## Section I - Introduction and Purpose of the Study

The following report prepared for the Clothing Division of Industry Canada is an overview of the current status of the Canadian retail apparel market. The objectives of the report are:

- To overview the market size and recent growth rates of the Canadian clothing market.
- To profile the major retail apparel organizations.
- To identify the largest retailers and the degree of retail market concentration.
- To profile recent merchandise mix trends and current patterns by channel of distribution.
- To describe the current use of technology by Canadian apparel retailers.
- To speculate on the short term future for the Canadian retail apparel market.

The sources of information for this report are:

- The most current annual reports of Canada's publicly held apparel retailers.
- Information from the Canadian Apparel Market Monitor program.
- Statistics Canada
- Sections IX and X were authored by Constantine Campanaris of Apparel Management Insights, a leading consulting firm specializing in apparel retail technology.
- 1994 Directory of Retail Chains in Canada published by Monday Report on Retailers
- Interviews conducted with fifteen Canadian retailers and manufacturers

Questions concerning this report should be directed to Randy Harris of Kormos, Harris and Associates at (419) 531-1366.

## Section II - Market Size and Historic Growth Rates

In 1993 the Canadian clothing market was estimated to be $\$ 14.2$ billion dollars at retail, which was unchanged from 1992 sales levels. The high point of Canadian retail apparel sales was 1990 when the retail market was estimated to be $\$ 16.3$ billion.

TOTAL APPAREL
Retail Dollar Sales $\mathbf{( \$ 0 0 0 , 0 0 0 )}$

Percent Change
Previous Year
(+5.3\%)
(+6.0\%)
(+3.9\%)
(-11.9\%)
(-1.4\%)
(0\%)

With the exception of infant's apparel all segments of the retail clothing market have decreased by approximately the same percentage in retail sales since the high point in sales in 1990. The decrease in sales has been almost equal to the combined value of the GST and various PST's which were levied in 1991. The effect of this decrease has been that a number of both retailers and suppliers have either gone out of business or are in bankruptcy protection including:
Retailers - Town and Country, Steel, Woodwards, Creeds, The Dream Shop, Grafton Fraser, etc.
Suppliers - Etac, Tag Apparel Group, etc.
CANADIAN APPAREL MARKET
(1)

Estimated Retail Dollar Sales $(000,000)$

| Segment $^{(3)}$ | 1990 | 1991 | 1992 | $\mathbf{1 9 9 3}^{(2)}$ | $\%$ Change <br> '93/"90 |
| :--- | ---: | ---: | ---: | ---: | :---: |
| Women's | $\$ 9,388$ | $\$ 8,134$ | $\$ 7,890$ | $\$ 8,040$ | $-14 \%$ |
| Men's | $\$ 4,718$ | $\$ 3,930$ | $\$ 4012$ | $\$ 3,951$ | $-16 \%$ |
| Boys' | $\$ 929$ | $\$ 806$ | $\$ 817$ | $\$ 788$ | $-15 \%$ |
| Girls' | $\$ 1,060$ | $\$ 982$ | $\$ 923$ | $\$ 920$ | $-13 \%$ |
| Infant's | $\$ 517$ | $\$ 525$ | $\$ 540$ | $\$ 500$ | $-3 \%$ |

(1) Does not include the following purchases:

- Sales of accessory items (e.g., belts, scarves, hats, ties, etc.)
- Sales to non-Canadian residents in Canada
- Cross border purchases made by Canadian residents
- Sales in the Yukon or Northwest territory
(2) October 1992 -September 1993
(3) See appendix for size definitions

Beginning in 1986, the growth rate for the retail clothing specialty store segment has registered continuing decreases with the largest single yearly decrease being reported in 1991.

## RETAIL CLOTHING STORE SALES

|  | Millions of Dollars |  |
| :--- | :---: | :---: |
| Year | Total Cioǐning <br> Store Sales | Percent Change <br> Year Earlier |
| 1986 | $\$ 8,400$ | $+10.0 \%$ |
| 1987 | $\$ 9,125$ | $+8.6 \%$ |
| 1988 | $\$ 9,639$ | $+5.6 \%$ |
| 1989 | $\$ 10,005$ | $+3.8 \%$ |
| 1990 | $\$ 10,093$ | $+0.9 \%$ |
| 1991 | $\$ 9,160$ | $-9.3 \%$ |
| 1992 | $\$ 9,242$ | $+0.9 \%$ |

Since 1969 clothing as a percentage of total household expenditures has fallen. The large percentage decrease from 1986 to 1992 is attributable to an increase in both housing costs and taxes over the same period.

## TOTAL APPAREL SALES

Clothing as a Percentage of Total Household Expenditures

Source: Statistics Canada, Survey of Family Expenditures (1992)

There are a number of explanations offered for the continued poor performance of the retail clothing market since 1990 including:

- The onset and a continuation of a consumer recession which resuited in fewer people working
- The imposition of the GST and various provincial and metropolitan area taxes
- An increase in home mortgage costs resulting in less disposable income
- An increase in cross border shopping
- An increase in the amount of casual wear worn both at the office and at social gatherings
- A lack of new fashion items in the market
- Apparel as a category falling on the consumer's priority list while other items (e.g., CD players) have increased in importance
- Consumer's becoming more price conscious and trading down from one channel of distribution to another

Currently the situation of the Canadian retail apparel market can be described as follows:

- The consumer demand for retail apparel is showing signs of only modest growth.
- In addition to the status of the economy negatively effecting the demand for apparel, the trend towards wearing more casual clothes at work is resulting in less dollars being spent on apparel.
- The Canadian consumer is becoming much more price/value conscious and therefore is trading down in terms of channels of distribution and price segments.
- In order to stimulate demand, promotional activity is increasing especially in apparel specialty chains.
- As the consumer becomes more price sensitive, retailers are being forced to lower their cost of doing business often at the expense of manufacturers. The net result is that at best both apparel retailers and manufacturers are making minimum profit margins.
- In order to maximize their profit margins apparel retailers are increasing their level of imports and their private label programs.
- Because of the increase in casualwear sales cotton is increasing in importance at the expense of wool.
- Although cross border shopping has recently significantly declined, Canadian consumers are becoming increasingly aware of United States brand names and retailers.
- Currently there seems to be a stabilization in the number of independent specialty stores as most of the marginally profitable ones went out of business from 1991-1993.
- There is five-fold concern on the part of Canadian apparel manufacturers that:
- Retailers will continue to demand higher margins from their suppliers
- Retailers will continue to develop private label programs using off shore resources
- Retailers will wait longer to place their orders
- Additional Canadian retailers will go out of business
- American retailers with no loyalty/commitment to the domestic supply base will continue to enter the market

## Section III - Retail Channels of Distribution

Apparel specialty stores account for almost half of retail clothing sales and have been able to maintain their market share over the past five years. Since 1988 department stores have been constantly losing market share. Since the outset of the recession, discount stores have been gaining market share while the share of the "all other outlets" peaked in 1990.

TOTAL APPAREL
Retail Dollar Market Share
Retail Channel

Although men's specialty stores are the largest channel for men's apparel sales, the channel has lost market share of the total men's apparel market since 1990. This loss in market share is attributable to the large drop in men's suit and sport coat sales in independent men's specialty stores. Also contributing to the men's specialty stores loss in market share were the growth of the denim oriented unisex specialty stores and the bankruptcies of a large number of independent men's specialty stores.

## MEN'S APPAREL

Retail Dollar Market Share

Women's specialty stores (both the chains and independents) are the largest channel ( $36.9 \%$ ) for women's apparel followed by department stores. Since 1990 the women's specialty stores have lost share to the multi-gender or unisex specialty stores.

## WOMEN'S APPAREL

Retail Dollar Market Share

Discount stores is the dominant retail channel for juvenile apparel. However, as a group, discount stores since 1988 have been unable to continually increase their market share. The department stores were the clear loser in the juvenile market from 1988-1991 but beginning in 1992 the department stores adjusted their prices to make them more competitive with the discount stores.

TOTAL JUVENILE APPAREL
Retail Dollar Market Share

Currently, women's apparel accounts for $51 \%$ of the units and almost $56 \%$ of all the dollars spent on clothing. Men's apparel accounts for $\mathbf{2 8 \%}$ of the retail dollar sales of clothing while children's clothing (sizes 0 -18) account for $16 \%$ of total dollar sales.

## TOTAL APPAREL

1992

Per capita consumption of men's apparel is greatest among 15-19 year old men, remains constant at a lower level from 20-64 and falls off dramatically with 65 year old and older men. Per capita expenditures for apparel are highest among 45-64 year old women and among women 15-19. With the exception of the 15-19 year old segment, women's per capita expenditure rates are consistently higher than men's.

## CANADIAN APPAREL MARKET Per Capita Annual Apparel Expenditures

1992

| Age of Wearer | Men | Women |
| :--- | :---: | ---: |
| $15-19$ | $\$ 752.47$ | $\$ 713.81$ |
| $20-29$ | $\$ 378.55$ | $\$ 655.03$ |
| $30-44$ | $\$ 333.75$ | $\$ 617.69$ |
| $45-64$ | $\$ 376.42$ | $\$ 800.76$ |
| $65 \&$ Over | $\$ 191.87$ | $\$ 541.88$ |

The age group 30-44 years of age is the most important age group for both women's apparel ( $\mathbf{3 1 . 3 \%}$ ) and men's apparel ( $\mathbf{2 7 . 9 \%}$ ). The under three year age group and the 11-13 year old age group together account for $50 \%$ of all juvenile apparel.

## TOTAL APPAREL <br> 1992 Retail Dollar Sales

Age of Wearer

—— Juvenile Apparel

Ontario, accounting for the largest share of Canada's population, also accounts for the largest share provincially of the apparel market. Quebec, overall the second most important province for apparel sales, is underdeveloped in the juvenile apparel segment.

## TOTAL APPAREL

1992 Retail Dollar Sales

The Toronto metro area is only slightly more important for apparel sales than Montréal. Vancouver accounts for less than one half of Montréal's sales volume.

## TOTAL APPAREL

1992 Retail Dollar Sales

## Section IV - Retail Apparel Organizations

Retailers selling clothing in Canada can be categorized into the following groups:

- Mass Merchants: The term includes department stores junior department stores and discount stores (e.g., K-Mart, SAAN, Zellers, Woolco, etc.)
- Apparel Specialty

Conglomerates : Two types can be identified, both of which operate more than one clothing chain

Major - Operates more than three store names and has more than 150 outlets in total (e.g., Dylex)
Minor - Operates more than one chain

- Apparel Specialty

Chains : Retailers operating more than ten stores, all under the same name (e.g., Mark's Work Wearhouse)

- Independent Specialty

Chains : Retailers selling only clothing and having less than ten outlets all under the same name

- All Other Outlets: Includes sporting goods stores, college book stores, warehouse stores, grocery stores, drug stores, etc.

Through a combination of organic growth (basically at Zellers) and acquisitions, the Hudson Bay company has become the dominant apparel retailing organization in Canada. Together the Hudson Bay organization, Sears, Dylex and the F. W. Woolworth account for over a third of all apparel sales in Canada.

Segmenting the Canadian retail apparel market based on the average age and household income of the consumer, usually results in four segments emerging:

- A department store segment selling to older, more affluent customers
- A discount stores segment selling to younger, less affluent customers
- Two specialty store segments selling to above average income customers who are targeted to either older or younger customers

WOMEN'S APPAREL 1992
Total Market Retail Positioning

In the women's specialty store market, the following retailers have unique market niche positions:
Shirley K - Affluent maternity customers
D'Allairds - Older, less affluent customers
Holt Renfrew - Middle age/older, affluent customers

Average Income | 1992 Retail Positioning |
| :--- |
| Specialty Store Market |

In the total men's market, Sears, as is the case with the women's apparel market, defines the middle of the market and Harry Rosen is the most upscale men's chain retailer.

In the men's market Tip Top and Jack Fraser define the middle of the specialty store segment while Moore's is targeted to an older customer. The most competitive niche of the specialty market is the younger segment in which the jeans stores are competing against the more full line younger oriented stores such as Le Chateau and Randy River.

## MEN'S APPAREL

1992 Retail Positioning
Average Income
Specialty Store Market

Although much has been made about the entry of United States apparel retailers into the Canadian market, the total number of these outlets does not justify the concern expressed to date. However, the potential entry of other United States retailers such as Banana Republic and The Limited could adversely affect traditional Canadian specialty store chains along with the growth of mail order (e.g., L. L. Bean) and other non conventional retail formats, such as mail order shopping.

|  |  |  | 132 |

Because apparel manufacturers, out of necessity, have come to the conclusion that they will have to become retailers, a number of factory outlet malls have
been constructed since 1990, primarily in the province of Quebec.

## Section VI-Merchandise Sales Patterns

The largest merchandise category for men's clothing is pants. Since 1990, annual sales of both outerwear and suits/sport coats have shown the greatest decrease in sales (almost 30\%).

## MEN'S APPAREL SALES

Estimated Retail Dollar Sales (000)

|  |  |  |  | \% Change |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Merchandise Category | 1989 | 1990 | 1991 | 1992 | $1990 / 1992$ |
| Outerwear | $\$ 699,036$ | $\$ 742,098$ | $\$ 511,833$ | $\$ 526,761$ | $-29 \%$ |
| Suits/Sport Coats | $\$ 747,161$ | $\$ 742,799$ | $\$ 644,104$ | $\$ 541,383$ | $-27 \%$ |
| Slacks/Jeans/Other Pants | $\$ 1,087,074$ | $\$ 1,172,033$ | $\$ 983,232$ | $\$ 1,064,926$ | $-9 \%$ |
| Shirts | $\$ 792,417$ | $\$ 847,996$ | $\$ 703,874$ | $\$ 752,989$ | $-12 \%$ |
| Sweaters/Other Tops | $\$ 600,519$ | $\$ 556,273$ | $\$ 491,017$ | $\$ 521,959$ | $-6 \%$ |
| Fleecewear/Activewear | $\$ 263,275$ | $\$ 264,580$ | $\$ 236,278$ | $\$ 238,769$ | $-9 \%$ |
| Underwear/Nightwear | $\$ 219,418$ | $\$ 225,337$ | $\$ 209,544$ | $\$ 208,963$ | $-7 \%$ |
| Socks | $\$ 159,497$ | $\$ 167,011$ | $\$ 150,309$ | $\$ 156,225$ | $-7 \%$ |
|  |  | $\$ 4,568,404$ | $\$ 4,718,132$ | $\$ 3,930,193$ | $\$ 4,011,983$ |

Since 1988 there has been a downward trend in the importance of outerwear and suits/sport coats in the men's wardrobe while the pant category propelled by increases in both jeans and short sales has increased the most in the men's wardrobe.

## MEN'S APPAREL SALES <br> Retail Dollar Sales

Merchandise Mix

| Merchandise Category | 1988 | 1989 | 1990 | 1991 | 1992 |

Jeans at a half a billion dollars in annual sales is the largest single end use for men's apparel. Together the ten largest end uses account for two-thirds of total men's sales.

## MEN'S APPAREL 1992

The largest merchandise category for women's apparel is tops (sweaters, blouses, knit jerseys, t -shirts, etc) accounting for almost $\$ 2.2$ billion dollars in sales. Since $\mathbf{1 9 9 0}$, no women's merchandise category has registered an increase in sales while the three hardest hit categories of outerwear, dresses and skirts/blazers/suits have each shown almost a $\mathbf{3 0 \%}$ decrease in annual sales levels.

WOMEN'S APPAREL SALES
Estimated Retail Dollar Sales (000)

| Merchandise Category | 1989 | 1990 | 1991 | 1992 | \% Change <br> 1990/1992 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Outerwear | \$1,340,703 | \$1,249,442 | \$1,040,419 | \$862,916 | -31\% |
| Dresses | \$798,047 | \$756,896 | \$615,431 | \$514,917 | -32\% |
| Skirts/Blazers/Suits | \$1,599,183 | \$1,775,059 | \$1,469,188 | \$1,280,778 | -28\% |
| Slacks/Jeans/Other Pants | \$1,245,956 | \$1,404,992 | \$1,321,342 | \$1,368,776 | -3\% |
| Tops | \$2,292,608 | \$2,495,405 | \$2,160,595 | \$2,254,420 | -8\% |
| Fleecewear/Activewear | \$387,464 | \$423,678 | \$387,581 | \$380,988 | -10\% |
| Foundations | \$257,379 | \$315,895 | \$278,044 | \$298,363 | -6\% |
| Daywear | \$204,228 | \$222,763 | \$197,918 | \$221,396 | -1\% |
| Sleepwear | \$284,813 | \$285,240 | \$241,667 | \$258,674 | -9\% |
| Hosiery | \$44,145 | \$442,377 | \$406,842 | \$428,931 | -3\% |
| TOTAL | $\overline{\$ 8,868,488}$ | \$9,388,452 | \$8,134,800 | $\overline{\$ 7,889,676}$ | -16\% |

Over the past five years, outerwear and dresses have decreased in importance in the women's wardrobe while pants and foundations have increased in importance. The growth in the women's pant category is attributable to the growth of women's shorts.

(1) Includes promotional goods
(2) Excludes promotional goods

The differences in the average prices in the men's area are slightly smaller. In general in both the men's and women's market, the differences between the average total price and the average regular price are smallest for commodity type products (e.g., undershorts, bras, socks etc.).

In comparing the average prices for individual women's end uses against the average price for the total market, a number of patterns emerge:

- Department stores pricing is not consistent even though their average prices are closer to a specialty store than a discount store
- Specialty stores prices are $15-30 \%$ above the average market price
- Discount stores on average retail their product for $30-50 \%$ less

The increasing competitive nature of the Canadian retail market coupled with the consumer's willingness to trade down and shun high profile brand names should insure that future price increases will be negligible.

On average, the prices charged for apparel are significantly higher in Canada than the United States. A number of explanations for the difference have been offered, including:

- Canadian retailers work on higher margins
- Canadian retailers pay higher taxes
- The Canadian distribution system is not as efficient
- Canadian retailers utilize more wholesalers as opposed to going direct.
- Retail competition in Canada is not as intense
- Canadian retailers do not have the economies of scale of $U$. S. retailers.

(2) Converted at \$1.17 Canadian dollar to one U. S. dollar

Prior to 1992 promotional activity had been increasing in the Canadian apparel market. In 1991 Eaton's along with a number of other retailers, began to utilize an everyday low price strategy and as a result, the absolute level of promotional activity began to fall in 1992.

## TOTAL APPAREL

Percent of Units Sold on Sale ${ }^{(1)}$

|  | 1989 | 1990 | 1991 | 1992 |
| :--- | :---: | :---: | :---: | :---: |
| Women's Apparel | $55.5 \%$ | $56.3 \%$ | $57.6 \%$ | $56.6 \%$ |
| Men's Apparel | $60.1 \%$ | $62.7 \%$ | $61.6 \%$ | $59.3 \%$ |
|  |  |  |  |  |
| Juvenile Apparel | $55.5 \%$ | $55.4 \%$ | $55.9 \%$ | $54.9 \%$ |

(1) Based on consumer perception

The trend in men's apparel promotional activity in department stores has mirrored the
women's market. However, after increasing for the past three years, promotional activity in apparel specialty stores fell in 1992. Promotional activity for men's apparel in discount stores has remained relatively constant over the past two years.

## MEN'S APPAREL

## Percent of Units Sold on Sale

|  | 1989 | 1990 | 1991 | 1992 |
| :--- | :--- | :--- | :--- | :--- |
| Total Men's Apparel | $60.1 \%$ | $62.7 \%$ | $61.6 \%$ | $59.3 \%$ |
| Department Stores | $62.3 \%$ | $64.6 \%$ | $62.7 \%$ | $60.2 \%$ |
| Apparel Specialty Stores | $56.2 \%$ | $61.1 \%$ | $63.4 \%$ | $58.9 \%$ |
| Discount Stores |  |  |  |  |
|  | $62.3 \%$ | $64.4 \%$ | $62.3 \%$ | $62.3 \%$ |

Clearly the decrease in promotional activity in the women's market in 1992 was due to a continued downward incidence of promotional activity in department stores. Apparel specialty stores, especially the women's chains have, since 1989, continued to become more promotional.

## WOMEN'S APPAREL

| Department Stores | $58.0 \%$ | $59.4 \%$ | $57.3 \%$ | $55.8 \%$ |
| Apparel Specialty Stores | $60.7 \%$ | $62.3 \%$ | $63.2 \%$ | $64.9 \%$ |
| Discount Stores | $53.7 \%$ | $54.2 \%$ | $57.6 \%$ | $55.8 \%$ |

## Section VIII - Imports

Since 1987 imports' share of the Canadian apparel market has risen steadily. After relatively consistent yearly increases from 1987-1990 there was a very large increase in imports in 1991, coinciding with the first year of the United States-Canada Free Trade

Agreement. Since 1991 the annual rate of increase has remained constant.

## IMPORTS AS A PERCENT OF TOTAL APPAREL SALES

Units

In terms of both units and dollars imports have their largest share of the men's market. It is also interesting to note that imports have a higher share of dollar sales than unit sales. Part of the explanation is due to the fact that most outerwear which has a high average price is imported, while most pantyhose which accounts for a large number of units is domestically produced.

## imports às a PERCENT OF SALES

1992

Imports account for a greater proportion of sales in apparel specialty stores than in department or discount stores.

## TOTAL APPAREL <br> 1992

## Section IX - Terms For Doing Business by Channel of Distribution

## A. GLOSSARY

Negotiations between retailers and suppliers are not soley confined to merchandise selection and price. There is a variety of other conditions which must be fulfilled/agreed to before a sale is confirmed.

The following is a list of the more common conditions and terms used in conducting business with retailers in Canada:

- Payment Terms : Timing for the payment of suppliers' invoices and discounts taken (if any) by retailers for early payment.
- Volume Incentive

Rebates (VIR) : Discounts on the wholesale price given to retailers by suppliers for exceeding purchasing/wholesale sales volume over and above agreed to level(s). Such discounts are usually applicable to only the incremental volume achieved.

- Co-op Advertising

Allowance : Either a straight discount on all purchases given to retailers or a negotiable level of contribution by suppliers in support of the retailers' advertising of suppliers' goods.

- Warehousing

Allowance
: A discount on purchases given to retailers to help offset their warehousing costs.

Direct-to-store shipments (e.g. automatic replenishment) are not subjeci to warehousing ailowance.

- Exclusivity : Refers to either brand(s)/sub-brand(s) or style(s)/pattern(s) and is usually tied to sales volume. Depending on the retailer, an offer of exclusive brand(s)/or style(s) can be highly significant or not at all important.
- Mark-up : Retailers' gross margin.
- Sustained Margin
: Retailers' margin after mark-downs and clearances.
- GMROI : Gross margin return on inventory (invested) is a measure of performance - gross margin dollars divided by the cost of inventory.
- Store Support : 1. Fixturing - Suppliers provide the fixtures at the store level. Usually acceptable either upon approval or on a participatory (financial) basis.

2. Stock Counting - Counting of inventory at the retail level by an agency on behalf of one or more suppliers. Still being performed but slowly being replaced by electronic capturing at point of sale.
3. Shop Concepts - Retail space allocated to a supplier of branded merchandise. These shops can be either fully enclosed spaces or open concepts against one wall.

- Brand Support : 1. Consumer Advertising - National brand advertising undertaken by a supplier independently.

2. Point-of-Purchase - Posters, counter cards and any such promotional brand support at the retail level.

In many cases, the terms for doing business are outlined in a negotiated marketing agreement between a retailer and a supplier.

Retailers' requirements of their manufacturing sources vary not only by channel of distribution but also within channel.

## Section X - Role of Technology in Apparel Retailing

A. DEFINITIONS

- Quick Response : A mode of operation in which a supplier or retailer strives to (QR) provide products to its customers in the precise quantities, variations and time frames they require.

The essence of $Q R$ is shortening the cycle time of the soft goods chain, from fiber production through the retail point of saie.

The QR focus is on:

- More rapid movement of the right merchandise down the supply pipeline, in response to
- Better information on consumer demand moving back up the pipeline.
- Electronic Data

Interchange (EDI) : Electronic and computer systems linkage between "partners" (e.g. suppliers and retailers) providing two-way "paperless" communication.

- Automatic

Replenishment : Also know as "Pull" system, this is an arrangement between retailers and suppliers whereby retailers transmit orders (of non-fashion merchandise) to their vendors by computer when a minimum inventory level is reached.

The suppliers receive the orders on their computers and replenish the product within a predetermined period of time (e.g. several days to a couple of weeks).

- Vendor/Retailer

Partnerships : Interdependent relationships based upon a commitment to profitability for both parties.

The evolution of vendor/retailer partnerships started in the early to mid '80s with the birth of quick response and has evolved through three stages of development.

| PHASE I <br> Mid 1980s <br> New Electronic Technology | PHASE II <br> Late 80s - Early 90s <br> New Electronic Technology | PHASE III <br> Early - Mid 90s <br> New Electronic Technology |
| :---: | :---: | :---: |
| - UPC codes <br> - Bar coding <br> - Scanners: <br> - Check-out counters <br> - Storerooms \& distribution centres | - EDI <br> - Purchase orders <br> - Advance shipping notice <br> - Point-of-Sale <br> - Electronic fund transfers <br> - Auto-replenishment - Inventory management of basic commodities | - Growing interdependence between suppliers and retailers using both electronic and cooperative relationships <br> - Narrower vendor base with larger retail commitments <br> - Extensive use of "electronic linkages" <br> - Integration of retailers' and suppliers' merchandise planning systems <br> - Teamwork |

- Canada currently lags the United States by about 3 to 5 years in developing quick response partnerships due to the following:
- Financial constraints imposed by the consumer recession has slowed the investment in systems (hardware and software) by retailers.
- The commitment/trust level between retailers and suppliers is not yet at the required level for a win-win relationship.
- The progress of "electronic linkages" varies by retailer and supplier. Selected leading retail companies in both EDI and automatic replenishment include:
- Eaton's
- Sears
- Hudson Bay
- K-Mart
- Key issues influencing quick response partnerships:
- The retail customer base in Canada has shrunk.
- Most retailers have experienced losses/reduced profits over the past three years.
- The key issues influencing quick response partnerships (continued):
- Modest growth in apparel sales is expected over the next 3 to 5 years.
- Retailers are moving to a narrower vendor base to improve their efficiency and lower transition costs.
- The implications emerging from the above issues:
- The negotiating power of existing retailers is increasing.
- Retailers are locking to their key suppliers for survival and growit.
- Key suppliers will obtain larger orders from their key customers.
- Barriers to entry for marginal and new vendors will increase.
- The formation of these relationships is driven by retailers. Most progressive retailers and suppliers are negotiating fully integrated plans with the involvement of personnel from different functional areas (i.e., marketing, merchandising, production/sourcing, inventory planning, finance) because partnerships affect all aspects of a business. As a result, retailer/supplier joint planning teams are being formed (as depicted by the configuration on the following page) dedicated to fostering the success of these partnerships.

# SCHEMATIC EXAMPLE OF A PARTNERSHIP TEAM 

- Retailers' requirements of their suppliers include:
- EDI readiness
- Risk sharing in markdowns/clearouts
- Inventory holding
- Brand/pattern exclusivity
- Flexibility in product purchasing
- Increased communication at all functional levels
- Suppliers are reviewing the conditions for partierships. Infuencing faciors include:
- Size and type of customer
- Volume of business with specific retailers
- The extent/cost of service involved/required
- Alternative options (e.g. forward integration to retail, exports, etc.)
- On the other hand, the extent to which a supplier can negotiate a partnership arrangement from a position of strength depends on such factors as:
- Sales

Concentration : The supplier's degree of dependence on one or more customers and the significance of the supplier to the customer(s).

- Responsiveness: The ability to improve inventory turns and customer service through electronic linkages and merchandise planning systems.
- Marketing

Sophistication : Marketing driven companies understanding and applying segmentation principles, with strong brands and wellresearched products/styles aimed at addressing specific consumer needs.

- Teamwork : The ability to improve communication and increase contact between supplier and retailer in order to improve the partnership's effectiveness and avoid duplication.
- Implications emerging from the above suggest that:
- Most apparel suppliers who are able to meet a retailers' requirements and strike equitable deals with major retailers are generally larger manufacturers.
- For smaller suppliers to have successful partnership arrangements with major retailers, they must demonstrate a competitive advantage such as speed, quality, flexibility or product uniqueness.
- A few large suppliers may refuse to meet retailers' demands and as a result vacate existing markets to pursue alternative avenues of survival and growth.

The rapidly changing nature of technology and its effect on the retail/supplier relationship means that suppliers will be reviewing their account strategies for the mid nineties.

## Section XI - Comparison of Canadian and United States Retailing Patterns

Although Canada's population is one tenth the size of the United States' market, the Canadian retail apparel market at $\$ 14.2$ billion in one ninth the size. The explanation for the difference is that per capita annual expenditures for clothing in Canada is $10 \%$ greater than the United States.

TOTAL APPAREL MARKET ${ }^{(2)}$

## 1992 (Canadian Dollars) ${ }^{(1)}$

From 1988 to 1990 the Canadian clothing market grew at a faster rate than the United States market. However beginning with the recession of 1991, Canada's clothing market has underperformed the United States' market.

## TOTAL APPAREL SALES

## Percent Change in Dollar Sales From Previous Year

There are a number of differences in the retail channels of distribution for apparel between the United States and Canada. In general, Canada's structure is far less fragmented as Canada lacks either mail order or factory outlet retailers. Overall, department and discount stores have a larger share of the United States' market than the Canadian market, whereas apparel specialty stores have over twice the market share in Canada than they have in the United States.

## TOTAL APPAREL 1992

Over the period 1991-1992 retail channels gaining share included factory outlets, discount stores and sporting goods stores. Losing market share over the same period were department stores and apparel specialty stores.

UNITED STATES TOTAL APPAREL
Retail Dollar Market Share

|  |  |  | \% Change <br> in Sales |  |
| :--- | ---: | ---: | ---: | ---: |
| Retail Channels | 1990 | 1991 | $\mathbf{1 9 9 2}$ | $\mathbf{1 9 9 1 / 1 9 9 2}$ |
| Department Stores ${ }^{(1)}$ | $33.9 \%$ | $33.7 \%$ | $33.4 \%$ | $\mathbf{+ 4 . 0 \%}$ |
| Sears/Wards | $6.2 \%$ | $6.4 \%$ | $6.3 \%$ | $\mathbf{+ 3 . 4 \%}$ |
| Discount Stores | $20.4 \%$ | $21.7 \%$ | $21.9 \%$ | $\mathbf{+ 6 . 5 \%}$ |
| Apparel Specialty Stores | $18.4 \%$ | $17.1 \%$ | $16.8 \%$ | $\mathbf{+ 3 . 0 \%}$ |
| Factory Outlets | $8.0 \%$ | $8.5 \%$ | $8.9 \%$ | $\mathbf{+ 1 1 . 0 \%}$ |
| Catalog/Mail Order | $5.2 \%$ | $5.2 \%$ | $5.0 \%$ | $\mathbf{+ 1 . 8 \%}$ |
| Variety Stores | $0.7 \%$ | $0.6 \%$ | $0.5 \%$ | $\mathbf{- 1 . 8 \%}$ |
| Sporting Goods/Athletic Supply | $1.0 \%$ | $1.3 \%$ | $1.4 \%$ | $\mathbf{+ 1 2 . 7 \%}$ |
| All Other Outlets | TOTAL | $\mathbf{1 0 0 \%}$ | $\mathbf{5 . 8 \%}$ | $\mathbf{1 0 0 \%}$ |
|  |  | $\mathbf{1 0 0 \%}$ | $\mathbf{+ 5 . 3 \%}$ |  |
|  |  |  |  | $\mathbf{+ 5 . 0 \%}$ |

Although with the onset of the 1991 recession, Canadian off price retailers have begun to increase
their market share, their collective performance has lagged behind their United States' counterparts. Part of the performance of this segment in the United States is attributable to the increase in the number of retail doors for both factory outlets and Wal-Mart.

## TOTAL APPAREL <br> Off Price Retailers' Share of Sales

(Junior Department Stores, Discount Stores and Factory Outlets)

In the United States department stores, mail order outlets and apparel specialty stores have a larger share of adult apparel than juvenile apparel while Sears/Wards and discount stores have larger shares of the boys' and girls' market than the adult market.

## UNITED STATES

1992 Retail Dollar Market Share

| Retail Channels | Men | Women | Boys | Girls |
| :--- | ---: | ---: | ---: | ---: |
| Department Stores | $34.9 \%$ | $34.0 \%$ | $30.8 \%$ | $30.0 \%$ |
| Sears/Wards | $6.9 \%$ | $4.9 \%$ | $9.1 \%$ | $7.5 \%$ |
| Discount Stores | $20.1 \%$ | $17.7 \%$ | $33.2 \%$ | $31.9 \%$ |
| Specialty Stores | $16.4 \%$ | $20.4 \%$ | $8.9 \%$ | $14.1 \%$ |
| Factory Outlets | $7.4 \%$ | $9.1 \%$ | $8.7 \%$ | $9.9 \%$ |
| Catalog/Mail Order | $4.5 \%$ | $7.1 \%$ | $1.1 \%$ | $0.9 \%$ |
| Variety Stores | $0.6 \%$ | $0.5 \%$ | $0.7 \%$ | $0.6 \%$ |
| Sporting Goods/Athletic |  |  |  |  |
| $\quad$ Supply Stores | $1.8 \%$ | $0.7 \%$ | $2.4 \%$ | $0.7 \%$ |
| All Other Outlets |  | $7.4 \%$ |  | $5.6 \%$ |
|  | $100 \%$ | $100 \%$ | $\mathbf{5 . 1 \%}$ | $4.4 \%$ |
|  |  | $100 \%$ | $100 \%$ |  |
|  |  |  |  |  |

J. C. Penney with $9.1 \%$ of the market is the largest retailer of clothing in the United States. In addition to Penney's only two department stores, Dillards and Macy's are among the top ten retailers. Together the largest ten retailers control $34.5 \%$ of the United States retail clothing market.

UNITED STATES APPAREL SALES
1992 Retail Dollars

RETAIL CONCENTRATION

LARGEST TEN RETAILERS

| J. C. Penney | $9.1 \%$ |
| :--- | :--- |
| Wal-Mart | $5.4 \%$ |
| K-Mart | $5.1 \%$ |
| Sears | $4.8 \%$ |
| Mervyn's | $2.8 \%$ |
| Target | $2.2 \%$ |
| Dillards | $1.5 \%$ |
| Wards | $1.4 \%$ |
| Macys | $1.2 \%$ |
| Marshalls | $1.0 \%$ |

During the past three years Wal-Mart and Target have continued to gain market share. The growth of both Penney's and Wal-Mart in 1992 resulted in a loss of market share for K-Mart.

## UNNITED STATES TOTAL APPAREL

1992 Retail Dollar Market Share

| Individual Retailers | 1990 | 1991 | 1992 |
| :--- | :---: | :---: | :---: |
| J. C. Penney | $8.7 \%$ | $8.5 \%$ | $9.1 \%$ |
| Sears | $5.0 \%$ | $5.0 \%$ | $4.8 \%$ |
| Wards | $1.2 \%$ | $1.4 \%$ | $1.4 \%$ |
| K-Mart | $5.4 \%$ | $5.6 \%$ | $5.1 \%$ |
| Wal-Mart | $3.9 \%$ | $4.6 \%$ | $5.4 \%$ |
| Target | $1.8 \%$ | $2.0 \%$ | $2.2 \%$ |

Penney's has a proportionally much larger share of the men's market than the women's market. The three major discount retailers have almost twice the share of boys' and girls' apparel than they have of adult apparel.

## UNITED STATES

1992 Retail Dollar Market Share

| Individual Retailers | Men | Women | Boys | Girls |
| :---: | :---: | :---: | :---: | :---: |
| J. C. Penney | 11.0\% | 7.5\% | 10.5\% | 9.6\% |
| Sears | 5.3\% | 3.7\% | 7.3\% | 6.0\% |
| Wards | 1.7\% | 1.2\% | 1.9\% | 1.5\% |
| K-Mart | 4.9\% | 4.2\% | 7.7\% | 7.3\% |
| Wal-Mart | 4.9\% | 4.3\% | 8.6\% | 8.4\% |
| Target | 1.9\% | 1.7\% | 3.5\% | 3.6\% |
| TOTAL | $\overline{29.7 \%}$ | 22.6\% | $\overline{39.4 \%}$ | 36.3\% |

## Section XII - Future of Canadian Apparel Retailing

The following is a summary of possible future trends effecting the Canadian retail apparel market:

Consumer Trends

- Growth in apparel sales will be less than the growth in the economy over the next 3-5 years as clothing will continue to fall on the consumer's list of priorities/expenditures.
- Consumers will become less store and brand loyal and will increasingly shop for apparel in non conventional outlets.

## Manufacturing Trends

- Imports will continue to increase their share of historically served domestic market niches.
- The domestic manufacturer base will become smaller due to bankruptcies and consolidations.
- Domestic manufacturers will look to the United States for all future sales growth.
- Domestic manufacturers will cut back on their efforts to sell to the United States mass merchants and will expand by offering service oriented production to American niche retailers (e.g., small department store chains, mail order, etc.).
- Manufacturers in Canada will concentrate their efforts on the middle and upper middle segments of the market.
- Retailers will provide shorter lead times and demand greater flexibility on the part of their suppliers.
- Shorter production lead times will insure the health of large domestic manufacturers who are able to adjust their production capabilities to meet the realities of a changing market.
- Both retailers and manufacturers will increase their use of EDI for areas such as quick response and automatic replenishment.
- The increasing use of technology by both apparel retailers and manufacturers will result in the development of win-win partnerships.
- Manufacturers will increasingly source their production off shore.
- Manufacturers will move, of necessity, from a production and selling orientation to a sourcing and marketing orientation.
- Manufacturers will increase the number of their own retail outlets.

## Retail Trends

- The number of non-conventional retailers selling apparel will increase (e.g., factory outlets, warehouse clubs, etc.).
- Increased price competition will characterize the middle of the market.
- Retailer profit margins will continue to be minimal.
- Wholesalers and middle men will become less important as retailers, attempting to increase their profit margins source directly.
- Additional United States based retailers will enter the market (e.g., The Limited).
- There will be a further consolidation in the total number of Canadian retailers.
- Speciailty cíothing retailing will become more segmented as consumers will demand greater differentiation in the style of merchandise. As a result, retailers will be forced to narrow their product ranges and will increasingly specialize.
- The largest retailers will increase their collective market share by leveraging their marketing and technological capabilities.
- Discount stores reacting to Wal-Mart's entry will concentrate on improving the price/value relationship of their products.
- Department stores, reacting to the development of category killers, will increasingly narrow their total merchandise mix and increase their emphasis on apparel.
- Department stores will increasingly emphasize the breadth of their special size offerings and will expand their private label programs.
- The aging of the population will mean that department stores that historically have target that segment will gain share in the last half of the decade.
- Strategic partnerships could develop between United States and Canadian apparel retailers (e.g., Eaton's-J. C. Penney).

## Appendix A

## Canadian Retail Channel Definitions

Channel
Definition/Example

- Department Stores : Sears (retail, catalog and clearance centers), Eaton's, The Bay, Simpsons, Woodward's and Robinsons only)
- Specialty Stores : Includes men's, women's, children's and unisex apparel specialty chains (e.g., Thrifty's, Bootlegger, Marks \& Spencer) and independent specialty stores (e.g., Mary's Dress Shop in Windsor)
- Discount Stores : Includes all junior department stores and discount stores (e.g., Zellers, Woolco, K-Mart, Bi-Way, SAAN, Greenbergs, Woodwyn, Fields, Winners, Giant Tiger, Peoples, Metropolitan, etc.)
- All Other Outlets : Includes sporting goods stores, grocery stores, drug stores, college book stores, toy stores, Price Club and all other stores not mentioned previously

## Appendix B

Canadian Size Segment Definitions

## Size Segment

- Men : Includes all adult men's sizes. Also includes all purchases made for men age 15 and over. Hence, if a male respondent is seventeen years old, but does not report the size of the item purchased, it is classified as a men's product.
- Women : Includes all adult women's sizes. Also includes all purchases made for women age 15 and over.
- Boys : Includes sizes 4-6X and 8-18. Includes purchases made for boys, primarily between the ages of 3-14.
- Girls : Includes sizes 4-6X and 8-18. Includes purchases made for girls, primarily between the ages of 3-14.
- Infants : Includes all size 0-3X purchases and prenatal purchases. Does no include baby furniture, strollers or diapers.
