## INTRODUCTION

The following explanatory notes describe certain features of the operating results series contained in this report.

## Scope

Chain store firms are those which operate four or more retail outlets, Chain firms of three trades are covered in this bulletin - variety stores, drug stores and furniture stores.

## Content

This bulletin deals with profit and loss statistics. Average gross and net profits and detailed operating expenses are shown for the most suitable sales-size classes. A breakdown of operating expenses between the functions of head office and warehouse is reported wherever possible. There were not enough firms in any of these trades to permit publication of regional results. There were no Newfoundland stores in this survey. Salaries of proprietors of unincorporated companies have been included with executive salaries. Income tax tabulation was made for incorporated companies only.

## Purpose

The primary purpose of the operating costs surveys is to provide averages on the different phases of business operations against which firms in the same trade may make direct comparisons with their own operating results. They also provide useful information to others interested in the cost of distribution of consumer goods.

## Period covered

This report deals mainly with 1949 operations and is the second biennial publication in a series begun in 1947. Certain summary tables and charts show comparative results for both years.

OPERATING RESULTS OF MISCELLANEOUS CHAIN STORES 1947 AND 1949

BY SIZE OF FIRM

## VARIETY STORES

Eleven variety store chains submitted reports on 1949 operations. A total of 426 retail stores was opera-
ted by thesefirms. Ten of the 11 firms were incorporated companies for whichincome tax expense is shown.

## REVIEW OF 1949 OPERATING RESULTS

## Profit and Expense Ratios

There was a wide difference in the gross and net profits of the smaller and larger-slze variety store chains in 1949. The larger firms obtained gross profits averaging $38.37 \%$ of net sales and a net operating profit of $12.01 \%$. The smaller class operated on
an average gross proft of $29.37 \%$ of net sales and realized a net operating proflt of $4.38 \%$ All slzes combined obtained an average net profit of $11.29 \%$ which other income increased to a total net profit of $11.66 \%$ before deduction of Income tax. (See Table 1)

## Inventories and Stock Tumover

The average dollar volume of stock on hand was lower at the end of the year than at the beginning. Stock tumover rate - cost of goods
sold divided by average inventory - was 4.95 times during the year for all sizes combined. (See Table 1)

## Incorporated Companies

All firms in the larger group and all except one in the smaller were incorporated companies with the result that 1949 profits and expenses were similar to those of all types. Other income
of $0.37 \%$ was added to a net operating profit amounting to $11.30 \%$ of net sales and income tax of $4.62 \%$ was deducted to leave a final net profit of $7.05 \%$

## DRUG STORES

Twenty chain store firms in this trade submitted reports on their 1949 operations. These firms operated 277 retail stores. Fifteen of the

20 chains were incorporated companies for which income tax and final profit ratios are shown.

## REVIEW OF 1949 OPERATING RESULTS

## Profit and Expense Ratios

Drug store chains operated on an average gross profit amounting to $33.27 \%$ of net sales. The larger sales-size classes obtained higher gross profits than did the smaller. Operating expenses
for all sizes were $30.28 \%$ of net sales leaving a net operating profit of $2.99 \%$. Other income of $1.28 \%$ produced a final net profit before income tax deduction amounting to $4.27 \%$ of net sales. (See Table 2)

## Inventories and Stock Tumover

Average dollar volume inventories increased from $\$ 213,930$ per firm at the beginning of the year to $\$ 235,499$ at the end of the year. This
increase was general for all size categories. The rate of stock turnover was 3.81 times per year. (See Table 2)

## Incorporated Companies

The fifteen incorporated companies had profits and expenses similar to the "all firms" average. Net operating proft was increased from
$2.69 \%$ of net sales to $4.05 \%$ by other income. Income tax amounting to $1.48 \%$ was deducted to leave a final net proflt of $2.57 \%$ of net sales.
