Symbols

The following standard symbols are used in Statistics Canada publications:

- a adjusted figures.
- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- e estimated figures.
- x confidential to meet secrecy requirements of the Statistics Act.

In some tables, figures will not add to total, because of rounding.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- a chiffres ajustés.
- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- e chiffres estimés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Les chiffres ayant été arrondis, leur somme peut ne pas correspondre dans certains cas aux totaux indiqués.

Preface

The principal aim of the *Market Research Handbook* is to provide a convenient source of information and reference for analyzing the many aspects of Canadian markets on the local, provincial, regional and national levels. In addition, key economic indicators for member countries of the Organization for Economic Co-operation and Development (OECD) are included for analysts interested in comparing Canada's economic performance with those of its major trading partners.

The *Handbook* includes the latest information available at the time of compilation, but given the lengthy lead time required to prepare a compendium of this size, it may not necessarily contain the latest data published on a specific subject. Readers wishing to ascertain whether more current information is available should refer to the "source" list at the end of each section and contact the regional office in their area or the originating division of Statistics Canada.

As the user will note, this edition of the *Handbook* still contains the latest data derived from the 1981 Census of Population, which were judged by the Industry Division to be of special importance to the majority of users.

Some tables contain data which are several years old. These series are retained in the *Handbook*, if (a) the data provided is the latest information available on a particular subject and/or (b) the data were useful as "benchmarks", or historical perspectives in the studies of markets.

Tabular material contained in this *Handbook* is presented in basically the same format as in previous editions. Wherever possible or appropriate, percentage changes have been provided between different time periods, share of market ratios and per capita rates. These measures should help the marketing practitioner in assessing the dynamics of the market place, such as population growth, demographic trends, income distribution and changes in consumption patterns.

The publication is divided into ten sections. The first eight sections contain tabular data and graphics. Sections 1 to 5 present international, national and for many series, provincial and regional statistics. Section 6 is devoted to data of significant value to the analyst, covering up to 24 metropolitan markets (CMA's). According to the 1981 Census, 56.1% of Canada's population lived in these CMA's as of June 1, 1981. To complement the data the *Handbook* now includes for the first time, maps denoting population change as well as private household income for 12 of the census metropolitan areas. Section 7 provides similar data for 36 Census Agglomerations (CA's) which accounted for an additional 8.9% of Canada's population in 1981. In order to enable the user to recognize the physical areas covered by the CMA's and CA's, a chart has been included in each of these sections listing each metropolitan area or selected census agglomeration and its component parts, based on areas defined by the 1981 Census. A new section 8 has been added to the *Handbook*. It provides various tables and graphs which describe possible changes in the demographic and economic profiles for Canada of the future. This type of information should prove beneficial to all users of marketing information.

Préface

Le but principal du *Recueil statistique des études de marché* est de fournir une bonne source d'information et de référence afin d'analyser les divers aspects des marchés canadiens aux niveaux local, provincial, régional et national. De plus, les indicateurs économiques clés des pays membres de l'Organisation de coopération et de développement économiques (OCDE), sont inclus pour les analystes intéressés à comparer la performance économique du Canada à celle de ses principaux partenaires commerciaux.

Le *Recueil* comprend les plus récents renseignements disponibles au moment de sa préparation, mais étant donné l'importance du délai de la préparation d'un recueil de cette taille, cette publication peut ne pas nécessairement contenir les dernières données publiées d'un sujet spécifique. Les lecteurs qui veulent vérifier si des renseignements plus récents sont disponibles doivent se référer à la liste des "sources" à la fin de chaque section et communiquer avec le bureau régional de leur région ou les divisions de Statistique Canada d'où proviennent les données.

Comme l'utilisateur le notera, cette édition du *Recueil* contient encore les données les plus récentes dérivées du Recensement de la population de 1981, que la Division de l'industrie jugeait particulièrement importantes pour la majorité des utilisateurs.

Certains tableaux contiennent des données qui remontent à plusieurs années. Ces séries sont conservées dans le *Recueil* si a) les données fournissaient les informations les plus récentes disponibles sur un sujet particulier et/ou b) si les données étaient utiles comme point de repère ou pour fournir une perspective historique sur l'étude des marchés.

Les tableaux contenus dans ce *Recueil* sont en général présentés dans le même format que lors des éditions précédentes. Lorsque possible, ou utile, on a fourni des variations en pourcentages entre les divers moments, proportion des taux du marché et taux par habitant. Ces mesures devraient aider le praticien des études de marché à évaluer les dynamiques du marché, comme la croissance de la population, les tendances démographiques, la distribution du revenu et les changements des comportements de consommation.

La publication est divisée en dix sections. Les huit premières sections contiennent des tableaux et des graphiques. Les sections 1 à 5 présentent des statistiques internationales, nationales, et, pour de nombreuses séries, provinciales et régionales. La section 6 est consacrée à des données importantes pour l'analyste, touchant 24 marchés métropolitains (RMR). Selon le recensement de 1981, 56.1% de la population canadienne vivaient dans ces RMR le 1^{er} juin 1981. Comme complément aux données, le *Recueil* comprend, pour la première fois, des cartes indiquant les variations de la population ainsi que le revenu des ménages privés pour 12 des régions métropolitaines de recensement. La section 7 fournit des données semblables pour 36 agglomérations de recensement (AR), qui regroupaient une fraction supplémentaire de plus de 8.9% de la population canadienne en 1981. Pour permettre à l'utilisateur de reconnaître les zones géographiques couvertes par les RMR et les AR, on a inclus dans chacune de ces sections un tableau qui donne la liste des régions métropolitaines ou des agglomérations de recensement choisies et de leurs composantes, sur la base des secteurs définis par le recensement de 1981. On a ajouté au *Recueil* une huitième section. On y trouve divers graphiques et tableaux présentant des variations possibles des profils économiques et démographiques du Canada de l'avenir. Ces renseignements devraient s'avérer précieux pour tous les utilisateurs des données de commercialisation.

The user should utilize the information contained in the various "Sources", "Notes" and Definition sub-sections in conjunction with statistical tables. Each serves a useful purpose.

Sources — The sources sub-sections at the end of each major section lists the publications from which the primary data for each table were derived. This information will be useful to those readers who may wish to obtain additional or possibly more up-to-date figures on a specific subject.

Notes — The user is advised to refer to these notes at the end of each major section, in conjunction with the tabular material, in order to avoid drawing erroneous conclusions and to obtain an appreciation of the possible limitations inherent in the data.

Definitions — In order to assist the user in the analysis of data contained in the *Handbook*, a listing of the more important terms found in numerous tables throughout the *Handbook* is presented in alphabetical order in Section 9.

Because of the precise nature of many terms, the user is urged to refer to both the "Notes" and "Definitions" when using the data contained in the *Handbook*.

In order to facilitate the use of the *Handbook*, an index of the major subjects for which data are available can be found in Section 10.

Although every effort has been made to avoid errors, it is possible in view of the size of this publication, that some may have escaped our scrutiny. If that should have happened, we apologize and will make every effort to avoid similar errors in future editions. Please do not hesitate to bring these errors to our attention.

As usual, thanks are due to a number of divisions within Statistics Canada, and other departments and agencies of the federal government for their assistance in providing data, definitions of terms and advice on presentation of the data. Special thanks are due to Maurice Massaad for his invaluable assistance in selecting the series which are included in the *Handbook* and in preparing the notes for each table; to Jeanne Tessier, the Research Officer; to Michel Mallette for the preparation of the tabular material; and to the staff in the Text Production Services Section for their expertise in the preparation of the manuscript; to the Geocartographics Sub-Division and to the Chart Design Section of the Publications Division for the preparation of the maps and charts.

Readers are urged to write to
Mr. G. Snyder,
Associate Director,
Distributional Analysis Section,
Industry Division,
Statistics Canada,
Ottawa, Ontario.
K1A 0V4
with comments and suggestions which would serve to improve future editions of the *Market Research Handbook*.

L'utilisateur devrait utiliser les renseignements contenus dans les sections "Sources", "Notes" et "Définitions" avec les tableaux statistiques. Tous sont utiles.

Sources — Cette sous-section, à la fin de chaque section principale, donne la liste des publications d'où ont été tirées les données fondamentales de chaque tableau. Ces renseignements seront utiles aux lecteurs qui désirent obtenir des renseignements supplémentaires ou des données plus récentes sur un sujet précis.

Notes — On recommande à l'utilisateur de se reporter à ces notes, qui se trouvent à la fin de chaque section principale, en rapport avec les données des tableaux, pour éviter de tirer des conclusions erronées et pour se faire une idée des limites possibles inhérentes aux données.

Définitions — Afin d'aider l'utilisateur à analyser les données contenues dans le *Recueil*, on y a inclus une liste des principaux termes utilisés tout au long de celui-ci, par ordre alphabétique, dans la section 9.

En raison du sens précis d'un grand nombre de termes, l'utilisateur est prié de se reporter aux notes et aux définitions lorsqu'il utilise les données contenues dans le *Recueil*.

En vue de faciliter l'usage du *Recueil*, un index des principales matières pour lesquelles des données sont disponibles se trouve à la section 10.

Bien qu'on ait fait tous les efforts pour éviter les erreurs, il est possible, étant donné la taille de cette publication, que certaines puissent avoir échappé à notre attention. Si cela s'est produit, nous nous en excusons et nous vous assurons que nous ferons tous les efforts pour éviter des erreurs semblables dans les prochaines éditions. N'hésitez pas à nous signaler ces erreurs.

Nous désirons à nouveau remercier les divisions de Statistique Canada et les autres ministères et organismes du gouvernement fédéral pour leur assistance à fournir des données, des définitions des termes et des conseils sur la présentation des données. Nous devons également des remerciements spéciaux à Maurice Massaad pour son aide précieuse dans le choix des séries qui sont incluses dans le *Recueil* et pour la préparation des notes pour chaque tableau; à Jeanne Tessier Agent à la recherche et Michel Mallette pour la préparation des tableaux; au personnel de la Section des services de production des textes pour leur expertise dans la préparation du manuscrit; à la Sous-division de la géocartographie et au Service de créativité conceptuel de la Division des publications pour la préparation des cartes et des graphiques.

Pour toutes observations ou suggestions susceptibles d'améliorer les prochaines éditions du *Recueil statistique des études de marché*, les lecteurs sont priés de communiquer avec
M.G. Snyder

TABLE 1-7. Domestic Exports, by Commodity Category, 1977-1984 - Continued

TABLEAU 1-7. Exportations nationales, par catégorie de marchandises, 1977-1984 - suite

| Commodity category Catégorie de marchandises | 1977 | 1978 | 1979 | 1980 | 1981 | 1982 | 1983 | 1984 | Percentage change 1984/1983 Variation en pourcentage 1984/1983 |
|--|----------|----------|----------|----------|----------|----------|----------|----------|--|
| millions of dollars - millions de dollars | | | | | | | | | |
| Crude materials inedible - Concluded - Matières brutes, non comestibles - fin: | | | | | | | | | |
| Lead in ores, concentrates and scrap - Minerais, concentrés et déchets de plomb | 53.4 | 59.9 | 123.2 | 118.2 | 83.7 | 39.9 | 19.6 | 20.0 | + 2.0 |
| Nickel in ores, concentrates and scrap - Minerais, concentrés et déchets de nickel | 537.4 | 294.8 | 335.7 | 446.8 | 533.3 | 298.6 | 336.5 | 580.3 | + 72.5 |
| Precious metals in ores, concentrates and scrap - Minerais, concentrés et déchets de métaux précieux | 153.8 | 192.4 | 318.0 | 646.8 | 433.8 | 316.0 | 388.9 | 381.9 | - 1.8 |
| Zinc in ores, concentrates and scrap - Minerais, concentrés et déchets de zinc | 216.6 | 189.9 | 238.9 | 168.0 | 277.1 | 258.7 | 279.2 | 285.7 | + 2.3 |
| Radioactive ores and concentrates - Minerais et concentrés radioactifs | 75.4 | 207.2 | 378.9 | 230.7 | 179.4 | 358.6 | 62.6 | 333.7 | + 433.1 |
| Other metals in ores, concentrates and scrap - Autres minéraux concentrés et déchets métallifères | 224.6 | 227.8 | 401.4 | 536.9 | 420.9 | 341.3 | 164.4 | 189.0 | + 15.0 |
| Crude petroleum - Pétrole brut | 1,750.6 | 1,572.7 | 2,404.6 | 2,899.1 | 2,505.0 | 2,728.5 | 3,456.9 | 4,390.5 | + 27.0 |
| Natural gas - Gaz naturel | 2,028.1 | 2,190.3 | 2,889.1 | 3,983.8 | 4,370.0 | 4,754.7 | 3,847.5 | 3,886.4 | + 1.0 |
| Coal and other crude bituminous substances - Charbon et substances bitumineuses brutes | 650.2 | 751.9 | 835.3 | 933.8 | 1,146.9 | 1,269.2 | 1,312.5 | 1,846.6 | + 40.7 |
| Asbestos, unmanufactured - Amiante, non ouvré | 553.4 | 568.4 | 652.6 | 631.1 | 574.7 | 482.6 | 454.9 | 497.1 | + 9.3 |
| Sulphur - Soufre | 122.3 | 163.9 | 206.6 | 543.4 | 809.6 | 720.1 | 572.4 | 831.2 | + 45.2 |
| Other crude non-metallic minerals - Autres minéraux non métalliques bruts | 126.1 | 141.9 | 122.3 | 161.9 | 194.1 | 189.6 | 197.4 | 254.1 | + 28.7 |
| Other waste and scrap materials - Autres déchets et matières de rebut | 32.3 | 31.8 | 40.5 | 48.4 | 51.7 | 65.5 | 63.6 | 78.4 | + 23.3 |
| Fabricated materials, inedible - Matières travaillées, non comestibles | | | | | | | | | |
| Leather and leather fabricated materials - Cuir et demi-produits en cuir | 14,926.9 | 19,155.0 | 24,375.7 | 29,344.9 | 30,540.3 | 27,865.1 | 29,971.6 | 35,909.9 | + 20.1 |
| Wood and paper - Bois et papier | 7,750.7 | 9,432.6 | 11,620.9 | 12,464.0 | 12,628.7 | 11,717.4 | 12,776.7 | 15,156.2 | + 18.6 |
| Lumber, softwood - Bois d'œuvre, résineux | 2,338.6 | 3,158.2 | 3,820.8 | 3,264.5 | 2,912.7 | 2,847.2 | 3,895.7 | 4,178.9 | + 7.3 |
| Lumber, hardwood - Bois d'œuvre, leuillus | 48.5 | 70.6 | 80.3 | 88.7 | 76.5 | 65.5 | 68.8 | 75.0 | + 9.0 |
| Shingles and shakes - Bardeaux et bardeaux pour façade | 140.0 | 185.7 | 191.6 | 178.8 | 169.7 | 157.5 | 231.1 | 264.5 | + 14.5 |
| Other sawmill products - Autres sciages | 9.2 | 12.5 | 16.5 | 15.5 | 20.7 | 15.5 | 17.3 | 27.4 | + 58.4 |
| Veneer - Plaques | 64.1 | 89.2 | 109.6 | 90.3 | 89.6 | 90.9 | 115.5 | 122.2 | + 5.8 |
| Plywood - Contre-plaques | 84.1 | 122.4 | 138.5 | 146.4 | 131.6 | 123.9 | 141.5 | 147.7 | + 4.4 |
| Other wood fabricated materials - Autres demi-produits en bois | 99.3 | 153.6 | 195.8 | 176.2 | 192.4 | 187.3 | 272.2 | 376.6 | + 38.4 |
| Wood pulp and similar pulp - Pâte de bois et pâtes similaires | 2,157.7 | 2,180.9 | 3,083.3 | 3,873.0 | 3,818.7 | 3,221.4 | 3,048.7 | 3,908.0 | + 28.2 |
| Newsprint paper - Papier journal | 2,381.5 | 2,886.2 | 3,221.8 | 3,683.7 | 4,325.5 | 4,086.2 | 3,955.7 | 4,783.6 | + 20.9 |
| Other paper for printing - Autre papier à imprimerie | 151.4 | 224.3 | 322.5 | 353.5 | 341.5 | 413.8 | 411.4 | 558.0 | + 35.6 |
| Paperboard - Carton | 103.6 | 104.2 | 129.6 | 205.8 | 183.5 | 133.0 | 176.8 | 223.9 | + 26.6 |
| Other paper - Autres papiers | 172.7 | 244.8 | 310.8 | 387.6 | 366.3 | 375.2 | 442.0 | 490.4 | + 11.0 |
| Textiles | 111.0 | 148.5 | 177.8 | 234.0 | 266.6 | 242.2 | 227.2 | 275.8 | + 21.4 |
| Yarn, thread, cordage, twine and rope - Filés, fils, cordage, ficelle et corde | 22.2 | 34.6 | 43.7 | 68.4 | 95.9 | 79.0 | 89.1 | 93.0 | + 4.4 |
| Cotton broad woven fabrics - Tissus de coton larges | 10.9 | 9.1 | 8.5 | 13.3 | 10.0 | 11.7 | 14.2 | 15.9 | + 12.0 |
| Other broad woven fabrics - Autres tissus larges | 32.5 | 47.7 | 56.8 | 74.9 | 74.7 | 61.4 | 44.6 | 51.7 | + 15.9 |
| Other textile fabricated materials - Autres demi-produits en matières textiles | 45.4 | 57.1 | 68.8 | 77.5 | 86.0 | 90.1 | 79.4 | 115.2 | + 45.1 |
| Oils, fats, waxes, extracts and derivatives - Huiles, matières grasses, cires, extraits et dérivés | 138.9 | 159.2 | 217.6 | 249.6 | 266.3 | 227.7 | 183.6 | 320.9 | + 74.8 |
| Chemicals - Produits chimiques | 1,738.9 | 2,350.9 | 3,321.9 | 4,056.2 | 4,614.3 | 4,035.2 | 4,372.0 | 5,299.2 | + 21.2 |
| Chemical elements - Éléments chimiques | 110.7 | 124.8 | 146.0 | 160.5 | 147.3 | 170.2 | 186.1 | 228.2 | + 22.6 |
| Other inorganic chemicals - Autres produits chimiques inorganiques | 352.5 | 653.6 | 839.6 | 947.2 | 1,060.0 | 826.4 | 781.3 | 1,040.3 | + 33.1 |
| Organic chemicals - Produits chimiques organiques | 301.4 | 401.5 | 704.8 | 923.9 | 1,183.3 | 1,097.9 | 1,198.5 | 1,296.2 | + 8.2 |
| Fertilizers and fertilizer materials - engrains et matières fertilisantes | 659.0 | 728.8 | 987.3 | 1,253.8 | 1,343.2 | 1,022.2 | 1,202.9 | 1,530.2 | + 27.2 |
| Synthetic rubber and plastic materials - Caoutchouc synthétique et matières plastiques | 173.1 | 261.6 | 367.3 | 488.3 | 525.8 | 515.9 | 520.8 | 628.6 | + 20.7 |
| Plastics, basic shapes and forms - Formes de base en matières plastiques | 73.2 | 84.0 | 119.3 | 123.6 | 148.7 | 173.8 | 198.1 | 266.4 | + 34.5 |
| Other chemical products - Autres produits chimiques | 69.0 | 96.6 | 157.6 | 178.9 | 206.0 | 228.8 | 284.3 | 309.3 | + 8.8 |
| Petroleum and coal products - Dérivés du pétrole et du charbon | 649.1 | 1,022.7 | 1,885.3 | 2,324.3 | 2,642.5 | 2,537.9 | 2,814.8 | 3,192.7 | + 13.4 |

TABLE 1-7. Domestic Exports, by Commodity Category, 1977-1984 - Continued

TABLEAU 1-7. Exportations nationales, par catégorie de marchandises, 1977-1984 - suite

| Commodity category Catégorie de marchandises | 1977 | 1978 | 1979 | 1980 | 1981 | 1982 | 1983 | 1984 | Percentage change 1984/1983 Variation en pourcentage 1984/1983 |
|---|----------|----------|----------|----------|----------|----------|----------|----------|--|
| millions of dollars - millions de dollars | | | | | | | | | |
| Fabricated materials, inedible - Concluded - Matières travaillées, non comestibles - fin: | | | | | | | | | |
| | | | | | | | | | |
| Iron and steel - Fer et acier | 1,047.0 | 1,427.4 | 1,598.6 | 2,041.8 | 2,315.2 | 1,965.3 | 1,642.6 | 2,227.1 | + 35.6 |
| Ferro-alloys - Ferro-alliages | 27.4 | 37.7 | 33.1 | 45.4 | 71.5 | 39.0 | 39.3 | 36.7 | - 6.6 |
| Primary iron and steel - Fer et acier primaires | 141.1 | 173.6 | 111.2 | 234.7 | 398.1 | 188.8 | 257.4 | 206.9 | - 19.6 |
| Castings and forgings, steel - Moussages et pièces forgées en acier | 173.2 | 175.4 | 195.9 | 162.4 | 185.5 | 162.0 | 168.5 | 219.8 | + 30.4 |
| Bars and rods, steel - Barres et tiges en acier | 105.1 | 182.8 | 239.2 | 373.4 | 300.1 | 280.9 | 283.5 | 371.4 | + 31.0 |
| Plate, sheet and strip, steel - Tôles, feuilles et feuillard d'acier | 303.3 | 392.1 | 407.3 | 580.3 | 494.8 | 739.2 | 450.1 | 689.1 | + 53.1 |
| Railway track material - Matériel de voie ferree | 33.9 | 59.0 | 72.0 | 88.6 | 80.6 | 39.7 | 11.8 | 47.7 | + 304.2 |
| Other iron and steel and alloys - Autres fer, acier et alliages | 263.0 | 406.8 | 539.9 | 557.0 | 784.6 | 515.7 | 432.0 | 655.5 | + 51.7 |
| Non-ferrous metals - Métaux non-ferreux | 2,495.8 | 3,256.1 | 3,652.4 | 6,069.9 | 5,419.7 | 4,806.7 | 5,423.3 | 6,396.1 | + 17.9 |
| Aluminum, including alloys - Aluminium, y compris alliages | 769.6 | 1,141.5 | 918.0 | 1,533.2 | 1,466.9 | 1,428.4 | 1,744.2 | 1,900.0 | + 8.9 |
| Copper and alloys - Cuivre et alliages | 522.4 | 509.5 | 612.6 | 998.8 | 690.1 | 540.4 | 709.9 | 798.7 | + 12.5 |
| Lead, including alloys - Plomb, y compris alliages | 85.3 | 102.5 | 154.8 | 137.8 | 111.0 | 99.0 | 83.4 | 94.4 | + 13.2 |
| Nickel and alloys - Nickel et alliages | 436.9 | 564.9 | 576.3 | 818.6 | 694.5 | 506.2 | 496.6 | 563.8 | + 13.5 |
| Precious metals, including alloys - Métaux précieux, y compris alliages | 416.5 | 567.5 | 954.8 | 2,066.6 | 1,883.4 | 1,687.7 | 1,820.6 | 2,271.8 | + 24.8 |
| Zinc, including alloys - Zinc, y compris alliages | 228.3 | 317.4 | 362.1 | 428.5 | 485.3 | 465.9 | 502.6 | 677.5 | + 34.8 |
| Other non-ferrous metals and alloys - Autres métaux non-ferreux et alliages | 36.8 | 52.8 | 73.8 | 86.5 | 88.5 | 79.1 | 66.0 | 89.9 | + 36.2 |
| Metal fabricated basic products - Ouvrages de base en métal | 289.3 | 398.0 | 556.7 | 552.5 | 617.4 | 601.1 | 640.6 | 824.6 | + 28.7 |
| Abrasive basic products - Produits de base en abrasifs | 90.9 | 110.6 | 119.9 | 123.5 | 144.9 | 119.4 | 135.9 | 173.8 | + 27.9 |
| Other non-metallic mineral basic products - Autres produits minéraux non métalliques de base | 162.7 | 266.6 | 364.1 | 301.2 | 304.1 | 302.7 | 316.3 | 479.1 | + 51.5 |
| Electricity - Électricité | 377.0 | 478.9 | 729.2 | 773.0 | 1,122.6 | 1,119.6 | 1,228.4 | 1,378.7 | + 12.2 |
| Other fabricated materials, inedible - Autres matières travaillées, non comestibles | 56.5 | 78.2 | 101.2 | 120.7 | 159.0 | 154.8 | 175.4 | 227.8 | + 29.9 |
| End products, inedible - Produits finis, non comestibles | 15,231.2 | 18,855.3 | 20,923.8 | 21,850.5 | 25,473.3 | 28,690.8 | 33,285.0 | 44,990.0 | + 35.2 |
| Industrial machinery - Machinerie industrielle | 1,164.5 | 1,536.5 | 1,949.0 | 2,181.3 | 2,738.9 | 2,485.1 | 2,366.8 | 2,844.5 | + 20.2 |
| Engines and turbines, general purpose - Moteurs et turbines d'usage général | 54.0 | 97.0 | 142.5 | 114.5 | 185.1 | 170.7 | 135.1 | 222.9 | + 65.0 |
| Electric generators and motors - Génératerices et moteurs électriques | 36.0 | 46.8 | 84.8 | 88.7 | 88.9 | 83.0 | 72.9 | 103.8 | + 42.4 |
| Other general purpose industrial machinery - Autres machines industrielles d'usage général | 237.0 | 289.6 | 346.0 | 398.5 | 451.8 | 461.4 | 460.5 | 421.5 | - 8.5 |
| Materials handling machinery equipment - Machines et équipement de manutention | 171.3 | 233.8 | 277.5 | 281.6 | 318.4 | 266.7 | 400.1 | 484.0 | + 21.0 |
| Drilling, excavating, mining machinery - Excavatrices et foreuses pour mines | 181.4 | 207.8 | 228.4 | 318.1 | 762.0 | 567.1 | 450.7 | 490.1 | + 8.7 |
| Metal working machinery - Machine-outils, travail des métaux | 97.2 | 124.1 | 194.8 | 203.8 | 235.3 | 300.5 | 158.8 | 275.7 | + 73.6 |
| Wood working machinery and equipment - Machines et équipement à travailler le bois | 59.2 | 81.9 | 111.8 | 125.5 | 114.6 | 93.3 | 94.3 | 133.6 | + 41.7 |
| Construction machinery and equipment - Machines de construction et outillage | 84.7 | 116.4 | 159.4 | 131.5 | 131.1 | 140.4 | 131.8 | 140.6 | + 6.7 |
| Plastics industry machinery and equipment - Machines et outils pour industrie des matières plastiques | 87.0 | 108.7 | 123.0 | 130.3 | 154.4 | 153.3 | 203.3 | 263.4 | + 29.6 |
| Pulp and paper industries machinery - Machines pour industrie de pâte et papier | 48.2 | 84.2 | 119.2 | 213.2 | 94.8 | 91.6 | 68.3 | 75.3 | + 10.2 |
| Other special industry machinery - Machines pour autres industries spéciales | 108.5 | 146.2 | 161.6 | 175.6 | 202.5 | 157.1 | 191.0 | 233.6 | + 22.3 |
| Agricultural machinery and tractors - Machines et tracteurs agricoles | 558.8 | 605.4 | 847.8 | 876.0 | 884.6 | 651.0 | 550.9 | 655.2 | + 18.9 |
| Soil preparation, seeding, fertilizer machinery - Machines à préparer, engranger et amender le sol | 88.8 | 73.0 | 90.2 | 103.5 | 115.1 | 87.8 | 85.6 | 87.4 | + 2.1 |
| Combine reaper-threshers and parts - Moissonneuses-batteuses et pièces | 202.9 | 209.8 | 318.3 | 336.8 | 259.6 | 151.5 | 114.8 | 105.5 | - 8.1 |
| Other haying and harvesting machinery - Autres machines de faisançage et de récolte | 70.7 | 70.6 | 94.7 | 94.4 | 85.6 | 60.6 | 36.8 | 48.8 | + 32.6 |
| Other agricultural machinery and equipment - Autres machines et matériel agricoles | 82.0 | 95.2 | 162.6 | 155.9 | 179.4 | 147.3 | 160.4 | 203.3 | + 26.7 |
| Tractors - Tracteurs | 114.4 | 156.8 | 182.0 | 185.4 | 244.9 | 203.8 | 153.3 | 210.2 | + 37.1 |

TABLE 1-7. Domestic Exports, by Commodity Category, 1977-1984 - Concluded

TABLEAU 1-7. Exportations nationales, par catégorie de marchandises, 1977-1984 - fin

| Commodity category Catégorie de marchandises | 1977 | 1978 | 1979 | 1980 | 1981 | 1982 | 1983 | 1984 | Percentage change 1984/1983 Variation en pourcentage 1984/1983 |
|---|----------|----------|----------|----------|----------|----------|----------|----------|--|
| millions of dollars - millions de dollars | | | | | | | | | |
| Transportation and communication equipment - Matériel de transport et de communication | 11,742.9 | 14,371.2 | 14,651.5 | 14,397.7 | 17,221.7 | 20,869.9 | 25,266.2 | 34,871.3 | + 38.0 |
| Trucks, truck-tractors and chassis - Camions, tracteurs routiers et châssis | 2,136.8 | 2,725.5 | 2,734.4 | 2,445.1 | 2,926.6 | 3,937.6 | 4,218.3 | 5,382.7 | + 27.6 |
| Railway and street railway rolling stock - Matériel roulant de chemin de fer et de tramway | 50.2 | 111.2 | 417.5 | 404.8 | 247.7 | 403.7 | 172.1 | 218.1 | + 26.7 |
| Passenger automobiles and chassis - Voitures particulières et châssis | 4,474.2 | 5,078.9 | 4,322.2 | 4,686.9 | 5,500.0 | 7,357.8 | 9,613.2 | 13,889.6 | + 44.5 |
| Other motor vehicles - Autres véhicules moteurs | 194.2 | 257.0 | 363.7 | 325.8 | 483.1 | 370.6 | 267.2 | 374.0 | + 40.0 |
| Motor vehicle engines and parts - Moteurs des véhicules auto et pièces | 944.9 | 1,062.0 | 817.6 | 455.4 | 640.1 | 926.0 | 1,549.3 | 2,119.0 | + 36.8 |
| Motor vehicle parts, except engines - Pièces de véhicules auto sauf moteurs | 2,673.7 | 3,417.0 | 3,661.8 | 3,010.7 | 3,634.6 | 3,926.5 | 5,579.4 | 7,639.0 | + 36.9 |
| Ships, boats and parts - Navires, bateaux et pièces | 220.2 | 250.6 | 285.3 | 356.5 | 210.9 | 310.4 | 179.8 | 234.1 | + 30.2 |
| Aircraft complete with engines - Avions complets y compris moteur | 66.6 | 117.9 | 183.3 | 255.5 | 456.4 | 600.4 | 327.4 | 344.8 | + 5.3 |
| Aircraft engines and parts - Moteurs d'avions et leurs pièces | 226.1 | 308.5 | 409.7 | 489.0 | 707.6 | 502.9 | 486.8 | 646.4 | + 32.8 |
| Aircraft parts, except engines - Pièces d'avions sauf moteurs | 192.9 | 264.6 | 412.4 | 658.8 | 632.6 | 628.8 | 705.6 | 790.1 | + 12.0 |
| Other transportation equipment - Autre matériel de transport | 158.0 | 212.8 | 267.7 | 284.2 | 407.7 | 506.6 | 552.5 | 706.9 | + 27.9 |
| Television, radio sets and phonographs - Téléviseurs, radios et phonographes | 57.6 | 104.7 | 119.7 | 92.6 | 111.0 | 120.1 | 148.3 | 178.3 | + 20.2 |
| Other telecommunication and related equipment - Autre équipement et matériel de télécommunication | 347.4 | 460.4 | 656.0 | 932.2 | 1,263.4 | 1,278.5 | 1,466.2 | 2,348.2 | + 60.2 |
| Other equipment and tools - Autre matériel et outils | 932.8 | 1,257.6 | 1,746.7 | 1,975.5 | 2,307.3 | 2,465.6 | 2,761.3 | 3,436.0 | + 24.4 |
| Heating and refrigeration equipment - Appareils de chauffage et de réfrigération | 44.3 | 60.3 | 93.3 | 111.1 | 131.2 | 132.0 | 169.3 | 190.0 | + 12.2 |
| Cooking equipment for food - Appareils de cuisson alimentaire | 13.6 | 15.1 | 22.0 | 19.9 | 26.8 | 26.5 | 30.3 | 36.9 | + 21.8 |
| Electric lighting and distribution equipment - Matériel électrique d'éclairage et distribution | 126.1 | 170.3 | 241.3 | 256.8 | 277.4 | 280.3 | 262.0 | 375.5 | + 43.3 |
| Navigation equipment and parts - Matériel de navigation et pièces | 51.1 | 68.5 | 95.2 | 110.1 | 109.7 | 145.7 | 189.8 | 203.5 | + 7.2 |
| Other measuring, controlling, laboratory, medical and optical equipment - Autres instruments de mesure, de régulation, de laboratoire, de médecine et d'optique | 132.4 | 176.0 | 237.8 | 272.0 | 338.6 | 406.5 | 398.8 | 419.7 | + 5.2 |
| Hand tools and miscellaneous cutlery - Outils à main et coutellerie diverse | 38.8 | 47.7 | 59.0 | 65.3 | 56.2 | 45.5 | 48.7 | 58.6 | + 20.3 |
| Office machines and equipment - Machines et matériel de bureau | 346.7 | 475.1 | 641.6 | 739.0 | 873.5 | 927.8 | 1,068.1 | 1,377.1 | + 28.9 |
| Other equipment and tools - Autre matériel et outils | 179.9 | 244.5 | 356.5 | 401.3 | 493.8 | 501.2 | 594.1 | 774.5 | + 30.4 |
| Personal and household goods - Effets personnels et articles ménagers | 297.9 | 388.1 | 521.7 | 620.0 | 651.6 | 633.2 | 594.5 | 771.1 | + 29.7 |
| Apparel and apparel accessories - Vêtements et accessoires vestimentaires | 126.3 | 151.4 | 193.3 | 234.0 | 268.0 | 245.6 | 223.6 | 293.9 | + 31.4 |
| Footwear - Chaussures | 31.1 | 39.8 | 41.7 | 36.9 | 35.8 | 49.3 | 46.8 | 52.1 | + 11.3 |
| Toys, games, sporting, recreating equipment - Jouets, jeux et matériel de sport | 54.6 | 72.3 | 96.7 | 128.6 | 137.8 | 124.5 | 110.3 | 186.0 | + 68.6 |
| Other personal and household goods - Autres effets ménagers et personnels | 85.8 | 124.6 | 190.0 | 222.5 | 210.0 | 213.8 | 213.8 | 239.1 | + 11.8 |
| Miscellaneous end products - Produits finis divers | 534.3 | 696.4 | 1,207.2 | 1,799.9 | 1,669.3 | 1,585.8 | 1,745.4 | 2,412.0 | + 38.2 |
| Medicinal and pharmaceutical products - Médicaments et produits pharmaceutiques | 49.8 | 59.2 | 67.3 | 79.2 | 65.1 | 103.1 | 121.7 | 119.9 | - 1.5 |
| Medical, ophthalmic, orthopaedic supplies - Fournitures médicales, ophtalmiques et orthopédiques | 22.7 | 27.1 | 36.5 | 46.6 | 65.4 | 72.2 | 71.5 | 82.2 | + 15.0 |
| Printed matter - Imprimés | 90.2 | 123.1 | 145.1 | 197.4 | 207.5 | 236.5 | 298.9 | 385.6 | + 29.0 |
| Photographic goods - Articles photographiques | 62.1 | 101.7 | 137.5 | 196.7 | 206.3 | 193.5 | 292.4 | 330.9 | + 13.2 |
| Firearms, ammunition and ordnance - Armes à feu, munitions et artillerie | 13.1 | 27.5 | 20.7 | 26.4 | 49.6 | 40.5 | 68.1 | 293.6 | + 331.1 |

| Broad woven fabrics, cotton - Tissus de coton, larges | 136.2 | 147.1 | 165.1 | 153.3 | 159.7 | 116.0 | 137.6 | 170.2 | + 23.7 |
| Broad woven fabrics, synthetic - Tissus larges, fibres artificielles | 97.5 | 118.8 | 142.2 | 119.1 | 153.9 | 130.3 | 152.7 | 167.3 | + 9.6 |
| Broad woven fabrics, mixed fabrics - Tissus larges de fibres mélangées | 150.3 | 203.3 | 287.1 | 229.3 | 282.5 | 220.9 | 265.2 | 319.6 | + 20.5 |
| Other broad woven fabrics - Autres tissus larges | 17.4 | 21.1 | 33.2 | 39.0 | 32.3 | 29.4 | 40.1 | 44.8 | + 11.7 |
| Coated or impregnated fabrics - Tissus enduits ou imprégnés | 112.0 | 135.9 | 154.2 | 136.8 | 131.8 | 138.1 | 189.6 | 245.6 | + 29.5 |
| Other textile fabricated materials - Autres demi-produits en matières textiles | 144.0 | 165.7 | 212.1 | 221.2 | 239.3 | 209.7 | 244.3 | 284.3 | + 16.4 |
| Vegetable oils and fats, except essential oils - Huile, matière grasse végétale sauf les huiles essentielles | 82.4 | 95.3 | 104.1 | 82.2 | 73.5 | 64.4 | 78.0 | 119.6 | + 53.3 |
| Other oils, fats, waxes, extracts, derivatives - Autres huiles, matière grasse, cires, extraits, dérivés | 65.3 | 82.7 | 94.1 | 108.3 | 110.4 | 101.4 | 113.7 | 134.2 | + 18.0 |
| Inorganic chemicals - Produits chimiques inorganiques | 236.0 | 283.6 | 353.2 | 343.1 | 399.0 | 369.7 | 410.5 | 497.8 | + 21.3 |
| Organic chemicals - Produits chimiques organiques | 493.6 | 677.3 | 895.3 | 930.4 | 1,088.9 | 1,019.1 | 1,266.4 | 1,464.3 | + 15.6 |
| Fertilizers and fertilizer materials - Engrais et matières fertilisantes | 67.6 | 94.4 | 135.1 | 134.9 | 157.2 | 143.1 | 184.3 | 206.2 | + 11.9 |
| Synthetic and reclaimed rubber - Caoutchouc synthétique et régénéré | 82.0 | 93.9 | 118.9 | 126.3 | 158.6 | 138.8 | 161.7 | 207.1 | + 28.1 |
| Plastics materials, not shaped - Matières plastiques, non façonnées | 376.0 | 488.6 | 564.4 | 537.2 | 608.0 | 553.1 | 751.4 | 842.1 | + 12.1 |
| Plastic film and sheet - Pellicule et feuille en matière plastique | 124.8 | 152.3 | 181.7 | 192.2 | 242.5 | 208.3 | 268.5 | 331.0 | + 23.3 |
| Other plastics basic shapes and forms - Autres profils, formes de base en matières plastiques | 80.3 | 110.9 | 135.5 | 128.6 | 154.4 | 137.3 | 181.3 | 264.6 | + 45.9 |
| Dyestuffs, except dyeing extracts - Matières colorantes, sauf extraits tinctoriaux | 52.3 | 71.4 | 81.7 | 79.8 | 75.8 | 62.6 | 76.2 | 72.7 | - 4.6 |
| Pigments, lakes and toners - Pigments, laques et tonifiants | 34.2 | 49.0 | 62.1 | 53.5 | 64.9 | 51.9 | 81.1 | 99.9 | + 23.2 |
| Paints and related products - Peintures et produits connexes | 64.3 | 82.7 | 94.9 | 86.3 | 98.3 | 84.6 | 111.3 | 149.2 | + 34.1 |
| Other chemical products - Autres produits chimiques | 381.2 | 513.7 | 817.5 | 741.6 | 766.8 | 817.9 | 899.8 | 1,077.3 | + 19.7 |
| Fuel oil - Mazout | 115.9 | 114.3 | 140.1 | 314.8 | 337.1 | 314.7 | 409.8 | 962.3 | + 134.8 |
| Lubricating oils and greases - Huiles et graisses lubrifiantes | 56.9 | 64.6 | 70.4 | 71.9 | 72.3 | 56.1 | 62.3 | 81.3 | + 30.5 |
| Coke of petroleum and coal - Coke de pétrole et de charbon | 87.5 | 110.0 | 106.5 | 116.8 | 162.7 | 120.7 | 135.3 | 163.9 | + 21.1 |
| Other petroleum and coal products - Autres dérivés du pétrole et du charbon | 39.5 | 55.9 | 77.0 | 184.2 | 308.6 | 370.5 | 443.8 | 445.0 | + 0.3 |
| Bars and rods, steel - Barres et tiges en acier | 104.9 | 132.3 | 173.4 | 135.7 | 221.6 | 143.1 | 160.3 | 241.1 | + 50.4 |
| Plate, sheet and strip, steel - Tôles, feuilles, feuillards d'acier | 270.7 | 381.8 | 648.7 | 432.6 | 962.9 | 404.5 | 412.9 | 545.1 | + 32.0 |
| Structural shapes and sheet piling, steel - Profils de construction et palplanches | 70.9 | 60.2 | 125.1 | 102.8 | 179.4 | 67.8 | 77.4 | 108.3 | + 39.9 |
| Pipes and tubes, iron and steel - Tuyaux et tubes de fer et d'acier | 169.6 | 267.6 | 310.7 | 358.0 | 465.4 | 365.8 | 246.2 | 323.7 | + 31.5 |
| Wire and wire rope, steel - Fil, câble, cordage de fer et d'acier | 71.0 | 60.1 | 82.6 | 63.1 | 76.3 | 58.8 | 70.7 | 89.4 | + 26.4 |

TABLE 1-9. Imports, by Commodity Category, 1977-1984 - Continued

TABLEAU 1-9. Importations, par catégorie de marchandises, 1977-1984 - suite

| Commodity category Catégorie de marchandises | 1977 | 1978 | 1979 | 1980 | 1981 | 1982 | 1983 | 1984 | Percentage change 1984/1983 Variation en pourcentage 1984/1983 |
|---|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|--|
| millions of dollars - millions de dollars | | | | | | | | | |
| Fabricated materials, inedible - Concluded - Matières travaillées non comestibles - fin: | | | | | | | | | |
| Other iron and steel and alloys - Autres fer, acier et alliages | 182.8 | 198.6 | 328.2 | 322.6 | 369.7 | 197.7 | 206.3 | 334.1 | + 61.9 |
| Aluminum, including alloys - Aluminium, y compris alliages | 206.0 | 258.8 | 441.0 | 424.1 | 445.3 | 366.6 | 438.2 | 714.5 | + 63.1 |
| Copper and alloys - Cuivre et alliages | 88.6 | 101.7 | 156.1 | 131.9 | 193.7 | 139.3 | 176.1 | 192.4 | + 9.3 |
| Nickel and alloys - Nickel et alliages | 55.5 | 55.0 | 85.3 | 78.4 | 91.0 | 66.4 | 52.1 | 63.9 | + 22.6 |
| Precious metals, including alloys - Métaux précieux, y compris alliages | 58.9 | 244.8 | 1,063.0 | 1,738.7 | 1,242.1 | 878.4 | 1,227.3 | 1,111.4 | - 9.4 |
| Tin, including alloys - Étain, y compris alliages | 57.1 | 69.9 | 83.0 | 90.4 | 69.5 | 55.8 | 60.8 | 66.6 | + 9.5 |
| Other non-ferrous metals and alloys - Autres métaux non ferreux et alliages | 64.3 | 72.1 | 95.3 | 117.0 | 149.3 | 90.1 | 94.3 | 109.4 | + 16.0 |
| Bolts, nuts and screws - Boulons, écrous et vis | 153.0 | 177.1 | 203.5 | 190.8 | 208.3 | 179.6 | 198.6 | 287.7 | + 44.9 |
| Other basic hardware - Autre quincaillerie de base | 148.2 | 230.9 | 279.7 | 269.1 | 312.9 | 262.2 | 314.5 | 401.3 | + 27.6 |
| Chain - Chaines | 31.3 | 40.2 | 49.3 | 57.3 | 52.1 | 36.7 | 38.8 | 54.4 | + 40.2 |
| Valves | 130.2 | 154.2 | 165.0 | 209.8 | 241.3 | 237.7 | 171.0 | 220.5 | + 28.9 |
| Pipe fittings - Raccords de tuyauterie | 76.2 | 108.6 | 128.0 | 130.4 | 166.9 | 148.6 | 119.7 | 129.2 | + 7.9 |
| Other metal fabricated basic products - Autres ouvrages de base en métal | 196.2 | 191.7 | 242.0 | 255.8 | 287.1 | 299.0 | 328.1 | 344.5 | + 5.0 |
| Clay bricks, clay tiles and refractories - Briques, tuiles et matières réfractaires en argile | 116.3 | 124.8 | 176.9 | 210.7 | 214.4 | 152.0 | 180.3 | 236.7 | + 31.3 |
| Sheet and plate glass - Verre à vitres et à glaces | 54.3 | 61.6 | 59.2 | 52.6 | 50.5 | 38.7 | 44.2 | 42.4 | - 4.1 |
| Other glass basic products - Ouvrages de base en verre | 65.9 | 80.1 | 112.4 | 127.6 | 133.3 | 127.3 | 138.6 | 155.9 | + 12.5 |
| Abrasive basic products - Ouvrages de base en abrasif | 51.1 | 60.6 | 79.7 | 81.6 | 92.8 | 70.2 | 85.2 | 110.0 | + 29.1 |
| Natural and synthetic gem stones - Pierres fines naturelles et synthétiques | 84.1 | 95.5 | 101.0 | 109.2 | 129.0 | 113.8 | 151.7 | 153.3 | + 1.1 |
| Other non-metallic mineral basic products - Autres produits minéraux non-métalliques de base | 102.1 | 104.8 | 117.8 | 136.6 | 178.1 | 141.1 | 132.1 | 174.8 | + 32.3 |
| Electricity - Électricité | 14.7 | 1.8 | 0.7 | 2.6 | 5.9 | 5.3 | 2.5 | 12.9 | + 416.0 |
| Other fabricated materials, inedible - Autres matières travaillées, non comestibles | 179.7 | 195.5 | 238.7 | 243.1 | 265.5 | 231.4 | 266.6 | 333.3 | + 25.0 |
| End products, inedible - Produits finis, non comestibles | 26,321.4 | 31,303.7 | 38,073.5 | 39,656.3 | 46,464.0 | 41,419.0 | 48,369.1 | 63,196.0 | + 30.7 |
| Machinery - Machines et outillage | 4,849.7 | 5,796.0 | 7,805.7 | 8,843.8 | 9,682.2 | 7,344.9 | 6,805.7 | 8,382.4 | + 23.2 |
| Engines and turbines, diesel, general purpose - Moteurs et turbines diesel d'usage général | 86.1 | 119.0 | 141.4 | 150.4 | 157.9 | 98.3 | 101.3 | 126.1 | + 24.5 |
| Engines and turbines, general purpose, n.e.s. - Moteurs et turbines d'usage général, n.d.a. | 129.4 | 178.3 | 207.5 | 225.8 | 302.1 | 252.7 | 321.5 | 240.3 | - 25.3 |
| Electric generators and motors - Génératerices et moteurs électriques | 179.3 | 242.3 | 325.5 | 279.9 | 333.7 | 316.3 | 273.0 | 335.1 | + 22.7 |
| Bearings - Coussinets | 122.0 | 152.7 | 227.9 | 241.8 | 253.9 | 203.2 | 208.4 | 292.0 | + 40.1 |
| Other mechanical power transmission equipment - Autre matériel de transmission d'énergie mécanique | 103.8 | 149.6 | 201.2 | 231.0 | 257.2 | 217.4 | 187.8 | 255.6 | + 36.1 |
| Compressors, blowers and vacuum pumps - Compresseurs, souffleurs et pompes à vide | 109.3 | 126.7 | 147.3 | 176.4 | 189.2 | 175.6 | 121.1 | 150.2 | + 24.0 |
| Pumps, except oil well pumps - Pompe, sauf pour puits d'huile | 90.1 | 101.7 | 119.7 | 141.2 | 165.1 | 151.4 | 132.1 | 161.3 | + 22.1 |
| Packaging machinery - Machines à empaqueter ou à emballer | 70.5 | 82.6 | 101.2 | 104.4 | 116.5 | 108.4 | 119.9 | 178.9 | + 49.2 |
| Conveyors and conveying systems - Convoyeurs et ensembles convoyeurs | 33.6 | 39.7 | 47.3 | 68.2 | 76.9 | 70.5 | 66.4 | 74.7 | + 12.5 |
| Elevators and escalators - Ascenseurs et escaliers mécaniques | 12.1 | 15.1 | 13.2 | 15.7 | 19.9 | 21.8 | 22.0 | 30.4 | + 38.2 |

TABLE 1-9. Imports, by Commodity Category, 1977-1984 - Continued

TABLEAU 1-9. Importations, par catégorie de marchandises, 1977-1984 - suite

| Commodity category Catégorie de marchandises | 1977 | 1978 | 1979 | 1980 | 1981 | 1982 | 1983 | 1984 | Percentage change 1984/1983 Variation en pourcentage 1984/1983 |
|--|-------|-------|-------|-------|-------|-------|-------|-------|--|
| millions of dollars - millions de dollars | | | | | | | | | |
| | | | | | | | | | |
| Industrial trucks, tractors, trailers, stackers - Camions, tracteurs, remorques, empileurs industriels | 100.8 | 121.7 | 160.4 | 157.8 | 141.6 | 83.9 | 92.8 | 164.3 | + 77.0 |
| Other general purpose industrial machinery - Autres machines industrielles d'usage général | 202.5 | 220.6 | 256.6 | 329.7 | 388.6 | 322.8 | 307.6 | 311.7 | + 1.3 |
| Hoisting machinery - Appareils de levage | 106.2 | 108.1 | 165.2 | 170.2 | 211.4 | 152.6 | 87.7 | 104.8 | + 19.5 |
| Other materials handling machinery equipment - Autre matériel de manutention des matériaux | 85.1 | 117.6 | 135.6 | 128.8 | 104.1 | 69.8 | 126.4 | 185.7 | + 46.9 |
| Drilling machinery and drill bits - Machines de forage et fleurets de perforatrice | 212.2 | 301.7 | 475.1 | 643.1 | 552.2 | 483.3 | 347.7 | 346.9 | - 0.2 |
| Power shovels - Pelles mécaniques | 186.2 | 162.0 | 183.1 | 233.9 | 179.5 | 144.6 | 173.2 | 209.5 | + 21.0 |
| Bulldozing and similar equipment - Bulldozers et machines semblables | 23.1 | 28.4 | 33.9 | 46.1 | 60.4 | 43.0 | 31.7 | 40.7 | + 28.4 |
| Front end loaders - Chargeurs-niveleurs | 131.1 | 162.6 | 225.7 | 258.0 | 289.7 | 128.5 | 174.3 | 269.7 | + 54.7 |
| Other excavating machinery - Autres machines à creuser | 94.1 | 110.6 | 170.4 | 204.4 | 172.8 | 90.4 | 88.0 | 135.3 | + 53.8 |
| Mining, oil and gas machinery - Machines pour mines, pétrole et gaz | 160.7 | 188.2 | 233.0 | 284.5 | 312.0 | 240.4 | 204.7 | 254.7 | + 24.4 |
| Construction and maintenance machinery - Machines de construction et d'entretien | 153.6 | 183.4 | 227.4 | 242.9 | 227.3 | 149.3 | 146.1 | 185.0 | + 26.6 |
| Machine tools, metal working - Machines-outils, travail des métaux | 169.4 | 217.9 | 338.5 | 539.7 | 719.8 | 325.5 | 259.3 | 372.0 | + 43.5 |
| Welding apparatus and equipment - Appareils et outillage à souder | 46.5 | 52.6 | 67.1 | 80.7 | 93.5 | 70.0 | 91.9 | 81.1 | - 11.8 |
| Rolling mill machinery - Machines pour usines de laminage | 29.3 | 46.6 | 50.0 | 61.8 | 86.1 | 107.1 | 53.3 | 66.5 | + 24.8 |
| Other metal working machinery - Autres machines pour le travail des métaux | 146.7 | 159.1 | 224.0 | 288.2 | 301.9 | 256.6 | 237.2 | 294.4 | + 24.1 |
| Pulp and paper industries machinery - Machines pour industrie de la pâte et du papier | 80.7 | 85.1 | 120.1 | 162.5 | 244.4 | 197.7 | 140.2 | 190.4 | + 35.8 |
| Printing presses - Presse à imprimer | 56.5 | 61.3 | 111.4 | 122.0 | 148.5 | 94.0 | 114.8 | 186.9 | + 62.8 |
| Other printing machinery and equipment - Autres machines et appareils d'imprimerie | 80.3 | 91.0 | 113.2 | 128.4 | 147.0 | 106.6 | 107.1 | 151.4 | + 41.4 |
| Spinning, weaving and knitting machinery - Ma- chines pour filer, tisser et tricoter | 35.4 | 47.4 | 62.4 | 78.4 | 82.0 | 73.1 | 70.6 | 81.6 | + 15.6 |
| Other textile industries machinery - Autres ma- chines pour les industries textiles | 55.5 | 72.7 | 101.7 | 104.3 | 103.5 | 79.5 | 96.5 | 115.6 | + 19.8 |
| Food, beverages and tobacco machinery - Machines pour les industries d'aliments, boissons, tabacs | 84.5 | 120.8 | 139.7 | 156.8 | 159.8 | 149.3 | 157.7 | 187.9 | + 19.2 |
| Plastics and chemical industry machinery - Machines pour industrie des matières plastiques et chimiques | 92.9 | 111.6 | 147.2 | 188.4 | 171.5 | 198.2 | 182.8 | 230.2 | + 25.9 |
| Other special industry machinery - Autres machines pour industries spéciales | 242.8 | 309.3 | 416.7 | 506.3 | 526.7 | 474.6 | 446.7 | 602.7 | + 34.9 |
| Soil preparation, seeding, fertilizing machinery - Machines à préparer, ensemencer et amender le sol | 121.1 | 118.1 | 179.9 | 154.8 | 176.2 | 125.0 | 101.4 | 133.9 | + 32.1 |
| Combine reaper-threshers - Moissonneuses-batteuses | 129.2 | 181.9 | 245.0 | 271.6 | 323.5 | 287.3 | 205.4 | 238.4 | + 16.1 |
| Other haying and harvesting machinery - Autres machines de fenaison et de récolte | 118.9 | 113.1 | 145.3 | 180.0 | 193.9 | 127.5 | 110.2 | 146.6 | + 33.0 |
| Other agricultural machinery and equipment - Autres machines et matériel agricoles | 162.0 | 186.2 | 268.1 | 282.2 | 312.5 | 228.0 | 210.0 | 225.5 | + 7.4 |
| Wheel tractors, new - Tracteurs à roues, neufs | 425.0 | 441.7 | 655.3 | 619.1 | 854.7 | 582.7 | 550.7 | 581.3 | + 5.6 |
| Track-laying tractors and used tractors - Tracteurs à chaînes et tracteurs usagés | 124.1 | 177.1 | 229.4 | 220.3 | 159.0 | 61.1 | 72.3 | 82.1 | + 13.6 |
| Tractor engines and tractor parts - Moteurs de tracteurs et pièces de tracteurs | 254.5 | 289.8 | 391.9 | 364.0 | 365.8 | 276.5 | 264.1 | 361.0 | + 36.7 |

TABLE 1-30. Industry Selling Price Index, by Major Groups and Industries, 1980-1984 - Continued

(1971 = 100)

TABLEAU 1-30. Indice des prix de vente, par groupes principaux et industries, 1980-1984 - suite

(1971 = 100)

| | 1980 | 1981 | 1982 | 1983 | 1984 | Percentage change 1984/1983 |
|--|--------------|--------------|--------------|--------------|--------------|------------------------------------|
| | | | | | | Variation en pourcentage 1984/1983 |
| Textile industries - Industrie textile | 203.9 | 228.1 | 236.3 | 240.3 | 249.2 | + 3.7 |
| Cotton yarn and cloth mills - Filature et tissage du coton | 256.9 | 287.3 | 287.3 | 294.8 | 306.6 | + 4.0 |
| Wool yarn and cloth mills - Fabriques de filés et de tissus de laine | 223.7 | 250.8 | 264.8 | 265.3 | 273.7 | + 3.2 |
| Throwsters, spun yarns and cloth - Tordeurs, filés fabriques et tissus | 161.8 | 178.8 | 188.4 | 191.6 | 196.6 | + 2.6 |
| Carpet, mat and rug industry - Industrie des tapis, des carpettes et de la moquette | 154.2 | 184.0 | 190.3 | 195.7 | 201.3 | + 2.9 |
| Thread mills - Fabricants de fils | 236.7 | 264.3 | 299.5 | 308.1 | 316.3 | + 2.7 |
| Knitting mills - Bonneterie | 167.2 | 181.3 | 191.2 | 196.5 | 200.7 | + 2.1 |
| Hosiery mills - Industrie des bas et chaussettes | 149.8 | 159.9 | 173.6 | 182.3 | 184.8 | + 1.4 |
| Knitted fabrics - Tricots | 146.5 | 155.8 | 157.9 | 156.7 | 162.1 | + 3.4 |
| Other knitting mills - Autres bonnetteries | 194.9 | 215.2 | 230.1 | 239.0 | 243.2 | + 1.8 |
| Clothing industries - Industries du vêtement | x | x | x | x | x | ... |
| Men's clothing factories - Confection de vêtements pour hommes | 219.1 | 238.4 | 255.7 | 265.4 | 272.1 | + 2.5 |
| Foundation garment industry - Industrie des corsets et soutiens-gorge | 188.2 | 204.2 | 220.3 | 238.5 | 260.8 | + 9.4 |
| Wood industries - Industrie du bois | 244.6 | 245.4 | 238.6 | 264.8 | 260.3 | - 1.7 |
| Shingle mills - Usine de bardeaux | 300.3 | 300.6 | 290.1 | 342.2 | 355.4 | + 3.9 |
| Sawmills and planing mills - Scieries et ateliers de rabotage | 243.3 | 229.8 | 220.2 | 252.2 | 241.8 | - 4.1 |
| Veneer and plywood mills - Fabriques de placages et de contre-plaqué | 237.9 | 266.4 | 239.5 | 256.3 | 248.0 | - 3.2 |
| Sash and door and other millwork plants - Fabrication de portes, châssis et autres bois ouvrés | 246.9 | 269.0 | 284.4 | 299.9 | 313.9 | + 4.7 |
| Hardwood flooring plants - Fabrication de parquets en bois dur | 297.7 | 315.4 | 324.2 | 365.2 | 408.8 | + 11.9 |
| Manufacturers of pre-fabricated buildings - Pré-fabrication de bâtiments | 255.7 | 279.8 | 293.0 | 302.1 | 309.0 | + 2.3 |
| Wooden box factories - Fabriques de boîtes en bois | 235.6 | 248.3 | 265.7 | 279.6 | 293.0 | + 4.8 |
| Coffin and casket industry - Industrie des cercueils | 209.6 | 227.9 | 245.3 | 259.0 | 273.6 | + 5.6 |
| Furniture and fixture industries - Industries du meuble et des articles d'ameublement | 233.9 | 258.6 | 282.2 | 294.2 | 309.0 | + 5.0 |
| Household furniture manufacturers - Industrie des meubles de maison | 232.3 | 258.7 | 281.8 | 290.2 | 301.7 | + 4.0 |
| Office furniture manufacturers - Industrie des meubles de bureau | 210.9 | 234.9 | 259.2 | 268.5 | 285.2 | + 6.2 |
| Miscellaneous furniture and fixtures manufacturers - Industrie des articles d'ameublement divers | 244.2 | 266.5 | 290.9 | 308.9 | 327.9 | + 6.2 |
| Paper and allied industries - Industrie du papier et activités annexes | 277.2 | 306.1 | 317.3 | 307.3 | 340.3 | + 10.7 |
| Pulp and paper mills - Usines de pâtes et papiers | 300.1 | 329.5 | 336.1 | 317.5 | 358.9 | + 13.0 |
| Asphalt roofing manufacturers - Fabricants de papier de couverture asphalté | 302.2 | 347.6 | 368.4 | 388.0 | 387.7 | - 0.1 |
| Folding carton and set-up box manufacturers - Fabricants de boîtes pliantes ou rigides | 210.6 | 235.5 | 252.7 | 258.2 | 263.4 | + 2.0 |
| Corrugated box manufacturers - Fabricants de boîtes ondulées | 212.5 | 247.3 | 278.1 | 295.3 | 318.4 | + 7.8 |
| Paper and plastic bag manufacturers - Fabricants de sac en papier et en plastique | 226.0 | 247.4 | 263.1 | 269.9 | 281.8 | + 4.4 |
| Miscellaneous paper converters - Transformations diverses du papier | 227.4 | 252.7 | 272.7 | 279.8 | 294.2 | + 5.1 |

(1971 = 100)

TABLEAU 1-30. Indice des prix de vente, par groupes principaux et industries, 1980-1984 - suite

(1971 = 100)

| | 1980 | 1981 | 1982 | 1983 | 1984 | Percentage change 1984/1983 Variation en pourcentage 1984-1983 |
|---|--------------|--------------|--------------|--------------|--------------|---|
| Primary metal industries - Première transformation des métaux | 308.3 | 312.6 | 310.7 | 320.6 | 324.2 | + 1.1 |
| Iron and steel mills - Sidérurgie | 261.7 | 290.3 | 314.2 | 319.2 | 326.1 | + 2.2 |
| Steel pipe and tube mills - Fabriques de tubes et tuyaux d'acier | 276.9 | 322.1 | 362.6 | 359.7 | 363.7 | + 1.1 |
| Iron foundries - Fonderies de fer | 243.2 | 261.8 | 268.9 | 272.4 | 273.6 | + 0.4 |
| Smelting and refining - Fonte et affinage | 387.8 | 365.5 | 327.9 | 347.6 | 342.4 | - 1.5 |
| Aluminum rolling, casting and extruding - Laminage, moulage et extrusion de l'aluminium | 271.0 | 292.6 | 290.7 | 291.7 | 335.1 | + 14.9 |
| Copper and copper alloy, rolling, casting and extruding - Laminage, moulage et extrusion du cuivre et de ses alliages | 219.7 | 205.8 | 193.0 | 206.3 | 192.7 | - 6.6 |
| Metal rolling, casting and extruding, n.e.s. - Laminage, moulage et extrusion des métaux, n.c.a. | 327.3 | 325.7 | 314.0 | 324.3 | 345.8 | + 6.6 |
| Metal fabricating industries (excl. machinery and transportation equip.) - Fabrication de produits en métal (sauf machines et équipement de transport) | 232.7 | 256.0 | 277.8 | 283.9 | 295.6 | + 4.1 |
| Boiler and plate works - Industrie des chaudières et des plaques | 289.4 | 318.2 | 359.6 | 336.0 | 344.3 | + 2.5 |
| Metal stamping and pressing Industry - Industrie de l'emballage et du matricage des métaux | 229.5 | 253.6 | 277.8 | 287.5 | 296.9 | + 3.3 |
| Wire and wire products manufacturers - Industrie du fil métallique et de ses produits | 226.9 | 242.4 | 249.6 | 252.7 | 265.9 | + 5.2 |
| Hardware, tool and cutlery manufacturers - Fabricants de quincaillerie, d'outillage et de coutellerie | 238.4 | 268.2 | 296.0 | 308.3 | 326.2 | + 5.8 |
| Heating equipment manufacturers - Fabricants d'appareils de chauffage | 213.2 | 236.5 | 267.7 | 280.4 | 291.0 | + 3.8 |
| Machinery industries (except electrical) - Fabrication de machines (sauf électriques) | 207.9 | 233.1 | 254.6 | 263.3 | 269.6 | + 2.4 |
| Agricultural implement industry - Fabricants d'instruments aratoires | 224.9 | 260.2 | 293.1 | 310.9 | 319.9 | + 2.9 |
| Miscellaneous machinery and equipment manufacturers - Fabricants de machines et d'équipement divers | 224.5 | 253.2 | 276.4 | 284.9 | 290.7 | + 2.0 |
| Commercial refrigeration and air-conditioning equipment - Fabricants d'équipement commercial de réfrigération et de climatisation | 170.7 | 186.6 | 200.0 | 210.4 | 220.7 | + 4.9 |
| Transportation equipment industries - Fabrication de matériel de transport | x | x | x | x | x | ... |
| Motor vehicle manufacturers - Fabricants de véhicules automobiles | 180.6 | 202.6 | 211.4 | 219.7 | 227.1 | + 3.4 |
| Motor vehicle parts and accessories manufacturers - Fabricants de pièces et accessoires d'automobiles | 208.7 | 228.9 | 252.3 | 257.8 | 268.5 | + 4.2 |
| Electrical products industries - Fabrication de produits électriques | 189.5 | 203.7 | 217.1 | 224.3 | 231.7 | + 3.3 |
| Manufacturers of small electrical appliances - Fabricants de petits appareils électriques | 154.0 | 167.5 | 183.0 | 188.1 | 192.6 | + 2.4 |
| Manufacturers of major appliances (electrical and non-electrical) - Fabricants de gros appareils (électriques ou non) | 182.7 | 205.2 | 226.7 | 241.4 | 248.9 | + 3.1 |
| Manufacturers of lighting fixtures - Fabricants d'appareils d'éclairage | 239.7 | 275.4 | 298.6 | 322.4 | 336.1 | + 4.2 |
| Manufacturers of household radio and television receivers - Fabricants de radiorecepteurs et de téléviseurs ménagers | 122.3 | 128.5 | 128.6 | 127.1 | 120.1 | - 5.5 |
| Manufacturers of electrical industrial equipment - Fabricants d'équipement électrique industriel | 211.7 | 232.0 | 255.7 | 262.0 | 274.3 | + 4.7 |
| Manufacturers of electric wire and cable - Fabricants de fils et de câbles électriques | 234.7 | 239.7 | 251.0 | 257.6 | 266.3 | + 3.4 |
| Battery manufacturers - Fabricants de piles | 254.9 | 267.1 | 277.9 | 282.2 | 286.9 | + 1.7 |
| Manufacturers of miscellaneous electrical products, n.e.s. - Fabricants de produits électriques divers, n.c.a. | 210.2 | 233.2 | 250.6 | 266.6 | 278.7 | + 4.5 |

TABLE 1-30. Industry Selling Price Index, by Major Groups and Industries, 1980-1984 - Concluded

(1971 = 100)

TABLEAU 1-30. Indice des prix de vente, par groupes principaux et industries, 1980-1984 - fin

(1971 = 100)

| | 1980 | 1981 | 1982 | 1983 | 1984 | Percentage change 1984/1983 |
|---|-------|-------|-------|-------|-------|------------------------------------|
| | | | | | | Variation en pourcentage 1984/1983 |
| Non-metallic mineral products industries - Fabrication de produits minéraux non métalliques | 235.0 | 270.7 | 305.3 | 319.2 | 327.7 | + 2.7 |
| Clay products manufacturers (domestic clays) - Fabricants de produits en argile (de provenance canadienne) | 226.9 | 243.0 | 269.9 | 287.8 | 318.1 | + 10.5 |
| Clay products manufacturers (from imported clays) - Fabricants de produits en argile (argile importée) | 215.2 | 251.9 | 278.0 | 290.6 | 300.7 | + 3.5 |
| Cement manufacturers - Fabricants de ciment | 265.7 | 308.0 | 359.7 | 374.2 | 385.1 | + 2.9 |
| Concrete pipe manufacturers - Fabricants de tuyaux en béton | 248.1 | 282.6 | 314.1 | 336.0 | 360.6 | + 7.3 |
| Concrete products manufacturers - Fabricants de produits en béton | 222.5 | 259.4 | 296.7 | 310.6 | 320.7 | + 3.3 |
| Ready-mix concrete manufacturers - Fabricants de béton préparé | 242.6 | 279.7 | 323.6 | 335.2 | 325.2 | - 3.0 |
| Glass and glass products manufacturers - Fabricants de verre et d'articles en verre | 197.0 | 223.2 | 250.2 | 259.7 | 268.1 | + 3.2 |
| Abrasives manufacturers - Fabricants d'abrasifs | 290.6 | 325.1 | 361.8 | 371.0 | 372.7 | + 0.5 |
| Lime manufacturers - Fabricants de chaux | 338.3 | 396.1 | 453.2 | 514.4 | 557.0 | + 8.3 |
| Refractories manufacturers - Fabricants de produits réfractaires | 288.6 | 341.1 | 391.0 | 403.9 | 416.3 | + 3.1 |
| Petroleum and coal products industries - Fabrication de produits du pétrole et du charbon | 404.6 | 551.7 | 634.4 | 674.8 | 703.9 | + 4.3 |
| Petroleum refineries - Raffineries de pétrole | 410.6 | 559.8 | 643.7 | 684.7 | 714.2 | + 4.3 |
| Chemical and chemical products industries - Industries chimiques | 251.6 | 286.4 | 306.9 | 316.6 | 327.7 | + 3.5 |
| Manufacturers of plastics and synthetic resins - Fabricants de matières plastiques et de résines synthétiques | 274.4 | 294.6 | 297.7 | 314.3 | 328.7 | + 4.6 |
| Manufacturers of pharmaceuticals and medicines - Fabricants de produits pharmaceutiques et de médicaments | 169.5 | 189.8 | 211.9 | 233.6 | 250.2 | + 7.1 |
| Paint and varnish manufacturers - Fabricants de peintures et vernis | 239.8 | 283.0 | 300.0 | 304.3 | 303.3 | - 0.3 |
| Manufacturers of soap and cleaning compounds - Fabricants de savon et de produits de nettoyage | 189.1 | 209.9 | 225.5 | 232.9 | 241.0 | + 3.5 |
| Manufacturers of toilet preparations - Fabricants de produits de toilette | 190.0 | 204.8 | 230.2 | 247.6 | 279.5 | + 12.9 |
| Manufacturers of pigments and dry colours - Fabricants de pigments et de couleurs sèches | 260.0 | 304.3 | 332.9 | 326.0 | 355.5 | + 9.0 |
| Manufacturers of industrial chemicals (inorganic) - Fabricants de produits chimiques industriels (inorganiques) | 275.3 | 313.9 | 337.5 | 341.6 | 360.1 | + 5.4 |
| Manufacturers of industrial chemicals (organic) - Fabricants de produits chimiques industriels (organiques) | 354.7 | 410.3 | 429.7 | 439.2 | 443.7 | + 1.0 |
| Manufacturers of printing inks - Fabricants d'encre d'imprimerie | 181.9 | 195.9 | 208.6 | 209.5 | 202.4 | - 3.4 |
| Miscellaneous manufacturing industries - Industries manufacturières diverses | x | x | x | x | x | ... |
| Clock and watch manufacturers - Fabricants de montres et d'horloges | 236.2 | 250.1 | 259.9 | 257.3 | 251.2 | - 2.4 |
| Jewellery and silverware industry - Fabrication de bijouterie et d'orfèvrerie | 871.3 | 676.1 | 609.5 | 699.1 | 645.6 | - 7.7 |
| Floor tile, linoleum and coated fabrics manufacturers - Fabricants de carreaux, de plancher linoléum et de tissus enduits | 189.8 | 202.7 | 220.2 | 225.2 | 231.0 | + 2.6 |
| Pen and pencil manufacturers - Fabricants de stylos et de crayons | 210.8 | 234.6 | 257.1 | 270.1 | 277.8 | + 2.9 |
| Typewriter supplies - Fabricants de fournitures pour la dactylographie | 227.1 | 234.0 | 250.8 | 245.4 | 251.9 | + 2.6 |

NOTES

Section 1

Table 1-1

Gross Domestic Product represents the value of production arising within the geographical boundaries of Canada irrespective of whether the factors of production involved are resident or non-resident.

Gross Domestic Product at Factor Cost consists of GDP at market prices, less net indirect taxes, less residual error of estimate.

Table 1-2

The Index of Industrial Production attempts to measure the physical amount of "work done" or "value added" which is gross selling value of production (excluding indirect taxes) less value of materials and fuel and electricity consumed in the production process. For a detailed description of the concepts, sources and methods, please refer to *Revised Index of Industrial Production 1935-1957 Catalogue 61-502, Occasional; Indexes of Real Domestic Product by Industry of Origin, 1935-1961, Catalogue 61-505, Occasional; Indexes of Real Domestic Product by Industry (1961 base), Catalogue 61-506, Occasional; Indexes of Real Domestic Product by Industry 1961-1969 Catalogue 61-510E, Occasional; Gross Domestic Product by Industry 1983 Catalogue 61-213, Annual; Real Domestic Product by Industry 1961-1971 Catalogue 61-516, Occasional.*

Table 1-3

The Statistics in the table are taken from publications released by the Economics Accounts Branch, Statistics Canada. For an explanation of the System of National Accounts and its components, please refer to *National Accounts Income and Expenditure, Catalogue 13-549E*.

Table 1-4

For "Note", please refer to "Note", Table 1-3.

Table 1-5

The conceptual and structural framework of the provincial accounts closely follows that of the National Accounts. The provincial accounts at this stage are, however, necessarily less comprehensive than the national accounts, and there are a few important differences between the two. The provincial accounts have been estimated on a "domestic" basis, which allocates income according to the geographical area in which it is earned. The "national" basis, in contrast, assigns income according to the residence of the owners of the factors of production. It has not proved feasible to produce provincial accounts disaggregated by sector and type of transaction to the same extent as are the National Accounts.

NOTES

Section 1

Tableau 1-1

Produit intérieur brut représente la valeur des biens et services produits à l'intérieur des frontières géographiques du Canada, que les facteurs de production soient résidents ou non.

Produit intérieur brut au coût des facteurs se compose du PIB au prix du marché, moins impôts indirects nets, moins erreur résiduelle d'estimation.

Tableau 1-2

L'indice de la production industrielle mesure le total matériel de la "production" ou de la "valeur ajoutée" qui est la valeur brute de vente des matériaux, du combustible et de l'électricité utilisés au cours du processus de la production. Pour une description détaillée des concepts des sources et des méthodes, prière de consulter *Revised Index of Industrial Production, 1935-1957, n° 61-502* du catalogue, hors série; *Indexes of Real Domestic Product by Industry of Origin, 1935-1961, n° 61-505* du catalogue, hors série; *Index of Real Domestic Product by Industry (1961 base), n° 61-506* du catalogue, hors série; *Indices de produit intérieur réel, par industrie 1961-1969, n° 61-510F* du catalogue, hors série; *Produit intérieur brut par industrie, 1983, n° 61-213* du catalogue, annuel; *Produit intérieur réel par industrie, 1961-1971, n° 61-516* du catalogue, hors série.

Tableau 1-3

Les statistiques présentées dans ce tableau sont tirées des publications de la Direction des Comptes économiques de Statistique Canada. Pour une explication du Système de comptabilité nationale et de ses éléments, veuillez consulter la publication *Comptes nationaux des revenus et des dépenses n° 13-549F* du catalogue.

Tableau 1-4

Voir "Note" du tableau 1-3.

Tableau 1-5

Le cadre conceptuel et structurel des comptes provinciaux ressemble beaucoup à celui des comptes nationaux. Les comptes provinciaux s'en distinguent toutefois par quelques différences importantes et par une perspective nécessairement moins vaste. Les estimations des comptes provinciaux sont faites au niveau "intérieur", c'est-à-dire que les revenus sont comptabilisés dans la région où ils ont été gagnés. Dans la comptabilité "nationale" au contraire, on répartit les revenus selon le lieu géographique de résidence du propriétaire des facteurs de production. On n'a pas réussi à ventiler les comptes provinciaux en secteurs et en genres d'opérations d'une façon aussi détaillée que les Comptes nationaux.

Notes - Continued

Section 1 - Continued

For additional information on concepts and methods of tabulating economic transactions at the provincial level, please see publication 13-213 (Annual), Provincial Economic Accounts, Experimental Data, 1968-1983.

Table 1-6

For "Note", please refer to "Note", Table 1-5.

Table 1-7

Export documents collected by Canada Customs are the basic source of export statistics, except for data on electricity, crude petroleum and natural gas exported by pipeline. Statistics on trade in electricity, crude petroleum and natural gas, cannot for administrative reasons, be obtained from Customs documents. Electricity exports are reported by the exporting firms through the National Energy Board; crude petroleum and natural gas exported by pipeline are reported by companies directly to Statistics Canada.

Exports are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g., mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

Commodities are classified to the *Export Commodity Classification* (XCC), which is based on the "Standard Commodity Classification" (Catalogue 12-502E, Statistics Canada). Full descriptions of each commodity code in the XCC are provided in the *Trade of Canada Commodity Classification* (Catalogue 12-520E, Statistics Canada).

Table 1-8

Pour obtenir des informations additionnelles sur les concepts et les méthodes de mises en tableaux des transactions économiques au niveau provincial, voir la publication no 13-213 (annuel), Comptes économiques provinciaux, données au stade expérimental, 1968-1983.

Tableau 1-6

Voir "Note" du tableau 1-5.

Tableau 1-7

Les documents d'exportation recueillis par les Douanes canadiennes, sauf dans le cas des données sur l'électricité, le pétrole brut et le gaz naturel exportés par oléoduc, constituent la base principale de la statistique des exportations. Des statistiques sur le commerce de l'énergie électrique, de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Les rapports sur les exportations d'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national d'énergie, tandis que les compagnies exportatrices de pétrole brut et de gaz naturel par oléoduc fournissent directement leurs rapports à Statistique Canada.

Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les marchandises sont classées dans la *Classification des marchandises d'exportation* (CME) qui se fonde sur la "Classification type des marchandises" (n° 12-502F du catalogue de Statistique Canada). Une description complète du contenu de chaque code de marchandises dans cette classification (CME) se trouve dans la *Classification des marchandises pour le commerce du Canada* (n° 12-520F du catalogue de Statistique Canada).

Tableau 1-8

La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes canadiennes, sauf dans le cas des données sur l'électricité, le pétrole brut

Notes - Continued

Section 1 - Continued

pipeline. Electricity exports are reported by exporting firms through the National Energy Board; crude petroleum and natural gas exported by pipeline are reported by companies directly to Statistics Canada. Export statistics coverage consists of Domestic Exports (goods wholly produced in Canada and goods previously included in import statistics which have since been changed in form by further processing and then exported); and Re-Exports (include only goods previously included in import statistics which are exported from Canada in the same form as when imported).

Exports are classified to the country to which they are consigned at the time the goods leave Canada, i.e., to the furthest known destination. Exports are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transaction, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export.

Table 1-9

Import documents collected by Canada Customs are the basic source of import statistics, except for data on imports of electricity, which are reported by the importing firms directly to Statistics Canada.

Imports are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values). Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

Import statistics include all goods which are cleared by Customs on arrival in Canada, together with goods which are entered into customs warehouses.

Importers, when reporting to Revenue Canada, Customs and Excise, classify commodities according to the

Section 1 - suite

et le gaz naturel exportés par oléoduc. Les rapports sur les exportations d'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national d'énergie, tandis que les compagnies exportatrices de pétrole brut et de gaz naturel par oléoduc fournissent directement leurs rapports à Statistique Canada. La couverture des statistiques d'exportations comprend les exportations nationales (marchandises entièrement produites ou fabriquées au Canada de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau puis exportées); et les réexportations (n'incluant que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation).

Les exportations sont attribuées au pays vers lequel les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue. Les exportations sont présentées selon les valeurs déclarées dans les documents d'exportations; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation.

Tableau 1-9

La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes du Canada, sauf dans le cas des importations d'électricité, qui sont déclarées directement à Statistique Canada par les compagnies importatrices.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane). Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de "livraison" et leur prix englobe par conséquent les frais de transport.

La statistique des importations comprend toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane.

Dans leurs déclarations à Revenu Canada, Douanes et Accise, les importateurs classent les marchandises d'après la *Nomen-*

Canadian International Trade Classification (Catalogue 65-502E, Statistics Canada). For publication purposes, in accordance with the confidentiality restrictions of the Statistics Act, a condensed classification is used. (See *Trade of Canada Commodity Classification*, Catalogue 12-520E.) These classifications are based on the *Standard Commodity Classification* (Catalogue 12-502E, Statistics Canada).

Table 1-10

Import documents collected by Canada Customs are the basic source of import statistics, except for data on imports of electricity, which are reported by the importing firms directly to Statistics Canada. Import statistics include all goods which are cleared by Customs on arrival in Canada, together with goods which are entered into customs warehouses. The following commodity movements "are excluded" from import statistics (being however recorded separately as Special Transactions): settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign representatives in Canada or brought back by Canadians returning from postings abroad; temporary imports for exhibition or competition, including films. Bunker supplies and ships' stores purchased by Canadian vessels or aircrafts abroad; temporary imports and goods merely moving in transit through Canadian territory are not reflected in any of the statistics.

Imports are classified to the country from which goods are consigned to Canada, except for goods originating in Central or South America but consigned to Canada from the United States. These goods are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

Imports are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms.

Table 1-11

Export and import trade data are shown on a balance of payments basis (trade of Canada figures with certain valuation, coverage and timing adjustments). For further information see, *The Canadian Balance of International Payments, 1978*, Catalogue 67-201, annual.

Section 1 - suite

clature canadienne pour le commerce international (n° 65-502F du catalogue de Statistique Canada). Dans nos publications, conformément aux restrictions de confidentialité énoncées dans la Loi sur la statistique, on utilise une version abrégée. (Voir *Classification des marchandises pour le commerce du Canada*, n° 12-520F du catalogue de Statistique Canada.) Ces classifications se fondent sur la *Classification type des produits* (n° 12-502F du catalogue de Statistique Canada).

Tableau 1-10

La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes du Canada, sauf dans le cas des importations d'électricité, qui sont déclarées directement à Statistique Canada par les compagnies importatrices. La statistique des importations comprend toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane. Les mouvements de marchandises suivants "sont exclus" de la statistique des importations (ils sont toutefois classés séparément comme Transactions spéciales): les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par des diplomates étrangers au Canada ou rapportées par les Canadiens rentrant de leur service à l'étranger; les importations provisoires pour des expositions ou des concours, y compris les films. Les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions canadiens, les importations provisoires et les marchandises ne faisant que passer par le territoire canadien, ne figurent dans aucune statistique.

Les importations sont attribuées au pays d'où elles ont été consignées à destination du Canada, sauf en ce qui concerne les marchandises provenant de l'Amérique centrale ou de l'Amérique du Sud qui sont expédiées au Canada par les États-Unis; ces marchandises sont attribuées au pays d'origine, sauf pour les échanges du pétrole brut avec les États-Unis qui sont crédités à ce pays.

Les importations sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs douanières sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées.

Tableau 1-11

Les données sur le commerce des exportations et importations sont indiquées sur la base de la balance des paiements (les chiffres sur le commerce du Canada comportant certains ajustements de valeur, de portée et de période). Pour de plus amples informations voir, *La balance canadienne des paiements internationaux, 1978*, n° 67-201 du catalogue, annuel.

Section 1 - Continued

Table 1-12

Travel payments. Expenditures abroad by Canadian resident travellers, aircrews and commercial truck crews for all expenses incidental to travel including purchases of goods to be imported for personal use by travellers. Among these would be international fare payments to non-resident carriers and expenditures abroad for lodging, food, entertainment, local transportation, gifts and all other purchases of personal goods and services.

Table 1-13

Canadian direct investment abroad is a measure of the stock of long-term capital, at a point in time, in the equity and debt of foreign subsidiaries, affiliates and branches owned by Canadian investors.

Table 1-14

The measures of productivity presented in this table relate output to a single input, labour time. It must be emphasized, however, that changes in output per unit of labour input cannot be attributed directly and solely to labour. These measures reflect not only changes in the skill and effort of the labour force, but also the contribution of other productive resources and the effectiveness with which all are combined and organized for production. In other words, changes in technology, capital investment, capacity utilization, work-flow, managerial skills and labour-management relations each has a bearing on movements in what is termed the "labour productivity" series.

The concept of output used in this report is constant price Gross Domestic Product at factor cost, by industry (Real Domestic Product by Industry), and is the summation of constant price output indexes for individual industries. The weights used to aggregate the industry measures over time are each industry's share of Gross Domestic Product in the base year. A more complete description of the concepts, sources and methods of the output indexes is found in *Indexes of Real Domestic Product by Industry* (Catalogue 61-506).

Labour compensation is a measure of the value of labour services engaged in the production process. It includes all payments in cash or in kind by domestic producers to persons employed as remuneration for

Section 1 - suite

Tableau 1-12

Dépenses de voyage. Dépenses faites à l'étranger par des voyageurs résidents canadiens, des équipages d'avions ainsi que des équipages de camions commerciaux et qui sont afférentes au voyage, y compris les achats de marchandises que les voyageurs veulent importer pour leur usage personnel. Ces dépenses comprennent le coût des voyages internationaux versé à des transporteurs non résidents et les dépenses engagées à l'étranger pour l'hébergement, les repas, les loisirs, le transport local, les cadeaux et tous les autres achats de biens et services.

Tableau 1-13

Les investissements directs canadiens à l'étranger indiquent la quantité de capitaux à long terme qui, à un moment donné, sont placés à l'étranger sous forme d'actions et d'obligations dans des filiales, des entreprises affiliées et des succursales appartenant à des investisseurs canadiens.

Tableau 1-14

Les mesures de la productivité que l'on retrouvera ici relient la production à une entrée unique: la durée du travail. Il faut cependant insister sur le fait que les variations dans la production par unité d'entrée de main-d'œuvre ne peuvent être attribuées ni directement ni exclusivement à la main-d'œuvre. Ces mesures rendent non seulement compte des variations dans la compétence et les efforts de la main-d'œuvre, mais encore de l'apport des autres ressources productives avec lesquelles elle travaille ainsi que de l'efficacité avec laquelle tous ces facteurs se combinent et s'organisent en vue de la production. En d'autres termes, les changements dans le domaine des techniques, de l'investissement des capitaux, de l'utilisation du potentiel, des flux, de la compétence des gestionnaires et des rapports entre les employés et l'employeur agissent chacun pour leur part sur l'évolution de ce qu'il est convenu d'appeler les séries sur la "productivité du travail".

Le concept de production retenu dans cet ouvrage est le produit intérieur brut au coût des facteurs exprimé en dollars constants, par industrie (produit intérieur réel par industrie); c'est la somme des indices de la production en dollars constants pour chaque activité économique. Les coefficients de pondération utilisés dans l'agrégation des mesures des activités économiques pour une période donnée correspondent à l'apport de chaque industrie au produit intérieur brut de l'année de base. Le lecteur trouvera une description plus complète des principes, sources et méthodes relatifs aux indices de la production dans la publication *Indexes of Real Domestic Product by Industry* (n° 61-506 du catalogue).

La rémunération du travail mesure la valeur des services de la main-d'œuvre entrant dans le processus de production. Elle comprend tous les paiements en espèces ou en nature versés par les producteurs canadiens aux personnes occupées au titre

Notes - Continued

Section 1 - Continued

work, including wages, salaries and supplementary labour income of paid workers, plus an imputed labour income for self-employed workers. Statistics of labour compensation in this table represent the most comprehensive labour cost data available for all industries at the present time since they include both cash payments and supplements, and cover all persons employed for gain.

Unit labour cost is the ratio of labour compensation to real output. It is a measure of the cost of labour per unit of real output. Unit labour cost can also be obtained as the ratio of average compensation to productivity; thus, unit labour cost will increase when average compensation grows more rapidly than productivity.

Table 1-15

For "Note", please refer to "Note", Table 1-14.

Table 1-16

Construction activity. Consists of the output of the construction industry plus the output of the construction labour forces in other industries. Also included are related construction costs which are capitalized during the creation of a structure. Examples include pre-construction planning and design, management, legal and real estate fees, interest during construction, etc.

Engineering construction includes: marine construction, road, highway and airport runways, waterworks and sewage systems, dams and irrigation, electric power construction, railway, telephone and telegraph, gas and oil facilities and other engineering construction.

Table 1-17

Shipments' values in this table are projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments.

Yukon and Northwest Territories are not published separately. They are included in the total for Canada.

Table 1-18

For "Note", please refer to "Note", Table 1-17.

Notes - suite

Section 1 - suite

de la rémunération du travail; ceci comprend les salaires, les traitements et le revenu supplémentaire du travail des travailleurs rémunérés, ainsi qu'un revenu fictif du travail dans le cas des travailleurs autonomes. Les statistiques de la rémunération du travail présentées ici constituent à l'heure actuelle les données sur le coût de main-d'oeuvre les plus complètes pour l'ensemble des activités économiques, puisqu'elles comprennent les paiements en espèces et les suppléments, et portent sur toutes les personnes occupées touchant une rémunération.

Le coût unitaire de main-d'oeuvre est le rapport de la rémunération du travail à la production réelle. Il mesure le coût de main-d'oeuvre par unité réelle de production. On peut aussi le calculer comme le rapport de la rémunération moyenne à la productivité. Dans cette hypothèse, le coût unitaire de main-d'oeuvre augmente lorsque la rémunération moyenne croît plus rapidement que la productivité.

Tableau 1-15

Voir "Note" du tableau 1-14.

Tableau 1-16

Travaux de construction. Résultat de l'activité de l'industrie de la construction et de l'activité dans la construction par la main-d'oeuvre appartenant à d'autres branches d'activités. S'appliquent également aux frais de construction connexes qui sont capitalisés au cours de la création de la construction. Par exemple, cela comprend la planification et la conception préliminaires à une construction, les frais de gestion, les honoraires et les commissions immobilières ainsi que l'intérêt versé au cours de la construction.

Travaux de génie comprennent: génie maritime, construction de routes et de pistes d'envol, canalisations et systèmes d'égouts, barrages et irrigation, réseaux électriques, voies ferrées, lignes téléphoniques et télégraphiques, installations de gaz et de pétrole et autres travaux de génie.

Tableau 1-17

Les livraisons qui figurent dans ce tableau sont des projections des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers.

Le Yukon et les Territoires du Nord-Ouest ne sont pas publiés séparément. Ils sont inclus dans le total pour le Canada.

Tableau 1-18

Section 1 - Continued

Table 1-19

For "Note", please refer to "Note", Table 1-17.

Table 1-20

This table presents statistics based on returns by establishments to the Censuses of Manufactures, of Mines and of Logging. The establishment is a statistical unit which corresponds, in most instances, to factories, plants, mines or logging camps depending upon the industry to which the establishment is classified. Other series which present statistics on the degree of foreign control of industry are usually based on company or enterprise returns.

Although the figures are tabulated from returns for individual establishments, the country of control of each establishment must be determined at the level of the owning enterprise. An enterprise consists of all companies or legal entities under common control; the nationality of control of the enterprise must be identified by tracing inter-company ownership links to the company ultimately controlling the enterprise. The nationality of control then applies to all establishments in the enterprise.

Table 1-21

Capacity utilization measurement is an interesting way of examining the relationship between the total resources available and the level of potential output. Within this context, utilization measures could establish significant yardsticks indicative of trends and cycles in capacity utilization.

The statistics presented here are only statistical estimates and they are not operating ratios based on either engineering measures, such as productive machine hours, or survey results.

Given the many conceptual and measurement problems surrounding the notion of capacity utilization, the utilization rates shown here are indicative of trends and cycles in the utilization of capital. The indicated level is only a statistical approximation and should be viewed as such. For example, a rate of 100% indicates a high level of capital utilization which is considered a peak for the period observed.

Table 1-22

The data included in this table were compiled using information obtained from surveying all companies in the Oil and Gas Exploration, Development and Production Industry (SIC 064). This industry includes establishments

Notes - suite

Section 1 - suite

Tableau 1-19

Voir "Note" du tableau 1-17.

Tableau 1-20

Ce tableau présente des statistiques fondées sur les déclarations des établissements renvoyées dans le cadre des recensements des manufactures, des mines et de l'exploitation forestière. L'établissement est une unité statistique qui correspond, dans la plupart des cas, à des fabriques, des usines, des mines ou des camps de bûcherons, selon l'industrie sous laquelle est classé l'établissement. D'autres séries de statistiques sur le degré de contrôle étranger dans l'industrie se fondent généralement sur les déclarations de la société ou de l'entreprise.

Bien que les chiffres soient établis à partir des déclarations de chaque établissement, le pays de contrôle de chaque établissement doit être déterminé au niveau de l'entreprise propriétaire. Une entreprise se compose de toutes les sociétés ou entités juridiques qui font l'objet d'un contrôle commun; pour connaître le pays de contrôle d'une entreprise, il faut retracer ses liens de parenté jusqu'à la dernière société qui exerce le contrôle. Le pays de contrôle s'applique alors à tous les établissements de l'entreprise.

Tableau 1-21

La mesure de l'utilisation de la capacité peut servir à examiner la relation existant entre l'ensemble des ressources disponibles et le potentiel de production. De plus, une mesure de l'utilisation de la capacité pourrait servir à mesurer les tendances et les cycles à l'intérieur de celle-ci.

Ces chiffres représentent uniquement des approximations et ne sont pas des coefficients de fonctionnement basés sur des mesures industrielles, comme les heures de production des machines, ni des résultats d'une enquête.

Étant donné qu'il existe plusieurs problèmes relatifs à la notion du taux d'utilisation, il conviendrait de noter que les taux d'utilisation publiés ne constituent pas des mesures exactes, mais des statistiques indiquant les tendances et les cycles d'utilisation du stock de capital fixe. Par exemple, un taux de 100% indique un haut niveau de l'utilisation de capital qui est considéré un sommet pendant la période observée.

Tableau 1-22

Les données publiées ici ont été obtenues lors d'une enquête statistique menée auprès de toutes les sociétés faisant partie de l'industrie d'exploration, de la mise en valeur et de la production de pétrole et de gaz (CAE 064). Cette industrie comprend les

Notes - Continued

Section 1 - Continued

primarily engaged in the production of petroleum or natural gas from wells or tar sands, and natural gas plants processing the natural gas, as defined in the *Standard Industrial Classification Manual* (Catalogue 12-501E). However, statistics for establishments engaged in synthetic crude oil (e.g. tar sands) operations are excluded from this table.

Employees include salaried management, professional, technical and administrative personnel, plus production, field, plant and related workers, which comprise both the producing and non-producing activities.

Marketable production. The production of gas, oil, propane, butane, etc., which is produced and available for market; i.e., natural gas products produced by gas processing plants after processing and reprocessing plant uses, losses and shrinkage, the sales of natural gas from dry gas fields after field use, losses, reinjection, etc., or the production for sale of crude oil after field use and losses, reinjection, etc., but before inventory changes.

Notes - suite

Section 1 - suite

établissements dont l'activité principale est la production de pétrole ou de gaz naturel provenant de puits ou de sables asphaltiques, et les usines de traitement du gaz naturel, suivant la définition donnée dans le manuel de la *Classification des activités économiques* (n° 12-501F du catalogue). Cependant, les statistiques pour les établissements dont l'activité est la production de pétrole brut synthétique (ex., sables asphaltiques) ne sont pas prises en compte dans ce tableau.

Les salariés groupent les directeurs rémunérés, le personnel de profession libérale, les techniciens et les administrateurs, ainsi que les travailleurs à la production, les ouvriers aux champs et à l'usine et les travailleurs assimilés, pour les activités de production et autres.

Production marchande. La quantité de gaz, pétrole, propane, butane, etc., produite et disponible pour la vente, c.-à-d., la quantité de produits du gaz naturel provenant d'usines de traitement, après déduction et l'autoconsommation, des pertes et de la contraction au stockage des ventes de gaz naturel provenant de champs de gaz secs après déduction du volume utilisé dans le champ, perdu, réinjecté, etc., ou, la quantité de pétrole brut produite pour la vente, après déduction de volume utilisé sur place, perdu, réinjecté, etc., mais avant les variations de stocks.

Table 1-23

For "Note", please refer to "Note", Table 1-10.

Table 1-24

This table sets out the 1985 capital spending intentions for provinces and all sectors of the economy. Comparative figures of preliminary actual expenditures in 1984 and actual expenditures in 1983 are also given. The results are based on a questionnaire survey of individual companies and other spending agencies completed towards the end of 1984 and in January and February 1985. The figures reflect spending plans as formulated at that time.

The estimates cover total outlays for construction and for the acquisition of producers' machinery and equipment by Canadian business, institutions and governments, together with expenditures for housing. All in all, about 28,000 establishments were surveyed for their investment intentions. In order to approximate full coverage, adjustments were made for non-surveyed and for non-reporting establishments. In a few areas, where the survey approach is not considered practical, expenditure estimates were arrived at independently on the basis of current trends and expert opinion in these fields (e.g., agriculture, fishing and housing).

New capital expenditures include the cost of procuring, constructing and installing new durable plant and

Tableau 1-23

Voir "Note" du tableau 1-10.

Tableau 1-24

Nous présentons ici un état des immobilisations projetées dans les provinces et les divers secteurs de l'économie en 1985 (de même que les dépenses réelles provisoires de 1984 et les dépenses réelles de 1983). La plupart des chiffres sont fondés sur les réponses à un questionnaire adressé aux sociétés particulières et aux autres organismes qui font des immobilisations. Comme les réponses ont été préparées vers la fin de 1984 et en janvier et février 1985, les chiffres représentent les immobilisations projetées à ce moment-là.

Les immobilisations prévues comprennent l'ensemble des sommes que les sociétés commerciales, les institutions et les gouvernements du Canada entendent consacrer à des constructions et à l'acquisition de machines et d'outillage, ainsi que les dépenses visant la construction d'habitations. L'étude a porté sur environ 28,000 entreprises commerciales, mais les totaux ont été ajustés de façon à inclure les immobilisations des sociétés qui n'ont pas répondu, ainsi que des sociétés qui n'ont pas fait partie du relevé. Dans certains secteurs, où la méthode d'enquête n'a pas semblé pratique, les montants ont été calculés séparément d'après la tendance courante et l'opinion de spécialistes en la matière (ex. agriculture, pêche et habitation).

Les immobilisations neuves comprennent le coût d'acquisition, de construction et d'installation de nouvelles usines et

Notes - Continued

Section 1 - Continued

machinery, whether for replacement of worn or obsolete assets, or as net additions to existing assets. Included are all capitalized costs such as architectural, legal and engineering fees, as well as the value of work on capital assets undertaken by firms with their own labour force. Gross outlays are reported without any deduction for scrap or trade-in value of old assets. Excluded are expenditures made for the acquisition of previously existing structures, for used machinery and equipment unless imported and for land since outlays of this type involve only the transfer of property and not the creation of a capital asset.

Construction includes building construction and all types of engineering construction such as roads, dams, transmission lines and pipelines, as well as oil drilling and mine development. The machinery and equipment category takes into account the purchase of all such items which are used either in producing goods or providing services but does not cover durable goods purchased for personal use. Included, as well as industrial machinery, are transportation equipment, agricultural implements, professional and scientific equipment, office and store furnishings and other similar capital goods. Excluded, for the purpose of this report, are outlays for machinery and equipment by the Department of National Defence.

The repair expenditures shown in the table represent the non-capitalized outlays made to maintain the operating efficiency of the existing stock of durable physical assets. Where the repair costs are large enough to materially lengthen the expected serviceable life of the assets, increase its capacity or otherwise raise its productivity, they are treated as capital expenditures on new construction or on new machinery and equipment.

Table 1-25

For "Note", please refer to "Note", Table 1-24.

Table 1-26

The Public category includes government enterprises for municipal, provincial and federal governments, municipal hospitals and schools, provincial hospitals, schools and universities, and federal government housing, and government department expenditures for the three levels.

Public enterprises cover, in general, government owned establishments whose principal source of revenue is derived from the provision of goods and services to the public.

The total for federal government departments includes data for departmental Crown corporations and excludes data for proprietary Crown corporations which are all

Notes - suite

Section 1 - suite

machines durables, qu'il s'agisse de remplacer des biens usés ou désuets ou d'ajouter aux installations existantes, ainsi que tous les frais portés au compte de capital, comme les honoraires d'architectes, d'avocats et d'ingénieurs, et la valeur des travaux effectués par le propriétaire par l'entremise de ses propres ouvriers. Le rapport indique les dépenses brutes, sans déduction pour la valeur des biens mis au rancart ou cédés en échange de biens nouveaux, mais il ne comprend pas les achats de constructions existantes, de machines ou d'équipement usagés, à moins qu'ils n'aient été importés, ni de terrains, puisque dans ces cas il s'agit d'une simple cession des droits de propriété et non de la création d'un bien nouveau.

La construction comprend les bâtiments et tous les travaux de génie, comme les routes, les barrages, les lignes de transmission et les pipelines, ainsi que le forage de puits de pétrole et la mise en exploitation des mines. Dans la catégorie des machines et de l'outillage, les achats comprennent tous les articles employés à la production de biens et de services mais non les biens durables achetés pour usage personnel. Sous cette rubrique sont inclus, en plus des machines industrielles, le matériel de transport, les instruments agricoles, le matériel professionnel et scientifique, les ameublements de bureaux et de magasins et autres biens capitaux du même genre. Toutefois, le présent rapport ne tient pas compte des montants consacrés à l'acquisition de machines et d'outillage par le Ministère de la Défense nationale.

Les dépenses en réparation, figurant dans le tableau, représentent les déboursés non-capitalisés effectués en vue de maintenir les biens matériels durables en bon état de fonctionnement. Lorsque ces dépenses atteignent des sommes suffisantes et qu'elles ont pour effet d'accroître la durée prévue ou la productivité d'éléments d'actif, elles sont considérées comme des immobilisations en constructions neuves ou en machines et outillage neufs.

Tableau 1-25

Voir "Note" du tableau 1-24.

Tableau 1-26

La catégorie publique comprend les entreprises des gouvernements municipaux, provinciaux et fédéral; les écoles, les universités et les hôpitaux provinciaux, les écoles et les hôpitaux municipaux; les habitations du gouvernement fédéral; et les dépenses aux trois niveaux de gouvernement.

Entreprises publiques comprennent, en général, les entreprises gouvernementales qui tirent la majeure partie de leur revenu de la fourniture de biens et de services au public.

Les totaux pour les ministères du gouvernement fédéral comprennent les chiffres pour les corporations de département mais excluent les chiffres pour les corporations de propriétaire,

Notes - Continued

Section 1 - Continued

classed as enterprises. Agency Crown corporations, on the other hand, are provisionally classified in part to enterprises and the remainder to government departments.

Table 1-27

The data contained in this table are derived from taxation returns, both incorporated and unincorporated, submitted to Revenue Canada, Taxation for the taxation year 1980.

The following types of firms have been excluded: 1) banks and other deposit-accepting institutions; 2) credit agencies such as consumer loan companies, sales finance companies, etc.; 3) insurance carriers; 4) investment and holding companies, and 5) tax-exempt corporations. For the most part, firms in the foregoing categories function as incorporated businesses.

The tables exclude self-employed business operators reporting less than \$10,000 gross income from such business operations — this group of entities was not sampled. They also exclude farm operations, fishing operations, professionals and self-employed commission salespersons.

Owing to the variety of size parameters applicable to specific industry groups, no attempt has been made to define small business. However, it is anticipated that the size groups presented in tables will allow the reader to apply industry-specific criterion for the purpose of delineating small, medium and large business.

For additional information, please contact Statistics Canada, Business Register Division and refer to unpublished report "Small Business in Canada, 1980".

Table 1-28

For "Note", please refer to "Note", Table 1-27.

Table 1-29

Statistics for the four major financial items (total assets, equity, sales and pretax profit) are based on universe information for some 487,681 corporations in 1981, and 528,281 in 1982.

Industry classes used in this table are those identified and defined in the 1960 *Standard Industrial Classification Manual*.

Notes - suite

Section 1 - suite

ces dernières étant considérées comme entreprises publiques. D'autre part, les corporations de mandataire sont pour le moment classées en partie avec les entreprises publiques et en partie avec les ministères gouvernementaux.

Tableau 1-27

Les données contenues dans ce tableau proviennent des déclarations d'impôt des entreprises individuelles et constituées soumises à Revenu Canada, Impôt, pour l'année d'imposition 1980.

Les types d'entreprises suivants ont été exclus: 1) banques et autres institutions de dépôt; 2) organismes de crédit tels que les sociétés de prêts à la consommation, de financement des ventes, etc.; 3) assureurs; 4) sociétés d'investissement et d'exploitation, et 5) sociétés exemptées d'impôt. La majorité des entreprises des catégories susmentionnées fonctionnent comme des entreprises constituées.

Les tableaux excluent les exploitants autonomes déclarant avoir retiré moins de \$10,000 de revenu brut de leurs activités commerciales. Ce groupe d'entités n'a pas été échantillonné. Les tableaux excluent également les agriculteurs, les pêcheurs, les professionnels et les vendeurs indépendants à commission.

En raison du large éventail des paramètres de taille qui s'applique à des secteurs précis, aucune tentative n'a été faite pour définir le terme "petite entreprise". Les catégories de taille présentées dans les tableaux devraient cependant permettre au lecteur d'appliquer des critères propres à chaque branche d'activité afin de définir ce qu'est une petite, une moyenne ou une grande entreprise.

Pour de plus amples renseignements, veuillez contacter Statistique Canada, Division du registre des entreprises, ainsi que le rapport non publié "Statistique des petites entreprises, 1980".

Tableau 1-28

Voir "Note" du tableau 1-27.

Tableau 1-29

Les statistiques pour les quatre principaux postes financiers (actif total, avoir, ventes et bénéfice avant impôts) sont tirées d'un univers de quelques 487,681 sociétés en 1981 et 528,281 en 1982.

Les catégories utilisées dans le présent tableau sont celles que définit la publication *Classification type des industries de 1960*.

Notes - Continued

Section 1 - Continued

Because the source documents for the corporation financial data published are the financial statements filed by corporations with the Department of National Revenue, Taxation for tax purposes, the statistical unit for the table and, therefore, the unit to be industrially classified is the corporation as a legal entity.

Certain corporation records are pre-identified for sampling with certainty, so-called "take-alls". These consist of all corporations with assets \$25,000,000 or more, and all federal and provincial crown corporations. For the remainder of the population, an allocation of the number of records to be selected is made based on a modified "Neyman" allocation technique using both sales and assets with a pre-determined maximum number of records to be sampled, further limited by the requirement to allocate all records in any stratum where the total population is less than 8 and a minimum of 8 in all other strata, with a sampling rate of not less than one in 40. The allocation is based on a two-year old file.

The ratio estimation procedure utilizes such major financial items as assets, equity, sales profits and taxable income, which are tabulated on a universe basis to estimate the remaining financial items of non-sample corporations.

Table 1-30

Industry selling price indexes are published for approximately 110 industries within manufacturing. The Classification system is that of the 1970 Standard Industrial Classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made, are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected for new orders placed on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

The indexes are gross weighted. They measure the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, they duplicate the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

Section 1 - suite

Comme les documents de référence pour les données publiées sont les états financiers présentés par les sociétés à Revenu Canada, Impôt, l'unité statistique du présent tableau et, par conséquent, celle qui fait l'objet de la classification par activité, est la société considérée comme personne morale.

Certains dossiers de société sont identifiés au préalable pour un échantillonnage avec certitude. Il s'agit de toutes sociétés dont l'actif est égal ou supérieur à \$25,000,000, et toutes les sociétés de la Couronne fédérales et provinciales. Pour ce qui est du reste de la population, on procède à une répartition du nombre de dossiers à sélectionner grâce à une technique modifiée de répartition de "Neyman", dans laquelle on se sert des ventes et de l'actif avec un nombre déterminé à l'avance de dossiers à échantillonner, avec comme conditions de répartir tous les dossiers d'une strate dont la population totale est inférieure à 8 et un minimum de 8 dans toutes les autres strates, avec une fraction de sondage non inférieure à un dans 40. Cette répartition se fait à partir d'un fichier vieux de deux ans.

Les principaux postes financiers, tels que l'actif, l'actif propre, les ventes, les bénéfices et le revenu imposable, lesquels sont calculés pour l'univers d'enquête, ont servi à déterminer les autres postes financiers des sociétés non échantillonées.

Tableau 1-30

Les indices des prix de vente dans l'industrie sont publiés pour environ 110 industries manufacturières. Les produits sont classés d'après la Classification des activités économiques de 1970, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classés de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, l'emploi et les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Il s'agit d'indices pondérés bruts. Ils mesurent les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons interindustrielles des industries manufacturières. Ils prennent donc deux fois en compte les mouvements de certains prix; les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient dans leurs produits tels que le pain, les biscuits ou les gâteaux, etc.

Section 1 - Continued

Table 1-31

The methodology used to produce these indexes is based on a comparison of the actual output of an industry during a certain time period with the estimated capacity output during that period.

The estimated capacity output is based on a capacity capital-output ratio derived from the industry's gross stock of fixed capital, measured in 1971 dollars.

The measurement procedure underlying the capital stock estimates is known as the "perpetual inventory" method.

Table 1-32

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The population group is composed of private households (families and individuals) living in Canadian urban centres with a population of 30,000 or more. Population estimates for 1978 revealed 64 such urban centres.

Table 1-33

These implicit indexes are currently weighted price indexes. They reflect not only pure price changes, but also changing expenditure patterns within and between major groups. They are derived by dividing the total in current dollars by the total in constant dollars.

For additional information on the I.P.I., see National Income and Expenditure Accounts, Volume 3, Catalogue 13-549E.

Table 1-34

By the term raw materials is meant those commodities that are the products of the primary stage of production — for example wheat, but not flour, iron ore but not pig iron, and coal but not electricity.

The index covers purchases by Canadian industry, generally for further processing, and does not cover exports of flows of raw materials directly to final demand (principally foodstuffs).

Prices should include all charges a purchaser incurs to bring the commodity to his establishment gate.

Notes - suite

Section 1 - suite

Tableau 1-31

La méthodologie inhérente au calcul de ces indices repose sur la comparaison de la production réelle d'une industrie au cours d'une certaine période avec la capacité estimée de production au cours de cette même période.

La capacité de production estimée est calculée d'après le coefficient de capital de capacité obtenu à partir du stock brut de capital fixe de l'industrie, mesuré en dollars de 1971.

La méthode de mesure des estimations de stocks de capital est celle de "l'inventaire perpétuel".

Tableau 1-32

L'indice des prix à la consommation mesure la variation dans le temps, exprimée en pourcentage, du coût à l'achat d'un "panier" constant de biens et de services, qui représente les achats faits par un groupe particulier de la population au cours d'une période donnée. Ce groupe se compose de ménages privés (familles et personnes seules) qui habitent les centres urbains du Canada qui comptent 30,000 habitants ou plus. D'après les estimations démographiques pour 1978, ces centres urbains sont au nombre de 64.

Tableau 1-33

Ces indices implicites ou synthétiques sont des indices de prix à pondération courante. Ils rendent compte non seulement des variations de prix, mais aussi de l'évolution des régimes de dépense dans les principaux groupes et entre ces derniers. On les obtient en divisant le total en dollars courants par le total en dollars constants.

Pour obtenir des informations supplémentaires sur l'I.I.P., voir la publication Comptes nationaux des revenus et des dépenses, volume 3, n° 13-549F du catalogue.

Tableau 1-34

Par matières brutes, on entend les marchandises qui sont le fruit de l'étape primaire de la production. Cela englobe, par exemple, le blé (mais non la farine), le minerai de fer (mais non la fonte en gueuses) et le charbon (mais non l'électricité).

L'indice vise les achats des industries canadiennes, habituellement en vue d'une transformation additionnelle, mais il ne porte pas sur les exportations, ni sur les matières brutes qui passent directement à la demande finale (principalement des denrées alimentaires).

Les prix devraient comprendre toutes les dépenses engagées par l'acheteur pour faire parvenir le produit à la porte de son établissement.

Notes - Continued

Section 1 - Continued

A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Weights were derived from the 1976 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs. These values have been adjusted for price changes between 1976 and 1977.

Table 1-35

Census-farm. This term is defined in the 1981 Census as a farm, ranch or other agricultural holding with sales of agricultural products during the past 12 months of \$250 or more. Operations which anticipated sales of \$250 or more in 1981 were also included.

The definition is different from that used in recent censuses in that the requirement for 1 acre or more of land has been dropped and the sales limit has been changed from \$50. Where comparisons between 1981 data and previous censuses are shown, the data for 1981 using the \$250 definition are compared to data using the \$50 definition from previous censuses.

Table 1-36

Most of the price information used in compiling the index is obtained from reports furnished monthly by volunteer farm correspondents throughout Canada. The prices used in computing the index are, as closely as can be determined, the prices which are actually received by the farmers at the farm level. Subsidies, bonuses and premiums which can be attributed to specific products are all included in the prices, whereas storage, transportation, processing and handling charges which are not actually received by farmers are excluded. In reporting prices to Statistics Canada each month, price correspondents are asked to report the average prices prevailing in their neighbourhood, taking into account the various grades of each commodity marketed. Thus, average prices reported by these correspondents may differ from month to month as a result of changes in price, changes in quality or a combination of both. In effect, this index is not a measure of pure price change but a measure of the change in return to farmers per unit of product marketed.

Statistics for Canada exclude Newfoundland.

Notes - suite

Section 1 - suite

La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Les pondérations sont fondées sur les tableaux des entrées-sorties de 1976, qui donnent les valeurs (prix d'achat) des produits acquis à titre d'entrées intermédiaires. Les valeurs en cause ont été modifiées en fonction de la variation des prix entre 1976 et 1977.

Tableau 1-35

Ferme de recensement. On l'a définie au recensement de 1981 comme une ferme, un ranch ou une autre exploitation agricole dont les ventes de produits agricoles au cours des 12 derniers mois se sont élevées à \$250 ou plus. Les exploitations prévoyant des ventes de \$250 ou plus en 1981 étaient incluses aussi.

Cette définition diffère sur deux points de celle qui a été employée aux recensements antérieurs: d'abord, le critère prévoyant une superficie de base d'une acre ou plus a été abandonné, puis le seuil des ventes fixé à \$50 a été modifié. Lorsque nous présentons des comparaisons entre les données du recensement de 1981 et celles de recensements antérieurs, les données de 1981 utilisant le seuil de \$250 sont comparées à celles utilisant le seuil de \$50.

Tableau 1-36

La plupart des renseignements sur les prix utilisés pour la confection de l'indice proviennent des rapports mensuels produits par des correspondants agricoles volontaires dans tout le Canada. Les prix utilisés pour calculer l'indice se rapprochent, dans la mesure du possible, des prix que touchent réellement les cultivateurs au niveau de la ferme. Les subventions, gratifications et primes qui peuvent être attribuées pour des produits déterminés sont toutes comprises dans les prix, tandis que les frais d'entreposage, de transport, de transformation et de manutention, qui ne sont pas directement perçus par le cultivateur en sont exclus. Au moment du rapport mensuel sur les prix, on demande aux correspondants d'indiquer la moyenne des prix en vigueur dans leur voisinage, prenant en compte les diverses qualités de chacun des produits sur le marché. Ainsi, les prix moyens déclarés par ces correspondants peuvent varier d'un mois à l'autre en raison des modifications de prix, des variations de la qualité offerte ou d'une combinaison de ces deux éléments. En réalité, cet indice ne constitue pas une mesure de la simple variation des prix mais une mesure des variations des recettes des cultivateurs par unité de produit mis en vente.

Les statistiques pour le Canada excluent Terre-Neuve.

Section 1 - Continued

Table 1-37

The consumer credit balances for 1984 are as at November 30, whereas, the previous years are as at December 31.

This table provides estimated amounts of consumer credit outstanding on the books of selected lenders. The data relate mainly to credit extended to individuals, but also include unidentifiable amounts of credit extended for non-consumer purposes. Credit extended through the use of all-purpose credit cards is included with the balances of the selected lender responsible for their issuance. The data do not represent total consumer indebtedness since they do not include credit on the books of: furniture, T.V. and appliance stores; other retail outlets; motor vehicle dealers; public utilities; other credit card issuers not elsewhere included in the data; and credit card accounts of oil companies. Data on consumer credit on the books of these lenders are available until December 1978 in Statistics Canada publication "Consumer Credit" (61-004). In addition, data on fully secured loans, long-term indebtedness (such as residential mortgage and home improvement loans), loans between individuals or balances on bills owed to professional practitioners, clubs, hospitals or other personal service establishments are not included.

For additional information see the "Bank of Canada Review Notes to Tables", and also "Bank of Canada Review", monthly.

Table 1-38

Canadian dollar deposits as at December 31.

Table 1-39

All other loans comprise loans repayable in approximately equal instalments of a blend of interest and principal and other loans.

Data shown are for the fourth quarter 1982 and 1983, and the third quarter 1984.

For additional information see the "Bank of Canada Review Notes to Tables", and also "Bank of Canada Review", monthly.

Section 1 - suite

Tableau 1-37

En 1984, l'encours du crédit à la consommation est en date du 30 novembre au lieu du 31 décembre pour les années précédentes.

Les données contenues dans ce tableau sont des estimations de l'encours du crédit à la consommation distribué par les principales catégories de prêteurs. Elles concernent essentiellement le crédit accordé aux particuliers, mais comprennent également un montant indéterminé de crédits utilisés par eux à des fins autres que la consommation. Le crédit octroyé sur des cartes de crédit générales figure à l'encours global du crédit déclaré par les établissements qui ont émis ces cartes. Ces chiffres ne représentent pas l'endettement total des consommateurs puisqu'ils ne tiennent pas compte du crédit octroyé par les magasins spécialisés dans la vente de meubles, de télésieurs et d'appareils ménagers; par les autres détaillants; par les concessionnaires d'automobiles; par les entreprises de services d'utilité publique, par les sociétés émettrices de cartes de crédit non mentionnées sous d'autres rubriques ni du crédit octroyé par les compagnies de pétrole aux titulaires de leurs cartes de crédit. Les données relatives au crédit à la consommation consenti par ces prêteurs figurent dans "Crédit à la Consommation" (publication n° 61-004 de Statistique Canada); elles ne sont pas disponibles pour la période postérieure à décembre 1978. De plus, on ne dispose pas de données sur les prêts entièrement garantis, les dettes à long terme (tels les prêts hypothécaires à l'habitation et les prêts pour amélioration des maisons), les prêts entre particuliers et les dettes envers les membres des professions libérales, les clubs, les hôpitaux et d'autres établissements qui dispensent des services personnels.

Pour obtenir des informations additionnelles, voir la "Revue de la Banque du Canada notes relatives aux tableaux", et aussi la "Revue de la Banque du Canada", mensuel.

Tableau 1-38

Dépôts en dollars canadiens au 31 décembre.

Tableau 1-39

Ces autres catégories incluent notamment les prêts remboursables par versements approximativement égaux, dont chacun représente l'intérêt couru et un acompte sur le principal.

Les données sont pour le quatrième trimestre 1982 et 1983, et le troisième trimestre 1984.

Pour de plus amples informations, voir la "Revue de la Banque du Canada notes relatives aux tableaux", et aussi la "Revue de la Banque du Canada", mensuel.

Table 1-40

Quarter-end data are based on complete reports of loans. Data for the intervening months are estimated on the basis of partial information.

Data shown are for the fourth quarter 1982 and 1983, and the third quarter 1984.

For additional information see the "Bank of Canada Review Notes to Tables", and also "Bank of Canada Review", monthly.

Table 1-41

The Statistical Tabulation of "Bankruptcies" was formulated according to the requirements of the "POSTAL DELIVERY AREAS — GEOGRAPHICAL CLASSIFICATION CODE CONVERSION TABLE", as issued by the Standards Division of Statistics Canada, and shows urban centres having a population of at least 50,000 inhabitants.

ASSETS and LIABILITIES reflect the amounts as they were declared by the debtors in the course of completing their sworn Statement of Affairs. Total DEFICIENCY is the difference between the two.

For additional information refer to the publication "Insolvency Bulletin" (Monthly) issued by the Office of the Superintendent of Bankruptcy, Consumer and Corporate Affairs Canada.

Table 1-42

For "Note", please refer to "Note", Table 1-41.

Table 1-43

The Canadian Travel Survey is conducted as a supplement to the Labour Force Survey (LFS). Its exclusions are the Yukon, Northwest Territories and the populations living on Indian Reserves and Crown Lands, inmates of institutions and members of the Armed Forces, all of which in total account for only about 2% of the total population of Canada.

The Canadian Travel Survey, conducted for every quarter of 1982 and 1984 had a sample size which varied between 9,000 and 20,000 households. In each quarter one person 15 years of age or more was randomly selected from each household to respond to the travel survey questionnaire.

Table 1-44

Scientific research and experimental development (R&D) comprise creative work undertaken on a systematic basis in order to increase the stock of knowledge, including knowledge of man, culture and society and the use of this stock of knowledge to devise new applications.

Gross domestic expenditure on R & D (GERD): total intramural expenditures on R & D performed on national territory during a given period. It includes R & D performed on the national territory funded from abroad, but excludes payments for R & D performed abroad. It is constructed by adding together the intramural expenditures of the R & D performing sectors.

For additional information on concepts and methods, see Catalogue 88-506E (Occasional), A Framework for Measuring Research and Development Expenditures in Canada.

Table 1-45

Data in this table are measured in accordance with the standard definitions of the OECD — United Nations system of accounts. For additional information, see System of National Accounts, Series F, No. 2, Rev. 3, United Nations, 1968, and "Sources and Methods" in OECD Economic Outlook, No 34-December 1983, Paris, France.

Growth rates for country groups were obtained by applying growth rates for each country to their 1982 values expressed in 1982 US dollars.

Table 1-46

The country weights used in the aggregate indices, for the seven major countries, are based on the private consumption and exchange rates of the preceding year.

In order to facilitate the interpretation of current cost and price trends, the OECD Secretariat has compiled indicators on wage costs and consumer and producer prices from various sources. In spite of the efforts made to derive reasonably comparable series there are considerable divergences in definitions and statistical methods

Tableau 1-44

La recherche scientifique et le développement expérimental (R-D) le terme s'applique à tout travail créateur effectué de façon systématique en vue d'accroître la somme des connaissances, y compris sur l'homme, sa culture et sa société, et à toute mise en application de cette connaissance.

La dépense intérieure brute au titre de la R-D (DIRD): total des dépenses intra-muros de la R-D faites sur le territoire national au cours d'une période donnée; comprend la R-D financée par l'étranger et effectuée sur le territoire national, mais non les sommes versées au titre de la R-D exécutée à l'étranger. La DIRD s'obtient par sommation des dépenses intra-muros de R-D des divers secteurs d'exécution.

Pour obtenir des informations additionnelles, voir les concepts et méthodes, n° 88-506F du catalogue (hors série), Critères servant à mesurer les dépenses consacrées à la recherche et au développement au Canada.

Tableau 1-45

Les données montrées dans ce tableau ont été établies d'après les définitions standardisées du système de comptabilité commun à l'OCDE et aux Nations-Unies. Pour obtenir des informations supplémentaires, voir le système de comptabilité nationale, Séries F, no. 2, Rev. 3, Nations Unies, 1968, et "Sources et méthodes" dans les Perspectives économiques de l'OCDE, no 34-décembre 1983, Paris, France.

Les taux d'accroissements des groupes de pays sont obtenus en appliquant pour chaque pays les taux de croissance en volume au PIB de 1982, évalué en dollars É.-U. de 1982.

Tableau 1-46

Les pondérations utilisées pour obtenir les indices des agrégats, pour les sept principaux pays, sont basées sur la consommation privée et les taux de change de l'année précédente.

En vue de faciliter l'interprétation des tendances actuelles des coûts et des prix, le Secrétariat de l'OCDE a établi un ensemble d'indicateurs de l'évolution des coûts salariaux, des prix à la consommation et des prix de gros à partir de données tirées de diverses sources. En dépit des efforts qui ont été faits pour rendre de telles séries relativement comparables, les définitions

Notes - Continued

Section 1 - Continued

and intercountry comparisons can only be made with great caution.

The coverage and calculation methods of consumer price indices vary greatly from country to country. In some countries, the weights used to calculate the index are revised fairly frequently on the basis of family expenditure surveys using large samples, and in such cases the index moves about in line with the deflator for private consumption. In some countries, however, the weighting system relates only to low income groups, and/or, is seriously out of date. In such cases, the weight of food is generally higher and that given to services lower, compared with the pattern of expenditure for private consumption as a whole and the consumer price index can diverge substantially from the consumption deflator.

For additional information, see "Sources and Methods" in OECD Economic Outlook No 34-December 1983, Paris 16, France.

Table 1-47

Total government includes all levels of government and the social security system, but excludes public corporations and public financial institutions.

Central government figures are net of transfers to other levels of government.

For additional information, see OECD, National Accounts of OECD Countries, 1981, volume II.

Table 1-48

Data have been adjusted (as far as possible) both to preserve comparability over time and to conform with the definitions drawn up by the International Labour Organisation. The adjustments mainly affect countries that base their unemployment statistics on registration records maintained by employment offices. Where necessary the OECD has tried to adjust "registered" unemployment with a view to including unemployed persons not covered on the register and to excluding employed persons still carried on the register. For several countries the adjustment procedure used is similar to that of the U.S. Department of Labour. Minor differences may appear mainly because the rates published by the U.S. Department of Labor refer to the civilian labour force instead of the total labour force.

The data are averages of quarterly or monthly figures.

Notes - suite

Section 1 - suite

et les méthodes statistiques utilisées diffèrent considérablement d'un pays à l'autre, de sorte que les comparaisons entre pays ne doivent être faites qu'avec beaucoup de précaution.

Les indices des prix à la consommation recouvrent des notions très différentes selon les pays, et les méthodes de calcul varient beaucoup. Dans certains pays, on révise fréquemment la pondération de l'indice à partir de sondages sur les dépenses des ménages portant sur un large échantillon. Le mouvement des indices ainsi obtenu suit en général assez près celui de l'indice de prix implicite de la consommation privée. Dans d'autres pays cependant, la pondération reflète uniquement les dépenses des ménages à faible revenu et/ou se réfère à une période trop ancienne. La pondération tend alors à exagérer la part de l'alimentation au détriment des services par rapport aux habitudes de consommation de l'ensemble des ménages et l'indice des prix à la consommation peut évoluer de façon très différente de l'indice de prix implicite de la consommation privée.

Pour obtenir des informations supplémentaires, voir "Sources et méthodes" dans les Perspectives économiques de l'OCDE no 34-décembre 1983, Paris 16, France.

Tableau 1-47

L'ensemble des gouvernements comprend tous les niveaux d'administration et la sécurité sociale, mais non les sociétés et institutions financières publiques.

Les données des gouvernements nationaux sont nettes des transferts aux autres niveaux.

Pour obtenir des informations additionnelles, voir OCDE, Comptes nationaux des pays membres de l'OCDE, 1981, volume II.

Tableau 1-48

Les données ont été corrigées (dans la mesure du possible) de manière à être, d'une part comparables dans le temps, d'autre part conformes aux définitions de l'Organisation Internationale du Travail. Les corrections concernent principalement les pays dans lesquels les statistiques de chômage sont fondées sur les listes d'inscription tenues par les agences pour l'emploi. Quand cela était nécessaire, l'OCDE a essayé d'ajuster ce chômage "enregistré" afin d'inclure les chômeurs non inscrits et d'exclure les personnes ayant trouvé un emploi mais non encore radiées des listes. Pour plusieurs pays la procédure d'ajustement utilisée est semblable à celle du Ministère du Travail des États-Unis. De légères différences peuvent néanmoins apparaître essentiellement parce que les taux publiés par le Ministère du Travail des États-Unis se rapportent à la population active civile et non à la population active totale.

Les données sont des moyennes de données trimestrielles ou mensuelles.

NOTES

Section 2

Table 2-1

This table deals only with regular motion picture theatres and includes those using 16 mm, 35 mm and 70 mm. For purposes of this table, establishments having more than one screen at one location were shown as single establishments. In 1983, the 899 theatres reported a total of 1,477 screens. For statistics on drive-in theatres, please refer to Table 2-2.

Excluded from this table are those regular motion picture theatres operated by non-profit organizations, government agencies, community centres, museums, etc.

Table 2-2

This table refers to drive-in theatres only.

Statistics on regular motion picture theatres will be found in Table 2-1.

Excluded from this table are those drive-in theatres operated by non-profit organizations, government agencies, community centres, museums, etc.

Table 2-3

Advertising expenditure figures are collected annually by Media Measurement Services Inc., a subsidiary of Elliott Research Corporation Limited of Toronto. The data are derived from time and space estimates, for national advertisers in measured media, and published annually by Elliott Research Corporation Limited of Toronto.

Table 2-4

This table includes **only** those establishments that reported receipts from the sale of computer services which are greater than one third of total operating revenue.

Table 2-5

For further information please contact the Service Trade Section, Services Division.

Table 2-6

For "Note", please refer to "Note", Table 2-5.

NOTES

Section 2

Tableau 2-1

Les données de ce tableau ne portent que sur les cinémas ordinaires, y compris ceux utilisant du matériel de projection de 16 mm, 35 mm et 70 mm. Ici, les établissements qui possèdent plus d'un écran au même endroit sont comptés comme un seul établissement. En 1983, les 899 cinémas ont déclaré au total 1,477 écrans. Voir statistiques sur les ciné-parcs au tableau 2-2.

Ce tableau ne prend pas en compte les cinémas ordinaires exploités par des organismes sans but lucratif, des organismes publics, des centres communautaires, des musées, etc.

Tableau 2-2

Les données de ce tableau ne portent que sur les ciné-parcs.

Consultez le tableau 2-1 pour des statistiques sur les cinémas ordinaires.

Ce tableau ne prend pas en compte les ciné-parcs exploités par des organismes sans but lucratif, des organismes publics, des centres communautaires, des musées, etc.

Tableau 2-3

Les dépenses en publicité font l'objet d'une collecte annuelle par Media Measurement Services Inc., filiale de Elliott Research Corporation Limited de Toronto. Les données sont établies à partir d'estimations temporelles et spatiales, pour des agences de publicité nationales dans les média étudiés, et publiées chaque année par Elliott Research Corporation Limited de Toronto.

Tableau 2-4

Ce tableau comprend **seulement** les établissements qui ont rapporté les recettes des ventes de service informatique lesquelles représentent plus du tiers des recettes totales de revenu d'exploitation.

Tableau 2-5

Pour de plus amples renseignements veuillez contacter la Section des services, Division des services.

Tableau 2-6

Voir "Note" du tableau 2-5.

Notes - Continued

Table 2-7

Data in this table include receipts from (1) licensed restaurants, (2) unlicensed restaurants, including drive-ins, (3) take-out food shops, including refreshment stands, (4) caterers and (5) taverns, bars and night clubs. Both independent and chain restaurant locations are included as well as restaurants that operate under a franchise.

Excluded are eating places which form an integral part of hotel, motel and other accommodation establishments, those in military and service clubs, in institutions (hospitals, prisons, etc.) and in establishments classified to industrial sectors other than the Service sector, e.g., manufacturing, retail trade, etc. unless such eating places are concessions run by outside interests.

Table 2-8

For "Note", please refer to "Note", Table 2-7.

Table 2-9

For "Note", please refer to "Note", Table 2-7.

For definitions of "Chains", and "Independents", see "Definitions" section.

Table 2-10

The statistics in this table refer to all hotels in Canada: (1) full-year licensed, (2) full-year non-licensed, (3) seasonal licensed, (4) and seasonal non-licensed (SIC 911). For statistics on motels, cabins, tourist courts (SIC 911) or other types of accommodation (SIC 913 and 914), please refer to Tables 2-12 and 2-13.

For a definition of "Hotels", please see Definitions, Section 9.

Table 2-11

For "Note", please refer to "Note", Table 2-10.

Table 2-12

The statistics in this table covers establishments belonging to the 1980 Standard Industrial Classification codes (SIC) 911 — Hotels (including resort hotels).

Notes - suite

Section 2 - suite

Tableau 2-7

Ce tableau renferme des données sur les recettes (1) des restaurants avec permis, (2) des restaurants sans permis, y compris les restauroutes, (3) des établissements servant des mets à emporter, y compris les kiosques de rafraîchissements, (4) des traiteurs et (5) des tavernes, bars et boîtes de nuit. Les restaurants indépendants et à succursales multiples sont compris, tout comme les restaurants exploités en concession.

Sont exclus tous les restaurants faisant partie intégrante d'hôtels, motels et autres établissements d'hébergement, ceux de bases militaires et d'organismes philanthropiques, des institutions (hôpitaux, prisons, etc.) et d'établissements classés dans d'autres secteurs tels que ceux de la fabrication, du commerce de détail, à moins que ces locaux ne soient des concessions exploitées par des intérêts extérieurs.

Tableau 2-8

Voir "Note" du tableau 2-7.

Tableau 2-9

Voir "Note" du tableau 2-7.

Pour obtenir des définitions des "établissements à succursales" et des "établissements indépendants", voir la section "Définitions".

Tableau 2-10

Les statistiques dans ce tableau englobent tous les hôtels au Canada: (1) hôtels autorisés ouverts toute l'année, (2) hôtels non autorisés ouverts toute l'année, (3) hôtels autorisés saisonniers, (4) hôtels non autorisés saisonniers (CAE 911). Pour des statistiques sur les motels, les cabines, les camps de touristes (CAE 911) ou autres modes d'hébergement (CAE 913 et 914), consulter les tableaux 2-12 et 2-13.

Voir la définition des "Hôtels" à la section 9.

Tableau 2-11

Voir "Note" du tableau 2-10.

Tableau 2-12

Les statistiques dans ce tableau englobent tous les établissements appartenant aux catégories 911 — Hôtels (y compris hôtels de villégiature), motels, camps et cabines de touristes,

Notes - Continued

Section 2 - Continued

motels, tourist courts and cabins, 913 — Camping grounds and trailer parks and 914 — Hunting and fishing camps. The three categories include all businesses which provide sleeping facilities in the form of rooms, cabins, cottages and/or tent or trailer spaces for guests. Other services such as the serving of meals, alcoholic beverages and entertainment may or may not be offered.

Table 2-13

For "Note", please refer to "Note", Table 2-12.

The components do not add to totals because provincial revenue distribution is not available for federal campgrounds.

Table 2-14

These statistics do not include foreign mail-order sales to Canadians, direct sales made by Canadian department store mail-order divisions, or direct sales made by wholesalers, vending-machine operators, and service establishments.

Due to the conversion to the 1980 S.I.C., some manufacturers are now classified as retailers and are therefore excluded from this table, also as a result of this conversion some modifications took place in the composition of the kinds of businesses classified to direct selling.

Prior to 1983, "Orthopaedic supplies and artificial limbs as well as Monuments and tombstones" were included in the "All other merchandise" category.

Table 2-15

Book. For the purpose of this table, a book is defined as any non-periodical printed publication bearing a Canadian imprint. Not included are government publications and publications of a passing nature (such as schedules), newspapers, magazines and trade journals.

Publisher. A book publisher is defined as any firm which published or reprinted at least one book during the financial year reported, and which has a minimum of six titles in print and (or), as an exclusive agent, sold titles published by another firm.

Language of the publisher. The language of the publisher has been determined according to the language of the books that produced the largest sales revenue.

Due to reasons of confidentiality, the sales of "other language" firms are included with the sales of the English language firms.

Notes - suite

Section 2 - suite

913 — Terrains de camping et parcs de roulettes et 914 — Camps de chasse et de pêche, de la Classification 1980 des activités économiques (CAÉ). Les trois catégories englobent toutes les entreprises qui offrent un endroit pour dormir, qu'il s'agisse de chambres, de cabines, de chalets ou d'emplacements pour tentes ou roulettes pour les visiteurs. Ces entreprises peuvent ou non servir des repas ou des boissons alcoolisées ou offrir des divertissements.

Tableau 2-13

Voir "Note" du tableau 2-12.

En raison de l'inexistence d'une répartition provinciale des recettes des parcs nationaux, les totaux ne correspondent pas toujours.

Tableau 2-14

Ces statistiques ne prennent pas en compte les ventes par correspondance des entreprises étrangères aux consommateurs canadiens ni celles des grands magasins canadiens; sont aussi exclues les ventes directes des grossistes, des exploitants de distributeurs automatiques et des établissements de services.

Suite à la conversion de la C.A.É. de 1980, quelques manufacturiers sont maintenant classifiés comme détaillants et sont donc exclus de ce tableau, aussi suite à cette conversion certaines modifications ont été apportées à la composition des genres de commerce classifiées dans la vente directe.

Avant 1983, "Appareils orthopédiques et membres artificiels ainsi que Monuments funéraires et pierres tombales" appartenait à la catégorie "Toutes autres marchandises".

Tableau 2-15

Livre. On entend par livre, dans le cadre de cette étude, toute publication imprimée non périodique, reliée ou non, et portant le nom d'un éditeur canadien. Sont exclus les publications du gouvernement et les publications de nature transitoire (par exemple, les horaires), les journaux, les revues et les ouvrages destinés à des fins commerciales.

Éditeur. On entend par éditeur ou maison d'édition toute entreprise qui a édité ou réimprimé au moins un livre au cours de l'année financière observée et qui a au moins six ouvrages à son catalogue et (ou) qui a vendu, à titre de représentant exclusif, les ouvrages édités par une autre entreprise.

Langue de l'éditeur. Il s'agit de la langue des livres dont la vente a rapporté à l'éditeur les recettes les plus élevées.

Pour des raisons de confidentialité, les ventes des entreprises classées dans la catégorie "autres langues" ont été groupées avec celles des entreprises de langue anglaise.

Table 2-16

For further information please contact the Service Trade Section, Services Division, Ottawa.

Table 2-17

Franchising businesses in this sector include automotive supply and parts store, retail outlets of tire manufacturers and services such as transmission shops, car washes, rust proofing and muffler repair shops.

The survey was conducted by Statistics Canada during 1981 and 1982. All information in the study was supplied by franchisors who reported for both their company-owned locations and their franchised operations. No contact was made by Statistics Canada with any franchisees.

Table 2-18

Family restaurants consist of restaurants whose main commodity line is hamburgers, chicken, pizza and submarines and all other restaurants and ice cream parlours. They exclude any liquor licensed restaurants.

The survey was conducted by Statistics Canada during 1981 and 1982. All information in the study was supplied by franchisors who reported for both their company-owned locations and their franchised operations. No contact was made by Statistics Canada with any franchisees.

Table 2-19

The data cover all charities registered with Revenue Canada under section 149 of the Income Tax Act. Included are charitable organizations and foundations founded to assist the poor, handicapped or distraught; to promote the advancement of religion, health or education or for purposes to benefit the community as a whole.

Data collection was designed to utilize the administrative records completed by charitable organizations and submitted to Revenue Canada.

Table 2-20

This table covers bookstores located on the campuses of universities and other post-secondary school educational institutions during the academic year.

Notes - suite

Section 2 - suite

Tableau 2-16

Pour de plus amples renseignements veuillez contacter la Section des services, Division des services, Ottawa.

Tableau 2-17

Ce secteur du système de franchise comprend les magasins de pièces et d'accessoires pour véhicules automobiles, les magasins de détail des fabricants de pneus et les autres services tels que les ateliers de réparation et de remplacement de boîtes de vitesses, les lave-autos, les ateliers d'antirouille et les ateliers de remplacement de silencieux.

L'enquête a été effectuée par Statistique Canada en 1981 et 1982. Tous les renseignements ont été communiqués par les franchiseurs qui ont présenté une déclaration pour les locaux appartenant à leur compagnie et pour les opérations de franchisage. Statistique Canada n'a eu aucun rapport avec les franchisés.

Tableau 2-18

Restaurants familiaux comprennent les restaurants dont la spécialité est le hambourgeois, le poulet, la pizza et les sous-marins et tous les autres restaurants et comptoirs de crème glacée. Les restaurants avec permis sont exclus.

L'enquête a été effectuée par Statistique Canada en 1981 et 1982. Tous les renseignements ont été communiqués par les franchiseurs qui ont présenté une déclaration pour les locaux appartenant à leur compagnie et pour les opérations de franchisage. Statistique Canada n'a eu aucun rapport avec les franchisés.

Tableau 2-19

Les données portent sur tous les organismes de charité enregistrés auprès de Revenu Canada en vertu de l'article 149 de la Loi de l'impôt sur le revenu. Les données visaient les organismes de charité et les fondations créées afin d'aider les pauvres, les handicapés ou les indigents, afin de promouvoir l'avancement de la religion et l'amélioration de la santé ou de l'éducation ou de profiter à l'ensemble de la collectivité.

La collecte des données a été conçue de manière à permettre d'utiliser les documents administratifs remplis par les organismes de charité et envoyés à Revenu Canada.

Tableau 2-20

Ce tableau présente des données sur les librairies dans les campus des universités et d'autres établissements d'enseignement postsecondaire au cours de l'année scolaire.

Notes - Continued

Section 2 - Continued

Table 2-21

Excluded are products vended such as gasoline and newspapers, as well as "services" vended such as music, amusements, laundry and dry cleaning, photographs, photocopies, shoe shines, etc.

Table 2-22

For "Note", please refer to "Note", Table 2-21.

Table 2-23

For "Note", please refer to "Note", Table 2-21.

Statistics for the Yukon and Northwest Territories are included with British Columbia.

Table 2-24

The statistics refer to the sale of Canadian and imported alcoholic beverages in the fiscal year ended March 31, 1983 by: (1) liquor authorities to the final consumer and to holders of licenses to resell; (2) wineries and breweries to the holders of licenses to resell and (3) wineries' and brewers' retail outlets.

The total sales include discounts and rebates but exclude provincial retail sales taxes.

Value figures do not represent the final retail selling price of alcoholic beverages, as mark-ups by licensees are not included. Volume of sales is a more realistic indicator of trends in consumption. However, as a measure of personal consumption by Canadians even the volume figures are subject to limitations as they reflect the volume of sales to the holders of licenses to resell rather than the actual number of litres sold by those licensees and also include sales to non-residents.

Table 2-25

The statistics in this table were obtained from all Canadian and American motor vehicle manufacturers and importers of foreign-manufactured motor vehicles known to be active in Canada as opposed to the dealers themselves.

The value of sales are reported by respondents at selling price to consumer i.e. the manufacturer's invoice price plus estimated dealer's mark-up, charges for standard equipment and options, less provincial sales tax.

Notes - suite

Section 2 - suite

Tableau 2-21

Sont exclus les produits comme l'essence et les journaux de même que les "services", tels que, les boîtes à musique, les jeux, les machines à laver, les machines à nettoyage à sec, les appareils photos automatiques, les photocopieurs, les machines à cirer les chaussures, etc.

Tableau 2-22

Voir "Note" du tableau 2-21.

Tableau 2-23

Voir "Note" du tableau 2-21.

Les statistiques du Yukon et des Territoires du Nord-Ouest sont comprises dans celles de la Colombie-Britannique.

Tableau 2-24

Les statistiques portent sur la vente de boissons alcooliques canadiennes et importées au cours de l'année financière terminée le 31 mars 1983 par: (1) les régies des alcools au consommateur final et aux détenteurs de licence de revente; (2) les entreprises vinicoles et les brasseries aux détenteurs de licence de revente et (3) les points de vente au détail des entreprises vinicoles et des brasseries.

Le total des ventes comprend les rabais et remises mais non les taxes provinciales de vente au détail.

La valeur ne représente pas le prix de vente au détail final des boissons alcooliques, car le bénéfice brut des détenteurs de licence n'est pas pris en compte. Le volume des ventes est un indicateur plus réaliste des tendances de la consommation. Toutefois, pour mesurer la consommation individuelle des Canadiens, même les chiffres relatifs au volume sont limitatifs car ils représentent le volume des ventes aux détenteurs de licence de revente plutôt que le nombre réel de litres vendus par ceux-ci, et ils comprennent également les ventes aux non-résidents.

Tableau 2-25

Les statistiques de ce tableau proviennent des fabricants d'automobiles canadiens ou américains ainsi que des importateurs de véhicules automobiles de fabrication étrangère exerçant leurs activités sur le territoire canadien, et non pas auprès des détaillants eux-mêmes.

Les montants des ventes déclarés par les répondants comprennent le prix de vente au consommateur c.-à-d., le montant de la facture du manufacturier augmenté de la marge bénéficiaire et doivent aussi inclure le coût des accessoires de série et facultatifs tout en omettant la taxe de vente provinciale.

Notes - Continued

Section 2 - Continued

Statistics for the Yukon and Northwest Territories are included with British Columbia.

Table 2-26

For "Note", please refer to "Note", Table 2-25.

New motor vehicles fall into two categories defined on the basis of origin: those manufactured in North America and those manufactured overseas. The latter are imported in a fully assembled state from countries other than the United States (i.e. from Japan or European countries). All passenger cars and commercial vehicles assembled in Canada and the United States and sold in Canada are treated by Statistics Canada as domestically manufactured vehicles.

Table 2-27

For "Note", please refer to "Note", Table 2-26.

Table 2-28

The term "net sales" refers to those sales of fuel on which taxes were remitted at road-use rates. These net figures reported by the provinces and territories represent, with minor exceptions, the amount of taxable fuel actually consumed on public roads and streets in Canada.

Table 2-29

For "Note", please refer to "Note", Table 2-28.

Table 2-30

Only sales of actual department store locations are included in this table. It does not include sales data of other kinds of businesses which may be operated by department stores organizations. These ancillary businesses such as general stores, appliances stores, etc., have been classified to the kind of business category that is most appropriate in view of their respective commodity mixes. The mail-order and catalogue sales offices of department stores are included with general merchandise stores. Sales of concessions are generally included in the total business of department stores in which they are located.

Table 2-31

For "Note", please refer to "Note", Table 2-30.

Notes - suite

Section 2 - suite

Les statistiques du Yukon et des Territoires du Nord-Ouest sont comprises avec celles de la Colombie-Britannique.

Tableau 2-26

Voir "Note" du tableau 2-25.

L'origine des véhicules automobiles neufs nous permet de distinguer entre les véhicules fabriqués en Amérique du Nord et ceux fabriqués outre-mer. Ces derniers sont importés assemblés (tels quels) d'autres pays que les États-Unis, soit du Japon ou des pays d'Europe, puisque Statistique Canada traite comme des véhicules de fabrication domestique les voitures particulières et les véhicules utilitaires montés au Canada et aux États-Unis et vendus au Canada.

Tableau 2-27

Voir "Note" du tableau 2-26.

Tableau 2-28

L'expression "ventes nettes" désigne les ventes de carburant dont la taxe a été acquittée selon le tarif routier de consommation. Ces chiffres déclarés par les provinces et les territoires sont censés représenter, à quelques exceptions près, la quantité réelle de carburant taxable consommé dans les rues et sur les routes du Canada.

Tableau 2-29

Voir "Note" du tableau 2-28.

Tableau 2-30

Seules les ventes des grands magasins figurent dans ce tableau. Ne sont pas comptées les ventes des autres genres de commerce qui peuvent être exploités par les grands magasins. Ces établissements auxiliaires, tels que les magasins généraux, les magasins d'appareils ménagers, etc., ont été assimilés au genre de commerce le plus approprié d'après la composition des marchandises vendues. Les comptoirs de vente par correspondance et par catalogue des grands magasins sont compris dans les magasins de marchandises diverses. Les ventes de concessions sont généralement prises en compte dans l'activité commerciale globale des grands magasins là où elles ont lieu.

Tableau 2-31

Voir "Note" du tableau 2-30.

Section 2 - Continued

Table 2-32

The percentage distribution is based on data shown in Table 2-31.

Table 2-33

The data contained in this table are based on a sample of over 16,000 independent firms. A Revenue Canada (Taxation) list supplemented by chain and department store lists (master file list) and an area file list, comprise the universe. The sample, stratified by geographical regions and by the Standard Industrial Classification code has been selected from this universe and surveyed in order to verify the kind of business of each firm. Estimates are then produced monthly, stratified by trade group and geographical region.

The retail trade estimates, in addition to being stratified by kind-of-business groupings, are also broken down into chain and independent components. Firms are classified to the chain store component based on the following definition:

Chain store organization "an organization operating four or more retail outlets in the same kind of business, under the same legal ownership".

Any firm not meeting the above definition is automatically classified as an "independent" organization, the only exception being "department stores" which are classified in their entirety to the chain component.

The chain and department store list is a sub-set of the survey master file component. The businesses on this list are those which have been identified (from Statistics Canada sources) as chains or department stores and which have been sampled with certainty (i.e., each business is surveyed). This component, as well as being updated monthly using Revenue Canada information, is also updated annually. The annual updates are based primarily on returns obtained in the course of the Annual Chain and Department Store Survey, as well as on information derived from other sources such as trade magazines, etc.

The method used for the estimation of total retail sales is one in which each sampled unit's reported data is inflated to universe levels by multiplying the reported data of the sampled unit by the inverse of the probability of selection for the unit. For firms, which do not respond on time in a particular month, an estimate is imputed. Late responses are included in revised estimates.

Notes - suite

Section 2 - suite

Tableau 2-32

La répartition en pourcentage est fondée sur les données présentées au tableau 2-31.

Tableau 2-33

Les données comprises dans ce tableau ont été obtenues à partir d'un échantillon de plus de 16,000 entreprises indépendantes. L'univers se compose d'une liste de Revenu Canada (Impôt) à laquelle on a ajouté des listes de magasins à succursales et de grands magasins (une liste de fichier principal) ainsi qu'une liste de fichier aérolaire. L'enquête stratifiée par région et selon le schéma de codage de la classification des activités économiques a été prélevée sur cet univers et a fait l'objet d'une enquête en vue de déterminer le genre d'activité de chaque entreprise. Des estimations sont ensuite établies tous les mois et stratifiées selon le groupe de commerce et la région.

En plus d'être stratifiées selon le genre de commerce, les estimations relatives au commerce de détail sont ventilées entre magasins à succursales et magasins indépendants. Les entreprises qui répondent à la définition suivante sont classées dans la catégorie des magasins à succursales:

Magasins à succursales "entreprise exploitant au moins quatre points de vente au détail dans un même genre de commerce, sous une même appartenance juridique".

Toute entreprise dont le schéma de structure ne concorde pas avec la définition ci-dessus est classée automatiquement dans la catégorie des magasins indépendants, la seule exception étant les "grands magasins" qui sont portés en totalité dans la catégorie des magasins à succursales.

La liste des magasins à succursales et des grands magasins constitue un sous-ensemble de l'élément fichier principal de l'enquête. Les établissements commerciaux figurant sur cette liste sont ceux qui ont été identifiés (d'après les documents de Statistique Canada) comme magasins à succursales et grands magasins et qui ont été échantillonnés avec certitude (chaque entreprise fait partie de l'échantillon). Cet élément, qui est mis à jour tous les mois d'après les données de Revenu Canada, fait également l'objet d'une mise à jour annuelle. Ces dernières mises à jour sont fondées principalement sur les déclarations obtenues dans le cadre de l'enquête annuelle sur les magasins à succursales et les grands magasins, ainsi que sur des renseignements puisés à d'autres sources comme les revues portant sur le commerce, etc.

La méthode d'estimation des ventes totales au détail consiste à gonfler les données déclarées par chaque unité échantillonnée aux dimensions de l'univers en multipliant les données de l'unité par l'inverse de la probabilité de sélection de l'unité. Dans le cas des entreprises non déclarantes à temps, on procède à une imputation. Les déclarations tardives sont toujours considérées dans le calcul des estimations révisées.

Table 2-42

Apparent per capita food consumption estimates are calculated by dividing food net by the population estimate at July 1.

All data are reported in kilograms with the exception of evaporated milk, ice cream and fluid milk and cream, which are reported in litres. Unless otherwise specified, all data are in retail weight equivalent.

For further information, please refer to source document.

Table 2-43

This table was prepared on the basis of adjustments made to definitions of kinds of business categories which took place during this time period in order to achieve comparability. The reader is cautioned however, that the data shown are not necessarily comparable to data published in the various Statistics Canada publications. The 1971 kind of business definitions in the Standard Industrial Classification were used as the basis for these adjustments.

A straight line projection was applied to the 1971 data due to the lack of specific information at the kind of business level.

Definitions of kinds of business are shown in "Retail Trade, monthly, Catalogue 63-005".

Table 2-44

Today's so-called convenience store is basically the old corner grocery store which has been repackaged to resemble a "midget" supermarket. It possesses many of the characteristics of chain operated locations.

Convenience stores belong to the "grocery stores" kind of business Classification (see, Standard Industrial Classification Manual, Catalogue 12-501E for definition).

Table includes those outlets only opened for part of a year and locations of firms which did not report square foot/metre data.

This table has been prepared from Unpublished Worksheets, prepared by Distributional Analysis Section, Industry Division, Statistics Canada.

Notes - suite

Section 2 - suite

Tableau 2-42

On calcule les estimations de la consommation apparente des aliments par personne en divisant la quantité nette d'aliments par le nombre estimatif d'habitants au 1er juillet.

Toutes les données sont en kilogrammes, à l'exception du lait concentré, de la crème glacée et du lait de consommation qui sont en litres. À moins d'avis contraire, les données sont fournies en poids au détail.

Pour de plus amples renseignements, veuillez consulter le document de référence.

Tableau 2-43

Ce tableau a été préparé selon les ajustements apportés, à des fins de comparabilité, aux définitions des catégories de genres de commerces au cours de la période. On avise toutefois le lecteur que les données présentées ne sont pas nécessairement comparables à celles figurant dans les diverses publications de Statistique Canada. Les définitions des genres de commerces se trouvant dans la Classification des activités économiques de 1971 ont servi à effectuer ces ajustements.

Une extrapolation linéaire a été appliquée aux données de 1971, en raison du manque de données précises au niveau des genres de commerces.

Les définitions des genres de commerces peuvent être consultées dans la publication mensuelle "Commerce de détail", no 63-005 du catalogue.

Tableau 2-44

L'établissement que l'on appelle de nos jours "épicerie de dépanage" est fondamentalement l'ancienne épicerie du coin, que l'on a réorganisée pour qu'elle ressemble à un mini-supermarché. On peut lui attribuer bon nombre des caractéristiques inhérentes aux magasins à succursales.

Les épiceries de dépanage font partie des "épiceries", pour ce qui est de la classification des genres de commerces (voir le manuel de la Classification type des industries, no 12-501F du catalogue, pour en obtenir la définition).

Le tableau n'englobe pas les magasins exploités une partie de l'année seulement, ni ceux appartenant à des firmes qui n'ont pas déclaré de chiffres sur la surface de vente.

Ce tableau a été préparé à l'aide de feuilles de travail inédites préparées par la Section de l'analyse de la distribution, Division de l'industrie, Statistique Canada.

Table 2-45

For a detailed definition of a "grocery store", see Retail Trade Historical Statistics, 1972-1979, Catalogue 63-538.

Table 2-46

For a detailed definition of a "combination store", see Retail Trade Historical Statistics, 1972-1979, Catalogue 63-538.

Table 2-47

This table presents some of the results of the annual survey of all known chain organizations operating in Canada. The survey was designed primarily to collect and measure data on total retail sales made by chain organizations through retail outlets, as well as other related data such as floor area, inventory, accounts receivable, payroll, etc.

When making comparisons between the sales data published in this table and the data published in the monthly Retail Trade series, one must take into account the differences in the reporting periods, e.g., the annual survey collects and compiles data on a financial year basis (which does not always coincide with the calendar year) while the monthly data are published on a calendar year basis (see Tables 2-33 to 2-39).

Franchised stores and voluntary group stores (defined as independently owned stores affiliated with sponsoring or sponsored wholesalers for buying, advertising and other related merchandising activities) are not included unless they have also met all the conditions of the chain definition.

Number of stores. The average number of stores is obtained by averaging the numbers in operation at the beginning, the mid-point and at the end of the financial year of chain organizations. The **maximum** is the total number of stores operated during the year, regardless of whether they were operated all or part of the year.

This table does not include department stores.

Tableau 2-46

Pour la définition complète d'une "épicerie-boucherie", consulter la publication Commerce de détail statistiques historiques, 1972-1979, no 63-538 du catalogue.

Tableau 2-47

Ce tableau représente quelques résultats de l'enquête annuelle menée auprès de toutes les entreprises à succursales, en exploitation au Canada et dont on connaît l'existence. L'enquête avait pour but principal de recueillir et de mesurer les données sur toutes les ventes au détail faites par les entreprises à succursales dans leurs points de vente, ainsi que d'autres données connexes comme la superficie, les stocks, les créances, les salaires, etc.

En comparant les données sur les ventes publiées dans ce tableau avec celles publiées dans les séries mensuelles du Commerce de détail, on doit tenir compte des différences entre les périodes sur lesquelles portent ces données; ainsi l'enquête annuelle recueille des données portant sur un exercice financier (qui ne coïncide pas toujours avec l'année civile), alors que les données mensuelles sont publiées selon le calendrier de l'année civile (voir les tableaux 2-33 à 2-39).

Les magasins des concessions et des groupements volontaires (définis comme magasins appartenant à des propriétaires indépendants, qui se sont associés avec des grossistes afin de mener à bien les achats, la publicité et les autres activités commerciales connexes, conjointement avec les détaillants ou les grossistes); ces magasins ne sont pas inclus, à moins qu'ils ne répondent également à toutes les autres conditions mentionnées dans la définition d'un magasin à succursales.

Nombre de magasins. Pour obtenir le nombre moyen de magasins, on fait la moyenne des magasins en exploitation au début, au milieu et à la fin de l'exercice financier des entreprises de magasins à succursales. Le **maximum** est le nombre total des magasins en exploitation durant l'année, qu'ils aient été exploités pendant toute l'année ou une partie de l'année seulement.

Ce tableau ne comprend pas les grands magasins.

Tableaux 2-48 à 2-52

Voir "Note" du tableau 2-47.

Notes - Continued

Section 2 - Continued

Table 2-53

Excludes those outlets only open for parts of a year and locations of firms which did not report floor area data.

Table 2-54

"All other stores" includes florist shops; lawn and garden centres; hardware stores; paint, glass and wallpaper stores; musical instrument stores; camera and photographic supply stores; second-hand merchandise stores; art galleries and artists' supply stores; monument and tombstone dealers, pet stores; and other retail stores not elsewhere classified.

Table 2-55

The data published in this table are in the main derived from corporation income tax returns submitted to Revenue Canada, Taxation.

Income tax returns relate to the corporations' fiscal period, rather than to the calendar year. Consequently, the data in the table do not cover precisely the calendar year but rather the corporation's fiscal periods which could have ended at any time during the year. Thus, data for corporations whose fiscal periods do not coincide with the calendar year, include data applicable to the prior calendar year.

Table 2-56

For "Note", please refer to "Note", Table 2-55.

Table 2-57

For "Note", please refer to "Note", Table 2-55.

Table 2-58

The 1982 and 1983 estimates were produced by means of a census survey of all agents and brokers and of large and medium-size wholesale merchant establishments, supplemented with information from administrative records for small businesses. This is a departure from previous surveys where all known wholesale businesses — merchants and agents and brokers — were subject to survey. The survey-administrative records program is designed to yield annually some of the data that were previously provided by the quinquennial Census of Merchandising and Services.

Notes - suite

Section 2 - suite

Tableau 2-53

N'englobe pas les magasins exploités une partie de l'année seulement, ni ceux appartenant à des firmes qui n'ont pas déclaré de chiffres sur la superficie.

Tableau 2-54

"Tous les autres magasins" comprennent les fleuristes; les centres de jardinage; les quincailleries; les magasins de peinture, de vitre et de papier peint; les magasins d'instruments de musique; les magasins d'appareils et de fournitures photographiques; les magasins de marchandises d'occasion; les galeries d'art et magasins de fournitures pour artistes; les magasins de monuments funéraires et de pierres tombales, les magasins d'animaux de maison; et les autres magasins de vente au détail non classés ailleurs.

Tableau 2-55

La plupart des données de ce tableau sont tirées des déclarations d'impôt sur le revenu des sociétés présentées à Revenu Canada, Impôt.

Les déclarations d'impôt sur le revenu portent sur l'exercice financier des sociétés plutôt que sur l'année civile. En conséquence, les données de ce tableau ne couvrent pas exactement l'année civile, mais plutôt l'exercice financier des sociétés, lequel pouvait se terminer à n'importe quel moment de l'année. Ainsi, les données des sociétés dont l'exercice financier ne coïncidait pas avec l'année civile comprenaient des revenus gagnés pendant l'année civile précédente.

Tableau 2-56

Voir "Note" du tableau 2-55.

Tableau 2-57

Voir "Note" du tableau 2-55.

Tableau 2-58

Les estimations de 1982 et de 1983 ont été produites au moyen d'un recensement de tous les agents et courtiers et des établissements de marchands de gros de grande taille et de taille moyenne, auxquels on a ajouté des renseignements provenant des dossiers administratifs des petites entreprises. Ceci diffère des enquêtes précédentes où toutes les entreprises de gros connues — marchands et agents et courtiers — faisaient l'objet de l'enquête. Le programme d'utilisation conjointe des données d'enquête et des dossiers administratifs vise à produire chaque année des données que l'on tirait auparavant d'un recensement quinquennal du commerce et des services.

Notes - Continued

Section 2 - Continued

Questionnaires were mailed to all single location businesses which reported revenues of \$1 million or greater and to all multi-location and multi-establishment merchants, and all agents and brokers (except for oil agents), irrespective of their revenue size.

Data for small wholesale merchant establishments have been, with some exceptions, obtained from administrative records of Revenue Canada, as permitted by the Statistics Act. These data are strictly confidential as regards particulars relating to specific individuals or businesses and are used only by Statistics Canada to produce aggregations or summary calculations.

The classification of these data are only possible at the three-digit level of the 1970 Standard Industrial Classification.

Table 2-59

For "Note", please refer to "Note", Table 2-58.

Table 2-60

All of the data contained in this table were derived directly from Revenue Canada Taxation records rather than by direct contact with the firms.

The results are based on a panel of firms coded to a Standard Industrial Classification 1970 (SIC) on the basis of information contained on the tax file. Each SIC is composed of a variety of similar kinds of business, therefore, the ratios may not be completely typical of any specific kind of business. (For example, the SIC 665 "Men's Clothing Stores" includes such businesses as men's furnishings stores and custom tailoring shops as well as the typical men's clothing stores.)

Since the "mean" and "median" for each operating ratio were derived independently of any other ratio, the items within each sales size may not necessarily add to the gross margin or net profit shown within that cell. In other words, none of the data in total in any of the cells represents a "real" firm; rather, they represent a firm that would exist if every item in its profit and loss statement happened to be average in terms of the "mean" or "median".

Table 2-61

For "Note", please refer to "Note", Table 2-60.

Notes - suite

Section 2 - suite

Des questionnaires ont été postés à toutes les entreprises exploitant qu'un seul local d'affaires et ayant déclaré des recettes de \$1 million ou plus, à tous les marchands de gros, ayant plusieurs établissements et/ou plusieurs locaux d'affaires et à tous les agents et courtiers (à l'exception des agents pétroliers) quelle que fût la taille de leur revenu.

Les données pour les petits établissements de grossistes ont été, à quelques exceptions près, extraites des dossiers administratifs de Revenu Canada, comme le prévoit la Loi sur la statistique. Ces données sont strictement confidentielles en ce qui concerne des renseignements précis sur des individus ou des entreprises spécifiques, et ne sont utilisées par Statistique Canada que pour produire des agrégats ou des totalisations.

La classification de ces données n'est possible qu'au niveau de trois chiffres de la Classification des activités économiques de 1970.

Tableau 2-59

Voir "Note" du tableau 2-58.

Tableau 2-60

Toutes les données contenues dans ce tableau ont été tirées directement des dossiers fiscaux de Revenu Canada, sans contact avec les entreprises.

Les résultats sont fondés sur un échantillon de firmes codées à la Classification des activités économiques 1970 (CAE) sur une base d'informations contenues dans les déclarations fiscales. Chaque CAE est composée d'une variété de genre de commerce analogue, par conséquent les ratios ne sont pas propre aux genres de commerce spécifique. Exemple, le CAE 665 pour magasins de "vêtements pour hommes" comprend aussi les articles d'habillement pour hommes et les vêtements faits sur mesure aussi bien que le genre de commerce spécifique "Magasins de vêtements pour hommes".

Comme la "moyenne" et la "médiane" de chaque ratio d'exploitation ont été calculées indépendamment de tout autre ratio, la somme des postes pour chaque chiffre de ventes ne correspond pas nécessairement à la marge bénéficiaire brute ou au bénéfice net indiqués dans cette case. Autrement dit, aucune de ces données globales dans toutes les cases ne représente une "vraie" entreprise; ces données caractérisent plutôt une entreprise qui existerait si chaque poste de son état des profits et pertes constituait la "moyenne" ou la "médiane".

NOTES

Section 3

Table 3-1

"Estimated population" and "population according to the census" are both defined as being: the total number of persons whose usual place of residence was somewhere in Canada, including Canadian government employees stationed abroad and their families, members of Canadian Armed Forces stationed abroad and their families and crews of Canadian merchant vessels. Not included are government representatives of other countries and their families, attached to the legation, embassy, or other diplomatic body of that country, members of the Armed Forces of other countries stationed in Canada and members of their families who are not citizens of Canada, students attending school in Canada whose usual residence is outside Canada and residents of another country visiting Canada temporarily.

Estimates for non-census years were obtained by adding births and number of immigrants and deducting deaths and an estimate of emigrants from the census population count.

Population estimates are obtained by the component method, which reconstructs the evolution of the total population from the events resulting in population change that occurred between the date of the last census and the estimation date. Five components are responsible for changes in the size of a province's population: birth, deaths, (international migration, immigration and emigration), and interprovincial migration. To obtain the population estimate for a given date, these changes in the population must therefore be added to the population enumerated in the last census.

For further information, please refer to source document.

Table 3-2

Number of completed years of age as of June 1.

See also "Note", Table 3-1.

Table 3-3

The 1976 and 1981 statistics are based on the Urban-rural criteria as defined for the 1981 Census.

Table 3-4

Comparability of these 1981 mother tongue data presented with their 1976 counterparts is marginally affected by the redistribution of "Not Stated" among the various language groups in 1981. This redistribution was not done in 1976.

NOTES

Section 3

Tableau 3-1

La population estimée répond à la même définition que celle dénombrée lors du recensement. Il s'agit donc du nombre total de personnes dont le lieu de résidence habituelle, était quelque part au Canada, y compris les employés du gouvernement canadien postés à l'étranger et leur famille, les membres des Forces armées canadiennes stationnés à l'étranger et leur famille et les équipages des navires marchands canadiens. Ne sont pas compris les représentants officiels des autres pays et leur famille, attachés à légation, à l'ambassade ou à un autre organisme diplomatique de ces pays, les membres de Forces armées étrangères stationnés au Canada et les membres de leur famille qui ne sont pas citoyens du Canada, les étudiants qui fréquentent l'école au Canada mais dont la résidence habituelle est en dehors du Canada et les résidents d'autres pays en visite temporaire au Canada.

Les estimations pour les autres années que les années de recensement ont été obtenues en additionnant le nombre de naissances et le nombre d'immigrants et en soustrayant le nombre de décès et une estimation du nombre d'émigrants des chiffres de la population.

Les estimations de la population sont obtenues par la méthode des composantes qui reproduit l'évolution des effectifs de la population en tenant compte des événements perturbateurs survenus entre la date du dernier recensement et celle de l'estimation. Cinq composantes sont responsables du mouvement de la population d'une province. Ce sont: les naissances, les décès, la migration internationale (immigration et émigration) et la migration interprovinciale. Pour obtenir l'estimation de la population à une date donnée, il nous faut donc ajouter ce mouvement de la population à la population dénombrée lors du dernier recensement.

Pour de plus amples renseignements, veuillez consulter le document de référence.

Tableau 3-2

L'âge atteint au 1er juin et exprimé en années révolues.

Voir aussi la "Note" du tableau 3-1.

Tableau 3-3

Les statistiques de 1976 et 1981 sont fondées sur le critère "urbain-rural" comme défini par le recensement de 1981.

Tableau 3-4

La redistribution des chiffres liés à la rubrique "Non déclaré" entre les divers groupes de langues en 1981 influe légèrement sur la comparabilité des données de 1981 sur la langue maternelle avec celles de 1976. Cette redistribution n'a pas été effectuée en 1976.

Notes - Continued

Section 3 - Continued

Although the intent of the question has not changed since 1941 (i.e., the identification of the language first learned as a young child), the wording of the question itself has not been completely uniform. The most recent of these changes is from the 1971/76 wording of "language first spoken and still understood" to the 1981 wording "language first learned and still understood". This change was introduced so the question would conform to the definition of mother tongue given in the Official Languages Act, 1968-69.

The figures shown in this table have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions.

Table 3-5

Ethnic origin refers to the ethnic or cultural group to which the respondent or the respondent's ancestors belonged on first coming to this continent. It should be noted that in earlier censuses, only the respondent's paternal ancestry was to be reported, theoretically resulting in one ethnic origin per respondent. For 1981, this restriction has been removed and a person may now report more than one ethnic origin. The distinction between single and multiple responses is maintained in these data, but not all available multiple ethnic origins have been published.

Notes - suite

Section 3 - suite

Bien que l'objet de cette question n'ait pas changé depuis 1941 (c'est-à-dire connaître la première langue apprise par les recensés), la formulation n'a pas toujours été la même. En 1971 et 1976, on demandait aux recensés d'indiquer la première langue parlée et encore comprise tandis qu'en 1981, on leur demandait d'inscrire la première langue apprise et encore comprise. Cette modification a été apportée afin que la question du recensement corresponde à la définition de langue maternelle dans la Loi sur les langues officielles de 1968-69.

Par souci de confidentialité, les chiffres présentés ici ont été soumis à une formule appelée "arrondissement aléatoire" qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) à un multiple de "5". Cette technique assure une bonne protection contre la divulgation directe, négative ou par recouplements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions.

Tableau 3-5

Origine ethnique comprend le groupe ethnique ou culturel auquel appartenait le recensé ou ses ancêtres à leur première arrivée sur ce continent. Il convient de souligner que, dans les recensements précédents, les recensés devaient déclarer uniquement les antécédents ethniques ou culturels du côté paternel. Ainsi, une seule origine ethnique était indiquée pour chaque recensé. En 1981, cette précision a été supprimée; par conséquent, un recensé peut indiquer plus d'une origine ethnique. Les données sur les recensés qui ont plusieurs origines ethniques n'ont pas toutes été publiées.

Section 3 - Continued

Table 3-9

The statistics in this table exclude the Yukon and Northwest Territories, for the year 1971.

In 1976 and 1981, the Yukon and Northwest Territories were included with British Columbia.

The statistics exclude families in collective households and households outside of Canada.

Table 3-10

Due to improvements in the method of determining Census Family Type implemented for the 1981 Census (see "Definition" section), caution should be used in comparing the distribution of primary and secondary families with data from previous censuses. For example, census families in private households where the person responsible for household payments is residing elsewhere are automatically classified as secondary families in 1981. In previous censuses, first, the identification of these cases was not possible and second, some of these families were classified as primary families.

Further explanation of these changes is included in the *Summary Guide - Total Population*, Catalogue 99-902.

For "Note" on "Confidentiality", please refer to "Note", Table 3-4.

Table 3-11

Rates are per 1,000 persons.

Census year: from June 1, 1981 to May 31, 1982.

The total fertility rate represents the number of children born to 1,000 women during their child bearing years.

Table 3-12

The source of vital statistics data in Canada is the universal system of registration of births, marriages, deaths and stillbirths. These are recorded and accumulated by registrars of vital statistics in each province and territory. Under existing Federal-Provincial agreements, microfilm copies of registration documents on births, marriages, deaths and stillbirths are made available to Statistics Canada by the provincial and territorial offices for compilation of aggregate national statistics.

Notes - suite

Section 3 - suite

Tableau 3-9

Les statistiques dans ce tableau excluent le Yukon et les Territoires du Nord-Ouest pour l'année 1971.

En 1976 et 1981, le Yukon et les Territoires du Nord-Ouest étaient compris en Colombie-Britannique.

Les statistiques ne comprennent pas les familles dans les ménages collectifs et les ménages à l'extérieur du Canada.

Tableau 3-10

Comme la façon de déterminer le genre de famille de recensement a été améliorée lors du recensement de 1981 (voir la section "Définitions"), nous conseillons aux utilisateurs d'être prudents lorsqu'ils compareraient les données sur la répartition des familles principales et des familles secondaires à celles des recensements antérieurs. Par exemple, sont automatiquement classées comme familles secondaires en 1981 les familles de recensement dans les ménages privés où la personne responsable des paiements du ménage habite ailleurs. Aux recensements précédents, premièrement, il n'était pas possible d'identifier ces cas et deuxièmement, certaines de ces familles étaient classées comme familles principales.

On trouvera de plus amples renseignements dans le *Guide sommaire - Population totale*, n° 99-902 du catalogue.

Voir "Note" sur la "Confidentialité", du tableau 3-4.

Tableau 3-11

Taux sont pour 1,000 personnes.

Année censitaire: du 1^{er} juin 1981 au 31 mai 1982.

L'indice synthétique est exprimé en nombre d'enfants nés de 1,000 femmes au cours de leur vie féconde.

Tableau 3-12

Au Canada, le système universel d'enregistrement des naissances, des mariages, des décès et des mortinnaissances est la principale source des données sur l'état civil, qui sont enregistrées et conservées par les registraires de la statistique de l'état civil des provinces et des territoires. En vertu des ententes fédérales-provinciales existantes, les microfilms des documents d'enregistrement des naissances, des mariages, des décès et des mortinnaissances sont mis à la disposition de Statistique Canada par les bureaux provinciaux et territoriaux et le Bureau se charge de compiler les données nationales sur l'état civil.

Notes - Continued

Section 3 - Continued

Table 3-13

Births and deaths have been classified by area of reported residence and marriages by the place in which the event was solemnized. Except for marriages they include events occurring in the United States to Canadian residents and exclude events occurring in Canada to United States residents.

Table 3-14

The statistics are based on interviews carried out in approximately 56,000 households chosen by area sampling methods across the country. The sample represents all persons in the population 15 years of age and over residing in Canada with the exception of: (1) residents of the Yukon and Northwest Territories, (2) persons living on Indian reserves, (3) inmates of institutions and (4) full-time members of the Armed Forces.

Table 3-15

Labour force, refers to the population 15 years of age and over, excluding inmates, who were either employed or unemployed during the week prior to enumeration (June 3, 1981).

Occupation (Based on 1980 Classification), refers to the kind of work persons 15 years of age and over, excluding inmates, were doing during the reference week, as determined by their reporting of their kind of work and the description of the most important duties in their job. If the person did not have a job during the week prior to enumeration, the data relate to the job of longest duration since January 1, 1980. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

For further information on the classification, see *Standard Occupational Classification, 1980*, Catalogue no. 12-565E.

Table 3-16

For "Note", please refer to "Note", Table 3-14.

Table 3-17

Effective with the April 1983 reference month, the new estimates are obtained from the revised monthly Survey of Employment, Payrolls and Hours.

The estimates in this table are based on a 12 month period for 1984, whereas for 1983 they are based on a 10 month period.

Notes - suite

Section 3 - suite

Tableau 3-13

Les naissances et les décès ont été classés en fonction de la région de résidence déclarée et les mariages en fonction du lieu où ils ont été célébrés. À l'exception des mariages, les données englobent des événements qui ont eu lieu aux États-Unis, touchant des résidents canadiens mais ne prennent pas en compte ceux qui ont eu lieu au Canada et qui touchent des résidents américains.

Tableau 3-14

La statistique publiée ici est fondée sur une enquête menée auprès d'environ 56,000 ménages choisis par échantillon aréolaire dans tout le pays. L'échantillon représente toutes les personnes de 15 ans et plus résidant au Canada, à l'exception: (1) des résidents du Yukon et des territoires du Nord-Ouest, (2) des personnes vivant dans des réserves indiennes, (3) des pensionnaires d'institutions et (4) des membres à plein temps des Forces armées.

Tableau 3-15

Population active, comprend les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution, qui étaient soit occupées soit en chômage pendant la semaine précédant le recensement (le 3 juin 1981).

Profession (d'après la classification de 1980), genre de travail que faisaient, pendant la semaine de référence, les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution. Le genre de travail exécuté est défini à partir du type d'emploi déclaré par le recensé et de la description des tâches les plus importantes qui s'y rattachent. Si le recensé n'avait pas d'emploi au cours de la semaine précédant le recensement, les données portent sur l'emploi qu'il a occupé le plus longtemps depuis le 1er janvier 1980. Les personnes qui avaient deux emplois ou plus devaient donner des renseignements sur l'emploi auquel elles avaient consacré le plus d'heures de travail.

Pour plus de renseignements, voir la *Classification type des professions, 1980*, n° 12-565F du catalogue.

Tableau 3-16

Voir "Note" du tableau 3-14.

Tableau 3-17

Depuis le mois de référence avril 1983, les nouvelles estimations proviennent de l'enquête mensuelle révisée sur l'emploi, la rémunération et les heures de travail.

Les estimations dans ce tableau sont basées sur une période de 12 mois pour 1984, tandis que pour 1983 elles sont basées sur une période de 10 mois.

Notes - Continued

Section 3 - Continued

It includes firms of all sizes;

It covers all industries except agriculture, fishing and trapping, household services, religious organizations, and the military personnel;

It makes use of census and sampling methodologies with a part of the sample rotating each month;

It uses the 1970 version of the Standard Industrial Classification and the 1981 version of the Standard Geographical Classification;

The new survey has been designed to produce reliable estimates at the broad industry division levels for provinces, and at the "3-digit" industry level for Canada.

More detailed information is given in "Note to Users" in the source document.

Table 3-18

The government statistical universe is comprised of:

1. General governments:
 - (a) departments of government;
 - (b) administrative, regulatory and special funds which perform functions similar to those of departments and which may be organized as boards, commissions or agencies. This group includes quasi-trust accounts the funds of which are available for government use. It also includes government social insurance programs such as unemployment insurance;
 - (c) agencies engaged in "industrial" or "commercial" activities primarily to service the requirements of their own governments, and agencies engaged primarily in the channelling of funds from one level of government to another or among organizations at the same level of government;
 - (d) government-owned institutions such as those engaged in education, health and welfare services, or administration of justice, e.g., agricultural schools, residences for handicapped persons, jails, etc.;
 - (e) universal pension programs (Canada and Québec Pension Plans);
 - (f) non-trusted public service pension plans, i.e., plans, the monies of which constitute an integral part of a government's consolidated

Section 3 - suite

Elle regroupe des compagnies, établissements et organismes de toutes tailles;

Elle couvre toutes les industries sauf l'agriculture, la pêche et le piégeage, les ménages privés, les organismes religieux et les services de la défense;

Elle utilise un mélange de recensement et d'échantillonnage, une partie de l'échantillon étant remplacée chaque mois;

Elle utilise la version 1970 du manuel "Classification des activités économiques", ainsi que la version 1981 du manuel "Classification géographique type";

La nouvelle enquête a été construite de façon à fournir des estimations fiables aux niveaux agrégés des divisions industrielles pour les provinces et au niveau industriel à trois chiffres pour le Canada.

Vous trouverez des informations plus détaillées, sous la rubrique "Note aux utilisateurs" du document de référence.

Tableau 3-18

L'univers statistique de l'administration publique comprend:

1. L'administration publique générale:
 - a) les ministères;
 - b) les fonds administratifs, réglementaires et les fonds spéciaux dont les fonctions sont semblables à celles des ministères et qui peuvent être constitués en commissions, conseils ou organismes. Dans ce groupe se trouvent les fonds quasi-fiduciaires dont les fonds sont à la disposition des administrations publiques. En font également partie les régimes publics d'assurance-sociale, comme ceux relatifs à l'assurance-chômage et à l'indemnisation des accidents du travail;
 - c) les organismes ayant une activité "industrielle" ou "commerciale" pour répondre avant tout aux besoins des administrations publiques dont ils relèvent, et les organismes dont l'activité principale est l'acheminement de fonds d'un échelon de gouvernement à un autre ou entre des organismes à un même échelon;
 - d) les établissements appartenant à des administrations publiques, comme ceux qui s'occupent de l'éducation, des services de la santé et du bien-être social ou de l'administration de la justice. Dans cette catégorie entrent les écoles d'agriculture, les résidences pour personnes handicapées, les prisons, etc.;
 - e) les régimes universels de pensions (Régimes de pensions du Canada et des rentes du Québec);
 - f) les régimes de pension de la Fonction publique non constitués en fiducie, c'est-à-dire, des régimes dont les fonds forment une partie intégrante d'un compte de

Section 3 - Continued

revenue account or which are otherwise available to the government in the financing of its operations;

- (g) working capital funds; and
2. Government enterprises.

For a short description of Government enterprises, please refer to "Note", Table 3-20.

For a more complete explanation of the general government and the government enterprise universe refer to the Statistics Canada publication entitled *The Canadian System of Government Financial Management Statistics* (Catalogue 68-506E).

The user of these statistics is advised to avoid making direct comparisons between numbers of employees reported and the payroll reported, the reason for this being that:

- (1) **Numbers employed** are the average of the number of employees on strength on the last day of the last pay period of the months; March, June, September and December.
(2) **Payroll** is the total of four quarters of salaries and wages paid.

Excludes overtime and retroactive payments of General Government.

Table 3-19

For "Note", please refer to "Note", Table 3-18.

For a list of departments classified by function, see *Federal Government Employment*, Catalogue 72-004, Quarterly.

Table 3-20

A government enterprise is an organized entity usually corporate, which (a) is established by a political decision-making body to produce goods and/or services for sale on the open market at a price related to cost, (b) maintains an independent system of accounts, (c) has a relatively autonomous management and (d) is staffed by personnel not normally subject to the statutory requirements governing employment in the general public service.

Notes - suite

Section 3 - suite

revenus consolidés publics ou sont de toute autre manière à la disposition de l'administration publique pour le financement de ses activités;

- g) les fonds de roulement; et
2. Les entreprises publiques.

Pour une brève description des entreprises publiques, voir "Note" du tableau 3-20.

Pour de plus amples explications sur les administrations publiques en général et sur l'univers des entreprises publiques, veuillez consulter la publication de Statistique Canada intitulée *Le système canadien des statistiques de la gestion financière des administrations publiques* (n° 68-506F du catalogue).

L'utilisateur de ces statistiques ne devra pas tirer de comparaison directe entre le nombre inscrit et la rémunération déclarée:

- (1) **Nombre d'employés** est la moyenne des effectifs arrêtés le dernier jour de la dernière paye des mois de mars, juin, septembre et décembre.
(2) **La rémunération** est la somme des traitements et des salaires versés au cours des quatre trimestres.

Elle ne comprend pas les paiements pour travail supplémentaire et les paiements rétroactifs de salaire de l'administration générale.

Tableau 3-19

Voir "Note" du tableau 3-18.

Pour une liste des ministères classés par fonction, voir *L'emploi dans l'administration publique fédérale*, n° 72-004 du catalogue, trimestriel.

Tableau 3-20

Une entreprise publique est une entité organisée, habituellement constituée en société et qui a) est créée par un centre de décision politique dans le but de produire des biens ou services destinés à être vendus sur le marché libre à des prix établis en fonction des coûts, b) maintient un système indépendant de comptabilité, c) dispose d'une administration relativement autonome et, d) dont le personnel ne relève pas habituellement des lois et règlements régissant l'emploi dans la fonction publique en général.

Notes - Continued

Section 3 - Continued

Number of employees, represents the average of the number of persons on the payroll for the last pay period for the months of March, June, September and December.

Payrolls reported are the gross payrolls of all persons paid for work done during the year whether they were on strength at the end of the year or not. They include retroactive pay, over-time payments and special payments.

Table 3-21

Provincial general government services, in this table are comprised of:

- (a) Departments of government;
- (b) administrative, regulatory and special funds which perform functions similar to those of departments and which may be organized as boards, commissions or agencies;
- (c) government-owned and financially supported institutions such as those engaged in education, health and welfare services or in the administration of justice.

Number of Salaried Employees

Represents the average of the number of persons, employees in receipt of a salary based on monthly or annual rates of pay. These employees may be of a continuing, term, seasonal, sessional or part-time nature on the payroll for the last pay period reported for the months of March, June, September and December.

Table 3-22

For "Note", please refer to "Note", Table 3-21.

Gross Payrolls

Payrolls reported are the gross payrolls of all persons paid for work done during the year whether they were on strength at the end of the year or not. They include retroactive pay, salary adjustments and over-time payments.

Table 3-23

For "Note", please refer to "Note", Table 3-20.

Notes - suite

Section 3 - suite

Nombre d'employés, représente la moyenne du nombre de personnes qui figurait sur la dernière feuille de paye des mois de mars, juin, septembre et décembre.

La rémunération déclarée indique la paye brute de toutes les personnes payées pour le travail fait durant l'année, qu'elles soient inscrites ou non sur la liste de paye à la fin de l'année. Cela inclut les payes rétroactives, les paiements de temps supplémentaire et les paiements spéciaux.

Tableau 3-21

Les services généraux des administrations publiques provinciales comprennent, dans le présent tableau:

- a) les ministères;
- b) les fonds administratifs, réglementaires et spéciaux dont les fonctions sont semblables à celles des ministères et qui peuvent être constitués en conseils, commissions ou organismes;
- c) les établissements qui appartiennent à l'administration provinciale ou qui se consacrent à l'éducation, aux services de santé et de bien-être ou à l'administration de la justice.

Nombre d'employés à traitement

Représente la moyenne du nombre de personnes, employés qui touchent un traitement sur une base mensuelle ou annuelle. Ces employés peuvent être permanents, à terme, saisonniers, de session ou à temps partiel qui figuraient sur la dernière feuille de paye des mois de mars, juin, septembre et décembre.

Tableau 3-22

Voir "Note" du tableau 3-21.

Rémunération brute

La rémunération déclarée indique la paye brute de toutes les personnes payées pour le travail fait durant l'année qu'elles soient inscrites ou non sur la liste de paye à la fin de l'année. Cela inclut les payes rétroactives, les ajustements de salaires et les paiements de temps supplémentaire.

Section 3 - Continued

Table 3-24

The information contained in this table is derived from a monthly survey of all municipalities with populations over 10,000 (according to the 1981 Census) and a sample survey, conducted annually, of municipalities with populations less than 10,000. Statistics have been published quarterly since the first quarter of 1967 and data for the years 1961 to 1966 were released in the publication *Municipal Government Employment, 1961-1966* (Catalogue 72-505).

The table covers the employment and payroll statistics for the general services of municipalities, metropolitan corporations, regional municipalities, counties and regional districts. General services include: the departmental services such as police, fire, public works, sanitation, welfare, administration, health, waterworks, etc. and special activities such as libraries, arenas, exhibitions, golf courses, etc.

The user of these statistics is advised to avoid making direct comparisons between numbers of employees and the payroll reported for the following reason:

- (1) Numbers employed are the average of the number of employees on strength during the last pay period of the months: March, June, September and December.
- (2) Payroll is the total of four quarters of all monies paid to employees, before any deductions for income tax, etc.

Retroactive and overtime payments are included in the month the payments are made.

Table 3-25

Total expenditures on education include:

Expenditures on elementary and secondary education:
(i) public schools, consisting of expenditures of school boards, services to school boards provided by provincial departments of education and for schools maintained by the Department of National Defence; (ii) federal schools and schools for the blind and deaf; (iii) provincial and federal departments' spending on elementary and secondary education, and (iv) academic education in federal penitentiaries and provincial reformatory schools.

Expenditures on post-secondary education: (i) operating and capital expenditures of universities, teachers' colleges, community colleges and similar institutions,

Notes - suite

Section 3 - suite

Tableau 3-24

Les renseignements présentés dans ce tableau, sont les résultats d'une enquête mensuelle menée auprès de toutes les municipalités comptant plus de 10,000 habitants (au recensement de 1981) et d'une enquête par échantillonnage menée chaque année auprès des municipalités urbaines comptant moins de 10,000 habitants. Ces renseignements sont publiés tous les trois mois depuis le mois de mars 1967; les chiffres des années de 1961 à 1966 sont parus dans la publication intitulée; *L'emploi dans les administrations municipales, 1961-1966* (n° 72-505 du catalogue).

Le présent tableau renferme des statistiques sur l'emploi et la rémunération dans les services généraux des municipalités, des corporations métropolitaines, des municipalités régionales, des comtés et des districts régionaux. Les services généraux sont ainsi répartis: services de l'administration générale (services de police, d'incendie, des travaux publics, sanitaires, du bien-être, d'administration de bureau, de santé, des eaux, etc.) et activités spéciales (bibliothèques, arénas, expositions, terrains de golf, etc.).

L'utilisateur de ces statistiques ne devra pas faire de comparaison directe entre le nombre inscrit et la rémunération déclarée:

- (1) Nombre d'employés est la moyenne des effectifs arrêtés durant la dernière période de paye des mois de mars, juin, septembre et décembre.
- (2) La rémunération est le total des sommes versées aux employés au cours de quatre trimestres, avant toute déduction (impôt sur le revenu, etc.).

Les rappels et la rémunération du travail supplémentaire sont compris dans le mois au cours duquel ils ont été versés.

Tableau 3-25

Dépenses totales au titre de l'éducation comprennent:

Les dépenses au titre de l'enseignement primaire et secondaire: (i) les écoles publiques, c'est-à-dire les dépenses des conseils scolaires, les services aux conseils scolaires fournis par les ministères provinciaux de l'Éducation et pour les écoles administrées par le ministère de la Défense nationale; (ii) celles des écoles fédérales et des écoles pour les sourds et les aveugles; (iii) celles des ministères provinciaux et fédéraux au titre de l'enseignement primaire et secondaire, et (iv) les dépenses fédérales relatives à l'enseignement général dans les pénitenciers et les dépenses provinciales relatives aux établissements de protection de la jeunesse.

Les dépenses affectées à l'enseignement postsecondaire: (i) les frais d'exploitation et les dépenses d'investissement des universités et des écoles normales, des collèges communautai-

Notes - Continued

Section 3 - Continued

and post-secondary programs in nursing schools; (ii) student aid, scholarships and bursaries, and (iii) direct expenditures by federal and provincial governments.

Expenditures on vocational training: (i) manpower training; (ii) federal expenditures on language courses; (iii) vocational training in federal penitentiaries and provincial reformatory schools; (iv) various training courses set by federal and provincial authorities, and (v) private trade schools, art schools, music schools, driving schools, etc.

Table 3-26

For "Note", please refer to "Note", Table 3-25.

Expenditures on education apply to financial periods starting the year indicated in the table and includes all levels - elementary-secondary schools, Community Colleges and Universities.

For calculation purposes the labour force figures have been derived from the Canadian Labour Force Survey and they do not account for residents of Yukon and Northwest Territories, Indians on reserves, inmates of institutions and members of the Armed Forces.

Calculation of expenditures per total full-time student excludes trade level.

Table 3-27

Elementary and secondary schools include public, federal and private schools.

"Universities" includes all degree-granting institutions.

Table 3-28

Undergraduate enrolment comprises students in degree, diploma, certificate, and non-university-type courses offered in universities. Hospital interns are included in this group until 1979/1980. From 1980/1981 on interns are classified as graduate students.

Graduate enrolment includes students in master's and doctoral degree programs, in graduate diploma and certificate programs, hospital residents, and since 1980, interns.

Notes - suite

Section 3 - suite

res et des établissements connexes, ainsi que des écoles d'enseignement infirmier en ce qui a trait aux programmes postsecondaires seulement, (ii) l'aide financière aux étudiants, les bourses d'études et les bourses d'entretien, et (iii) les dépenses pertinentes directes des administrations fédérale et provinciales.

Les dépenses affectées à la formation professionnelle; (i) les programmes de formation de la main-d'oeuvre; (ii) les dépenses fédérales affectées aux programmes de langues; (iii) la formation professionnelle dans les pénitenciers et les établissements de protection de la jeunesse; (iv) les divers types de cours aménagés par les autorités fédérale et provinciales; (v) les écoles privées de métiers, d'art, de musique, de conduite, etc.

Tableau 3-26

Voir "Note" du tableau 3-25.

Les dépenses au titre de l'enseignement s'appliquent aux périodes financières commençant l'année indiquée au tableau et incluent tous les niveaux - les écoles élémentaires et secondaires, les collèges communautaires et les universités.

Les chiffres qui ont servi aux totalisations sont tirés de l'enquête sur la population active et ne comprennent pas les résidents du Yukon et des Territoires du Nord-Ouest, les Indiens vivant dans les réserves, les pensionnaires d'institution et les membres des Forces armées.

Le calcul des dépenses par étudiant à plein temps ne comprend pas les chiffres des écoles de métiers.

Tableau 3-27

Les écoles élémentaires et secondaires comprennent les écoles publiques, les écoles fédérales et les écoles privées.

Les "universités" comprennent tous les établissements décernant des grades.

Tableau 3-28

Les effectifs de 1^{er} cycle comprennent les étudiants inscrits à des programmes menant à un grade universitaire, un diplôme ou un certificat et aux programmes de formation non universitaire offerts par les universités. Jusqu'en 1979/1980, les internes dans les hôpitaux sont compris dans ce groupe. À partir de 1980/1981, les internes sont classés parmi les étudiants de 2^e ou de 3^e cycle.

Les effectifs de 2^e et de 3^e cycles comprennent les étudiants inscrits à la maîtrise, au doctorat, à un programme menant à un diplôme ou certificat d'études supérieures, les résidents des hôpitaux et, depuis 1980, les internes.

Section 3 - Continued

Table 3-29

The statistics in this table were derived from the annual Immigration Statistics, which are published by the Immigration and Demographic Policy Group - Employment and Immigration Canada. The data are derived from the "Immigrant Visa and Record of Landing Document".

The statistics refer to persons other than Canadian citizens who have been granted the legal right to establish permanent residence in Canada. Therefore, these statistics exclude illegal immigrants, persons who have been legally admitted to the country for temporary periods of time, and former residents (Canadian citizens) returning to the country after temporary absences. Consequently, Canada's definition of immigrants differs considerably from the definition recommended by the United Nations.

Since a Canadian resident is not required to file a statement on leaving the country, one cannot know the actual number of Canadian residents who emigrate from Canada, nor their previous province of origin. Consequently, various data sources are used to estimate the number of people leaving Canada in a given year. Two main types of estimation procedures were used to derive the annual emigration estimates for the 1972-73 to 1981-82 period, with the first type being used to generate annual emigration estimates for the period 1971-1976, and the second type being used to derive annual emigration estimates for the year 1976-1985.

For full details see Post-censal Annual Estimates of Population by Marital Status, Age, Sex and Components of Growth for Canada and the Provinces, June 1, Catalogue 91-210, Annual.

Each estimate has been rounded independently to the nearest hundred; hence, totals do not necessarily equal the sum of the rounded estimates shown.

The annual estimates shown for 1976-77 to 1980-81 are revisions of the estimates which had originally been published in publication Catalogue 91-208: International and Interprovincial Migration in Canada.

Table 3-30

The overall balance of two types of migration flows to and from other countries and to and from other provinces or territories is "net migration". When these flows are expressed as rates, analysis consists of little more than the plus or minus sign appearing in front of the figures: a net migration gain furthers growth, a net migration loss curbs it.

Notes - suite

Section 3 - suite

Tableau 3-29

Les statistiques de ce tableau proviennent des statistiques d'immigration annuelles publiées par le groupe responsable de la politique de l'immigration et de la démographie - Emploi et Immigration Canada. Les données proviennent du document "Visa d'immigrant et fiche relative du droit d'établissement".

Les statistiques se rapportent aux personnes autres que des citoyens canadiens qui ont été autorisées à s'établir en permanence au Canada. Elles ne prennent donc pas en compte les immigrants en situation irrégulière au Canada, les personnes admises légalement au pays pour une période temporaire ni les anciens résidents (citoyens canadiens) qui reviennent au pays après une absence temporaire. Par conséquent, la définition du terme "immigrant" utilisée au Canada est très différente de celle qui est recommandée par les Nations-Unies.

Au Canada, aucun résident n'est tenu de produire une déclaration lorsqu'il quitte le pays. De ce fait, on connaît mal les effectifs réels des émigrants canadiens ainsi que leur province d'origine. Pour combler cette lacune, on utilise diverses sources de données qui permettent d'obtenir une estimation du nombre de personnes quittant le Canada au cours d'une année donnée. Deux méthodes ont servi à établir les estimations annuelles de l'émigration pour la période allant de 1972-73 à 1981-82; la première a permis d'estimer l'effectif annuel des émigrants pour la période 1971-1976 et la seconde, celui des années 1976-1985.

Pour obtenir plus de détails voir Estimations annuelles post-censitaires de la population selon l'état matrimonial, l'âge, le sexe et les composantes de l'accroissement, Canada et provinces, au 1er juin, no 91-210 du catalogue, annuel.

Chaque nombre a été arrondi séparément à la centaine près; dès lors les totaux ne correspondent pas nécessairement à la somme des nombres arrondis.

Les estimations annuelles pour les années 1976-77 à 1980-81 sont des estimations révisées qui remplacent celles déjà publiées dans la publication 91-208 du catalogue: Migrations internationales et interprovinciales du Canada.

Tableau 3-30

La "migration nette" est un bilan global de deux ensembles de flux de migrants: les entrants et sortants de l'étranger et les entrants et sortants en provenance ou à destination à l'intérieur du pays d'autres provinces ou territoires. Lorsque les flux sont exprimés en taux, l'analyse se réduit pratiquement à l'observation du signe de ce taux. Une migration nette positive aide la croissance, une migration négative la freine.

Table 4-7

The data presented in this table have been compiled from information collected from one in five households in the June 1981 Census.

This tabulation is based on information collected from the non-inmate population.

Totals may not equal the sum of components due to rounding and/or the inclusion in the total of components for which data is not provided.

Table 4-8

For "Note", please refer to "Note", Table 4-7.

Table 4-9

For "Note", please refer to "Note", Table 4-7.

Average and median incomes are for persons with income.

Table 4-10

The statistics are based upon a stratified random sample of Individual Income Tax Returns filed for the taxation or calendar year. The sample was selected by a sequential count made by computer and stratified by (1) source of income, (2) urban geographic areas, (3) rural geographic areas, (4) tax status and (5) income range. The sample size was as follows: 1980 - 527,044, 1981 - 542,311, and 1982 - 469,730.

Table 4-11

Tableau 4-7

Les données présentées dans ce tableau ont été compilées à partir des renseignements obtenus d'un ménage sur cinq lors du recensement de juin 1981.

Cette compilation s'appuie sur les renseignements obtenus de la population non pensionnaire d'institution.

Les totaux peuvent ne pas être égaux à la somme de leurs composantes en raison de l'arrondissement et/ou de l'inclusion dans le total de composantes pour lesquelles les données ne sont pas fournies.

Tableau 4-8

Voir "Note" du tableau 4-7.

Tableau 4-9

Voir "Note" du tableau 4-7.

Le revenu moyen et le revenu médian s'appliquent aux personnes ayant un revenu.

Tableau 4-10

Les statistiques sont basées sur un échantillon aléatoire stratifié de déclarations d'impôt sur le revenu des particuliers produites pour l'année d'imposition ou l'année civile. L'échantillon a été choisi par un comptage séquentiel fait par ordinateur et stratifié par (1) source de revenu, (2) régions géographiques urbaines, (3) régions géographiques rurales, (4) statut d'impôt et (5) tranche de revenu. La taille de l'échantillon était la suivante: en 1980 - 527,044, en 1981 - 542,311 et en 1982 - 469,730.

Tableau 4-11

Voir "Note" du tableau 4-10. Pour plus de renseignements, consulter la partie "Description des tableaux et des postes" de la publication Statistique fiscale du ministère du Revenu national, Impôt, no RV44-1983 et RV44-1984 du catalogue.

Tableau 4-12

Le total pour le Canada comprend le Yukon, les Territoires du Nord-Ouest et les résidents canadiens à l'étranger (à l'exception des membres des Forces armées canadiennes).

Les salaires et traitements comprennent les jetons de présence des administrateurs, les primes, les commissions, les gratifications, le revenu en nature, les allocations imposables et

Notes - Continued

Section 4 - Continued

ries are estimated on a "gross" basis, that is, before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Remuneration accumulating over time, for example, retroactive payments, are accounted for in the month and year in which they are paid.

Table 4-13

For "Note", please refer to "Note", Table 4-12. The provincial percentages do not add up to the Canada total because the Yukon, Northwest Territories and Canadian residents abroad are included in the Canada total but not with the provinces.

Table 4-14

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are asked to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to **strikes**, unpaid holidays or other similar unpaid circumstances, the data reported are not representative of the last seven days of the month, adjustments are made to reflect the economic situation of the reference period (i.e. when a strike effects the last seven days of the survey month, the derived data will reflect the strike situation).

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, (typically a factory, mine, store or a similar unit) is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment, payrolls and hours data for particular locations.

Notes - suite

Section 4 - suite

les rappels de salaire. Les estimations des salaires et traitements sont fondées sur des chiffres bruts, c'est-à-dire, avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, des cotisations à des caisses de retraite, etc. La rémunération accumulée avec le temps, comme les rappels de salaire, est prise en compte durant le mois et l'année au cours desquels elle est versée.

Tableau 4-13

Voir "Note" du tableau 4-12. Les pourcentages provinciaux ne correspondent pas au total du Canada car le Yukon, les Territoires du Nord-Ouest et les résidents canadiens à l'étranger sont compris dans le total du Canada mais non avec les provinces.

Tableau 4-14

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. Dans la pratique, peu d'entreprises tiennent des registres de paye pour cette période précise; on demande donc aux répondants de faire porter leur déclaration sur la (les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une **grève**, d'un congé non payé ou d'autres circonstances semblables, les données déclarées ne sont pas représentatives des sept derniers jours du mois, on procède aux rajustements qui s'imposent afin de traduire la situation qui régnait pendant la période de référence (cela signifie que lorsqu'une grève touche les sept derniers jours du mois d'enquête, les données qui en découlent reflètent l'état de grève).

Toutes les entreprises appartiennent à une branche d'activité économique déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un établissement. À des fins statistiques, on définit l'établissement (en général une usine, une mine, un magasin ou une unité semblable) comme la plus petite unité constituant un ensemble fonctionnel distinct capable de déclarer, à l'égard de l'activité économique, tous les éléments statistiques de base qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour obtenir des statistiques géographiques détaillées, l'établissement est souvent subdivisé en unités déclarantes qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi, la rémunération et les heures de travail relativement à certains endroits.

Notes - Continued

Section 4 - Continued

Statistics from the survey are based on the 1970 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the *Standard Industrial Classification Manual*, Catalogue 12-501E (1970).

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight-time wages, piece-work and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour cost such as employer's contributions to unemployment insurance, medical plans, workmen's compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

Table 4-15

Increases exclude contracts ratified in the Yukon and Northwest Territories nor those contracts which affect workers in more than one province. The figures were calculated by the Department of Finance, from Labour Canada data.

Table 4-16

For "Note", please refer to "Note", Table 4-15.

Table 4-17

For "Note", please refer to "Note", Table 4-21.

Earnings consist of income from wages and salaries and/or net income from self-employment.

For additional information, see, *Income Distribution by Size in Canada, Catalogue 13-207, Annual*.

Table 4-18

For "Note", please refer to "Note", Table 4-14.

Employees paid by the hour Any employee whose basic wage is expressed as an hourly rate.

Notes - suite

Section 4 - suite

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1970. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le *Manuel de la classification des activités économiques*, n° 12-501F du catalogue, (1970).

Les gains des employés à salaire et des employés à traitement représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, les traitements à taux ordinaires, la rémunération du travail à la pièce et les commissions régulières, ainsi que les primes, indemnités de vie chère et autres gratifications versées régulièrement, payées de surtemps et la rémunération des absences payées dans la semaine de référence de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Tableau 4-15

Les hausses ne comprennent pas les contrats ratifiés dans les Territoires du Yukon et du Nord-Ouest ni ceux qui touchent des travailleurs employés dans plus d'une province. Les données ont été calculées par le ministère des Finances à partir des données de Travail Canada.

Tableau 4-16

Voir "Note" du tableau 4-15.

Tableau 4-17

Voir "Note" du tableau 4-21.

Les gains désignent le revenu provenant de salaires et traitements, et/ou le revenu net provenant d'un emploi autonome.

Pour de plus amples renseignements, voir, *Répartition du revenu au Canada selon la taille du revenu*, n° 13-207 du catalogue, annuel.

Tableau 4-18

Voir "Note" du tableau 4-14.

Salariés rémunérés à l'heure Tout salarié dont la rémunération de base est calculée selon un taux horaire.

Section 4 - Continued

Table 4-19

The estimates of farm cash receipts include the cash returns from the sale of all agricultural products except those associated with direct interfarm intraprovincial transfers. Other components included in farm cash receipts are Canadian and Ontario Wheat Board payments, cash advances on farm-stored crops and deferred grain receipts in Western Canada. Also included are Agriculture Stabilization Act deficiency payments, Western Grain Stabilization Act payments as well as provincial income stabilization payments.

Table 4-20

For "Note", please refer to "Note", Table 4-19.

Table 4-21

For the years 1981 and 1982 the estimates are based on a sample survey conducted in April of the following year consisting of more than 37,000 households while for 1983 the sample was conducted in May of 1984 and involved approximately 15,400 households. Excluded from the table are: (1) inmates of institutions, (2) persons residing on Indian reserves, (3) residents of the Yukon and Northwest Territories, (4) Canadian residents temporarily abroad and (5) families and persons whose income originates mainly in military pay and allowances.

Income data for the previous calendar year, were collected from each family member (15 years of age and over).

Not classified as income are: gambling gains and losses, money inherited during the year in a lump sum, capital gains or losses, receipts from the sale of property or personal belongings, income tax refunds loans received, loans repaid to an individual as the lender, lump sum settlements of insurance policies, and rebates of property taxes and other taxes were excluded as well as all income in kind such as free meals, living accommodation or food and fuel produced on own farm.

It is important to note that the definition of a "family" utilized in this table differs from the one that appears in the list of definitions, in Section 9. For the purposes of this table, a "Family" is defined as follows: a group of individuals sharing a common dwelling unit and related by blood, marriage or adoption.

Notes - suite

Section 4 - suite

Tableau 4-19

Les estimations des recettes agricoles monétaires comprennent les recettes monétaires provenant de la vente de tous les produits agricoles, à l'exception des recettes liées aux échanges directs entre les fermes de provinces différentes. Les recettes agricoles monétaires comprennent aussi d'autres éléments: les paiements des commissions du blé du Canada et de l'Ontario, les avances versées sur les produits agricoles entreposés dans les fermes ainsi que les recettes différées au titre des céréales dans l'Ouest canadien, les paiements d'appoint versés en vertu de la Loi sur la stabilisation des prix agricoles, les paiements effectués en conformité avec la Loi de stabilisation concernant le grain de l'Ouest et les paiements faits dans le cadre de programmes provinciaux de stabilisation du revenu.

Tableau 4-20

Voir "Note" du tableau 4-19.

Tableau 4-21

Les estimations des années 1981 et 1982 sont fondées d'après une échantillonnage menée en avril de l'année suivante comptant plus de 37,000 ménages, tandis qu'en 1983 l'échantillonnage a été menée en mai 1984 et comptait environ 15,400 ménages. Sont exclus du tableau: (1) les pensionnaires d'institutions, (2) les personnes vivant dans une réserve indienne, (3) les résidents du Yukon et des Territoires du Nord-Ouest, (4) les Canadiens vivant à l'étranger de façon temporaire et (5) les familles et les personnes dont la principale source de revenu consiste en une solde et en indemnités militaires.

On a recueilli pour l'année précédente du calendrier, des renseignements sur le revenu de chaque membre de la famille de 15 ans et plus.

Sont exclus du revenu: les gains et pertes au jeu, les sommes globales héritées au cours de l'année, les gains ou les pertes de capital, le produit de la vente de propriétés ou de biens personnels, les remboursements d'impôt sur le revenu, les prêts reçus, les prêts remboursés à un particulier agissant comme prêteur, les règlements forfaitaires en matière d'assurance, les remboursements de l'impôt foncier ou d'autres impôts ainsi que les avantages non-monétaires comme les repas gratuits et le gite ou encore la nourriture et le combustible produits sur sa propre ferme.

Il est important de noter que la définition de "Famille" utilisée dans ce tableau diffère de celle qui apparaît dans la liste des définitions à la section 9. Aux fins du présent tableau, une "Famille" est définie comme suit: un groupe de personnes partageant le même logement et qui sont apparentées par le sang, par alliance ou par adoption.

Notes - Continued

Section 4 - Continued

Table 4-22

For "Note", please refer to "Note", Table 4-21.

Table 4-23

For "Note", please refer to "Note", Table 4-7.

Income figures for 1970 were converted to 1980 dollars, thereby permitting comparisons at equivalent levels of purchasing power.

Table 4-24

The 1981 Census defined "Economic family", as a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage or adoption. Persons living common-law are considered, for census purposes, as now married, regardless of their legal marital status; they accordingly appear as married couples in the economic family tables.

Husband-wife economic families are those in which one of two spouses, either the husband or the wife, is the economic family reference person. Non-husband-wife economic families are of two kinds: those in which either a male or female lone parent is the economic family reference person, or those in which a non-census-family person is the economic family reference person.

Table 4-25

For "Note", please refer to "Note", Table 4-21.

Table 4-26

For "Note", please refer to "Note", Table 4-27.

Family income consist of income of the family before taxes (see the definition of income before taxes in Family Expenditure in Canada, 1982, Catalogue 62-555, Occasional).

Table 4-27

The data in this table are based on the Survey of Family Expenditures which was conducted in February and March 1983, and refers to calendar year 1982. The sample was selected from the sampling frame for the Labour Force Survey. It covers both urban and rural areas in the ten provinces.

Tableau 4-22

Voir "Note" du tableau 4-21.

Tableau 4-23

Voir "Note" du tableau 4-7.

Les données sur le revenu de 1970 ont été converties en dollars de 1980, permettant ainsi des comparaisons sur la base de niveaux de pouvoir d'achat équivalents.

Tableau 4-24

Le recensement du Canada de 1981, a défini "Famille économique", comme un groupe de deux personnes ou plus qui vivent dans le même logement et qui sont apparentées par le sang, par alliance ou par adoption. Les personnes qui vivent en union libre sont considérées, aux fins du recensement, comme actuellement mariées, quel que soit leur état matrimonial légal; elles figurent donc comme des couples mariés dans les tableaux sur les familles économiques.

Familles économiques époux-épouse - familles dont un des conjoints, soit l'époux ou l'épouse, est la personne repère de la famille économique. Familles économiques autre que les familles époux-épouse - familles monoparentales dont le père ou la mère, selon le cas, est la personne repère de la famille économique ou familles où une personne hors famille (de recensement) est la personne repère de la famille économique.

Tableau 4-25

Voir "Note" du tableau 4-21.

Tableau 4-26

Voir "Note" du tableau 4-27.

Revenu de la famille comprend le revenu de la famille avant impôt (voir la définition de "revenu avant impôt" de la publication Dépenses des familles au Canada, 1982, no 62-555 du catalogue, hors série).

Tableau 4-27

Les données figurant dans ce tableau sont tirées de l'enquête sur les dépenses des familles menée en février et mars 1983 et portant sur l'année civile 1982. L'échantillon a été choisi à partir de la base de sondage de l'enquête sur la population active. Il couvre tant les régions urbaines que les régions rurales des dix provinces.

Notes - Continued

Section 4 - Continued

People living on Indian reserves and families of official representatives of foreign countries living in Canada were excluded from the survey. Members of religious and other communal colonies were excluded, as were people living full time in institutions, for example, inmates of penal institutions and chronic care patients living in hospitals and nursing homes. Data were not gathered from people temporarily living away from their families (for example, students at university), but data on such people were gathered from their families. In this way, double counting of such individuals was avoided.

Data on part-year families were recorded but excluded from tabulations of average expenditure per family. (In Technical Table II, the effect of data on part-year families on aggregate expenditure is shown.) Part-year families comprised families and unattached individuals who were members of other families for part of the survey year, immigrant families and individuals who arrived during the survey year, and Canadians who returned from living abroad during the survey year.

Family and unattached individuals: terms applied to spending units, that is, a group of people living in the same dwelling who depend on a common or pooled income for major expenses or one financially independent individual living alone. Therefore, in this survey, "family" and "unattached individuals" have non-standard meanings.

Family income quintile groups were obtained by ranking records in ascending order of total family income. The records were then partitioned into five groups such that the weighted number of records (i.e., estimated number of families) in each was the same.

For a description of items contained in each of the summary expenditure categories shown in the table, refer to Table 33 in *Family Expenditure in Canada, 1982 Catalogue 62-555*.

There are some changes in the grouping of items in the summary expenditure categories for 1982 as compared to those used in 1978. These are discussed in the 1982 publication (*Catalogue 62-555*).

Table 4-28

The data in this table are based on the Food Expenditure Survey which was conducted monthly throughout 1982. The sample was selected from the sampling frame for the Labour Force Survey. It covers both urban and rural areas in the ten provinces.

Notes - suite

Section 4 - suite

Étaient exclus les résidents des réserves indiennes, les familles des représentants officiels de pays étrangers vivant au Canada, les membres de groupes religieux ou d'autres collectivités du genre, les personnes placées en permanence en institution, par exemple les détenus de prison et les malades chroniques séjournant à l'hôpital ou dans une maison de repos. Pour les personnes temporairement éloignées de leur famille (par exemple, les étudiants d'université), on a recueilli les données à leur sujet auprès de leur famille, évitant ainsi un double dénombrement.

On a relevé les données sur les familles constituées pendant une partie de l'année seulement, mais on les a exclues des totalisations des dépenses moyennes par famille. (Le tableau technique II indique l'effet qu'exercent sur les dépenses globales les données relatives aux familles constituées pendant une partie de l'année seulement.) Les familles constituées pendant une partie de l'année seulement comprenaient des familles et des personnes seules qui avaient appartenu à une autre famille pendant une partie de l'année observée, des familles et des particuliers qui avaient immigré au Canada au cours de l'année observée et des Canadiens qui étaient revenus de l'étranger au cours de l'année observée.

Famille et personne seule: terme désignant une unité de dépense, c'est-à-dire un groupe de personnes qui vivent dans le même logement et qui dépendent d'un revenu commun ou mis en commun pour les principaux postes de dépense, ou encore une personne financièrement indépendante vivant seule. Par conséquent, aux fins de cette enquête, les termes "famille" et "personne seule" n'ont pas le sens qu'on leur donne habituellement.

Des **quintiles du revenu de la famille** ont été obtenus en classant les relevés par ordre croissant de revenu total. Les relevés ont ensuite été divisés en cinq groupes de façon que le nombre pondéré de relevés (c.-à-d., nombre estimé de familles) de chaque groupe soit égal.

Pour obtenir une description des articles de chaque catégorie de dépenses sommaires inscrite dans le tableau, consultez le tableau 33 de la publication *Dépenses des familles au Canada, 1982* n° 62-555 du catalogue.

Par rapport aux regroupements utilisés en 1978, certains changements ont été apportés à ceux des articles des catégories de dépenses sommaires pour l'année 1982. On trouvera une explication dans la publication (pour 1982) n° 62-555 du catalogue.

Tableau 4-28

Les données figurant dans ce tableau sont tirées de l'enquête sur les dépenses alimentaires menée tous les mois de 1982. L'échantillon a été choisi à partir de la base de sondage de l'enquête sur la population active. Il couvre tant les régions urbaines que les régions rurales des dix provinces.

Notes - Continued

Section 4 - Continued

Refer to "Note", Table 4-27 for coverage (except that for this survey part-year families are not identified), and for "families" and "unattached individuals".

Family income quintile groups were obtained by ranking records for each month in ascending order of total family income. The records in each month were then partitioned into five groups such that the weighted number of records in each was the same. The lowest group from each month was averaged over the year to give the first quintile group; then the second lowest to give the second quintile group and so on.

For a description of items contained in each of the summary expenditure categories shown in the table, refer to Table 13 in *Family Food Expenditure in Canada, 1982 Catalogue 62-554*.

There are some changes in the grouping of items in the summary expenditure categories for 1982 compared to those used in 1978. These are discussed in the 1982 publication (Catalogue 62-554).

Section 4 - suite

Consultez la "note" du tableau 4-27 pour des précisions sur le champ d'observation (sauf que pour la présente enquête, les familles constituées pour une partie de l'année ne sont pas identifiées) ainsi que sur les "familles" et les "personnes seules".

Des quintiles du revenu de la famille ont été obtenus en classant les relevés de chaque mois par ordre croissant de revenu total. Les relevés mensuels ont ensuite été divisés en cinq groupes de façon que le nombre pondéré de relevés de chaque groupe soit égal. On s'est servi du groupe inférieur de chaque mois pour faire une moyenne annuelle et obtenir ainsi le premier quintile. On a procédé de la même façon avec le deuxième groupe et ainsi de suite.

Pour obtenir une description des articles de chaque catégorie de dépenses sommaires figurant dans le tableau, voir le tableau 13 de la publication *Dépenses alimentaires des familles au Canada, 1982*, n° 62-554 du catalogue.

Par rapport aux regroupements utilisés en 1978, certains changements ont été apportés à ceux des articles des catégories de dépenses sommaires pour l'année 1982. On trouvera une explication dans la publication (pour 1982) n° 62-554 du catalogue.

NOTES

Section 5

Table 5-1

The table contains annual data of building permits issued in more than 2,000 Canadian municipalities.

The coverage of the Building Permits Survey can best be expressed in terms of the population of municipalities covered in the survey compared to the total population.

Although the results of the Building Permits Survey are often used as a leading indicator of building activity they may not be construed as representing the total construction activity in the country.

Table 5-2

The statistics contained in this table are the results of nation-wide surveys carried out by the Canada Mortgage and Housing Corporation. All metropolitan areas, Census agglomerations and urban centres of 10,000 population and over, as defined by the 1976 and 1981 Censuses, are enumerated completely each month. The remainder of the country is covered on a sample basis four times a year, at the end of March, June, September and December.

Mobile dwellings although covered by the 1981 Census are not enumerated in the Starts and Completions Survey.

The data in this table relate to all areas (urban and rural).

Table 5-3

The sum of the persons in occupied private dwellings and the persons in occupied collective dwellings will not equal the total population due to the exclusion of persons in dwellings outside Canada and temporary residents who could not be assigned to the dwelling in which they usually reside also excluded from private occupied dwellings are persons whose relationship to the head of household could not be determined at the data processing stage.

Unavailable. Includes dwellings such as company maintained, second homes, rented or sold, for demolition or expropriation and other.

Any census data will be subject to error from a variety of sources. In particular, the data in this bulletin are subject to coverage error. Coverage error for these data may take two forms - (a) coverage error which causes an under or over counting of total dwellings or (b) misclassification error between occupied and unoccupied dwellings which results in undercoverage or overcoverage for the two subuniverses but no net coverage error for total dwelling.

NOTES

Section 5

Tableau 5-1

Le tableau contient des données annuelles sur les permis de bâtir qui ont été émis dans plus de 2,000 municipalités canadiennes.

La meilleure façon de mesurer la couverture de l'enquête sur les permis de bâtir consiste à comparer le chiffre de la population des municipalités visées au chiffre de la population totale.

Même si les résultats de l'enquête sur les permis de bâtir sont souvent considérés comme un indicateur important de l'activité du bâtiment, on ne saurait estimer qu'ils représentent l'activité globale de la construction au pays.

Tableau 5-2

La statistique que fournit le présent tableau découle de relevés d'envergure nationale effectués par la Société Canadienne d'hypothèques et de logement. Toutes les zones métropolitaines, agglomérations et localités urbaines de 10,000 âmes et plus, telles que définies pour les fins des recensements de 1976 et 1981 font l'objet d'un dénombrement complet tous les mois. Le reste du pays est examiné au moyen d'un sondage quatre fois l'an, soit à la fin des mois de mars, juin, septembre et décembre.

Les logements mobiles, dont le recensement de 1981 tenait compte, ne sont pas énumérés aux fins de l'enquête sur les mises en chantier et les achèvements.

Les données de ce tableau se rapportent à toutes les régions (urbaines et rurales).

Tableau 5-3

Le total des personnes dans les logements privés occupés et des personnes dans les logements collectifs occupés diffère du total de la population à cause de l'exclusion des personnes dans les logements à l'extérieur du Canada et des résidents temporaires dont il a été impossible de déterminer le lieu de résidence habituelle, les personnes dont le lien avec le chef du ménage n'a pu être déterminé lors du traitement des données sont exclues des logements privés occupés.

Non disponibles. Comprend les logements patronaux, les résidences secondaires, les logements loués ou vendus, les logements à démolir ou à exproprier et autres.

Toute donnée de recensement peut être entachée d'erreurs attribuables à diverses causes. En particulier, les données du présent bulletin sont sujettes à des erreurs d'observation qui peuvent prendre deux formes: a) erreur d'observation qui entraîne le sous-dénombrement ou le surdénombrement du nombre total de logements ou b) erreur de classement entre les logements occupés et les logements inoccupés produisant le surdénombrement ou le sous-dénombrement des deux sous-univers, mais aucune erreur nette d'observation en ce qui concerne le nombre total de logements.

Notes - Continued

Section 5 - Continued

Table 5-4

The value of dwelling is defined as the amount expected by the owner if the dwelling and the land it is on were to be sold. The data, therefore, may not represent actual market values of dwellings at the time of the 1981 Census.

Table 5-5

The 1981 Census data were collected either on a 100% basis (i.e. for all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this table was collected on a 20% sample basis and weighted up to compensate for sampling.

For any given geographic area, the weighted population, household, dwelling or families, total or subtotal may differ from that shown in reports containing data collected on a 100% basis. Such variation (in addition to the effect of random rounding) will be due to sampling.

Table 5-6

For "Note" on "random rounding", please refer to "Note", Table 3-4.

The information in this table was collected on a 100% basis (i.e., from all households).

Household Maintainer, Refers to the person, or one of the persons, in the household who pays the rent, or the mortgage, or the taxes, or electricity, etc., for the dwelling.

Table 5-7

The statistics in this table are derived from annual sample surveys on household facilities and equipment. Approximately 35,000 households were included in the sample for each year, to represent virtually all private households in Canada.

Excluded are: (1) households in the Yukon and Northwest Territories, (2) households on Indian Reserves and Crown lands, (3) institutional households, (4) military camps, (5) other collective-type households such as hotels, large lodging houses, clubs, logging and construction camps, (6) certain private households in mobile

Notes - suite

Section 5 - suite

Tableau 5-4

Aux fins du recensement, la valeur du logement désigne le montant que le propriétaire s'attendrait de recevoir si son logement et le terrain sur lequel il est situé étaient vendus. Par conséquent, les données peuvent ne pas représenter la valeur réelle de vente des logements au moment du recensement de 1981.

Tableau 5-5

Les données du recensement de 1981 ont été recueillies sur une base de 100% (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent tableau ont été recueillis selon la seconde méthode et pondérés afin de compenser l'effet de l'échantillonnage.

Quelle que soit la région géographique, le total ou total partiel pondéré de la population, des ménages, des logements ou des familles peut différer de celui qui figure dans les bulletins de données intégrales. Cet écart (outre l'effet de l'arrondissement aléatoire) sera attribuable à l'échantillonnage.

Tableau 5-6

Voir "Note" sur "arrondissement aléatoire", du tableau 3-4.

Les renseignements figurant dans ce tableau ont été recueillis sur une base de 100% (c'est-à-dire, auprès de tous les ménages).

Soutien du ménage, La ou une des personnes dans le ménage qui paie le loyer ou l'hypothèque, ou les taxes, ou l'électricité, etc., pour le logement.

Tableau 5-7

Les statistiques de ce tableau proviennent des enquêtes échantillons annuelles sur l'équipement ménager. Approximativement 35,000 ménages ont été interrogés afin de représenter la presque totalité des ménages privés du Canada.

Ne sont pas compris: (1) les ménages du Yukon et des Territoires du Nord-Ouest, (2) les ménages des réserves indiennes et les terres de la Couronne, (3) les ménages des institutions, (4) les camps militaires, (5) les autres ménages collectifs tels que les hôtels, les grandes pensions, les clubs, les camps de bûcherons et les baraques de travailleurs, (6) certains

Section 5 - Continued

homes, in trailers, in summer cottages, on boats, etc. As of 1984 mobile homes are now included.

Figures may not add to totals shown, due to rounding.

For additional information on the reliability of these estimates, please refer to Catalogue 64X-501 "Household Facilities and Equipment," 1977-1981 (Revised Estimates), November 1982; Household Facilities and Equipment, May 1982 and 1983, and March 1984, Catalogue 64-202, Annual.

Table 5-8

For "Note", please refer to "Note", Table 5-7.

Table 5-9

For "Note", please refer to "Note", Table 5-7.

Rented. Includes dwellings: (A) occupied rent-free or under share-cropping agreements; (B) for which rent was paid in kind or in services; (C) for which rent also includes rent for business premises.

Table 5-10.

For "Note", please refer to "Note", Table 5-7.

Improvements. had to be made to dwellings in the last two years.

Dwellings with improvements. the sum of type of improvements exceeds dwellings with improvements as more than one type of improvement was done.

Dwellings without improvements. includes a small number of cases where the household did not know if any repairs were made.

Table 5-11

For "Note", please refer to "Note", Table 5-7.

Oil or other liquid fuel. Includes kerosene.

Other. Includes coal or coke. Figures shown may not reflect true totals due to incomplete combining of categories.

Notes - suite

Section 5 - suite

ménages privés dans des maisons mobiles, des roulettes, des chalets d'été, des bateaux, etc. À compter de 1984, les maisons mobiles sont maintenant comprises.

Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

Pour de plus amples renseignements sur la fiabilité des estimations, voir "L'équipement ménager," 1977-1981 (Estimations rectifiées), novembre 1982, no 64X-501 du catalogue; "L'équipement ménager", mai 1982 et 1983, et mars 1984, no 64-202 du catalogue, annuel.

Tableau 5-8

Voir "Note" du tableau 5-7.

Tableau 5-9

Voir "Note" du tableau 5-7.

Loué. Comprend les logements: (A) occupés gratuitement ou sous le régime du métayage; (B) dont le loyer est payé en nature ou en services; (C) dont le loyer comprend aussi la location d'un local.

Tableau 5-10.

Voir "Note" du tableau 5-7.

Les améliorations. devaient avoir été faites au cours des deux dernières années.

Logements avec améliorations. le nombre total des genres d'améliorations, dépasse le nombre de logements avec améliorations, car plus d'un genre d'amélioration a été faite.

Logements sans améliorations. comprend un petit nombre de ménages qui ne savaient pas si des réparations avaient été faites.

Tableau 5-11

Voir "Note" du tableau 5-7.

Huile ou autre combustible liquide. Comprend le kérozène.

Autres. Comprend le charbon ou le coke. Les chiffres présentés n'indiquent pas nécessairement les sommes réelles dû au fusionnement incomplet des catégories.

Réfrigérateurs. Comprend un petit nombre de réfrigérateurs autres qu'électriques. Avant 1982, les réfrigérateurs électriques seulement étaient inclus.

Tableau 5-13

Voir "Note" du tableau 5-7.

Les chiffres ne prennent en compte que les machines à laver électriques à l'intérieur du logement du chef de ménage. Ne sont pas comprises les machines dans les sous-sols de maisons d'appartements ou de condominiums utilisées par plusieurs locataires.

Les "autres" machines à laver électriques se composent surtout des laveuses-essoreuses et de machines avec tordeur.

Tableau 5-14

Voir "Note" du tableau 5-7.

Les chiffres ne prennent en compte que les sècheuses électriques à l'intérieur du logement du chef de ménage. Ne sont pas comprises les machines dans les sous-sols de maisons d'appartements ou de condominiums utilisées par plusieurs locataires.

Table 5-20

For "Note", please refer to "Note", Table 5-7.

Table 5-21

For "Note", please refer to "Note", Table 5-7.

Table 5-22

The statistics on road vehicle registrations shown in this table have been obtained from the 12 provincial and territorial governments across the nation, each of which has its own distinct registration system. Consequently, the reader is advised to read the "Interprovincial Differences" shown in the publication *Road Motor Vehicles-Registration, 1983, Catalogue 53-219* before comparing the provincial and territorial statistics.

Trucks, tractors and buses. Figures in these categories are not complete as certain classes of trucks and/or buses have been included under passenger cars or other types of vehicles by some provinces.

Other. Includes certain other vehicles (e.g., ambulances, fire-trucks, etc.), also includes mopeds when and where registered.

Table 5-23

For "Note", please refer to "Note", Table 5-22.

The statistics on road vehicle registrations have been obtained from the 12 provincial and territorial governments across the nation, each of which has its own distinct registration system.

While each provincial or territorial system may be comprehensive and consistent within itself, the inconsistencies between the different provinces and territories pose serious problems for anyone trying to make use of national totals. The user is therefore urged to read the "Interprovincial Differences" in publication: *Road Motor Vehicles, Registrations, 1983, (Catalogue 53-219)* before using the figures.

Tableau 5-20

Voir "Note" du tableau 5-7.

Tableau 5-21

Voir "Note" du tableau 5-7.

Tableau 5-22

Les données sur les immatriculations de véhicules automobiles publiées dans ce tableau proviennent des 12 administrations provinciales et territoriales du Canada, qui possèdent chacune leur propre système d'immatriculation. Avant de comparer les statistiques entre les provinces et les territoires, le lecteur serait avisé de lire la section "Écart inter provinciaux", publiée dans *Véhicules automobiles - Immatriculations, 1983, no 53-219* du catalogue.

Camions, tracteurs et autobus. Les données sont incomplètes, car certaines catégories de camions et/ou d'autobus sont prises en compte avec les voitures de tourisme ou autres genres de véhicules dans certaines provinces.

Autres. Comprend certains autres véhicules (ex. ambulances, camions-incendies, etc.), ainsi que les vélosmoteurs immatriculés.

Tableau 5-23

Voir "Note" du tableau 5-22.

Les données sur les immatriculations de véhicules automobiles proviennent des 12 administrations provinciales et territoriales du Canada, qui possèdent chacune leur propre système d'immatriculation.

Aussi, même si chaque système provincial ou territorial est complet et homogène en soi, les différences que l'on observe d'une province ou d'un territoire à l'autre posent de sérieux problèmes pour quiconque essaie d'utiliser les totaux nationaux qui en découlent. Le lecteur trouvera donc profit à lire la section "Écarts inter provinciaux" dans la publication: *Véhicules Automobiles, Immatriculations, 1983, (Catalogue 53-219)* avant de servir des chiffres.

NOTES

Section 6

Table 6-1

For "Note", please refer to "Note", Table 3-1.

For 1981, CMAs remain unchanged from 1976 except for minor adjustments to respect new municipal limits. Trois-Rivières, Québec, becomes Canada's 24th CMA as a result of recent growth in its urbanized core.

The 1976 counts have been adjusted to reflect the January 1, 1981 limits in cases where population has been affected by the annexation or loss of land through the alterations of municipal limits.

The figures shown in this table have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions.

Table 6-2

For "Note", please refer to "Note", Table 6-1.

Table 6-3

For "Note", please refer to "Note", Tables 3-5 and 6-1.

Table 6-4

For information on methodology, contact Demography Division, Population Estimates and Projections, Statistics Canada.

Table 6-5

Population estimates consist of aggregating census divisions regression-nested estimates, using the ratio of the population of the census metropolitan area to that of overlapping census divisions as observed in the previous year, with the exception of Calgary which are based on the annual census conducted by the city.

For additional information, see source document.

NOTES

Section 6

Tableau 6-1

Voir "Note" du tableau 3-1.

Pour le recensement de 1981, on a conservé les mêmes RMR qu'en 1976 à part quelques révisions mineures rendues nécessaires en raison des modifications apportées aux limites de certaines municipalités. Par suite de l'expansion récente de son noyau urbanisé, Trois-Rivières au Québec est devenue la vingt-quatrième RMR du Canada.

Les chiffres officiels de 1976 ont été ajustés afin de tenir compte des nouvelles limites des municipalités au 1er janvier 1981, lorsqu'il y a eu annexion ou perte de territoire entraînant une modification du nombre d'habitants.

Par souci de confidentialité, les chiffres présentés ici ont été soumis à une formule appelée "arrondissement aléatoire" qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) à un multiple de "5". Cette technique assure une bonne protection contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions.

Tableau 6-2

Tableau 6-3

Voir "Note" des tableaux 3-5 et 6-1.

Tableau 6-4

Pour plus de renseignements à ce sujet contactez la Division de la démographie, estimations et projections démographiques, Statistique Canada.

Tableau 6-5

Les estimations de population sont établies en regroupant les estimations des divisions de recensement à l'aide du rapport de la population de la région métropolitaine de recensement à celui des divisions de recensement qui la chevauchent, tel qu'observé l'année précédente, à l'exception de Calgary celles-ci reposent sur le recensement annuel de la ville.

Pour de plus amples renseignements, voir le document de référence.

Section 6 - Continued

Table 6-13

The vacancy rates shown are derived from a sample survey conducted by CMHC, of apartment structures containing six or more dwelling units in Metropolitan Areas, excluding units completed and unoccupied six months prior to survey dates.

Data based on 1981 Census Area definitions.

For further information contact Statistical Services Division, Canada Mortgage and Housing Corporation, Ottawa.

Table 6-14

For "Note", please refer to "Note", Table 4-27.

Table 6-15

The family in this table is defined as a group of individuals sharing a common dwelling unit and related by blood, marriage or adoption. Thus, all relatives living together at the time of the survey were considered to comprise one family whatever the degree of family relationship.

The total income of a unit consists of income from all sources.

Table 6-16

The statistics in this table are derived from the annual sample survey on household facilities and equipment, special table series "C": Metropolitan Areas with 50,000 or more households.

In 1984, the number of survey records used to obtain estimates for each metropolitan centre, ranged from 173 for Kitchener-Waterloo to 2,026 for Toronto. Figures for previous years are available from the Consumer Income and Expenditure Division, as well as any additional information on the survey.

It should be noted that the term "metropolitan area" or "metropolitan centre", used in the table, is equivalent to the Census concept of Census Metropolitan Area (CMA). Estimates for 1976 and later years are all based on 1971 Census-defined boundaries.

The survey was carried out in conjunction with the March 1984 Labour Force Survey; while for previous years, the survey was carried out in May.

Notes - suite

Section 6 - suite

Tableau 6-13

Les taux d'inoccupation indiqués sont tirés d'un sondage portant sur les appartements de six logements et plus, que la Société canadienne d'hypothèques et de logement a effectué dans les régions métropolitaines, à l'exclusion des logements achevés mais inoccupés six mois avant les dates des relevés.

Données fondées sur les définitions des territoires de recensement de 1981.

Pour plus de renseignements contactez la division des services statistiques, Société canadienne d'hypothèques et de logement, Ottawa.

Tableau 6-14

Voir "Note" du tableau 4-27.

Tableau 6-15

On définit ici la famille comme un groupe de personnes qui partagent le même logement et qui sont apparentées par le sang, par alliance ou par adoption. Ainsi, tous les parents qui vivaient ensemble lors de l'enquête forment une seule unité familiale, quel que soit leur lien de parenté.

Le revenu total d'une unité comprend les revenus provenant de toutes les sources.

Tableau 6-16

Les statistiques de ce tableau ont été obtenues à partir de l'enquête annuelle par sondage sur l'équipement ménager, séries du tableau spécial "C": régions métropolitaines avec 50,000 ménages ou plus.

En 1984, le nombre de dossiers d'enquête utilisés pour obtenir des estimations de chaque centre métropolitain était compris entre 173 pour Kitchener-Waterloo et 2,026 pour Toronto. Les chiffres pour les années précédentes peuvent être obtenus de la Division du revenu et des dépenses des consommateurs, de même que tout renseignement supplémentaire sur l'enquête.

Il est à noter que l'expression "région métropolitaine" ou "centre métropolitain" utilisée dans le tableau équivaut au concept du recensement de la région métropolitaine de recensement (RMR). Les estimations pour 1976 et les années subséquentes sont toutes fondées sur les limites définies pour le recensement de 1971.

L'enquête a été effectuée en même temps que l'enquête de mars 1984 sur la population active, tandis que pour les années antérieures l'enquête fut effectuée en mai.

Notes - Continued

Section 6 - Continued

Figures may not add to totals shown, due to rounding.

For additional information on the reliability of these estimates, please refer to Catalogue 64X-501 "Household Facilities and Equipment", 1977-1981 (Revised Estimates), November 1982; Household Facilities and Equipment, May 1982 and 1983, and March 1984, Catalogue 64-202, Annual.

"Oil", includes kerosene.

"Other", includes bottled gas. As of 1983, coal or coke are also included in this category. Previous to 1983, coal or coke were combined with "other", as a result figures shown may not reflect true totals due to incomplete combining of categories.

Table 6-17

For "Note", please refer to "Note", Table 6-16.

"Hot Air Furnaces", includes forced hot air and other furnaces. Figures shown may not reflect true totals due to incomplete combining of categories.

"Other", includes cookstoves, portable heaters and fireplaces.

Table 6-18

For "Note", please refer to "Note", Table 6-16.

"Refrigerators", also includes a small number of refrigerators other than electric. Previous to 1982, only electric refrigerators were included.

Table 6-19

For "Note", please refer to "Note", Table 6-16.

Electric washing machines and clothes dryers, exclude washing machines and clothes dryers outside the dwelling, e.g., in basements of apartment buildings. As of 1982, electric and gas clothes dryers are included. Previous to 1982, only electric clothes dryers were included.

Electric washing machines, includes automatic and other types.

Notes - suite

Section 6 - suite

Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

Pour de plus amples renseignements sur la fiabilité des estimations, voir "L'équipement ménager", 1977-1981 (Estimations rectifiées), novembre 1982, n° 64X-501 du catalogue; "L'équipement ménager", mai 1982 et 1983 et mars 1984, n° 64-202 du catalogue, annuel.

"Huile", comprend le kérozène.

"Autre", comprend le gaz en bouteille ou en bonbonne. En 1983 et 1984, charbon ou coke étaient aussi inclus dans cette catégorie. Avant 1983, le charbon ou le coke ont été combinés avec "autre", pour cette raison les chiffres présentés n'indiquent pas nécessairement les sommes réelles dû au fusionnement incomplet des catégories.

Tableau 6-17

Voir "Note" du tableau 6-16.

"Systèmes à air chaud", comprend le système à air chaud pulsé ou autre. Les chiffres présentés n'indiquent pas nécessairement les sommes réelles dû au fusionnement incomplet des catégories.

"Autre", comprend les cuisinières, les chaufferettes portatives et les foyers.

Tableau 6-18

Voir "Note" du tableau 6-16.

"Réfrigérateurs", comprend aussi un petit nombre de réfrigérateurs autres qu'électriques. Avant 1982, les réfrigérateurs électriques seulement étaient inclus.

Tableau 6-19

Voir "Note" du tableau 6-16.

Machines à laver et sécheuses électriques, ne comprend pas les machines à laver et les sécheuses qui sont à l'extérieur du logement, par ex., au sous-sol des immeubles d'appartements. À partir de 1982, les sécheuses électriques et à gaz sont inclus. Avant 1982, les sécheuses électriques seulement étaient inclus.

Machines à laver électriques, comprend les machines à laver automatiques et autres genres.

Matériel de camping pour la nuit, comprend les roulettes, les campeuses, les tentes roulettes, les tentes et tous les autres véhicules de camping.

Tableau 6-24

Voir "Note" du tableau 1-32.

L'indice des prix à la consommation de chaque agglomération urbaine mesure les variations de prix entre deux périodes dans cette agglomération. Aussi les IPC des villes indiquent-ils le mouvement des prix dans le temps dans chaque agglomération, mais non les différences de niveau des prix entre les villes ou bien entre les villes et le Canada. De telles comparaisons entre les villes en ce qui concerne les niveaux de prix sont illustrées à la Partie IV de la publication trimestrielle *Prix à la consommation et indices des prix*, n° 62-010 du catalogue.

Tableau 6-25

Indices des prix des logements neufs mesurent les variations dans le temps des prix de vente des entrepreneurs des maisons neuves résidentielles, lorsque les spécifications détaillées demeurent les mêmes pendant deux périodes consécutives.

Notes - Continued

Section 6 - Continued

These estimates are independently indexed to provide the published series for land. The residual, (selling price less land), which mainly relates to the current cost of the structure is also independently indexed and is presented as the house series. Except in Montréal and Québec City, where servicing of lots is an extra expense, lots are usually serviced by builders.

House prices reported by sample builders are adjusted for changes in quality of both the structures and the serviced lots including intangible variations of location to ensure similarity of specifications.

Obviously this index does not measure shelter costs and price changes for existing houses are excluded from these price surveys.

Indexes as published are final.

Notes - suite

Section 6 - suite

Ces estimations font l'objet d'une mise en indice indépendante afin d'obtenir la série publiée pour le terrain. Le reste (prix de vente moins terrain), qui se rapporte principalement au coût actuel du bâtiment, fait l'objet également d'une mise en indice indépendante et est présenté comme la série sur les maisons. A l'exception de Montréal et de Québec, où la viabilisation des terrains est une dépense supplémentaire, les lots sont habituellement viabilisés par les constructeurs.

Les prix des maisons déclarés par les entrepreneurs échantillonés sont corrigés des variations de la qualité du bâtiment et des terrains viabilisés, ce qui comprend des variations intangibles de l'endroit afin de garantir la similarité des spécifications.

Évidemment les variations de prix des maisons déjà construites sont exclues de ces enquêtes sur les prix.

Les indices publiés sont définitifs.

Section 6 - Continued

Table 6-30

This table presents some of the results of 1982 and 1983 annual surveys of traveller accommodation operations in Canada. The survey covers establishments belonging to the 1980 Standard Industrial Classification codes (SIC) 911 Hotels (including resort hotels), motels, tourist homes, tourist courts and cabins, (SIC) 913 - Camping grounds and trailer parks and (SIC) 914 - Hunting and fishing camps. The different (SIC) categories included all businesses which provide sleeping facilities in the form of rooms, cabins, cottages and/or tent or trailer spaces for guests. Other services such as the serving of meals, alcoholic beverages and entertainment may or may not be offered.

A total of 14,496 businesses in 1982 and 14,408 businesses in 1983, satisfied the traveller accommodation definitions and constituted the universes for the surveys.

The program was designed to produce estimates at the kind-of-business/provincial level and thus follow-up and imputation procedures are carried out at this level. Any data below this level should be used with caution.

Table 6-31

For "Note", please refer to "Note", Table 6-30.

Table 6-32

For "Note", please refer to "Note", Table 4-11.

For the 1981 and 1982 taxation years, changes were made to the locality boundary definitions for the province of Québec to more adequately reflect those designated by the 1976 Census.

Table 6-33

The statistics in this table refer to the manufacturing activity of establishments excluding separately located head offices, sales offices and auxiliary units. Data for 1979 and 1980 in this table are based on 1976 Census area definitions, while for 1981 the data are based on the 1981 Census area definitions.

Notes - suite

Section 6 - suite

Tableau 6-30

Ce tableau présente quelques résultats des enquêtes annuelles de 1982 et 1983 sur l'hébergement des voyageurs au Canada. L'enquête prend en compte les établissements appartenant aux catégories 911 - Hôtels (y compris hôtels de villégiature), motels, maisons de chambres pour touristes, camps et cabines de touristes, 913 - Terrains de camping et parcs de roulotte et 914 - Camps de chasse et de pêche, de la Classification 1980 des activités économiques (CAE). Elle englobe toutes les entreprises qui offrent un endroit pour dormir, qu'il s'agisse de chambres, de cabines, de chalets ou d'emplacements pour tentes ou roulotte pour les visiteurs. Ces entreprises peuvent ou non servir des repas ou des boissons alcoolisées ou offrir des divertissements.

Un total de 14,496 entreprises en 1982 et 14,408 entreprises en 1983 répondent à l'une des définitions sur les établissements d'hébergement de voyageurs et constituent l'univers des enquêtes.

Le programme a été conçu de façon à produire des estimations au niveau du genre de commerce/ province; le suivi et l'imputation se font donc à ce niveau. Toutes les données inférieures à ce niveau doivent être utilisées avec précaution.

Tableau 6-31

Voir "Note" du tableau 6-30.

Tableau 6-32

Voir "Note" du tableau 4-11.

Les limites des localités de la province de Québec ont été modifiées pour les années d'imposition 1981 et 1982 afin d'être en accord avec celles du Recensement de 1976.

Tableau 6-33

Les données présentées dans ce tableau concernent l'activité manufacturière des établissements, à l'exclusion des sièges sociaux, bureaux de vente et services auxiliaires situés ailleurs. Les données pour 1979 et 1980 dans ce tableau sont basées sur la définition de région du recensement de 1976, tandis qu'en 1981 les données sont basées sur la définition de région du recensement de 1981.

Notes - Continued

Section 6 - Continued

Table 6-34

The results are based on a questionnaire survey of individual companies and other spending agencies completed towards the end of 1984 and in January and February 1985. The figures reflect spending plans as formulated at that time.

All in all, about 24,000 establishments were surveyed for their investment intentions.

Information on capital spending intentions provides a useful indication of market conditions both in the economy at large and in particular industries.

Table 6-35

For "Note", please refer to "Note", Table 6-34.

Table 6-36

Metropolitan areas shown in this table relate to the boundaries of the 1971 Census.

The statistics are based on interviews carried out in approximately 56,000 households chosen by area sampling methods across the country. The sample represents all persons in the population 15 years of age and over residing in Canada, with the exception of: (1) residents of the Yukon and Northwest Territories, (2) persons living on Indian reserves, (3) inmates of institutions and (4) full-time members of the armed forces.

Tableau 6-34

La plupart des chiffres sont fondés sur les réponses à un questionnaire adressé aux sociétés particulières et aux autres organismes qui font des immobilisations. Comme les réponses ont été préparées vers la fin de 1984 et en janvier et en février 1985, les chiffres représentent les immobilisations projetées à ce moment-là.

L'étude a porté sur environ 24,000 entreprises commerciales.

Ces renseignements sur les projets d'immobilisations fournissent des indications utiles quant à l'état du marché dans l'économie en général et dans certaines industries particulières.

Tableau 6-35

Voir "Note" du tableau 6-34.

Tableau 6-36

Les régions métropolitaines énumérées dans ce tableau sont basées sur les limites du recensement de 1971.

Les statistiques sont fondées sur une enquête menée auprès d'environ 56,000 ménages choisis par échantillon aréolaire d'un bout à l'autre du Canada. L'échantillon représente toutes les personnes de 15 ans et plus résidant au Canada, à l'exception: (1) des résidents du Yukon et des Territoires du Nord-Ouest, (2) des personnes vivant dans des réserves indiennes, (3) des pensionnaires d'institutions et (4) des membres à plein temps des Forces armées.

Maps

Population change between 1976 and 1981 is expressed as a percentage of the total 1976 population for each census tract. Census tracts with no population in 1976 or 1981 are excluded.

Average household income is highlighted for each census tract. Data for census tracts with a total population of less than 250 persons are excluded. See Metropolitan Atlas Series, 1981, Census of Canada for "definitions and special notes" relating to income and its sources.

Cartes

La variation de la population entre 1976 et 1981 est exprimée en pourcentage de la population totale de 1976 pour chaque secteur de recensement. Les secteurs de recensement sans population en 1976 ou en 1981 sont exclus.

Le revenu moyen des ménages est illustré pour chaque secteur de recensement. Les données relatives aux secteurs de recensement dont la population totale est inférieure à 250 habitants sont exclues. Voir la publication Série d'atlas métropolitaine, Recensement du Canada de 1981, pour les "définitions et les notes spéciales" concernant le revenu et les sources de revenu.

NOTES

Section 7

Table 7-1

For "Note", please refer to "Note", Table 3-1.

For 1981, census agglomerations are now delineated according to the same criteria as census metropolitan areas (CMAs having 100,000 or more population and CAs having between 10,000 and 99,999 population). Twenty-four CAs have been added to the programme as a result of this change. At the same time, 23 CAs have been deleted from the programme as a result of raising the minimum urbanized core population from 2,000 to 10,000.

All data reported for municipalities (or census subdivisions) are based on the municipal boundaries in effect on January 1, 1981 provided the information and documentation on these boundaries were in the hands of the Census by March 1, 1981.

The figures shown in this table have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions.

NOTES

Section 7

Tableau 7-1

Voir "Note" du tableau 3-1.

En 1981, les critères utilisés pour délimiter les agglomérations de recensement sont les mêmes que ceux utilisés pour délimiter les régions métropolitaines de recensement, ces deux unités ne différant que par la taille de leur noyau urbanisé (les RMR ont une population de 100,000 et plus, alors que les AR comptent de 10,000 à 99,999 habitants). L'adoption de nouveaux critères a entraîné l'addition de 24 agglomérations de recensement au programme. En contrepartie, 23 AR ont été supprimées du programme par suite de l'augmentation du seuil de 2,000 à 10,000.

Toutes les données se rapportant aux municipalités (ou subdivisions de recensement) sont fondées sur les limites en vigueur au 1er janvier 1981, pourvu que les renseignements et la documentation sur ces limites soient parvenus aux responsables du recensement avant le 1er mars 1981.

Par souci de confidentialité, les chiffres présentés ici ont été soumis à une formule appelée "arrondissement aléatoire" qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) à un multiple de "5". Cette technique assure une bonne protection contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions.

Notes - Continued

Section 7 - Continued

The statistics in this table for 1981 are based on the 1976 definitions of Census agglomerations and centres of 10,000 population and over, while for 1982 and subsequent years are based on the 1981 Census definitions.

Table 7-7

For "Note", please refer to "Note", Table 7-1.

For the 1976 Census, the Structural Type was determined by the Census Representative. For the 1981 Census the Structural Type was determined by the respondent. As a result, analysis has shown that the 1976 data contained substantially fewer errors than the 1981 data for this variable. Comparisons between 1976 and 1981 Census data for Structural Type will therefore reveal certain inconsistencies. (Note: The count of dwellings is not in question, only how the total number of dwellings is broken down into Structural Type). These inconsistencies will vary in degree from one geographic area to another and from one Structural Type to another.

First, there are misclassifications among various types of the multiple unit structures. For example, Apartments in buildings of less than five storeys have frequently been classified as Row Houses, Semi-detached, etc. Second, there are some misclassifications between multiple and single structures. For example, a Duplex may have been misclassified as a Single Detached. Percentage changes are not therefore entirely accurate. For additional information, please refer to "Cautionary Note on Data Quality-Structural Type", enclosed with the publication. See Catalogue No. 92-903, *Occupied Private Dwelling, 1981 Census of Canada*.

Table 7-8

A dwelling equipped with steam or hot water furnace, forced hot air furnace or installed electric heating system is centrally heated. Those with heating stoves, cooking stoves, space heaters and fireplaces are without central heating.

Table 7-9

For "Note", please refer to "Note", Table 7-1.

Table 7-10

For "Note", please refer to "Note", Table 4-11.

Notes - suite

Section 7 - suite

Les statistiques de 1981 dans ce tableau sont basées sur les définitions du recensement de 1976 du concept d'agglomération urbaine et des centres urbains de 10,000 âmes et plus, tandis que les statistiques de 1982 et des années subséquentes sont basées sur les définitions du recensement de 1981.

Tableau 7-7

Voir "Note" du tableau 7-1.

Au recensement de 1976, c'est le recenseur qui a établi le type de construction, alors qu'au recensement de 1981, le recensé s'en est chargé. Le résultat de l'analyse a montré que les données de 1976 renfermaient beaucoup moins d'erreurs que celles de 1981 en ce qui concerne cette variable. Les comparaisons faites entre les données des deux recensements au sujet du type de construction révèleront donc certaines incohérences. (Nota: Le nombre de logements n'est pas remis en question, c'est seulement la façon de répartir le nombre total de logements selon le type de construction). Ces incohérences varieront en importance d'une région géographique à l'autre et d'un type de construction à l'autre.

En premier lieu, il y a eu classement erroné parmi les divers types de construction à logements multiples. Par exemple, des appartements dans des immeubles de moins de cinq étages ont fréquemment été classés comme maisons en rangée, maisons jumelées, etc. En second lieu, il y a eu erreur au niveau des constructions multiples et individuelles. Par exemple, un duplex a pu être classé par erreur comme une maison individuelle non attenante. Les variations en pourcentage ne sont donc pas entièrement exactes. Pour obtenir des informations supplémentaires, voir "Mise en garde au sujet de la qualité des données concernant le type de construction", inclus dans la publication. Voir no 92-903 du catalogue, *Logements privés occupés, Recensement du Canada de 1981*.

Tableau 7-8

Logements équipés d'un système à vapeur ou à eau chaude, système à air chaud, ou système électrique (par exemple, radiateurs de plinthe fixes) sont des logements avec chauffage central. Ceux qui sont équipés de poêle de chauffage ou de cuisine, fournaise de plancher, ou appareil électrique ou autre, par exemple foyer sont des logements sans chauffage central.

NOTES

Section 8

Table 8-1

These projections are derived from the Economic Council of Canada, CANDIDE Model 2.0, July 1984.

The optimistic assumptions include higher U.S. and overseas growth, higher investment growth, and a lower saving rate. The pessimistic assumptions include lower U.S. and overseas growth, lower investment growth, and a higher saving rate.

The base case projection shows weak investment in the short term. Neither the optimistic nor the pessimistic case includes any changes in domestic fiscal policy, and any changes from the base case in domestic credit conditions are a response to changes in credit market conditions in the United States.

The statistics in this table are derived from projections prepared by Canada Mortgage and Housing Corporation. For an explanation of the methods used in arriving at these figures, please refer to "Population, Households and Housing Requirements for the Census Metropolitan Areas of Canada". 1976-2001, published by Market Forecasts and Analysis Division, Canada Mortgage and Housing Corporation, Ottawa, November, 1981.

NOTES

Section 8

Tableau 8-1

Les projections proviennent du Conseil économique du Canada, modèle CANDIDE 2.0, juillet 1984.

Les hypothèses optimistes comprennent une croissance plus élevée aux États-Unis et outre-mer, une hausse plus rapide de l'investissement et un taux d'épargne plus faible. Les hypothèses pessimistes incluent une croissance moins élevée aux États-Unis et outre-mer, une hausse moins rapide de l'investissement et un taux d'épargne plus élevé.

Les projections du scénario de référence indiquent qu'à court terme, les dépenses d'investissement demeureront faibles. Aucune modification de la politique budgétaire intérieure n'a été apportée aux fins de l'élaboration de l'un ou l'autre des scénarios. De plus, tout changement par rapport au scénario de référence dans les conditions de crédit au Canada est imputable à des changements dans les conditions du marché du crédit aux États-Unis.

Pour de plus amples renseignements, veuillez consulter le document de référence.

Table 8-9

For "Note", please refer to "Note", Table 8-6.

Table 8-10

The estimates were prepared by the U.S. Bureau of the Census. The method used to develop the projections involves preparations of projections of each of the components of population change - births, deaths, and net immigration - and the combination of these with July 1 estimates of the current population. Projections for States incorporate further assumptions about the redistribution of population as a consequence of internal migration.

Notes - suite

Section 8 - suite

La Société Canadienne d'hypothèque et de logement n'a pas préparé de mise à jour pour ces projections.

Tableau 8-7

En produisant les projections sur les ménages et les familles, la population par sexe et par groupes d'âge (fondée sur le recensement de 1976) a d'abord été divisée selon l'état matrimonial. Le nombre de ménages et celui des familles ont ensuite été obtenus au moyen des taux de chefs.

Pour de plus amples renseignements, voir *Projections des ménages et des familles pour le Canada et les provinces jusqu'en 2001*, n° 91-522 du catalogue, hors série.

Tableau 8-8

Voir "Note" du tableau 8-7.

Tableau 8-9

Voir "Note" du tableau 8-6.

Tableau 8-10

Les estimations ont été calculées par le U.S. Bureau of the Census. La méthode utilisée pour établir les projections consistait à préparer des projections pour chacune des composantes des variations démographiques - naissances, décès et migration nette - et à combiner ces projections aux estimations du 1er juillet de la population courante. Les projections des États comportent d'autres hypothèses sur la redistribution de la population par suite de la migration interne.

Definitions

Section 9

Définitions

DEFINITIONS

Balance of International Payments

A systematic record of the economic transactions that take place between Canadian residents and the rest of the world over a specified period of time.

Business Bankruptcy

Is identified as being a bankruptcy which is chiefly attributable to the liabilities incurred as a result of the carrying on of a commercial venture or business and includes proprietorships, partnerships and Limited Companies.

Census

Agglomeration. Refers to the main labour market area of an urbanized core (or continuously built-up area) having between 10,000 and 99,999 population. CAs are created by Statistics Canada and are usually known by the name of the urban area forming their urbanized core. They contain whole municipalities (or census subdivisions). CAs are comprised of (1) municipalities completely or partly inside the urbanized core; and (2) other municipalities if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core, or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

Since a CA must contain whole census subdivisions, its limits may fall within, or extend beyond, the actual labour market area. The differences may be significant in those parts of Canada where census subdivisions cover particularly large areas of land.

Census agglomerations for the 1981 Census are now delineated according to the same criteria as census metropolitan areas (CMAs) and differ only in the size of their urbanized cores (CMAs having 100,000 or more population). Twenty-four CAs have been added to the programme as a result of this change. At the same time, 23 CAs have been deleted from the programme as a result of raising the minimum urbanized core population from 2,000 to 10,000. One CA, Trois-Rivières, Québec, has been transferred to the CMA programme as a result of recent growth in its urbanized core. The net effect of the above changes has been to maintain the total number of CAs at 88.

In 1971 and 1976, CAs were comprised of at least two adjacent municipal entities. These entities had to be at least partly urban and belong to an urbanized core having a population of 2,000 or more. The urbanized core included a largest city and remainder, each with a population of 1,000 or more, and had a population density of at least 1,000 persons per square mile (386 per square kilometre).

Metropolitan area. Refers to the main labour market area of an urbanized core (or continuously built-up area) having 100,000 or more population. CMAs are created by Statistics Canada and are usually known by the name of

DEFINITIONS

Balance des paiements internationaux

L'enregistrement systématique des opérations économiques qui ont lieu entre les résidents canadiens et le reste du monde au cours d'une période donnée.

Faillite d'affaires

Signifie une faillite qui est principalement attribuable aux dettes contractées en raison de l'exploitation d'une entreprise commerciale ou d'affaires et qui inclut les entreprises à propriétaire unique, les sociétés en nom collectif et les sociétés à responsabilité limitée.

Recensement

Agglomération. Principal marché du travail d'un noyau urbanisé (ou d'une zone bâtie en continu) comptant entre 10,000 et 99,999 habitants. Les AR sont créées par Statistique Canada et sont ordinairement désignées par le nom de la région urbaine qui forme leur noyau urbanisé. Elles renferment des municipalités (ou subdivisions de recensement) entières. Une AR comprend (1) les municipalités qui se trouvent en totalité ou en partie à l'intérieur du noyau urbanisé et (2) d'autres municipalités si a) au moins 40% de la population active occupée demeurant dans la municipalité travaille dans le noyau urbanisé ou si b) au moins 25% de la population active occupée travaillant dans la municipalité demeure dans le noyau urbanisé.

Puisqu'une AR doit renfermer des subdivisions de recensement entières, ses limites peuvent se trouver dans le secteur réel du marché du travail, ou s'étendre en dehors de celui-ci. Les différences peuvent être importantes dans les régions du Canada où les subdivisions de recensement ont une très grande superficie.

Les agglomérations de recensement pour le recensement de 1981 sont maintenant délimitées selon les mêmes critères qui sont utilisés pour les régions métropolitaines de recensement (RMR). La seule chose qui différencie une AR d'une RMR est la taille du noyau urbanisé (les RMR comptent 100,000 habitants et plus). L'application de ces critères a entraîné l'inclusion de 24 AR au programme courant. Par ailleurs, il a fallu en supprimer 23 par suite de la décision de porter de 2,000 à 10,000 le chiffre de population minimum des noyaux urbanisés. Une AR, celle de Trois-Rivières au Québec, a été intégrée au programme des RMR en raison du récent accroissement de son noyau urbanisé. Le nombre total d'AR demeure donc 88.

En 1971 et 1976, les AR étaient composées d'au moins deux municipalités voisines. Ces municipalités devaient être au moins partiellement urbaines et faire partie d'un noyau urbanisé de 2,000 habitants et plus. Le noyau urbanisé comprenait la ville principale et le reste du noyau urbanisé, chacun comptant 1,000 habitants ou plus, et sa densité était d'au moins 1,000 habitants au mille carré (386 au kilomètre carré).

Région métropolitaine. Principal marché du travail d'un noyau urbanisé (ou d'une zone bâtie en continu) comptant 100,000 habitants ou plus. Les RMR sont créées par Statistique Canada et sont ordinairement désignées par le nom de la région urbaine

Definitions — Continued

the urban area forming their urbanized core. They contain whole municipalities (or census subdivisions). CMAs are comprised of (1) municipalities completely or partly inside the urbanized core; and (2) other municipalities if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core, or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

Since a CMA must contain whole census subdivisions, its limits may fall within, or extend beyond, the actual labour market area. The differences may be significant in those parts of Canada where census subdivisions cover particularly large areas of land. Census metropolitan areas may also differ from Metropolitan Areas designated by local authorities for planning or other purposes.

For the 1981 Census, CMAs remain unchanged from 1976 except for minor adjustments to respect new municipal limits. Trois-Rivières, Québec, becomes Canada's 24th CMA as a result of recent growth in its urbanized core.

In 1971, CMAs were defined as main labour market areas but were delineated according to alternate criteria based on labour force composition, population growth rate and accessibility.

Census metropolitan areas (CMAs) and census agglomerations (CAs) are divided into three parts: urbanized core, urban fringe and rural fringe. The parts are always made up of complete enumeration areas, but often comprise only parts of municipalities (or census subdivisions). Not all three parts will necessarily be found in each CMA or CA.

Chain Store Organization (Retail)

Normally an organization operating four or more retail outlets in the same kind of business under the same legal ownership. Exceptions to this definition are department stores which are treated statistically as chains even though they may fail to meet the criteria of operating four retail outlets. Excluded are independent outlets associated with a franchise operation.

Commercial Vehicles

Commercial vehicles are limited solely to trucks and buses; this designation applies regardless of the use to which such vehicles are put.

Définitions — suite

qui forme leur noyau urbanisé. Elles renferment des municipalités (ou subdivisions de recensement) entières. Une RMR comprend (1) les municipalités qui se trouvent en totalité ou en partie à l'intérieur du noyau urbanisé et (2) d'autres municipalités si a) au moins 40% de la population active occupée demeurant dans la municipalité travaille dans le noyau urbanisé ou si b) au moins 25% de la population active occupée travaillant dans la municipalité demeure dans le noyau urbanisé.

Puisqu'une RMR doit renfermer des subdivisions de recensement entières, ses limites peuvent se trouver dans le secteur réel du marché du travail, ou s'étendre en dehors de celui-ci. Les différences peuvent être importantes dans les régions du Canada où les subdivisions de recensement ont une très grande superficie. Il est également possible que des régions métropolitaines de recensement ne concordent pas avec les régions métropolitaines désignées par les autorités locales à des fins de planification ou autres.

Pour le recensement de 1981, les RMR sont les mêmes qu'en 1976, abstraction faite des petites modifications apportées pour respecter les nouvelles limites des municipalités. A la suite de l'accroissement récent de son noyau urbanisé, Trois-Rivières, au Québec, est devenue la vingt-quatrième RMR.

En 1971, la RMR était définie comme le principal marché du travail, mais était délimitée en fonction d'autres critères fondés sur la composition de la population active, le taux de croissance démographique et l'accessibilité.

Les régions métropolitaines de recensement (RMR) et les agglomérations de recensement (AR) se divisent en trois parties: noyau urbanisé, banlieue urbaine et banlieue rurale. Les parties sont toujours formées de secteurs de dénombrement entiers, mais ne comprennent souvent que des parties de municipalités (ou subdivisions de recensement). Les trois parties ne se retrouvent pas toutes nécessairement dans chaque RMR ou AR.

Magasins à succursales (de détail)

Ordinairement, une entreprise exploitant au moins quatre points de vente au détail dans un même genre de commerce sous une même appartenance juridique. Ne sont pas compris dans cette définition les grands magasins qui sont considérés du point de vue statistique comme des magasins à succursales même s'ils ne répondent pas aux critères qui exigent l'exploitation de quatre points de vente au détail. Sont exclus les points de vente indépendants qui sont exploités en concession.

Véhicules utilitaires

Les véhicules utilitaires comprennent seulement les camions et les autobus; cette désignation s'applique quelle que soit leur utilisation.

Definitions — Continued

Constant Dollars

The main object of the deflation process is to produce volume series in which quantities change from year to year while prices are held constant. To derive such volume series, each individual value series making up the Gross National Expenditure should be deflated with currently weighted price indexes, that is, price indexes whose quantity weights in any given year represent the distribution of expenditures within that year (i.e., Paasche-type price indexes). The sum of these deflated value (or constant dollar volume) series equals deflated, or constant dollar, Gross National Expenditure.

Définitions — suite

Dollars constants

Ce que l'on cherche avant tout par l'emploi de ce procédé, c'est à produire des séries de volumes dans lesquelles les quantités varient d'une année à l'autre pendant que les prix sont maintenus constants. Pour y arriver, il faut corriger de la variation des prix chaque série de valeur constituant la dépense nationale brute à l'aide d'indices de prix à pondération courante, c'est-à-dire d'indices de prix dont les coefficients de pondération de quantité pour une année donnée représentent la distribution des dépenses pour cette année-là. Ce sont donc des indices de Paasche. La somme de ces séries de valeurs ainsi corrigées qui deviennent des séries de volumes (en dollars constants), est égale à la dépense nationale brute dévaluée, donc exprimée en dollars constants.

Construction

Building permit. This classification is one of buildings or structures for which a building permit was issued by a municipality. A building permit may be issued by municipalities for: construction of new buildings; alterations, additions or conversions to existing buildings; installations of heating, plumbing and other facilities; erection of signs, posters, canopies, etc., and other improvements to property.

Conversions. Consist of dwelling units added by conversion of existing structures.

Cottages. Seasonal dwellings such as summer homes and house-boats.

Number of units. As shown under "Residential construction" indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains six apartments, it will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included.

Value of residential construction. The classification for residential construction is intended to reflect the value of building permits issued for new dwellings: single, seasonal, double, row, apartments and conversions; for alterations and improvements to existing dwellings: additions, structural changes, residential garages and swimming pools, and other improvements to existing structures.

Consulting Engineer

An individual who is engaged primarily in the business of providing consulting engineering services and whose main source of revenue is derived from the provision of such professional engineering services.

Construction

Permis de construction. La classification utilisée dans la présente publication porte sur les immeubles ou bâtiments à l'égard desquels la municipalité a émis un permis de bâtir. Une municipalité peut émettre un permis de bâtir aux fins suivantes: construction de nouveaux bâtiments, travaux de modifications, rajouts ou transformations, installation d'appareils de chauffage, de plomberie et autres commodités du genre; érection d'enseignes, d'affiches, de marquises, etc., et autres améliorations d'immeubles.

Transformation. Comprend le nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

Chalet. Toute habitation saisonnière comme les maisons d'été et les maisons flottantes.

Nombre d'unités. Apparaissant sous la rubrique "construction domiciliaire", correspond au nombre d'unités de logements indépendantes ajoutées. Par exemple, une nouvelle maison d'appartements de six logements comptera pour six unités de logements. Dans le cas de transformation de bâtiments en unités de logements additionnelles, on tient compte du nombre de nouvelles unités créées.

Valeur de la construction domiciliaire. La classification des bâtiments **domiciliaires** a pour but de montrer la valeur des permis émis pour des logements nouveaux: simple, saisonnier, double, en rangée, d'appartement et de transformation; la valeur des travaux de modification et d'amélioration à des logements existants: rajout, modification, garages, piscines et autres améliorations.

Ingénieur-conseil

L'ingénieur-conseil est celui dont la fonction principale est de fournir des services de conseil en matière de génie et dont le revenu provient en majeure partie de la prestation de ces services.

Definitions — Continued

Current Account

Records transactions involving currently produced goods and services; it shows to what extent Canada is drawing on the real resources of the rest of the world or vice versa to provide for current consumption and investment. Counted are imports and exports of merchandise and services. Also included in the current account are international unilateral transfers. These are transactions for which no *quid pro quo* is received — they are in the nature of a gift. Examples would be pensions paid by foreign governments to Canadian residents (receipts) or Canadian residents' transfers of cash to relatives abroad (payments).

The balance on current account excluding transfer receipts and payments corresponds to the entries comprising of net exports of goods and services in the National Income and Expenditure Accounts.

Current Dollars

Prices of the current period are used to value quantities.

Debt

Gross debt. Represents the total liabilities of the Government of Canada. It is derived by adding the other liabilities of the government to unmatured debt, net of holdings of its own securities.

Net debt. Represents the excess of gross liabilities over the government's net recorded assets. In effect, the net debt is the accumulated budgetary deficit since confederation.

Public debt charges. Represents interest payments on public debt.

Unmatured debt. Represents financial obligations resulting from bonds, treasury bills and other certificates of indebtedness (notes and loans payable in foreign currencies) issued by the Government of Canada, which mature or are redeemable in the future.

Department Stores

A retail outlet is defined as a department store if it possesses the following characteristics:

It must sell the following general lines of merchandise:

- (a) **Family clothing and apparel.** This commodity group is composed of some or all of the following

Définitions — suite

Compte courant

Enregistre les opérations portant sur les biens et services produits au cours de la période observée; il indique dans quelle mesure le Canada fait appel aux ressources "matérielles" du reste du monde ou inversement, pour sa consommation et ses investissements. Les importations et les exportations de marchandises sont prises en compte. Le compte courant vise également les transferts unilatéraux internationaux. Ce sont là des opérations qui ne prévoient aucun paiement en retour; elles sont de la nature des cadeaux. On peut citer comme exemples les pensions versées par les gouvernements étrangers aux résidents canadiens à leurs proches à l'étranger (paiements).

Le solde du compte courant sans les recettes et les paiements de transfert correspond aux écritures décrivant les exportations nettes de biens et de services dans les comptes nationaux du revenu national et de la dépense nationale.

Dollars courants

Les prix de la période courante sont utilisés pour évaluer les quantités.

Dette

Dette brute. Représente le total du passif du gouvernement du Canada. Elle découle de l'addition des autres éléments du passif du gouvernement du Canada à la dette non échue, nette de la dette non échue détenue par le gouvernement.

Dette nette. Représente l'excédent du passif brut du gouvernement sur l'actif comptabilisé net. En fait la dette nette est équivalente au déficit accumulé depuis la confédération.

Frais de la dette publique. Représente les paiements des intérêts de la dette publique.

Dette non échue. La dette non échue représente les obligations financières résultant des obligations, des bons du Trésor et de reconnaissances de dettes (effets et prêts à payer en devises étrangères) émis par le gouvernement du Canada qui ne sont pas encore arrivés à échéance.

Grands magasins

Un magasin de détail est un grand magasin, s'il possède les caractéristiques suivantes:

Il doit vendre les articles des grandes séries suivantes:

- a) **Vêtements pour la famille.** Ce groupe comprend les articles suivants: robes pour dames et jeunes filles, robes

Definitions — Continued

lines: women's and misses' dresses, housedresses, aprons and uniforms; women's and misses' coats and suits; women's and misses' sportswear; furs; infants' and children's wear; girls' and teenage wear; lingerie and women's sleepwear; intimate apparel; millinery; women's and girls' hosiery; women's and girls' gloves, mitts and accessories; women's, misses' and children's footwear; men's clothing; men's furnishings; boys' clothing and furnishings; men's and boys' footwear.

Note: the outlets must sell at least six of the commodity lines listed above, with at least one of the commodities being men's and boy's clothing or furnishings. At least 20% of the outlet's total sales must be derived from the family clothing and apparel group.

- (b) **Furniture, appliances and home furnishings.** This commodity group is composed of some or all of the following lines: linens and domestics; china and glassware; home furnishings; furniture, wooden and upholstered goods for living-room, dining-room and bedroom; major appliances; TV, radio and music; hardware and housewares.

Note: the outlet must sell at least four of the commodity lines listed above, with at least one of the commodities being furniture (wooden and upholstered goods for dining-room and/or living-room and/or bedroom). At least 10% of the outlet's total sales must be derived from the furniture, appliance and home furnishings group.

- (c) **All other (miscellaneous).** This category includes all commodities sold by the outlet but not shown above, **such as:** toiletries, cosmetics and drugs; photographic equipment and supplies; piece goods; notions and smallwares; jewellery; sporting goods and luggage; stationery, books and magazines; and food.

Note: the outlet must sell at least three different commodity lines with not one of these lines representing more than 50% of the **total** store sales. At least 10% of the outlet's total sales must be derived from the "All other or miscellaneous groups".

For the purposes of this definition, the business done by concessions located in department store outlets will be considered as part of the overall business of the outlet in which they are located. However, sales of an associated **food department** (or store) should be included only if it is an integral part of the overall department store operation and is not identified to the public by any name which differs from that of the department store with which it is associated.

A junior department store. Is defined as a retailing entity which sells the same wide range of goods (see

Définitions — suite

de ménage, tabliers et uniformes; manteaux et tailleur pour dames et jeunes filles; vêtements de sport pour dames et jeunes filles; fourrures; vêtements de bébés et d'enfants; vêtements de fillettes et d'adolescentes; lingerie et vêtements de nuit pour dames; sous-vêtements, chapeaux; bas pour dames et fillettes; gants, moufles et articles de parure pour dames et fillettes; chaussures pour dames, jeunes filles et enfants; vêtements pour hommes; articles d'habillement pour hommes; vêtements et articles d'habillement pour garçons; chaussures pour hommes et garçons.

Nota: le magasin doit tenir au moins six des séries mentionnées ci-dessus, dont au moins une doit être les vêtements ou articles d'habillement pour hommes et garçons. Au moins 20% des ventes globales du magasin doivent se faire dans le groupe de vêtements pour la famille.

- b) **Meubles, appareils et articles d'ameublement ménager.** Ce groupe comprend les articles suivants: literie et linge de maison; porcelaine et verrerie; articles d'ameublement ménager; meubles de bois ou rembourrés pour salle de séjour, salle à manger ou chambre à coucher; gros appareils; télévision, radio et musique; quincaillerie et articles de ménage.

Nota: le magasin doit tenir au moins quatre des séries mentionnées ci-dessus, dont au moins une doit être des meubles (de bois ou rembourrés pour salle à manger et (ou) salle de séjour et (ou) chambre à coucher). Au moins 10% des ventes globales du magasin doivent provenir du groupe des meubles, appareils et articles d'ameublement ménager.

- c) **Tous les autres articles (divers).** Cette catégorie comprend toutes les marchandises que tient le magasin mais qui ne figurent pas ci-dessus, **tels que:** articles de toilette, cosmétiques et médicaments; appareils et fournitures photographiques; tissus à la pièce; mercerie et menus articles; bijouterie; articles de sport et valises; papeterie, livres et revues; et aliments.

Nota: le magasin doit tenir au moins trois des séries mentionnées ci-dessus, dont aucune ne doit représenter plus de 50% des ventes **globales** du magasin. Au moins 10% des ventes globales du magasin doivent provenir des groupes "Tous les autres articles ou divers".

Aux fins de la présente définition, les affaires réalisées par les concessions établies dans les grands magasins seront considérées comme partie des affaires globales du magasin où sont établies les concessions. Toutefois, les ventes d'un **rayon** (ou magasin) **d'alimentation** associé ne seront incluses que si le rayon ou magasin fait partie intégrante de l'exploitation générale du grand magasin et n'est pas connu du public sous un nom différent de celui du grand magasin auquel il est associé.

Un grand magasin populaire. Est défini comme étant un point de vente au détail qui offre la même vaste gamme d'articles (voir

Definitions — Continued

department store definition) that are sold in the more traditional (major) department stores and is popularly described as a discount operation.

Direct Selling

Direct selling refers to the substantial volume of consumer goods sold to the household consumer for his personal use by other than the regular retail store outlet, department store, chain store or independent retail dealer. This occurs at all levels in the movement of goods from the primary producer or importer to the consumer; at the agricultural level by greenhouse and nursery operators and some market gardeners; at the manufacturing stage through sales exclusively to employees at company-operated on-premises' stores, or through integrated sales divisions using mail-order or door-to-door canvassers; by some wholesalers and importers, by specialized direct-sellers and through vending-machine operators.

Earnings

See, wages and salaries.

Employed

The employed includes all persons who, during the reference week:

- (a) did any work at all
- (b) had a job but were not at work due to:
 - own illness or disability
 - personal or family responsibilities
 - bad weather
 - labour dispute
 - vacation
 - other reason not specified above (excludes persons on layoff and persons whose job attachment was to a job to start at a definite date in the future).

Establishment

The smallest unit which is a separate operating entity and capable of reporting all of the basic industrial statistics: materials and supplies; goods purchased for resale (as such); fuels and power consumed; number of employees and their pay; inventories; and shipments or sales.

Définitions — suite

la définition d'un grand magasin) que les grands magasins traditionnels et qui est généralement considéré comme un magasin à prix réduits.

Ventes directes

Par ventes directes, on entend les nombreuses ventes de biens de consommation au consommateur final pour son usage personnel qui ne passent pas par les points de vente au détail habituels, c'est-à-dire les grands magasins, les magasins à succursales, les magasins de détaillants indépendants. La vente directe peut intervenir à tous les stades du mouvement des biens entre le producteur primaire ou l'importateur et le consommateur; dans le secteur agricole, elle peut être faite par les exploitants de serres ou de pépinières et certains maraîchers; dans le secteur manufacturier, elle s'effectue par le truchement de magasins internes exploités par une entreprise au profit de ses employés ou encore de services de vente par correspondance ou de démarchage intégrés à l'entreprise. La vente directe est aussi le fait de certains grossistes et importateurs d'entreprises spécialisées dans ce domaine et d'entreprises qui desservent les exploitants de machines distributrices.

Rémunérations

Voir, traitements et salaires.

Personnes occupées

Entrent dans cette catégorie toutes les personnes qui, pendant la semaine de référence:

- a) ont fait un travail quelconque
- b) avaient un emploi mais n'étaient pas au travail pour l'une des causes suivantes:
 - maladie ou invalidité
 - obligations personnelles ou familiales
 - mauvais temps
 - conflit du travail
 - vacances
 - autre raison non précisée ci-dessus (à l'exception des personnes mises à pied et des personnes qui devaient commencer à travailler à une date future déterminée).

Établissement

La plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques: matières et fournitures utilisées; marchandises achetées pour la revente (en l'état); combustible et énergie consommés; nombre de salariés et rémunérations; stocks; et livraisons ou ventes.

Family

Census family. Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in the census family tables. This terminology applies to Census years 1971, 1976 and 1981.

Census family structure. Refers to the classification of census families into husband-wife families (with or without children present) and lone-parent families by sex of parent.

Census family type. Refers to the classification of census families in terms of whether or not they maintain their own household (i.e., whether the person responsible for household payments - rent, or mortgage, or taxes, or electricity, etc. - is a member of a census family).

Primary family. Refers to the census family in which a person responsible for household payments is a member. It is therefore a maintaining family.

Secondary family. Refers to any census family in which a person responsible for household payments is not a member. It is therefore not a maintaining family.

Family persons. Refers to household members who belong to a census family. They, in turn, are further classified as follows:

Husband and wife. Refer to persons living in the same dwelling as their spouse. Persons living common-law are considered, for census purposes, as now married, regardless of their legal marital status, and accordingly appear as a husband-wife family in the relevant tables.

Lone parent. Refers to a mother or a father, with no spouse present, living in a dwelling with one or more never-married children.

Child. Refers to sons and daughters (including adopted and step-children) who have never married, regardless of age, and are living in the same dwelling as their parent(s). Sons and daughters who have ever been married, regardless of their marital status at enumeration, are not considered as members of their parents' family, even though they are living in the same dwelling.

Family status. Refers to the classification of the population into family and non-family persons.

Definitions — suite

Famille

Famille de recensement. Époux et épouse (avec ou sans enfants jamais mariés, peu importe leur âge) ou un parent seul (peu importe son état matrimonial) avec un ou plusieurs enfants jamais mariés (quel que soit leur âge) vivant dans le même logement. Aux fins du recensement, les personnes vivant en union libre sont considérées comme "actuellement mariées", peu importe leur état matrimonial légal; elles figurent donc comme une famille époux-épouse dans les tableaux sur la famille de recensement. Cette définition s'applique aux années de recensement 1971, 1976 et 1981.

Structure de la famille de recensement. Catégorisation des familles de recensement en familles époux-épouse (avec ou sans enfants présents) et en familles monoparentales selon le sexe du parent.

Genre de famille de recensement. Les familles de recensement sont classées selon qu'elles soutiennent ou non leur propre ménage, c'est-à-dire que la personne qui est responsable du paiement du loyer ou de l'hypothèque, ou des taxes, ou de l'électricité, etc., fait partie ou non d'une famille de recensement.

Famille principale. Famille de recensement dont fait partie la personne responsable des paiements du ménage. Il s'agit alors d'une famille qui assure le soutien de son propre ménage.

Famille secondaire. Famille de recensement dont la personne responsable des paiements du ménage ne fait pas partie. Il s'agit alors d'une famille qui n'assure pas le soutien de son propre ménage.

Personnes faisant partie d'une famille. Membres d'un ménage qui font partie d'une famille de recensement. Ces personnes sont classées comme suit:

Époux ou épouse. Personne qui habite le même logement que son conjoint. Les personnes vivant en union libre sont considérées, aux fins du recensement, comme actuellement mariées, quel que soit leur état matrimonial légal, et figurent donc comme des familles époux-épouse dans les tableaux.

Parent seul. Mère ou père, sans conjoint, qui habite un logement avec un ou plusieurs enfants célibataires (jamais mariés).

Enfant. Fils et filles (y compris les enfants adoptés et les enfants d'un autre lit) qui ne se sont jamais mariés, peu importe leur âge, et qui vivent dans le même logement que leurs parents. Les fils et les filles qui se sont déjà mariés, peu importe leur état matrimonial au moment du recensement, ne sont pas considérés comme des membres de la famille de leurs parents, même s'ils vivent dans le même logement.

Situation des particuliers dans la famille. Catégorisation de la population en personnes faisant partie d'une famille et en personnes hors famille.

Definitions — Continued

Non-family persons. Refers to household members who do not belong to a census family. They may be **related** to the household reference person - Person 1 - (e.g., brother-in-law, cousin, grandparent) or **unrelated** (e.g., lodger, room-mate, employee). A person living alone is always a non-family person.

As of the 1976 Census, unrelated wards, foster and guardianship children, whether or not pay was received, are classified and tabulated as lodgers rather than as children in families (as had been the previous census practice), in order to adhere more closely to the literal definition and meaning of children (i.e., sons and daughters) in census families.

The published data for census family status for 1971, 1976 and 1981 are comparable, although census family status as defined in the **Dictionary of the 1971 Census terms** corresponds to the current definition of census family structure.

Farm

A farm, ranch, or other agricultural holding with sales of agricultural products during the past 12 months of \$250 or more.

Gross Domestic Product at Market Prices

The term "at Market Prices" signifies that Gross National Product includes the following: Net national income at factor cost, Indirect taxes less subsidies, Capital consumption allowances and miscellaneous valuation adjustments, and Residual error of estimate.

Gross National Expenditure

Business gross fixed capital formation. Includes expenditures for new construction and new machinery and equipment (on a gross basis before deductions for depreciation or obsolescence of existing capital facilities) by private and government business enterprise and private non-commercial institutions, and outlays on new residential construction by individuals and private investors.

Export of goods and services. Included with exports are: (1) interest and dividends received from non-residents, (2) gold production available for export, (3) travel expenditures of non-residents in Canada, and (4) freight and shipping credits earned on Canadian account. Shipments of military equipment to NATO countries under the Defence Appropriation Act of 1950, are excluded.

Définitions — suite

Personnes hors famille. Membres d'un ménage qui ne font pas partie d'une famille de recensement. Ils peuvent être **apparentés** à la personne repère du ménage, la Personne 1 (par ex., beau-frère, cousin ou grand-père) ou **non apparentés** (par ex., chambreur, compagne d'appartement ou employé). Les personnes qui vivent seules sont toujours considérées comme des personnes hors famille.

Depuis le recensement de 1976, les enfants en foyer nourricier, les enfants en tutelle et les pupilles non apparentés, peu importe si une rémunération a été versée ou non pour leur garde, sont considérés comme des chambreurs et non comme des enfants dans une famille (comme c'était le cas aux recensements précédents) afin de respecter davantage la définition et le sens littéral du terme enfant (c.-à-d. fils ou fille) dans la famille de recensement.

Les données publiées de 1971, 1976 et 1981 sur la situation des particuliers dans la famille de recensement peuvent être comparées, quoique la définition de ce concept dans le **Dictionnaire des termes du recensement de 1971** correspond à la définition actuelle de la structure de la famille de recensement.

Ferme

Une ferme, ranch, ou une autre exploitation agricole dont les ventes de produits agricoles se sont élevées à \$250 ou plus au cours des douze derniers mois.

Produit domestique brut aux prix du marché

Le terme "aux prix du marché" signifie que le produit national brut comprend les items suivants: le revenu national net au coût des facteurs, les impôts indirects moins les subventions, les provisions pour consommation de capital et ajustements divers et l'erreur résiduelle.

Dépense nationale brute

Formation brute de capital fixe des entreprises. Comprend les dépenses des entreprises en construction neuve et en machines et matériel neufs (sur une base brute avant déduction pour amortissement ou obsolescence des installations de nature capitale existantes) par des entreprises privées ou publiques et par des entreprises sans but lucratif et les dépenses des particuliers et les investisseurs particuliers au titre de la construction résidentielle neuve.

Exportations de biens et de services. Les exportations comprennent: (1) les intérêts et dividendes reçus des non-résidents, (2) la production d'or disponible pour l'exportation, (3) les dépenses touristiques des non-résidents au Canada, et (4) les crédits au titre du transport de marchandises accordées au Canada. Les livraisons de matériel militaire au pays de l'OTAN en vertu de la Loi de 1950 sur les crédits de défense sont exclues.

Definitions — Continued

Government current expenditure. Includes net purchases of government commodity agencies and the defence production revolving fund. It excludes shipments of previously produced military equipment to NATO countries, but includes replacements of new equipment.

Government expenditure on goods and services. Includes expenditure by federal, provincial and municipal governments (except for government business enterprises but including municipal school services). It consists of: (1) purchases from Canadian businesses and non-residents, (2) foreign aid, (3) wages and salaries of government employees, (4) military pay, allowances and expenditures both in Canada and abroad, and (5) an imputed net rent and capital consumption allowances on government-owned buildings.

Government gross fixed capital formation. Includes outlay of new durable assets such as building and highway construction by governments, other than government business enterprises. It includes defence plant and equipment.

Imports of goods and services. Included with imports are: (1) interest and dividends paid to non-residents, (2) travel expenditures of Canadians abroad, and (3) freight and shipping charges incurred by Canada on foreign account.

Personal expenditure on consumer goods and services. Personal expenditure on consumer goods and services is the largest single component of Gross National Expenditure. Around 60% of the Nation's total production is purchased in final markets for consumer use. Such outlays include personal expenditure for durable goods, such as household appliances and furniture, semi-durable goods, such as clothing and footwear, non-durable goods, such as food, alcoholic beverages and tobacco; and expenditure for a wide variety of services, covering such outlays as gross rents (including the rental value of owner-occupied housing), recreation, transportation costs and personal care service costs.

Free board and lodging and other income in kind for which an imputation is made are also included in personal expenditure, as if persons received income equal to the value of such goods and services and then purchased these items. An imputed space rent on owner-occupied houses is included in both rental income of persons and in personal expenditure. Also included are the operating costs of private non-commercial institutions. In addition, the operating costs and profits (premiums less claims) of life insurance companies are included to reflect the value of the services rendered by such companies. The estimates also cover expenditures of Canadian residents temporarily abroad; these expenditures are offset by a negative entry under imports of goods and services, so that Gross National Expenditure as a whole is not affected. To avoid double counting, an

Définitions — suite

Dépenses publiques courantes. Compriment les achats nets des organismes publics et le fond renouvelable de la production de défense. Ne sont pas prises en compte les expéditions d'équipement militaire produit antérieurement et destiné au pays de l'OTAN; y figure par contre le matériel remplaçant le nouvel équipement.

Dépenses publiques en biens et services. Compriment les dépenses des administrations fédérale, provinciales et municipales (sauf les entreprises publiques mais incluant les services scolaires municipaux). Compriment: (1) les achats des entreprises canadiennes et des non-résidents, (2) l'aide étrangère, (3) les traitements et salaires des fonctionnaires, (4) les soldes, indemnités et dépenses militaires au Canada et à l'étranger, et (5) le loyer net imputé et les provisions pour consommation de capital à l'égard des édifices publics.

Formation brute de capital fixe des administrations. Comprend les dépenses pour les biens durables neufs comme la construction d'édifices et de routes par les administrations, mais ne porte pas sur les entreprises publiques. Comprend les installations et le matériel militaires.

Importations de biens et services. Les importations comprennent: (1) les intérêts et dividendes payés à des non-résidents, (2) les dépenses touristiques des Canadiens à l'étranger, et (3) les frais de livraison de marchandises encourus par le Canada sur le compte d'autres pays.

Dépenses personnelles en biens et services de consommation. Les dépenses personnelles en biens et services de consommation constituent la plus importante composante de la dépense nationale brute. Près de 60% de la production totale de la nation est vendue sur les marchés finals au bénéfice des consommateurs. Ces dépenses comprennent les dépenses personnelles en biens durables comme les appareils et les meubles ménagers, les biens semi-durables comme les vêtements et les chaussures, les dépenses en biens non durables comme les aliments, les boissons alcooliques et le tabac, et enfin les dépenses visant un large éventail de services, entre autres les loyers bruts (y compris la valeur locative des logements occupés par leur propriétaire), les dépenses au titre des loisirs, les coûts du transport et de services de soin personnel.

Le gite et le couvert fournis gratuitement ainsi que les autres revenus en nature pour lesquels on procède à une imputation sont également pris en compte dans les dépenses personnelles, comme si les personnes recevaient un revenu d'un montant égal à la valeur de ces biens et services et achetaient ensuite ces derniers. Un loyer d'espace de logement imputé pour les maisons occupées par leur propriétaire est inclus dans le revenu des particuliers au titre de la location et dans les dépenses personnelles. Sont aussi compris les frais d'exploitation des institutions non commerciales privées. Par ailleurs, les frais et les bénéfices d'exploitation (primes moins sinistres) des sociétés d'assurance-vie sont pris en compte; il s'agit en effet de tenir compte de la valeur des services que ces sociétés rendent. Les estimations visent également les dépenses des résidents canadiens séjournant temporairement à l'étranger; ces dépenses sont compensées par une écriture négative dans les importations de biens et

Definitions — Continued

adjustment is made to the total estimate of personal expenditure to deduct expenditures of foreign residents temporarily in Canada, since this expenditure is already included as a positive entry in exports of goods and services. The value of used goods sold to persons is excluded from these estimates, but the dealer's commission and other factor incomes generated by the transaction are included as current production, and to maintain balance with the income side.

Value of physical change in inventories. The book value of inventories is deflated to remove the effect of price changes and the derived "physical" change is then valued at the average prices of the current period to obtain the value of physical change.

Gross National Product

A measure of the earnings of all Canadian factors of production regardless of where located. For a more detailed explanation of National Accounts terminologies please refer to *National Accounts Income and Expenditure*, Catalogue 13-549E.

Home Language

Refers to the specific language spoken at home by the respondent at the time of the census. If more than one language was spoken, the language spoken most often by the respondent was to be reported.

Hotel

See, traveller accommodation.

Household

Refers to a person or group of persons (other than foreign residents) who occupy a dwelling and do not have a usual place of residence elsewhere in Canada. It usually consists of a family group with or without lodgers, employees, etc. However, it may consist of two or more families sharing a dwelling, a group of unrelated persons, or one person living alone. Household members who are temporarily absent on Census Day (e.g., temporary residents elsewhere) are considered as part of their usual household. For census purposes, every person is a member of one and only one household. Unless otherwise specified, all data in household reports are for private households only.

Définitions — suite

de services et ainsi la dépense nationale brute ne s'en trouve pas modifiée. Afin d'éviter tout double compte, on procède à un ajustement de l'estimation totale des dépenses personnelles afin de déduire les dépenses des résidents étrangers séjournant temporairement au Canada, ces dernières ayant déjà fait l'objet d'une inscription positive dans les exportations de biens et de services. La valeur des biens d'occasion vendus aux particuliers est exclue de ces estimations, mais la commission du marchand et les autres revenus de facteurs engendrés par cette transaction sont pris en compte en tant que production courante pour maintenir l'équilibre avec le côté "revenus".

Valeur de la variation matérielle des stocks. On procède à la déflation de la valeur comptable des stocks de façon à éliminer l'effet des variations de prix. La variation "matérielle" ainsi obtenue est ensuite évaluée selon les prix moyens de la période courante pour donner la valeur de la variation matérielle.

Produit national brut

Mesure des gains de tous les facteurs canadiens de production quel que soit l'endroit. Pour une explication plus détaillée sur les définitions des comptes nationaux, se reporter à *Comptes nationaux des revenus et des dépenses*, no 13-549F du catalogue.

Langue parlée à la maison

Langue que le recensé parlait à la maison au moment du recensement. Si le recensé parlait plus d'une langue, il devait indiquer la langue qu'il utilisait le plus fréquemment.

Hôtel

Voir, hébergement de voyageurs.

Ménage

Personne ou groupe de personnes (autres que des résidents étrangers) occupant un même logement et n'ayant pas de lieu de résidence habituelle ailleurs au Canada. Il se compose ordinairement d'un groupe familial, avec ou sans chambreurs, employés, etc. Il peut aussi se composer de deux familles ou plus partageant le même logement, d'un groupe de personnes non apparentées ou d'une personne seule. Les membres d'un ménage qui sont temporairement absents le jour du recensement (par exemple qui résident temporairement ailleurs) sont considérés comme faisant partie de leur ménage habituel. Aux fins du recensement, chaque personne est membre d'un seul et unique ménage. À moins d'indications contraires, toutes les données contenues dans les bulletins sur les ménages se rapportent aux ménages privés seulement.

Definitions — Continued

Households are classified into three groups: **Private Households**, **Collective Households** and **Households Outside Canada**.

This terminology applies to the Census years, 1971, 1976 and 1981.

Collective dwelling. Refers to a dwelling of a commercial, institutional or communal nature. It may be identified by a sign on the premises or by a Census Representative speaking with the person in charge or with a resident or a neighbour, etc. Included are hotels, motels, tourist homes, nursing homes, hospitals, staff residences, communal quarters of military camps, work camps, jails, missions, rooming, or lodging-houses, and so on. Collective dwellings may be occupied by usual residents or solely by foreign and/or temporary residents.

This terminology applies to the Census years, 1971, 1976 and 1981.

Household type. Refers to the basic division of private households into **Family** and **Non-family Households**. **Family Household** refers to a household that contains at least one census family (e.g., persons living in the same dwelling who have a husband-wife or parent-never-married child relationship). **One-family Household** refers to a single census family that occupies one private dwelling. The family may be that of the household reference person or one living as a related, lodging or other type of family with a household reference person who is a non-family person. A **Multiple-family Household** is one in which two or more census families occupy the same private dwelling. One family may be that of the household reference person, or the household reference person may be a non-family person with whom two or more census families are residing.

Non-family household. Refers to one person who lives alone in a private dwelling, or to a group of persons who occupy a private dwelling and do not constitute a census family.

This terminology applies to the Census years, 1971, 1976 and 1981.

Occupied private dwelling. Refers to a private dwelling in which a person or group of persons is permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day.

Private dwelling occupied by foreign and/or temporary residents. Refers to a private dwelling solely occupied by foreign and/or temporary residents on Census Day. A **TEMPORARY RESIDENT** of a dwelling is a

Definitions — suite

Les ménages sont classés en trois catégories: les **ménages privés**, les **ménages collectifs** et les **ménages à l'extérieur du Canada**.

Cette définition s'applique aux années de recensement 1971, 1976 et 1981.

Logement collectif. Institution ou établissement commercial ou communautaire qui s'affiche comme tel ou que le recenseur peut identifier comme tel en s'adressant à la personne qui en a la charge, à un résident, à un voisin, etc. Sont inclus dans cette catégorie les hôtels, les motels, les maisons de chambres pour touristes, les maisons de repos, les hôpitaux, les résidences de personnel, les casernes de camps militaires, les camps de chantier, les prisons, les centres d'accueil, les pensions et maisons de chambres, etc. Il peut s'agir d'un logement occupé par des résidents habituels ou uniquement par des résidents étrangers et (ou) temporaires.

Cette définition s'applique aux années de recensement 1971, 1976 et 1981.

Genre de ménage. Répartition fondamentale des ménages privés en **ménages familiaux** et en **ménages non familiaux**. Un **ménage familial** est un ménage qui comprend au moins une famille de recensement, par exemple des personnes qui habitent le même logement et qui ont des liens conjugaux (époux-épouse) ou des liens de filiation (parent et enfant jamais marié). Un **ménage unifamilial** se compose d'une seule famille de recensement qui occupe un logement privé. Il peut s'agir de la famille de la personne repère du ménage ou d'une famille apparentée, d'une famille chambreuse ou de tout autre genre de famille vivant avec une personne repère hors famille. Un **ménage multifamilial** se compose de deux familles de recensement ou plus qui occupent le même logement privé. Une de ces familles peut être celle de la personne repère du ménage ou il peut s'agir d'une personne repère hors famille vivant avec deux familles de recensement ou plus.

Un ménage non familial. Est constitué d'une personne qui vit seule dans un logement privé ou d'un groupe de personnes qui partagent un seul logement privé, mais ne forment pas une famille de recensement.

Cette définition s'applique aux années de recensement 1971, 1976 et 1981.

Logement privé occupé. Logement privé occupé de façon permanente par une personne ou un groupe de personnes. Sont également inclus dans cette catégorie les logements privés dont les résidents habituels sont temporairement absents le jour du recensement.

Logement privé occupé par des résidents étrangers et (ou) temporaires. Logement privé occupé uniquement par des résidents étrangers et (ou) temporaires le jour du recensement. Le **RÉSIDENT TEMPORAIRE** d'un logement est une personne qui

Definitions — Continued

person who resides there on Census Day, but has a usual place of residence elsewhere in Canada. A FOREIGN RESIDENT is a person whose usual place of residence is outside Canada. These dwellings are classified into REGULAR DWELLINGS and SEASONAL/MARGINAL DWELLINGS.

Private household. Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

Housing

Apartment and other. Which comprises apartment, flat (other).

Apartment or flat. These dwellings are subdivided into two categories. Apartment, flat (duplex) refers to each dwelling in a structure originally designed, or structurally converted, to provide two dwelling units, one above the other and adjoining no other structure. Apartment, flat (other) includes all dwellings of the apartment, flat-type other than the duplex-type mentioned above.

Bungalow. A one storey single-detached dwelling.

Completion. Is the stage at which all the proposed construction work on a dwelling unit has been performed.

Condominium. A residential complex in which dwellings are owned individually while land is held in joint ownership with others. The building(s) must be a registered condominium complex. Only owner-occupied condominium units are included.

Dwelling. Refers to a structurally separate set of living quarters with a private entrance from outside or from a common hallway or stairway inside the building, i.e., the entrance must not be through someone else's living quarters.

Dwelling repairs. Any work that restores the dwelling to its original condition. Desirable remodelling, additions, conversions, or improvements which upgrade the dwelling over and above its original condition are excluded.

Major repairs. Any work required to correct serious deficiencies in the structural condition of the dwelling, as well as in the plumbing, electrical and heating systems.

Minor repairs. Any work required to correct deficiencies in the surface or covering material of the dwelling and to the less serious deficiencies in the plumbing, electrical and heating systems.

Definitions — suite

habitat ce logement le jour du recensement, mais dont le domicile habituel se trouve ailleurs au Canada. Un RÉSIDENT ÉTRANGER est une personne dont le domicile habituel est à l'extérieur du Canada. Ces logements sont classés comme LOGEMENTS ORDINAIRES et comme LOGEMENTS SAISONNIERS/MARGINAUX.

Ménage privé. La ou les personnes (autres que des résidents étrangers) qui occupent un logement privé et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada. Le nombre de ménages privés est égal au nombre de logements privés occupés.

Logement

Appartements et autres. Comptent les maisons d'appartements et les plain-pied (autres).

Appartements ou plain-pied. Cette catégorie est subdivisée en deux groupes. Un "appartement ou plain-pied (duplex)" est un logement faisant partie d'une construction conçue à l'origine ou transformée par la suite pour contenir deux logements superposés et non attenants à une autre construction. Un "appartement ou plain-pied (autre)" est un logement de la catégorie "appartement ou plain-pied" autre qu'un logement faisant partie d'un duplex.

Bungalow. Un logement détaché d'un étage.

Achèvement. Correspond au stade où tous les travaux de construction projetés pour une même unité de logement ont été exécutés.

Condominium. Un condominium est un immeuble résidentiel dans lequel chaque logement est détenu en propriété individuelle alors que le terrain est détenu en propriété conjointe. L'immeuble doit constituer un condominium enregistré. Seuls les logements occupés par le propriétaire sont inclus.

Logement. Ensemble structurellement distinct de pièces d'habitation ayant une entrée privée donnant sur l'extérieur ou sur un corridor ou un escalier commun à l'intérieur, c.-à-d., que l'entrée doit donner accès au logement sans qu'on ait à passer par les pièces d'habitation de quelqu'un d'autre.

Réparation au logement. Tous travaux visant à remettre le logement dans son état original. Ne sont pas compris les rénovations, ajouts, transformations ou améliorations souhaitables qui visent à améliorer le logement par rapport à son état original.

Réparations majeures. Tous travaux nécessaires pour corriger des défauts importants au niveau de la structure du logement, de la plomberie, et des systèmes d'électricité et de chauffage.

Réparations mineures. Tous travaux nécessaires pour corriger des défauts au niveau de la surface et du revêtement du logement, et de légers défauts au niveau de la plomberie, et des systèmes d'électricité et de chauffage.

Definitions — Continued

Mobile. Refers to any dwelling designed for movement and actually movable, such as a trailer, railway car or boat, if occupied by persons with no other usual residence on census day. If placed on a permanent foundation, it is considered to be "single detached".

Owned. Refers to a dwelling which is owned by some member of the household. A dwelling is classified as "owned" even though it may be mortgaged. This also includes dwellings under separate ownership in any multiple dwelling structure.

Regular maintenance. Consist of such things as painting and furnace cleaning, etc.

Rented. Refers to a dwelling which is not owned by any member of the household.

Row. Which comprises only single attached houses in a row of three or more dwellings. In the Census tabulations, these are included in "Single attached (other)". Row-duplexes are not included in the Row category.

Semi-detached. This category includes dwelling units separated by a common wall extending from ground to roof. Single attached dwellings in structures consisting of only two dwelling units are classified as single attached (double). All other single attached dwellings whether in rows of three or more dwellings, or simply a unit adjoining a store or other non-residential structure are classified as "single attached (other)".

Single detached. This type is commonly called a "single house". A structure with only one dwelling, separated by open space from all other structures except its own garage or shed.

Start. Is recorded when the footing has been installed, that is, when the concrete has been poured for the whole of the footing around the structure.

The number of units **under construction** at the end of a period as shown in this publication takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has been made, construction may cease, or a structure when completed may contain more or fewer dwelling units than were reported when construction commenced.

Income

Consists of receipts from the following sources: (1) wages and salaries (before deductions for taxes, unemployment insurance, pensions, etc.), (2) gross income from an unincorporated business or independent professional practice minus expenses, (3) farm cash receipts

Définitions — suite

Mobile. Tout logement conçu pour être transporté et qui est effectivement mobile, comme une roulotte, un wagon de chemin de fer ou un bateau, s'il est occupé par des personnes n'ayant pas d'autre résidence habituelle le jour du recensement. S'il est placé sur une fondation permanente, il est considéré comme "individuel non attenant".

Possédé. Logement qui appartient à un membre du ménage. Un logement est classé comme "possédé" même s'il est hypothéqué. Cela vaut également pour les logements appartenant à des propriétaires distincts dans les constructions à logements multiples.

Entretien régulier. Comprend la peinture, le nettoyage du système de chauffage, etc.

Loué. Logement qui n'appartient pas à un membre du ménage.

Rangées. Qui ne comprennent que les maisons simples et attachées en rangée d'au moins trois habitations. Dans les chiffres du recensement, ces genres d'habitations sont compris dans "simples attachés (autres)". Les duplex en rangée n'entrent pas dans la catégorie des "Rangées".

Maisons jumelées. Cette catégorie comprend les logements séparés par un mur mitoyen s'élevant du sol au toit. Tout logement individuel attenant dans une construction ne contenant que deux logements est classé comme "individuel attenant (maison double)". Tous les autres logements individuels attenants (en rangée de trois logements ou plus ou tout simplement attenants à un magasin ou à une autre construction non résidentielle) sont classés comme "individuels attenants (autres)".

Individuel non attenant. Ce genre de logement est ordinairement appelé "maison individuelle". Construction ne contenant qu'un seul logement et qui n'est rattachée à aucune autre construction, si ce n'est à un garage ou à un hangar.

Mise en chantier. Est notée lorsque l'emplacement est installé, c'est-à-dire lorsque le béton a été coulé dans l'emplacement, tout autour de l'immeuble projeté.

Dans la présente publication, le nombre de logements **en construction** à la fin du mois tient compte de certains rajustements qui s'imposent pour des raisons diverses. Par exemple, une fois commencés, les travaux de construction d'un logement peuvent être interrompus; d'autre part, une fois achevée, une construction peut renfermer, soit plus, soit moins de logements qu'on ne l'avait d'abord déclaré au moment de la mise en chantier.

Revenu

Est constitué de recettes provenant des sources suivantes: (1) traitements et salaires (avant les retenues pour l'impôt, l'assurance-chômage et les régimes de retraite, etc.), (2) le revenu brut provenant d'une entreprise non constituée ou de l'exercice privé d'une profession moins les dépenses, (3) les recettes monétaires

Definitions — Continued

minus farm operating expenses and depreciation of farm assets, (4) one third of the gross receipts from roomers and boarders (excluding relatives), (5) investment income (bond interest, dividends, net rentals, etc.), (6) transfer payments (all social welfare payments from municipal, provincial and federal governments such as family allowance, workmen's compensation, etc.), (7) miscellaneous regular income, scholarships, alimony, etc., (8) pensions (retirement pensions, annuities and superannuation).

Independent Retail Stores

All retail outlets not meeting the requirements of a chain store outlet, are automatically classified as "independent", the only exception being "department stores" which are classified in their entirety to the chain component.

Labour Force

The civilian labour force is composed of that portion of the civilian non-institutional population 15 years of age and over who were employed or unemployed.

Manufacturing Industries

Cost of materials and supplies used. Consumption of purchased items only, at laid-down cost including transportation and handling charges, duties, etc. It includes inter-company and intra-company transfers, contract work by others.

Value added, manufacturing activity. Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

Value of shipments of goods of own manufacture. Value net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). It includes repair and custom revenue, transfers to reporting units of same firm, all exports and book value of own products shipped the first time on a rental basis. Includes consignment shipments to other countries, but domestic consignment shipments are included in inventory until sold.

Megalitres

Units of 1 million litres.

Définitions — suite

des cultivateurs moins les dépenses de l'exploitation agricole et la dépréciation du matériel agricole et des bâtiments, (4) un tiers des recettes brutes provenant des chambreurs et des pensionnaires, (sauf les parents), (5) le revenu de placements (intérêts sur obligations, dividendes, le revenu net des loyers, etc.), (6) les transferts (les indemnités de bien-être versées par les municipalités et les gouvernements provinciaux et fédéral, tels que les allocations familiales, les indemnisations d'accident de travail, etc.), (7) les divers revenus habituels, bourses d'études, pensions alimentaires, etc., (8) pensions (pensions de retraite et rentes).

Magasins de détail indépendants

Tous les points de vente qui ne remplissent pas les conditions d'un magasin à succursales, sont considérés automatiquement comme "indépendants", la seule exception étant les "grands magasins", qui sont tous classés dans le groupe des magasins à succursales.

Population active

La population active civile est composée de la population civile disponible de 15 ans et plus qui était occupée ou en chômage.

Industries manufacturières

Cout des matières et fournitures. Concerne uniquement la consommation de produits achetés, au prix livré, les frais de transport et de manutention, les droits, etc., étant inclus. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat.

Valeur ajoutée, activité manufacturière. Valeur des livraisons des produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins le coût des matières et des fournitures utilisées, du combustible et de l'électricité.

Valeur des livraisons de produits de propre fabrication. La valeur nette des produits, déduction faite des rabais, des retours de marchandises, des remises, des taxes de vente, des taxes et des droits d'accise, des emballages consignés, des frais de livraison payés à des transporteurs publics ou sous contrat (mais non des frais de livraison à l'établissement même). Comprend les recettes de réparations et de contrats, de transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits de l'établissement donnés en location la première fois. Les livraisons en consignation destinées à d'autres pays sont comprises mais les livraisons en consignation au Canada figurent avec les stocks jusqu'à la vente.

Mégalitres

Unité de 1 million de litres.

Metropolitan Area

See, Census.

Migration

Gross migration. The sum of in, and out-migration in a region for a given period. It is therefore possible to distinguish between the interprovincial gross migration, the international gross migration and the total gross migration.

In-migrant. Any person who takes up residence in another Canadian province.

Interprovincial migration. Designates movements from one province to another, where there is a change of address.

Net international migration. Difference between the number of immigrants and the number of emigrants.

Net interprovincial migration. Difference between the number of in-migrations and the number of out-migrations.

Net migration. Immigration - emigration + net internal migration.

Out-migrant. Any person who leaves a province to take up residence in another province.

Total net migration. Sum of the net interprovincial migration and the net international migration.

Motel

See, traveller accommodation.

Mother Tongue

The language first learned and still understood. Infants who have not yet learned to speak are considered to have as mother tongue the language most often spoken in the home.

Motorcycles

Motorcycles including motor bicycles are classified as motor vehicles.

Natural Increase

Change in population size resulting from the difference between the number of births and deaths.

Définitions — suite

Région métropolitaine

Voir, Recensement.

Migration

Volume des migrations. Représente la somme des entrées et des sorties pour une région au cours d'une période donnée. On peut donc distinguer le volume des migrations interprovinciales, celui des migrations internationales et le volume de l'ensemble des migrations.

Entrant. Désigne toute personne qui s'établit dans une province en provenance d'une autre province canadienne.

Migration interprovinciale. Ensemble des déplacements d'une province vers une autre accompagnés d'un changement de résidence.

Solde migratoire international ou migration nette internationale. Différence entre le nombre d'entrées d'immigrants et le nombre de sorties d'émigrants.

Migration nette interprovinciale ou solde migratoire interprovincial. Différence entre le nombre des entrées et le nombre des sorties de migrants inter provinciaux.

Migration nette. Immigration - émigration + migration interne nette.

Sortant. Désigne toute personne qui quitte une province et établit sa résidence dans une autre province.

Migration nette totale. Somme de la migration nette interprovinciale et de la migration nette internationale.

Motel

Voir, hébergement de voyageurs.

Langue maternelle

Première langue apprise et encore comprise. Dans le cas des enfants en bas âge, la langue maternelle est la langue le plus souvent parlée à la maison.

Motocyclettes

Les motocyclettes, cyclomoteurs compris, font partie des véhicules à moteur.

Accroissement naturel

Excédent des naissances sur les décès.

Definitions — Continued

Outfitters

See, traveller accommodation.

Overseas Manufactured Vehicles

Include only those vehicles imported in a fully assembled state from countries other than the United States. If they are assembled on this continent they are treated as being Canadian or United States manufactured vehicles.

Participation Rate

The participation rate represents the labour force as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force in that group expressed as a percentage of the population for that group.

Personal Disposable Income

Consists of total personal income less personal direct taxes and other current transfers to government from persons.

Personal Income

Includes all forms of income received by persons and unincorporated businesses: (1) wages, salaries and supplementary labour income, (2) military pay and allowances, (3) net income of non-farm business including rent, (4) net income of farm operators from farm production, (5) interest, dividends and miscellaneous investment income, and (6) transfer payment income from the government, from corporations and from non-residents.

Residual Error of Estimate

Reflects a number of factors including imperfections in the basic statistics, flaws in estimation techniques, and discrepancies in the timing with which the income and expenditure data are recorded. For additional information see "National Income and Expenditure Accounts", Volume 3, Catalogue 13-549E (Occasional).

Restaurants, Caterers and Taverns

Caterers (industrial, social and mobile). Establishments that prepare and serve food and beverages under contract, on the premises of manufacturing plants, office buildings, schools, etc. They may also prepare food on

Définitions — suite

Pourvoyeurs en chasse et pêche

Voir, hébergement de voyageurs.

Véhicules fabriqués outre-mer

Ne comprennent que les véhicules qui sont importés tels quels de pays autres que les États-Unis. S'ils sont assemblés sur le continent américain ils sont considérés comme des véhicules fabriqués au Canada ou aux États-Unis.

Taux d'activité

Le taux d'activité représente la population active en pourcentage de la population de 15 ans et plus. Le taux d'activité d'un groupe particulier (âge, sexe, état matrimonial, etc.) est la population active de ce groupe exprimée en pourcentage de la population du même groupe.

Revenu personnel disponible

Est égal au revenu personnel total moins les impôts directs frappant les particuliers et les autres transferts courants versés par les particuliers aux administrations publiques.

Revenu personnel

Comprend tous les genres de revenus en espèces des particuliers et des entreprises non constituées: (1) traitements, salaires et revenu supplémentaire du travail, (2) solde et indemnités militaires, (3) revenu net provenant d'une entreprise non agricole y compris le revenu de loyers, (4) revenu net provenant de l'exploitation agricole, (5) intérêts, dividendes et divers revenus de placements et (6) revenus de transferts du gouvernement, des compagnies et des non-résidents.

Erreur résiduelle d'estimation

Elle est attribuable à un certain nombre de facteurs, dont des imperfections au niveau des statistiques de base, des lacunes des techniques d'estimation et des différences de période sur le plan de l'enregistrement des données relatives aux revenus et aux dépenses. Pour de plus amples renseignements, voir "Les comptes nationaux des revenus et des dépenses", Volume 3, n° 13-549F du catalogue (hors-série).

Restaurants, traiteurs et tavernes

Traiteurs. Établissements qui préparent et servent des repas et des boissons à contrat, dans des usines, immeubles de bureaux, écoles, etc. Ils peuvent aussi préparer des repas dans leurs propres locaux et les livrer pour des fêtes, des réceptions, etc..

Definitions — Continued

their own premises for delivery to parties, receptions, etc., and may also serve the food and provide bartending services (social caterers). Mobile caterers who drive to changing locations carrying prepared food are also included here.

Licensed restaurants. Establishments with a licence to sell alcoholic beverages engaged in selling mainly prepared food and all kinds of alcohol, for consumption on the premises.

Take-out food shops. Establishments which prepare and sell packaged or wrapped meals of specific foods, for consumption primarily away from the premises. Such establishments usually concentrate on a particular line of food, e.g., chinese, pizza, chicken, etc. Refreshment stands are included here, selling such things as hot dogs, hamburgers, ice cream, etc., often on a seasonal basis.

Taverns, bars and night clubs. Establishments which sell alcoholic beverages for consumption on the premises. Food may be sold in minor quantities and entertainment may be provided.

Unlicensed restaurants. Establishments engaged in selling mainly prepared food for consumption on the premises. Drive-ins are included here as very few exist.

Retail Trade

Retail trade. Is defined as "the aggregate sales made through retail locations (outlets)".

A "retail location", as defined by Statistics Canada, is a "business location (usually a store) in which the principal activity is the sale of merchandise and related services to the general public, for household or personal consumption". Retail trade estimates do **not** include any form of direct selling which bypasses the retail store, e.g., direct door-to-door selling, sales made through automatic vending machines, sales of newspapers or magazines sold directly by printers or publishers, and sales made by book and record clubs. The only exception is the mail-order and catalogue sales activities of department store businesses, which have been classified to the "general merchandise store" category. In addition, retail trade excludes: retail sales through ancillary units, e.g., warehouses, head offices, etc., sales of contractors whose major activity is not retailing and retail transactions between individuals.

Définitions — suite

de même que servir des repas et assurer un service de bar à des événements mondains. Les traiteurs ambulants qui vendent en différents lieux leurs plats préparés sont eux aussi inclus dans cette catégorie.

Restaurants avec permis. Établissements détenant un permis de vente de boissons alcooliques et dont l'activité consiste à servir surtout des repas préparés et des boissons alcooliques à consommer sur place.

Établissements de mets à emporter. Établissements qui préparent et vendent des repas enveloppés destinés à être consommés hors de l'établissement. Ces établissements se spécialisent généralement dans la préparation de mets particuliers: mets chinois, pizza, poulets, etc. Les kiosques de rafraîchissements qui vendent des chiens-chauds, des hambourgeois, de la crème glacée, etc., souvent sur une base saisonnière, sont inclus dans cette catégorie.

Tavernes, bars et boîtes de nuit. Établissements qui vendent des boissons alcooliques à consommer sur place; ils peuvent aussi vendre de la nourriture en petites quantités et offrir des divertissements.

Restaurants sans permis. Établissements qui s'occupent de vendre principalement des repas préparés à consommer sur place. En raison de leur petit nombre, les restauroutes sont classés dans cette catégorie.

Commerce de détail

Commerce de détail. Signifie, "l'ensemble des ventes faites par des points de vente au détail".

Un "point de vente au détail", suivant la définition de Statistique Canada, est un local d'affaires (habituellement un magasin) dont l'activité principale est la vente de marchandises et de services connexes au grand public pour la consommation ménagère ou personnelle. Les estimations relatives au commerce de détail ne prennent **pas** en compte les ventes directes, c'est-à-dire les ventes qui ne sont pas faites par l'intermédiaire d'un point de vente au détail, par exemple les ventes directes par démarchage, les ventes par distributeur automatique, les ventes de journaux ou de revues faites directement par les imprimeurs et éditeurs, et les ventes faites par les cercles du livre et les clubs de disques. Il n'y a qu'une exception: les ventes des grands magasins faites par la poste ou par catalogue, qui sont classées dans la catégorie des "magasins de marchandises diverses". En outre, le commerce de détail ne comprend pas les ventes au détail des unités auxiliaires, par exemple, entrepôts, sièges sociaux, etc., ni les ventes des entrepreneurs dont l'activité principale ne relève pas du commerce de détail, ni les opérations de détail entre particuliers.

Definitions — Continued

Total net sales. Includes sales of merchandise and receipts from related services, such as repairs, equipment rental, and food serving, **less** returns, adjustments and discounts. Total net sales also include: trade-in allowances, withdrawals of goods for personal use (at retail), and commissions earned from sales of goods owned by others. Non-trading revenues, bad debts recovered and sales taxes are excluded.

Rural

See, urban.

Taxation

Number of returns. This refers to the number of returns filed for the taxation or calendar year. Final date for filing without penalty was April 30. No cognizance is taken of second returns filed in amendment of an original. A return is considered "taxable" when a tax is assessed; otherwise a return is "non-taxable".

Number of taxpayers. Total number of returns filed for the taxation or calendar year for which a tax is assessed. Second returns filed in amendment of an original return have not been included.

Total deductions. Includes the following deductions: (1) CPP or QPP contributions, (2) unemployment insurance premiums, (3) registered pension plan contributions, (4) retirement savings plan premiums, (5) union and professional fees, (6) tuition fees, (7) child care expenses, (8) general expense allowance, (9) other expenses of employment, (10) standard deductions, (11) medical claims, (12) charitable donations, (13) other deductions such as moving expenses, carrying charges on investment income, alimony payments, income averaging annuity premiums, non-capital business losses of other years, gifts to the Crown and Canada Pension Plan contributions claimed in respect of personal employees of the taxpayer, (14) registered home ownership contributions, (15) interest, dividends and capital gains deduction, (16) pension income deduction, (17) eligible deductions transferred from spouse, (18) disability deduction, (19) education deduction and (20) allowable investment loss during the taxable year.

Total exemptions. Includes the following exemptions: (1) basic personal, (2) age, (3) married or equivalent, (4) wholly dependent children, (5) other dependents.

Définitions — suite

Ventes nettes totales. Comprendent les ventes de marchandises et les recettes provenant de services connexes tels que les réparations, la location de matériel et la restauration, **moins** les rendus, les rajustements et les remises. Les ventes nettes totales comprennent également: la valeur des reprises, les prélèvements de marchandises pour usage personnel (au détail) et les commissions au titre de la vente de marchandises appartenant à d'autres personnes. On ne prend pas en compte les recettes hors exploitation, ni le recouvrement de créances douteuses, ni les taxes de vente.

Rural

Voir, urbain.

Taxation

Nombre de déclarations. Signifie le nombre réuni des déclarations produites pour l'année d'imposition ou l'année civile. La date ultime de production des déclarations sans encourir de pénalités était le 30 avril. On n'a pas tenu compte des secondes déclarations produites à titre de modification d'une déclaration initiale. On considère comme déclaration "imposable" celle qui donne lieu à un impôt; autrement, une déclaration est "non imposable".

Nombre de contribuables. Nombre de déclarations produites pour l'année d'imposition ou l'année civile pour laquelle l'impôt est évalué. Les secondes déclarations produites en amendement à une déclaration originale ne sont pas comprises.

Total des déductions. Comprend également les déductions suivantes: (1) cotisations au RPC ou au RRQ, (2) primes d'assurance-chômage, (3) cotisations à un régime enregistré de pensions, (4) primes versées à l'égard d'un régime enregistré d'épargne-retraite, (5) cotisations syndicales ou professionnelles, (6) frais de scolarité, (7) frais de garde d'enfants, (8) allocation de frais généraux, (9) autres frais découlant d'un emploi, (10) déductions uniformes, (11) déductions pour frais médicaux, (12) dons de charité, (13) autres déductions, telles que les frais de déménagement, les frais financiers sur le revenu de placement, les pensions alimentaires, les primes versées en vertu d'un contrat de rentes à versements invariables, les pertes autres que les pertes en capital d'autres années, les dons à la Couronne et les cotisations au Régime de pension du Canada réclamées à l'égard des employés personnels d'un contribuable, (14) cotisations à un régime enregistré d'épargne-logement, (15) déductions pour intérêts, dividendes et gains en capital, (16) déductions relatives au revenu tiré d'une pension, (17) déductions admissibles transférables entre conjoints, (18) déduction pour invalidité, (19) déduction relative aux études et (20) perte déductible au titre d'un placement d'entreprise durant l'année d'imposition.

Total des exemptions. Comprend les exemptions suivantes: (1) exemption personnelle de base, (2) exemption en raison d'âge, (3) exemption de marié ou l'équivalent, (4) enfants entièrement à charge, (5) exemption pour autres personnes à charge.

Definitions — Continued

Total income assessed. Includes income from wages and salaries, commissions from employment, other employment earnings, unemployment insurance benefits, old age pensions, Canada or Québec Pension Plan benefits, other pensions or superannuation, net business income, net professional income, net commission income, net farming or fishing income, taxable amount of dividends, bond interest, bank interest, mortgage interest, income from trusts, annuity income, other Canadian investment income, foreign investment income, net rental income, net taxable capital gains, family allowance benefits and miscellaneous income. Personal exemptions and deductions have not been deducted from the employment earnings. It differs from "Total Income" as shown on the tax return only in that allowable expenses, general expense allowance and other expenses of employment have not been deducted from employment earnings.

Tent and Trailer Campgrounds

See, traveller accommodation.

Tourist Courts and Cabins

See, traveller accommodation.

Traveller Accommodation

Hotels. Establishments operating six or more hotel and/or hotel-motel-type rooms within a main building.

Hotels - full year licensed. Hotels which are open for at least 10 months of the year and have a licence to serve alcoholic beverages.

Motels. Establishments operating three or more motel-type rooms and less than six hotel and/or hotel-motel-type rooms. Motel rooms are accessible from the exterior only.

Motels - full year. Motels which are open for at least 10 months of the year.

Outfitters. Establishments generally located in remote areas where fish and game are available. Such establishments offer accommodation in lodges, cabins and/or campsites and provide essential facilities and services of boat rental, equipment rental, supplies and provisions, and guides.

Tent and trailer campgrounds. Establishments offering a minimum of 10 tent and trailer spaces.

If in addition to the 10 or more spaces, at least six hotel (or hotel/motel) type rooms or three or more motel-type rooms are available, the establishment is considered to be part of the hotel or motel universe, respectively.

Définitions — suite

Total du revenu imposé. Comprend le revenu des traitements et salaires, des commissions provenant d'un emploi, d'autres gains provenant d'un emploi, des prestations d'assurance-chômage, des pensions de sécurité de la vieillesse, des prestations du Régime de pension du Canada et du Régime des rentes du Québec, d'autres pensions ou retraite, du revenu net d'entreprises, du revenu net d'une profession, du revenu net d'une commission, du revenu net de la ferme ou de la pêche, des sommes imposables de dividendes, de l'intérêt des obligations, de l'intérêt bancaire, de l'intérêt d'hypothèques, du revenu de fiducie, du revenu de rente, du revenu d'autres placements au Canada, du revenu de placements à l'étranger, du revenu net de loyers, du gain en capital net imposable, des allocations familiales et du revenu divers. Les exemptions personnelles et les déductions ne sont pas déduites des gains provenant d'un emploi. Ces montants diffèrent du "Revenu total" indiqué sur la déclaration d'impôt en ce que les dépenses admissibles - allocation de frais généraux et autres frais découlant d'un emploi, n'ont pas été déduites des traitements.

Terrains de camping pour tentes et roulettes

Voir, hébergement de voyageurs.

Camps de touristes et cabines

Voir, hébergement de voyageurs.

Hébergement de voyageurs

Hôtels. Établissements offrant au moins six chambres du genre hôtel et/ou hôtel-motel dans la partie principale de l'édifice.

Hôtels ouverts toute l'année et détenant une licence. Hôtels ouverts durant 10 mois ou plus par année et autorisés à vendre des boissons alcoolisées.

Motels. Établissements offrant au moins trois chambres du genre motel et moins de six chambres du genre hôtel et/ou hôtel-motel. Les chambres du genre motel sont accessibles de l'extérieur seulement.

Motels ouverts toute l'année. Motels ouverts durant 10 mois ou plus par année.

Pourvoyeurs en chasse et pêche. Établissements généralement situés dans des régions isolées où il y a du poisson et du gibier. Ces établissements offrent les moyens d'hébergement suivants: résidences, cabines et (ou) terrains de camping et fournissent les installations et services essentiels: location de bateaux et de matériel, fournitures et provisions et service de guides.

Terrains de camping pour tentes et roulettes. Établissements offrant au moins 10 emplacements pour tentes et roulettes.

Si, outre ces emplacements, l'établissement compte au moins six chambres du genre hôtel ou hôtel-motel ou trois chambres du genre motel, on considère, selon le cas, qu'il fait partie de l'univers des hôtels ou des motels.

Definitions — Continued

Those establishments which offer cabins and/or cottages in addition to the 10 or more spaces are included under tourist courts and cabins unless they have more than three times the number of tent and trailer spaces than cabins and cottages.

Tourist courts and cabins. Establishments with 3 or more accommodation units, the majority of which are cabins or cottages. As well as these units, establishments may have less than six hotel or hotel/motel-type rooms or less than three motel-type rooms. If there are also tent and trailer spaces available, the number of these spaces must not exceed three times the total number of units and rooms for the establishment to remain in this category. Recreational vacation camps and hunting and fishing camps that failed to meet the outfitter definition are included here.

Unattached Individuals

Persons living alone or rooming in a household where they are not related to other household members.

Unemployed

The unemployed include those persons who during the reference week:

- (a) were without work, had actively looked for work in the past four weeks (ending with reference week), and were available for work;
- (b) had not actively looked for work in the past four weeks but had been on layoff for 26 weeks or less and were available for work;
- (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from reference week, and were available for work.

Unemployment Rate

The unemployment rate represents the number of unemployed persons as a per cent of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the unemployment in that group expressed as a per cent of the labour force for that group.

Urban

Urban. Includes the population living in an area having a population concentration of 1,000 or more and a population density of 400 or more per square kilometre (1981 Census). The population density in 1976 was 386 per square kilometre.

Définitions — suite

Les établissements qui offrent, en plus des 10 emplacements ou plus pour tentes et roulotte, des cabines et (ou) des chalets sont compris dans l'univers des camps de touristes et cabines, à moins que le nombre d'emplacements pour tentes et roulotte soit supérieur de plus de trois fois à celui des cabines et chalets.

Camps de touristes et cabines. Établissements ayant au moins trois unités d'hébergement, dont la majorité sont des cabines ou des chalets. Outre ces unités, les établissements de ce groupe peuvent exploiter moins de six chambres du genre hôtel ou hôtel-motel ou moins de trois chambres du genre motel. Si l'établissement offre aussi des emplacements pour tentes ou roulotte, ceux-ci ne doivent pas être supérieurs à trois fois le nombre total d'unités et de chambres. Les camps de vacances et les camps de chasse et pêche qui ne répondent pas à la définition de pourvoyeurs en chasse et pêche font partie de ce groupe.

Personnes seules

Personnes qui vivent seules ou qui occupent une chambre dans un ménage avec lequel elles n'ont aucun lien de parenté.

Chômeurs

Entrent dans cette catégorie les personnes qui, pendant la semaine de référence:

- a) étaient sans emploi, avaient activement cherché du travail au cours des quatre dernières semaines (jusqu'à la semaine de référence) et étaient prêtes à travailler;
- b) n'avaient pas activement cherché de travail au cours des quatre dernières semaines, mais avaient été mises à pied depuis 26 semaines ou moins et étaient prêtes à travailler;
- c) n'avaient pas activement cherché de travail au cours des quatre dernières semaines, mais devaient commencer à travailler à un nouvel emploi dans quatre semaines ou moins à compter de la semaine de référence et étaient prêtes à travailler.

Taux de chômage

Le taux de chômage représente le nombre de chômeurs en pourcentage de la population active. Le taux de chômage d'un groupe particulier (âge, sexe, état matrimonial, etc.) est le chômage de ce groupe exprimé en pourcentage de la population active du même groupe.

Urbain

Urbain. Comprend la population demeurant dans une région dont la concentration de population est de 1,000 habitants ou plus et la densité de 400 habitants ou plus au kilomètre carré (Recensement 1981). La densité de la population en 1976 était de 386 habitants au kilomètre carré.

Definitions — Continued

Rural. Includes all non-urban population.

Vending Machine

A device which automatically dispenses merchandise after a requisite amount of money is inserted into the device.

Vending Machine Operator

Individuals or firms that, on their own account, own or lease vending machines, place them and are responsible for their servicing and repair.

Wages and Salaries

Gross wages and salaries or earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc.

The payroll concept does not include supplementary labour costs such as employer's contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

Earnings. The average weekly earnings (including overtime) is obtained by dividing the total weekly payrolls by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees, and for the other types of employees.

The average hourly earnings (including overtime) is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours is reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). It is calculated for the hourly-rated employees and for the salaried employees.

Employees. All persons drawing pay for services rendered or for paid absences and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form constitute employees. Employees are classified into three broad occupational categories, namely: salaried employees, employees paid by the hour and other employees.

Employees paid by the hour. Any employee whose basic wage is expressed as an hourly rate.

Other Employees. Those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.

Définitions — suite

Rural. Comprend toute population non-urbaine.

Distributeur automatique

Machine qui dispense automatiquement une marchandise dès qu'on y a introduit la somme d'argent requise.

Exploitant de distributeur automatique

Particulier ou société qui, travaillant à son compte, possède ou donne en location des distributeurs automatiques, les installe, les entretient et les répare.

Traitements et salaires

Montant brut des salaires et traitements ou les gains représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc.

Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

Rémunérations. On obtient les rémunérations hebdomadaires moyennes (y compris celles du surtemps) en divisant les rémunérations hebdomadaires totales par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure, d'employés et des autres catégories de salariés.

On obtient les gains horaires moyens (y compris la rémunération du surtemps) en divisant les rémunérations hebdomadaires totales par le nombre total hebdomadaire d'heures travaillées (le nombre total d'heures hebdomadaires est celui déclaré pour les salariés rémunérés à l'heure, tandis que dans le cas des employés on l'établit en multipliant la moyenne des heures fournies pendant la semaine normale de travail par le nombre d'employés. Nous calculons cette statistique à l'égard des salariés rémunérés à l'heure et des employés.

Salarié. Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada, est une salarié. Les salariés sont classés en trois catégories professionnelles, soit les employés, les salariés rémunérés à l'heure et les autres salariés.

Salariés rémunérés à l'heure. Tout salarié dont la rémunération de base est calculée selon un taux horaire.

Autres salariés. Tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de trajet, etc.

Definitions — Concluded

Salaried Employees. Any employee whose basic remuneration is a fixed amount for a period of at least one week.

Wholesalers

Wholesalers are primarily engaged in buying merchandise for resale to retailers; to industrial, commercial, institutional and professional users; to other wholesalers; for export; to farmers for use in farm production; or acting as agents in such transactions.

Mixed-activity businesses (such as firms engaged in both wholesaling and retailing, contracting, service trades, manufacturing, etc.) are considered to be in wholesale trade whenever they derive the largest portion of their gross margin from their wholesaling activity. (The gross margin is the difference between the total sales and the cost of goods sold).

Agents and brokers. Comprise all establishments and locations primarily engaged in buying and/or selling products (including primary products from farm, forest, or ocean) for others on a commission basis. They may be known as an auction company, commission merchant, import and/or export agent or broker, manufacturer's agent, purchasing agent or resident buyer, or selling agent.

Wholesale merchants. Establishments or locations primarily engaged in buying and selling goods on own account. Such businesses may be described as an import and/or export merchant, cash and carry wholesaler, drop shipper or desk jobber, mail order wholesaler, truck distributor or rack jobber.

Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Définitions — fin

Employés. Tout salarié dont la rémunération de base constitue une somme fixe versée pour une période d'au moins une semaine.

Grossistes

Les grossistes ont pour activité principale l'achat de marchandises en vue de leur revente à des détaillants, des industries, des commerçants, des institutions, des professionnels, d'autres grossistes; pour exportations; aux agriculteurs pour l'exploitation de la ferme. Ils peuvent également servir d'agents à l'occasion de ces opérations.

Les entreprises à activité mixte (telles que les entreprises de vente de gros exerçant en même temps la fonction de détaillants ou d'entrepreneurs, prestataires de service, fabricants, etc.) ont pour activité principale le commerce de gros lorsque la plus grande partie de leur marge brute de profit provient du commerce de gros plutôt que d'une autre activité. (La marge brute de profit est la différence entre le total des ventes et le prix de revient).

Agents et courtiers. Renferment tous les établissements et locaux d'affaires dont l'activité principale est l'achat ou la vente, ou les deux, à la commission, de marchandises (dont les matières non transformées provenant de l'agriculture, de l'industrie forestière ou de la pêche) appartenant à d'autres. Il peut s'agir de sociétés de ventes aux enchères, de négociants travaillant à la commission, d'agents ou de courtiers d'importation ou d'exportation, de représentants de fabrique, d'agents d'approvisionnement, d'acheteurs à demeure et d'agents de vente.

Grossistes. Les établissements et les locaux d'affaires dont l'activité principale consiste à acheter et à revendre des marchandises pour leur propre compte. Cette catégorie comprend les grossistes en exportation ou en importation, en vente au comptant sans livraison, les grossistes spécialisés en expédition directe, en vente par correspondance, en répartition par camions ou en vente au moyen d'étalages placés chez les clients.

Semaine de travail

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

DEFINITIONS

Accroissement naturel

Excédent des naissances sur les décès.

Balance des paiements internationaux

L'enregistrement systématique des opérations économiques qui ont lieu entre les résidents canadiens et le reste du monde au cours d'une période donnée.

Camps de touristes et cabines

Voir, hébergement de voyageurs.

Chômeurs

Entrent dans cette catégorie les personnes qui, pendant la semaine de référence:

- a) étaient sans emploi, avaient activement cherché du travail au cours des quatre dernières semaines (jusqu'à la semaine de référence) et étaient prêtes à travailler;
- b) n'avaient pas activement cherché de travail au cours des quatre dernières semaines, mais avaient été mises à pied depuis 26 semaines ou moins et étaient prêtes à travailler;
- c) n'avaient pas activement cherché de travail au cours des quatre dernières semaines, mais devaient commencer à travailler à un nouvel emploi dans quatre semaines ou moins à compter de la semaine de référence et étaient prêtes à travailler.

Commerce de détail

Commerce de détail. Signifie, "l'ensemble des ventes faites par des points de vente au détail".

Un "**point de vente au détail**", suivant la définition de Statistique Canada, est un local d'affaires (habituellement un magasin) dont l'activité principale est la vente de marchandises et de services connexes au grand public pour la consommation ménagère ou personnelle. Les estimations relatives au commerce de détail ne prennent pas en compte les ventes directes, c'est-à-dire les ventes qui ne sont pas faites par l'intermédiaire d'un point de vente au détail, par exemple les ventes directes par démarchage, les ventes par distributeur automatique, les ventes de journaux ou de revues faites directement par les imprimeurs et éditeurs, et les ventes faites par les cercles du livre et les clubs de disques. Il n'y a qu'une exception: les ventes des grands magasins faites par la poste ou par catalogue, qui sont classées dans la catégorie des "magasins de marchandises diverses". En outre, le commerce de détail ne comprend pas les ventes au détail des unités auxiliaires, par exemple, entrepôts, sièges sociaux, etc., ni les ventes des entrepreneurs dont l'activité principale ne relève pas du commerce de détail, ni les opérations de détail entre particuliers.

DEFINITIONS

Natural Increase

Change in population size resulting from the difference between the number of births and deaths.

Balance of International Payments

A systematic record of the economic transactions that take place between Canadian residents and the rest of the world over a specified period of time.

Tourist Courts and Cabins

See, traveller accommodation.

Unemployed

The unemployed include those persons who during the reference week:

- (a) were without work, had actively looked for work in the past four weeks (ending with reference week), and were available for work;
- (b) had not actively looked for work in the past four weeks but had been on layoff for 26 weeks or less and were available for work;
- (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from reference week, and were available for work.

Retail Trade

Retail trade. Is defined as "the aggregate sales made through retail locations (outlets)".

A "**retail location**", as defined by Statistics Canada, is a "business location (usually a store) in which the principal activity is the sale of merchandise and related services to the general public, for household or personal consumption". Retail trade estimates do not include any form of direct selling which bypasses the retail store, e.g., direct door-to-door selling, sales made through automatic vending machines, sales of newspapers or magazines sold directly by printers or publishers, and sales made by book and record clubs. The only exception is the mail-order and catalogue sales activities of department store businesses, which have been classified to the "general merchandise store" category. In addition, retail trade excludes: retail sales through ancillary units, e.g., warehouses, head offices, etc., sales of contractors whose major activity is not retailing, and retail transactions between individuals.

Définitions — suite

Ventes nettes totales. Compriment les ventes de marchandises et les recettes provenant de services connexes tels que les réparations, la location de matériel et la restauration, moins les rendus, les rajustements et les remises. Les ventes nettes totales comprennent également: la valeur des reprises, les prélevements de marchandises pour usage personnel (au détail) et les commissions au titre de la vente de marchandises appartenant à d'autres personnes. On ne prend pas en compte les recettes hors exploitation, ni le recouvrement de créances douteuses, ni les taxes de vente.

Compte courant

Enregistre les opérations portant sur les biens et services produits au cours de la période observée; il indique dans quelle mesure le Canada fait appel aux ressources "matérielles" du reste du monde ou inversement, pour sa consommation et ses investissements. Les importations et les exportations de marchandises sont prises en compte. Le compte courant vise également les transferts unilatéraux internationaux. Ce sont là des opérations qui ne prévoient aucun paiement en retour; elles sont de la nature des cadeaux. On peut citer comme exemples les pensions versées par les gouvernements étrangers aux résidents canadiens à leurs proches à l'étranger (paiements).

Le solde du compte courant sans les recettes et les paiements de transfert correspond aux écritures décrivant les exportations nettes de biens et de services dans les comptes nationaux du revenu national et de la dépense nationale.

Construction

Chalet. Toute habitation saisonnière comme les maisons d'été et les maisons flottantes.

Nombre d'unités. Apparaissant sous la rubrique "construction domiciliaire", correspond au nombre d'unités de logements indépendantes ajoutées. Par exemple, une nouvelle maison d'appartements de six logements comptera pour six unités de logements. Dans le cas de transformation de bâtiments en unités de logements additionnelles, on tient compte du nombre de nouvelles unités créées.

Permis de construction. La classification utilisée dans la présente publication porte sur les immeubles ou bâtiments à l'égard desquels la municipalité a émis un permis de bâtir. Une municipalité peut émettre un permis de bâtir aux fins suivantes: construction de nouveaux bâtiments, travaux de modifications, rajouts ou transformations, installation d'appareils de chauffage, de plomberie et autres commodités du genre; érection d'enseignes, d'affiches, de marquises, etc., et autres améliorations d'immeubles.

Transformation. Comprend le nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

Valeur de la construction domiciliaire. La classification des bâtiments **domiciliaires** a pour but de montrer la valeur des permis émis pour des logements nouveaux: simple, saisonnier,

Definitions — Continued

Total net sales. Includes sales of merchandise and receipts from related services, such as repairs, equipment rental, and food serving, less returns, adjustments and discounts. Total net sales also include: trade-in allowances, withdrawals of goods for personal use (at retail), and commissions earned from sales of goods owned by others. Non-trading revenues, bad debts recovered and sales taxes are excluded.

Current Account

Records transactions involving currently produced goods and services; it shows to what extent Canada is drawing on the real resources of the rest of the world or vice versa to provide for current consumption and investment. Counted are imports and exports of merchandise and services. Also included in the current account are international unilateral transfers. These are transactions for which no *quid pro quo* is received — they are in the nature of a gift. Examples would be pensions paid by foreign governments to Canadian residents (receipts) or Canadian residents' transfers of cash to relatives abroad (payments).

The balance on current account excluding transfer receipts and payments corresponds to the entries comprising of net exports of goods and services in the National Income and Expenditure Accounts.

Construction

Cottages. Seasonal dwellings such as summer homes and house-boats.

Number of units. As shown under "Residential construction" indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains six apartments, it will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included.

Building permit. This classification is one of buildings or structures for which a building permit was issued by a municipality. A building permit may be issued by municipalities for: construction of new buildings; alterations, additions or conversions to existing buildings; installations of heating, plumbing and other facilities; erection of signs, posters, canopies, etc., and other improvements to property.

Conversions. Consist of dwelling units added by conversion of existing structures.

Value of residential construction. The classification for **residential** construction is intended to reflect the value of building permits issued for new dwellings: single, sea-

Définitions — suite

double, en rangée, d'appartement et de transformation; la valeur des travaux de modification et d'amélioration à des logements existants: rajout, modification, garages, piscines et autres améliorations.

Dépense nationale brute

Dépenses personnelles en biens et services de consommation. Les dépenses personnelles en biens et services de consommation constituent la plus importante composante de la dépense nationale brute. Près de 60% de la production totale de la nation est vendue sur les marchés finals au bénéfice des consommateurs. Ces dépenses comprennent les dépenses personnelles en biens durables comme les appareils et les meubles ménagers, les biens semi-durables comme les vêtements et les chaussures, les dépenses en biens non durables comme les aliments, les boissons alcooliques et le tabac, et enfin les dépenses visant un large éventail de services, entre autres les loyers bruts (y compris la valeur locative des logements occupés par leur propriétaire), les dépenses au titre des loisirs, les coûts du transport et de services de soin personnel.

Le gîte et le couvert fournis gratuitement ainsi que les autres revenus en nature pour lesquels on procède à une imputation sont également pris en compte dans les dépenses personnelles, comme si les personnes recevaient un revenu d'un montant égal à la valeur de ces biens et services et achetaient ensuite ces derniers. Un loyer d'espace de logement imputé pour les maisons occupées par leur propriétaire est inclus dans le revenu des particuliers au titre de la location et dans les dépenses personnelles. Sont aussi compris les frais d'exploitation des institutions non commerciales privées. Par ailleurs, les frais et les bénéfices d'exploitation (primes moins sinistres) des sociétés d'assurance-vie sont pris en compte; il s'agit en effet de tenir compte de la valeur des services que ces sociétés rendent. Les estimations visent également les dépenses des résidents canadiens séjournant temporairement à l'étranger; ces dépenses sont compensées par une écriture négative dans les importations de biens et de services et ainsi la dépense nationale brute ne s'en trouve pas modifiée. Afin d'éviter tout double compte, on procède à un ajustement de l'estimation totale des dépenses personnelles afin de déduire les dépenses des résidents étrangers séjournant temporairement au Canada, ces dernières ayant déjà fait l'objet d'une inscription positive dans les exportations de biens et de services. La valeur des biens d'occasion vendus aux particuliers est exclue de ces estimations, mais la commission du marchand et les autres revenus de facteurs engendrés par cette transaction sont pris en compte en tant que production courante pour maintenir l'équilibre avec le côté "revenus".

Dépenses publiques courantes. Comprendent les achats nets des organismes publics et le fond renouvelable de la production de défense. Ne sont pas prises en compte les expéditions d'équipement militaire produit antérieurement et destiné au pays de l'OTAN; y figure par contre le matériel remplaçant le nouvel équipement.

Dépenses publiques en biens et services. Comprendent les dépenses des administrations fédérale, provinciales et municipales (sauf les entreprises publiques mais incluant les services

Definitions — Continued

sonal, double, row, apartments and conversions: for alterations and improvements to existing dwellings: additions, structural changes, residential garages and swimming pools, and other improvements to existing structures.

Gross National Expenditure

Personal expenditure on consumer goods and services. Personal expenditure on consumer goods and services is the largest single component of Gross National Expenditure. Around 60% of the Nation's total production is purchased in final markets for consumer use. Such outlays include personal expenditure for durable goods, such as household appliances and furniture, semi-durable goods, such as clothing and footwear, non-durable goods, such as food, alcoholic beverages and tobacco; and expenditure for a wide variety of services, covering such outlays as gross rents (including the rental value of owner-occupied housing), recreation, transportation costs and personal care service costs.

Free board and lodging and other income in kind for which an imputation is made are also included in personal expenditure, as if persons received income equal to the value of such goods and services and then purchased these items. An imputed space rent on owner-occupied houses is included in both rental income of persons and in personal expenditure. Also included are the operating costs of private non-commercial institutions. In addition, the operating costs and profits (premiums less claims) of life insurance companies are included to reflect the value of the services rendered by such companies. The estimates also cover expenditures of Canadian residents temporarily abroad; these expenditures are offset by a negative entry under imports of goods and services, so that Gross National Expenditure as a whole is not affected. To avoid double counting, an adjustment is made to the total estimate of personal expenditure to deduct expenditures of foreign residents temporarily in Canada, since this expenditure is already included as a positive entry in exports of goods and services. The value of used goods sold to persons is excluded from these estimates, but the dealer's commission and other factor incomes generated by the transaction are included as current production, and to maintain balance with the income side.

Government current expenditure. Includes net purchases of government commodity agencies and the defence production revolving fund. It excludes shipments of previously produced military equipment to NATO countries, but includes replacements of new equipment.

Government expenditure on goods and services. Includes expenditure by federal, provincial and municipal governments (except for government business enter-

Définitions — suite

scolaires municipaux). Comprendent: (1) les achats des entreprises canadiennes et des non-résidents, (2) l'aide étrangère, (3) les traitements et salaires des fonctionnaires, (4) les soldes, indemnités et dépenses militaires au Canada et à l'étranger, et (5) le loyer net imputé et les provisions pour consommation de capital à l'égard des édifices publics.

Exportations de biens et de services. Les exportations comprennent: (1) les intérêts et dividendes reçus des non-résidents, (2) la production d'or disponible pour l'exportation, (3) les dépenses touristiques des non-résidents au Canada, et (4) les crédits au titre du transport de marchandises accordées au Canada. Les livraisons de matériel militaire au pays de l'OTAN en vertu de la Loi de 1950 sur les crédits de défense sont exclues.

Formation brute de capital fixe des administrations. Comprend les dépenses pour les biens durables neufs comme la construction d'édifices et de routes par les administrations, mais ne porte pas sur les entreprises publiques. Comprend les installations et le matériel militaires.

Formation brute de capital fixe des entreprises. Comprend les dépenses des entreprises en construction neuve et en machines et matériel neufs (sur une base brute avant déduction pour amortissement ou obsolescence des installations de nature capitale existantes) par des entreprises privées ou publiques et par des entreprises sans but lucratif et les dépenses des particuliers et les investisseurs particuliers au titre de la construction résidentielle neuve.

Importations de biens et services. Les importations comprennent: (1) les intérêts et dividendes payés à des non-résidents, (2) les dépenses touristiques des Canadiens à l'étranger, et (3) les frais de livraison de marchandises encourus par le Canada sur le compte d'autres pays.

Valeur de la variation matérielle des stocks. On procède à la déflation de la valeur comptable des stocks de façon à éliminer l'effet des variations de prix. La variation "matérielle" ainsi obtenue est ensuite évaluée selon les prix moyens de la période courante pour donner la valeur de la variation matérielle.

Dette

Dette brute. Représente le total du passif du gouvernement du Canada. Elle découle de l'addition des autres éléments du passif du gouvernement du Canada à la dette non échue, nette de la dette non échue détenue par le gouvernement.

Dette nette. Représente l'excédent du passif brut du gouvernement sur l'actif comptabilisé net. En fait la dette nette est équivalente au déficit accumulé depuis la confédération.

Dette non échue. La dette non échue représente les obligations financières résultant des obligations, des bons du Trésor et de reconnaissances de dettes (effets et prêts à payer en devises étrangères) émis par le gouvernement du Canada qui ne sont pas encore arrivés à échéance.

Definitions — Continued

prises but including municipal school services). It consists of: (1) purchases from Canadian businesses and non-residents, (2) foreign aid, (3) wages and salaries of government employees, (4) military pay, allowances and expenditures both in Canada and abroad, and (5) an imputed net rent and capital consumption allowances on government-owned buildings.

Export of goods and services. Included with exports are: (1) interest and dividends received from non-residents, (2) gold production available for export, (3) travel expenditures of non-residents in Canada, and (4) freight and shipping credits earned on Canadian account. Shipments of military equipment to NATO countries under the Defence Appropriation Act of 1950, are excluded.

Government gross fixed capital formation. Includes outlay of new durable assets such as building and highway construction by governments, other than government business enterprises. It includes defence plant and equipment.

Business gross fixed capital formation. Includes expenditures for new construction and new machinery and equipment (on a gross basis before deductions for depreciation or obsolescence of existing capital facilities) by private and government business enterprise and private non-commercial institutions, and outlays on new residential construction by individuals and private investors.

Imports of goods and services. Included with imports are: (1) interest and dividends paid to non-residents, (2) travel expenditures of Canadians abroad, and (3) freight and shipping charges incurred by Canada on foreign account.

Value of physical change in inventories. The book value of inventories is deflated to remove the effect of price changes and the derived "physical" change is then valued at the average prices of the current period to obtain the value of physical change.

Debt

Gross debt. Represents the total liabilities of the Government of Canada. It is derived by adding the other liabilities of the government to unmatured debt, net of holdings of its own securities.

Net debt. Represents the excess of gross liabilities over the government's net recorded assets. In effect, the net debt is the accumulated budgetary deficit since confederation.

Unmatured debt. Represents financial obligations resulting from bonds, treasury bills and other certificates of indebtedness (notes and loans payable in foreign currencies) issued by the Government of Canada, which mature or are redeemable in the future.

Définitions — suite

Frais de la dette publique. Représente les paiements des intérêts de la dette publique.

Distributeur automatique

Machine qui dispense automatiquement une marchandise dès qu'on y a introduit la somme d'argent requise.

Dollars constants

Ce que l'on cherche avant tout par l'emploi de ce procédé, c'est à produire des séries de volumes dans lesquelles les quantités varient d'une année à l'autre pendant que les prix sont maintenus constants. Pour y arriver, il faut corriger de la variation des prix chaque série de valeur constituant la dépense nationale brute à l'aide d'indices de prix à pondération courante, c'est-à-dire d'indices de prix dont les coefficients de pondération de quantité pour une année donnée représentent la distribution des dépenses pour cette année-là. Ce sont donc des indices de Paasche. La somme de ces séries de valeurs ainsi corrigées qui deviennent des séries de volumes (en dollars constants), est égale à la dépense nationale brute dévaluée, donc exprimée en dollars constants.

Dollars courants

Les prix de la période courante sont utilisés pour évaluer les quantités.

Erreur résiduelle d'estimation

Elle est attribuable à un certain nombre de facteurs dont des imperfections au niveau des statistiques de base, des lacunes des techniques d'estimation et des différences de période sur le plan de l'enregistrement des données relatives aux revenus et aux dépenses. Pour de plus amples renseignements, voir "Les comptes nationaux des revenus et des dépenses", Volume 3, no 13-549 du catalogue (hors série).

Etablissement

La plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques: matière et fournitures utilisées; marchandises achetées pour la revente (en l'état); combustible et énergie consommés; nombre de salariés et rémunérations; stocks; et livraisons ou ventes.

Exploitant de distributeur automatique

Particulier ou société qui, travaillant à son compte, possède ou donne en location des distributeurs automatiques, les installe, les entretient et les répare.

Definitions — Continued

Public debt charges. Represents interest payments on public debt.

Vending Machine

A device which automatically dispenses merchandise after a requisite amount of money is inserted into the device.

Constant Dollars

The main object of the deflation process is to produce volume series in which quantities change from year to year while prices are held constant. To derive such volume series, each individual value series making up the Gross National Expenditure should be deflated with currently weighted price indexes, that is, price indexes whose quantity weights in any given year represent the distribution of expenditures within that year (i.e., Paasche-type price indexes). The sum of these deflated value (or constant dollar volume) series equals deflated, or constant dollar, Gross National Expenditure.

Current Dollars

Prices of the current period are used to value quantities.

Residual Error of Estimate

Reflects a number of factors including imperfections in the basic statistics, flaws in estimation techniques, and discrepancies in the timing with which the income and expenditure data are recorded. For additional information see "National Income and Expenditure Accounts", Volume 3, Catalogue 13-549E (Occasional).

Establishment

The smallest unit which is a separate operating entity and capable of reporting all of the basic industrial statistics: materials and supplies; goods purchased for resale (as such); fuels and power consumed; number of employees and their pay; inventories; and shipments or sales.

Vending Machine Operator

Individuals or firms that, on their own account, own or lease vending machines, place them and are responsible for their servicing and repair.

Définitions — suite

Faillite d'affaires

Signifie une faillite qui est principalement attribuable aux dettes contractées en raison de l'exploitation d'une entreprise commerciale ou d'affaires et qui inclut les entreprises à propriétaire unique, les sociétés en nom collectif et les sociétés à responsabilité limitée.

Famille

Famille de recensement. Époux et épouse (avec ou sans enfants jamais mariés, peu importe leur âge) ou un parent seul (peu importe son état matrimonial) avec un ou plusieurs enfants jamais mariés (quel que soit leur âge) vivant dans le même logement. Aux fins du recensement, les personnes vivant en union libre sont considérées comme "actuellement mariées", peu importe leur état matrimonial légal; elles figurent donc comme une famille époux-épouse dans les tableaux sur la famille de recensement. Cette définition s'applique aux années de recensement 1971, 1976 et 1981.

Genre de famille de recensement. Les familles de recensement sont classées selon qu'elles soutiennent ou non leur propre ménage, c'est-à-dire que la personne qui est responsable du paiement du loyer ou de l'hypothèque, ou des taxes, ou de l'électricité, etc., fait partie ou non d'une famille de recensement.

Famille principale. Famille de recensement dont fait partie la personne responsable des paiements du ménage. Il s'agit alors d'une famille qui assure le soutien de son propre ménage.

Famille secondaire. Famille de recensement dont la personne responsable des paiements du ménage ne fait pas partie. Il s'agit alors d'une famille qui n'assure pas le soutien de son propre ménage.

Personnes faisant partie d'une famille. Membres d'un ménage qui font partie d'une famille de recensement. Ces personnes sont classées comme suit:

Époux ou épouse. Personne qui habite le même logement que son conjoint. Les personnes vivant en union libre sont considérées, aux fins du recensement, comme actuellement mariées, quel que soit leur état matrimonial légal, et figurent donc comme des familles époux-épouse dans les tableaux.

Parent seul. Mère ou père, sans conjoint, qui habite un logement avec un ou plusieurs enfants célibataires (jamais mariés).

Enfant. Fils et filles (y compris les enfants adoptés et les enfants d'un autre lit) qui ne se sont jamais mariés, peu importe leur âge, et qui vivent dans le même logement que leurs parents. Les fils et les filles qui se sont déjà mariés, peu importe leur état matrimonial au moment du recensement, ne sont pas considérés comme des membres de la famille de leurs parents, même s'ils vivent dans le même logement.

Definitions — Continued

Business Bankruptcy

Is identified as being a bankruptcy which is chiefly attributable to the liabilities incurred as a result of the carrying on of a commercial venture or business and includes proprietorships, partnerships and Limited Companies.

Family

Census family. Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in the census family tables. This terminology applies to Census years 1971, 1976 and 1981.

Census family type. Refers to the classification of census families in terms of whether or not they maintain their own household (i.e., whether the person responsible for household payments - rent, or mortgage, or taxes, or electricity, etc. - is a member of a census family).

Primary family. Refers to the census family in which a person responsible for household payments is a member. It is therefore a maintaining family.

Secondary family. Refers to any census family in which a person responsible for household payments is not a member. It is therefore not a maintaining family.

Family persons. Refers to household members who belong to a census family. They, in turn, are further classified as follows:

Husband and wife. Refer to persons living in the same dwelling as their spouse. Persons living common-law are considered, for census purposes, as now married, regardless of their legal marital status, and accordingly appear as a husband-wife family in the relevant tables.

Lone parent. Refers to a mother or a father, with no spouse present, living in a dwelling with one or more never-married children.

Child. Refers to sons and daughters (including adopted and step-children) who have never married, regardless of age, and are living in the same dwelling as their parent(s). Sons and daughters who have ever been married, regardless of their marital status at enumeration, are not considered as members of their parents' family, even though they are living in the same dwelling.

Définitions — suite

Personnes hors famille. Membres d'un ménage qui ne font pas partie d'une famille de recensement. Ils peuvent être **apparentés** à la personne repère du ménage, la Personne 1 (par ex., beau-frère, cousin ou grand-père) ou **non apparentés** (par ex., chambreur, compagne d'appartement ou employé). Les personnes qui vivent seules sont toujours considérées comme des personnes hors famille.

Depuis le recensement de 1976, les enfants en foyer nourricier, les enfants en tutelle et les pupilles non apparentés, peu importe si une rémunération a été versée ou non pour leur garde, sont considérés comme des chambreurs et non comme des enfants dans une famille (comme c'était le cas aux recensements précédents) afin de respecter davantage la définition et le sens littéral du terme enfant (c.-à-d. fils ou fille) dans la famille de recensement.

Les données publiées de 1971, 1976 et 1981 sur la situation des particuliers dans la famille de recensement peuvent être comparées, quoique la définition de ce concept dans le **Dictionnaire des termes du recensement de 1971** correspond à la définition actuelle de la structure de la famille de recensement.

Situation des particuliers dans la famille. Catégorisation de la population en personnes faisant partie d'une famille et en personnes hors famille.

Structure de la famille de recensement. Catégorisation des familles de recensement en familles époux-épouse (avec ou sans enfants présents) et en familles monoparentales selon le sexe du parent.

Ferme

Une ferme, ranch, ou une autre exploitation agricole dont les ventes de produits agricoles se sont élevées à \$250 ou plus au cours des douze derniers mois.

Grands magasins

Un magasin de détail est un grand magasin, s'il possède les caractéristiques suivantes:

Il doit vendre les articles des grandes séries suivantes:

- a) **Vêtements pour la famille.** Ce groupe comprend les articles suivants: robes pour dames et jeunes filles, robes de ménage, tabliers et uniformes; manteaux et tailleur pour dames et jeunes filles; vêtements de sport pour dames et jeunes filles; fourrures; vêtements de bébés et d'enfants; vêtements de fillettes et d'adolescentes; lingerie et vêtements de nuit pour dames; sous-vêtements, chapeaux; bas pour dames et fillettes; gants, moufles et articles de parure pour dames et fillettes; chaussures pour dames, jeunes filles et enfants; vêtements pour hommes; articles d'habillement pour hommes; vêtements et articles d'habillement pour garçons; chaussures pour hommes et garçons.

Definitions — Continued

Non-family persons. Refers to household members who do not belong to a census family. They may be **related** to the household reference person - Person 1 - (e.g., brother-in-law, cousin, grandparent) or **unrelated** (e.g., lodger, room-mate, employee). A person living alone is always a non-family person.

As of the 1976 Census, unrelated wards, foster and guardianship children, whether or not pay was received, are classified and tabulated as lodgers rather than as children in families (as had been the previous census practice), in order to adhere more closely to the literal definition and meaning of children (i.e., sons and daughters) in census families.

The published data for census family status for 1971, 1976 and 1981 are comparable, although census family status as defined in the **Dictionary of the 1971 Census terms** corresponds to the current definition of census family structure.

Family status. Refers to the classification of the population into family and non-family persons.

Census family structure. Refers to the classification of census families into husband-wife families (with or without children present) and lone-parent families by sex of parent.

Farm

A farm, ranch, or other agricultural holding with sales of agricultural products during the past 12 months of \$250 or more.

Department Stores

A retail outlet is defined as a department store if it possesses the following characteristics:

It must sell the following general lines of merchandise:

- (a) **Family clothing and apparel.** This commodity group is composed of some or all of the following lines: women's and misses' dresses, housedresses, aprons and uniforms; women's and misses' coats and suits; women's and misses' sportswear; furs; infants' and children's wear; girls' and teenage wear; lingerie and women's sleepwear; intimate apparel; millinery; women's and girls' hosiery; women's and girls' gloves, mitts and accessories; women's, misses' and children's footwear; men's clothing; men's furnishings; boys' clothing and furnishings; men's and boys' footwear.

Définitions — suite

Nota: le magasin doit tenir au moins six des séries mentionnées ci-dessus, dont au moins une doit être les vêtements ou articles d'habillement pour hommes et garçons. Au moins 20% des ventes globales du magasin doivent se faire dans le groupe de vêtements pour la famille.

- b) **Meubles, appareils et articles d'ameublement ménager.** Ce groupe comprend les articles suivants: literie et linge de maison; porcelaine et verrerie; articles d'ameublement ménager; meubles de bois ou rembourrés, pour salles de séjour, salles à manger ou chambre à coucher; gros appareils; télévision, radio et musique; quincaillerie et articles de ménage.

Nota: le magasin doit tenir au moins quatre des séries mentionnées ci-dessus, dont au moins une doit être des meubles (de bois ou rembourrés pour salle à manger et (ou) salle de séjour et (ou) chambre à coucher). Au moins 10% des ventes globales du magasin doivent provenir du groupe des meubles, appareils et articles d'ameublement ménager.

- c) **Tous les autres articles (divers).** Cette catégorie comprend toutes les marchandises que tient le magasin mais qui ne figurent pas ci-dessus, **tels que:** articles de toilette, cosmétiques et médicaments; appareils et fournitures photographiques; tissus à la pièce; mercerie et menus articles; bijouterie; articles de sport et valises; papeterie, livres et revues; et aliments.

Nota: le magasin doit tenir au moins trois des séries mentionnées ci-dessus, dont aucune ne doit représenter plus de 50% des ventes **globales** du magasin. Au moins 10% des ventes globales du magasin doivent provenir des groupes "Tous les autres articles ou divers".

Aux fins de la présente définition, les affaires réalisées par les concessions établies dans les grands magasins seront considérées comme partie des affaires globales du magasin où sont établies les concessions. Toutefois, les ventes d'un **rayon** (ou magasin) **d'alimentation** associé ne seront incluses que si le rayon ou magasin fait partie intégrante de l'exploitation générale du grand magasin et n'est pas connu du public sous un nom différent de celui du grand magasin auquel il est associé.

Un grand magasin populaire. Est défini comme étant un point de vente au détail qui offre la même vaste gamme d'articles (voir la définition d'un grand magasin) que les grands magasins traditionnels et qui est généralement considéré comme un magasin à prix réduits.

Grossistes

Les grossistes ont pour activité principale l'achat de marchandises en vue de leur revente à des détaillants, des industries, des commerçants, des institutions, des professionnels, d'autres

Definitions — Continued

Note: the outlet must sell at least six of the commodity lines listed above, with at least one of the commodities being men's and boys' clothing or furnishings. At least 20% of the outlet's total sales must be derived from the family clothing and apparel group.

- (b) **Furniture, appliances and home furnishings.** This commodity group is composed of some or all of the following lines: linens and domestics; china and glassware; home furnishings; furniture, wooden and upholstered goods for living-room, dining-room and bedroom; major appliances; TV, radio and music; hardware and housewares.

Note: the outlet must sell at least four of the commodity lines listed above, with at least one of the commodities being furniture (wooden and upholstered goods for dining-room and/or living-room and/or bedroom). At least 10% of the outlet's total sales must be derived from the furniture, appliance and home furnishings group.

- (c) **All other (miscellaneous).** This category includes all commodities sold by the outlet but not shown above, **such as:** toiletries, cosmetics and drugs; photographic equipment and supplies; piece goods; notions and smallwares; jewellery; sporting goods and luggage; stationery, books and magazines; and food.

Note: the outlet must sell at least three different commodity lines with not one of these lines representing more than 50% of the **total** store sales. At least 10% of the outlet's total sales must be derived from the "All other or miscellaneous groups".

For the purposes of this definition, the business done by concessions located in department store outlets will be considered as part of the overall business of the outlet in which they are located. However, sales of an associated **food department** (or store) should be included only if it is an integral part of the overall department store operation and is not identified to the public by any name which differs from that of the department store with which it is associated.

A junior department store. Is defined as a retailing entity which sells the same wide range of goods (see department store definition) that are sold in the more traditional (major) department stores and is popularly described as a discount operation.

Wholesalers

Wholesalers are primarily engaged in buying merchandise for resale to retailers; to industrial, commercial, institutional and professional users; to other wholesalers;

Définitions — suite

grossistes; pour exploitations; aux agriculteurs pour l'exploitation de la ferme. Ils peuvent également servir d'agents à l'occasion de ces opérations.

Les entreprises à activité mixte (telles que les entreprises de vente de gros exerçant en même temps la fonction de détaillants ou d'entrepreneurs, prestataires de service, fabricants, etc.) ont pour activité principale le commerce de gros lorsque la plus grande partie de leur marge brute de profit provient du commerce de gros plutôt que d'une autre activité. (La marge brute de profit est la différence entre le total des ventes et le prix de revient).

Agents et courtiers. Renferment tous les établissements et locaux d'affaires dont l'activité principale est l'achat ou la vente, ou les deux, à la commission, de marchandises (dont les matières non transformées provenant de l'agriculture, de l'industrie forestière ou de la pêche) appartenant à d'autres. Il peut s'agir de sociétés de ventes aux enchères, de négociants travaillant à la commission, d'agents ou de courtiers d'importation ou d'exportation, de représentants de fabrique, d'agents d'approvisionnement, d'acheteurs à demeure et d'agents de vente.

Grossistes. Les établissements et les locaux d'affaires dont l'activité principale consiste à acheter et à revendre des marchandises pour leur propre compte. Cette catégorie comprend les grossistes en exportation ou en importation, en vente au comptant sans livraison, les grossistes spécialisés en expédition directe, en vente par correspondance, en répartition par camions ou en vente au moyen d'étalages placés chez les clients.

Hébergement de voyageurs

Camps de touristes et cabines. Établissements ayant au moins trois unités d'hébergement, dont la majorité sont des cabines ou des chalets. Outre ces unités, les établissements de ce groupe peuvent exploiter moins de six chambres du genre hôtel ou hôtel-motel ou moins de trois chambres du genre motel. Si l'établissement offre aussi des emplacements pour tentes ou roulettes, ceux-ci ne doivent pas être supérieurs à trois fois le nombre total d'unités et de chambres. Les camps de vacances et les camps de chasse et pêche qui ne répondent pas à la définition de pourvoyeurs en chasse et pêche font partie de ce groupe.

Hôtels. Établissements offrant au moins six chambres du genre hôtel et/ou hôtel-motel dans la partie principale de l'édifice.

Hôtels ouverts toute l'année et détenant une licence. Hôtels ouverts durant 10 mois ou plus par année et autorisés à vendre des boissons alcoolisées.

Motels. Établissements offrant au moins trois chambres du genre motel et moins de six chambres du genre hôtel et/ou hôtel-motel. Les chambres du genre motel sont accessibles de l'extérieur seulement.

Motels ouverts toute l'année. Motels ouverts durant 10 mois ou plus par année.

Pourvoyeurs en chasse et pêche. Établissements généralement situés dans des régions isolées où il y a du poisson et du

Definitions — Continued

for export; to farmers for use in farm production; or acting as agents in such transactions.

Mixed-activity businesses (such as firms engaged in both wholesaling and retailing, contracting, service trades, manufacturing, etc.) are considered to be in wholesale trade whenever they derive the largest portion of their gross margin from their wholesaling activity. (The gross margin is the difference between the total sales and the cost of goods sold).

Agents and brokers. Comprise all establishments and locations primarily engaged in buying and/or selling products (including primary products from farm, forest, or ocean) for others on a commission basis. They may be known as an auction company, commission merchant, import and/or export agent or broker, manufacturer's agent, purchasing agent or resident buyer, or selling agent.

Wholesale merchants. Establishments or locations primarily engaged in buying and selling goods on own account. Such businesses may be described as an import and/or export merchant, cash and carry wholesaler, drop shipper or desk jobber, mail order wholesaler, truck distributor or rack jobber.

Traveller Accommodation

Tourist courts and cabins. Establishments with 3 or more accommodation units, the majority of which are cabins or cottages. As well as these units, establishments may have less than six hotel or hotel/motel-type rooms or less than three motel-type rooms. If there are also tent and trailer spaces available, the number of these spaces must not exceed three times the total number of units and rooms for the establishment to remain in this category. Recreational vacation camps and hunting and fishing camps that failed to meet the outfitter definition are included here.

Hotels. Establishments operating six or more hotel and/or hotel-motel-type rooms within a main building.

Hotels - full year licensed. Hotels which are open for at least 10 months of the year and have a licence to serve alcoholic beverages.

Motels. Establishments operating three or more motel-type rooms and less than six hotel and/or hotel-motel-type rooms. Motel rooms are accessible from the exterior only.

Motels - full year. Motels which are open for at least 10 months of the year.

Outfitters. Establishments generally located in remote areas where fish and game are available. Such establish-

Définitions — suite

gibier. Ces établissements offrent les moyens d'hébergement suivants: résidences, cabines et (ou) terrains de camping et fournissent les installations et services essentiels: location de bateaux et de matériel, fournitures et provisions et service de guides.

Terrains de camping pour tentes et roulotte. Établissements offrant au moins 10 emplacements pour tentes et roulotte.

Si, outre ces emplacements, l'établissement compte au moins six chambres du genre hôtel ou hôtel-motel ou trois chambres du genre motel, on considère, selon le cas, qu'il fait partie de l'univers des hôtels ou des motels.

Les établissements qui offrent, en plus des 10 emplacements ou plus pour tentes et roulotte, des cabines et (ou) des chalets sont compris dans l'univers des camps de touristes et cabines, à moins que le nombre d'emplacements pour tentes et roulotte soit supérieur de plus de trois fois à celui des cabines et chalets.

Hôtel

Voir, hébergement de voyageurs.

Impôt

Nombre de contribuables. Nombre de déclarations produites pour l'année d'imposition ou l'année civile pour laquelle l'impôt est évalué. Les secondes déclarations produites en amendement à une déclaration originale ne sont pas comprises.

Nombre de déclarations. Signifie le nombre réuni des déclarations produites pour l'année d'imposition ou l'année civile. La date ultime de production des déclarations sans encourir de pénalités était le 30 avril. On n'a pas tenu compte des secondes déclarations produites à titre de modification d'une déclaration initiale. On considère comme déclaration "imposable" celle qui donne lieu à un impôt; autrement, une déclaration est "non imposable".

Total des déductions. Comprend également les déductions suivantes: (1) cotisations au RPC ou au RRQ, (2) primes d'assurance-chômage, (3) cotisations à un régime enregistré de pensions, (4) primes versées à l'égard d'un régime enregistré d'épargne-retraite, (5) cotisations syndicales ou professionnelles, (6) frais de scolarité, (7) frais de garde d'enfants, (8) allocation de frais généraux, (9) autres frais découlant d'un emploi, (10) déductions uniformes, (11) déductions pour frais médicaux, (12) dons de charité, (13) autres déductions, telles que les frais de déménagement, les frais financiers sur le revenu de placement, les pensions alimentaires, les primes versées en vertu d'un contrat de rentes à versements invariables, les pertes autres que les pertes en capital d'autres années, les dons à la Couronne et les cotisations au Régime de pension du Canada réclamées à l'égard des employés personnels d'un contribuable,

Definitions — Continued

ments offer accommodation in lodges, cabins and/or campsites and provide essential facilities and services of boat rental, equipment rental, supplies and provisions, and guides.

Tent and trailer campgrounds. Establishments offering a minimum of 10 tent and trailer spaces.

If in addition to the 10 or more spaces, at least six hotel (or hotel/motel) type rooms or three or more motel-type rooms are available, the establishment is considered to be part of the hotel or motel universe, respectively.

Those establishments which offer cabins and/or cottages in addition to the 10 or more spaces, are included under tourist courts and cabins, unless they have more than three times the number of tent and trailer spaces than cabins and cottages.

Hotel

See, traveller accommodation.

Taxation

Number of taxpayers. Total number of returns filed for the taxation or calendar year for which a tax is assessed. Second returns filed in amendment of an original return have not been included.

Number of returns. This refers to the number of returns filed for the taxation or calendar year. Final date for filing without penalty was April 30. No cognizance is taken of second returns filed in amendment of an original. A return is considered "taxable" when a tax is assessed; otherwise a return is "non-taxable".

Total deductions. Includes the following deductions: (1) CPP or QPP contributions, (2) unemployment insurance premiums, (3) registered pension plan contributions, (4) retirement savings plan premiums, (5) union and professional fees, (6) tuition fees, (7) child care expenses, (8) general expense allowance, (9) other expenses of employment, (10) standard deductions, (11) medical claims, (12) charitable donations, (13) other deductions such as moving expenses, carrying charges on investment income, alimony payments, income averaging annuity premiums, non-capital business losses of other years, gifts to the Crown and Canada Pension Plan contributions claimed in respect of personal employees of the taxpayer, (14) registered home ownership contributions, (15) interest, dividends and capital gains deduction, (16)

Définitions — suite

(14) cotisations à un régime enregistré d'épargne-logement, (15) déductions pour intérêts, dividendes et gains en capital, (16) déductions relatives au revenu tiré d'une pension, (17) déductions admissibles transférables entre conjoints, (18) déduction pour invalidité, (19) déduction relative aux études et (20) perte déductible au titre d'un placement d'entreprise durant l'année d'imposition.

Total des exemptions. Comprend les exemptions suivantes: (1) exemption personnelle de base, (2) exemption en raison d'âge, (3) exemption de marié ou l'équivalent, (4) enfants entièrement à charge, (5) exemption pour autres personnes à charge.

Total du revenu imposé. Comprend le revenu des traitements et salaires, des commissions provenant d'un emploi, d'autres gains provenant d'un emploi, des prestations d'assurance-chômage, des pensions de sécurité de la vieillesse, des prestations du Régime de pension du Canada et du Régime des rentes du Québec, d'autres *pensions* ou retraite, du revenu net d'entreprises, du revenu net d'une profession, du revenu net d'une commission, du revenu net de la ferme ou de la pêche, des sommes imposables de dividendes, de l'intérêt des obligations, de l'intérêt bancaire, de l'intérêt d'hypothèques, du revenu de fiducie, du revenu de rente, du revenu d'autres placements au Canada, du revenu de placements à l'étranger, du revenu net de loyers, du gain en capital net imposable, des allocations familiales et du revenu divers. Les exemptions personnelles et les déductions ne sont pas déduites des gains provenant d'un emploi. Ces montants diffèrent du "Revenu total" indiqué sur la déclaration d'impôt en ce que les dépenses admissible - allocation de frais généraux et autres frais découlant d'un emploi, n'ont pas été déduites des traitements.

Industries manufacturières

Cout des matières et fournitures. Concerne uniquement la consommation de produits achetés, au prix livré, les frais de transport et de manutention, les droits, etc., étant inclus. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat.

Valeur ajoutée, activité manufacturière. Valeur des livraisons des produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins le coût des matières et des fournitures utilisées, du combustible et de l'électricité.

Valeur des livraisons de produits de propre fabrication. La valeur nette des produits, déduction faite des rabais, des retours de marchandises, des remises, des taxes de vente, des taxes et des droits d'accise, des emballages consignés, des frais de livraison payés à des transporteurs publics ou sous contrat (mais non des frais de livraison à l'établissement même). Comprend les recettes de réparations et de contrats, de transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits de l'établissement donnés en location la première fois. Les livraisons en consignation destinées à d'autres pays sont comprises mais les livraisons en consignation au Canada figurent avec les stocks jusqu'à la vente.

Definitions — Continued

pension income deduction, (17) eligible deductions transferred from spouse, (18) disability deduction, (19) education deduction and (20) allowable investment loss during the taxable year.

Total exemptions. Includes the following exemptions: (1) basic personal, (2) age, (3) married or equivalent, (4) wholly dependent children, (5) other dependents.

Total income assessed. Includes income from wages and salaries, commissions from employment, other employment earnings, unemployment insurance benefits, old age pensions, Canada or Québec Pension Plan benefits, other pensions or superannuation, net business income, net professional income, net commission income, net farming or fishing income, taxable amount of dividends, bond interest, bank interest, mortgage interest, income from trusts, annuity income, other Canadian investment income, foreign investment income, net rental income, net taxable capital gains, family allowance benefits and miscellaneous income. Personal exemptions and deductions have not been deducted from the employment earnings. It differs from "Total Income" as shown on the tax return only in that allowable expenses, general expense allowance and other expenses of employment have not been deducted from employment earnings.

Manufacturing Industries

Cost of materials and supplies used. Consumption of purchased items only, at laid-down cost including transportation and handling charges, duties, etc. It includes inter-company and intra-company transfers, contract work by others.

Value added, manufacturing activity. Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

Value of shipments of goods of own manufacture. Value net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). It includes repair and custom revenue, transfers to reporting units of same firm, all exports and book value of own products shipped the first time on a rental basis. Includes consignment shipments to other countries, but domestic consignment shipments are included in inventory until sold.

Définitions — suite

Ingénieur-conseil

L'ingénieur-conseil est celui dont la fonction principale est de fournir des services de conseil en matière de génie et dont le revenu provient en majeure partie de la prestation de ces services.

Langue maternelle

Première langue apprise et encore comprise. Dans le cas des enfants en bas âge, la langue maternelle est la langue le plus souvent parlée à la maison.

Langue parlée à la maison

Langue que le recensé parlait à la maison au moment du recensement. Si le recensé parlait plus d'une langue, il devait indiquer la langue qu'il utilisait le plus fréquemment.

Logement

Achèvement. Correspond au stade où tous les travaux de construction projetés pour une même unité de logement ont été exécutés.

Appartements et autres. Compriment les maisons d'appartements et les plain-pied (autres).

Appartements ou plain-pied. Cette catégorie est subdivisée en deux groupes. Un "appartement ou plain-pied (duplex)" est un logement faisant partie d'une construction conçue à l'origine ou transformée par la suite pour contenir deux logements superposés et non attenants à une autre construction. Un "appartement ou plain-pied (autre)" est un logement de la catégorie "appartement ou plain-pied" autre qu'un logement faisant partie d'un duplex.

Bungalow. Un logement détaché d'un étage.

Condominium. Un condominium est un immeuble résidentiel dans lequel chaque logement est détenu en propriété individuelle alors que le terrain est détenu en propriété conjointe. L'immeuble doit constituer un condominium enregistré. Seuls les logements occupés par le propriétaire sont inclus.

Entretien régulier. Comprend la peinture, le nettoyage du système de chauffage, etc.

Individuel non attenant. Ce genre de logement est ordinairement appelé "maison individuelle". Construction ne contenant qu'un seul logement et qui n'est rattachée à aucune autre construction, si ce n'est à un garage ou à un hangar.

Logement. Ensemble structuralement distinct de pièces d'habitation ayant une entrée privée donnant sur l'extérieur ou sur un corridor ou un escalier commun à l'intérieur, c.-à-d., que l'entrée doit donner accès au logement sans qu'on ait à passer par les pièces d'habitation de quelqu'un d'autre.

Definitions — Continued

Consulting Engineer

An individual who is engaged primarily in the business of providing consulting engineering services and whose main source of revenue is derived from the provision of such professional engineering services.

Mother Tongue

The language first learned and still understood. Infants who have not yet learned to speak are considered to have as mother tongue the language most often spoken in the home.

Home Language

Refers to the specific language spoken at home by the respondent at the time of the census. If more than one language was spoken, the language spoken most often by the respondent was to be reported.

Housing

Completion. Is the stage at which all the proposed construction work on a dwelling unit has been performed.

Apartment and other. Which comprises apartment, flat (other).

Apartment or flat. These dwellings are subdivided into two categories. Apartment, flat (duplex) refers to each dwelling in a structure originally designed, or structurally converted, to provide two dwelling units, one above the other and adjoining no other structure. Apartment, flat (other) included all dwellings of the apartment, flat-type other than the duplex-type mentioned above.

Bungalow. A one storey single-detached dwelling.

Condominium. A residential complex in which dwellings are owned individually while land is held in joint ownership with others. The building(s) must be a registered condominium complex. Only owner-occupied condominium units are included.

Regular maintenance. Consist of such things as painting and furnace cleaning, etc.

Single detached. This type is commonly called a "single house". A structure with only one dwelling, separated by open space from all other structures except its own garage or shed.

Dwelling. Refers to a structurally separate set of living quarters with a private entrance from outside or from a common hallway or stairway inside the building, i.e., the entrance must not be through someone else's living quarters.

Définitions — suite

Loué. Logement qui n'appartient pas à un membre du ménage.

Maisons jumelées. Cette catégorie comprend les logements séparés par un mur mitoyen s'élevant du sol au toit. Tout logement individuel attenant dans une construction ne contenant que deux logements est classé comme "individuel attenant (maison double)". Tous les autres logements individuels attenants (en rangée de trois logements ou plus ou tout simplement attenants à un magasin ou à une autre construction non résidentielle) sont classés comme "individuels attenants (autres)".

Mise en chantier. Est notée lorsque l'empattement est installé, c'est-à-dire lorsque le béton a été coulé dans l'empattement, tout autour de l'immeuble projeté.

Mobile. Tout logement conçu pour être transporté et qui est effectivement mobile, comme une roulotte, un wagon de chemin de fer ou un bateau, s'il est occupé par des personnes n'ayant pas d'autre résidence habituelle le jour du recensement. S'il est placé sur une fondation permanente, il est considéré comme "individuel non attenant".

Possédé. Logement qui appartient à un membre du ménage. Un logement est classé comme "possédé" même s'il est hypothéqué. Cela vaut également pour les logements appartenant à des qué. Cela vaut également pour les logements appartenant à des propriétaires distincts dans les constructions à logements multiples.

Rangées. Qui ne comprennent que les maisons simples et attachées en rangée d'au moins trois habitations. Dans les chiffres du recensement, ces genres d'habitations sont compris dans "simples attachés (autres)". Les duplex en rangée n'entrent pas dans la catégorie des "Rangées".

Réparations au logement. Tous travaux visant à remettre le logement dans son état original. Ne sont pas compris les rénovations, ajouts, transformations ou améliorations souhaitables qui visent à améliorer le logement par rapport à son état original.

Réparations majeures. Tous travaux nécessaires pour corriger des défauts importants au niveau de la structure du logement, de la plomberie, et des systèmes d'électricité et de chauffage.

Réparations mineures. Tous travaux nécessaires pour corriger des défauts au niveau de la surface et du revêtement du logement, et de légers défauts au niveau de la plomberie, et des systèmes d'électricité et de chauffage.

Dans la présente publication, le nombre de logements **en construction** à la fin du mois tient compte de certains rajustements qui s'imposent pour des raisons diverses. Par exemple, une fois commencés, les travaux de construction d'un logement peuvent être interrompus; d'autre part, une fois achevée, une construction peut renfermer, soit plus, soit moins de logements qu'on ne l'avait d'abord déclaré au moment de la mise en chantier.

Definitions — Continued

Rented. Refers to a dwelling which is not owned by any member of the household.

Semi-detached. This category includes dwelling units separated by a common wall extending from ground to roof. Single attached dwellings in structures consisting of only two dwelling units are classified as single attached (double). All other single attached dwellings whether in rows of three or more dwellings, or simply a unit adjoining a store or other non-residential structure are classified as "single attached (other)".

Start. Is recorded when the footing has been installed, that is, when the concrete has been poured for the whole of the footing around the structure.

Mobile. Refers to any dwelling designed for movement and actually movable, such as a trailer, railway car or boat, if occupied by persons with no other usual residence on census day. If placed on a permanent foundation, it is considered to be "single detached".

Owned. Refers to a dwelling which is owned by some member of the household. A dwelling is classified as "owned" even though it may be mortgaged. This also includes dwellings under separate ownership in any multiple dwelling structure.

Row. Which comprises only single attached houses in a row of three or more dwellings. In the Census tabulations, these are included in "Single attached (other)". Row-duplexes are not included in the Row category.

Dwelling repairs. Any work that restores the dwelling to its original condition. Desirable remodelling, additions, conversions, or improvements which upgrade the dwelling over and above its original condition are excluded.

Major repairs. Any work required to correct serious deficiencies in the structural condition of the dwelling, as well as in the plumbing, electrical and heating systems.

Minor repairs. Any work required to correct deficiencies in the surface or covering material of the dwelling and to the less serious deficiencies in the plumbing, electrical and heating systems.

The number of units **under construction** at the end of a period as shown in this publication takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has been made, construction may cease, or a structure when completed may contain more or fewer dwelling units than were reported when construction commenced.

Définitions — suite

Magasins à succursales (de détail)

Ordinairement, une entreprise exploitant au moins quatre points de vente au détail dans un même genre de commerce sous une même appartenance juridique. Ne sont pas compris dans cette définition les grands magasins qui sont considérés du point de vue statistique comme des magasins à succursales même s'ils ne répondent pas aux critères qui exigent l'exploitation de quatre points de vente au détail. Sont exclus les points de vente indépendants qui sont exploités en concession.

Magasins de détail indépendants

Tous les points de vente qui ne remplissent pas les conditions d'un magasin à succursales, sont considérés automatiquement comme "indépendants", la seule exception étant les "grands magasins", qui sont tous classés dans le groupe des magasins à succursales.

Mégalitres

Unité de 1 million de litres.

Ménage

Personne ou groupe de personnes (autres que des résidents étrangers) occupant un même logement et n'ayant pas de lieu de résidence habituelle ailleurs au Canada. Il se compose ordinairement d'un groupe familial, avec ou sans chambreurs, employés, etc. Il peut aussi se composer de deux familles ou plus partageant le même logement, d'un groupe de personnes non apparentées ou d'une personne seule. Les membres d'un ménage qui sont temporairement absents le jour du recensement (par exemple qui résident temporairement ailleurs) sont considérés comme faisant partie de leur ménage habituel. Aux fins du recensement, chaque personne est membre d'un seul et unique ménage. A moins d'indications contraires, toutes les données contenues dans les bulletins sur les ménages se rapportent aux ménages privés seulement.

Les ménages sont classés en trois catégories: les **ménages privés**, les **ménages collectifs** et les **ménages à l'extérieur du Canada**.

Cette définition s'applique aux années de recensement 1971, 1976 et 1981.

Genre de ménage. Répartition fondamentale des ménages privés en **ménages familiaux** et en **ménages non familiaux**. Un **ménage familial** est un ménage qui comprend au moins une famille de recensement, par exemple des personnes qui habitent le même logement et qui ont des liens conjuguels (époux-épouse) ou des liens de filiation (parent et enfant jamais marié). Un **ménage unifamilial** se compose d'une seule famille de recensement qui occupe un logement privé. Il peut s'agir de la famille de la personne repère du ménage ou d'une famille apparentée,

Definitions — Continued

Chain Store Organization (Retail)

Normally an organization operating four or more retail outlets in the same kind of business under the same legal ownership. Exceptions to this definition are department stores which are treated statistically as chains even though they may fail to meet the criteria of operating four retail outlets. Excluded are independent outlets associated with a franchise operation.

Independent Retail Stores

All retail outlets not meeting the requirements of a chain store outlet, are automatically classified as "independent", the only exception being "department stores" which are classified in their entirety to the chain component.

Megalitres

Units of 1 million litres.

Household

Refers to a person or group of persons (other than foreign residents) who occupy a dwelling and do not have a usual place of residence elsewhere in Canada. It usually consists of a family group with or without lodgers, employees, etc. However, it may consist of two or more families sharing a dwelling, a group of unrelated persons, or one person living alone. Household members who are temporarily absent on Census Day (e.g., temporary residents elsewhere) are considered as part of their usual household. For census purposes, every person is a member of one and only one household. Unless otherwise specified, all data in household reports are for private households only.

Households are classified into three groups: **Private Households**, **Collective Households** and **Households Outside Canada**.

This terminology applies to the Census years, 1971, 1976 and 1981.

Household type. Refers to the basic division of private households into **Family** and **Non-family Households**. **Family Household** refers to a household that contains at least one census family (e.g., persons living in the same dwelling who have a husband-wife or parent-never-married child relationship). **One-Family Household** refers to a single census family that occupies one private dwelling. The family may be that of the household reference person or one living as a related, lodging or

Définitions — suite

d'une famille chambreuse ou de tout autre genre de famille vivant avec une personne repère hors famille. Un **ménage multifamilial** se compose de deux familles de recensement ou plus qui occupent le même logement privé. Une de ces familles peut être celle de la personne repère du ménage ou il peut s'agir d'une personne repère hors famille vivant avec deux familles de recensement ou plus.

Logement collectif. Institution ou établissement commercial ou communautaire qui s'affiche comme tel ou que le recenseur peut identifier comme tel en s'adressant à la personne qui en a la charge, à un résident, à un voisin, etc. Sont inclus dans cette catégorie les hôtels, les motels, les maisons de chambres pour touristes, les maisons de repos, les hôpitaux, les résidences de personnel, les casernes de camps militaires, les camps de chantier, les prisons, les centres d'accueil, les pensions et maisons de chambres, etc. Il peut s'agir d'un logement occupé par des résidents habituels ou uniquement par des résidents étrangers et (ou) temporaires.

Cette définition s'applique aux années de recensement 1971, 1976 et 1981.

Logement privé occupé. Logement privé occupé de façon permanente par une personne ou un groupe de personnes. Sont également inclus dans cette catégorie les logements privés dont les résidents habituels sont temporairement absents le jour du recensement.

Logement privé occupé par des résidents étrangers et (ou) temporaires. Logement privé occupé uniquement par des résidents étrangers et (ou) temporaires le jour du recensement. Le RÉSIDENT TEMPORAIRE d'un logement est une personne qui habitait ce logement le jour du recensement, mais dont le domicile habituel se trouve ailleurs au Canada. Un RÉSIDENT ÉTRANGER est une personne dont le domicile habituel est à l'extérieur du Canada. Ces logements sont classés comme LOGEMENTS ORDINAIRES et comme LOGEMENTS SAISONNIERS/MARGINAUX.

Ménage non familial. Est constitué d'une personne qui vit seule dans un logement privé ou d'un groupe de personnes qui partagent un seul logement privé, mais ne forment pas une famille de recensement.

Cette définition s'applique aux années de recensement 1971, 1976 et 1981.

Ménage privé. La ou les personnes (autres que des résidents étrangers) qui occupent un logement privé et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada. Le nombre de ménages privés est égal au nombre de logements privés occupés.

Definitions — Continued

other type of family with a household reference person who is a non-family person. A **multiple-family household** is one in which two or more census families occupy the same private dwelling. One family may be that of the household reference person, or the household reference person may be a non-family person with whom two or more census families are residing.

Collective dwelling. Refers to a dwelling of a commercial, institutional or communal nature. It may be identified by a sign on the premises or by a Census Representative speaking with the person in charge or with a resident or a neighbour, etc. Included are hotels, motels, tourist homes, nursing homes, hospitals, staff residences, communal quarters of military camps, work camps, jails, missions, rooming, or lodging-houses, and so on. Collective dwellings may be occupied by usual residents or solely by foreign and/or temporary residents.

This terminology applies to the Census years, 1971, 1976 and 1981.

Occupied private dwelling. Refers to a private dwelling in which a person or group of persons is permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day.

Private dwelling occupied by foreign and/or temporary residents. Refers to a private dwelling solely occupied by foreign and/or temporary residents on Census Day. A TEMPORARY RESIDENT of a dwelling is a person who resides there on Census Day, but has a usual place of residence elsewhere in Canada. A FOREIGN RESIDENT is a person whose usual place of residence is outside Canada. These dwellings are classified into REGULAR DWELLINGS and SEASONAL/MARGINAL DWELLINGS.

Non-family household. Refers to one person who lives alone in a private dwelling, or to a group of persons who occupy a private dwelling and do not constitute a census family.

This terminology applies to the Census years, 1971, 1976 and 1981.

Private household. Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

Définitions — suite

Migration

Entrant. Désigne toute personne qui s'établit dans une province en provenance d'une autre province canadienne.

Migration interprovinciale. Ensemble des déplacements d'une province vers une autre accompagnés d'un changement de résidence.

Migration nette. Immigration - émigration + migration interne nette.

Migration nette interprovinciale ou solde migratoire inter-provincial. Différence entre le nombre des entrées et le nombre des sorties de migrants inter provinciaux.

Migration nette totale. Somme de la migration nette interprovinciale et de la migration nette internationale.

Solde migratoire international ou migration nette internationale. Différence entre le nombre d'entrées d'immigrants et le nombre de sorties d'émigrants.

Sortant. Désigne toute personne qui quitte une province et établit sa résidence dans une autre province.

Volume des migrations. Représente la somme des entrées et des sorties pour une région au cours d'une période donnée. On peut donc distinguer le volume des migrations interprovinciales, celui des migrations internationales et le volume de l'ensemble des migrations.

Motel

Voir, hébergement de voyageurs.

Motocyclettes

Les motocyclettes, cyclomoteurs compris, font partie des véhicules à moteur.

Personnes occupées

Entrent dans cette catégorie toutes les personnes qui, pendant la semaine de référence:

- a) ont fait un travail quelconque
- b) avaient un emploi mais n'étaient pas au travail pour l'une des causes suivantes:

maladie ou invalidité
obligations personnelles ou familiales
mauvais temps
conflit du travail

Definitions — Continued

Migration

In-migrant. Any person who takes up residence in another Canadian province.

Interprovincial migration. Designates movements from one province to another, where there is a change of address.

Net migration. Immigration - emigration + net internal migration.

Net interprovincial migration. Difference between the number of in-migrations and the number of out-migrations.

Total net migration. Sum of the net interprovincial migration and the net international migration.

Net international migration. Difference between the number of immigrants and the number of emigrants.

Out-migrant. Any person who leaves a province to take up residence in another province.

Gross migration. The sum of in, and out-migration in a region for a given period. It is therefore possible to distinguish between the interprovincial gross migration, the international gross migration and the total gross migration.

Motel

See, traveller accommodation.

Motorcycles

Motorcycles including motor bicycles are classified as motor vehicles.

Employed

The employed includes all persons who, during the reference week:

- (a) did any work at all
- (b) had a job but were not at work due to:

own illness or disability
personal or family responsibilities
bad weather
labour dispute

Définitions — suite

vacances

autre raison non précisée ci-dessus (à l'exception des personnes mises à pied et des personnes qui devaient commencer à travailler à une date future déterminée).

Personnes seules

Personnes qui vivent seules ou qui occupent une chambre dans un ménage avec lequel elles n'ont aucun lien de parenté.

Population active

La population active civile est composée de la population civile disponible de 15 ans et plus qui était occupée ou en chômage.

Pourvoyeurs en chasse et pêche

Voir, hébergement de voyageurs.

Produit domestique brut aux prix du marché

Le terme "aux prix du marché" signifie que le produit national brut comprend les items suivants: le revenu national net au coût des facteurs, les impôts indirects moins les subventions, les provisions pour consommation de capital et ajustements divers et l'erreur résiduelle.

Produit national brut

Mesure des gains de tous les facteurs canadiens de production quel que soit l'endroit. Pour une explication plus détaillée sur les définitions des comptes nationaux, se reporter à *Comptes nationaux des revenus et des dépenses*, no 13-549F du catalogue.

Recensement

Agglomération. Principal marché du travail d'un noyau urbanisé (ou d'une zone bâtie en continu) comptant entre 10,000 et 99,999 habitants. Les AR sont créées par Statistique Canada et sont ordinairement désignées par le nom de la région urbaine qui forme leur noyau urbanisé. Elles renferment des municipalités (ou subdivisions de recensement) entières. Une AR comprend (1) les municipalités qui se trouvent en totalité ou en partie à l'intérieur du noyau urbanisé et (2) d'autres municipalités si a) au moins 40% de la population active occupée demeurant dans la municipalité travaille dans le noyau urbanisé ou si b) au moins 25% de la population active occupée travaillant dans la municipalité demeure dans le noyau urbanisé.

Puisqu'une AR doit renfermer des subdivisions de recensement entières, ses limites peuvent se trouver dans le secteur réel du marché du travail, ou s'étendre en dehors de celui-ci. Les différences peuvent être importantes dans les régions du Canada où les subdivisions de recensement ont une très grande superficie.

Definitions — Continued

vacation

other reason not specified above (excludes persons on layoff and persons whose job attachment was to a job to start at a definite date in the future).

Unattached Individuals

Persons living alone or rooming in a household where they are not related to other household members.

Labour Force

The civilian labour force is composed of that portion of the civilian non-institutional population 15 years of age and over who were employed or unemployed.

Outfitters

See, traveller accommodation.

Gross Domestic Product at Market Prices

The term "at Market Prices" signifies that Gross National Product includes the following: Net national income at factor cost, Indirect taxes less subsidies, Capital consumption allowances and miscellaneous valuation adjustments, and Residual error of estimate.

Gross National Product

A measure of the earnings of all Canadian factors of production regardless of where located. For a more detailed explanation of National Accounts terminologies please refer to *National Accounts Income and Expenditure*, Catalogue 13-549E.

Census

Agglomeration. Refers to the main labour market area of an urbanized core (or continuously built-up area) having between 10,000 and 99,999 population. CAs are created by Statistics Canada and are usually known by the name of the urban area forming their urbanized core. They contain whole municipalities (or census subdivisions). CAs are comprised of (1) municipalities completely or partly inside the urbanized core; and (2) other municipalities if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core, or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

Since a CA must contain whole census subdivisions, its limits may fall within, or extend beyond, the actual labour market area. The differences may be significant in those parts of Canada where census subdivisions cover particularly large areas of land.

Définitions — suite

Les agglomérations de recensement pour le recensement de 1981 sont maintenant délimitées selon les mêmes critères qui sont utilisés pour les régions métropolitaines de recensement (RMR). La seule chose qui différencie une AR d'une RMR est la taille du noyau urbanisé (les RMR comptent 100,000 habitants et plus). L'application de ces critères a entraîné l'inclusion de 24 AR au programme courant. Par ailleurs, il a fallu en supprimer 23 par suite de la décision de porter de 2,000 à 10,000 le chiffre de population minimum des noyaux urbanisés. Une AR, celle de Trois-Rivières au Québec, a été intégrée au programme des RMR en raison du récent accroissement de son noyau urbanisé. Le nombre total d'AR demeure donc 88.

En 1971 et 1976, les AR étaient composées d'au moins deux municipalités voisines. Ces municipalités devaient être au moins partiellement urbaines et faire partie d'un noyau urbanisé de 2,000 habitants et plus. Le noyau urbanisé comprenait la ville principale et le reste du noyau urbanisé, chacun comptant 1,000 habitants ou plus, et sa densité était d'au moins 1,000 habitants au mille carré (386 au kilomètre carré).

Région métropolitaine. Principal marché du travail d'un noyau urbanisé (ou d'une zone bâtie en continu) comptant 100,000 habitants ou plus. Les RMR sont créées par Statistique Canada et sont ordinairement désignées par le nom de la région urbaine qui forme leur noyau urbanisé. Elles renferment des municipalités (ou subdivisions de recensement) entières. Une RMR comprend (1) les municipalités qui se trouvent en totalité ou en partie à l'intérieur du noyau urbanisé et (2) d'autres municipalités si a) au moins 40% de la population active occupée demeurant dans la municipalité travaille dans le noyau urbanisé ou si b) au moins 25% de la population active occupée travaillant dans la municipalité demeure dans le noyau urbanisé.

Puisqu'une RMR doit renfermer des subdivisions de recensement entières, ses limites peuvent se trouver dans le secteur réel du marché du travail, ou s'étendre en dehors de celui-ci. Les différences peuvent être importantes dans les régions du Canada où les subdivisions de recensement ont une très grande superficie. Il est également possible que des régions métropolitaines de recensement ne concordent pas avec les régions métropolitaines désignées par les autorités locales à des fins de planification ou autres.

Pour le recensement de 1981, les RMR sont les mêmes qu'en 1976, abstraction faite des petites modifications apportées pour respecter les nouvelles limites des municipalités. À la suite de l'accroissement récent de son noyau urbanisé, Trois-Rivières, au Québec, est devenue la vingt-quatrième RMR.

En 1971, la RMR était définie comme le principal marché du travail, mais était délimitée en fonction d'autres critères fondés sur la composition de la population active, le taux de croissance démographique et l'accessibilité.

Les régions métropolitaines de recensement (RMR) et les agglomérations de recensement (AR) se divisent en trois parties: noyau urbanisé, banlieue urbaine et banlieue rurale. Les parties

Definitions — Continued

Census agglomerations for the 1981 Census are now delineated according to the same criteria as census metropolitan areas (CMAs) and differ only in the size of their urbanized cores (CMAs having 100,000 or more population). Twenty-four CAs have been added to the programme as a result of this change. At the same time, 23 CAs have been deleted from the programme as a result of raising the minimum urbanized core population from 2,000 to 10,000. One CA, Trois-Rivières, Québec, has been transferred to the CMA programme as a result of recent growth in its urbanized core. The net effect of the above changes has been to maintain the total number of CAs at 88.

In 1971 and 1976, CAs were comprised of at least two adjacent municipal entities. These entities had to be at least partly urban and belong to an urbanized core having a population of 2,000 or more. The urbanized core included a largest city and remainder, each with a population of 1,000 or more, and had a population density of at least 1,000 persons per square mile (386 per square kilometre).

Metropolitan area. Refers to the main labour market area of an urbanized core (or continuously built-up area) having 100,000 or more population. CMAs are created by Statistics Canada and are usually known by the name of the urban area forming their urbanized core. They contain whole municipalities (or census subdivisions). CMAs are comprised of (1) municipalities completely or partly inside the urbanized core; and (2) other municipalities if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core, or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

Since a CMA must contain whole census subdivisions, its limits may fall within, or extend beyond, the actual labour market area. The differences may be significant in those parts of Canada where census subdivisions cover particularly large areas of land. Census metropolitan areas may also differ from Metropolitan Areas designated by local authorities for planning or other purposes.

For the 1981 Census, CMAs remain unchanged from 1976 except for minor adjustments to respect new municipal limits. Trois-Rivières, Québec, becomes Canada's 24th CMA as a result of recent growth in its urbanized core.

In 1971, CMAs were defined as main labour market areas but were delineated according to alternate criteria based on labour force composition, population growth rate and accessibility.

Census metropolitan areas (CMAs) and census agglomerations (CAs) are divided into three parts: urbanized core, urban fringe and rural fringe. The parts are

Définitions — suite

sont toujours formées de secteurs de dénombrement entiers, mais ne comprennent souvent que des parties de municipalités (ou subdivisions de recensement). Les trois parties ne se retrouvent pas toutes nécessairement dans chaque RMR ou AR.

Région métropolitaine

Voir, Recensement.

Rémunérations

Voir, traitements et salaires.

Restaurants, traiteurs et tavernes

Établissements de mets à emporter. Établissements qui préparent et vendent des repas enveloppés destinés à être consommés hors de l'établissement. Ces établissements se spécialisent généralement dans la préparation de mets particuliers: mets chinois, pizza, poulets, etc. Les kiosques de rafraîchissements qui vendent des chiens-chauds, des hambourgues, de la crème glacée, etc., souvent sur une base saisonnière, sont inclus dans cette catégorie.

Restaurants avec permis. Établissements détenant un permis de vente de boissons alcooliques et dont l'activité consiste à servir surtout des repas préparés et des boissons alcooliques à consommer sur place.

Restaurants sans permis. Établissements qui s'occupent de vendre principalement des repas préparés à consommer sur place. En raison de leur petit nombre, les restauroutes sont classées dans cette catégorie.

Tavernes, bars et boîtes de nuit. Établissements qui vendent des boissons alcooliques à consommer sur place; ils peuvent aussi vendre de la nourriture en petites quantités et offrir des divertissements.

Traiteurs. Établissements qui préparent et servent des repas et des boissons à contrat, dans des usines, immeubles de bureaux, écoles, etc. Ils peuvent aussi préparer des repas dans leurs propres locaux et les livrer pour des fêtes, des réceptions, etc., de même que servir des repas et assurer un service de bar à des événements mondains. Les traiteurs ambulants qui vendent en différents lieux leurs plats préparés sont eux aussi inclus dans cette catégorie.

Revenu

Est constitué des recettes provenant des sources suivantes: (1) traitements et salaires (avant les retenues pour l'impôt, l'assurance-chômage et les régimes de retraite, etc.), (2) le revenu brut provenant d'une entreprise non constituée ou de l'exercice privé d'une profession moins les dépenses, (3) les recettes monétaires des cultivateurs moins les dépenses de

always made up of complete enumeration areas, but often comprise only parts of municipalities (or census subdivisions). Not all three parts will necessarily be found in each CMA or CA.

Metropolitan Area

See, Census.

Earnings

See, wages and salaries.

Restaurants, Caterers and Taverns

Take-out food shops. Establishments which prepare and sell packaged or wrapped meals of specific foods, for consumption primarily away from the premises. Such establishments usually concentrate on a particular line of food, e.g., chinese, pizza, chicken, etc. Refreshment stands are included here, selling such things as hot dogs, hamburgers, ice cream, etc., often on a seasonal basis.

Licensed restaurants. Establishments with a licence to sell alcoholic beverages engaged in selling mainly prepared food and all kinds of alcohol, for consumption on the premises.

Unlicensed restaurants. Establishments engaged in selling mainly prepared food for consumption on the premises. Drive-ins are included here as very few exist.

Taverns, bars and night clubs. Establishments which sell alcoholic beverages for consumption on the premises. Food may be sold in minor quantities and entertainment may be provided.

Caterers (industrial, social and mobile). Establishments that prepare and serve food and beverages under contract, on the premises of manufacturing plants, office buildings, schools, etc. They may also prepare food on their own premises for delivery to parties, receptions, etc., and may also serve the food and provide bartending services (social caterers). Mobile caterers who drive to changing locations carrying prepared food are also included here.

Income

Consists of receipts from the following sources: (1) wages and salaries (before deductions for taxes, unemployment insurance, pensions, etc.), (2) gross income from an unincorporated business or independent professional practice minus expenses, (3) farm cash receipts minus farm operating expenses and depreciation of farm

Définitions — suite

l'exploitation agricole et la dépréciation du matériel agricole et des bâtiments, (4) un tiers des recettes brutes provenant des chambreurs et des pensionnaires, (sauf les parents), (5) le revenu de placements (intérêts sur obligations, dividendes, le revenu net des loyers, etc.), (6) les transferts (les indemnités de bien-être versées par les municipalités et les gouvernements provinciaux et fédéral, tels que les allocations familiales, les indemnisations d'accidents de travail, etc.), (7) les divers revenus habituels, bourses d'études, pensions alimentaires, etc., (8) pensions (pensions de retraite et rentes).

Revenu personnel

Comprend tous les genres de revenus en espèces des particuliers et des entreprises non constituées: (1) traitements, salaires et revenu supplémentaire du travail, (2) solde et indemnités militaires, (3) revenu net provenant d'une entreprise non agricole y compris le revenu de loyers, (4) revenu net provenant de l'exploitation agricole, (5) intérêts, dividendes et divers revenus de placements et (6) revenus de transferts du gouvernement, des compagnies et des non-résidents.

Revenu personnel disponible

Est égal au revenu personnel total moins les impôts directs frappant les particuliers et les autres transferts courants versés par les particuliers aux administrations publiques.

Rural

Voir, urbain.

Semaine de travail

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Taux d'activité

Le taux d'activité représente la population active en pourcentage de la population de 15 ans et plus. Le taux d'activité d'un groupe particulier (âge, sexe, état matrimonial, etc.) est la population active de ce groupe exprimée en pourcentage de la population du même groupe.

Taux de chômage

Le taux de chômage représente le nombre de chômeurs en pourcentage de la population active. Le taux de chômage d'un groupe particulier (âge, sexe, état matrimonial, etc.) est le chômage de ce groupe exprimé en pourcentage de la population active du même groupe.

Definitions — Continued

assets, (4) one third of the gross receipts from roomers and boarders (excluding relatives), (5) investment income (bond interest, dividends, net rentals, etc.), (6) transfer payments (all social welfare payments from municipal, provincial and federal governments such as family allowance, workmen's compensation, etc.), (7) miscellaneous regular income, scholarships, alimony, etc., (8) pensions (retirement pensions, annuities and superannuation).

Personal Income

Includes all forms of income received by persons and unincorporated businesses: (1) wages, salaries and supplementary labour income, (2) military pay and allowances, (3) net income of non-farm business including rent, (4) net income of farm operators from farm production, (5) interest, dividends and miscellaneous investment income, and (6) transfer payment income from government, from corporations and from non-residents.

Personal Disposable Income

Consists of total personal income less personal direct taxes and other current transfers to government from persons.

Rural

See, urban.

Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Participation Rate

The participation rate represents the labour force as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force in that group expressed as a percentage of the population for that group.

Unemployment Rate

The unemployment rate represents the number of unemployed persons as a per cent of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the unemployment in that group expressed as a per cent of the labour force for that group.

Définitions — suite

Terrains de camping pour tentes et roulettes

Voir, hébergement de voyageurs.

Traitements et salaires

Montant brut des salaires et traitements ou les gains représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc.

Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

Rémunération. On obtient les rémunérations hebdomadaires moyennes (y compris celles du surtemps) en divisant les rémunérations hebdomadaires totales par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure, d'employés et des autres catégories de salariés.

On obtient les gains horaires moyens (y compris la rémunération du surtemps) en divisant les rémunérations hebdomadaires totales par le nombre total hebdomadaire d'heures travaillées (le nombre total d'heures hebdomadaires est celui déclaré pour les salariés rémunérés à l'heure, tandis que dans le cas des employés on l'établit en multipliant la moyenne des heures fournies pendant la semaine normale de travail par le nombre d'employés. Nous calculons cette statistique à l'égard des salariés rémunérés à l'heure et des employés.

Salarié. Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada, est une salarié. Les salariés sont classés en trois catégories professionnelles, soit les employés, les salariés rémunérés à l'heure et les autres salariés.

Autres salariés. Tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de trajet, etc.

Employés. Tout salarié dont la rémunération de base constitue une somme fixe versée pour une période d'au moins une semaine.

Salariés rémunérés à l'heure. Tout salarié dont la rémunération de base est calculée selon un taux horaire.

Definitions — Continued

Tent and Trailer Campgrounds

See, traveller accommodation.

Wages and Salaries

Gross wages and salaries or earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc.

The payroll concept does not include supplementary labour costs such as employer's contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

Earnings. The average weekly earnings (including overtime) is obtained by dividing the total weekly payrolls by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees, and for the other types of employees.

The average hourly earnings (including overtime) is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours is reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). It is calculated for the hourly-rated employees and for the salaried employees.

Employees. All persons drawing pay for services rendered or for paid absences and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form constitute employees. Employees are classified into three broad occupational categories, namely: salaried employees, employees paid by the hour and other employees.

Other Employees. Those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.

Salaried Employees. Any employee whose basic remuneration is a fixed amount for a period of at least one week.

Employees paid by the hour. Any employee whose basic wage is expressed as an hourly rate.

Définitions — fin

Urbain

Urbain. Comprend la population demeurant dans une région dont la concentration de population est de 1,000 habitants ou plus et la densité de 400 habitants ou plus au kilomètre carré (Recensement 1981). La densité de la population en 1976 était de 386 habitants au kilomètre carré.

Rural. Comprend toute population non-urbaine.

Véhicules fabriqués outre-mer

Ne comprennent que les véhicules qui sont importés tels quels de pays autres que les États-Unis. S'ils sont assemblés sur le continent américain ils sont considérés comme des véhicules fabriqués au Canada ou aux États-Unis.

Véhicules utilitaires

Les véhicules utilitaires comprennent seulement les camions et les autobus; cette désignation s'applique quelle que soit leur utilisation.

Ventes directes

Par ventes directes, on entend les nombreuses ventes de biens de consommation au consommateur final pour son usage personnel qui ne passent pas par les points de vente au détail habituels, c'est-à-dire les grands magasins, les magasins à succursales, les magasins de détaillants indépendants. La vente directe peut intervenir à tous les stades du mouvement des biens entre le producteur primaire ou l'importateur et le consommateur; dans le secteur agricole, elle peut être faite par les exploitants de serres ou de pépinières et certains maraîchers; dans le secteur manufacturier, elle s'effectue par le truchement de magasins internes exploités par une entreprise au profit de ses employés ou encore de services de vente par correspondance ou de démarchage intégrés à l'entreprise. La vente directe est aussi le fait de certains grossistes et importateurs d'entreprises spécialisées dans ce domaine et d'entreprises qui desservent les exploitants de machines distributrices.

Definitions — Concluded

Urban

Urban. Includes the population living in an area having a population concentration of 1,000 or more and a population density of 400 or more per square kilometre (1981 Census). The population density in 1976 was 386 per square kilometre.

Rural. Includes all non-urban population.

Overseas Manufactured Vehicles

Include only those vehicles imported in a fully assembled state from countries other than the United States. If they are assembled on this continent they are treated as being Canadian or United States manufactured vehicles.

Commercial Vehicles

Commercial vehicles are limited solely to trucks and buses; this designation applies regardless of the use to which such vehicles are put.

Direct Selling

Direct selling refers to the substantial volume of consumer goods sold to the household consumer for his personal use by other than the regular retail store outlet, department store, chain store or independent retail dealer. This occurs at all levels in the movement of goods from the primary producer or importer to the consumer; at the agricultural level by greenhouse and nursery operators and some market gardeners; at the manufacturing stage through sales exclusively to employees at company-operated on-premises stores or through integrated sales divisions using mail-order or door-to-door canvassers; by some wholesalers and importers, by specialized direct-sellers and through vending-machine operators.

Statistics Canada presents . . .

CANADIAN INTERNATIONAL TRADING PATTERNS

Why does Canada's current trade account show a surplus?

Where are our most lucrative markets in the United States?

Find the answers in Statistics Canada's latest chartbook, **Canadian International Trading Patterns**. This publication reviews Canada's relationships with its principal trading partners from 1970 to 1984. The highlights illustrated by the eighty coloured charts include the declining importance of trade with Europe and the recent shift from trade deficit to surplus in the motor vehicle sector. A calendar of events that have had a major effect on trade, such as the 1984 shutdown of pulp and paper mills in British Columbia, is also featured.

Canadian International Trading Patterns, Catalogue No. 65-503C, is available for \$25.00 in Canada (\$26.00 elsewhere) from Publication Sales and Services, Statistics Canada, Ottawa, Canada K1A 0T6. Telephone: (613) 993-7276.

Statistique Canada présente...

PROFIL DU COMMERCE INTERNATIONAL CANADIEN

Pourquoi y a-t-il un excédent dans le compte courant commercial canadien?

Quels sont les marchés américains les plus lucratifs pour nous?

Nous trouverez les réponses à ces questions dans **Profil du commerce international canadien**, le plus récent recueil de graphiques de Statistique Canada. Ce recueil étudie les relations du Canada avec ses principaux partenaires commerciaux entre 1970 et 1984. Parmi les faits saillants illustrés par les 80 graphiques en couleur, on compte la baisse de l'importance des échanges commerciaux avec l'Europe et la tendance nouvelle vers un excédent commercial plutôt qu'un déficit dans le secteur automobile. On y présente également les événements ayant eu des répercussions sur les pratiques commerciales, telle la fermeture des usines de pâtes et papiers en Colombie-Britannique en 1984.

Profil du commerce international canadien, n° 65-503C au catalogue, se vend 25\$ au Canada (26\$ autres pays) et peut être obtenu auprès de Publications — Vente et service, Statistique Canada, Ottawa Canada, K1A 0T6. Tél.: (613) 993-7276.

NOW AVAILABLE... / MAINTENANT DISPONIBLES...

■ Population Projections for Canada, Provinces and Territories, 1984-2006

This report describes recent, wide-ranging demographic developments, and the issues which they pose to present and future generations. What are the long-term implications of declines in the size of our population; of pronounced increases in the number and proportion of elderly Canadians? The report also projects the size of future consumer markets and annual population changes: births, deaths and net migration.

An invaluable publication for business planners, policy makers, the media, social scientists and members of the public interested in the future of Canada's population.

ISBN 0-660-52718-9, Catalogue No. 91-520 (Occasional), 1985, 346 pp., \$40.00 in Canada, \$50.00 elsewhere.

■ Projections démographiques pour le Canada, les provinces et les territoires, 1984-2006

Ce rapport présente les nouvelles réalités démographiques du Canada ainsi que les problèmes actuels et à venir qui y sont liés. Quels effets auront le déclin éventuel de la population et l'augmentation marquée du nombre de personnes âgées. Le rapport présente également des projections et des analyses touchant la taille des marchés futurs, ainsi que des projections sur les variations annuelles de la population: naissances, décès et migration nette.

Ce document constitue un outil précieux pour les planificateurs, les décideurs, les représentants des médias, les spécialistes en sciences sociales et tous ceux intéressés par l'évolution des tendances démographiques au Canada.

ISBN 0-660-52718-9, n° 91-520 au catalogue (hors série), 1985, 346 pages, \$40.00 au Canada, \$50.00 ailleurs.

Canada

MARKETING / COMMERCIALISATION

■ Market Research Handbook 1985-86

Fifty-five charts, 36 maps and over 260 detailed tables present marketing data essential to planners in business or industry. Extensive economic and demographic data include: selected economic indicators; government revenues, expenditures and employment at all levels; trends in merchandising and services; population characteristics, personal income and expenditures; and housing, motor vehicles, household facilities and equipment.

The Handbook also features an index of major subjects and a glossary of technical terms.

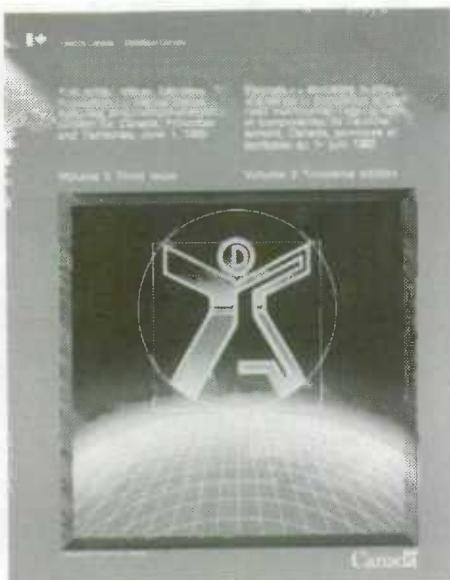

ISSN. 0590-9325, Catalogue No. 63-224 (Annual), 1986, 838 pp., \$75.00 in Canada, \$90.00 elsewhere.

■ Recueil statistique des études de marché, 1985-86

À plus de 260 tableaux détaillés s'ajoutent 55 graphiques et 36 cartes offrant des renseignements sur la commercialisation essentiels aux entreprises et aux industries. Le recueil présente des renseignements économiques et démographiques exhaustifs, notamment certains indicateurs économiques; les recettes, les dépenses et l'emploi dans les administrations publiques (fédérale, provinciales et locales); le commerce et les services; les caractéristiques démographiques; les revenus et les dépenses des particuliers; le logement, les véhicules automobiles et l'équipement ménager.

Le recueil renferme également un index des principaux sujets de même qu'un glossaire de termes techniques.

ISSN. 0590-9325, n° 63-224 au catalogue (annuel), 1986, 838 pages, \$75.00 au Canada, \$90.00 ailleurs.

■ Postcensal Annual Estimates of Population by Marital Status, Age, Sex and Components of Growth for Canada and the Provinces, June 1, 1985, Vol. 3

This publication updates the 1981 Census of Population, providing a reliable profile by age, sex and marital status of the Canadian population. It also contains data by age and sex on the various components of population growth: births, deaths, immigration, emigration and interprovincial migration. Data on the number of marriages, divorces and new widowhoods provide an insight into the current structural changes in marital status.

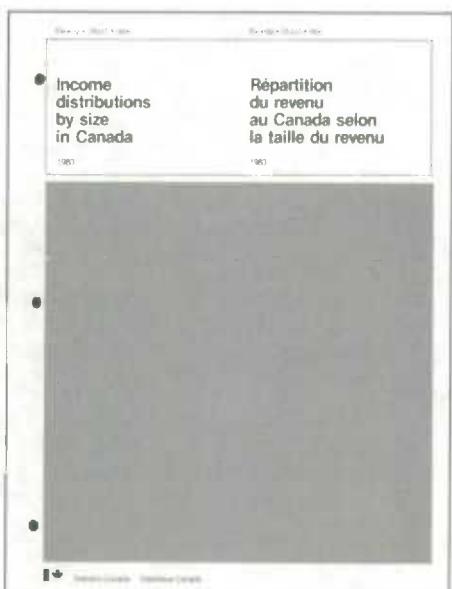

ISSN 0-827-9624, Catalogue No. 91-210 (Annual), 1985, 102 pp., \$22.00 in Canada, \$23.00 elsewhere.

■ Estimations annuelles postcensitaires de la population suivant l'état matrimonial, l'âge, le sexe et composantes de l'accroissement, Canada et provinces au 1^{er} juin 1985, vol. 3

Cette publication met à jour les données du recensement de la population de 1981 et présente un portrait fidèle de la population canadienne, selon l'âge, le sexe et l'état matrimonial. Elle renferme également des données selon l'âge et le sexe des diverses composantes de la croissance démographique: naissances, décès, immigration, émigration et migration interprovinciale. Enfin, le nombre de mariages, de divorces et de nouveaux cas de veuvage donnent un aperçu des changements actuels observés dans la structure de l'état matrimonial.

ISSN 0-827-9624, n° 91-210 au catalogue (annuel), 1985, 102 pages, \$22.00 au Canada, \$23.00 ailleurs.

MARKETING / COMMERCIALISATION

■ Income Distributions by Size in Canada, 1983

What is the buying power of your market?

This annual report classifies Canadian families into 16 groups, and the data cover income, major source of income, region/province, age and sex of the head of the household, and other characteristics. It includes income by quintiles and the demographic characteristics of low-income families and individuals.

ISSN 0575-8750, Catalogue No. 13-207 (Annual), 1985, 184 pp, \$38.00 in Canada, \$39.50 elsewhere.

■ Répartition du revenu au Canada selon la taille du revenu, 1983

Déterminez le pouvoir d'achat de vos marchés.

Cette publication classe les familles canadiennes en 16 groupes, et les données portent sur la taille du revenu, la principale source du revenu, l'âge et le sexe du chef de ménage et d'autres caractéristiques. Elle comprend aussi les parts de revenu par quintile ainsi que les caractéristiques démographiques des familles à faible revenu et des personnes seules.

ISSN 0575-8750, n° 13-207 au catalogue (annuel), 1985, 184 pages, \$38.00 au Canada, \$39.50 ailleurs.

■ Family Food Expenditure in Canada: Selected Cities, 1984

How much do Canadian families spend on food? What do they eat?

This publication summarizes average weekly food expenditures for families and individuals living in urban areas. Spending is classified by family characteristics. Major summary and selected detailed food expenditures are shown for 17 major cities, providing inter-city comparisons.

This publication is essential to food producers and market analysts, as well as government agencies and social organizations.

ISBN 0-660-52874-6, Catalogue No. 62-554 (Occasional), 1986, 204 pp, \$24.00 in Canada, \$25.00 elsewhere.

■ Dépenses alimentaires des familles au Canada: Villes choisies, 1984

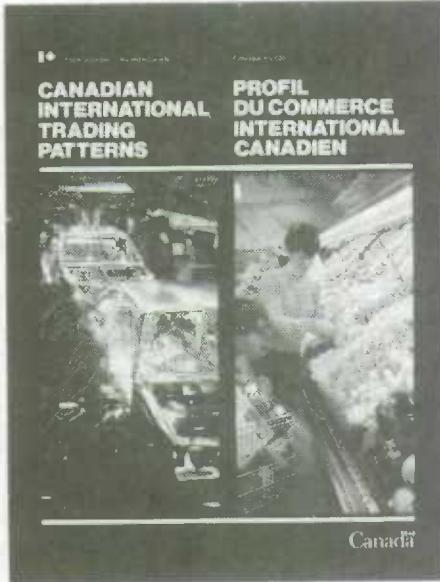

Combien les Canadiens dépensent-ils pour la nourriture? Que mangent-ils?

Cette publication jette un coup d'œil sur les montants moyens dépensés chaque semaine par les familles et les personnes seules demeurant dans les régions urbaines, le tout classé selon les caractéristiques des familles. Un résumé des principales dépenses alimentaires et certaines quantités détaillées sont présentés pour 17 grandes villes, ce qui permet des comparaisons entre les villes.

Cette publication est essentielle aux producteurs d'aliments, aux analystes de marché, ainsi qu'aux organismes publics et sociaux.

ISBN 0-660-52874-6, n° 62-554 au catalogue (hors série), 1986, 204 pages, \$24.00 au Canada, \$25.00 ailleurs.

INTERNATIONAL TRADE / COMMERCE INTERNATIONAL

■ Canadian International Trading Patterns

This chartbook reviews Canada's trading relations with its principal partners between 1970 and 1984. Eighty coloured charts illustrate the highlights of this period, such as the declining importance of trade with Europe and the recent shift from trade deficit to surplus in the motor vehicle sector.

It also includes a calendar of events that have had a major impact on Canada's trade with other countries.

ISBN 0-660-52869-X, Catalogue No. 65-503 (Occasional), 1985, 76 pp., \$25.00 in Canada, \$26.00 elsewhere.

■ Profil du commerce international canadien

Ce recueil de graphiques étudie les relations du Canada avec ses principaux partenaires commerciaux entre 1970 et 1984. Parmi les faits saillants illustrés dans les 80 graphiques en couleur, on compte la baisse de l'importance des échanges commerciaux avec l'Europe et la tendance nouvelle vers un excédent commercial plutôt qu'un déficit dans le secteur automobile.

On y présente également les événements ayant eu des répercussions sur les pratiques commerciales avec les autres pays.

ISBN 0-660-52869-X, n° 65-503 au catalogue (hors série), 1985, 76 pages, \$25.00 au Canada, \$26.00 ailleurs.

GENERAL / GÉNÉRALITÉS

■ Women in Canada: A Statistical Report

This publication, using the most recent data available, is a valuable reference tool encompassing a wide range of issues of interest to Canadian women. One-hundred and fourteen tables reveal the changes that have been affected by women's growing participation in all aspects of Canadian society: family status, education, health, labour force participation, income and crime.

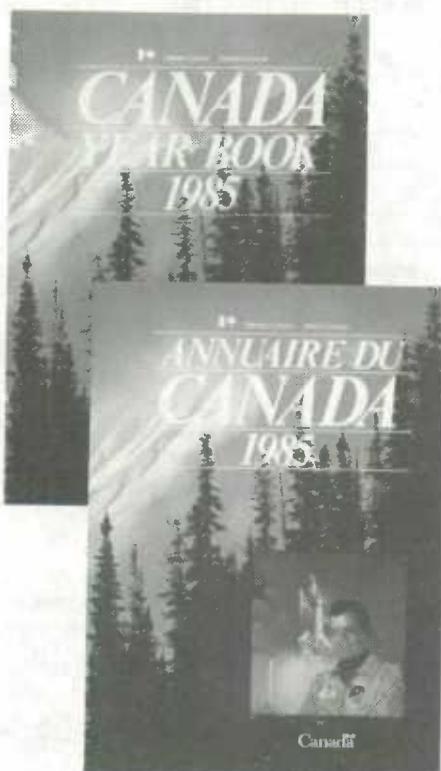

ISBN 0-660-11740-1, Catalogue No. 89-503E (Occasional), 1985, 127 pp., \$25.00 in Canada, \$30.00 elsewhere.

■ Portrait statistique des femmes au Canada

Voilà un précieux ouvrage de référence pour les Canadiens dont le travail ou les études touchent le large éventail des questions et des sujets concernant les femmes. Cent quatorze tableaux révèlent les changements marqués par la participation accrue des femmes dans tous les aspects de la société canadienne: la famille, l'éducation, la santé, l'activité, le revenu et la criminalité.

ISBN 0-660-91392-5, n° 89-503F au catalogue (hors série), 1985, 127 pages, \$25.00 au Canada, \$30.00 ailleurs.

GENERAL / GÉNÉRALITÉS

■ Canada Year Book 1985

Designed to serve as a reference work, this is the latest edition in a series that is now 80 years old. Canada Year Book 1985 presents a detailed portrait of Canada in the mid-1980s, while also serving as a guide to other statistical sources. A wealth of information provides a synopsis of Canada's political, economic and social systems. Included is an examination of the last two federal elections, the recent recession, trends in retail and wholesale trade, the move to smaller families and the aging of the population.

This book is widely used by librarians, parliamentarians, teachers, diplomats, journalists and readers interested in Canadians and Canadian lifestyles.

ISBN 0-660-11801-7, Catalogue No. 11-402E (Biennial), 1985, 894 pp., \$54.00 in Canada, \$70.00 elsewhere

■ Annuaire du Canada 1985

Voici la dernière édition de cet ouvrage de référence paru pour la première fois il y a quatre-vingts ans. Cette publication présente une image détaillée du Canada au milieu des années 1980 et sert de guide à l'égard des autres sources statistiques. Cette mine de renseignements fournit un condensé des systèmes économique et social du gouvernement canadien. On y traite, entre autres, des deux dernières élections fédérales, de la récente récession, du commerce de gros et de détail, de la réduction de la taille des familles et de l'augmentation du nombre de personnes âgées.

Cette publication est largement utilisée par les bibliothécaires, les parlementaires, les enseignants, les diplomates, les journalistes et les autres personnes qui s'intéressent au Canada et aux modes de vie des Canadiens.

ISBN 0-660-91450-6, n° 11-402F au catalogue (biennal), 1985, 894 pages, \$54.00 au Canada, \$70.00 ailleurs.

RETAIL TRADE/ COMMERCE DE DÉTAIL

■ Seasonal Variations In the Canadian Economy: Retail Trade

Seasonal fluctuations in economic activity are analyzed in a study focussing on the retail trade sector. The patterns of sales and the year-to-year changes in these patterns are described in detail. Tables and graphs present data from 1972 to 1982 for 28 kinds of businesses, as well as regional breakdowns of retail sales.

For business people, trade associations, market researchers, universities, economists and statisticians, this study adopts a practical approach to the complicated task of seasonal analysis of current sales, and of creating an index of seasonal variation.

ISBN 0-660-52856-8, Catalogue No. 16-502 (Occasional), 1985, 160 pp., \$25.00 in Canada, \$26.50 elsewhere.

■ Variations saisonnières dans l'économie canadienne: Commerce de détail

Les variations saisonnières dans l'économie canadienne font l'objet d'une étude portant sur le secteur du commerce de détail. Les mouvements saisonniers des ventes et leurs variations d'une année à l'autre sont décrits en détail. Des tableaux et des graphiques couvrant les années 1972 à 1982 présentent les ventes au détail pour 28 catégories de commerces, selon les régions géographiques.

Les gens d'affaires, les associations commerciales, les entreprises d'étude de marché, les universités, les économistes et les statisticiens trouveront cette analyse extrêmement précieuse. On y expose une approche pratique de l'analyse saisonnière des principales ventes. De plus, on introduit un indice des variations saisonnières.

ISBN 0-660-52856-8, n° 16-502 au catalogue (hors série), 1985, 160 pages, \$25.00 au Canada, \$26.50 ailleurs.

RETAIL TRADE / COMMERCE DE DÉTAIL

■ Retail Chain and Department Stores, 1983

Fifty-five tables document the retail sales of chain and department stores in terms of the kind of business, province, selected locality, number of stores and annual sales volume. The publication also includes statistics about stocks on hand at year-end, cost of goods sold, gross margins and the correlation between sales volume and physical size of a store. Sales per square foot (metre), department store commodities and "major" and "junior" type department stores are featured as well.

The report is useful for calculating market share and evaluating store performance against averages.

ISSN 0227-017X, Catalogue No. 63-210 (Annual), 1985, 130 pp., \$25.00 in Canada, \$26.00 elsewhere.

■ Magasins de détail à succursales et les grands magasins, 1983

Cinquante-cinq tableaux présentent les ventes au détail des grands magasins et des magasins à succursales par genre de commerce, par province, selon certaines villes, selon le nombre de magasins exploités et selon le chiffre de vente annuel. On y trouve également des statistiques sur les stocks en fin d'année, le prix de revient des marchandises vendues, la marge bénéficiaire brute ainsi que les corrélations selon le chiffre de vente et la taille du magasin. De plus, on trouve dans la publication des données sur les ventes par pied (mètre) carré, les marchandises des grands magasins et les grands magasins à caractère "traditionnel" et "populaire".

Un outil essentiel pour calculer la part du marché et pour comparer le rendement d'un magasin aux moyennes observées.

ISSN 0227-017X, n° 63-210 au catalogue (annuel), 1985, 130 pages, \$25.00 au Canada, \$26.00 ailleurs.
