EXPLANATION OF TERMS

Region

The geographical breakdown is on the following regional basis as defined by the National Employment Service:

- Atlantic - Newfoundland, Prince Edward Island, Nova Scotia, New Brunswick, Îles-de-la-Madeleine, Québec;
- Québec - Province of Québec (excluding Îles-de-la-Madeleine);
- Ontario - That part of Ontario east of north and south line drawn approximately 250 miles east of Port Arthur;
- Prairie - The balance of the Province of Ontario, Manitoba, Saskatchewan, Alberta, and the North West Territories;
- Pacific - Province of British Columbia and the Yukon Territory.

SYMBOL

P Preliminary - subject to revision.

EXPLANATION OF TERMS

The data in these tables are from the operational reporting system of the National Employment Service and must be interpreted in the light of the effect which operating practices have on statistical data.

Table I is derived from a report of the workload in local offices during a reporting period and the "Unfilled Vacancies" represent a count of job vacancies, notified to N.E.S. by employers, which have not been filled at the end of the period. The data are grouped in very broad industrial classifications based on the Standard Industrial Classification Manual of the Dominion Bureau of Statistics, 1948.

Table 2 is derived from an inventory arrived at by a physical count of employers' vacancies for workers and registrations for employment, on hand at the close of business on the date specified. The reported total of "Unfilled Vacancies" in this series will frequently vary slightly from that in Table 1 because of minor differences in the time at which the two source documents are prepared within the local offices. The data in Table 2 are grouped in broad occupational classifications based on the classifications of the Dictionary of Occupational Titles of the United States Employment Service. The occupational groups in Table 2 are very broad, with some 20,000 occupations condensed into the 103 headings used for N.E.S. reporting purposes. Consequently, "Unfilled Vacancies" and "Unplaced Applicants" in any of the occupational groups shown do not necessarily relate to the same specific occupations.

Table 3 presents the inventory data from Table 2 in the form of totals for the larger N.E.S. offices. The data relate to the entire areas served by the local offices shown and not merely to the individual towns or cities.

The following information regarding "Unfilled Vacancies" and "Unplaced Applicants" should also be noted:

Unplaced Applicants are persons registered for employment at the date indicated. Certain classes are excluded from the total, such as persons known to be working and persons registered in advance of their availability for employment. N.E.S. coverage of persons seeking work is very extensive but the degree of coverage is not uniform to all occupational groups. Consequently unplaced applicant data for a specific group does not necessarily indicate the extent of total labour supply within that group.

Unfilled Vacancies are vacancies reported to N.E.S. by employers and which have not been filled at the date indicated. Deferred Vacancies, those on which employers are not prepared to accept referrals within 31 days, are excluded from the series. As N.E.S. offices act on vacancies as soon as possible, unfilled vacancies fall into three main groups.

- (1) Those notified to local offices within a day or so of the inventory being made.
- (2) Those on which applicants have been referred but employers' confirmations of hirings have not yet been received.
- (3) Those difficult to fill because of a local (or wider) occupational shortage or because of particular working conditions.

Unfilled Vacancies, therefore, are a somewhat biased sample of total vacancies notified to N.E.S. Because there is no legal requirement for employers to notify N.E.S. of job vacancies, coverage of vacancies is not as extensive as that of persons seeking work and variations between the degree of coverage in different industries, occupations and geographic areas tend to be greater than in applicant coverage. For these reasons unfilled vacancies should not be regarded as a measure of labour demand.
