Introduction

The Survey on the Importance of Wildlife to Canadians During 1991 was carried out by Statistics Canada under the sponsorship of federal and provincial wildlife agencies and the direction of a Federal-Provincial Task Force representing these agencies. The major objective of the survey was to collect basic, accurate and reliable socio-economic information on the importance of wildlife to Canadians to meet Sustainable Development management needs. The survey included questions on the nature and extent of participation in wildlife-related activities, levels of commitment of time and money to these activities and public support for wildlife conservation.

The 1991 survey was designed to update and enhance information collected by Statistics Canada for the years 1981 and 1987 under similar sponsorship arrangements. These three comprehensive data bases are intended to provide strategic socio-economic insights into a wide range of wildlife and habitat policy and program management needs at provincial, federal and international levels.

This report is the first in a new series for the 1991 survey results under the generic title The Importance of Wildlife to Canadians. It consists of detailed data tables which were prepared based on a Tabulation Plan developed by the Federal-Provincial Task Force. The tables are intended primarily for the use of the agencies sponsoring the survey. The Task Force will oversee the publication of reports for more general distribution which will highlight information from the tables and from further analyses.

Structure of the Report

A detailed list of tables precedes sections A to E of the report. Each table includes reference to the corresponding question number on the survey questionnaire.

The tables in Section A1 provide information on rates of participation in the wildlife-related activities covered by the survey, such as wildlife viewing and hunting. Profiles of participants by sex, age, rural-urban residence, education and personal income are included in Section A2.

Section B summarizes attitudes toward wildlife and its conservation, and interest in participating in wildlife-related activities. The number of days spent by participants is covered in Section C.

The tables in Section D focus on total and average expenditures by participants in a number of wildlife-related activities. Expenditures for hunting and for primary nonconsumptive trips are further broken down by type of expenditure, such as transportation or equipment. This section also includes information on the amounts participants stated they were willing to pay over and above their actual expenditures before deciding not to participate (consumer surplus). Section D concludes with tables on estimated trap replacement costs.

Section E covers a segmentation of the population by type of activity in order to highlight the combinations of activities that were most popular or accounted for large commitments of time and money. Tables E1-E12 cover wildlife-related activities only, while Tables E13-E20 cover both fish and wildlife-related activities.

Definitions of terms used in the tables are included in Appendix 1. The survey questionnaire, guidelines for releasing the results, and a list of Federal-Provincial Task Force members are included in Appendices 2 to 4.

Methodology of the Survey

The multistage probability sample used was representative of the entire Canadian population 15 years of age or over in the 10 provinces. The survey questionnaire was prepared and pretested with consultation among all survey sponsors. Statistics Canada used similar key questions in the 1991 survey as in the 1981 and 1987 surveys to provide comparability between the results.

The mail-out/mail-back questionnaire (see Appendix 2) was delivered to 103,398 individuals in February 1992. Respondents were asked to answer questions regarding their activities during 1991. Statistics Canada interviewers conducted telephone followups to encourage respondents to complete and return the questionnaire. To ensure a good response rate, interviewers administered the questionnaire over the telephone to approximately 5 percent of respondents. With this combined mail and telephone survey, a total of 73,521 questionnaires (71.1 percent) were completed. After edits to ensure a minimum amount of questions had been answered and to eliminate duplicate responses, the number of useable questionnaires was 72,410 (70.0 percent). The final response rate by province was as follows:

<u>Province</u>	<u>Sample Size</u>	<u>Questionnaires Returned</u>	<u>Response Rate (%)</u>
Newfoundland	6,187	4,550	73.5
Prince Edward Island	2,636	1,802	68.4
Nova Scotia	7,315	5,077	69.4
New Brunswick	6,790	4,791	70.6
Quebec	18,981	13,256	69.8
Ontario	28,984	19,898	68.7
Manitoba	6,955	4,883	70.2
Saskatchewan	7,523	5,569	74.0
Alberta	9,267	6,570	70.9
British Columbia	8,760	6,014	68.7
Canada Total	103,398	72,410	70.0

Data processing of completed questionnaires included data capture under strict quality control procedures, weighting of sample results to obtain corresponding population estimates, an exhaustive computer edit for data quality and completeness, and a procedure to link demographic data on respondents held by Statistics Canada to their responses to the Survey on the Importance of Wildlife to Canadians. Survey estimates were imputed for non-response to individual questions in order to more closely represent the magnitude of amounts such as days and dollars spent on wildlife-related activities.

Full details of the methodology of the survey will be available in a User's Guide to be prepared by Statistics Canada and the Canadian Wildlife Service. This guide will be provided to survey sponsors and other users of the results.

The project team at Statistics Canada included Anne Haining (Project Manager), Marc Joncas, Fil McLeod, Mike Egan, Karen Johnston, June Lavergne, Scott Buchanan, Regional Office staff and 1000 interviewers across Canada. Canadian Wildlife Service staff involved in coordination of survey activities and in the production of this report included Fern Filion (Project Leader), Elaine DuWors, André Jacquemot, Gregg Legare, Agathe Ledoux, Susan Burns, Gilles Bertrand and the Scientific and Technical Communications Section.

Guidelines for Release of Survey Results

Users of the tables will note that each table is labelled "For Internal Use of Survey Sponsors Only." Statistics Canada requests that sponsors not release estimates whose variability exceeds certain norms. Measures of statistical reliability of a large number of survey estimates have been calculated by Statistics Canada and are included in Appendix 3 of this report, together with release criteria. Users of the tables are asked to assess the releasability of estimates following the guidelines in Appendix 3 before making them publicly available.

Members of the Federal-Provincial Task Force on the Importance of Wildlife to Canadians have been actively involved in the conduct of the 1991 survey, and are available to answer questions about this report and the release of survey results (see contact list in Appendix 4). The Task Force includes Fern Filion as Chair (Canadian Wildlife Service), Roger Reid (B.C.), Peter Boxall (representing Alberta, Saskatchewan and Manitoba), Paul Gray (Ontario), Pierre Bouchard (Quebec), Alistair Bath (representing the 4 Atlantic provinces), Elaine DuWors and Andre Jacquemot (Canadian Wildlife Service).

A14E	Participation through incidental encounters with other wildlife on trips in Canada (Question C10)	BY	Sex, Age Group, Rural-Urban, Education and Personal Income

INCIDENCE OF PARTICIPATION IN ANY DIRECT NON-CONSUMPTIVE WILDLIFE-RELATED ACTIVITY

- A15 Participation in any direct non-consumptive activity in Canada or the United States (Question B1, C1, C8 or G1) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income

INCIDENCE OF PARTICIPATION IN HUNTING

- A16 Participation through ever hunting wildlife (Question D1) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A17A Participation in hunting wildlife in Canada (Question D2) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A17B Participation in hunting waterfowl in Canada (Question D4) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A17C Participation in hunting birds other than waterfowl in Canada (Question D14) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A17D Participation in hunting small mammals in Canada (Question D24) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A17E Participation in hunting large mammals in Canada (Question D34) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A18A Incidence of harvesting waterfowl in Canada (Question D6) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A18B Incidence of harvesting birds other than waterfowl in Canada (Question D16) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A18C Incidence of harvesting small mammals in Canada (Question D26) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A18D Incidence of harvesting large mammals in Canada (Question D36) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A19 Participation through hunting wildlife in the United States (Question G4) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A20 Participation through hunting wildlife in Canada or the United States (Question D2 or G4) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income

INCIDENCE OF PARTICIPATION IN RECREATIONAL FISHING

- A21 Participation in recreational fishing in Canada (Question E2) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A22 Participation in recreational fishing in the United States (Question G7) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A23 Participation in recreational fishing in Canada or the United States (Question E2 or G7) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income

INCIDENCE OF PARTICIPATION IN TRAPPING SMALL MAMMALS

- A24 Participation in trapping small mammals (Question F1) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income
- A25 Participation in trapping small mammals for 4 main reasons (Question F2) **BY** Sex, Age Group, Rural-Urban, Education and Personal Income

APPENDIX 2. SURVEY QUESTIONNAIRE

SURVEY ON THE IMPORTANCE OF WILDLIFE TO CANADIANS DURING 1991

To the Respondent:

Thank you for taking a few minutes to answer these questions on the importance of wildlife in your day-to-day activities. Your answers, combined with those of other Canadians, will provide valuable insights into the benefits Canadians derive from wildlife and wildlife-related activities. Knowledge of these benefits will help wildlife agencies to maintain an abundance and variety of wildlife for current and future generations of Canadians. This survey is being conducted by Statistics Canada for the Canadian Wildlife Service of Environment Canada, provincial wildlife agencies and several other agencies. Your responses are strictly confidential.

Aux francophones: Si ce questionnaire anglais vous a été posté par erreur et si vous en désirez un en français, veuillez nous appeler sans frais à l'un des numéros de téléphone figurant à l'endos de ce questionnaire.

INSTRUCTIONS

This questionnaire is to be completed by the person whose name appears on the label at the bottom of this page.

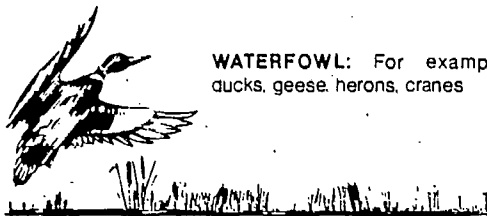

To answer the questions, enter a check in the appropriate circle or a number in the boxes provided.

For example, if you contributed \$107.25 to wildlife related organizations report it as \$ Mark your answers clearly.

Please return your completed questionnaire within the next three days in the postage paid envelope provided.

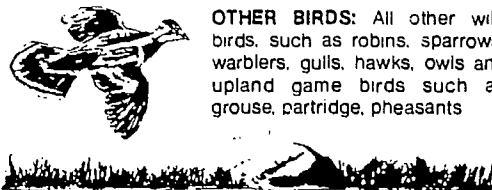

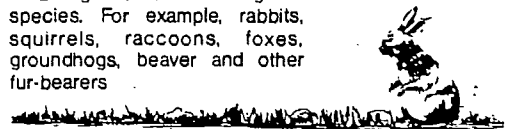

PLEASE READ THESE IMPORTANT DEFINITIONS

WILDLIFE: Means wild birds and other wild animals. The 5 types of wildlife include waterfowl, other wild birds, small and large mammals and other wildlife in a natural environment. They do not include pets or other domesticated animals, animals in zoos or game farms, or fish.

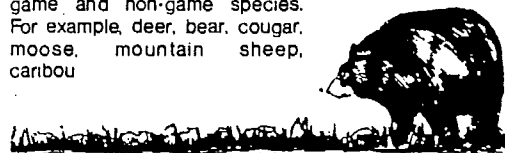

WATERFOWL: For example ducks, geese, herons, cranes

SMALL MAMMALS: Includes small game and non-game species. For example, rabbits, squirrels, raccoons, foxes, groundhogs, beaver and other fur-bearers

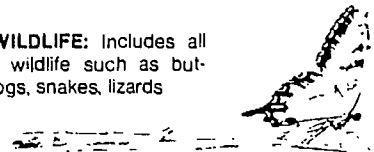

OTHER BIRDS: All other wild birds, such as robins, sparrows, warblers, gulls, hawks, owls and upland game birds such as grouse, partridge, pheasants

LARGE MAMMALS: Includes big game and non-game species. For example, deer, bear, cougar, moose, mountain sheep, caribou

OTHER WILDLIFE: Includes all remaining wildlife such as butterflies, frogs, snakes, lizards

A. QUESTIONS ABOUT WILDLIFE IN GENERAL

A1. DURING 1991 (JANUARY 1, 1991 TO DECEMBER 31, 1991) DID YOU TAKE PART IN ANY OF THE FOLLOWING ACTIVITIES?

	Yes	No
Read books, magazines or articles on wildlife	1 <input type="radio"/>	2 <input type="radio"/>
Watch films or T.V. programs on wildlife	3 <input type="radio"/>	4 <input type="radio"/>
Purchase art, crafts or posters of wildlife	5 <input type="radio"/>	6 <input type="radio"/>
Visit a zoo, game farm, aquarium or museum of natural history	7 <input type="radio"/>	8 <input type="radio"/>

A2. FOR EACH ACTIVITY LISTED BELOW, CHECK THE CATEGORY THAT BEST DESCRIBES YOUR INTEREST IN PARTICIPATING. (If you have participated in any of these activities, please indicate your interest in continuing to take part in the activity.)

	Great interest in participating	Some interest in participating	No interest in participating
Watching, photographing or studying wildlife	01 <input type="radio"/>	02 <input type="radio"/>	03 <input type="radio"/>
Feeding Wildlife	04 <input type="radio"/>	05 <input type="radio"/>	06 <input type="radio"/>
Collecting butterflies or other wildlife specimens	07 <input type="radio"/>	08 <input type="radio"/>	09 <input type="radio"/>
Hunting wildlife	10 <input type="radio"/>	11 <input type="radio"/>	12 <input type="radio"/>
Trapping for food or fur	13 <input type="radio"/>	14 <input type="radio"/>	15 <input type="radio"/>
Observing, collecting or creating wildlife-related art or literature	16 <input type="radio"/>	17 <input type="radio"/>	18 <input type="radio"/>
Joining or contributing to a wildlife-related organization (naturalist, conservation or sportsmans' clubs)	19 <input type="radio"/>	20 <input type="radio"/>	21 <input type="radio"/>

A3. DURING 1991, DID YOU BELONG OR CONTRIBUTE TO ANY WILDLIFE-RELATED ORGANIZATION? (naturalist, conservation or sportsmans' clubs)

Yes ¹ No ² ► Go to Question A5.

A4. IN 1991, HOW MUCH DID YOU SPEND ON YOUR MEMBERSHIP FEE(S) OR DONATION(S)?

\$.00

A5. IN 1991, DID YOU MAINTAIN, IMPROVE OR PURCHASE ANY NATURAL AREAS TO PROVIDE FOOD OR SHELTER FOR WILDLIFE? (By natural areas we mean wooded lots, hedges, marshes, open fields . . .)

Yes ³ No ⁴ ► Go to Question A7.

A6. IN 1991, HOW MUCH DID YOU SPEND TO MAINTAIN, IMPROVE OR PURCHASE THESE NATURAL AREAS FOR WILDLIFE?

\$.00

A7. PRESENTLY, MOST TYPES OF WILDLIFE ARE ABUNDANT IN CANADA. HOW IMPORTANT IS IT TO YOU THAT THE ABUNDANCE OF THE FOLLOWING TYPES OF WILDLIFE BE MAINTAINED?

	Very important	Fairly important	Of little importance	Of no importance	Don't know
Waterfowl	01 <input type="radio"/>	02 <input type="radio"/>	03 <input type="radio"/>	04 <input type="radio"/>	05 <input type="radio"/>
Other birds	06 <input type="radio"/>	07 <input type="radio"/>	08 <input type="radio"/>	09 <input type="radio"/>	10 <input type="radio"/>
Small mammals	11 <input type="radio"/>	12 <input type="radio"/>	13 <input type="radio"/>	14 <input type="radio"/>	15 <input type="radio"/>
Large mammals	16 <input type="radio"/>	17 <input type="radio"/>	18 <input type="radio"/>	19 <input type="radio"/>	20 <input type="radio"/>

A8. CONSERVING WETLANDS, FORESTS AND OTHER HABITATS TO MAINTAIN ABUNDANT WILDLIFE POPULATIONS MAY REQUIRE YOUR HELP. THIS COULD MEAN INCREASES IN PRICES OR TAXES OF BETWEEN 1 AND 5 PERCENT. WOULD YOU PERSONALLY BE WILLING TO HELP WILDLIFE BY PAYING MORE IN THE FOLLOWING WAYS?

- | | Yes | No |
|---|-------------------------|-------------------------|
| Taxes on camping and outdoor recreation equipment | 1 <input type="radio"/> | 2 <input type="radio"/> |
| Food prices | 3 <input type="radio"/> | 4 <input type="radio"/> |
| Prices for wood and paper products | 5 <input type="radio"/> | 6 <input type="radio"/> |
| Personal income taxes | 7 <input type="radio"/> | 8 <input type="radio"/> |

A9. PRESENTLY IN CANADA, SOME WILDLIFE ARE DECLINING IN NUMBER OR ARE ENDANGERED. HOW IMPORTANT IS IT TO YOU THAT DECLINING OR ENDANGERED WILDLIFE BE PRESERVED?

- | Very important | Fairly important | Of little importance | Of no importance | Don't know |
|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|
| 1 <input type="radio"/> | 2 <input type="radio"/> | 3 <input type="radio"/> | 4 <input type="radio"/> | 5 <input type="radio"/> |

A10. PROTECTING DECLINING OR ENDANGERED WILDLIFE BY REDUCING AIR POLLUTION, ACID RAIN, OIL SPILLS OR PESTICIDE USE MAY REQUIRE YOUR HELP. THIS COULD MEAN INCREASES IN PRICES OF BETWEEN 1 AND 5 PERCENT. WOULD YOU PERSONALLY BE WILLING TO HELP WILDLIFE BY PAYING INCREASED PRICES FOR THE FOLLOWING?

- | | Yes | No |

APPENDIX 3. GUIDELINES FOR RELEASING SURVEY DATA

Appendix 3: Guidelines for Releasing Survey Data

Before releasing and/or publishing any estimates from the data tables, users should determine whether the estimate can be released based on the following guidelines.

The releasability of an estimate is governed by the coefficient of variation (CV) of the estimate. There are two types of estimates in the Survey on the Importance of Wildlife to Canadians, qualitative (e.g. participation in an activity) and quantitative (e.g. number of days spent on an activity).

The table titled "Approximate Sampling Variability Tables for Survey on the Importance of Wildlife to Canadians" should be consulted to determine the coefficient of variation (CV) for qualitative estimates. These include all estimates of the population, subpopulations, and number of participants in the tables in Sections A-E. The table titled "Exact Sampling Variability Table for Selected Estimates from the Survey on the Importance of Wildlife to Canadians" should be used to determine CV's for quantitative estimates. These include estimates of days and dollars in Tables C1-C17, D1-D25, and E8, E9, E11, E12, E16, E17, E19 and E20.

Once the CV has been determined, users should assess the releasability of the estimate by consulting the Statistics Canada release policy in the following chart.

Coefficient of Variation
(in %)

Statistics Canada
Release Policy

0.0 to 16.5

Unqualified Release

Estimates can be considered for general unrestricted release. No special notation is required.

16.6 to 25.0

Qualified Release

Estimates can be considered for general unrestricted release but should be accompanied by a warning cautioning users of the high sampling variability associated with the estimates. such estimates should be identified by the letter Q (or in some other similar fashion).

25.1 to 33.3

Restricted Release

Estimates can be considered for general unrestricted release only when sampling variabilities are obtained using an exact variance calculation procedure. the estimates should be accompanied by a warning of high sampling variability associated with the estimates.

33.4 or over

Not for Release

Estimates should not be released in any form under any circumstances. In such statistical tables, such estimates should be deleted.

NOTES:

- (1) SAMPLING VARIABILITIES (COEFFICIENTS OF VARIATION) ARE IN PERCENTS. 00650018
- (2) TO DETERMINE SAMPLING VARIABILITIES FOR ESTIMATES OF TOTALS OR 00660018
PERCENTAGES BASED ON THE ENTIRE POPULATION TO WHICH THIS TABLE 00670018
REFERS, LOCATE THE ROW CLOSEST TO THE ESTIMATED TOTAL. THE 00680018
LEFT-MOST COLUMN GIVES THE APPROXIMATE SAMPLING VARIABILITY. 00690018
- (3) TO DETERMINE SAMPLING VARIABILITIES FOR ESTIMATES OF PERCENTAGES 00700018
BASED ON SUBPOPULATIONS TO WHICH THIS TABLE REFERS, USE THE ROW 00710018
CLOSEST TO THE NUMERATOR OF THE PERCENTAGE AND THE COLUMN CLOSEST 00720018
TO THE PERCENTAGE. 00730018
- (4) SAMPLING VARIABILITIES IN THIS TABLE ARE CRUDE INDICATORS AND IN 00740018
GENERAL ARE HIGHER THAN THOSE THAT WOULD BE OBTAINED USING MORE 00750018
EXACT TECHNIQUES. UNDER NO CIRCUMSTANCES ARE THEY OFFICIAL. 00760018
