PREFACE

The data from which the present Directory of Hospitals has been compiled were, in the main, collected from annual returns made by the hospitals to the Dominion Bureau of Statistics. Some of the data, which could not readily be obtained from hospitals on the annual returns, were obtained from special questionnaires, while other data were obtained from the Canadian Hospital Council, the Registered Nurses Associations, the Departments of Public Health of the various provinces and the Department of Pensions and National Health. The Dominion Bureau of Statistics wishes to acknowledge its indebtedness to all who have contributed material for the Directory and hereby extends to them appreciative thanks.

As a result of the Census of 1931, a Directory of Hospitals was published by the Dominion Bureau of Statistics and proved extremely serviceable to all interested in hospital statistics. Since that time, the original hospital schedules have been revised, additional information obtained, a better classification of hospitals established and services in all hospitals classified as "Organized" or "Available."

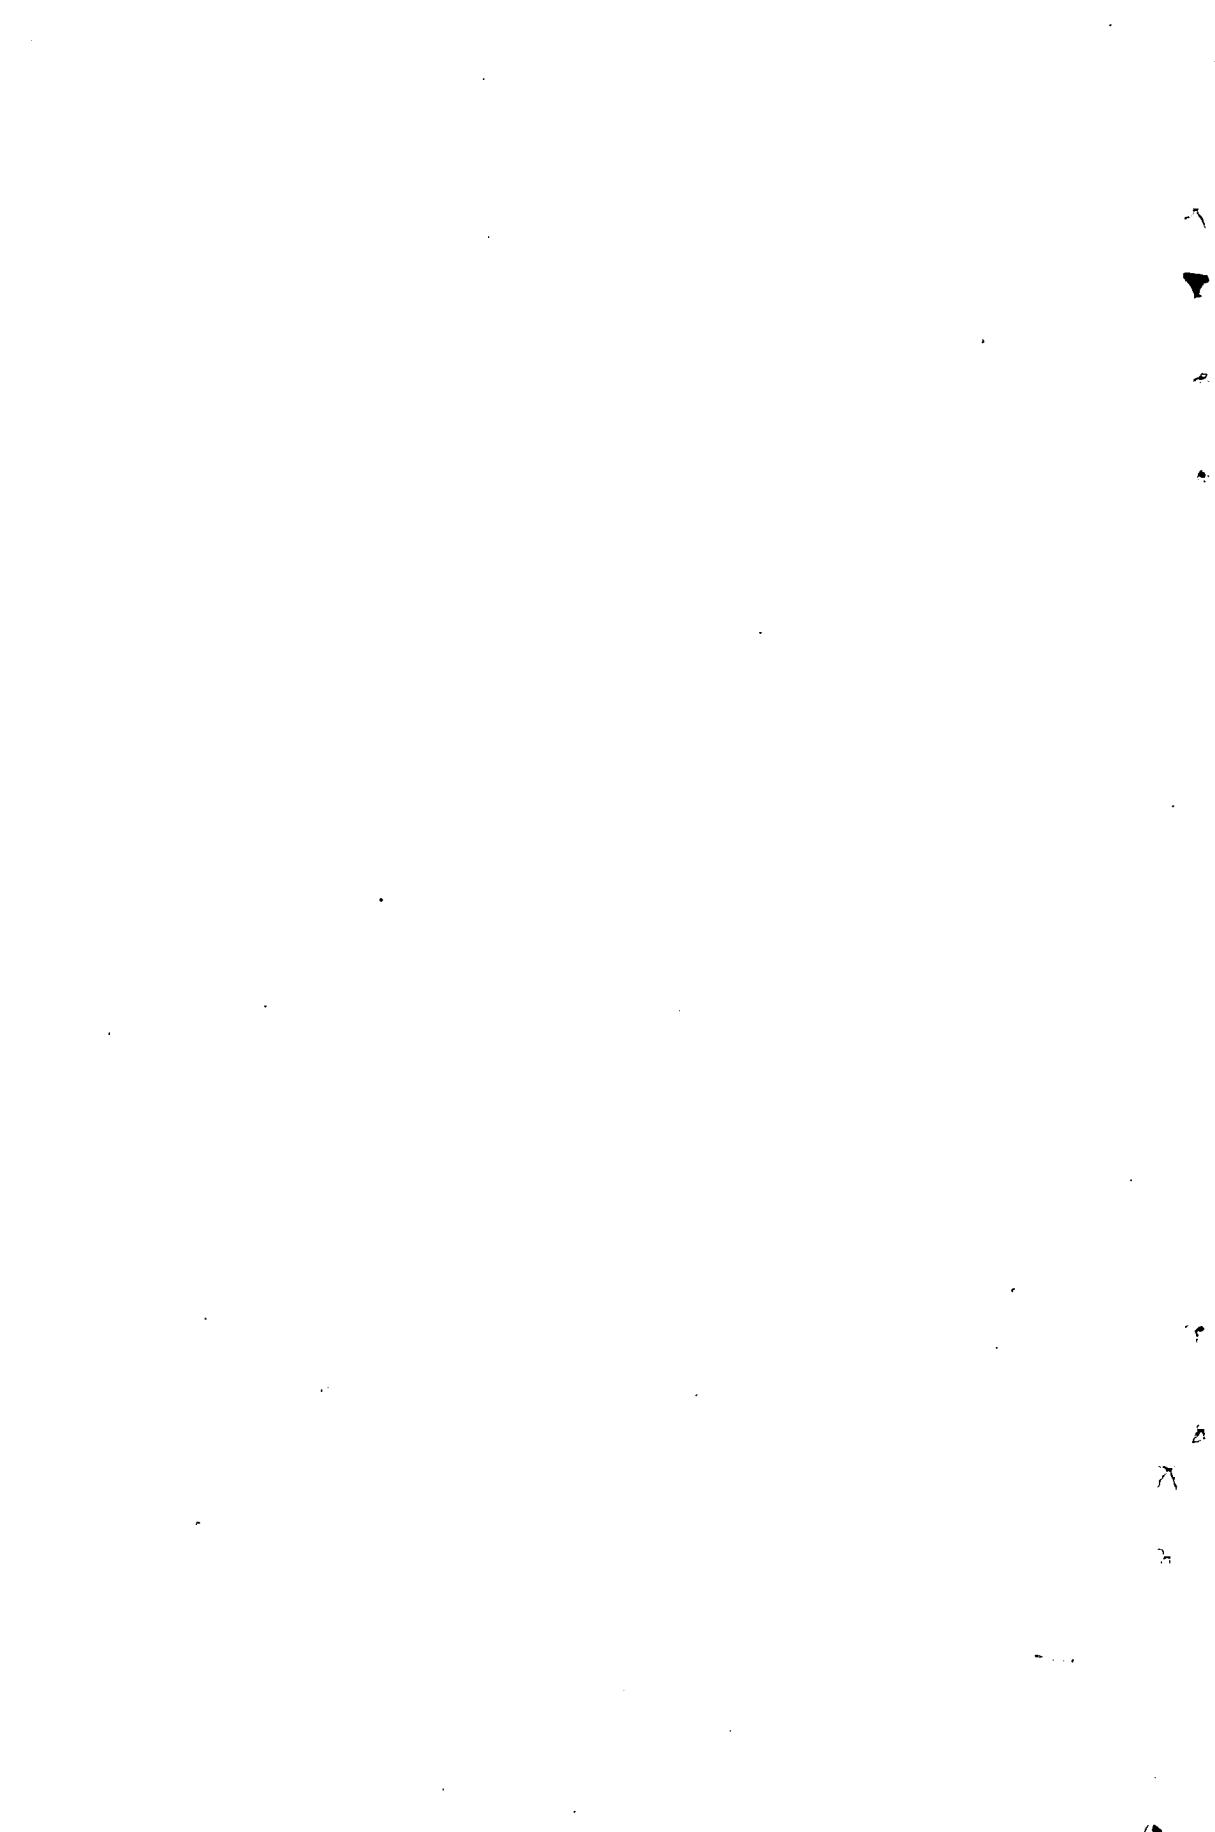

Part I tabulates in alphabetical order all hospitals operating in Canada in 1933 under three main classes—Public hospitals, Private hospitals and Dominion hospitals—and each of these classes is again sub-divided according to type.

Part II deals with Public hospitals only, and shows the location and type of each Public hospital, its bed capacity, its services and personnel. Further, all Public hospitals are divided into eight groups according to the number of beds. On page 19, the bed groups are shown and code letters given for the special information listed in this section. To facilitate reference these code letters are placed immediately before the list of Public hospitals so that the reader can easily familiarize himself with their meanings. On page 54, under "Notes on Public Hospitals," additional services in Public hospitals are shown.

Part III covers Private hospitals and shows location and type of hospital, bed capacity, class of patients treated, facilities and personnel. As Private hospitals vary considerably in type and class of patients cared for, complete information covering these hospitals is shown in this section.

Part IV deals with Dominion hospitals and the same procedure is followed as for Public hospitals.

Part V covers Mental hospitals and miscellaneous information considered sufficiently significant in the hospital field to be included in the Directory. Further information concerning Mental Institutions can be obtained from the annual report published by the Dominion Bureau of Statistics. A summary covering general information and movement of population for all hospitals during 1933 appears at the end of the Directory.

INDEX OF CONTENTS

PAGE

PART I—HOSPITALS BY PROVINCES—

NOTE.—Under each Province the various hospitals are listed in alphabetical order under the following headings:—

- (a) Public Hospitals
- (b) Private Hospitals.
- (c) Dominion Hospitals.

Prince Edward Island.....	8
Nova Scotia.....	8
New Brunswick.....	8
Quebec.....	8-10
Ontario.....	10-12
Manitoba.....	12
Saskatchewan.....	13-14
Alberta.....	14-15
British Columbia.....	15-16
Yukon and Northwest Territories.....	16

PART II—PUBLIC HOSPITALS—

NOTE.—To facilitate space, bed groups, symbols and abbreviations in connection with the various services in public hospitals are listed on page 19.

**HOSPITALS IN CANADA WHICH ARE APPROVED FOR INTERNSHIP
BY THE DEPARTMENT OF HOSPITAL SERVICE OF THE
CANADIAN MEDICAL ASSOCIATION**

The hospitals which are herein specified as "approved" provide their interns with the clinical and other facilities, the organization and the opportunities for study and experience which are outlined as essential in the Basis of Approval for Internship of Hospitals in Canada prepared by the Department of Hospital Service of The Canadian Medical Association. These 38 hospitals with 557 internships can furnish recent graduates with highly desirable internships. The above number includes a certain number of final year internships as noted on the list.

Because of the frequent desire of young graduates in both Canada and the United States to take internship in the other country, it has been arranged that this list of acceptable internships and that of the Council on Medical Education and Hospitals of the American Medical Association be reciprocally approved. Arrangements have been made also whereby credit for an internship in an approved Canadian hospital will be given by the National Board of Medical Examiners.

As there are a number of good hospitals in Canada which can provide their interns with an excellent training although, for one reason or another, they do not fully comply with the provisions of the Basis of Approval, it was the desire of the Committee that certain of these hospitals be placed temporarily upon a "recommended" list. This group of 12 hospitals with 47 internships is appended herein.

Revised January, 1935.

¹ Main teaching hospital of medical college, Dalhousie University. Interns on call for obstetrics at Grace Hospital across avenue. Also affiliate Infectious Diseases Hospital.

² Both graduates and final year undergraduates are appointed. In some medical colleges the final year is an internship year.

³ Outpatient experience obtained at Dalhousie Health Clinic nearby.

⁴ Knowledge of French essential.

⁵ There is a two year rotating service and a one year straight service with the privilege of a second year.

⁶ Obstetrics at the Misericordia General; neurology at the St. Jean de Dieu; paediatrics at the Ste. Justine; contagious diseases at the Pasteur.

⁷ Affiliation with Pasteur Hospital for contagious diseases.

⁸ The Central Division has 400 beds and the remainder are at the Western Division. There are seven different rotation services for the junior staff including both divisions, and affiliations with the Alexandra Hospital for Communicable Diseases and with the Laurentian Sanatorium, Ste. Agathe des Monts. Second year service is straight.

⁹ In addition, two senior and two junior appointments are made in the department of pathology.

¹⁰ Depends upon the rotation service to which allotted.

¹¹ Each service is entirely separate; interns only rotate in the subdepartments of their own service; surgery rotates with orthopaedics; obstetrics and gynaecology are combined—six months in each.

¹² This figure includes 64 urology beds, 42 for neurosurgery and 66 for laryngology and ophthalmology. Private and semi-private beds are included.

¹³ Interns on medicine obtain three months' experience with communicable diseases at the Alexandra Hospital and the same period in paediatrics at the Children's Memorial Hospital.

¹⁴ Six graduate and six undergraduate interns accepted. One of these graduate interns serves a year in pathology.

¹⁵ Grace Hospital is amalgamated with the Toronto Western Hospital for administrative purposes, but the internships are separate.

¹⁶ Oto-laryngology and ophthalmology are non-rotating.

¹⁷ Three interns in pathology are appointed annually. Internships are 12 months rotation, 12 months straight medicine, 24 months obstetrics and gynaecology and 36 months surgery.

¹⁸ Each intern spends four weeks at the Toronto Hospital for Consumptives, Weston.¹⁹ With the Mountain Sanatorium. Three weeks for juniors; 1 senior intern—6 months.²⁰ The Isolation Hospital is immediately adjacent.²¹ There is a psychiatric clinic in connection with the hospital.²² There is a psychiatric division of 12 beds.²³ Including the 200 bed Sanatorium unit (St. Vital) and the 95 bed Isolation unit (St. Roch's). Interns spend one month in each place. Fourteen juniors; four seniors.²⁴ Appointments are for 6 months; reappointment if satisfactory.²⁵ The hospital co-operates with the University in operation of a centrally located out-patient department. Service optional.²⁶ Privilege in second year of 6 months rotation or one year straight M or S.²⁷ Including 28 for venereal diseases, 46 for E.E.N.T., and 24 for psychiatry.²⁸ Rotating services are divided into four groups each covering seven varied services of which each intern will receive six. Senior interns are on straight services.²⁹ Military hospital for treatment of pensioners and ex-soldiers. Operated by Department of Pensions and National Health, Ottawa.³⁰ This hospital is largely neuropsychiatric and tuberculosis, but there are 85 beds for general medical and surgical care. There is affiliation with the Victoria and St. Joseph's Hospitals, London.³¹ This is a general hospital, but the major activity is obstetrics. This obstetrical unit has a "closed" staff and is used for teaching. Affiliation (four months each) at Victoria Hospital, Winnipeg Municipal Hospitals (infectious diseases and tuberculosis) and at Grace Hospital.³² Children's diseases are taken at the Children's Hospital—two months. Undergraduate interns (from Manitoba Medical College) appointed in November; graduates in January.

Further information with respect to internships in Canadian hospitals, to the Basis of Approval or concerning senior internships or residencies in specialties (see separate bulletin) may be obtained by writing to Dr. Harvey Agnew, Secretary, Department of Hospital Service, Canadian Medical Association, 184 College Street, Toronto 2.

HOSPITAL STANDARDIZATION

WITH LIST OF HOSPITALS IN CANADA FULLY APPROVED AND PROVISIONALLY APPROVED BY THE AMERICAN COLLEGE OF SURGEONS

Important.—There is no conflict between the provincial governmental inspection and approval of hospitals which is primarily of the physical plant and general organization, and that of the American College of Surgeons, which is concerned solely with the quality of medical work and the staff organization.

THE MINIMUM STANDARD

1. That physicians and surgeons privileged to practice in the hospital be organized as a definite group or staff. Such organization has nothing to do with the question as to whether the hospital is "open" or "closed," nor need it affect the various existing types of staff organization. The word STAFF is here defined as the group of doctors who practice in the hospital inclusive of all groups such as the "regular staff," the "visiting staff" and the "associate staff."

2. That membership upon the staff be restricted to physicians and surgeons who are (a) full graduates of medicine of an acceptable medical school with the degree of Doctor of Medicine, in good standing and legally licensed to practice in their respective states or provinces; (b) competent in their respective fields and (c) worthy in character and in matters of professional ethics; that in this latter connection the practice of the division of fees, under any guise whatsoever, be prohibited.

3. That the staff initiate and, with the approval of the governing board of the hospital, adopt rules, regulations, and policies governing the professional work of the hospital; that these rules, regulations and policies specifically provide:—

(a) That staff meetings be held at least once a month. (In large hospitals the departments may choose to meet separately.)

(b) That the staff review and analyze at regular intervals their clinical experience in the various departments of the hospital, such as medicine, surgery, obstetrics and the other specialities; the clinical records of patients, free and pay, to be the basis of such review and analysis.

4. That accurate and complete records be written for all patients and filed in an accessible manner in the hospital—a complete case record being one which includes identification data; complaint; personal and family history; history of present illness; physical examination; special examinations, such as consultations, clinical laboratory, X-ray and other examinations; provisional or working diagnosis; medical or surgical treatment; gross and microscopical pathological findings; progress notes; final diagnosis; condition on discharge; follow-up and, in case of death, autopsy findings.

5. That diagnostic and therapeutic facilities under competent supervision be available for the study, diagnosis and treatment of patients, these to include at least (a) a clinical laboratory providing chemical, bacteriological, serological and pathological services; (b) an X-ray Department providing radiographic and fluoroscopic services.

A Fully Approved Hospital—is one which, having met all the requirements, is carrying them out in an acceptable manner.

A Provisionally Approved Hospital—is one which, having accepted the requirements, is endeavouring to put them into effect, but for lack of time or other acceptable reasons has not been able to carry them out in full detail.

NOTE.—The Minimum Standard and the following list of hospitals—fully approved and provisionally approved, is taken from the 1934 report on Hospital Standardization of the American College of Surgeons, to which report we would refer the reader for further information on Hospital Standardization.
