

# OPERATING RESULTS AND FINANCIAL STRUCTURE OF FILLING STATIONS AND GARAGES 1954 

Published by Authority of
The Right Honourable C. D. Howe, Minister of Trade and Commerce

Canada. DOMINION BUREAU OF STATISTICS<br>Industry and Merchandising Division<br>Merchandising and Services Section

## NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes, as follows: Volume Y- The Primary Industries, including mining, forestry and fisheries; Volume II - Manufacturing; volume mi - Merchandiving and Services.

Volume III consists of the following parts with individual trade reports listed under each:

## Part I- Wholesale Statistics

A -Wholesale Trade, 25

* B -Operating Results of Food Wholesalers, 25
${ }^{\bullet} \mathrm{C}$ - Operating Results of Dry Goods, Piece Goods and Footwear Wholesalers, 25\$
*D-1 Operating Results of Automotive Parts and Accessories Wholesalers, 25\$
2 Operating Results of Drug Wholesalers, $25 \$$
3 Operating Results of Hardware Wholesalers, 25
4 Operating Results of Plumbing and Heating Supply Wholesalers, $25 \$$
5 Operating Results of Household Appliance \& Electrical Supply Wholesalers, 25 ¢

Part II -Retail Statistics
E - General Review - (Discontinued)
F-Retail Trade, $50 \$$
G-Retall Chain Stores, $50 \$$

* H - Operating Results of Food Store Chains, 25 \$
- I - Operating Results of Clothing Store Chains, 25 ¢
* J-1 Operating Results of Variety Store Chains, 25 e

2 Operating Results of Drug Stores Chains, $25 \$$
3 Operating Results of Furniture Store Chains, 25\$
K - Operating Results of Independent Food Stores, $25 \$$
L-Operating Results of Independent Clothing Stores, 254
M - Operating Results of Independent Hardware, Furniture, Applaice and Radio Stores, 25\$
N - Operating Results of Filling Stations \& Garages, $25 \$$
O-1 Operating Results of Independent General Stores, $25 \$$ 2 Operating Results of Independent Restaurants, 25 3 Operating Results of Independent Fuel Dealers, 25 4 Operating Results of Independent Drug Stores, 25 5 Operating Results of Independent Jewellery Stores, $25 \$$ 6 Operating Results of Independent Tobacco Stores, 254
P-Retall Consumer Credit, $25 \phi$

## Part III - Services and Special Fields

Q - Laundries, Cleaners and Dyers, 25
R -Motion Picture Theatres, Exhibitors and Distributors, 25
S-Hotels, $25 \$$
T-Sales Financing, 25 \$
U - Farm Implement and Equipment Sales, $25 \$$
V - New Motor Vehicle Sales and Motor Vehicle Financing, 25 ¢
W - Advertising Agencies (Memorandum), $10 ¢$
X - Motion Picture Production (Memorandum), 104

The reports are punched to permit of filing in a ring binder.

Filling Stations ..... N-7
Garages ..... $\mathrm{N}-11$

## DEFINITIONS

## Profit and Loss

Net sales - the dollar volume of business done. Allowances and discounts granted to customers and value of goods returned by customers are deducted from gross sales, but sales of meals or lunches provided employees and any goods withdrawn by the proprietor for personal use are included.

Cost of goods sold - determined by adding the beginning inventory to net purchases and deducting the ending inventory.

Gross profit - the difference between "cost of goods sold" and "net sales".
Operating expenses - all costs incurred in the year's operation of a business, except the cost of merchandise. These include:

Salaries and wages (except delivery) - payments to employees before deduction of income tax or unemployment insurance. Proprietors' salaries or withdrawals are included in 'net operating profit" (in unincorporated store operations).

Taxes - business, property and water taxes. Taxes collected for remittance to governmental bodies and income tax are not included.

Insurance - annual proportion of premiums for insurance policies carried to protect the business.
Rent - Payments for use of business premises.
Heat, light and power - cost applicable to year's operations.
Delivery - includes salaries paid to delivery men, truck repairs and maintenance, depreciation, licenses and insurance on delivery equipment and supplies used in connection with delivery (gas, oil, etc.).

Repairs and maintenance - costs incurred to keep fixed store assets operating efficiently (excludes capital expenditure).

Depreciation allowances - provision for decrease in the value of fixed store assets.
Store supplies - wrapping paper, office supplies, etc.
Advertising - displays, window dressing and sales promotion.
Net bad debt loss - estimated amount of uncollectable customers' accounts receivable less the amount recovered from former bad debts.

Other expenses - telephone, telegraph, postage, bank charges, legal, auditing and collection fees, etc.

Net operating profit - is the difference between "total operating expenses" and "gross profit" and includes proprietors' salaries and withdrawals before income tax deductions.

Occupancy - the cost of maintaining and occupying a place of business and includes: rent, business and property taxes, insurance, heat, light and power, repairs and maintenance and depreciation.

## DEFINITIONS

Balance Sheet

## Assets

Cash on hand or in bank - the amount of cash in the business at the end of the year.
Net accounts recelvable - all customers' notes and accounts owing to the business at the end of the year less any reserve for doubtful accounts.

Merchandise inventory - the cost value of merchandise on hand for resale but does not include store supplies on hand.

Other current assets - includes assets which may be converted into cash, if necessary within a reasonably short time, such as Dominion of Canada Bonds and prepaid insurance.

Fixed assets (net) - the book value of land, buildings, furniture, fixtures and equipment less any reserves for depreciation. Separate figures are shown for assets used in the business and those not used in the business.

Other assets - investments of a permanent nature not readily converted into cash, and intangibles such as goodwill and organization costs.

## Liabilities and Net Worth

Current liabllities - are obligations which must be paid in the near future and represent accounts payable or any item that may be considered as a direct lien against current assets.

Fixed Ilabilities - mortgages secured by fixed assets and separated, as are fixed assets, between those used and not used in business.

Other liabilities - long term notes payable, accrued expenses such as taxes due but not yet paid, and prepaid or deferred income.

Net worth - Unincorporated business - the amount invested in the business together with any accumulated profits after proprietor's or partners' withdrawals.

Incorporated business - net worth is shown in two parts:
(1) Capital stock, which represents the shareholders' investment of fully paid-up subscribed shares, and
(2) Surplus, which represents distributable surplus, capital surplus and earned surplus.

## DEFINITIONS

## Profit and Loss Statement Ratios

Stock Turnover - the number of times in a year that the average merchandise inventory is sold and replaced. The average of the beginning and ending inventories is divided into the cost of goods sold.

Note: Each of the following ratios are expressed as a percentage of "net sales". Consequently, it is permissible to make direct comparisons between these ratios. Each ratio represents a portion of the average net sales' dollar.

Gross Profit Ratio - sometimes referred to as the "gross margin ratio" or "mark-up" represents the difference between "cost of goods sold" and "net sales". It is the portion of the average sales' dollar from which the merchant meets his operating expenses and obtains his net operating profit.

Operating Expense Ratios - Each item of expense, as well as "total operating expenses" when expressed as a percentage of "net sales" shows the amounts of the average sales" dollar required to operate the average business.

Net Operating Profit Ratio - the remaining proportion of the average sales" dollar after "cost of goods sold" and "total operating expenses" have been deducted. From this amount, the per centage allowances for both proprietors' salaries and income tax should be deducted in order to determine the percentage to sales of net returns on capital investment.

## Balance Sheet Ratios

Current Ratio - Current Assets $\div$ Current Liabilities - indicates to what extent the business is able to meet its current obligations out of "current assets". Care should be taken to examine the components of current assets because overstocking of inventories and overinvestment in credit sales (accounts receivables) can result in a stronger or more favourable ratio.

Liquidity Ratio - Current Assets less Merchandise Inventory $\div$ Current Liabilities - sometimes referred to as the "acid test", is similar to the "current ratio" as a test of current credit strength. A ratio of $100 \%$ (or 1) is usually considered favourable.

Working Capital to Net Worth Ratio - denotes the relationship between "working capital" (current assets less current liabilities) and a proprietor's equity in the business. That is, the proportion of "net worth" that could be realized readily if liquidation were necessary.

Worth-Debt Ratio - Net Worth - Total Liabilities - If used in conjunction witn the "current ratio", would reflect any weakening of the capital structure of a business through large loans which give a high "current ratio".

## Interstatement Ratio

Turnover of Total Capital Employed - Net Sales $\div$ Total Assets used in the business - provides an indication of the degree of management efficiency. However, this ratio should not be used alone because "profits" and not "sales" are the major criterion of efficiency.

# OPERATING RESULTS AND FINANCIAL STRUCTURE OF FILLING STATIONS AND GARAGES 

## 1954

## INTRODUCTION

This report on operating results and financial structure presents information in the form of averages and ratios as a guide to retail operators for the trades covered. These ratios are the "average" of a broad range of operational efficiency, and as such do not represent top performance guides. However, used with this in mind, they show a standard by which business men can compare their own operating experiences. The pattern of expense and financial ratios, by size and kind of business, permit direct analysis of operating results for the year.

There is growing evidence that Independent retail merchants are making more advantageous use of the results shown in the biennial operating results bulletins issued by the Dominion Bureau of Satistics. Many accounting firms whose clientele includes retail merchants have shown much interest in these series.

A number of trade papers and business periodicals have reproduced and interpreted the results of previous studies with the object of illustrating to retail merchants the manner in which operating results can be used as a tool in store management. This is a practice the Bureau is pleased to encourage, since it meets with one of the most important objects in maintaining this series, namely the promotion of improved merchandising on the part of retailers.

The new owner of a retail business or the prospective operator might well study these averages. Not all failures in business, however, come from the "new-owner" group. It seems reasonable to suppose, however, that failure in many cases is the
result of inadequate knowledge on the part of new proprietors of the true fiscal requirements involved in operating a business and the proper allocation of costs. Where capital is limited, as is often the case in a newly-established business, it would seem that most careful attention should be given to maintenance of proper records and that provision be made to check against some such standard performance as these publications provide.

The following kinds of retail business are presented in this report:

1. Filling Stations.
2. Garages.

There are analyses of:

1. profit and loss statements
2. balance sheet statements.

Profit and loss data are shown for owned and rented stores separately, and for various sale-size categories.

Balance sheet data, which were introduced in 1948, are continued in this 1954 study. This information is presented by sales-size and kind of occupancy groups for business with $\$ 20,000$ or more annual net sales. Where possible, a further differentiation has been made between businesses in operation less than 10 years and 10 years or more. An important change, introduced in 1950, is the segregation of fixed assets and fixed liabilities between those used in the business and those not used in the business. This makes possible a better relationship between assets used in the business and sales, than was possible when all fixed assets of the proprietor were reported as one item.

## FILLING STATIONS

Owly filling stations, selling mainly gas, oll, parts and accessories, tires and tubes, and also performing service and repairs, were used in this report. The sale of gas and oil must constitute $67 \%$ or more of total net sales.

Unincorporated "single establishments" or "'independent" firms only are covered. After careful editing, 296 questionnaires were used for the profit
and loss tabulations (112 for owned and 184 for rented filling stations). Returns from which balance sheet data were used numbered 244 .

Any change in the actual count from survey to survey may be attributed to changes in classification, filling stations going out of business, the necessity of augmenting the survey list or simply to different nor-response in the survey years.

Tabulation of balance sheet data was made on a sales-size range basis and, where possible, a further breakdown by number of years in business.

Compilation of profit and loss daua was made for different sales-size categories. The response from large stations is generally better than that from smaller ones. To obtain proper ratios for total trade, weights of the 1951 census were used. For example, in response to this survey, independent filling stations between $\$ 10,000$ and $\$ 19,999$ may represent $5 \%$ of the business done by all respondents. According to the 1951 census, they, might account for approximately $11 \%$ of total filling station sales. To obtain ratios for total all sizes, the census weights were applied to the various expense and profit ratios of the different sales-size classes.

The summary chart does not show weighted ratios; for sake of comparability with previous years for which weights are not available, aggregate or unweighted ratios were used.

The average gross profit expressed as a percentage of average net sales increased in 1954 to 20.80 per cent from 19.70 per cent in 1952. Net operating expenses also increased, but to a smaller extent, leaving net operating profit with an increase amounting to 0.13 per cent -6.97 per cent in 1952 and 7.10 per cent in 1954. Supplies expense showed the only decrease in operating expenses in 1954 compared with 1952, 0.32 and 0.39 per cent respectively.

Inventories at the end of the year were slightly higher for owned filling stations and slightly lower for rented ones than they were at the beginning of the year. Average inventories for owned and rented establishments showed a very slight increase at year end compared with beginning.

Balance sheet ratios are shown historically, affording valuable comparison for further study.

The following summaries, chart and tables, will give more detail and information on operating results and financial position of filling stations for 1954.

Operating Results of Filling Stations 1952 and 1954 Compared

| Item | 1952 | 1954 |
| :---: | :---: | :---: |
|  | (per cent of net sales) |  |
|  | 19.70 | 20.80 |
| Operating expenses |  |  |
| Employees salaries ................................................................................ | 6.28 | 6. 61 |
| Occupancy ................................................................................................ | 4.19 | 4.64 |
| Store Supplies ......................................................................................... | 0.39 | 0.32 |
| Advertising ...-.......................................................................................... | 0.22 | 0. 28 |
| All other expenses ..............................................e.e.e.ton............................ | 1.65 | 1.85 |
| Total operating expenses ...................................................................... | 12. 73 | 13.70 |
| Net operating profi before deduction of proprietors' salaries and income tax $\qquad$ | 6.97 | 7.10 |

Note: These ratios are "weighted" according to the 1951 Census weights of the different sales sizes forindependent stores and are shown here for the first time. They do not agree with ratios shown formerlv for 1952 nor with those showr: in historical tables.

Financial Ratios of Filling Stations as at December 31, 1948-50-52-54

## GARAGES

Only, garages engaged in making repairs or performing other services in addition to the sale of gas, oil, accessories and parts, are covered in this report, authorized motor vehicle dealers are not included. Either one of the following two requirements must be fulfilled.
(a) Receipts from repair work and other services must constitute $25 \%$ to $50 \%$ of total trade; if exceeding $50 \%$ not classified as a garage.
(b) If less than $25 \%$, the sale of parts and accessories should constitute at least $33 \%$ of total trade as should the sale of gas and oil.

Unincorporated "single establishment" or "independent" firms only are covered. After careful editing, 185 questionnaires were used for the profit and loss tabulations ( 123 for owned and 62 for rented garages). Returns from which balance sheet data were used numbered 140 .

Any change in the actual count from survey to survey may be attributed to changes in classification, garages going out of business, the necessity of augmenting the survey list or simply to different non-response in the survey years.

Tabulation of balance sheet data was made on a sales-size range basis and, where possible, a further breakdown by number of years in business.

Compilation of profit and loss data was made for different sales-size categories. The response from large garages is generally better than that from smaller ones. To obtain proper ratios for total trade, weights of the 1951 census were used. For example in response to this survey, independent garages between $\$ 10,000$ and $\$ 19,999$ may represent $5 \%$ of the business done by all respondents. According to the 1951 census, they might account for approximately $11 \%$ of total garage sales. To obtain ratios for total all sizes, the census weights were applied to the various expense and profit ratios of the different sales-size classes.

The summary chart does not show weighted ratios; for sake of comparability with previous years for which weights are not available, aggregate or unweighted ratios were used.

The average gross profit expressed as a percentage of average net sales increased to 30.59 per cent in 1954 from 29.65 per cent in 1952. The
reverse effect happened for net operating expenses, 21.14 per cent in 1954 against 20.02 per cent in 1952. This caused a decrease in the net operating profit, 9.45 per cent in 1954 from 9.63 per cent in 1952. Store supplies was the only operating expense with a decrease in 1954.

Inventories at the end of the year were slightly higher than at the begimning for both owned and rented garages. The only increase in inventories of owned garages was in the sales-size $\$ 50,000-$ $\$ 99,999$. For rented garages the only sales-size with a decrease in inventory was $\$ 100,000$ and over.

Stock turnover increased with sales-sizes, ranging from 7,09 to 11.23 times per year for owned garages and 7.16 to 23.74 times per year for rented garages.

Balance sheet ratios are shown nistorically, affording valuable comparison for further study.

The following summaries, chart and table, will give more detail and information on operating re* sults and financial position of garages for 1954.

Operating Results of Garages, 1952 and 1954 Compared
