## Minister's message

On behalf of Innovation Science and Economic Development Canada (ISED), I am pleased to present our report on fees for 2019–20.

The *Service Fees Act* provides a modern legislative framework that enables cost-effective delivery of services and, through better reporting to Parliament, improves transparency and oversight.

This year's report provides information about ISED's fee charging programs, including, a list of their fees, details on the fee-setting authorities, fee service standards, performance results, and anticipated increases. This information provides context for each of the fee charging programs in the spirit of open and transparent fee management.

I will continue to lead my department's transition to the reporting regime provided under the *Service Fees Act*.

The Honourable Navdeep Bains, P.C., M.P.  
Minister of Innovation, Science and Industry

## About this report

This report, which is tabled under section 20 of the [Service Fees Act](#)<sup>ii</sup> and section 4.2.8 of the [Directive on Charging and Special Financial Authorities](#)<sup>iii</sup>, contains information about the fees that Innovation Science and Economic Development Canada (ISED) had the authority to set in 2019–20.

Government of Canada departments may set fees for services, licences, permits, products, the use of facilities; for other authorizations of rights or privileges; or to recover, in whole or in part, costs incurred in relation to a regulatory scheme.

For reporting purposes, fees must be categorized under the following three fee setting mechanisms:

1. Act, regulation or fees notice
  - An act of Parliament delegates the fee setting authority to a department, minister or Governor in Council.
2. Contract
  - Ministers have the authority to enter into contracts, which are usually negotiated between the minister and an individual or organization, and which cover fees and other terms and conditions. In some cases, that authority may also be provided by an act of Parliament.
3. Market-rate or auction or both
  - The authority to set these fees is pursuant to an act of Parliament or regulation, and the minister, department or Governor in Council has no control over the fee amount.

This report contains information about all fees that are under ISED's authority, including any that are collected by another department.

The information covers fees that are subject to the *Service Fees Act*.

For fees set by contract, fees set by market-rate, auction or both, the report provides totals only. For fees set by act, regulation or fees notice, it provides totals for fee groupings, as well as detailed information for each fee.

Although the fees that ISED charges under the *Access to Information Act* are subject to the *Service Fees Act*, they are not included in this report. Information on ISED's access to information fees for 2019–20 can be found in our access to information report, which is posted on the [ISED ATIP References Page](#)<sup>iv</sup>.

## Remissions

A remission is a partial or full return of a fee to a fee payer who paid for a service for which a department deemed that the service standard was not met.

Under the *Service Fees Act*, departments must develop policies for determining whether a service standard has been met and for determining how much of a fee will be remitted to a fee payer if a service standard is not met. This requirement will not take effect until April 1, 2021, so this report does not include remissions issued under the *Service Fees Act*. The report also does not include other remissions.
