## OPERATING RESULTS

# AND <br> FINANCIAL STRUCTURE RETAIL FOOD STORES 

## 1954

## (Independent)

Published by Authority of
The Right Honourable C. D. Howe, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS<br>Industry and Merchandising Division<br>Merchandising and Services Section

## NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes, as follows: Volume I-The Primary Industries, Including mining, forestry and fisheries; Volume II-Manufacturing; Volume III-Merchandising and Services.

Volume III consists of the following parts with individual trade reports listed under each:

## Part I- Wholesale Statistics

A - Wholesale Trade, $25 \$$

- B-Operating Results of Food Wholesalers, $25 \$$
${ }^{*} \mathrm{C}$ - Operating Results of Dry Goods, Plece Goods and Footwear Wholesalers, $25 \$$
*D - 1 Operaling Results of Automotive Parts and Accessortes Wholesalers, $25 ¢$
2 Operating Results of Drug Wholesalers, $25 \$$
3 Operating Results of Hardware Wholesalers, 25
4 Operating Results of Plumbing and Heating Supply Wholesalers, 25\$
5 Operating Results of Household Appliance \& Electrical Supply Wholesalers, 25 t

## Part II-Retall Statistics

E - General Review - (Discontinued)
F-Retail Trade, 50\$
G-Retail Chain Stores, $50 \$$
${ }^{*} \mathrm{H}$ - Operating Results of Food Store Chalns, 254

- I-Operating Results of Clothing Store Chains, $25 \$$
- J -1 Operating Results of Variety Store Chains, 25 \$

2 Operating Results of Drug Stores Chains, 25\$
3 Operating Results of Fumiture Store Chains, 254
K - Operating Results of Independent Food Stores, $25 \$$
L - Operating Results of Independent Clothing Stores, 25
M - Operating Results of Independent Hardware, Furniture, Appllance and Radio Stores, 25
N - Operating Results of Filling Stations \& Garages, $25 \$$
O-1 Operating Results of Independent General Stores, $25 \$$
2 Operating Results of Independent Restaurants, $25 \$$
3 Operating Results of Independent Fuel Dealers, $25 \$$
4 Operating Results of Independent Drug Stores, $25 \$$
5 Operating Results of Independent Jewellery Stores, 25 \$
6 Operating Results of Independent Tobacco Stores, 25
P - Retall Consumer Credit, $25 \$$

## Part III - Services and Special Fields

Q-Laundries, Cleaners and Dyers, 25d
R-Motion Picture Theatres, Exhlbitors and Distributors, 254
S-Hotels, $25 \$$
T-Sales FinancIng, 25 \$
U - Farm Implement and Equipment Sales, 25\$
V - New Motor Vehicle Sales and Motor Vehicle Financing, 25
W - Advertising Agencles (Memorandum), $10 \$$
X - Motion Picture Production (Memorandum), 10
The reports are punched to permit of filing in a ring binder.

- Blennial reports - not issued for 1954.

## DEFINITIONS

## Profit and Loss

Net sales - the dollar volume of business done. Allowances and discounts granted to customers and value of goods returned by customers are deducted from gross sales, but sales of meals or lunches provided employees and any goods withdrawn by the proprietor for personal use are included.
Cost of goods sold - determined by adding the beginning inventory to net purchases and deducting the ending inventory.
Gross profit - the difference between "cost of goods sold" and "net sales".
Operating expenses - all costs incurred in the year's operation of a business, except the cost of merchandise. These include:
Salaries and wages (except delivery) - payments to employees before deduction of income tax or unemployment insurance. Proprietors' salaries or withdrawals are included in "net operating profit" (in unincorporated store operations).
Taxes - business, property and water taxes. Taxes collected for remittance to governmental bodies and income tax are not included.

Insurance - annual proportion of premiums forinsurance policies cartied to protect the business.
Rent - Payments for use of business premises.
Heat, light and power - cost applicable to year's operations.
Delivery - includes salaries paid to delivery men, truck repairs and maintenance, depreciation, licenses and insurance on delivery equipment and supplies used in connection with delivery (gas, oll, etc.).
Repairs and maintenance - costs incurred to keep fixed store assets operating efficiently (ex cludes capital expenditure).

Depreciation allowances - provision for decrease in the value of fixed store assets.
Store supplies - wrapping paper, office supplies, etc.
Advertising - displays, window dressing and sales promotion.
Net bad debt loss - estimated amount of uncollectable customers' accounts receivable less the amount recovered from former bad debts.
Other expenses - telephone, telegraph, postage, bank charges, legal, auditing and collection fees, etc.
Net operating profit - is the difference between "total operating expenses" and "gross profit", and includes proprietors' salaries and withdrawals before income tax deductions.
Occupancy - the cost of maintaining and occupying a place of business and includes: rent, business and property taxes, insurance, heat, light and power, repairs and maintenance and depreciation.

## DEFINITIONS

Balance Sheet

## Assets

Cash on hand or in bank - the amount of cash in the business at the end of the year.
Net accounts receivable - all customers' notes and accounts owing to the business at the end of the year less any reserve for doubtful accounts.

Merchandise inventory - the cost value of merchandise on hand for resale but does not include store supplies on hand.

Other current assets - includes assets which may be converted into cash, if necessary within a reasonably short time, such as Dominion of Canada Bonds and prepaid insurance.

Fixed assets (net) - the book value of land, buildings, furniture, fixtures and equipment less any reserves for depreciation. Separate figures are shown for assets used in the business and those not used in the business.

Other assets - investment of a permanent nature not readily converted into cash and intangibles such as goodwill and organization costs.

## 1 iabilities and Net Worth

Current liabilities - are obligutions which must be paid in the near future and represent accounts payable or any item that may be considered as a direct lien against current assets.

Fixed liabilities - mortgages secured by fixed assets and separated, as are fixed assets, between those used and not used in business.

Other liabilities - long term notes payable, accrued expenses such as taxes due but not yet paid, and prepaid or deferred income.

Net worth - Unincorporated business - the amount invested in the business together with any accumulated profits after proprietor's or partners' withdrawals.

Incorporated business - net worth is shown in two parts:
(1) Capital stock, which represents the shareholders' investment of fully paid-up subscribed shares, and
(2) Surplus, which represents distributable surplus, capital surplus and earned surplus.

## DEFINITIONS

## Profit and Loss Statement Ratios

Stock Turnover - the number of times in a year that the average merchandise inventory is sold and replaced. The average of the beginning and ending inventories is divided into the cost of goods sold.

Note: Each of the following ratios are expressed as a percentage of "net sales". Consequently, it is permissible to make direct comparisons between these ratios. Each ratio represents a portion of the average net sales' dollar.

Gross Profit Ratio - sometimes referred to as the "gross margin ratio" or "mark-up" represents the difference between "cost of goods sold" and "net sales". It is the portion of the average sales' dollar from which the merchant meets his operating expenses and obtains his net operating profit.

Operating Expense Ratios - each item of expense, as well as "total operating expenses", when expressed as a percentage of "net sales" shows the amounts of the average sales' dollar required to operate the average business.

Net Operating Profit Ratio - the remaining proportion of the average sales' dollar after "cost of goods sold" and 'total operating expenses" 'have been deducted. From this amount, the percentage allowances for both proprietors' salaries and income tax should be deducted in order to determine the percentage to sales of net returns on capital investment.

## Balance Sheet Ratios

Current Ratio = Current Assets $\div$ Current Liabilities - indicates to what extent the business is able to meet its current obligations out of "current assets". Care should be taken to examine the components of current assets because overstocking of inventories and overinvestment in credit sales (accounts receivable) can result in a stronger or more favourable ratio.

Liquidity Ratio - Current Assets less Merchandise Inventory $\div$ Current Liabilities - sometimes referred to as the "acid test", is similar to the "curtent ratio" as a test of current credit strength. A ratio of $100 \%$ (or 1 ) is usually considered favourable.

Working Capital to Net Worth Ratio - denotes the relationship between "working capital" (current assets less current liabilities) and a proprietor's equity in the business. That is, the proportion of "net worth" that could be realized readily if liquidation were necessary.

Worth-Debt Ratio - Net Worth ? Total Liabilities - if used in conjunction with the "current ratio", would reflect any weakening of the capital structure of a business through large loans which give a. high "current ratio".

## Interstatement Ratio

Turnover of Total Capital Employed - Net Sales : Total Assets used in the business - provides an indication of the degree of management efficiency. However, this ratio should not be used alone because "profits" and not "sales" are the major criterion of efficiency.

# OPERATING RESULTS <br> AND <br> FINANCIAL STRUCTURE RETAIL FOOD STORES 

## 1954

## INTRODUCTION

This report on operating results and financial structure presents information in the form of averages and ratios as a guide to retail store operators for the trades covered. These ratios are the "average" of a broad range of operational efficiency, and as such do not represent top performance guides. However, used with this in mind, they show a standard by which business men can compare their own operating experiences. The pattern of expense and financial ratios, by size and kind of business, permit direct analysis of operating results for the year.

There is growing evidence that independent :Tanl merchants are making more advantageous use of the results shown in the biennial operating results bulletins issued by the Dominion Bureau of Statistics. Many accounting firms whose clientele includes retail merchants have shown much interest in these series.

A number of trade papers and business periodicals have reproduced and interpreted the results of previous studies with the object of illustrating to retail merchants the manner in which operating results can be used as a tool in store management. This is a practice the Bureal is pleased to encourage, since it meets with one of the most important objects in maintaining these series, namely the promotion of improved merchandising on the part of retailers.

The new owner of a retail store or the prospective operator might well study these averages. Not all failures in business, however, come from the "new-owner" group. It seems reasonable to suppose, however, that failure in many cases is the result of inadequate knowledge on the part of new proprietors of the true fiscal requirements involved in operating a business and the proper allocation
of costs. Where capital is limited, as is often the case in a newly established store, it would seem that most careful attention should be given to maintenance of proper records and that provision be made to check against some such standard performance as these publications provide.

This report deals with independent retail food stores. Separate figures are given for:

1. Grocery stores
2. Combination meat and grocery stores
3. Meat markets
4. Fruit and vegetable stores
5. Confectionery stores

There are analyses of:

1. profit and loss statements
2. balance sheet statements

Profit and loss data are shown for owned and rented stores separately, and for various sale-size categories.

Balance sheet data, which was introduced in 1948, is continued in this 1954 study. This information is presented by sales-size and kind of occupancy groups for stores with $\$ 20,000$ or more annual net sales. Where possible, a further differentiation has been made between businesses in operation less than 10 years and 10 years or more. An impor tant change, introduced in 1950, is the segregation of fixed assets and fixed liabilities between those used in the business and those not used in the business. This makes possible a better relationship between assets used in the business and sales, than was possible when all fixed assets of the proprietor were reported as one item.

## COMPARISON OF MAN ITEMS BY TRADES

Independent food stores operated on wider gross margins in 1954 than in 1952 with the exception of confectionery stores. This increased mark-up was entirely offset by higher operating expenses, most evident in salaries and occupancy expenses. Again, the exception was in confectionery stores; however, the decrease in gross profit or margin was greater than in operating expenses so that net operating profit was lower than in previous years.

The other four trales ander review showed aractically no change in ratios of net operating profit in 1954 as compared with 1952.

Net operating profits, expressed as percentages of net sales, have declined consistently over the last ten years in most food trades but with smaller changes apparent in the last four years.

Average Gross and Net Profits - llistorical Summary by Trades

| Year | Grocery |  | Combination |  | Meat |  | Fruit and Vegetable |  | Confectionery |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Gross Profit | Net Profit | Gross Profit | Net Profit | Gross Profit | $\begin{gathered} \text { Net } \\ \text { Profit } \end{gathered}$ | Gross Profit | Net Profit | Gross Profit | Net Profit |
|  | (Per cent of net sales) |  |  |  |  |  |  |  |  |  |
| 1938 | 16.0 | 4.5 | 17.4 | 4. 1 | 22.4 | 5.6 | (Not available) |  |  |  |
| 1941 .... | 15.2 | 5.7 | 16.9 | 5.2 | - | - |  |  |  |  |
| 1944 . | 14. 2 | 6.3 | 15.2 | 5.8 | 17.1 | 6.0 | 16.4 | 6.6 | 19.5 | 9.6 |
| 1945 . | 14.1 | 6.1 | 14.9 | 5.0 | 16.9 | 6.0 | 16. 0 | 6.6 | 20.7 | 10.1 |
| 1946 | 14. 3 | 6.0 | 15. 1 | 4.8 | 17.2 | 5. 8 | 16.1 | 6. 5 | 18.9 | 8.8 |
| 1948 ... | 14.0 | 5.7 | 14.6 | 4.4 | 16.6 | 5. 5 | 17. 5 | 6.5 | 19.1 | 8.5 |
| 1950 | 14.4 | 5.2 | 14.9 | 4.1 | 16.1 | 5.0 | 17.5 | 5.9 | 18.2 | 7.5 |
| 1952 .... | 13.8 | 5.2 | 14.6 | 4.1 | 17.5 | 6.1 | 17.5 | 5.6 | 18.8 | 7.5 |
| 1954 ......... | 14.3 | 5.2 | 15.4 | 4.1 | 13.6 | 6.10 | 13. ! | 5.8 | 17.4 | 15.7 |

Average Inventories and Stock Turnover - Historical Suminary iy Trades

With the exception of fruit and vegetable stores, see dollar volume of average inventories has 3teadily risen over the last several years. Part of this increase might be attributed to price changes. In all cases inventories on hand at the end of the year were at a higher level than at the beginning of the year.

Based on the average of beginning and year-end inventories, stock was sold and replaced at a more
rapid rate during 1954 than during 1952, again with the exception of fruit and vegetable stores. Meat marizets, because of the perishable nature of the commodities handled, continue to show a much higher rate of stock turnover at 39.7 times than the other trades. Grocery stores, handling more stable lines of goods, experienced the lowest rate of stock turn at 10.8 times per year.

The chart showing the disposition of the average gross profit dollar for each of the five food trades surveyed, is a valuable standard to which firms within each specific trade might compare their results. Differences arising from such comparisons are more apparent than if percentage ratio of costs and profits to sales were used as the standard or basis of comparison. However, because the number of gross profit dollars varies considerably between trades, there is no common basis for reliable inter-trade comparisons of average gross profit dollar components. As an example, combina-
tion stores operated with a larger sales' volume than did confectionery stores thereby requiring a smaller mark-up to obtain a reasonable net profit. By comparison it can be noted that combination stores in 1954 retained only 27 cents of their average gross profit dollar as net profit, whereas confectionery stores retained 39 cents. There is no justification to assume from this comparison that confectionery stores realized a greater net profit than did combination stores. Inter-trade comparisons should be made with items expressed as proportions of their respective sales.

## FINANCLAL STRUCTURE

Balance sheet data have been collected from 1948, with some improvements made in 1950. Various operating ratios can be made from tabular cata shown under the separate trades on subsequent pages of this report. Averages are shown here in
summary for owned and rented stores separately and represent only stores in the $\$ 20,000$ and over annual sales volume categories. Reference should be made to page 6 for definitions of these ratios.

Balance Sheet Ratios Independent Retail Food Stores, Owned and Rented, Comparison made as at December 31st

| Item |  | Grocery stores | Combination stores | Meat markets | Fruit and vegetable stores | Confectionery stores |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

These ratios are derived from the firms reporting in the designated years, not necessarily from identical firms throughout the series. Some ratios have only been compiled for two years, others for four years, biennially from 1948.

The current ratio of all trades has remained in a favourable position in excess of 2 to 1 , that is $\$ 2.00$ of current assets for each $\$ 1.00$ of current liabilities. Grocery stores especially show a strong curtent ratio in both the owned and rented categories.

The liquidity ratio, a test of credit strength of a business, remained above the standard position of $\$ 1.00$ readily converted assets for each $\$ 1.00$ of curtent liabilities in all cases except confectionery stores operated from rented premises.

Other ratios, both in trade comparisons and yearly within trades, are seen from the above table.

## Independent Gmcery Stores

Only retail establishments selling mainly a general line of groceries were used in this report, providing fresh meats did not exceed $15 \%$ of total net sales.

Unincorporated "'single establishment " or "independent" firms only are covered. After careful editing, 702 questionnaires were used in the tabulation for the profit and loss averages and ratios (419 owned and 283 rented stores).

Returns on which balance sheet data were properly completed numbered 456 . This represents a slight decrease from the number reporting in 1952. Some store classification changes take place between the years which may partly account for this decrease. The addition of fresh meats in excess of $15 \%$, for instance, would place a store in the combination (grocery and meats) classification.

Tabulation of balance sheet data was made on a sales-size range basis and, where possible, a further breakdown by number of years in business is presented.

Tabulation of profit and loss data was made for different sales-size categories. The response from large stores is generally better than that from smaller ones. To obtain proper ratios for total trade, weights of the 1951 Census were used. For example, in response to this survey, independent stores between $\$ 10,000$ and $\$ 19,999$ may represent $5 \%$ of the business done by all respondents. According to the 1951 census, they might account for $11 \%$ of total grocery store sales. To obtain ratios for total
all sizes, the census weights were applied to the various expense and profit ratios of the different sales-size classes.

Summaries showing figures for years prior to 1952 (page 8) and the charts do not show weighted ratios. For sake of comparability with previous years, for which weights are not available, the sample aggregate or unweighted ratios were used.

The average gross profit, expressed as a percentage of average net sales, increased in 1954 to 14.38 per cent from 13.88 in 1952; increases were registered, in some varying degree, for all operating expenses except delivery. In 1954, total expenses climbed to 8.73 per cent from 8.01 for 1952. The increase in operating expenses more than offset the increase in gross profit with the result that net operating profit showed a decrease from 5.87 per cent in 1952 to 5.65 per cent in 1954.

A general increase in inventories during the year is quite noticeable except in the size "under $\$ 10,000^{\prime \prime}$ sales for owned stores where a decrease in inventories occurred.

The rate of stock turnover progressively increases according to the sales-sizes for both owned and rented stores.

Ratios for balance sheet are shown historically for owned and rented stores, affording valuable comparisons for further study.

The following summaries, tathes and chart, will give more detail and information on operating results and financial position of independent grocery stores, 1954.

Operating Results of Independent Grocery Stores 1932 and 1954 Compared

| Item | 1952 | 1954 |
| :---: | :---: | :---: |
|  | (per cent of net sales) |  |
| Gross profit ................................................................................................ | 13.88 | 14. 38 |
| Operating expenses: |  |  |
| Employees salaries ................................................................................ | 2. 70 | 2. 89 |
| Occupancy ................................................................................................ | 2.76 | 3. 30 |
| Delivery | 1.01 | 0.88 |
| Stores Supplies | 0.51 | 0.52 |
| All other expenses | 1.03 | 1. 14 |
| Total operating expenses .......................................................................... | 8.01 | 8. 73 |
| Net operating profit before deduction of proprietors' salaries and income tax | 5.87 | 5. 65 |

Note: These ratios are "weighted" according to the 1951 Census weights of the different sales sizes for independent stores and are shown here for the first time. They do not agree with ratios shown formerly for 1952 nor with those shown in historical tables.

Balance Sheet Ratios - Independent Retail Grocery Stores, Yearly Comarison as at December 31st

| Item |  | 1948 | 1950 | 1952 | 1954 |

## Independent Combination Stores

Only retail establishments selling mainly a combination of groceries and fresh meats were used in this report, providing neither one constituted less than $15 \%$ of total net sales.

Unincorporated "single establishment " or " "independent"' firms only are covered. After careful editing, 757 questionnaires were used in the tabulation for the profit and loss averages and ratios (443 owned and 314 rented stores).

Returns on which balance sheet data were properly completed numbered 633. This represents an increase from the number reporting in 1952. Some store classification changes take place between the years which may partly account for this increase. The addition of fresh meats in excess of $15 \%$ in a grocery store would automatically classify it under combination store (grocery and meats).

Tabulation of profit and loss data was made for different sales-size categories. The response from large stores is generally better than that from smaller ones, To obtain proper ratios for total trade, weights of the 1951 Census were used. For example, in response to this survey, independent stores between $\$ 10,000$ and $\$ 19,999$ may represent $5 \%$ of the business done by all respondents. According
to the 1951 census, they might account for $11 \%$ of total combination store sales. To obtain ratios for total all sizes, the census weights were applied to the various expense and profit ratios of the different sales-slze classes.

Summaries showing figures for years prior to 1952 (page 8) and the charts do not show weighted ratios. For sake of comparability with previous years, for which weights are not available, the sample aggregate or unweighted ratios were used.

The average gross profit, expressed as a percentage of average net sales, increased in 1954 to 15.09 per cent from 14.50 per cent; delivery and stores supplies were the only operating expenses showing a decrease. The increase from 10.14 per cent in 1952 to 10.69 in 1954 for operating expenses almost offset the gross profit increase, with the result that the net operating profit showed a slight increase from 4.36 per cent in 1952 to 4.40 per cent in 1954.

A small overall increase in inventories during the year was noticed.

The rate of stock turnover increased according to sales-size for both owned and rented stores.

Ratios for balance sheet are shown historically for owned and rented stores, affording valuable comparisons for further study.

The following summaries, tables and chart, will give more detail and information on operatin; results and financial position of independent combination stores, 1954.

## Ti:dependent Meat Markets

Only retall establishments selliag meialy fresh heats were used in this report, in which dry groceries did not exceed $15 \%$ of total net sales.

Unincorporated "single establishment " or "independent" firms only, are covered. After careful editing, 240 questionnaires were used in the tabulation for the profit and loss averages and ratios (106 owned and 134 rented).

Returns on which balance sheet data were properly completed numbered 189. Tabulation of balance sheet data was made on a sales-size range basis and, where possible, a further breakdown by number of years in business.

Tabulation of profit and loss data was made for different sales-size categories. The response from large stores is generally better than that from smaller ones. To obtain proper ratios for total trade, weights of the 1951 Census were used. For example, in response to this survey, independent stores between $\$ 10,000$ and $\$ 19,999$ may represent $5 \%$ of the business done by all respondents. According to the 1951 census, they might account for $11 \%$ of total meat market sales. To obtain ratios for total all sizes, the census welghts were applied to the various expense and profit ratios of the different 3ales-size classes.

Summaries showing figures for years prior to 1952 (1age 8) and the charts do not show weighted
ratios. For sake of comparability with previous years, for which weights are not available, the sample aggregate or unweighted ratios were used.

The average gross profit, expressed as a percentage of average net sales, increased in 1954 to 18.90 per cent from 17.78 in 1952; increases were registered, in some varying degree, for all operating expenses except delivery. In 1954, total expenses climbed to 12.53 per cent from 11.37 in 1952 . The increase in operating expenses offset the increase in gross profit with the result that net operating profit showed a slight decrease in 1954, namely 6.37 per cent against 6.41 per cent in 1952.

Total inventories in 1954 remained almost unchanged between beginning and year end.

The rate of stock turnover was fairly pronounced for owned stores in the sales-size $\$ 50,000$ to $\$ 99,999$ at 44.18 compared to other sizes which ranged from 25.53 to 30.32 times per year. Rented stores turnover rates showed a gradual increase as sales size increased.

Ratios for balance sheet are shown historically for owned and rented stores, affording valuable comparisons for further study.

The following summaries, tables and chart, will give more detail and information on operating results and financial position of independent meat markets, 1954.

Operating Results of Independent Meat Markets 1932 and 1934 Compared

| Item | 1952 | 1954 |
| :---: | :---: | :---: |
|  | (per cent of net sales) |  |
| Gross profit ........................................................................................... | 17.78 | 18. 90 |
| Operating expenses: |  |  |
| Employees' salaries ............................................................................. | 4. 90 | 5. 53 |
| Occupancy .......................................................................................... | 2.89 | 3. 37 |
| Delivery ............................................................................................ | 1.51 | 1. 35 |
| Stores Supplies ................................................................................. | 0.79 | 0.94 |
| All other expenses .................................................................................... | 1. 28 | 1.34 |
| Total operating expenses ........................................................................ | 11.37 | 12. 53 |
| Net operating profit before deduction of proprietors' salaries and income tax | 6.41 | 6.37 |

Note: These ratios are "weighted" according to the 1951 Census weights of the different sales-sizes for independent stores and are shown here for the first time. They do not agree with ratios shown formerly for 1952 nor with those shown in historical tables.

## Independent Fruit and Vegetable Stores

Retail establishments selling mainly fresh fruits and fresh vegetables were used in this report, providing they constituted at least $50 \%$ of total net sales. Stores selling a combination of fruits, vegetables and groceries and other items were also included but fruits and vegetables had to predominate.

Unincorporated "single establishment" or "'independent" firms only are covered. After careful editing, 173 questionnaires were used in the tabulation for the profit and loss averages and ratios (67 owned and 106 rented stores).

Returns on which balance sheet data were properly completed numbered 96. Tabulation of
balance sheet data was made on a sales-size range basis and, where possible, a further breakdown by number of years in business is presented.

Tabulation of profit and loss data was made for different sales-size categories. The response from large stores was generally better than that from smaller ones. To obtain proper ratios for total trade, weights of the 1951 Census were used. For example. in response to this survey, independent stores between $\$ 10,000$ and $\$ 19,999$ may represent $5 \%$ of the business done by all respondents. According t. 0 the 1951 census, they might account for $11 \%$ of total fruit and vegetable store sales. To obtain ratios for total all sizes, the census weights were applied to the various expense and profit ratios of the different sales-size classes.

Summaries showing figures for years prior to 1952 (page 8) and the charts, do not show weighted ratios, For sake of comparability with previous years, for which weights are not available, the sample aggregate or unweighted ratios were used.

The average gross profit, expressed as a percentage of net sales increased in 1954 to 18.42 per cent from 17.74 per cent for 1952. Increases were registered, in some varying degree, for all operating expenses except store supplies. In 1954, total expenses climbed to 12.47 per cent from 11.50 for 1952. The increase in operating expenses more than offset the increase in the gross profit, with the result that net operating profit showed a decrease from 6.24 per cent in 1952 down to 5.95 per cent in 1954.

Inventories for owned stores during the year for all sales-sizes showed noticeable increases compared to rented stores where noticeable decreases were experienced.

The rate of stock turnover progressively increased according to sales-sizes for both owned and rented stores.

Ratios for balance sheet are shown historically for owned and rented stores, affording valuable comparisons for further study.

The following summaries, tables and chart, will give more detail and information on operating results and financial position of independent fruit and vegetable stores, 1954.

Operating Results of Independent Fruit and Vegetable Stores 1952 and 1954 Compared

| Itein | 1952 | 1954 |
| :---: | :---: | :---: |
|  | (Der cent of net sales) |  |
| Gross profit ................................................................................................ | 17.74 | 18. 42 |
| Operating Expenses: |  |  |
| Employees' salaries | 3. 79 | 4. 35 |
| orcupancy | 4.01 | 4.46 |
| Delivery ....... | 1.42 | 1. 46 |
| Sitores Supplies | 1.21 | 1. 06 |
| All Dther expenses | 1.07 | 1. 14 |
| Total operating expenses..................................................................... | 11. 50 | 12-47 |
| Net operating profit before deduction of proprietors' salaries and income tax | 6.24 | 5.95 |

Note: These ratios are "weighted" according to the 1951 Census weights of the different sales-sizes for independent stores and are shown here for the first time. They do not agree with ratios shown formerly for 1952 nor with those shown in historical tables.

## Independent Confectionery Stores

Retail establishments selling mainly candy and confectionery, soft drinks, soda fountain products and ice cream to the extent of at least $50 \%$ of total net sales, were used in this report. Other items sold such as light lunches should not constitute more than $40 \%$ of total net sales nor should sales of groceries and fresh fruits and vegetables.

Unincorporated "single establishment" or "independent" firms only are covered. After careful editing, 197 questionnaires were used in the tabulation for the profit and loss averages and ratios ( 93 owned and 104 rented stores).

Returns on which balance sheet data were properly completed numbered 99. Tabulation of balance sheet data was made on a sales-size range basis, and, where possible, a further breakdown by number of years in business is presented.

Tabulation of profit and loss data was made for different sales-size categories. The response from large stores was generally better than that from smaller ones. For example, in response to this Survey, independent stores between $\$ 10,000$ and $\$ 19,999$ may represent $5 \%$ of the business done by all respondents. According to the 1951 census, they might account for $11 \%$ of total confectionery store sales. To obtain ratios for total all sizes, the census weights were applied to the various expense and profit ratios of the different sales-size classes.

Summaries showing ligures for years prior to 1952 (page 8) and the charts do not show weighted ratios. For sake of comparability with previous years, for which weights are not available, the sample aggregate or unweighted ratios were used.

The average gross profit, expressed as a percentage of average net sales, decreased in 1954 to 17.57 per cent from 18.93 in 1952 ; decreases were registered for all operating expenses except for occupancy. In 1954, total expenses dropped to 10.23 per cent from 10.93 per cent in 1952. The decrease in operating expenses cut the loss in gross profit by almost half, with the net operating profit showing a decrease from 8.00 per cent in 1952 to 7.34 per cent in 1954.

A slight increase in inventory for total owned and rented stores was noticed for the year 1954.

The rate of stock turnover increased with the sales size for rented stores, owned stores did the same except for sales-size $\$ 10,000-\$ 19,999$.

Ratios for balance sheet are shown historically for owned and rented stores, affording valuable comparisons for further study.

The following summaries, tables and chart, will give more detail and information on operating results and financial position of independent confectionery stores, 1954.

Operating Results of Independent Confectionery Stores 1952 and 1954 Compared

| Item | 1952 | 1954 |
| :---: | :---: | :---: |
|  | (per cent of net sales) |  |
| Gross profit ................................................................................................ | 18. 93 | 17.57 |
| Operating expenses: |  |  |
| Employees' salaries.. | 3. 60 | 2. 79 |
| Occupancy | 5. 32 | 5. 60 |
| Delivery | 0.24 | 0.20 |
| Stores Supplies | 0. 52 | 0.43 |
| All other expenses. | 1.25 | 1. 21 |
| Total operating expenses | 10. 93 | 10. 23 |
| Net operating profit before deduction of proprietors' salaries and income tax $\qquad$ | 8.00 | 7.34 |

Note: These ratios are "welghted" according to the 1951 Census weights of the different sales-sizes for independent stores and are shown here for the first time. They do not agree with ratios shown formerly for 1952 nor with those shown in historical tables.

Balance Sheet Ratios - Independent Retail Confectionery Stores, Yearly Comparison Made as at December 31st.
