not regarded as specific taxes on alcoholic beverages, and are not included herein; nor would it be possible to whally isolate them for reporting purposes.

The assistance of the various govemment officials concemed is gratefully acknowledged.

## SUMMARY OF 1961-62 OPERATIONS

Government revenue from the control and taxation of alcoholic beverages in the fiscal year ended March 31. 1962, amounted to $\$ 492$ million, an increase of $\$ 19$ million, or four per cent, over the previous fiscal year.

For comparative purposes this information is presented in the following table for the latest five years and for the tench year prior to the latest year. The figures for 1952 were computed according to substantially the same concepts.

## Government Revenue from Control and Taxation of Alcoholic Beverages

## Sales

The value figures contained in the first table below do not represent the final retail selling price of alcoholic beverages. For a complete explanation see explanatory comment on Table 3.

Volume of sales, as shown in the second table below, is a more realistic indicator of trends in consumption although as a measure of personal con-
sumption by Canadians it is also subject to the same limitations as value sales in respect of purchases by non-residents.

Excluding sales in the fronnce of Priace Edward Island, for which volume data are not available, the increases over the previous fiscal year amount to 4 per cent in value and about 3 per cent in volume.

| Total ........................... | 898 | 950 |

${ }^{2}$ In addltion, the Manitoba Liquor Commission had agencies in the smaller centres of population throughout the province, which were 35 and 39 in number, respectuely, for the years under review.

## Imports and Exports

For the fiscal year ended March 31. 1962. imports of alcoholic beverages showed an increase of 3 per cent in value, but a decrease of 4 per cent in volume, reflecting a rise in price assoclated with the exchange rate decline after mid-year.

The value of imports of spirits actually decreased from $\$ 16, \$ 17,000$ in the previous fiscal year to $\$ 16,159,000$, whereas imports of wines and beer increased as follows:

$$
\begin{aligned}
& \text { wines - from } \$ 6,823,000 \text { to } \$ 7,744,000 \\
& \text { beer }- \text { from } \$ 489,000 \text { to } \$ 538,000
\end{aligned}
$$

Exports of alcoholic beverages were higher by 6 per cent in value and 4 per cent in volume in the fiscal year. Exports of domestic spirits increased from $\$ 78,761,000$ to $\$ 83,985,000$; wines remained unchanged in value at $\$ 4,000,000$, and beer declined from $\$ 4,350,000$ to $\$ 4,139,000$. The volume of beer and wine decreased.

See Table 9 for comparative value and volume figures for the fiscal years ended March 31, 1958 to March 31, 1962 inclusive.

## EXPLANATORY COMMENI

Table 1. Revenue from Administration of Liquor Control by Provincial and Territorial Governments.

The purpose of this table is to record the revenue resulting from liquor control, whether collected by the liquor authorities or directly by a govemment. Revenues resulting from the imposition of a general retail sales tax on sales of alcoholic beverages, such as in: Newfoundland (5\%), Prince Edward Island ( $4 \%$ ), Nova Scotia ( $5 \%$ ), New Brunswick ( $3 \%$ ), Quebec ( $4 \%$, beer exempt), Ontario ( $3 \%$ effective September 1961, draft beer exempt), Saskatchewan ( $3 \%$ ) and British Columbia (5\%), are excluded. Only specific taxes levied on alcoholic beverages are included in this table.

A description of items 1 to 5 in the table follows:

## (1) Net income from retail sales

This item represents the net income of liquor control authorities from the sale of alcoholic beverages. Income of the nature described in items 2 to 4 are excluded from item 1 , although the expenses connected with the collection of items 2 to 4 have been charged to item 1. Certain expenses, not considered to be connected with liquor control revenue and not commonly included in the operations of the liquor control authority, have been deleted. These expenses are shown as items 5 to 8 of Table 2.

## (2) Sales tax

This item represents taxes levied at the time of retail sale of alcoholic beverages. In Quebec the unemployment tax of $5 ¢$ to $25 ¢$ on volume of retail package of alcoholic beverages was repealed on April 13, 1961.

As pointed out previously, general retail sales taxes are excluded.

## (3) Licences and permits

This is the amount collected in the nature of licences and permits to manufacture, sell or consume alcoholic beverages. It includes the income from gallonage "taxes" or "duties" not chargeable directly to the consumer, such as those levied against brewers and retailers in some provinces.

## (4) Fines and confiscations

This is the total income realized from fines, penalties or confiscations, collected by the liquor authority or by the provincial govemment.

## (5) Total revenue

This represents total revenues collected by the liquor authority of directly by the provincial govemment without deducting items 5 to 8 of Table 2 or expenses relating to those revenues collected directly by the provincial govemment.

Attention is drawn to certain inconsistencies in the data contained herein, due to differences in the administration and accounting systems followed:
(i) Costs incidental to collection of taxes, licences, permits, etc.

Where $\operatorname{tax}$, licence and permit revenues are collected by the liquor authority the costs of administering and collecting them are also bome by the liquor authority. In some instances, such costs are kept separate and applied against the revenue in question while in others they are included with administration expenses of the authority concerned. For purposes of comparability, items 2 to 4 inclusive are shown on a gross basis and the cost of collection as a general expense of administration, i.e. as a deduction in arriving at item 1. Where, however, any such revenues from liquor control are collected directly by the government concerned, the costs of collection are not available and a similar adjustment to the above cannot be made. The net effect of this inconsistency of treatment is that item 1 will be slightly greater by comparison in those provinces where the province itself collects any of the items 2 to 4 . The amounts involved are, however, not significantly large.

## (ii) Capital expenditures

The method of accounting for the cost and use of fixed assets in the financial statements of the liquor authorities varies. In some cases fixed assets are purchased by the provincial government and not reflected in financial statements of the liquor authority. Where the liquor authority does purchase some or all of its fixed assets the cost in some instances is absorbed by a charge to operations of the total cost in the year of purchase, while in others it is amortized according to commercial practice by an annual charge for depreciation against operations. For the value of fixed assets carried on the books of the provincial liquor commissions, see Table 10, asset item 5.

Net income from sales as shown in Table 1, is after deducting the amount of depreciation or capital expenditure charged for the current year and reflected in the financial statement of the liquor authority. These deductions are footnoted in the table.
(iii) Revenue collected by, or paid to, local governments.

In some cases local govemments are paid, or are allowed to retain, a portion of certain liquor control revenue, such as licences or fines. For example, in Nova Scotia liquor fines imposed and collected by the local government authorities are retained by the local govemment; other liquor control fines are included in the income of the liquor control authority. In ontario, a portion of the revenue from licences and fees collected by the liquor authority is paid to those municipalities
signing the required agreement and, where there is an agreement between the province and a municipality, the fines or a portion of the fines, resulting from prosecutions by municipal police officers revert to the municipality. Where there is no such agreement, liquot fines are collected by flagistrates on behalf of the liquor authority. In Alberta, while all liquor fines are accountable by the Attorney General's Department, a portion thereof is paid to municipalities.

Where such revenues have been collected by the province as in Alberta, or by the liquor authority, and a portion thereof paid to municipalities, the gross amount (before deducting the portion paid to municipalities) is reflected in Table 1. However, where such revenues have been collected by local govemment authorities on their own behalf and tetained by them, as in Nova Scotia, they are not included in Table 1 because the appropriate amounts cannot be determined.

Table 2. Reconciliation of Total Revenue from Liquor Control with Earnings Reported by Liquor Control Authority.

This table shows the adjustments that have been made to the revenue reported by liquor authorities to arrive at a total revenue from liquor control on a basis comparable for all provinces.

The first group of adjustments represents revenues not included in the net profit or earnings reported by the liquor control authority. Some of these amounts were collected by the province directly; some by local govemment authorities on behalf of the liquor authority; and some by the liquor authority on behalf of the provincial government and not included in the operating statement of the liquor authority.

The second group of adjustments represents expenditures by the liquor authority for services which generally are met by the provincial governments through budget appropriations and not charged against revenues from any specific source, and provisions for special reserves which are not allowed as a charge against income.

Tables 3, 3A, and 3B. Sales of Alcoholic Beverages by Value.

Table 3 shows, by province, the value of alcoholic beverage sales. It includes the value of all alcoholic beverages, both domestic and imported, sold (i) by liquor authorities to the final consumer and to holders of licences to resell (ii) by wineries and breweries to holders of licences to resell, and (iii) by wineries' and brewers' retail outlets. However, the figures shown do not represent the final selling price to the consumer in all instances, as there is, of course, a mark-up by licencees.

Tables $3 A$ and $3 B$ expand the information in Table 3 to show separate figures for Canadian and imported beverages respectively.. The term "Canadian" applies to those beverages which are produced or blended in Canada. Imported produce comprises those beverages which are imported in bottles, or in bulk for botlling by liquor authorities.

Tables 4. 4A, and 4B. Sales of Alcoholic Beverages by Volume.

These tables are included to show the same transactions, in terms of gallons, as those which are shown by value in Tables 3, 3A and 3B. As an indication of the consumption of alcoholic beverages, however, it must be remembered that in these figures is included the volume of sal es to the holders of licences to resell rather than the actual gallonage sold by those licencees.

Table 5. Sales of Wine and Beer through Wineries' and Brewers' Retail Outlets.

This table shows the value and volume of direct sales by wineries and breweries, which are not reflected in the operations of the liquor authority. Except in Newfoundland, Quebec, Ontario, and in Manitoba to October 1, 1959, all wine and beer is sold by the liquor authority either directly to the consumer or to holders of licences to resell.

In Newfoundland, beer is sold by breweries, as w. ${ }^{1}$ ? 3 s by the Liquor Commission, to authorized lisence holders who resell to consumers. Each local brewer is permitted to operate a retail store, to take phone orders and to deliver to customers.

In Quebec, in the cities of Montreal and Quebec, beer is sold by breweries to permittees authorized by the Liquor Board to sell to consumers. Licensed grocery stores in cities, towns, or in other municipalities of over 2,000 persons, sell beer by the bottle for consumption off the premises. In country districts, the breweries sell to their representatives who must hold permits from the Board to operate a warehouse, and these representatives sell to holders of permits to sell at retail. Only beer imported from outside of Canada is sold by the Quebec Liquor Board.

In Ontario, wine and beer are sold through government liquor stores, but most sales of domestic wine and beer are made to the consumer through wineries' and brewers' retail stores. Wine and beer are also sold by wineries and breweries to holders of licences to resell.

In Manitoba, beer is purchased from the brewers by the Commission; sales to consumers are made through govemment liquor stores, brewers' retall stores and other licensed vendors. Since October 1. 1959, breweries are required to purchase beer from
the Commission for resale through their retail outlets. Breweri es, when authorized by the Commission, may make direct delivery to purchasers.

Table 6. Specified Revenue of the Govemment of Canada from Alcoholic Beverages.

Revenue of the Government of Canada from alcoholic beverages, consisting of excise duties, excise taxes, customs duties and certain fees and licences, is shown in this table. Federal govemment revenues from the general sales tax, which is levied on alcoholic beverages, is not included in this table, as explained in the introduction.

## Table 7. Production of Alcoholic Beverages.

Gallonage production figures of spirits and beer subject to excise duty in the fiscal years ended March 31. 1958 to 1962 as presented in this table, are obtained from the annual reports of the Department of National Revenue. Calendar year production data on spirits, beer and wine based on retums from firms in the respective industries are published by the Dominion Bureau of Statistics. The fermented wines series in the table is for the calendar years 1957 to 1961 and is obtained from the Bureau report on the wine industry. Fiscal year figures are not available.

The term "proof gallon" as used in this and succeeding tables means an imperial gallon of spirits of "proof strength." "Proof strength" or "proof spirit" indicates the degree of alcoholic strength possessed by a liquid containing $57 \%$ of alcohol and $43 \%$ of water by volume, at a temperature of 51 degrees Fahrenheit. This standard of the alcoholic strength of liquids is used in computing excise and customs duties. Proof strength can be determined by the use of an instrument known as a Sikes's Hydrometer.

## Table 8. Warehousing Transactions in Spirits.

This table provides a record of the movement of spirits during the year in terms of warehousing transactions. Item 2, warehoused during year, shows the amount of spirits entered in warehouse during the year directly from the distillery. This should not be confused with production figures as shown in Table 7. The amount warehoused includes not only the amount of spirlts produced during the year but also spirits re-entered in warehouse; for example, spirits may be taken out of warehouse for redistillation (item 9), and re-entered in the warehouse in a later period.

Item 3, otherwise warehoused, refers to spirits taken back into warehouse after having been recorded in a preceding year among items 5 to 9.

Entered for consumption, items 5 and 6, means the total amount released from warehouse, for the purpose of domestic consumption, duty paid. It will be seen that the fluctuation between years in spirits
entered for consumption in terms of proof gallons does not agree with the fluctuation in the amount of excise duty on spirits collected by the Government of Canada, Table 6, item 1. While the excise duty is paid only on spirits entered for consumption, the rate of duty varies according to the nature of the spirits and the uses to which they are put. For example, for the fiscal year ended March 31, 1962. the excise duty rate on most spirits was $\$ 13$ per proof gallon; on Canadian brandy it was $\$ 11$ per gallon; and on spirits declared for use in the manufacture of pharmaceutical products the rate was
$\$ 1.50$ per proof gallon. It should also be remembered that excise duties are only paid on spirits entered for consumption, that is to say, no excise duty is paid on spirits exported in bond, taken for redistilation or otherwise accounted for.

Item 7, exported in bond, differs from the total export of domestic stock shown in Table 9. This item records the transaction at the time the spirits are released from the warehouse for export, whereas Table 9, item 10, records the transaction when the physical movement of the spirits takes place.

TABLE 1. Revenue from Administration of Liquor Control by Provincial and Territorial Governments ${ }^{2}$ Fiscal Year Ended March 31, 1962

| No. |  | Newfoundland | Prince Edward Island | Nova Scotia | New Brunswick |
| :---: | :---: | :---: | :---: | :---: | :---: |

[^1]Item 8, otherwise accounted for, represents spirits taken from the warehouse other than for domestic consumption or for export in bond, for example, transfers to other distillers.

Table 10. Assets and Liabilities of Provincial Government Liquor Commissions.

This table presents the assets and liabilities as published in the annual reports of the liquor commissions, and the public accounts of the provinces.

The definitions of the items follow the terminology used in commercial accounting practice.

Asset item 3, Inventories, shows the value of stock for sale (item 3.1) and stock in bond (item 3.2). Asset items 3.1 and 3.2 incorporate the information formerly published as "Government Liquor Authorities' Stocks on Hand at End of Year". Stock for sale includes the value of stock in transit from Canadian manufacturers, which has been purchased by the Board or Commission but has not been placed in warehouse at year-end. Item 3.3 includes other materials and supplies such as onntainers, cartons, etc.

April 30, 1963
