

# Pest Management Centre:

## Partnering for Results

*To improve Canadian growers' access to and adoption of minor use and reduced-risk pest management tools and practices*

The **Minor Use Pesticides Program** works with grower organizations and provinces to identify crop/pest priorities, and partners with AAFC Research Branch, the US IR-4 minor use program, registrant companies and Health Canada's PMRA to conduct field trials to develop new supporting minor use pesticide registrations.

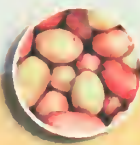

The **Pesticide Risk Reduction Program** works with partners in PMRA, AAFC Research Branch, Environment Canada, grower associations to develop pesticide risk reduction strategies. Strategy adoption is facilitated through projects to develop and demonstrate reduced risk pest management tools and IPM systems.

## Crop Protection Tools, Knowledge and Support for Adoption

### Canadian Growers

Using new, reduced-risk pest management products, tools and practices to enhance competitiveness and sustainability
