# OPERATING RESULTS AND FINANCIAL STRUCTURE RETAIL HARDWARE, FURNITURE, APPLIANCE AND RADIO STORES 1950 

Published by Authority of the Rt. Hon. C. D. Howe
Minister of Trade and Commerce

Prepared in the Merchandising and Services Section Industry and Merchandising Division

Dominion Bureau of Statistics
Ottawa

## NOTICE

The Industry and Merchandising Division of the Bureau of Statistics collects and complles figures on (a) the primary, industries in Canada - mining, forestry, and fishing: (b) manufacturing; (c) construction; and (d) merchandising and services.

For the purpose of annual compllation and publication, reports on merchandising and services have been classified as follows:

## Part I - Wholesale Statistics

A Wholesale Trade, 25\%.

- B Operating Results of Food Wholesalers, 25\$.
* C Operating Results of Dry Goods, Piece Goods, and Footwear Wholesalers, 25\$.
- D Operating Results of Miscellaneous Wholesalers (automotive equipment, drugs, hardware, plumbing and heating equipment), 25 .

## Part II - Retail Statistics

E General Review, 254.
F Retail Trade, 50\&.
G Retail Chain Stores, 504.

- H Operating Results of Chain Food Stores, $25 \$$.
- I Operating Results of Chain Clothing Stores, 254.
- J Operating Results of Miscellaneous Chain Stores (variety, drug, furniture), 25c.

K Operating Results of Retall Food Stores, 25
L Operating Results of Retail Clothing Stores, $25 \$$
M Operating Results of Retail Hardware, Furniture, Appliance, and Radio Stores, 25 \$.
N Operating Results of Filling Stations and Garages, 25 \$.

- Operating Results of Miscellaneous Retail Stores, 25 .

P Retall Consumer Credit, 254.

## Part 11 - Services and Spectal Fields

Q Laundrles, Cleaners and Dyers, 254.
R Motion Picture Theatres, Exhibitors, and Distributors, 25 \$.
s Hotels, 25c.
T Bales Financing, 254.
U Farm Implement and Equipment Sales, 254.
V New Motor Vehicle Sales and Motor Vehicle Financing, 25\$.

The reports are punched to permit of illing in a ring binder.

- Blennial reports - not issued for 1950.

## DEFINITIONS

## Balance Sheet

## Assets

Cash on hand - and in the bank represents the amount of cash at the end of the year.
Net accounts receivable - are all notes and accounts owing to the business at the end of the year less any reserve for doubtful accounts.

Merchandise inventory - represents the cost value of merchandise on hand for resale but does not include store supplies on hand.

Other current assets - includes assets which may be converted into cash, if necessary, within a reasonably short time, such as prepaid insurance, office and store supplies, Dominion of Canada Bonds.

Fixed assets (net) - is the book value of land, buildings, furniture, fixtures and equipment less any reserves for depreciation. Separate figures are shown for assets used in the busimess and those not used in the business.

Other assets - Investments of a permanent nature not easily bonverted into eash and intabibles such as goodwill.

## Liabilities and Net Worth

Current liabilities - are obligations which must be paid in the near future and represent accounts receivable or any item that may be considered as a direct lien against current assets.

Fixed liabilities - mortages secured by fixed assets and separated, as are fixed assets, between those used and not used in business.

Other liabilities - long term notes, accrued expenses such as taxes or rent due but not yet paid, and prepaid or deferred income.

Capital stock - applicable to incorporated companies, represents the investment account of the stockholders in the capital shares of the corporation and does not exceed the amount authorized.

Surplus - applicable to corporations, includes earned surplus from operating profits, capital surplus from premiums received on the sale of capital stock, and surplus reserves.

Net worth - is the difference between total assets and total liabilities. This is composed of stock and surplus in the case of incorporated companies and in unincorporated businesses represents the proprietor's or partner's equity including undivided profits.

## DEFINITIONS

## Profit and Loss

Net sales - represent the dollar volume of business done. Allowances and discounts granted to customers and value of goods retumed by customers are deducted from gross sales, but sales of meals or lunches provided employees and any goods withdrawn by the proprietor for personal use are included.

Gross profit - is the difference between the cost of merchandise sold and the selling price. The cost of merchandise sold is calculated by adding the beginning inventory to net purchases and deducting the ending inventory.

Operating expenses - are the amounts paid out for any and all expenses incurred in the operation of a business, except the cost of merchandise. These include:

Salaries and wages (except delivery) - paid to employees before deduction of income taxes or unemployment insurance. Proprietors' salaries or withdrawals are included in Net Profit (in unincorporated store operations).

Tries and Insurance - business, property and water taxes, and insurance premiums cartied for the protection of the business. Income taxes and other taxes collected for remittance to govemmental bodies are not included.

Kentals - monies paid for premises used only in the business.
Heat, Hight and power expenses - amount paid for these used during the year.
Delivery expense - includes salaries paid to delivery men, truck repairs and maintenance, depreciation, licences and insurance on delivery equipment and supplies used in connection with delivery (gas, oil, etc.).

Repairs and maintenance - incurred for the purposes of keeping fixed store assets operating efficiently (excludes capital expenditure).
Depreciation - allowances to cover decreases in the value of fixed store assets.
Store supplies - used in the business during the year - wrapping paper, office supplies, etc.
Advertising
Loss on bad debts - during the year - amount written off less old debts recovered.
Other expenses - telephone, telegraph, postage, bank charges, legal fees, collection and auditing fees, etc.

Net Profit - is the difference between gross margin and total expenses and includes proprietors' salaries and witharawals before income tax deductions.

Stock tumover - is the number of times in a year that the merchandise is sold and replaced. The average of the beginning and year ending inventories is divided into the cost of merchandise sold.

-

## INTRODUCTION

A yardstick of performance is a useful gauge in assessing the success of endeavour. When that yardstick takes the form of a statistical summary of the average operating experience of retail stores, it may not constitute an ideal pattern of operations which all retailers should set as a goal, but it does represent a reasonably useful standard by which the retailer may ascertain whether or not his operations are being conducted as effectively, economically and profitably as those of the trade in general. To the merchant whose profits are below average, the operating results summaries may help to disclose the reasons which account for this situation. Reflection and consideration on the part of the merchant make it possible to decide whether his operating methods should be altered or whether the situation is normal in the light of conditions peculiar to the location of his business.

The average results shown are Dominion averages for the various trades. The averagegross vrofit of a trade for instance, must not be interpreted as the gross profit of all commodities handled by that trade because different commodities have widely varying mark-ups. Likewise, the averages are not necessarily correct for local interpretation as the sample was designed to produce national averages.

There is a growing evidence that independent retail merchants are making more advantageous use of the results shown in the biennial operating results bulletins issued by the Bureau of Statistics. Many accounting firms whose clientele includes retail merchants have shown an interest in these series.

A number of trade papers and business periodicals have reproduced and interpreted the results of previous studies with the object of illustrating to retail merchants the manner in which operating results can be used as a tool in store management. This is a practice the Bureau is pleased to encourage, since it meets with one of the most important objects in maintaining this series, namely the promotion of improved merchandising on the part of rotailers.

Statistics derived from other sources have shown that the mortality rate of business is much higher among new entrants into the field of retailing than among those established for five years or more.

There are many reasons for this, some of them associatod with the natural incompetence of the

come by means of operating statement analysis. It seems reasonable to suppose, however, that failure in many cases is the result of inadequate knowledge on the part of new proprietors of the true fiscal requirements involved in operating a business and of the proper allocation of costs. Where capital is limited, as is often the case in a newly-established store, it would seem that most careful attention should be given to maintenance of proper records and provision be made to check against some such standard performance as these publications provide.

This report deals with independent retail stores, results for which are only shown for unincorporated stores except hardware where incorporated are also shown.

The trades covered are:

1. Hardware
2. Furniture
3. Household Appliance \& Radio

There are analyses of:

1. Profit and loss statements
2. Balance sheet summaries

Profit and loss data are shown for owned and rented stores separately, and for various sales-size classes.

Balance sheet data, which was added in 1948, is continued in this 1950 study. This information is presented by size and occupancy groups for stores with $\$ 20,000$ or more annual net sales. Where possible, a further breakdown has been made bebusinesses in operation less than 10 years and those in business 10 years or more. An important change from the 1948 data is the segregation of fixed assets and fixed liabilities between those used in the business and those not used in the business. This makes possible a better relationship between fixed assets and the sales produced by those assets than was possible when all fixed assets of the proprietor were reported as one item.

The same basic sample of firms is used in this series although the sample varies slightly in each survey year. There is, however, a high degree of continuity among the respondents and it is believed that no serious distortion arises out of any change in responding firms. For the most part, successive surveys have provided an increasing response rate, an encouraging feature from the standpoint of accuracy and, it is believed, an indication of the growing realization on the part of merchants of the value of iiuse statistios

## MERCHANDISING AND SERVICES

## Comparison of Main Items by Trades

## 1. Not available.

Note: Net profit includes proprietors' salaries and income tax.

The 1950 gross profits of all three trades were greater in relation to sales than they were in 1948. Unincorporated hardware stores reported the smallest gross profit at $25.8 \%$ of net sales, furniture stores $27.1 \%$ and household appliance and radio stores showed a gross profit of $27.8 \%$ of net sales. Hard-
ware stores and furniture stores experienced a considerable increase in operating expenses during 1950 which offset any gain in gross profit to leave net profits smaller than those obtained in 1948. Appliance and radio stores recorded a slight increase in the ratio of net profit in 1950 compared with 1948.

Inventories and Stock Turnover

1. Times per year.

Inventories on hand at the end of 1950 for the three trades were greater in dollar volume than inventories at the beginning of the year of the 1948 year-end inventories. This higher dollar volume inventory, together with a smaller average sales per
store, resulted in slower rates of stock turnover in all trades in 1950 compared with 1948. Hardware stores sold and replaced stock 2.4 times a year, furniture 2.9 times and household appliances and radio stores 4.4 times

Average Operating Expenses 1950

| Total. | 15.38 | 18.35 | 17.82 | 23.38 | 24.52 | 26.53 |

COMPARISON OF OPERATING RESULTS

Salaries of incorporated firms include all executive salaries. The withdrawals of proprietors of unincorporated businesses are not included in operating expenses. Appliance and radio stores paid a greater share of the sales dollar in salaries than the other two trades. Occupancy expense was quite uniform for the different trades between the two types of organization and ranged from $3.56 \%$ of net sales for unincorporated appliance and radio stores to $4.83 \%$ for incorporated furniture stores. Furniture stores paid more for delivery than the other trades and hardware stores the least:

Hardware stores showed the best ratio of current assets to current liabilities as well as the smallest ratio of liabilities to net worth. In both the owned and rented class of unincorporated stores, the proprietors of appliance and radio stores utilized their store fixed assets to the best advantage by producing sales of $\$ 5.63$ and $\$ 28.93$ respectively for each $\$ 1$ of such fixed assets. Liabilities of hardware store owners were only $30 \%$ and $40 \%$ of net worth in the owned and rented stores respectively. This ratio was highest in owned appliance and radio stores where liabilities formed $.76 \%$ of net worth.

Financial Position at December 31, 1950 of Unincorporated Stores

| Ratio | Owned stores |  |  | Rented stores |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Hardware | Fumilture | Appliances \& Radia | Hardware | Furniture | Appliances \& Radio |
| Current assets to current liabilities. | 4. 79 | 2. 57 | 1.98 | 4. 03 | 2.41 | 2.55 |

| Sales to flxed assets used in the business. | 5. 50 | 4.32 | 5.63 | 28.85 | 27. 53 | 28.93 |
| Liabilities to net worth ............................................ | . 30 | . 58 | . 76 | . 40 | . 74 | . 61 |

## Hardware Stores

Reports suitable for tabulation of profit and loss information were received from 574 unincorporated stores and from 108 incorporated firms. These were separated into sales-size groups for both owned and rented stores with incorporated firms falling in sizes of $\$ 20,000$ and over annual net sales.

Balance sheet data were secured from 426 unincorporated stores and from 90 incorporated companies. This tabulation was made only for businesses with over $\$ 20,000$ annual sales volume.

Some of the more important features on the 1950 operations and on the financial structure of hardware stores at the end of the year are summarized below:

While gross profit ratios were greater in 1950 than in 1948 for both unincorporated and incorporated hardware stores, operating expenses increased to a greater extent to leave smaller net profit percentages.

Salaries and wages paid to eniphoyees accounted for $7.38 \%$ of the sales of unincorporated stores compared with $6.48 \%$ in 1948, and for incorporated stores $14.22 \%$ in 1950 compared with $12.61 \%$ in 1948.

Salaries, delivery and advertising expenses of unincorporated stores expressed as percentages of net sales, increased with sales volume while other operating expenses generally decreased in ratio to sales.

The rate of stock turnover was more rabid in the larger stores than in the smaller and ranged from 1.57 times a year to 3.09 times.

Both unincorporated and incorporated hardware stores showed very favourable ratios of current assets to current liabilities with no section below the ratio of 3 to 1 .

Operating Results of Hardware Stores 1948 and 1950 Compared

1. For unincorporated stores this ratio also includes proprietors' salaries.

## Furniture Stores

A total of 165 reports suitable for profit and loss tabulation was received from unincorporated furniture stores. No special canevass of incorporated firms was made but, since the 1948 survey, a number of re-organizations to incorporated companies took place so that some reports from this type were received. This small number did not permit any breakdown by size and the results are not shown in this bulletin.

Balance sheet results shown were obtained from 125 returns in the over $\$ 20,000$ class of unincorporated stores.

Summary points on the 1950 operations of unincorporated furniture stores and on their financial position at the end of the yeat are given below.

The average gross profit increased from $26.73 \%$ of net sales in 1948 to $27.05 \%$ in 1950 .

Operating expenses were higher in 1950 at $18.35 \%$ of net sales and ret profit was $8.70 \%$ compared with $9.59 \%$ in 1948.

Smaller stores reported higher ratios of gross profit than did the larger sales-size categories - the range was from $28.86 \%$ of net sales to $25.23 \%$

The rate of stock turnover was more rapid ir the larger stores and ranged from 3.29 times a year to 1.40 times.

The proprietors of both "owned" and "rented" furniture stores had more than $\$ 2.00$ cursent assets to meet every $\$ 1.00$ current liablities at the end of 1950.

Sales of $\$ 4.32$ were transacted for every $\$ 1.00$ of fixed assets used in the business in the owned class and to the amount of $\$ 27.53$ in the rented class.

## Household Appliance and Radio Stores

Reports properly completed for profit and loss data were received from 146 stores in this classification. These were tabulated by occupancy and sales-size with too few in the class "under $\$ 10,000$ annual net sales" to permit publication of results. Balance sheet information was tabulated only for firms with sales of $\$ 20,000$ and over. Reports satisfactory for this tabulation were received from 108 stores.

Some of the main features in the 1950 operations of household appliance and radio stores and in their financial position at the end of the year are as follows:

While a slightly higher ratio of gross profit was obtained in 1950 than in 1948, operating expenses did not increase in relationship to sales.

A considerable decrease in the salary ratio from $9.07 \%$ to $8.49 \%$ of net sales, was mainly responsible for the smaller percentage of operating expenses in 1950.

No consistent trend in gross or net profits over the various size classes was revealed in 1950.

Inventories were greater in dollar volume at the end of the year than at the beginning.

The rate stock turnover increased from 2.24 times a year in the smallest sales-size class to 5.99 times in the largest.

The "current ratio" - current assets to current liabilities-was 1.98 for the owned class and 2.55 for the rented class of household applance and radio stores at the end of the year.

Financial Ratios of Household Appliance and Radio Stores as at December 31,1950

| Ratio | Owned | Rented |
| :---: | :---: | :---: |
| Current assets to current liabilities | 1.98 | 2.55 |
| Current assets to fixed assets......... | 1.90 | 7.69 |
| Net quick assets to net worth. | . 55 | . 8.84 |
| Sales to fixed assets used in the business | 5.63 | 28.93 |
| Liabilities to net worth | . 76 | . 61 |
