INVENTORY OF SCHEDULES
AND
REFERENCE GUIDE TO THE MICROFILM BASE

Standards Division
Statistics Canada
October, 1975

FOREWORD

This Index to Statistics Canada's Microfilm Base includes a complete listing of all SC questionnaires used in the collection of statistics as at the end of the 1974 calendar year. It also includes related respondent instruction material. The collection of this set of documents took place over a period of approximately 18 months and was made possible with the co-operation of the Subject-Matter Divisions, Statistics Canada Forms Control Unit, User Advisory Services and the efforts of Standards Division Staff.

In the Inventory Listing the documents are grouped for the most part by responsibility centre in descending levels:

- (i) Field
- (ii) Division
- (iii) Section
- (iv) Unit
- (v) Survey or Programme
- (vi) Document

In the case of a large Division, e.g. the Manufacturing and Primary Industry Division, and where possible for other Divisions, the documents have been organized according to Standard Industrial Classification major group within surveys; e.g. for the Census of Manufacturers, Commodity Surveys, etc.

In divisions where data production is not considered large scale, documents were grouped and listed as being relevant, at the present time, to that particular division's activities.

Included in this inventory are several forms originating outside Statistics Canada, from other federal departments, government agencies, associations and provincial sources, which are used wholly or partially in our National statistical system. In this listing, we have identified these documents by their source and again, grouped them according to the Division in which they are primarily used.

While we have attempted to produce a complete inventory of Statistics Canada source documents, there will undoubtedly be some missing forms. Further, the Index does not include source material that is received in machine readable form, e.g. computer printouts and tape received by the Education Division from provincial sources.

Initially, distribution of the system was restricted to divisions within Statistics Canada and the regional offices. After the first update process and the completion of a more sophisticated index, the distribution will likely be expanded.

The cost for one copy of the microfilm material and index is approximately \$60.00. This amount is subject to change, depending on rates of charge in the Central Microfilming Unit, Public Archives.

Abbreviations, or codes for the Index and a summary contents page by Statistics Canada Division follow. Users of the Microfilm Base are asked to report any problems to: Mrs. O'Neil, Standards Division, Statistics Canada, 25th Floor, Coats Building, Tunney's Pasture, Ottawa, Ontario K1A 0T6, tel: (613) 996-7825.

RÉPERTOIRE DES FORMULES
ET
GUIDE D'UTILISATION DE LA BASE DE MICROFILMS

Division des normes

Statistique Canada

Octobre 1975

AVANT-PROPOS

Cet index de la base de microfilms de Statistique Canada comprend une liste exhaustive de tous les questionnaires de Statistique Canada utilisés pour la collecte de statistiques à la fin de l'année civile 1974. Il comprend également des instructions connexes à l'intention des enquêtés. La collecte de cet ensemble de documents s'est opérée sur une période d'environ 18 mois et a été rendue possible grâce à la collaboration des divisions concernées, de la Sous-section de contrôle des formules de Statistique Canada, et de la Division de l'assistance-utilisateurs ainsi qu'à l'aide du personnel de la Division des normes.

Dans l'index, les documents sont en général classés en ordre décroissant du niveau de responsabilité:

- (i) Secteur
- (ii) Division
- (iii) Section
- (iv) Sous-section
- (v) Enquête ou programme
- (vi) Documentation

Dans le cas d'une grande Division, par exemple, la Division des industries manufacturières et primaires, et pour d'autres divisions aussi lorsque c'était possible, les documents ont été classés conformément aux principaux groupes de la Classification des activités économiques pour chaque enquête: par exemple: le recensement des manufactures, les enquêtes sur les marchandises, etc.

Dans les divisions où la production de données ne se fait pas à une grande échelle, les documents ont été classés et enregistrés comme faisant actuellement partie des activités de la Division en question.

Cette base de microfilms comprend plusieurs formules dont Statistique Canada n'est pas l'auteur, c'est-à-dire des formules venant d'autres ministères fédéraux, d'organismes gouvernementaux, d'associations ainsi que des provinces, et qui sont utilisées en totalité ou en partie dans notre système statistique national. Dans l'index, nous avons précisé la source de ces documents et nous les avons également classés sous la Division qui les utilisait le plus.

Bien que nous ayons tenté de produire un répertoire exhaustif des documents de base de Statistique Canada, il manquera vraisemblablement certaines formules dans notre index. En outre, la base ne comprend pas les documents de base reçus sous une forme lisible par une machine, par exemple: états mécanographiés et rubans reçus des provinces par la Division de l'éducation.

Au départ, la diffusion du répertoire se limitait aux divisions de Statistique Canada et aux bureaux régionaux. Après la première mise à jour et l'achèvement d'un index plus complexe, nous en élargirons vraisemblablement le champ de diffusion.

Le coût d'un exemplaire de la base de microfilms et d'un index est d'environ \$60.00. Ce montant peut varier, en fonction des coûts de production du Service central du microfilm, aux Archives publiques.

Vous trouverez ci-après une liste des abréviations ou des codes de l'index et une liste des activités des divisions de Statistique Canada. En cas de problèmes, les utilisateurs de la base de microfilms sont priés de s'adresser à: Madame O'Neil, Division des normes, Statistique Canada, 25^{ème} étage, édifice Coats, Tunney's Pasture, Ottawa (Ontario), K1A 0T6, tél: (613) 996-7825.
