BRITISH COLUMBIA.

REPORT BY THE

HON. H. L. LANGEVIN, C.B.,

MINISTER OF PUBLIC WORKS.

To His Excellency the Right Honorable John, Baron Lisgar, of Lisgar and Baillieborough, in the County of Cavan, Ireland, Knight Grand Cross of the Most Honorable Order of the Bath, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, one of Her Majesty's Most Honorable Privy Council, Governor General of Canada, &c., &c.

May it please Your Excellency :---

I have the honor to report that, in accordance with the desire expressed Object of the mission. by the Privy Council, I visited British Columbia, with the view of acquiring a knowledge of that new Province, in relation to the Pacific Railway and its western terminus. I was charged at the same time to study the requirements of that distant Province, and to ascertain personally what public works are necessary for it. To fulfil my mission, it was requisite that I should extend my observations to a point beyond that to which the attention of the Minister of Public Works, when he visits the works under the control of his department, is ordinarily confined. It is for this reason that this report necessarily includes matters which are not generally found in the reports which I have the bonor to submit to Your Excellency.

On my journey to British Columbia, I travelled from Chicago to San Boute Francisco by the American Pacific Railway, and at San Francisco, I embarked on the iron steamer "Prince Alfred," of 900 tons, which conveys the Canadian mails to Victoria, the Capital of British Columbia.

DIVISION OF BRITISH COLUMBIA.

This new Province of Canada is divided into two perfectly distinct parts— Division Vancouver Island and the main land. They were constituted colonies, the British first in 1849, and the second in 1858; they were then united in 1866 under Columbia the name of British Columbia, and so continued until the 20th July last, at which date that large and beautiful colony became one of the Provinces of the Dominion of Canada.

10-1

[CLIMATE.

Climate.

Memorandum Chief Justice

Begbie on the

climate.

The climate of British Columbia varies according to the locality whether this be in the lower parts of the country near the sea and in Vancouver Island, or in the central tracts of the Province, which differ entirely the one from the other. In the lower parts and on the island the climate is extremely agreeable during the summer. The thermometer seldom rises above eighty degrees Fahrenheit, and in winter it seldom falls below fifteen degrees. Itmay in fact be said of this region, that it possesses the climate of England, but without its extreme humidity. On the other hand, in the central portion of the Province the drought, the heat and the cold are greater. The heat there is sometimes very intense. However, in the region which 1 visited, the cattle remain out during the whole year, and it is only when the winter is very severe, that it is found requisite to supplement the nutriment which they continue to find in the open field. As to horses, I was assured that they could find their food out of doors during the whole twelve months of the year. I requested the Honorable Chief Justice Begbie, who knows the Province well, to communicate to me the result of his experience ; this he has done in a memorandum, which I attach with pleasure to this report, and which will be found in Appendix A. I also refer Your Excellency to Appendix B, which is another short memorandum furnished by the officials at Victoria, to Appendix C., containing meteorological observations taken at New Westminister, by order of Colonel Moody, of the Royal Engineers ; to Appendix D and E, being meteorological observations taken at the mouth of the Fraser River, and at the Fisgard lighthouse in the Strait of Fuca; to Appendix F, which is an extract from the Colonization Circular issued in 1870 by Her Majesty's Colonial Land and Emigration Commissioners; to Appendix G, being an extract from a pamphlet by Henry de Groot upon British Columbia; to Appendix H, being an extract from a pamphlet on Vancouver Island by Dr. Charles Forbes, published in 1862; to Appendix I, being a chapter from Mr. J. Despard Pemberton's work on Vancouver Island and British Columbia, published in 1860; and to Appendix J, being an extract from a work on that, Province by Dr. Alexander Rattray, published in 1862.

TERRITORIAL CHARACTERISTICS.

British Columbia contains very extensive tracts of arable land. There is also a vast region fitted for grazing purposes, another covered with fine forests. and lastly that part of the country in which gold, silver and coal mining is The arable land is of two classes-that which is naturally well carried on. watered, and that which requires artificial irrigation. I ascertained that this artificial irrigation was for the most part not more costly than the clearing of our The works consist generally of a dyke which retains the waters wooded land. of a lake, or of a river, in such a way as to form a reservoir. In times of drought once or twice during the summer, this water is allowed to run through a conduit or ditch which discharges into another ditch dug at the upper part of the fields which it is desired to irrigate. From this latter ditch proceed a large number of trenches, dug at regular distances along the fields, so that by allowing the water to remain for from twenty to twenty-four hours, the land between the trenches is moistened, and vegetation progresses as rapidly as if a grateful shower had watered the fields. I observed this result in several places, and among others in the interior of Columbia, upon the farms of Messrs. Calbreath and Hawks, at an altitude of seventeen hundred feet above the level of the sea. On these farms I saw, adjacent to each other, fields that had been artificially irrigated, and others which had not. The former this year yielded forty bushels of wheat to the acre, while the latter produced but ten.

Territory.

Arable land.

Irrigation.

The tracts of land adapted for the raising of cattle, horses and sheep, are Lands for of wonderful extent, and offer great advantages to those who are desirous of raising cattle, turning their attention to that branch of inductive. The alignet is the second process and turning their attention to that branch of industry. The climate is very favor-sheep. able, admitting of the animals living in the open air, and thus diminishing the cost of shelter, which is generally only required for sheep, and then only during exceptional seasons. From the top of Mount Begbie, fifteen miles from Bridge Creek, on the Caribco Road, may be seen an immense plain more than one hundred and fifty miles long, and from sixty to eighty miles wide. On the other hand, from Cache Creek to the United States frontier, between the Thompson and Fraser Rivers, there is an immense and magnificent tract adapted for cultivation, grazing, &c. In these parts the plains and the hills are covered with a herb called *bunch grass*, "Bunch grass" which possesses highly nutritious qualities, and the importance of which has called forth from one of the editors of the Alta California, of San Francisco, who was travelling in the country last summer, the following tribute of appreciation :----- '' In winter, he says, this herb (bunch grass) keeps "the cattle in excellent condition, and as in general but little snow falls, " cattle feed upon it during the whole winter. The snow rarely exceeds from " twelve to fifteen inches in depth. It is from this region of the District of " Okannagan that the beef, with which the Victoria markets are supplied, is "obtained. Directly the winter is over the bunch grass grows with great " luxuriance, and I am assured that the nutritive qualities of this bunch grass " excel those of the celebrated blue grass and clover of Virginia and Mary- Large herds. " land." In Columbia it is no rare thing to find farmers owning from two hundred to a thousand head of cattle, and the number must increase, directly the works on the Canadian Pacific Railway are commenced in Columbia, and still more when the railway is opened; for in the first case the local demand will be largely increased, and subsequently by the opening of the road new outlets for trade will be provided for sheep and cattle breeders, as well as for farmers for the produce of their land.

ADVANTAGES FOR SETTLEMENT.

"2nd. Immense tracts of land for the maintenance of cattle, situated to the " east of the Cascade Mountains, and producing principally bunch grass. 3rd. "The pre-emption right to 320 acres of land, the price of which, one dollar " an acre, the purchaser may not be called on to pay for many years, and in " no case until eight years have elapsed. 4th. The pre-emption right to 160 "acres of land if the settler prefers to establish himself to the west of the "Cascade Mountains. 5th. The existence of a good system of roads, which " excite the astonishment of every stranger, when the scanty population of " the Province is considered. 6th. Good local markets for farm produce, and " for the increase of herds. 7th. Security against incussions and depredations " by the Indians. 8th. The protection granted to person and property. 9th. "Immense forests containing timber of all kinds. 10th. Inexhaustible " fisheries. 11th. Mines of gold, silver, iron, copper, coal, &c. 12th. Free " institutions."

FOREST LANDS AND TIMBER.

The forest lands of British Columbia are of great extent, and are very Forest land; rich. They are not confined to one part of the Province, but are found Douglas pine. throughout nearly its whole extent. The Douglas pine is one of the most It yields valuable trees in Columbia, and is found in great abundance. spars from ninety to 100 feet in length, and from twenty to twenty-four inches in diameter. The tree is very often from 150 to 175 feet long without knots or branches, and of a diameter varying from six to ten feet. I have myself seen several logs from sixty to eighty feet long, and six feet in diameter, in Messrs. Moody, Dietz & Nelson's booms at Burrard Inlet. From that place-that is, from the mills belonging to those gentlemen, and to the company called the "Hastings Mill Company"-there were this year exported from Timber extwenty to twenty-five million feet of timber, which must have furnished lading for thirty ships of 1,000 tons. It is a fact that an order for 750,000 feet of timber was this year received from Valparaiso at Burrard Inlet, it having been found impossible to fill the order at the American Sound, where wood of the required dimensions could not be found. The order was in course of execution during my visit to Columbia, and the timber so exported was a subject of admiration to those who visited Burrard Inlet at that time.

> The short memorandum which follows was prepared at my request by a gentleman who is in a position to give exact information as to the timber of the country.

> "The timber trees for which the Province of British Columbia is chiefly " remarkable, are as follows :-- Douglas pine, spruce or Menzies fir, yellow " fir, balsam, hemlock, white pine, yellow pine or Scotch fir, cedar, yellow " cypress, arbor vitæ, yew, oak, white maple, arbutus, alder, dogwood, aspen, " cherry, crab apple, willow, cottonwood.

> "These trees abound in almost all parts of the Province, and are all of "more or less value. It is impossible to give any exact area or describe the " exact position. But in a general way, in all the numerous indentations of " the coast of British Columbia and Vancouver Island, the Douglas and Menzies " pine, the cedar, and the maple, may be found in exhaustless quantities. The " coast of British Columbia is wonderfully adapted, from its conformation and " growth of timber, for lumbering, possessing as it does deep and safe harbors, "and unrivalled water power. -

> "The White Pine is a valuable timber for carriage building or furniture, " and is plentiful, but not so generally scattered through the country.

"The Maple is universal on the island and coast range.

"The Scotch Fir is chiefly found with the willow and cottonwood on the " bottom lands.

"The Cedar abounds in almost all parts of the country. It attains an "enormous growth, and is used for all sorts of purposes, the manufacture of " roofing shingles being one of the most important. Its facility for splitting " renders it very valuable to the farmer for fencing purposes.

"But the most valuable species is the Douglas fir. It is almost universally "found on the sea coast, and up to the Cascade range. It grows to an enor-"mous size, and is one of the best woods for large spars known. It can be " obtained 150 feet in length free from knots, and has squared forty-five inches " for ninety feet. Its extraordinary size, straightness, and uniform thickness, "its strength and flexibility, the regularity of the grain, the durability of the "timber, and its freeness from knots, places this timber almost beyond com-" petition.

"The lumbering trade of British Columbia is carried on entirely on salt " water. The logs are drawn through the woods by oxen, and rolled into the " water on ways constructed for the purpose, and are sawn in the mills situated " at the water's edge, whence they are shipped direct. The timber of British " Columbia has been barely tapped; hardly enough has been cut to make an "impression on these vast forests. The yearly export amounts to about " \$250,000.

Sessional Papers (No. 10.)

" In Vancouver Island coal and wood are used for fuel; oak, pine, and Fuel. " poplar are the woods chiefly in use. On the mainland pine and poplar are " almost exclusively used, at a cost of \$2 50 to \$3 50 a cord (128 cubic feet) " in the low country, but at the mines wood is very dear-\$7 50 a cord."

The Arbutus mentioned above, is found on the Island of San Juan, and Arbutus. on the coast of Columbia. It is an evergreen, and sheds its bark in the autumn. It is a very hard wood, and is manufactured into mallets, &c.

For further information respecting the timber of Columbia, I refer to Appendix K., which is an extract from Mr. Pemberton's work on Columbia, and to Appendix L., an extract from Dr. Rattray's book.

FACILITIES FOR THE CONVEYANCE OF TIMBER.

Having enquired what facilities the rivers of Columbia afforded for the Facilities for transportation of timber, I was told in reply :---

"Timber is at present chiefly procured in the vicinity of the harbors, ber. " and towed to the different mills. Little or no wood is just now brought " from the interior.

"The Columbia River affords a natural outlet for the timber grow-"ing on the slopes and hills bordering the Columbia River Valley; but the " navigation of the Columbia River from the 49th parallel to the sea, is not " open to British subjects as it should be.

"The Fraser River may also be made the means of conveyance of the "timber of the immense forests along its upper waters, by the construction " of timber slides at different places."

QUANTITY OF TIMBER EXPORTED.

I considered that a statement of the quantity of timber exported from Columbia during the last ten years would be a subject of interest, and in consequence, Mr. Hamley, the excellent Collector of Customs at Victoria, has furnished the required statement, with the addition of some remarks which are of use to explain it. It is as follows :----

STATEMENT of the various descriptions of Lumber exported from the Statement of Colony or Province of British Columbia during the ten years ending lumber ex-31st December, 1870.

past ten years

Year.	Plank.		Shingles.	Laths and Pickets.	Spars.	Miscellaneous.	Value.

the transportation of tim. "In this statement, the exports from 1861 to the end of 1866, are from "the mainland portion of British Columbia only; from 1867 to 1870, they "are from the United Colony.

" In 1861, 1862 and 1863, the exports were solely to the then separate " colony of Vancouver Island.

"In 1864, the first lumber was sent beyond the limits of the present "Province, to the Australian Colonies."

"In 1870, one of the mills at Burrard Inlet was shut for the greater portion of the year, which accounts for the falling off in the quantity exported.

"This year (1871), the exports will probably be greater than ever before.

"British ships carry more than one-half. The remainder is carried "principally by Americans."

AURIFEROUS REGIONS.

Auriferous lands.

Causes of tardy develop-

ment.

The auriferous lands of British Columbia do not appear to be confined to any single district of that great Province. They extend all along the Fraser and Thompson Rivers, and are particularly rich in the district of Cariboo. Then again there are the new gold mines of the district of Ominica in the north of Columbia, which would appear to extend over a very large tract of country, as they are found along the shores of the Peace and Ominica Rivers, of Germansen Creek and of a number of other rivers and streams. Gold has also been found on Vancouver Island, but in small quantity. It is prohable that we are but beginning to discover the richness of these mines, which have not yet been systematically worked.

CAUSES OF TARDY DEVELOPMENT.

The first requisite in that region was a geological survey, which by giving general information as to the geology of the country, would serve as a guide to miners and diggers by shewing them at what places they might hope to find the precious metal, and in what other spots they were pretty sure not to find it. That survey is now being made, and gives promise of the happiest results. In the meantime it is established that from the United States frontier to the 53rd degree of north latitude, and to a width of from one to two hundred miles, gold is found nearly everywhere; and the Honorable Mr. Good, in his report for 1869, declares that the yield of the goldmines in 1869 was quite proportionate to the population, and that the exports of gold dust had been ascertained to be \$2,417,873, to which amount must be added about \$1,000,000 exported by individuals, giving a total of \$3,417,873.

In the second place, there are required for the working of these mines, roads to reach them and capital to carry on the works. The Government of Columbia has already done much towards the opening of routes of communication, and it is very probable that now that it is no longer burdened with a debt too heavy for the limited population of the Province, it will be in a position to facilitate access to these auriterous regions by the opening of new roads and trafts. As to capital, that will be forthcoming the moment easy access to the mines exists, and will follow the opening of the Pacific Railway, which is destined to effect a great change in the aspect not only of that Province, but of two-thirds of the Confederation.

One thing which has retarded the working of the mines of the rich district of Cariboo is the cost of freight from the Lower Fraser to Barkerville. Not only are the distances long, and the cost of transport considerable, but the articles so transported are subject to the payment of heavy duties to meet

û

the cost of the Cariboo road, a road which would be a credit to a rich and prosperous country. It is desirable that these duties should be repealed, or at least considerably diminished.

PRODUCE OF THE MINES.

To give Your Excellency an idea of the richness of these mines, I will Produce of the here state what those which I visited produced this summer. The "South mine. Wales" mine at Vanwinckle, twelve miles from Barkerville, which is the extremity of the Cariboo Road, produced during the last three weeks of the month of August, 328, 215 and 256 ounces of gold respectively. The "Forest Rose" mine on William's Creek, produced in one week 203 ounces, and in another 245 ounces. The "Ballarat" mine yielded 72 ounces one week, and 95 ounces the following week.

Some of these mines are at a depth of from 100 to 150 feet under ground, and the shafts leading to them communicate with galleries, each of which is more than 200 feet long. The "Lane and Kurtz" mine gives promise of very great results. It is in the centre of what is called the Meadows; it is in the hands of an American Company, with a capital of \$500,000. It had been abandoned, although it yielded a large quantity of gold; but the subterranean water came in so rapidly, that the company which was working it was unable to continue its operations for want of means. If the present American Company succeeds in pumping out the water by means of the powerful machinery which it has conveyed 600 miles into the interior of Columbia, it is certain that numerous companies will be at once established at the Meadows, who will follow the example of that company, and will be rewarded for their sacrifices by a rich harvest of gold, similar to that which was obtained by the old company, when its operations were stopped by subterranean inundation.

The Blue Book of 1870, contains the following statements respecting these mines:----

"Cariboo:—These mines have been steadily worked during the year, Cariboo. "and with satisfactory results to those employed. Many of the old mining "creeks that have been diminishing in importance for the past year or two, "have this year recovered somewhat of their former prosperity, and have "yielded to great advantage.

"Lillouet and Clinton :---The gold mines in this district are principally Lillouet. "worked by Chinese, who are satisfied with small earnings in return for their "labor.

"Columbia and Kootenay:—This mining district has not come up to Kootenay. "the hopes entertained of it in previous years; the country has not been "thoroughly prospected, the greater number of the miners having left it, "being tempted by brighter prospects in the newly discovered gold fields of "Ominica, and others having left the country to try their fortunes at new "discoveries in California. Those, however, who remained seem to be con-"tent with what they have realized, and are engaged in carrying on works " of sluicing and tunnelling with vigor.

"Hope, Yale, and Lytton :---The gold mining in this district is princi-"pally carried on by Chinese on the banks of the Fraser River, who make "from \$1 to \$5 a day per man.

The yield of gold for the year has been as foll	lows :	
Cariboo	\$1,047,245	00
Lillouet		
Columbia, &c	161,500	00
Yale and Lytton	110,000	
	,	

"This, however, is only approximate, as it is impossible to arrive at "the quantity of gold carried out of the country in private hands."

PRICE OF GOODS AT THE CARIBOO MINES.

Price of Goods Mines.

Before passing on to the gold mines of the district of Ominica, I at the Cariboo consider that to show what sacrifices the hardy miners who have opened up the Cariboo district, and who are at the present time at work there, have made, and are still making in order to work the auriferous tracts, it is expedient to insert here a comparative table of the prices of certain articles in the district of Cariboo, in 1861 and 1871. It is as follows :----

,	1861.		1871.
A Shovel	\$14 00		\$1 50
A Pick	["] 14 00		3 00
A pound of Flour	2 50		0 20
", Bacon	2 50	•••••	0 60
" White Sugar	2 50		0 35
A pair of gum Boots	40 00	••••	9 00
A bottle of Brandy	$14 \ 00$		$2 \ 00$
A bottle of Champagne	$14 \ 00$		8 00
A pair of Bocts, half long to knee,			
Cariboo made	36 00		$20 \ 00$
A pair of Blankets (four points) Hud-			
son's Bay Company	$35 \ 00$		$16 \ 00$
Freight per pound	0 90		$0 \ 11$
One Meal	2 50		1 00
One ordinary Cooking Stove	$350 \ 00$		100 00
One sheet iron Stove, with six lengths			
of Pipe	100 00		$25 \ 00$
Daily wages of a Carpenter	$16 \ 00$		7 00
"Foreman	$16 \ 00$		6 00
"Workman	12 00		5 00
" Chinaman		•••••	3 50

GOLD MINES OF THE DISTRICT OF OMINICA.

Gold Mines of the district of Ominica.

The gold mines of the district of Ominica have not been really worked until this year. They are reached either by steamer from Victoria to Nanaimo, and thence by the River Skeena, or else by the Cariboo Road. A letter from Ominica, dated 15th August last, states that it was intended to make a trail from Lake Stuart, by means of which provisions and merchandise might arrive from Yale a month earlier in the spring than they could formerly, which At would probably cause that route to be preferred to the River Skeena. that time there were in the district more than 1,200 persons within a radius As I had not time to visit that remote district, I had of about 20 miles to derive information from other sources, and I ascertained from persons who were in a position to form the best opinions as to the results of the works in that part of the country, that those results were most satisfactory. Thus, on Lost Creek, one mine yielded 192 ounces, to be divided among five miners in return for one week's labour; and another, that belonging to Ward, Dunleary and Co., yielded as much as \$500 a man during one week. On Black Jack Gulch, the yield of the mine, from its first working, was \$40 a man per day, or \$200 for the five miners. On Manson Creek there were about 200 miners, who were making from \$5 to \$50 a day each. On Slate Creek, fifty men were making from \$5 to \$20 a day. On Germansen Creek, the amount of gold collected during the last week of August, was \$10,000. Since that period fresh reports have reached me, and everything tends to the belief that the season has been a productive one; the district is really rich in gold, and promises much. Some hundreds of miners have resolved to winter at the mines, and to carry on their operations during the winter. Others, in view of the high price of provisions and merchandise, will come down to Victoria, and return in the spring. And judging from the reports which flow in from all quarters, and from the numerous miners I myself met on the road, who came from Montana in the United States, and who consider this district to be another promised land, it is evident that this spring there will be a large influx of mining population.

PRICE OF GOODS AT THE OMINICA MINES.

It is, however, to be remarked, that in the month of August last, in the Price of Goods district of Ominica, all transactions, with but few exceptions, were on a credit in the district basis. There was but little money or gold dust in circulation. Flour was of Ominica. selling at from thirty-five to forty cents a pound, and beans for a little more. Smoked pork was one dollar a pound, sugar eighty cents a pound, and beef from twenty-five to thirty cents a pound. Wages were eight dollars a day.

REPORT OF THE COMMISSIONER OF GOLD MINES.

Since the foregoing was written, the Commissioner of Gold Mines in that district has made a report, of which a copy has been sent to me; it gives a correct idea of the state of affairs, and I consider it important that it should not be omitted. It is as follows :---

> "GERMANSEN CREEK, OMINICA, "23rd October, 1871.

"SIR,—I have the honor to report for the information of His Excellency Official Report "the Lieutenant Governor, that the mines on Germansen Creek have failed to on the Omini-"realize the expectations formed of them in the early part of the season; and ca Mines. "at present there are but few companies taking out pay. Several are, how-

"ever, preparing to test the hills on the upper portion of the creek during the coming winter; and, should they be successful, it is in contemplation to con-"struct large ditches, which will greatly facilitate the working of the benches "and hills on either side of the creek.

"I am, however, enabled to report more favorably of Manson River and "its tributaries, which have, notwithstanding the difficulties attendant on the "opening of the mines, in many instances, paid the miners handsomely.

"Several ditches are now being constructed with a view of conveying "water to the benches and hills of Manson River and Slate Creek, where a "very considerable amount of gold has already been obtained; and I have no "hesitation in saying that the diggings, in this portion of the district, are "sufficiently established to justify the belief that they will afford profitable "employment to a large number of men for years to come.

"On Manson River, the greater portion of the season has been spent in "working the surface diggings in the bed of the stream, which have barely paid "expenses; but it is now apparent that a deep channel exists, as was the case "in Williams' Creek, and the most experienced miners in the district are of the

10-2 9

" opinion that the channel contains the lode for which they have been search-"ing; and from the prospects obtained by the only two companies who have "succeeded in sinking to the bed rock, it would appear that these opinions " well founded.

"It is difficult to ascertain, with any degree of accuracy, the amount of "gold taken from the Ominica mines, during the present season; but the "returns that have been furnished to me by the foremen of the principal com-"panies, shew a yield of over \$300,000, and to this may be fairly added not "less than \$100,000 more, taken away in the hands of miners, of which there "is no return, making in all \$400,000.

"At the request of a number of miners, I have reserved a plot of land, "on the north bank of Manson River, at the mouth of Slate Creek, for a town "site, and have had it marked off into thirty lots; since which, several traders "have built substantial houses and commenced business there.

> " (Signed) P. O'REILLY, Gold Commissioner."

EXPORTATION OF GOLD.

I received from the Honorable Mr. Good, the following statement of the official exportation of gold. The note at the bottom shews that, to arrive at the amount of gold really yielded by the auriferous territory, 33 per cent must be added.

"STATEMENT of the Gold shipped from British Columbia by Banks, from 1862 to 1870, and as far as can be ascertained for 1871.

Year.	Bank of British N. America, (actual ship- ments).	Bank of British Columbia, (actual shipments).	Wells, Fargo & Co., (actual shipments) 1867, '68, '69 and '70, estimated for 1862, '63, '64, '65 and '66).	Total.
1862	\$ 58,789 674,378 716,381 546,649 751,987 1,144,888 666,259 597,245 330,120 243,595 5,730,291	\$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$	\$ 70 10 10 10 10 10 10 10 10 10 1	\$ 1,211,624 1,376,547 2,748,088 2,618,404 1,983,600 1,860,651 1,779,729 1,324,884 1,002,717 743,738 16,650,036

"This Return is exclusive of gold carried out of the country by miners "themselves, which has always been estimated at one third more in each year.

" (Signed)

Colonial Secretary."

CHARLES GOOD,

SILVER AND COPPER MINES.

Silver & Copper Mines. The silver and copper mines of British Columbia have not yet been largely worked. Nevertheless, in the month of September last, I saw very rich specimens from a silver mine near Hope, on the Fraser River, and I was

Exportation of Gold. told that it was proposed to work that mine on a large scale. On the spot, works of a considerable extent were being carried on ; among others, a road leading from Hope to the mine itself. I am further aware that this silver mine is not the only one which exists in the Fraser Valley ; and, so socn as the Hope mine shall have been worked and shall have yielded, as is expected, good results, there is no doubt but that other mines situated in the same range of mountains, will likewise be worked.

COAL MINES.

The coal mines of Columbia are very valuable and numerous. The Coal Mines. mines of Nanaïmo, which yield bituminous coal, are those which, at the present time, are the most worked. They are very easy of access, and vessels can be loaded from them without difficulty. This coal abounds on the eastern coast of Vancouver Island, not only at Nanaïmo, but also at Departure Bay, Bayne's Sound, Isquash and at Moskeemo, near the end of the Island. This coal is, in fact, the only good coal found on the Pacific coast. Mr. Dilke has probably this in his mind when he remarks as follows in his "Greater Britain":—

"The position of the various stores of coal in the Pacific is of extreme Future of " importance as an index to the future distribution of power in that part of Columbia. " the world ; but it is not enough to know where coal is to be found, without " looking also to the quantity, quality and cheapness of labour, and facility of "transport. In China and in Borneo there are extensive 'coal fields,' but "they lie the 'wrong way' for trade. On the other hand, the California " coal at Monte Diablo, San Diego and Monterey lies well, but is bad in "quality. Tasmania has good coal, but in no great quantity, and the beds " nearest to the coast are formed of inferior anthracite. The three countries "of the Pacific, which must, for a time at least, rise to manufacturing " greatness, are Japan, Vancouver Island and New South Wales ; but which " of these will become wealthiest and most powerful depends mainly on the " amount of coal which they respectively possess, so situated as to be cheaply "raised. The dearness of labour which Vancouver suffers will be removed "by the opening of the Pacific Railroad, but for the present New South "Wales has the cheapest labour, and upon her shores at Newcastle are " abundant stores of coal of good quality for manufacturing purposes, " although for sea use it burns ' dirtily ' and too fast."

On the subject of the coal mines of Columbia, the Blue Book of 1869 contains the following :---

"Two hundred men are employed in these mines. The yield for 1869 Mines of "was 40,883 tons, of which 19,700 tons were shipped to foreign parts. The Nanaimo. "price of coals at the pit's mouth is 24 shillings (sterling) a ton. The coal "contains 66 per cent. of carbon. The area of the mine is 900,000 square "yards. Three pits are worked. The seam is generally 4 feet thick."

The Blue Book of 1870 adds :---

"These mines are progressing favourably, and have been worked to "advantage during the year, the yield of coal for exportation having been "about 30,000 tons. The price of coal at the pit's mouth is \$6 per ton. "The coal contains 66 per cent. of carbon."

A Director of one of these mines told me that the mine produced this year 44,000 tons of coal. This mine, as well as others, would yield much more if our coal was not subject in the United States to a very heavy import duty.

English vessels which are stationed at Esquimalt or which touch at Comparison of these parts, make partial use of the Columbia coal. A trial having been three descripmade to test the respective qualities of Douglas, Newcastle and Dunsmuir coal on board H.M.S. "Boxer," the following result was ascertained by the Chief Engineer :---

"H. M. S. "BOXER."

"Trial of Douglas, Newcastle, and Dunsmuir Coals on the 24th, 27th, and 29th of September, 1870.

"With Dunsmuir coal, the throttle was nearly wide open, with Newcastle and Douglas from one-third to one-half open.

"Dunsmuir compared with Newcastle :---There is more smoke, much less soot, the tubes are much cleaner, the work is much lighter for the stokers, it is better steaming coal and there is much less dirt about the deck.

"Dunsmuir compared with Douglas :--There is less smoke, the tubes are "much cleaner, less dirt about the deck, and they keep steam much better.

"Newcastle compared with Douglas :-- There is much less smoke, keeps to steam better, the tubes are about the same, and dirt about the deck the same.

"While trying the Dunsmuir coal the boilers primed very much, if they "had not done so, the horse power, revolutions, steam, &c., would have shown

" a much better result.

" (Signed) ANDREW WATT,

Engineer in Charge."

"H.M.S. ' Boxer,' Esquimalt, B. C."

ANTHRACITE.

Anthracite.

Veins of coal have been found in several other parts of the Province; the coal is of excellent quality, but a deficiency of capital has prevented the veins being worked. Thus on Queen Charlotte's Island excellent and very valuable coal is found; it is anthracite. It contains seventy-two per cent of carbon, and it is stated to be better adapted for use in foundries than the Pennsylvanian anthracite. In 1869 the company which was working this mine, was taking coal from three veins on 6,000 acres of land; in three years the company expended \$80,000 in carrying on their works. The coal was worth \$10 at the mouth of the shaft. But for want of means the company had to abandon both its mines and its capital. Coal has been found not only on Vancouver Island, but also in the interior of Columbia, 160 miles from the sea, near the Nicola River, a tributary of the Thompson. It is said to be superior to that on the sea coast.

Mr. Hamley, the collector of Customs at Victoria, at my request furnished Exportation of the following statement of coal exported during the last four years.

STATEMENT of the Coal exported from British Columbia, from 1867 to 1871 :---

Where Shipped.	Quantity.	Value.
		\$
To the United States	s 11,223	72,953
33 33 37	29,219	189,923
" Mexico	1,305	8,482
" the United States	s 19,970	119,820
»»»»»»»»»»»	16,114	96,687
Total	Tons 77,831	\$487,865
	To the United States ", Mexico", the United States ", ", ", ", ", ", ", ", ", ", ", ", ", "	To the United States Tons. """"""""""""""""""""""""""""""""""""

Mr. Hamley, adds :---

"Before 1867, the Colonies were separate and no account was therefore "kept of the export of coal from Nanaïmo at the Custon House of British "Columbia. Nanaïmo coal is universally used in Victoria. A large quantity "is consumed by her Majesty's ships and the coasting steamers, and a few "tons are annually sent to the mainland."

To ascertain correctly what these mines have produced, it is necessary to Yield of the establish what are the sales effected by the companies working them. The ^{Coal Mines.} following statement was furnished to me as correct:—

-	Amount	of	Sales	of	Coal.	

1861	14,600	tons.
1862	18,690	,,
1863	21,394	,,
1864	28.632	,,
1865	32.819	"
1866		" "
1867		,, ,,
1868		
1869		"
1870		"
1010	43,040	"

1 was further informed that the prices of labor, in relation to coal mines, Price of labor. are as follows:----

\$3.00	to	\$4.00	a dav
3.75			
			••
			"
1.75	to	2.00	,,
1.00	to	1.25	
	3.75 2.00 2.00 1.75	3.75 2.00 to 2.00 to 1.75 to	\$3.00 to \$4.00 3.75 2.00 to 3.50 2.00 to 3.25 1.75 to 2.00 1.00 to 1.25

Having thus spoken of the arable, grazing, forest and mining lands of British Columbia, I annex as appendices the following documents : Appendix M, letter from the proprietor of the Dunsmuir mine, giving interesting details on the subject; Appendix N, letter giving important details in relation to the mines of the District of Ominica; Appendix O, law respecting gold mines; Appendix P, law respecting mineral lands, other than auriferous lands; Appendix Q, the Columbia land law; Appendix R, an extract from Dr. Rattray's work on the Columbia coal; Appendix S, the law respecting joint stock companies.

AGRICULTURAL PRODUCE, &C.

Agricultural produce.

Besides the produce of the mine, there is agricultural produce, and that obtained from cattle breeding, the fisheries and the chase. Wheat, barley, oats, potatoes, peas, vegetables, and fruits, such as apples, plums, cherries, &c., grow and flourish in Columbia. At Cariboo, however, the frequent frosts do not allow of the cultivation of grain; and what little cultivation there is there, is confined to vegetables which do not require a long season to bring them to a degree of maturity at which they can be used. But it would be erroneous to suppose, that, in the interior of Columbia, the cultivation of grain cannot be carried on. I saw in the interior, at the mouth of the Quesnel River, land farmed by a Canadian of the name of Brousseau, and he had a magnificent crop of all sorts of grain. More than this, at a distance of thirteen and a half miles from the Quesnel River, towards the interior of Columbia, I saw at a level of 2,700 feet above the sea, cabbages, carrots, turnips, and potatoes, which would have done credit to any part of Canada whatever. And elsewhere, at almost as great a height, I found fields of wheat, barley, and oats, presenting the finest possible appearance, and in their mute language proclaiming that those who believed that Columbia was a land of mountains, unfit for cultivation, and destined to prove but a source of expense to the Confederation, had made a great mistake. The fact is, that, at Clinton, I was shewn a mill, among others, that this year turned out four hundred tons of flour, and the wheat brought to this mill is entirely the produce of the country. There are, I think, eight mills of that description. Last year, barley and oats were sold at from two to three cents a pound; this year they are selling at from three to five cents. Wheat was sold at three cents last year, and this year it is selling at three and three-quarter cents a pound. For details respecting agricultural produce, I refer to Appendix T, which is an extract from the Blue Book for 1870. It also contains a list of the prices of certain articles of consumption.

CATTLE.

Dr. Rattray, whom I have already quoted as a man who is generally well informed as to our new Pacific Province, after having spoken of Vancouver Island as not being highly susceptible of cultivation, except in its southern parts, adds :---

"This colony, however, has British Columbia on her right to fall back "upon to supply her markets, a country in every way adapted, by its climate, "soil, fine pastures, and an abundance of arable land, for agricultural and "pastoral development, and capable of becoming a storehouse of animal and "vegetable produce, able to supply, not only this island, but the entire Pacific."

The author is right. Columbia not only yields abundance of agricultural produce (and will yield more when the population is greater, and the demand increases), but the country is specially adapted for the raising of cattle, horses, and sheep. 1 saw oxen, six years of age—which had never been under any shelter other than the vault of heaven – in very good condition, and as fat as the finest cattle which are brought to the markets in our Eastern Provinces. I do not mean to say that a prudent cattle-breeder ought not to provide shelter for his cattle, and ought not to lay in at least one month's forage, in case of accident, a thing he can easily do, for the plain is covered with the succulent grass of which I have already spoken above.

Raising of eastle, &c.

What I have just said in relation to cattle applies equally to horses, with this difference, that the horse finds his food more easily, in the event of a fall of snow, than the ox does. His foot easily penetrates through from ten to twelve inches of snow, and reaches the grass, which, in that country, constitutes his favorite nourishment.

With respect to sheep, there is no part of Canada better adapted for raising them than Columbia. They here continue in good condition, fatten rapidly, and the breeder finds a ready sale both for the mutton and for the wool.

It is needless to say that the porcine race is represented here, and multiplies to an astonishing extent. During the fine season they only need the roots, fruits, cactus, and herbs, which are so abundant in all parts of Columbia; but, like sheep, they require more care during the winter. The pig, however, is an animal for which there is always a market in a mining country like Columbia, and which is always sure to bring a fair profit to the breeder.

FISHERIES.

The fisheries of Columbia are probably the richest in the world, but they Fisheries, have been but very little worked. The gold fever draws immigrants towards the auriferous tracts, causing them to neglect what to many of them would prove to be a much richer mine, and one yielding much more certain results than that, to seek which they go so far, and undergo so much labor and fatigue. At the present time things are beginning to wear a different aspect; some attention is being turned to the fisheries, without, however, the auriferous lands being in consequence neglected; however, the fisheries require fresh arrivals to develope their full resources. The present population has its ordinary avocations, and can devote to this new branch of industry but an unimportant part of its time. Inferences may be drawn from the fact that there are really only two large fishing establishments : one a salmon fishery under the management of Captain Stamp, who, for the first time, exports salmon in tin boxes; the other, a whale fishery in the Gult of Georgia. I saw one of the whalers, the Byzantium, in Deep Bay. She was an English brig, commanded by Captain Calhoun, and on board of her was Captain Roys, the inventor of an explosive ball, which is used in the whale fishery, and which, on penetrating the marine monster, explodes, and throws out a harpoon. The first whale, against which this projectile was used, was killed in 1868. In 1869 and 1870, the company made use of a small steam vessel; and their success last year induced them to devote to the trade a brig of 179 tons, manned with twenty hands. Captain Calhoun complained of having to pay heavy duties on nearly all the articles required for the fishery. This obstacle to the success of this branch of industry, will shortly be removed by the substitution of the Canadian tariff for the tariff of British Columbia.

I was assured that, if that expedition proved a success, there is room in our Pacific waters for at least fifty undertakings of a similar character. I observe that, since my return, the whaling schooner *Industry* has arrived at Victoria with 300 barrels, or about 10,000 gallons of oil, after an absence of only five weeks. One of the whales killed during the expedition was sixty feet long, and would certainly yield nearly seventy barrels of oil.

On this subject the Blue Book of 1870 contains the following :---

"During the year there were three whaling companies in existence (one of these has since broken down). Thirty-two whales were killed, yielding 25,800 gallons of oil, worth 50 cents per gallon. There was one vessel with boats, and there were two stations with boats, employing altogether forty-nine hands. The capital invested in this interest amounted to about \$20,000."

"The dog-fish catch exceeds in importance that of the whales. 50,000

" gallons of dog-fish oil was rendered, worth forty cents per gallon. This " branch of industry is steadily progressing."

From another source I have obtained the following information respecting 1871.

Whaling companies.

Salmon.

"There are three whaling expeditions now in action in the waters of "British Columbia, viz. :

"1st. The British Columbia Whaling Company, with the "Kate," a "schooner of seventy tons, outlay \$15,000. They have already secured "20,000 gallons; they expect 10,000 more. The value of oil here is 37 "cents a gallon. In England it is worth £35 a ton of 252 gallons. This "company have in addition secured already 30,000 gallons of dog-fish oil, "worth 37 cents here per gallon, 55 cents in California, and £35 a ton in "England.

"2nd. The brig "Byzantium," 179 tons, expenditure \$20,000. Their take for the year is not known.

"3rd. Steamer "Emma" and scow "Industry," expenditure \$10,000 "estimated take 15,000 gallons.

"This coast is considered by an old whaler from Providence to be one of "the best fields in the world from whence to start whaling enterprizes. "Particular attention is called to the value and facility of the dog-fish oil "fishery, which is even a more paying undertaking, at present, than the "whaling."

In Columbia salmon is most abundant, and constitutes one of the principal sources of wealth in the country. It is sold at a very low price—five cents a pound—at Victoria, and constitutes an important part of the food of the Indians. There are five species, a description of which is contained in Appendix U., which is an extract from the Reverend Dr. Brown's pamphlet on British Columbia.

DETAILS RESPECTING THE FISHERIES.

As this branch of industry, the fisheries, was so little developed, I obtained from a gentleman who is, from his studies, in a position to give me correct information on this subject, a memorandum which, though short, gives more details than it was possible for me to obtain from official documents. It is as follows:—

"In speaking of the fisheries of British Columbia, one may almost be "said to be speaking of something which has no existence. With the excep-"tion of a small attempt at putting up salmon in tins on the Fraser River, "and one or two whaling enterprizes of a few years standing, no attempt "whatever has been made to develope the actually marvellous resources of "this Province in the way of fish. I will, therefore, proceed to give a list of "the fish that are to be found in quantities that would warrant the establish-"ment of fisheries, and then a brief description of the habits, locality, and "commercial utility of each class of fish, with any remarks that may occur "that would be of interest or value.

" Description of fish found in British Columbia and Vancouver Island:--" Whale, sturgeon, salmon, oulachan or houlican, cod, herring, halibut, sardine, " anchovy, oysters, haddock, and dog-fish.

"There is no law governing fisheries in British Columbia. Fishing is "carried on throughout the year without any restrictions. This state of "things is well suited to a new and thinly populated country. The restric-"tions of a close season would be very injurious to the Province at present, " and for many years to come.

"It is quite impossible to give even an approximate estimate of the "produce of the fisheries during the last ten years, there being no data from "which it could be computed.

Different varieties of fish.

No restrictive laws in force.

16

"There is no local law preventing Americans from fishing in our " waters.

"Whale.—I am unable to say whether the whales are sperm, or of what Whales. " species, but an undertaking, now some three years old, seems from all " accounts (it has been found impossible to obtain any official return from the " company) to have been very successful. That it is a profitable speculation " there can be no doubt, or it would have been long ago abandoned; and that " the company have no difficulty in obtaining whales is also demonstrated by " the amount of oil secured. I have little doubt that if this branch of in-" dustry were followed up by men well versed in the requisite knowledge, a "vast amount of wealth might be added to this Province by whale " fisheries.

"The Sturgeon abounds in the rivers and estuaries of British Columbia. Sturgeon. "This fish is caught with little or no difficulty. It attains a gigantic size, "over 500 lbs. in weight. The flesh is excellent, both fresh and smoked. " No attempt, that I am aware of, has ever been made to put the fish up for "market. Its commercial value is derived from the isinglass and caviare " which are made from it. I am not aware of there having been any attempt " to manufacture isinglass in this country. Caviare of excellent quality has " been produced. At present I should be inclined to believe that there is no " person in the Province capable of making isinglass, which is, therefore, a " resource entirely undeveloped as yet.

" Salmon .-- The salmon in the waters of British Columbia are excellent Salmon. " in quality, varied in species, and most abundant. In the rivers which they " penetrate up to their head waters, they are caught by a drag-net in the deep "waters, and by a bag-net in the rapids. In the sea they are generally " caught with hook and line; a canoe at certain seasons can be filled in a day " by the latter method. The Fraser River salmon is justly famous. It is " used fresh, salted, pickled, smoked, and kippered, and for export is put up "salted in barrels, and fresh in one or two pound tins; the latter practice " has only been commenced during the past three years. The article pro-"duced is of a most excellent description, and will doubtless prove a source " of considerable export trade when it becomes known in suitable markets. "There would appear to be no limit to the catch of salmon.

" Oulachans or Houlicans.-This small fish, something about the size of a Ou'achans. " sprat, appears in the rivers of British Columbia and about certain estuaries " on the coast towards the end of April. Their run lasts about three weeks, " during which time they may be captured in countless myriads. Eaten fresh " they are most delicious, and they are most excellent packed in a salted or "smoked form. This fish produces oil abundantly, which is of a pure and "excellent quality, and which, as held by some, will eventually supersede " cod liver oil. This fish is caught with a pole of about ten feet in length, " along which are arranged, for five feet at the end, nails like the teeth of a " comb, only about an inch and a half apart. The comb is thrust smartly "into the water, brought up with a backward sweep of the hands, and is "rarely found without three or four fish impaled on the nails. I have seen " a cance filled with them in two hours by a couple of hands.

"Cod.-Several species of cod are found in the waters of British Cod. "Columbia, which are excellent both fresh and cured. It has been often "asserted, I cannot say with what truth, that the true cod is found on this "north-west coast. That, however, remains to be proved.

"Herring.-This fish also abounds during the winter months, and is of Herring. "good sound quality. It is largely used in the Province, both fresh and " snoked, but nothing has been done in the way of export.

"Halibut.-Halibut banks are of frequent recurrence in the inland Halibut. "waters of this Province. The fish attain an enormous size, and are caught

10 - 3

17

" by deep-sea-lines. They are only used in the Province at present. They " are of first rate quality, and an excellent article of food.

"Sardines.—Are always found among herrings. I cannot state if they the are precisely the fish known to commerce under that designation, or in what quantity they exist; but they are firm in flesh and excellent in flavor.

"Anchovy.—This fish is only second to the oulachan or houlican in its "abundance. During the autumn it abounds in the harbors and inlets, and "may be taken with great ease in any quantity. Eaten fresh, they have "rather a bitter flavor.

"Haddock.—This fish, called in the country 'mackerel,' to which how-"ever it has no resemblance, is a great favorite both fresh and cured. It is "caught in the winter months, and when smoked forms a luxurious addition "to the breakfast table. I am of opinion that a very large trade will be "done some day in exporting this fish to the southern ports of America, "where fish is highly valued in a smoked or cured state.

"Dog-Fish.—This species of fish can be taken with great facility with a "line and hook in almost any of the numerous bays and inlets of this "Province. The oil extracted from them is obtained in abundance, and is "commercially of much value. It is produced in moderately large quantities "by the Indians, and exported.

"Oysters.—Are found in all parts of the Province. Though small in their "native beds, they are finely flavored and of good quality. When, in course "of time, regular beds are formed, and their proper culture is commenced, a "large export-will no doubt take place both in a fresh and canned state. "There is a large consumption of oysters in cans on the Pacific coast."

PRODUCTS OF THE CHASE.

The products of the chase in Columbia are very various and abundant. Furs, for example, constitute one of the most valuable exports from nis Province. I procured the following list of animals, the furs of which re obtained for the purposes of trade, the value of the fur being set opposite) the name of each animal, viz. :--

	Each.
Panther	\$2 50
Wild Cat	0.75
Wolf.	2 50
Red Fox	25 00
Fisher	5 00
Mink	2 00
Martin ,	5 00 to \$10
Racoon	0 75
Beaver	1 00 per lb.
Black Bear	5 00 to \$8
Brown Bear	7 50
Wolverine	1 00
Siffleur	0 50
Musk Rat.	0 25
Lynx	3.00
Common Otter	5 00
	50 00 to \$80
Sea Otter Squirrel Bed Deer (Elk)	0 12
Troot To cor (Think)	0 15 per lb.
Blacktailed Deer	015 ,,
18	

Cordines.

inchevy.

Haddock,

⊇og-fisb.

Oysters.

Furs.

Ermine	0	50
Sea Lion	0	00
Fur Seal	10	00
Mountain Goat	2	00
do Sheep	3	00

At Cariboo.

Silver Fox	50	00 to \$70
Black Fox	100	00

Until the year 1860 the fur trade was entirely monopolized by the Fur trade. Hudson's Bay Company; but since that date the trade has ceased to be exclusively in the hands of that Company, and there are now a large number of persons who have invested their capital in it. In general, the trade is carried on by coasting vessels, which exchange goods for peltry. It is rather difficult to arrive at a just estimate of the value of the furs exported. I was however assured that it amounted to \$210,000, in 1868, and to \$233,000 in 1869.

BIRDS AND ANIMALS OF COLUMBIA.

There are also in British Columbia large numbers of waterfowls, snipe, Birds and geese, swans, pheasants, partridges, prairie chickens, grouse and ducks, without animals of taking into account--says one writer—the eagle, sparrow-hawk, mosquito-hawk, owl, wood-pecker, humming-bird, king-fisher, swallow, robin, crow, pigeon, plover, crane, magpie, thrush, jay and blue-bird.

In Appendix V will be found a list of the animals and birds of Vancouver Island, furnished by Dr. Forbes. I add to it, in Appendix W, an extract from Mr. Pemberton's work, giving some further details respecting the animals and birds of Columbia.

STONE QUARRIES.

After having pointed out the principal products of Columbia, I perceive Quarries. that I have omitted to mention the fine stone quarries at Newcastle Island (two miles from Nanaïmo) in Departure Bay. A sandstone of very ine quality is obtained from them. From the upper part of the quarry can be quarried blocks 50 feet long by 8 in diameter. I saw columns 30 feet long, by 4 feet and two inches in diameter, intended for the San Francisco Mint. The lower part of the quarry, which is very considerable, is composed of strata from 6 inches to 4 feet in thickness. The agent of the company, which is working this quarry, told me that 8,000 tons of this stone would be required for the San Francisco Mint, and I understood that the stone cost \$3 a ton on board the vessel; large blocks however costing double that price.

SHIPBUILDING AND NAVIGATION.

I now come to the subject of shipbuilding and the nevigation of the Shipp. Province.

The number of vessels built during the last ten years is not considerable. It is a branch of industry which is as yet only in its infancy; but which, through the opening of the Canadian Pacific Railway, is destine? soon to assume large proportions.

It is however expedient, for statistical purposes, to ascertain that number, though small. It is as follows :
Victoria 1861 3 Steamers 5 Schooners
,, 1862
" 1863 2 Steamers 2 "
$,, \ldots 1864 \ldots \ldots 2 ,,$
" 1865
New West- minster } 1865 1 " 1 Light Ship
Victoria 1866 2 Steamers
" 1867 … 1 " … 1 . "
Sooke 1867 1867 Brigantine
Victoria 1868 2 Schooners
Soda Creek 1869 1 Steamer
Victoria 1871
Total
1 Barge
1 Light Ship
The number of vessels which arrived in the Ports of the New Province,
and which sailed from them during the last ten years, is as follows :
Entered. Cleared.
1861 227 $\begin{cases} Of these a good number were canoes with freight and passengers for the mines, \dots 178$
which did not return
(which did not return)
(which did not return)
1862 276 ,, ,, 255 1863 243 235
(which did not return)

1862
1862
1862
1862
1862
1862

and Burrard Inlet are included.

Vessels navigating the waters of Columbia.

Arrivals and departures (f Vessele.

To the foregoing tables we may add a statement of vessels of all sizes trading in British Columbia. This table shows the nationality of each class of vessels, and their tonnage. For this information I am indebted to the Government of Columbia. It is as follows :---

Steamers.

8	Coasting	British.
5	Inland (River Fraser) 3 only running	• • •
1	To and from San Francisco	**
1	To and from Puget Sound	American.
2	To and from Portland	* **

17

Ships and Barques.

7 from England are generally chartered to carry lumber-3 by Hudson Bay Company, and an average of 4 by other British Merchants.

Sessional Papers (No. 10.)

6 from and to San Francisco, are generally chartered to carry lumber-American.

21 to Australia, China, and South America, (in 1870)-6 British, 15 Foreign.

3 between Honolulu and Victoria-1 American, 2 British.

Schooners and Sloops. 28 Coasting,—British.

Tonnage.

8	Coasting Steamers	1182	tons	83	men.
3	Inland	452	,,	22	,,
7	Ships from England in 1870	3868	••	115	,,
6	Traders to and from San Francisco	1320	,,	60	,,
21	To Australia, &c	10894			,,
3	To and from Honolulu	893	,,	24	,,

The 21 vessels mentioned above to "Australia, &c.," are not regular traders. They are the vessels cleared in 1870.

In Appendix X will be found extracts from the Blue Book for 1870, containing fuller details respecting vessels, their nationality, tonnage, crews, de., de.

MANUFACTURES.

The manufactures of Columbia are few in number; but water power Manufactures. being abundant, it is certain that so soon as the requirements of the Province call for them, manufactories may be multiplied under advantageous circumstances. I shall treat this subject as I did that of ship building; although these branches of industry are only in their infancy, so to speak, it is well, in a statistical point of view, to give the information which we possess respecting the present condition of things. This information will prove useful at a later date, for purposes of comparison. The following table is a statement of the manufactories, mills, &c., at the principal places in Columbia, in the year 1870.

New Westminster.

3 Saw Mills-can cut 183,000 feet of lumber per day.

1 Grist mill-can grind 30 barrels per day.

1 Distillery-distils 300 to 400 gallons per month.

Hope, Yale, and Lytton.

2 Saw Mills-can cut 7,000 feet of lumber per day.

5 Flour Mills-2 can grind 23 barrels, the others 10 barrels per day each.

Lillouet and Clinton.

1 Saw and Flour Mill (combined)-can grind 60 barrels of flour per day, and cut 12,000 feet of lumber.

1 Flour Mill on Dog-Creek-can grind 2,000 pounds of wheat per day.

1 Saw Mill at Lillouet-can cut 5,000 feet of lumber per day.

1 Saw Mill at Clinton-can cut 2,000 feet of lumber per day.

1 Flour Mill at Lillouet-can grind 120 sacks in twelve hours.

Kootenay and Columbia.

1 Saw Mill, waterpower-in process of construction.

1 Bed Rock Flume-in process of construction.

Cariboo.

1 Steam Saw Mill, on William's Creek, 20 horse power-can cut 20,000 feet of lumber per day.

EXPORTS.

Exports.

Before passing on to the population of British Columbia, and after the statement of the produce and manufactories of the Province, I think it is expedient to state that in 1870, the exports amounted to \$208,364, exclusive of the gold, the amount of which is given above. The details of the exports will be found in Appendix Y.

POPULATION.

The population of British Columbia was greater some years ago than it is now. That was when the gold fever was at its height. According to the enumeration made, I think, in the month of March or April 1871, the population of Columbia was 8,576 whites, 462 negroes, and 1,548 Chinese, giving a total of 10,586, the distribution whereof throughout the territory is given in Appendix Z.

The total of 10,586 does not include the Indians, of whom I shall speak shortly.

The white and Chinese population increased by immigration during the popula year 1871 by from 1,500 to 2,000. This immigration is to be attributed to the discovery of the new gold mines of Peace River, district of Ominica; and, to judge by appearances, it is likely to continue during the coming season.

In this population is observable the usual disproportion between the two sexes, which was remarked from the first in California and Australia. Thus, the number of men is 7,574 and of women 3,012.

The population is remarkable for its spirit of order and submission to This state of things is to be attributed, in the first place, to the the laws. fact that the white population is composed in great part of men of education, many of whom have seen better days, and who are consequently less disposed than the majority of ordinary populations, in these distant regions, to avail themselves of every favorable opportunity of violating the law. It is also to

Submission to the laws.

he attributed to the firm administration of the laws by the Chief Justice, whose name alone, at the time of the great immigration during the golddigging excitement, was the terror of delinquents.

Although the magistrates entrusted with the census fulfilled the duty Nomadic confided to them with care, it is undeniable that in so vast a country as population. Columbia, with such a scattered population, it is hardly possible to take a correct census. The names of many traders, miners, and fishermen were not registered, and consequently not included in the total number given as the result of the census.

The white population of Columbia is intelligent and industrious, and may unhesitatingly be compared with the population of any other part of Canada. If the progress of the Province has not been rapid, it is to be attributed much less to a want of energy on its part than to other causes. Of these causes the paucity of population is perhaps the principal for it has Spirit of been found impossible, under existing circumstances, to obtain a considerable enterprise revenue, and so to be placed in a position to carry out great undertakings. shown. This small population, however, did not hesitate to submit to great sacrifices to open that great highway from Yale to Cariboo, which gave, and still gives, comparatively easy access to the rich mines of the District of Cariboo, and which, for boldness of enterprise and solidity of construction at many points, is worthy of a great people. Suffice it to add, that this great Cariboo road, which in many places is cut out of the mountain side, at a height of from 600 to 1,000 feet above the Fraser or the Thompson River, which run at the base of the precipice, cost nearly a million and a quarter of dollars.

CHINESE.

The Chinese population is regarded with no greater affection in Columbia Chinese. than in California, but is, at any rate, in the former country, not ill treated. The Chinese are an industrious, clean and laborious community. They are generally miners, working either on their own account or for the whites, or in service as laborers or domestic servants, most frequently in the latter capacity as cooks. Many of them are also employed, either on their own account or by others, in the transportation of freight from the lower Fraser to the mines. They live on little, and make a livelihood even in places from which the whites have had to emigrate lest they should perish of hunger. Those who dread the increasing immigration of the Chinese maintain that they are a population but little to be desired. They forget that the presence of the Chinese has contributed to reduce the price of wages in the mines. A Chinese there receives \$3 to \$3 50 a day, and a white man \$5. It is added that the Chinese leave nothing in the country. That is strictly true, if it is said of their dead, the ashes of which are scrupulously conveyed by them to China. But it is certain that the Chinese leave a great deal of money in the country, by their purchases, travelling, &c. During my trip to the Cariboo Mines, I saw a great number of Chinese, who were going to or returning from them, and in many cases they were travelling in stages, and halted like others at the stopping places to take their meals; and often, on land as well as on board the steamers, travelled as first class passengers.

INDIANS.

The census of the Indian population has not been made, but it Indians. is desirable that it should be so before long. That population is estimated at 30,000, 40,000, and even 50,000 souls. Persons who are in the best position to judge of the number of these Indians, such as the Catholic and Their number.

Protestant missionaries, gave me to understand, however, that that population would not at the present time amount to the highest of those figures. I conclude, therefore, that from 35,000 to 40,000 is probably the more exact number. However, the Hon. Chief Justice Matthew Baillie Begbie appears to think that for some years they have diminished in number. In a memorandum which he was obliging enough to prepare for me, the Honorable Judge gives most interesting details respecting the Indian tribes; and although I was able to verify by personal observation a number of the facts which he records, I prefer not to state them here myself, but to transcribe his memorandum in full in the body of this Report itself, in order that the information which I have to offer may be given in as complete a manner as possible. The following is his memorandum :---

MEMORANDUM BY CHIEF JUSTICE BEGDIE.

" Indian tribes are found everywhere, all over the Province. The main in all parts of " divisions, in one sense, may be taken to be the coast Indians, and the inland "tribes. On Vancouver Island, I apprehend they are all coast Indians. "There are apparently no interior parts fit for settlement by Indians. They " may and do go inland for hunting deer, and lake fishing ; but in most parts, " the deer are to be found in sufficient quantity not far from the sea; and the " sea fishing is much superior in quantity and nutritive quality to the lake " fishing. On the mainland the conditions are reversed in great measure. "The upper country is far superior for settlement and hunting purposes to " the coast, and the large rivers abound with salmon, which run up to the " Rocky Mountains. The lakes also afford abundant food during the season " when the salmon are not running, and the wild berries which grow in great "profusion and excellence are (especially the 'service berry') a staple " article of food, being dried and stored for food and trade.

> "I cannot judge at all, of my own authority, of the number of the coast " Indians. To the north of British Columbia, they are said to be in consider-"able numbers. In the parts of the Province, of which I have any per-" sonal knowledge, the Indians are exceedingly sparse, and annually diminish-"ing (this includes all the country east of Fraser River). I should guess-" but it is a more guess, that there are not 5,000 in the vast triangle between "New Westminster, Kootenay, and Cariboo-400 miles from east to " west, and 350 miles from North to South. But it is proper to state that " in a recent report to the Bishop of the Diocese (Anglican), the Rev. J. B. "Good says, (Lytton, 3rd May, 1870): 'I estimate the number of the dis-" ' ciples at large [Anglicans, at Lytton] young and old to be at least 2,000, " ' Mr. Holmes having under him, in the Yale district, nearly as many more." "Yale and Lytton are fifty-seven miles apart. The latter attracts probably " Indians from Lillouet, Nichola, and even from the Okanagan. Yale probably "collects Indians on the Fraser River for thirty or forty miles downwards. " But at least half of the Fraser River native population lies below that, and " is probably attracted wholly by the Roman Catholic missions at St. Mary's, " and at New Westminster; and there are two other thriving Roman " Catholic missions, one on the east side of Okanagan Lake, and one to the "north, near William's Lake. I should really think that these four stations " influence as many disciples, as the two central Anglican stations; but I " should be surprised if the four claimed 4,000 disciples. Mr. Good's whole " report, however, is not before me, and it may not be intended to bear the "sense here put. This is nevertheless the idea conveyed in the pamphlet " from which I quote, which states 4,000 Indians under instruction.

> "Referring to the continual entries in an old journal of the Hudson's " Bay Company, preserved at Fort Langley, from the foundation of that first

Indians found the Province.

Probable numbers of coast and interior Indians,

"fort on the Lower Fraser River, in 1826-7, one would suppose that the " coast Indians, tempted to frequent the Fraser for fishing, or for war, were " at least three times as numerous fifty or sixty years ago as they are now. " In the interior, whole tribal families have disappeared within the last few " years, and it is probable that in certain districts e.g., Lillouet and Okanagan, "not one tenth, perhaps even not one twentieth, survive. In 1846, Mr. "A. C. Anderson of the Hudson's Bay Company, advised against the Lillouet-" Douglas Route for the Hudson's Bay Company's brigades, on account of the " very great number of Indians they would have to pass through, estimating " the number, at and about the Fountains (8 miles from Lillouet), at 4000 to 5000. I have never seen (1858-69) on the greatest occasions at Lillouet " more than 400 or 500-many of whom had come forty or fifty miles-some " 100 miles.

" One tribal family of about sixty individuals on Canoe Creek was, in Causes of "1862 or 1863, entirely destroyed by small-pox, with the exception of a single decline in "man. In the same epidemic, the Williams Lake families were reduced Indians. " from 200 to below 100 individuals. Their wars are occasionally equally de-"structive. On more than one successful onslaught, every man has been "killed, and only the unwounded women and children preserved as slaves-" almost always, every man the victors could reach, was killed. At Comox, " several years ago, on such an occasion, every man, woman and child was "killed, except one woman, who fled to the bush. She was enceinte, and her " child, a son, still survives ; I have seen him. Of course his tribe was ex-"tinguished. They rear small families and the children often die. Accidents "do much in such small adventurous societies; private quarrels do much; " whisky and dissipation wear them to an early death, and sap the powers of "reproduction; but the great devastators have been their cruel tribal wars, " and, much worse, small-pox and measles. Vaccination has made a stand to " secure them against the former; but measles are nearly as deadly, and even " vaccination is as severe a malady with them as measles among Europeans. " Eruptive disorders seem to overpower their constitutions. Wars have im-"mensely diminished of late; there are deadly private quarrels; few tribal " war expeditions. Indeed, I don't remember to have known of one.

"The habits of the Indians are exceedingly simple; probably such as The Indians' "are common to almost all societies in a low degree of organization. They system of " appear to live very much on the " village community " system, as described government. " in "Mayne's Ancient Law," at least as regards land and its produce, and " their fishing grounds. The chiefs owe their pre-eminence partly to birth " or family connections, partly to personal attributes and the choice of the " tribal family or tribe. The chiefs appear to acquire their predominance of " wealth by voluntary contributions, or " benevolences," from those who ad-" mit their authority, offered sometimes from fear, sometimes from flattery, "sometimes perhaps from motives of attachment. They preserve their influence " by measures of recklessness and severity, or of wisdom, but principally perhaps " by the generosity or lavishness with which they re-distribute the wealth "they have acquired; in fact all this part of their polity very much "resembles that of the Plantagenet Kings of England.

"The houses of the coast Indians are more roomy and substantial, being Dwellings of "a sort of one story card castle (only firmly fastened), of axe-hewn lumber, Coast Indiana. " divided into several compartments, of which one is occupied by each family. "In the interior, the houses, or wigwams, are made of skins more or less "dressed, old tent cloths, mats, &c. In severe weather, they take shelter " in underground houses-circular pits, from 20 to 40 feet in diameter, and "8 or 10 feet deep, covered over with a substantial earthed roof, with a 3 "feet circular aperture in the centre, which is the only ingress for the inhabi-" tants and provisions, and the only ogress for the inhabitants and the smoke,

10 - 4

" I don't believe anything else leaves the cave until it is finally abandoned in "the spring. It may be imagined what havoc measles or small-pox will " cause in such a pit. I do not remember any of these pits nearer the sea "than at Hope. I have known at least one Indian, however, (St. Paul, near " Kamloops, died 1867), who lived in a comfortable squared-log house, with "three or four rooms, cows, chickens, pigs, and a decent garden; living in "infinitely more comfort and pretensions than the officers of the Hudson " Bay Company, in their fort, on the opposite side of the Thompson River. " Like most savages, they possess enormous powers of appetite, and enormous " powers of abstinence from food.

" Everywhere, almost, the Indians have great skill in the manufacture Indians' `skill in boat-build " and management of canoes. Those on the coast and the lower Fraser are ing and man " perfect models of naval architecture on the wave-line principle. On the "Columbia, they are built of the bark of the white pine, with the most "modern bow, viz. :--on the identical principle of 'Griffith's Patent,' only " with a similar projecting snout at the stern.

" Polygamy prevails among them, as among most non-Christian people. " limited only by considerations of finance.

" Alone among all intelligent savages of whom I have read, (for there want of relig- " is no doubt these are very intelligent, and with vast hatural power of obser-" vation.) they seem to have no religion whatever, nor any idea of any God, "except what has been imported. They have, however, some notion of " spirits, restricted, I think, almost entirely to spirits of dead men, though "there is one much spoken of, 'Shay,' or wind spirit, supposed to haunt a " certain point on Harrison Lake. I have never heard of an Indian language " which possessed in its vocabulary a word expressive of an abstract idea.

" Slavery is universally known; among tribes under European influence " it is much retrograding. Slaves were almost all derived from wars; and, "since wars have died out, the source of slavery is stopped. They are all " of course devoted to whiskey, and to gambling. As a logical consequence " from the absence of all indigenous religion, there are no indigenous forms " of cursing and swearing. The natives have very readily adopted the habit, " but they use, to our disgrace, none but English oaths and terms of abuse. " Of these, of course, they have first learnt, and best remember, the lowest " and the most obscene. Many of the northern Indians display considerable " aptitude for carving, and others for handling metals. The astonishing "accuracy of their eye may be seen in any canoe, for which they "never have a model, nor do they ever ensure accuracy by a single " measurement.

Compacts tion.

"I am not aware of any treaty having been made with any tribe on with Indians; "the mainland. I believe that some sort of arrangement, as binding in what they have " honor as a treaty, has been made at different times, with different tribes in been and what " honor as a treaty, has been made at unitor times, with unitor in these is could be done " Vancouver Island. I am not aware that it has been reduced to writing; I in that direc "believe it has generally (where it exists) been in the form of a declaration " of intentions by the local government.

"Reserves have been laid out both here and on the mainland, in the " vicinity of tribal families, of land reserved for their use; but I am not "aware of anything in the nature of a treaty. No general treaty would be " possible, for there are a vast number of tribes, mutually more jealous and " unintelligible than are the whites to them.

"They are in that state of powerlessness and respect for the superior " power, numbers, and acquirements of the governing race, that any arrange-"ments which that race would, consistently with self-respect and humanity, " think proper, would readily be adopted by the native.

Their anxiety

"Their chief anxiety always is about their reserves of land which, perserves of land. " haps necessarily, have not always been made in accordance with their 26

agement.

Polygamy.

The Indians'

Slavery.

"wishes. The manner in which they hold and occupy land (village com-" munities frequently occupying and cultivating irregularly detached plots) " is a tenure scarcely intelligible to English notions of property in land at "all; and they have an affection for particular little bits of land, (which " seems a feeling common to humanity, savage or civilized), which, probably, " is exceedingly inconvenient to a surveyor, and is not always, in our view, "very reasonable. It is, in fact, prejudice.

"What would probably be most useful for them, and tend to preserve Suggestions "the numbers and improve the position of these very valuable inhabitants of for improving "the Province, would be to teach them settled habits, and, above all, agricul- Indians. "ture. Mr. Duncan, at Metlahkatlah, seems one of the most successful of " all who have attempted this; but he is a man of rare gifts.

"I call the Indians very valuable inhabitants, because, 1st-they are Value of In-"admirably adapted for opening up a difficult country. Without them, it dians as inhab-" may be said, the country could not have been entered nor supplied in 1858- country. "60. Until roads were made, no supplies were taken in except by Indians. " 2nd-they are large consumers, in proportion to their means, of customable "articles. 3rd-they are our best tools for obtaining one great product of " the country-furs.

"But these qualities are exactly those which make it very difficult to Difficulty of " But these quanties are exactly those which make to equire our stores of bringing "civilize them. The Indian admires and desires to acquire our stores of Indians to "knowledge and our means of wealth, and quite appreciates our comforts, conform to "both of clothes, and food, and dwellings. But his inborn capacity for habits of "enduring hardships, i. e., for enabling him to do without our novelties, the civilized whites. " very qualities which render him so useful as a pioneer or hunter, make him "tire of steady industry, and less influenced by its results. Accordingly, "after years of cultivation, he constantly relapses, for a time at least, into a " painted savage, and goes hunting and fishing-or starving-as a relaxation. "These influences will, no doubt, prove to be hereditary, but there is more " hope with the next generation than with this.

"It might be possible to establish, under adequate superintendence, small In reference "establishments to which any Indians might have access for one or more to the establishment " year or years, and where, during residence, they might be trained in speak- of training "ing English, and in useful labor, receiving at the end of the year their due schools for "share, according to such a scale as might be established, of the surplus Indians. " profit, after maintaining the establishment; or even, if no net profit was "made, receiving something. It might not be deemed necessary that these "establishments should be self supporting entirely. They should be limited " to receive only a certain number, so that the Indians might perceive admis-"sion to be a favor. They should be bound for a fixed period, but not for too "long,-say one year, subject to re-engagement. Whatever the method to be " adopted, it should be under the superintendence of a practical man, not too " lavish, and cautiously gradual.

"There has never, since 1858, been any trouble with Indians except Troubles with "once, in 1864, known as the year of the Chilcotin Expedition. In that Indians. " case, some white men had, under color of the pre-emption act, taken posses- have been. "sion of some Indian lands (not, I believe, reserved as such,-the whole "matter arose on the west of Fraser River, where no magistrate or white "camping place, and including a much-valued spring of water), and even "after this, continued to treat the natives with great contumely, and breach of "faith. The natives were few in number, but very warlike and great hunters. "They had no idea of the number of the whites, whom they had not seen. "They shot down every white whom they did see, twenty-one I think, "including a trail party of Mr. Waddington's-one or two escaped their "notice. Six Indians were induced to surrender, and were hung. The

itants of the

Improbability

" expense to the colony was inordinate. Except in such cases, which cannot "affect the progress of society for good or evil, no trouble is to be appre-" hended. Occasional isolated murders will be committed, and the arrest of

" the murderers will be difficult and expensive.

" But for any general danger, the scattered position of the tribes, their of danger from " thinness of population, their mutual enmity-even now, there is nothing "better, among strange tribes, than an armed peace-and their variety of " languages, making union for a common purpose impossible,-these consid-"erations alone, make any danger from them inconsiderable, even if they "were as hostile to the Government and to the authorities, as they are, in " general, exceedingly well disposed.

"Victoria, 5th September, 1871."

THEIR TREATMENT, PRESENT AND FUTURE.

Treatment of the Indians.

To complete the information as to the manner in which the Indians are treated, and also with a view to aid in deciding upon a plan for their future treatment, I beg to refer Your Excellency to Appendix AA, which is a memorandum prepared in January, 1870, by His Honor Lieutenant Governor Trutch, then Commissioner of Lands and Works of Columbia, and to Appendix BB, which is a letter addressed to me by His Lordship Bishop d'Herbomez, Vicar Apostolic of British Columbia. Your Excellency will observe, by the former document, what has been the treatment of the Indians by the Government of the Province, and by the second as well as by the first, what are the suggestions which are offered as to their protection and treatment in the future. I do not here, myself, express any opinion on this subject, preferring to leave to my colleague, who is more especially charged with the protection of the Indians, the initiation of the measures to be taken in regard thereto.

INDIANS AN IMPORTANT POPULATION.

Importance of the Indians.

Their character.

The Indians, as the Chief Justice has remarked, have been, and still are, and will long continue, an important population for Columbia, in the capacity of guides, porters, and laborers. They have learned, at least in the southern parts, and in those places which are inhabited by the whites, to regard authority with respect and fear. To them, the person of the British subject-"King George Man" -as they call him. is sacred, but such is not the case with the American from the United States. For one reason or for another, whether because they believe that the Indian races have been illtreated in the American Union, or because they are impelled by some other motive, the Indians of Columbia are not partial to Americans. They do not however attack them, for they know that the arm of the law would be able to reach them even in the depths of their forests.

The Indians, throughout the whole of that part of Columbia which I visited, are faithful and trustworthy. If you entrust a message or a letter to them, you may be certain that they will at once convey it to its destination. They are not equally industrious. In the hunting or fishing seasons, however, they are seen to work---the men in laying up a stock of meat, fish, furs, &c.; and the women in gathering fruits, which they dry These provisions are stored by the Indians, 30, 40, and 50 feet above the ground, in the tops of trees, where they construct a description of storehouse, the sanctity of which is invariably respected.

THEIR PROGRESS TOWARDS CIVILIZATION.

Some tribes have been induced to collect together in villages, and Civilization of progress has in this way been made toward their civilization. Mr. Begbie the Indians. speaks of the establishment founded by Mr. Duncan at Metlahkatlah, and which I regret not to have been able to visit, being situated in the north of Columbia, where I was not able to go. But I saw at Victoria, the Convent of the Ladies of St. Anne, where a number of young female Indians and halfbreeds receive an education which is as solid and as complete, as is obtainable in many establishments of the same class in other parts of Canada. I also remarked that at St. Mary, on the Fraser, between New Westminster and Yale, there was an important establishment founded by His Lordship Bishop d'Herbomez, comprising a college and a convent for young Indians and halfbreeds, male and female. It was on the day of the re-opening of the classes, and it was a pleasant thing to see hundreds of canoes and pirogues, manned by Indians who came from a distance of 100 and even 200 miles to bring their children to these educational establishments. They now appreciate the advantages which their children derive from the education which they receive. I was also not astonished to learn that at the periods of missions more than 2,000 would be assembled together at one time. There is also at Caowchan a convent founded by the Rev. Mr. Rondeau, of Montreal, and intended for the education of young female Indians and half-breeds. As in the case of the Victoria and St. Mary Convents, education is here also imparted to the young girls by the Sisters of St. Anne.

On the other hand in certain other villages, for instance near Nanaïmo, where in one are found the Nanaïmos, in another the Euclatores, and on the main land the Scychelles, but a very small number of the Indians are Christians, and their morals are excessively lax. They sell their wives and daughters to the first comer. In Barclay Sound and its vicinity are found the Opitsiishahts, the Sishahts, the Ohiahts, the Ucluclets, the Toquahts, and the Aiichuklesetts. In appearance they do not differ from the other Indians of the south of Columbia, but they are idolaters, practice polygamy and only abstain from thieving when there is nothing to their taste.

INDIAN TOMBS.

The Indians appear to hold their dead in great respect. They erect Tombs of tombs, which generally consist of a wooden pent-house, under which is a cance the Indians, containing the ashes of the deceased. The cance contains, in addition, cooking utensils, &c., and carved on wood may be seen rude representations of Indians with paddles, &c. Above the pent-house, floating in the wind are standards in the case of a chief; and if the deceased has been a great warrior, guns are hung upon it; if he has been a great hunter, the skins of wild animals are placed there; and if he has been an expert horseman, the skins of two or three horses bear testimony to his prowess. These tombs are placed at some distance from the main road, often upon an eminence; they are respected by all.

COSTUME AND APPEARANCE OF THE INDIANS.

The Indians whom I saw, and they were many, were generally well Costume. clothed. They must, as has been said, contribute largely to the public revenue by their purchases of merchandise, such as cloth, blankets, &c. When they set out to engage in fishing they are less particular about their dress. I saw numbers without any clothes at all, handling their paddles with great dexterity, and seeming to believe that clothes impeded their movements, and were injurious to the success of their fishery.

The Indians of the south of Columbia are generally of a dark tint. They of the Indians. wear their hair long, and do not appear to be particularly clean. In this they differ from the northern Indians, whom I saw when going to Seymour's Nar-The latter are of a clear tint, and are larger, stronger and more cleanly; rows. in short they are a fine race.

> The Indians of the lower Fraser, and those of Vancouver Island, move about either in canoes or on foot. Those of the interior, on the main land, travel on horseback, and in many cases raise horses, either for sale, or to carry merchandise from Yale to the mouth of the Quesnel, or to Barkerville.

INDIAN RESERVES.

The Indian tribes do not appear to receive any presents from the Government of Columbia. The Government has, however, established reserves of land for their benefit; some of these reserves are well situated, and might, if sold, produce an important fund for certain tribes. And there can be no doubt that, as several of these reserves are situated in the immediate vicinity of Victoria, and of other centres of white population, it would be for the advantage of the Indians that those reserves should be sold, and that they should be removed to a distance from the towns, and induced to devote themselves to agriculture and to certain manufacturing arts.

I understood that there was in the Bank of British Columbia a sum of \$1,984 belonging of right to the tribe of the Songhees, opposite Victoria. It was the produce of certain leases, which the Government conceded to white men, of a part of the reserve belonging to that tribe. Except in special cases, such as that just mentioned, the whites cannot settle on the lands of the Indians. They are forbidden to do so by proclamations, acts and ordinances respecting the public lands.

SALE OF LIQUOR TO THE INDIANS.

The whites are also forbidden to sell intoxicating liquors to the Indians, but unfortunately illicit traffic in this respect is carried on upon a large scale. From cases that have come to light it is known that schooners and large From Victoria the vessel canoes are engaged in this nefarious business. proceeds to the upper part of the country, in the northern portion of the Gulf of Georgia, in order to be less liable to detection, and there confederates, either whites or Indians, are at hand to take charge of the casks of brandy or whiskey and convey them to the places where the Indians are encamped. The stipendiary magistrates inflict severe punishment whenever a trader is caught in the act, but unfortunately many of the guilty escape. This subject will not fail, I am certain, to receive the special attention of the Indian Department.

INDIAN LANGUAGES.

Before concluding this chapter in relation to the Indians, I must add a few words respecting their languages or dialects, which are very numerous. I need not say that during the five weeks that I passed in Columbia it was not possible for me to study these, so as to be able to speak of them from personal knowledge. I was, nevertheless, enabled to ascertain, from conversation with educated men, who have passed several years in British Columbia, and especially with Gilbert Malcolm Sproat, Esq., that their languages are

Appearance

Indian reserves.

Money belonging to the Indians.

Sale of intoxicating liquors.

Indian languages.

A./1872

difficult and as numerous as their tribes. In addition to all these, from the moment the whites arrived in British Columbia, another medium of conversation was established, partly French, partly English, and partly Indian. This singular tongue, which is called the "Chinook jargon," has as its basis, Chinook besides the English and French languages, the language of the Haidahs language or (Northern Indians), which includes the Hygany, Massett, Skittgetts, Hanega, and Cumshewas tribes, and the language of the Chiheelis and Chinooks, who are southern Indians. The jargon is the language of commerce, and a knowledge of it is indispensable to all who trade with the Indians, or have dealings with them. And as our territory now extends to the Pacific, I consider it expedient to give with this report a dictionary of this Chinook jargon, which will be of use to those who go to Columbia, and Is interesting as showing what transformations the Indian, English, and French languages have undergone on the Pacific Coast in consequence of the relations of the whites with the Indians. That dictionary constitutes Appendix CC.

MR. SPROAT'S WORK ON THE INDIANS.

I cannot leave the subject of the Indians without calling Your Excellency's Mr. Sproat's attention to a work published by Mr. Gilbert Malcolm Sproat, which I have work on the already quoted. The title of this work, which is published by Smith, Indians. Elder & Co., of London, England, is "Scenes and Studies of Savage Life;" and although it does not treat of all the Indian tribes, as far as those of Vancouver Island are concerned, it gives in elegant language and in a highly interesting manner, valuable details as to their mode of life, their intelligence, industry, language, &c. These details are the more important from being the result of observations made by Mr. Sproat in the course of several years which he passed in the midst of the Indians, and from their being communicated by one who was perfectly in position to bring to bear a sound judgment in such matters.

TREATIES WITH THE INDIANS.

Appendix DD. contains two treaties with Indian tribes which are Treaties with given as specimens of the treaties which have been made with the Indians on the Indians. Vancouver Island. It does not appear that any have been made with the Indians of the main land. Appendix EE. is a list of all the treaties which have been made.

PUBLIC WORKS.

I now pass on to the public works, buildings, and undertakings of Public works Columbia.

They comprise:

- 1. Lighthouses and buoys.
- 2. A dredge and a steamer.
- 3. Post offices.
- 4. Custom houses.
- 5. The Mint.
- 6. A Marine Hospital.
- 7. Court houses and jails.
- 8. A Penitentiary.
- 9. Legislative buildings.
- 10. Departmental buildings.
- 11. Governors' residences.
- 12. A telegraph line.

- 13. Harbors.
- 14. A graving dock.
- 15. Improvement of the navigation of the Fraser.
- 16. The great Cariboo Road.
- 17. The Pacific Railway.
- 18. The conveyance of the mails.

LIGHTHOUSES AND BUOYS.

Lighthouses.

The lighthouses are three in number, two fixed and one floating. The two fixed lights are those of Race Rock and Fisgard. The floating light is that at the mouth of the Fraser River.

RACE ROCK LIGHT.

Race Rock Lighthouse.

Race Rock lighthouse is nine miles from Esquimalt Harbor, and is situated on nearly the extreme southern point of Vancouver Island, in the Strait of St. Juan de Fuca. This lighthouse, which was built in 1861, is provided with a second dioptric light. It is about 118 feet above the level of the sea. It shows a white revolving light, appearing every ten seconds, and may be seen, in clear weather, from a distance of twenty-five miles. It is built of stone upon a little island about 300 yards across. It is painted black and white, in horizontal bands. It contains an alarm bell for use in fogs. The lighthouse is solid, but needs some repairs ; on the outside the joints of the stone require pointing, and the keeper's residence also needs repair. A new lightning conductor should be put up, and the apparatus of the light and of the alarm bell both require improvement. At this lighthouse there are a principal keeper (Mr. Argyle), two assistants, and the keeper's wife.

FISGARD LIGHT.

Fisgard Light-Fisgard lighthouse is situated on the western point of the entrance to house. Esquimalt Harbor, which is three miles from Victoria. It was built in 1860, and is white; the light is a stationary one, of the fourth class, and in clear weather may be seen from a distance of ten miles. It is seventy feet above the level of the sea. The lighthouse, which is of brick, requires repair on the outside. The joints will have to be pointed, and the whole painted. The stairs leading from the water's edge to the lighthouse should be entirely rebuilt. A keeper (Mr. Bevis) and his wife reside here; this keeper was appointed in March, 1861; he is intelligent and industrious. He should be provided with a good self-indicating thermometer to continue the tables, which he keeps with great care.

FRASER RIVER LIGHT.

Fraser River

The Fraser River floating light is situated at the mouth of that river. foating light It was constructed in 1865. It has a fixed white light, which can be dis-cerned in clear weather from a distance of fifteen miles. The light is about forty feet above the level of the sea, and is composed of eight lamps. It is useful not only for craft entering the Fraser River, but also for vessels sailing along a part of the eastern coast of Vancouver Island. This light stood in need of some slight repairs at the time I was in Columbia. It is attended by a chief keeper, three assistants, and the keeper's wife, who prepares meals for all.

LIGHTHOUSES ASKED FOR.

In addition to the foregoing, it has been suggested that lighthouses should be constructed at the following points, viz. :--

This Lighthouse at 1. At Cape Beale on the western coast of Vancouver Island. lighthouse, which should be provided with a first class light and powerful Cape Beale. fog whistle, would serve in the first place as a guide to navigators desirous of entering the Strait of Fuca, and prevent their being cast away on the coast; it would also serve to mark the entrance to Barclay Sound, which is a very deep harbor, and which, I have not the slightest doubt, will hereafter become one of the most important places on the Island. Indeed, from its outlet as far as the head of the Alberni Canal, for a distance of thirty-five miles Barclay Sound is navigable. It almost entirely crosses the whole breadth of Vancouver, being at its head only fourteen miles from the eastern coast of the island. Some years ago, considerable lumbering operations were carried on there, and so far as scenery is concerned, few parts of the world can present anything more worthy of observation.

2. A lighthouse with a fourth class light at the entrance of Victoria Lighthouse at Harbor; that harbor being difficult of access in the night time, and being also the Harbor of Victoria. the principal port of entry in the Province.

3. On Lighthouse or Entrance Island, outside the entrance to Nanaïmo Lighthouse Harbor on the eastern side of Vancouver Island. The light placed here near Nanaimo. should be visible at a distance of fifteen miles. This lighthouse would be extremely useful, for at present navigators cannot enter that port during the night, and are compelled to anchor. This is the port resorted to in order to obtain coal from the two mines of which I have already spoken. Now, apart from the floating light at the entrance of the Fraser, there is no light, except the American lighthouse at Smith's Island, which is only of use to vessels navigating American waters. This new lighthouse would also serve to guide vessels crossing the Gulf of Georgia, and going to the east coast of Vancouver Island, towards the Fraser, or vice versa.

On this subject Captain Richards of the Royal Navy says :---

"Either Lighthouse or Entrance Island offers a good site for a lighthouse, " which will soon be required at Nanaïmo ; but perhaps under all the circum-"stances, Entrance Island is the more eligible, as it would show a vessel her " position in the Strait of Georgia, and serve to clear that dangerous shoal, "the Gabriola Reef; by far the greater amount of traffic also would always " be from the southward and eastward ; a light in this position would lead a " vessel through Fairway Channel, until the south point of Protection Island " opened out, where a small harbor light would enable a vessel at night to "take up a berth within the entrance, instead of remaining outside, where " the water is too deep for anchorage."

4. A lighthouse, of minor importance, on Turn Point, Stewart's Lighthouse on Stewart's Island, would complete the lighting of the coast from Victoria to Nanaïmo.

5. At Point Gray, at the entrance to the Harbor of Burrard Inlet, Lighthouse at on the main land. This harbor is that most resorted to by vessels loading Burrard Inlet. with lumber. It is a magnificent harbor, but one which, without a light at its entrance, can only be entered by vessels during the day-time. The light should be visible from a distance of at least fifteen miles, and would tend, together with the floating light at the mouth of the Fraser and that on Lighthouse Island, near Nanaimo, to make the navigation of the Gulf of Georgia much safer.

Reserves for lighthouses in various places have been set apart by the Reserves for Government of Columbia. I hope to be able to give a list of these in the Lighthouses. Appendices to this Report.

BUOYS.

Besides the lighthouses which I have mentioned, there are at Victoria, Buoya. at Nanaimo, and on the Fraser River, a number of buoys, which require 33

10 - 5

Island.

Those on the Fraser River are specially liable to change constant attention. their position, and this year they had to be repaired and restored to their respective places, complaints being preferred by the trade that they no longer indicated either the channel or the rocks.

Names, &c. of In Appendix FF are given the names, rank, ages, salaries, and dates of keepers of ex- appointment, of the persons employed at the existing lighthouses. houses.

DREDGE.

Dredge.

Steamer "Sir James Doug-

las."

I visited the dredge which is lying in the Harbor of Victoria, and has become the property of Canada. It is strong, and in good condition. It has not been used for several years, and consequently will require to be thoroughly overhauled before being employed again ; an expenditure of from \$6,000 to \$7,000 will probably be necessary. I shall not here enter upon the history of this machine. I procured from the Government of the Province ample details respecting this dredge, which will be found in Appendix GG. By it, Your Excellency will perceive that the dredge with its four lighters or scows, and the steamer "Sir James Douglas," which belongs to Canada, cost \$92,000. The lighters or scows are considered to be too large and clumsy. and it is suggested that four smaller ones should be substituted for them; these would cost about \$2,000. The Honorable Mr. Pearse estimates the annual outlay entailed by this machine and the steamer "Sir James Douglas," at \$24,000. For my part I am satisfied that that outlay could be greatly diminished by allowing the steamer "Sir James Douglas" to continue in her present service, and by making use of a small tug when required.

STEAMER "SIR JAMES DOUGLAS,"

The steamer "Sir James Douglas" performs the postal service between Victoria, Nanaïmo and Comox, and serves the intermediate ports. She has a nominal strength of 40 horse-power; she measures a little more than 153 tons, 110 feet keel, and 18 feet 8 inches beam. She is built of wood with copper bolts and iron knees. She is very strong, and may be considered equal to the service of the inner waters of Columbia, but could never be used for service on the Pacific ; her speed is from 8 to 9 knots an hour. She is commanded by Captain William Clarke, an excellent sailor, highly deserving of the confidence which is reposed in him. He has under his command an engineer, two firemen, three other sailors and an Indian. The vessel carries passengers and freight. The receipts and expenditure during the last six years have been :---

> Receipts \$76,756 Expenditure 74,540

In the amount credited to receipts is included a sum of \$4,200, which was the consideration demanded by the proprietor of an inferior steam vessel for the transportation of the mails. The expenditure does not comprise the amount of the interest on the cost of the vessel, nor her annual deteriora-Appendix HH contains fuller details respecting this steamer, which tion. is also made use of to convey supplies to Race Rock Lighthouse.

POST OFFICES AND CUSTOM HOUSES.

The post offices and custom houses belonging to Canada in Columbia Post Offices and Custom are situated at Victoria, and at New Westminster.

BUILDING AT VICTORIA.

At Victoria.

Houses.

The building in which the post office and custom house at Victoria are located is a wretched wooden one, entirely unfit for the purposes to Sessional Papers (No. 10.)

which it is devoted. The lot on which it is situated is 90 feet by 67, and belongs to the Government. It will be necessary to erect a suitable building, proportionate not only to the present, but also to the future requirements of the capital of the Province.

Building at New Westminster.

The corresponding building at New Westminster is sufficient for the At New Westrequirements of that section. It requires some slight repairs, which will minster. make it still more fit for the purposes to which it is applied.

THE MINT AND ASSAY OFFICE.

Some years ago a Mint was established at New Westminster. All the The Mint. necessary machinery or apparatus was imported by the Government of Columbia and put in operation ; the total cost being \$8,609. Some gold pieces were then coined; of these I saw two of the denomination of \$10, and two of \$20, each. The establishment was very soon closed, as it was found that it did not pay expenses. The machinery or apparatus is however carefully preserved. It appeared to me to be in very good order. It is under the care of Mr. Claudet, who has also charge of the Gold Assaying Office at New Assaying Westminster, of which there is a branch at Barkerville in the District Office. of Cariboo. If the mines of Cariboo and of the District of Ominica continue to yield as rich results as is expected; and if, as is generally believed, the gold-bearing region on the eastern side of the Rocky Mountains is as rich and extensive as it is said to be, the question will arise whether it would not be for the interest of Canada to strike coin instead of allowing all that gold dust to be exported to San Francisco, there to swell the United States currency.

Appendix YY contains further information in regard to these buildings.

MARINE HOSPITAL.

There is no Marine Hospital in Columbia; but one of the conditions of Marine Hos the Act uniting that Province with Canada, is that there shall be one located pital. at Victoria. Such an establishment is absolutely necessary. Hitherto, sick seamen have been received into the Royal Hospital at Victoria, and into that at New Westminster, which are purely local hospitals, intended for the necessities of the inhabitants of Victoria and of New Westminster and their vicinity. The outlay occasioned by the attendance which it is necessary to bestow upon sick sailors, is considerable, and should, as soon as possible, cease to be at the cost of the Province.

COURT HOUSES.

I visited the principal court-houses of Columbia, and satisfied myself that Courts of they are sufficient for the requirements of the Province. At Victoria, the Justice. courts are held in one of the public buildings, of which I shall shortly speak. The building is partly of brick and partly of wood. Some trifling additions, chargeable to the provincial treasury, will obviate the necessity of a new building for a number of years. At New Westminster and at Nanaïmo the buildings used for the same purpose, without being models of architecture, are sufficient for the present.

JAILS.

Jails.

The Jails of Victoria and New Westminster, as well as the local Jails of Nanaïmo and Yale, appear to have been built with care, the three former of wood and that at Yale of stone. These jails, without being, as secure or as strongly built as those in certain other Provinces of the Confederation, do not appear to allow of the escape of the delinquents confined in them more frequently than is the case in the older Provinces. They are managed with care and economy, and presented, at the time of my visit, an appearance of remarkable cleanliness.

PENITENTIARY.

Penitentiary.

There is no Penitentiary in Columbia; but in virtue of the Act for the union of that Province with Canada, the latter took upon herself the erection of one. At the present time, prisoners who have been condemned to imprisonment with hard labor are confined in the jails of Victoria and New Westminster, and during the day they are chained and employed, at New Westminster and its vicinity, in working on the streets and highways, and at Victoria in improving the property on which the residence of the Lieutenant Governor is situated. At one time it was the practice for them to work also on the streets of Victoria, but public sentiment was opposed to it, and has been respected by the Government, which has ceased to employ them in that manner.

The accommodation afforded by the present jails is becoming too scanty even to contain the prisoners, much more to admit of their being put to any occupation within the prison walls. If prisoners sentenced to more than two years' confinement could, as in the other Provinces, be sent to a penitentiary, the existing jails might suffice for delinquents sentenced to a shorter term of imprisonment; and the punishment would be regarded by the convicts, when they were aware that they would be sent to the penitentiary, as more severe, and it would, moreover, be possible in such an institution to classify and reform them.

The question now is, at what place the penitentiary should be erected. For my part, I have no hesitation in recommending New Westminster as the most suitable site. There is there, at what is called the Camp, some few minutes' walk from the centre of the town, and on the bank of the Fraser River, a considerable piece of land, which is public property, and which is, in my opinion, the most desirable site. Prisoners from Victoria might easily, and in a few hours, be conveyed thither by steamer, and those from the mainland could be brought from the interior, by the Cariboo road, as far as Yale, and thence by steamer to New Westminster. Should the land on that side of the Fraser not be sufficient, there is, on the other side of the river, immediately opposite, another very large reserve, which might be utilized for convict labor.

LEGISLATIVE BUILDING.

Legislative Building.

Site of the

Penitentiary.

The Legislative building, though not a palace, is a very good edifice of brick and wood, sufficient for the requirements of the local Legislature. It is situated at Victoria, close to the centre of business; and upon the same lot of land, which is about seven acres in extent, are the buildings for the use of the law courts, and for the offices of the Lieutenant-Governor and the public departments of the Province. All these buildings and this land are evidently necessary for the Government and Legislature of Columbia, and an Order in Council should hereafter, in conformity with the Act of Confederation, formally appropriate them for those purposes, similar action being also taken in respect to court-houses and jails.

Governors' Residences.

There are two Governor's residences in Columbia, that at Victoria and Governors' that at New Westminster. This is to be attributed to the fact that, at no very Residences. remote period, the present Province constituted two distinct colonies, with separate governments. Those two colonies having been merged some time previous to Confederation, into the existing Province of British Columbia, the seat of government of the new Province was fixed at Victoria, and the pleasant residence at New Westminster, which, through the splendid hospitality of certain Governors, had become highly popular, was abandoned and placed in charge of a keeper, William Loudon, who receives for his services \$40 a month.

This residence at New Westminster is of wood, and is in tolerably good Residence order. It might be utilized, as well as other wooden buildings which are in at New the vicinity, as a residence for the Director of Penitentiaries, if the penal Westminster. institution be erected at the Camp, which adjoins this property. The building contains most of the furniture used by the last Governor of the colony. The remainder was removed to Victoria when the seat of government of the new Province was fixed there.

The official residence of the present Lieutenant-Governor of British Residence Columbia is situated on an elevated site, in the immediate vicinity of Victoria. at Victoria. The edifice, which is spacious, is built partly of stone and partly of wood. It is in a tolerable state of repair, and is surrounded by large and beautiful gardens, the land attached to it being rather more than twenty-seven acres in extent. There is a ground-rent of ten pounds sterling on the property. The furniture in use by the last Governor of Columbia before Confederation remained in the residence, which was not, at the time of my departure from Columbia, occupied by His Honor the Lieuten int-Governor; it will, however, doubtless be so before long. The site, although the prospect is very fine, was not selected with a view to the present position of affairs. The upper portion of it is a rock, almost barren, upon which earth has been carted, which does not, however, everywhere conceal its arid nature. There is no water, which has therefore to be brought from considerable distances. Thus, the outlay of a Lieutenant-Governor there would necessarily be very large. This consideration was evidently not taken into account at the time when the Governor of the country had a high salary. Now that the salary only amounts to \$7,000, it follows that to enable the Lieutenant-Governor to reside there, he must be provided with a house easily supplied with water and fuel, and I have reason to believe that public opinion in Columbia tends in this direction. This property, like the others which I have already mentioned, should be transferred by Order in Council.

TELEGRAPH LINES.

By the Act completing the union of Columbia with Canada, the telegraph Telegraph lines of that Province became the property of the Dominion, and are a charge lines. upon it. These telegraph lines extend from Swinomish, in Washington Territory (United States) to Barkerville, at the extremity of the Cariboo Road. There is, besides, a branch from Matsqui to Burrard Inlet via New Westminster, in addition to a telegraphic right of way over the line belonging to the Western Union Telegraph Company, from Swinomish to Victoria, which comprises two submarine cables. This line of telegraph is 569 miles long, in addition to the submarine portion, which is Title

a mile and a quarter in length; it originally cost \$170,000. Besides this line, there is that from the mouth of the Quesnel to the Sabine, but the has not been kept up, and is abandoned.

The title, in virtue of which the Government of British Columbia held this line of telegraph, constitutes Appendix I I. of this Report.

This line of telegraph, nearly the whole of which I saw, appeared to me to be generally in good condition, only standing in need of ordinary current repairs; the instruments and batteries are good; the wire is No. 9 galvanized.

Your Excellency will observe by the title in Appendix I.I. that the line is under our control in virtue of a lease for 999 years, to which the Government may put an end by giving a month's notice. The telegraph line is a charge upon the Government, which has to maintain in a good state of repair, and at its own expense, the portion under water; and in consideration of this, all messages between Victoria and Swinomish are to be transmitted by the Western Union Company without charge.

The cost of the maintenance of this line from the 1st January, 1871, to the 1st July following, including salaries of superintendents, travelling expenses, wages of operators, and cost of repairs to the cables, was \$5,287, making the total for the year \$10,574.

On the other hand, the revenue during the same period was only \$2,394, or \$4,788 for the whole year. But the line to Barkerville having been opened only on the 15th July, and the receipts at that office up to the 25th August having been \$258, there is reason to believe that the revenue from the line will be considerably increased, while the additional expense will hardly be more than \$600. So that I conclude that the expenditure will be about \$11,250 a year, and the revenue about \$6,000. The revenue will, therefore, have to be supplemented by a vote of from \$5,000 to \$6,000, until such time as the revenue, in consequence of the opening up and peopling of the land, shall have increased.

TARIFF.

Tariff.

The tariff now in force on the line is as follows: Tariff of the Telegraph Line of Columbia.

Tarify of the Teter up Dine of Cotamona.														
	Victoria.	Seliome.	Matsqui.	New Westminster.	Burrard Inlet.	Chilukweyuk.	Hope.	Yale.	Lytton.	Spence's Bridge.	Clinton.	83-Mile House.	Soda Creek.	Quesnel.

Sessional Papers (No. 10.)

STAFF.

The following is a statement of the names of the telegraph operators, Telegraph and of their respective stations. I add to the list their ages, salaries Operators. and date of appointment, and I point out whether they are operators only, or whether it is their duty at the same time to see to the repairs of the line.

Stations.	Names of Operators.	Ages.	Monthly Salary.	Date of Appointment.	Remarks.
Sehome W. T Matsqui. New Westminster Burrard Inlet Chilukweyuk Hope Yale Jytton . Spence's Bridge. Clinton S3 Mile House Soda Creek Quesnel	F. H. Lamb, Supt. W. Larman. John Maclure. Geo. B. Murray J. K. Chambers J. G. Wirth John Nicholles. John Nicholles. J. R. Buie. J. R. Buie. J. S. Hughes. Murdo Ross. Henry Yeates. A. Barlow J. B. Leighton.	29 39 40 33 31 29 50 17 34 35 44 31 3 9 35 20	\$100 65 90 30 11. 40 30 40 nil. nil. nil. 25 40 80 30 80	1st June 1870. 1st Sept. ,, 1st Sept. 1871. 1st Oct. 1870. 1st Oct. ,, 1st May 1871. 1st June ,,	Operator & repairer ,,

The operators at Burrard Inlet, Lytton, and Spence's Bridge do not appear in this list as receiving any salary, and the following is the reason :---

The branch from New Westminister to Burrard Inlet, was built by Messrs. Moody and Co., for their use, the Western Union Company furnishing the materials and Messrs. Moody and Co. paying the cost of construction. That arrangement was then made, it would appear, because the other establishments engaged in the lumber business refused to contribute their share. Messrs. Moody and Co. pay the operator and have, I am told, a right to send their despatches over that branch without paying, the line nevertheless belonging to the Government. I am satisfied that arrangements might easily be made with that respectable firm for placing this part of the telegraphic system on the same footing as the principal line.

The operator at Lytton has the right of sending his own messages without charge, in consideration of which he performs the duties of operator without salary.

The operator at Spence's Bridge performs the duty, it would appear, as a relaxation and receives no pay.

Mr. Lamb, the superintendent is an American citizen. He is an able Superintenand very efficient officer, and has had great experience in telegraphy. He dent of the also acts as the superintendent of the American line from Victoria to Portland, ^{telegraph}. Washington Territory, and under an understanding with that company he divides his time and his services between that section of their line and the telegraph belonging to British Columbia, receiving \$100 a month for each of those lines.

Mr. Lamb's services are valuable, not only on account of his experience in the superintendence of a telegraph line, but also, and more especially, on account of his practical knowledge of the locality and of the method of constructing and repairing that line of telegraph. It would be desirable, however, that the time and services of the existing superintendent, or of an equally competent person should be exclusively devoted to our line; but in

that case, if I am to rely upon the information which I received, the whole salary would have to be insured to the person employed, that is to say \$200 a month.

MAINTENANCE AND REPAIRS.

Maintenance

The telegraph line is at the present time kept in a good state of repair and repair of by Mr. Lamb under the provisional direction of the local department of Lands telegraph line. and Works. The local Government allows Mr. Lamb the assistance of its officers and employés to maintain and repair the line; and this is the more easy from the fact that the telegraph line, throughout nearly its whole extent follows the course of the great Cariboo road.

> I was informed in Columbia that it had been the intention to insert, in any new contract for the conveyance of the mails between Yale and Cariboo, a condition providing for the gratuitous conveyance of persons charged with the duty of repairing the line; and in that case, all telegraphic despatches necessary for the postal service, and required by post office officials in connection with that service, would have been transmitted free of charge.

> The opening of a telegraph office at Cache Creek is suggested. Such an office would be very useful for the maintenance and repair of the line, and would serve the already considerable and growing establishments on the east and south-west in the direction of Kamloops, the Thompson River, the Okanagan Valley &c. It would be almost absolutely necessary in order to communicate with the surveying parties, and for the construction of the rail-.The monthly outlay would be \$75, but if the operator were also the way. postmaster of the district, the revenue of the office would be increased, and would probably, before long, considerably diminish the expenditure, if it did not entirely meet it.

BY WHOM THE LINE SHOULD BE ADMINISTERED.

By whom the telegraph should be administered.

The question now arises whether the Canadian Government should continue to retain this line of telegraph under its management, or whether it would not be better to replace the whole in the hands of the local Government of Columbia, an annual sum being paid to that Government until such time as, in consequence of the country having become sufficiently populous, the telegraph line shall become self-supporting. My own opinion is that if the Federal Government continues to manage the line itself, the cost of working will be much greater than it would be to the local Government, which has already on the Cariboo road its superintendents, officers and employés charged with the duty of keeping that great medium of communication in a good state of repair ; while the Federal Government would have to employ new hands, or convey the permanent employés over considerable distances, whenever repairs to the line became necessary. I am therefore inclined to think that it would be more satisfactory to the Government of Canada and to that of the Province, to leave the management in the hands of the local Government, who should receive an annual fixed sum from Ottawa.

HARBORS OF VANCOUVER ISLAND.

The principal harbors of Vancouver Island are :-- 1. Victoria ; 2. Esquimalt; 3. Nanaïmo; 4. Barclay Sound.

VICTORIA.

Harbor of Victoria,

Harbors of

Vancouver

Island.

1. The harbor of Victoria derives its importance from the fact that Victoria, the capital, is built at its head. It would appear that it would have been much more reasonable, and advantageous for the future of the

49

New telegraph office.

capital, that it should have been built at Esquinalt harbor in the immediate vicinity, which is a commodious and beautiful port, while that of Victoria is small and difficult of access. However, private interests without doubt originally determined the selection of Victoria, and as it is the principal port of entry, and that at which the customs duties of the entire Province are in great part received, it is important that the approach to it should be made safe.

In 1862 a commission drew up a report suggesting a plan for the improvement of this harbor (vide Appendix G.G.), and it was in consequence of that report that the Government procured a dredge, with scows and a tug-boat; but as I have already stated the scheme fell through in consequence of the excessive expenditure which its execution would have entailed on the Provincial Government, and the entrance of the harbor is therefore still obstructed by a bar of sand upon which vessels frequently ground, and which it will be necessary to remove in whole or in part. There are also some rocks opposite Deadman's Point, which should be blasted. On this subject Captain G. H. Richards, of the Royal Navy, says :--

"The entrance to Victoria Harbor is shoal, narrow and intricate, and "with S.W. or S.E. gales, a heavy rolling sea sets on the coast, which renders "the anchorage outside unsafe, while vessels of burthen cannot run in for "shelter unless at or near high water. Vessels drawing fourteen or fifteen feet "water may, under ordinary circumstances, enter at such times of tide, and "ships drawing seventeen feet have entered, through only at the top of spring "tides."

There are besides deposits of nud in the harbor which must be removed unless the harbor is to cease to be frequented by any vessels except small coasting craft. Should the Canadian Government cause this work to be earried out, the mud and stones removed in dredging the harbor might be deposited in that part of it which is called James' Bay, which has a superficial extent of some ten acres, and which might then become a valuable property. The local Government should transfer that property to the Federal Government, or should contribute to the cost of the dredging in consideration of James' Bay being made the place of deposit of the material dredged up, and acquiring thereby a considerable value.

Appendix JJ. is an extract from a report made in November 1868, by the Honorable Mr. Trutch on this subject.

ESQUIMALT.

2. The harbor of Esquimalt is considered the best harbor on the Pacific Equimations coast, north of San Francisco. It is well lighted and may be entered with facility either by day or by night, in fine or in stormy weather. It is the Canadian harbor at which the Pacific Squadron of the British Navy is stationed. It has an almost even depth of thirty-six feet, the bottom is excellent, and the harbor is perfectly safe and sheltered. Here fifty vessels of the line might anchor with wase.

Free water communication between the two harbors of Victoria and Esquimalt is only prevented by a tongue of land about 750 feet wide. It is a question whether at some later date it will not be necessary to cut a canal through that tongue of land, and thus connect the navigable waters of the two harbors. Esquimalt would then become, without question, the entrance to Victoria, as nature would appear to have intended. This is a subject for future consideration.

NANAÏMO.

3. The harbor of Nanaïmo is situated on the eastern coast of Vancouver situated, about sixty-five miles from Victoria. It is the port of that coast.

anaimo

10-6

41

The coal mines, now being worked, are there situated, and in its neighborhood also lie the fine quarries of Departure Bay. Further importance attaches to this harbor in view of the fisheries, and especially of the whale fishery. As I have already pointed out, the harbor requires a lighthouse and one or two buoys to indicate the position of a submerged rock. To sum up, it is well situated, large and safe.

BARCLAY SOUND.

Barclay Sound

4. Barclay sound is the principal harbor on the western coast of Vancouver Island. It is but little known in Columbia at the present day, because the lumber trade which was carried on there has ceased. It seems to be feared that this harbor may be selected as the terminus of the Pacific Railway, and that in that case Esquimalt and Victoria would be shorn of their importance. For my part, I entertain no such dread. Whatever spot may be selected as the terminus of the Canadian trans-continental Railway, Esquimalt will not the less continue to be one of the finest harbors in the world, and that of Victoria will continue to enjoy the importance conferred upon it by the Capital of the Province.

However this may be, Barclay Sound opens into the Pacific Ocean itself. From its mouth to the head of the Alberni Canal it is about thirty five miles long. At that point it is but fourteen miles from the eastern coast of Vancouver, and easy communication from it to that coast may be had through a pass in the mountains, and by Lake Horne and the River Quahlicum. In Barclay Sound and the natural canal of Alberni, the water is very deep, and once in the harbor the shelter is perfect. As I have said elsewhere this is one of the most picturesque harbors in the world. It is studded with large and small islets clothed with verdure; the hills are well wooded and on some lofty peaks eternal snows may be discerned. There are here some fishing establishments and at the head of the Alberni Canal, is a small town now deserted. Here formerly flourished the saw mills of Messrs. Anderson & Co. Then there were some 280 persons employed in the mills, the little town had a population of 600 souls, and in the adjacent waters rode large vessels of 1000 tons, which bore away to distant parts the timber which the district produced. Now nothing is to be seen but the Indian who formerly made the place his abode; and the civilization which once visited the spot would seem to have doomed it to barbarism or solitude. And yet if the terminus of the Pacific Railway is destined to be situated on Vancouver Island, it may be that the voice of civilization may again before long make itself heard in that region.

I have above stated that at the entrance of Barclay Sound, at Cape Beale, it is necessary that a lighthouse of the first-class should be erected. There can be no doubt that it will be requisite at a later date to place also a few buoys, and possibly to erect one or two lighthouses of third or fourth class, if the harbor should attain the importance, to which at a period more or less near, I am of opinion that it will rise.

HARBORS ON THE MAINLAND.

Harbors on the mainland are,—1. Burrard Inlet; 2. Howe mainland. Sound; 3. Bute Inlet; 4. Milbank Sound; 5. The River Skeena; 6. The River Nass.

BURRARD INLET.

Burrard Inlet; 1. The harbor of Burrard Inlet is one of the finest on the Pacific Coast. It is situated on the Gulf of Georgia, only a few miles from New West minster on the Fraser River. From the first narrows the harbor is nine miles in length; it is deep and safe. There it is that the lumber trade of Columbia in principally carried on. The timber which is cut in the district, lying between Lillouet and the Gulf of Georgia, reaches Messrs. Moodie and Co's mills at Burrard Inlet by means of an immense dry slide half-a-mile in length, which gives passage to the enormous saw-logs of which 1 have spoken elsewhere. Leaving behind them a long train of smoke, they plunge into the deep water, causing the spray to fly up into the air some thirty feet, and are then retained in powerful and perfectly secure booms.

This harbor is of very great importance, as it is frequented by a large number of vessels—by as many probably as all the other harbors put together and as, being situated in the centre of the timber trade and near the outlet of the tract of country crossed by the Cariboo road, it must at a future period be the adjunct of an important town. The population at present consists of 400 or 500 whites, and 600 or 700 Indians. Captain G. H. Richards of the Royal Navy speaks of it in the following terms :—

"Burrard Inlet differs from most of the great sounds of this coast, in "being extremely easy of access to vessels of any size or class, and in the con-"venient depth of the water for anchorage, which may be found in almost every "part of it; its close proximity to Fraser River, with the great facilities for "constructing roads between the two places, likewise adds considerably to its "importance. It is divided into three distinct harbours, viz.: English Bay, or "the outer anchorage; Coal Harbour, above the first narrows; and Port "Moody, at the head of the eastern arm of the inlet."

A lighthouse is required at the entrance of the harbor, and some buoys will also be necessary at other points.

Howe Sound.

2. Howe Sound is a harbor immediately to the north of Burrard Inlet. Howe Sound. I did not visit it, and cannot therefore speak of it from personal knowledge. If, however, I may rely upon reports which were made to me, it is difficult of access as compared with Burrard Inlet. It is separated from the latter by Bowen Island, which is situated at its mouth, and which forms the north-west boundary of Burrard Inlet. It cannot be looked upon as a harbor of any great importance, in view of the immediate vicinity of Burrard Inlet, which is the natural port of the whole district.

BUTE INLET.

3. Bute Inlet is much further to the north than Howe Sound, and Bute Inlet. Preceives the waters of the River Homatheo. The harbor is surrounded by lofty mountains, and may hereafter attain some importance, especially if the Pacific Railway should pass in the vicinity. Between its outlet and Vancouver Island is situated Valdes Island.

MILBANK SOUND.

4. Milbank Sound lies still further to the north than Bute Inlet, and is Milbank only mentioned here to be of record, for at the present time the harbor is one Sound. of no importance. Still, if the gold mines of the Peace River continue to yield well, and to attract the gold-mining population, as appears likely to be the case, one of the routes followed by the miners being that by the Straits of Georgia and Johnstone, Milbank Sound may become valuable as a harbor of refuge, and perhaps also as a point of departure for the interior.

RIVER SKEENA.

River Skeena. 5. Steam vessels from Nanaïmo now ascend the River Skeena. It is one of the routes selected by miners in order to reach the District of Ominica (Peace River). This river is acquiring importance, and will probably require some lighthouses and buoys. It will be necessary to establish over this route a regular postal service for the miners.

RIVER NASS.

River Nass.

6. The River Nass is a little further to the north than the Skeena, and derives a certain amount of importance from its giving access to a more northern region than that near the Skeena, and from there being reason to believe that that region is also rich in gold mines. Both are valuable also in respect of the fisheries; they are navigable over a considerable part of their course. They receive the waters from the Lake, or from the vicinity of the Lake Alal, which is on the high lands. The River Nass is quite close to the frontier of Alaska, which by no means detracts from its importance. The steamer "Union" ascended it in 1865 to a distance of more than 25 miles from its mouth.

GRAVING DOCK.

Graving dock.

The graving dock is one of the public works to which the highest importance is attached in Columbia, at least in Vancouver Island. That work is specially mentioned in the conditions of union between that Province and Canada. It is there said :--

"The Dominion Government shall guarantee the interest for 'ten years "from the date of the completion of the works, at the rate of five per centum "per annum on such sum not exceeding $\pounds 100,000$ sterling, as may be required "for the construction of a first-class graving dock at *Esquimalt*."

The site of that dock having been thus designated, I made it my duty personally to examine the harbor of Esquimalt, and to ascertain for myself what place was considered the most suitable by scientific men. Admiral Farquhar, without whose kind assistance, most courteously rendered, in placing his gunboats at my disposal, I should have found it quite impracticable to visit many points of interest in the Province, was good enough to point out to me himself the site of the future graving dock. The place would appear to have been made expressly for the purpose; it is called Lang or Constance Cove, and is situate inside the harbor. The bay or cove is perfectly sheltered, and is, not exposed to be attacked by an enemy. Α commission composed of naval officers, appointed in 1867 by Admiral Hastings, made a minute examination of the spot. That commission reported that the soundings shewed that there were no stones or rock to blast. At floodtide there are twenty-four feet of water, and the bottom is excellent and hard, consisting of sand and shells.

The construction of this dock is absolutely necessary for the navy as well as for the merchant service. British frigates stationed on the Pacific, are at present obliged to proceed to the United States (San Francisco), to be docked. The cost of the docking there is very great. Not less than £30,000 sterling has been expended in two years in these repairs The expenditure of that enormous sum at Esquimalt, supposing there had been a dock in existance, would have yielded to the English Government much more satisfactory results, for it would have sufficed for a much more thorough refitting than the vessels actually underwent. Moreover the necessity for going to San

Necessity for its construction. Francisco to dock vessels, must, as a natural result, cause the docking to be less frequent, and thereby render the British naval service less effective in that part of the globe.

It may perhaps be asked why Esquimalt was selected as the site of the graving dock, in preference to Nanaïmo, or Burrard Inlet. In reply to this question, I was told that the last four British admirals on the station had strongly recommended that course to be adopted, and that Esquimalt should be the rendezvous of the British navy on the Pacific. It was stated, in addition, that this place afforded great advantages for building, apart from the fact that it is the first harbor reached by vessels from the Pacific, after their entrance into the Strait of San Juan de Fuca. It is also believed that, Esquimalt being easy of access, vessels from Washington territory would find it advantageous to go into dock there.

It is true that, at Nanaïmo, tides rising very high (18 feet in the Why Esquispring), and stone being found in the vicinity, a graving dock could have been malt was constructed with tolerable ease, but, on the other hand, it is stated, that locality would not have been as convenient for the navy, or for vessels frequenting Puget Sound.

Since my departure from British Columbia, the Provincial Government Tenders for its has called for tenders for the construction of the dock in the following construction. terms :---

"The Government of British Columbia invite tenders to be sent in to "the Lands and Works Office, Victoria, up to noon of the 20th day of March, '1872, for the construction of a graving dock at Esquimalt, British "Columbia, under the guarantee provided in the twelfth section of the terms "of union of this Province with the Dominion of Canada, which section is "in the following words:

"The Dominion Government shall guarantee the interest for ten years "from the date of the completion of the works, at the rate of five per cent. "per annum, on such sum not exceeding $\pounds 100,000$ sterling, as may be re-"quired for the construction of a first-class graving dock at Esquinalt.

"The dock is to be of a clear length of not less than 450 feet, a clear "breadth of 90 'feet at top and 50 at bottom, and affording a depth of "water, at ordinary high tide, of not less than 24 feet on the sill, and "to be substantially built upon a site to be selected, and provided by the "party or parties tendering, subject to the approval of the Government. "Parties tendering are required to specify the time within which they propose "to complete the dock.

"Tenders are to be sealed, superscribed "Tenders for Esquimalt Graving "Dock," and addressed to the Chief Commissioner of Lands and Works, "Victoria, British Columbia, and to be accompanied by plans and drawings, "shewing the exact dimensions of the dock proposed to be built, the mode of "construction and materials to be used therein.

"Parties desirous of tendering, but who may decline to do so under the "guarantee above named, as insufficient, are invited to tender on the basis "of such supplemental guarantee by the Provincial Government or other "financial inducement as they may suggest."

Fears appeared to be entertained that the guarantee afforded by the Canadian Government would not be sufficient, but on the other hand the importance of having the dock, not only to Canada generally, but especially to the Province and to the Imperial Naval Service, was thoroughly appreciated. And there appeared to be a conviction that the English Government would assist! in its construction, and that the local Legislature would not fail to manifest, by substantial tokens, the interest that it felt in the matter. Appendix KK contains the correspondence which has passed on the subject between the Admirals and the Governors of Columbia since 1867.

IMPROVEMENT OF THE FRASER RIVER.

The "Two Sisters."

In the Fraser River between Hope and Yale, that is to say, about three or four miles from Hope, and about eleven miles from Yale, there are two rocks known as "The Two Sisters." These rocks are a great impediment to navigation, and one of them should be removed. Hon. Mr. Pearse made a memorandum respecting them in 1868, and recommended that the one called the "Port Sister" should be blasted. He says:

"This survey shows that there would require 3,762 cubic yards of " blasting to be done to bring the rock to the level of the water on 9th October. "The water has never been known to be so low at the same time of year. If " the blasting were down three feet below this level, there would be no impedi-" ment, except from ice, to the navigation of the river by the present class of " steamers throughout the year. To effect this object, there would require to " be blasted 692 yards, (cubic) making a total of 4,454 cubic yards. There " could be no better time for undertaking this work than the present, owing to "the low stage of water. The three feet referred to could be got out between " this and March next, during which month the water in the river is at its very "lowest. . . . The rock is very hard, but is throughout more or less " rent by atmospheric agency. The water in the main channel is very deep-" sixty-two feet in the middle. That in the western channel averages about " four feet six inches; whilst below the Port Sister, there is a shoal for about " one hundred yards, with about five feet of water over it, and immediately " beyond the depth is sixty feet. These conditions are very much in favor of " the work in my opinion, because a very great deal of the rock taken out might " be left, either on the shoal, or in the western channel,-without any detri-" ment to the river."

Probable cost of the work. Mr. Pearse, in September, 1871, estimated the cost of this work at \$6,000 "according to the present price of labor, powder, &c." It is probable that the improvement in question could be effected for that sum, or for a sum of \$7,000.

CARIBOO ROAD.

Cariboo Road.

The Cariboo Road, to which I have alluded above, is one of the public works for which the new Province of British Columbia deserves the highest It is a road which may be travelled in carriages and leads from Yale, honor. on the Fraser, to Barkerville, its terminus. Without personal inspection, no idea can be formed of the difficulties which had to be surmounted in the construction of this road. It was built in great part on the scarp of the mountains which border on the Fraser and Thompson Rivers, and on many sections of the route these precipices are so abrupt, and offer so little facility for cutting out a road except at the cost of an enormous sum of money, that it has been found necessary to form the substructure of the road of cribwork, which has been attached to the almost perpendicular sides of the mountains. The plan adopted having been to follow the rivers, it is thought that 'the road is longer than it should be. It is, however, the only road establishing communication between the Lower Fraser and the interior of the country, and although it is very much travelled, and is but from fifteen to twenty-five feet wide, it is generally in good order, and accidents rarely occur. This is the more astonishing when one remembers that the road, for a great part of its course, presents either on the right hand or on the left, precipices from 500 to 1,000 feet in depth.

Over this road, which cost more than a million of dollars, is conveyed Cost of the everything which is required at the mines, or which is brought from them.

The mode of conveyance is, for passengers, by stages drawn by four or Mode of consix horses, and for merchandise, by packed trains of two, three or four great veyance. waggons, drawn by ten or twelve mules, or by sixteen or eighteen oxen. There are packed trains composed exclusively of mules, each of which carries a certain weight, the goods or merchandise being strongly bound on the back of the animal. The packed trains travel at a foot's pace, some few miles a day, and at four or five o'clock in the evening, the muleteers stop on the road, and unharness their beasts, the harness being left where the animal halts; the cattle are turned out to graze till morning, and the muleteers, who are either whites, Indians or Chinese, camp at the side of the road near a stream, which they never neglect to select for the purpose. The unavoidable slowness with which merchandise is conveyed makes the cost of transport very great. And, therefore, the miners look forward eagerly to the building of the Pacific Railway, which will shorten for them, whatever route it may follow, the distance to be travelled, and will in that way make their labor more remunerative.

I was informed that there were on the Cariboo road, about 20 ox-trains, Number of of 16 head of cattle each, 25 to 30 horse or mule trains, of 10 head of cattle beasts of turden employed. each, and at least 400 horses or mules without vehicles, all engaged in conveying goods and merchandise.

BRIDGE ON THE QUESNEL RIVER.

At the Quesnel River the road is interrupted, the crossing being effected Bridge necesby means of a scow. The crossing is costly, slow and often difficult. A sary across the bridge is absolutely necessary here and as the Cariboo Read is of measurements. bridge is absolutely necessary here, and as the Cariboo Road is, of necessity, under the control of, and a charge upon, the Provincial Government, I only mention this want that it may be of record. I have, however, reason to believe that the Provincial authorities are fully aware of the necessity of this bridge, which, moreover, is demanded by the press. The bridge would probably cost \$15,000.

CANADIAN PACIFIC RAILWAY.

The Canadian Pacific Railway is the most extensive public undertaking, Pacific Railin connection with British Columbia, that Canada has promised to see carried way. into effect, and it is also that from which we may expect to reap the greatest advantage, for by it all the Provinces of the Dominion will be united, and form one and the same nation, in the true sense of the word. The trade of Europe and Asia must necessarily be attracted to that road, and moreover, in making accessible the vast and beautiful territories of the North-West and Columbia, the emigration of Europe, and, it may be, Asia, will see thrown open to it an easy route by which to reach those valuable prairies and rich mineral lands, bringing in its train that reinforcement of population and riches of which we stand in need.

The clause relating to this work, in the terms of Confederation, is as What it is to follows :--bø.

"The Government of the Dominion undertake to secure the commence-"ment, simultaneously, within two years from the date of the Union, of the " construction of a railway from the Pacific towards the Rocky Mountains, "and from such point as may be selected East of the Rocky Mountains "towards the Pacific, to connect the seaboard of British Columbia with the " railway system of Canada; and further to secure the completion of such "railway within ten years from the date of the Union."

What is thought of our North-West Territory.

I shall not repeat here the reasons which decided, and justly decided, the Canadian Parliament to undertake this Railway. Those reasons are perfectly well known; but I find in a pamphlet published under the auspices of an American Company, which has begun the construction of the "Northern Pacific Railway," a detailed account of some of the sources of the revenue which it hopes to obtain, of which I think it worth while to embody in this report the following extracts:—

"Where the road crosses the Red River of the North, it taps 1,500 miles "of inland navigation, down the Red River, through Lake Winnipeg, and up "the Saskatchewan to the foot hills of the Rocky Mountains. Light draft "steamers have long navigated this route. Along the greater part of this "water-way the soil is good, the climate like that of Minnesota, and the "settlements numerous. The trade of this vast region beyond the national "boundary, including the transportation of supplies for the Hudson's Bay "Company, will at once and permanently form part of the business of the "Northern Pacific Road."

"The summer isothermal line of 70 degrees, which in Europe passes "through southern France, Lombardy, and the wheat-growing region of "southern Russia, strikes the Atlantic coast of the United States at the east "end of Long Island, and, passing through central Pennsylvania, Northern "Ohio and Indiana, diverges north-westerly, and runs up into the British "Possessions to latitude 52, at least 360 miles north of this road.

"The fact of this mildness of climate is abundantly established. "Nowhere between the Lakes and the Pacific is the climate colder than in "Minnesota, and this great State is not surpassed as a grain-growing region, "or in healthfulness of atmosphere. The seasons of Dakota are very "similar to those of Iowa, and from Dakota westward the climate steadily "modifies until in Oregon and Washington territory there is almost no "winter at all, aside from a rainy season as in California.

"This remarkable modification of climate, the existence of which no " well-informed person now questions, is due to several natural causes, chief "among which are probably these: First. The mountain country lying " between the 44th and 50th parallels is lower by some 3,000 feet than the " belt lying immediately south. The highest point on the lines of the "Northern Pacific Road is 3,300 feet lower than the corresponding summit " of the Union and Central Line. Both the Rocky and the Cascade ranges, " where they are crossed by the Northern Pacific route, are broken down to " low elevations, compared with their height four hundred miles southward. -" This difference in altitude would in itself account for much of the difference " in climate, as three degrees of temperature are allowed for a thousand feet " of elevation. But, second, the warm winds from the South Pacific, which " prevail in winter, and (aided by the warm ocean current corresponding to " our Atlantic Gulf Stream) produce the genial climate of our Pacific Coast, " pass over the low mountain ridges to the north of latitude 44°, and carry " their softening effect far inland, giving to Washington territory the climate " of Virginia, and to Montana the mildness of southern Ohio."

SUPERIOR ADVANTAGES IN FAVOR OF A CANADA LINE.

Superior advantages which our territory affords for a railway. Similar causes produce similar results at Vancouver Island and in a great part of Continental British Columbia. There is, however, a difference in favor of our country—it is this :—on the Union and Central Pacific Railway the highest elevation is 8,240 feet above the level of the sea, and on the proposed Northern Pacific Railway the highest elevation would be a little less

What is the nature of the Pacific Territory. than 5,000 feet, whereas on the Canadian Pacific Railway the Rocky Mountains may be crossed at Tête Jaune Cache or Leather Pass at an elevation of only 3,760 feet, or at Howse's Pass at an elevation of a little more than 4.000 feet above the level of the sea.

SURVEY.

So soon as Columbia was united to Canada, in the month of July last, Survey. parties of engineers sent out by my department, under the control of Sandford Fleming, Esq., as Chief Engineer, commenced operations not only on the Pacific side, but also from Lake Nipissing to the Rocky Mountains. As the Chief Engineer will submit a report of his proceedings, and of the result of the examination made by the engineers acting under him, with a view of placing him in a position to indicate the general line which the Canadian Pacific Railway should follow, I shall refrain from entering here into any details on the subject.

PASSES IN THE ROCKY MOUNTAINS.

It is, however, understood that the Railway must necessarily pass either Passes in the by Tête Jaune Cache, in latitude 52 degrees 48 minutes north, or by Rocky Moun-Howse's Pass in latitude 52 degrees 20 minutes north these being considered tains. Howse's Pass in latitude 52 degrees 20 minutes north, those being considered to be the two passes which are the most practicable and the least elevated.

The Honorable Mr. Trutch, the Lieutenant-Governor of British Hon. Mr. Columbia, inquired into the subject in 1868, and his report to the government Report. **Frutch's** of the day is replete with so much valuable information, that $\overline{1}$ consider I cannot do better than attach it hereto as Appendix LL.

By one or other of the passes named the Canadian Railway must be carried towards the Pacific, so as to connect the seaboard of British Columbia with the railway system of Canada.

TERMINUS OF CANADIAN PACIFIC RAILWAY IN BRITISH COLUMBIA.

With regard to the question of the location of the western terminus of the Canadian Pacific Railway, I shall confine myself to a reference to the various localities that have been pointed out as well adapted for the purpose :

PROPOSED TERMINUS ON THE MAINLAND .- BURRARD INLET.

If it were found impracticable for the Railway to cross from the mainland Terminus on to Vancouver Island, or if it were decided not to adopt that course, it might the mainland, be that Burrard Inlet or Howe Sound should be the point selected be that Burrard Inlet or Howe Sound should be the point selected.

Those two harbors, as I have stated elsewhere, are close to each other, or Howe and if the Railway were not to have its terminus on Vancouver Island, I Sound. incline to the opinion that Burrard Inlet should have the preference. It is a magnificent harbor, the centre of the timber trade of Continental Columbia, and the most accessible port from the valley of the Fraser. The location of the terminus at that place would of necessity give a great impulse to New Westminster, the former capital of Columbia. Burrard Inlet would also be perfectly accessible from the district situated between Howe Sound and Lillouet; for, if I am correctly informed, there is easy communication between Howe Sound and Burrard Inlet by means of a pass known to be in existence by many persons at Burrard Inlet. The harbor of Burrard Inlet would be easy of access for vessels from the Pacific, and would be subject only to the following disadvantages :-- 1. Being at a distance of 152 miles from the entrance of the Strait of Fuca; 2. Compelling British vessels to pass beneath American batteries, should the question of the Island of San Juan not be decided in our favor; 3. Not being on Vancouver Island.

10 - 7

Burrard Inlet

BUTE INLET.

Terminus at Bute Inlet. I simply mention Bute Inlet, for I do not imagine that the line of the Railway would terminate there, supposing it were not to be continued to Vancouver Island. If however, as some suggest, a crossing should be established here by which powerful vessels could take railway cars across the Strait, Bute Inlet would probably serve as a terminus; although I must say that if the ears could be conveyed to Vancouver Island, the Pacific Ocean shipping would prefer the Vancouver Island terminus, as they would thus be spared a long voyage in the inland waters of Columbia.

TERMINUS ON VANCOUVER ISLAND .- ESQUIMALT.

Terminus at Esquimalt.

If the terminus is to be on Vancouver Island, Esquimalt Harlor affords very great advantages which none will deny. In the first place the harbor is only sixty-five miles from the entrance of the Strait of Fuca, and although the shore of the strait opposite Vancouver Island is United States territory, yet the width of water (16 miles) renders the navigation quite secure. Esquimalt is besides a perfectly safe harbor and of sufficient extent to serve as the terminus of our Pacific Railway. It would be easy to defend in case of trouble, and vessels frequenting it might easily reach the Pacific, where they would receive the protection of the Imperial fleets. It is true that to get to it from Bute Inlet, the line of Railway would have to be longer than if the terminus were fixed at Barclay Sound, but the advantages afforded by Esquimalt are so superior that it would be false economy not to carry the line there. And it must not be forgotten that besides the advantages which I have enumerated, the immediate vicinity of the capital should tend to the selection of Esquimalt if the Railway is to be continued to Vancouver Island.

BARCLAY SOUND.

It would be well however, in locating the line, not to lose sight of the fact that the traffic over the Pacific Railway, must necessarily become very considerable if, as we expect, the road is used to transport the produce of China and Japan to a great part of North America and to Europe. And why should that trade escape us, when we see that the promoters of the Northern Pacific Railway of the United States count on that traffic, because their road will be shorter than the other lines terminating at San Francisco, and because Puget Sound, their Pacific terminus, is further north than San Francisco, and from that very fact the distance between Puget Sound, and China being much less than the distance between San Francisco and China? Now, as to geographical position, Esquimalt and Puget Sound are exactly the same, and we shall besides have the advantage of having a Railway which will be shorter, less costly as to construction, and less costly as to maintenance and working, as the altitudes to be surmounted will be less formidable, and as we shall not have to cross the great American desert. We may therefore reasonably count upon a large portion of that immense trade, and it may be that we shall then find that it will be well not to rely on a single port of entry. Barclay Sound, at the eastern extremity of the Alberni Canal, if it could be made accessible to the railway, would, under these circumstances, be possessed of great importance, for it could afford accommodation for many hundreds of vessels.

RIVER SKEENA.

Terminus at the River Skeens.

Terminus at

Barclay Sound

I am aware that the entrance of the River Skeena has also been mentioned as a possible terminus for the Canadian Railway. It is perhaps possible, but it is not probable, that it will be chosen. Such a terminus would be

much too far north and would subject vessels to a long and expensive course of inland navigation. For another reason, it would, in my opinion be a bad selection, for if the American Northern Pacific Railway is to terminate at Puget Sound, the latter spot would naturally have the preference; for when vessels reached the latitude of the Strait of Fuca, they would most certainly shape their course for the Strait in which the navigation is easy and safe, instead of sailing five or six degrees to the north to reach the mouth of the Skeena. This location therefore is not to be thought of.

RAILWAY BRIDGE AT SEYMOUR NARROWS.

In the event of the terminus being fixed on Vancouver Island, an im-Bridge at Sey-portant work would have to be carried into execution; that is, a bridge at mour Narrows Seymour Narrows (Johnstone Strait). Being aware of the importance which (Johnstone was attached to this question, I considered it advisable that I should visit the spot and be able to give more certain information on the subject, than was already available. I proceeded thither accordingly on board the Sir James Douglas in company with the Lieutenant Governor, Hon. Mr. Trutch. The strait is from 1800 to 2000 feet in width, with a current running from six to eight knots an hour. The depth varies from seventeen to sixty fathoms, and the tide rises about thirteen feet. At a distance of from 600 to 800 feet (onethird of the entire distance between the two shores) from Valdès Island which, with Vancouver Island forms the strait at this point, there is a rock which is said only to have been discovered two years ago. At low water there is eighteen feet of water over this rock. It is needless to say that I was not able to measure the rock, or to ascertain if it was adapted to serve as the foundation of the pier of a bridge over which the trains of the Pacific Railway might pass. If after examination it is found that that rock may serve as the foundation of such a pier it is likely that the problem of a bridge at this point will have been favorably solved. The cliffs at this part of the strait appear to be from 100 to 125 feet high.

THE TIDES.

As the question of the tides may play an important part in connection The tides. with this subject, I consider it expedient to annex, in Appendix MM, what Captain George Henry Richards says in reference to the subject in his Vancoriver Island Pilot.

TABLE OF DISTANCES.

It is also well to give here a table of distances, which will be of use in Table of determining the advantages offered by the several places designated as possible distances to be selected as the terminus of the Railway. I am indebted for it to the Hon. Mr. Pearse.

CONVEYANCE OF THE MAILS.

Mails.

Victoria.

Mails from Canada to British Columbia and vice versa are conveyed between San Francisco and Victoria by the Steamer *Prince Alfred*, an iron steam ship of 900 tons. The service is performed twice a month. Some mails are also conveyed by land to Portland or Olympia and thence reach Victoria by another steamer.

"The Dominion will provide an efficient mail service fortnightly by "steam communication between Victoria and San Francisco, and twice a week "between Victoria and Olympia, the vessel to be adapted for the conveyance "of freight and passengers."

FUTURE POSTAL SERVICE.

Future service When the American Railway shall have been completed as far as Olympia, it will be a question whether the interests of Columbia will not require a modification of this article, and whether it would not be better, in the interest of all parties, to do away with the line from San Francisco, and to substitute for it a daily line between Olympia and Victoria. In fact from the instant that the American Railway shall have been completed to Olympia, travellers will prefer a twenty hours voyage only, the rest of the journey being made by rail, to running the risk of an extended voyage on the Pacific Ocean, which in those latitudes is very often anything but what its name implies. The cost to the Canadian Government would be the same or nearly so, but this service would have the advantage of reducing the journey between Victoria and San Francisco to less than two days, and of sparing travellers a sea voyage of from three to five days.

MAILS FOR VANCOUVER ISLAND.

The Vancouver Island postal service is performed from Victoria by the steamer Sir James Douglas, which conveys the mails along the eastern coast as far as Comox, 130 miles from Victoria, stopping at Cowichan, Maple Bay, Chemaïnus, Nanaïmo and Comox. Cowichan is a flourishing place. It possesses good sc.100ls, a convent at which the Nuns (who are Canadians) teach trades to Indian and half-breed girls, and the only stone church in the Province. Nanaïmo is also a flourishing town, with bright prospects for the future. There are hardly any settlements on the western coast, and there is in consequence no postal service. The service to Comox is efficient and regular, and is performed with every possible regard to economy.

MAILS FOR THE MAINLAND.

Mails for the main land.

Vancouver

Valand mails.

the The mails for the mainland are despatched from Victoria. Some, of but little importance, are conveyed by the *Sir James Douglas*, as far as Nanaïmo, where the steamer *Otter*, belonging to the Hudson's Bay Company, receives the mails for the River Skeena. This service will have to be increased if the mines of the District of Ominica continue, during the coming season, to be as rich and as much resorted to as they were last year.

Cariboo mails.

From Victoria to New Westminster.

The other mails, which are by far the most important, are conveyed from Victoria to New Westminster, thence to Yale, and from Yale to Barkerville. The service from Victoria to New Westminster, is performed by the steamer *Enterprise*, belonging to the Hudson's Bay Company. The vessel is very well adapted for the service. She has an excellent commander in Captain Swanson, who personally, as well as in the name of the company, shewed me every possible attention.

From New Westminster to Yale, on the Fraser, the mails are conveyed, Fom New in summer, by the steamer *Lillouet*, commanded by Captain Parsons, who is Westminster deserving in every respect of the position which he holds. This service to Yale. deserving in every respect of the position which he holds. This service should be independent of that from Victoria to New Westminster, and arrangements should be made by which these steamers should wait for each other in case of delay. By this means alone, can the conveyance of the mails for the interior of the country, be rendered efficient. Otherwise, the mails arrive at Yale from the upper country, and if the steamers start without a previous understanding, the mails have to wait either at Yale or New Westminster. In fact, in any new post office contract entered into in that region, provision should be made for more speedy service, and for ensuring More speedy connections between the different modes of transport along the line.

From Yale to Barkerville, the service is performed by means of stages From Yale to drawn by four or six horses. Until last year the contractor was Mr. Francis Barkerville. Jones Barnard, who owned excellent vehicles and horses, and fulfilled his contract to the satisfaction of all. A year ago, a contract was entered into with other contractors-Messrs. Gerow & Johnston-who have started a new line, and have taken the contract at a lower price. Numerous complaints are made as to the manner in which the service is now performed. It is important that, let the contractor be who he may, he should be held strictly to fulfil his contract; otherwise, all continental Columbia will be ill served, or deprived entirely of its mails.

Additional Steamboat Service.

Upon the Cariboo route, between Sóda Creek and the mouth of the From Soda Quesnel, the Fraser is navigable, and the contractor, Mr. Gustavus Blin Creek to Wright, has put on a steamer, the Victoria, which makes the trip promptly Fraser is and safely, and affords to travellers every comfort than can be desired.

This is the same Mr. Wright, who has recently placed a steamboat on Postal route Lake Tatla, to provide miners with facilities for reaching the mines of the of Ominica. District of Ominica more speedily, more safely, and with less fatigue. I understood that, from the mouth of the Quesnel, he took his steamer up the Fraser River as far as Fort George, then by the River Nechago, Lake Stewart, the River Taché, Lake Tremble, or Traverse, and Middle River, as far as Lake Tatla, where is found the trail leading to the River Ominica. This will probably be the route followed in the conveyance of one of the mails intended for that part of the country.

NECESSITY OF A POST OFFICE INSPECTOR.

The presence of a good post office inspector is absolutely necessary in Post Office Columbia. There should be on the spot, some person with authority to act Inspector required. in an emergency, and one who, at the same time, would superintend the working of the system, and prevent fraud, abuses, and delay.

ISLAND OF SAN JUAN.

The Island of San Juan, with the other islands in the archipelago of The Island of which it forms part, is situated between the Haro Strait and the Rosario San Juan. Strait. If the arbitrator should decide that the treaty which determined the boundary line between the United States and the British possessions in North America, is to be interpreted as fixing the boundary in the Rosario Strait, then, as Your Excellency is aware, San Juan, and the other important islands,

service.

navigable.

such as Lopez, Shaw, Blakely, Decatur, Orcas, &c., will form part of the territory of Canada. If, on the contrary, the Haro Strait forms the boundary between the two countries, then San Juan, and the other important islands which I have just mentioned, will belong to our neighbors.

I shall not here enter into any details on the subject of the other islands. but shall confine myself to a few remarks respecting San Juan. The island is 14 miles long, by about 41 in width. Its superficial area is 54 square miles ; it is 18 miles from Victoria, the capital of Columbia, and is 63 miles from the shore of Vancouver Island. It appears to be very strong in a strategetic point of view, and in the hands of an enemy, would command, on that side, the entrance to the Gulf of Georgia, and from that same fact, the entrance also of the Fraser River and of Burrard Inlet, in so far at least as versels of large tonnage are concerned.

The Island of San Juan is jointly occupied by English and United States' When I visited it in the month of September, there were about troops. 200 or 250 soldiers there. The English camp is situated at the eastern end. and the American camp at the western end of the island. The English camp is in a picturesque spot, at the foot of a high mountain, called Mount Young. The camp appeared to be in very good order, and reflected credit on Captain De Lacombe, who commands it.

UNITED STATES CAPITATION TAX.

Before concluding this report, I consider it advisable to make mention of a complaint preferred by the Canadians in our Pacific Province. They grumble, justly, at the payment which the authorities of the State of California exact from them each time that they enter American territory, of a capitation tax of \$5. They say, with reason, that although that tax may be imposed on foreigners entering the United States, Canadians should be exempt, as they only pass through their country while en route from one part of Canada to another. They consider that, in this respect, the exemption from duties granted to merchandise, and to the Canadian mails, which pass through the United States to reach Canada, should be extended to persons.

IMPORTS AND DUTIES.

This mention of entry duties reminds me that I should have given a table of the imports into Columbia, from the date when Vancouver Island and continental Columbia became one and the same Province. I now append See Appendix NN. I attach to it, as Appendix OO, tables of the one. duties on imports, and of the taxes other than judicial imposts.

By means of those tables, it will be easy to see to what extent duties of excise have been levied in Columbia. The table forming Appendix PP, shews the revenue from customs, and also the total revenue for each of the ten I add as Appendix QQ, the excise law of the Province ; as Appendix vears. Savings banks, RR, the number of savings banks, the course of exchange in 1870, and the coin which was then current in Columbia.

MISCEBLANEOUS INFORMATION.

To complete the information which I collected in Columbia, I attach in the Appendix the following documents :---

Appendix SS.---Game law.

Appendix TT.-Relinquishment by the Hudson's Bay Company, to Her Majesty the Queen of Great Britain, of their rights on Vancouver Island.

Its extent.

Military camps,

Capitation tax in the United States.

Various duties.

Duties of excise.

Game Law. Proprietorship of Vancouver Island.

- Appendix UU.—Treaty between Great Britain and the United Boundary States, on the subject of the boundary line between British Columbia and the United States, and on the subject of the the United navigation of the Columbia River.
- Appendix VV.—Form of sale of public land, with the restrictions Public lands. which it contains.
- Appendix WW.--List of the names of stipendiary magistrates, Stipendiary magistrates, with details as to their duties, salaries, &c.
- Appendix XX.—List of Joint Stock Companies incorporated in Joint Stock virtue of the act or ordinance of 1869.
- Appendix YY.—Report on the Colonial Assay Office, shewing the Gold and quantity of gold submitted for examination and the necessity of the office.

ACKNOWLEDGMENTS.

I conclude with an expression of my sincere thanks, especially to His Acknowledg-Honor the Honorable J. W. Trutch, Lieutenant Governor of British Columbia, to His Excellency Admiral Farquhar, to the Honorable Mr. Begbie, Chief Justice, to the Honorable Mr. Justice Crease, and to the Honorable Messrs. McCreight, Pearse, and Good, for the facilities with which they provided me for obtaining the information which I was desirous of acquiring respecting British Columbia. To these gentlemen, and to a number of others, who also facilitated my researches, I am indebted for having been able to collect the information which I give here, and to acquire a knowledge, and become acquainted with the wants of the Province in so short a time. I vonture to believe that my labor will not be unproductive, but that it will place Your Excellency, as well as my colleagues, and members of Parliament, in a position to judge of the value of that part of the Canadian Confederation which is as yet so little known, but whose future is so full of promise.

The whole respectfully submitted.

HECTOR L. LANGEVIN, Minister of Public Works.

Ottawa, March, 1872.

APPENDICES

ALLUDED TO IN THE FOREGOING REPORT.

APPENDIX A.

MEMORANDUM BY THE HON. CHIEF JUSTICE BEGBIE.

Various climate; the probable cause of the difference.

There are many different climates in British Columbia, apparently infludescriptions of enced in a great degree by four operative causes, each, probably, very important : First, the soil, which in the lower country, and again north of Quesnel River, and generally in the Cascade and Selkirk ranges, is moist, well wooded, and mixed with, perhaps mainly constituted of, decomposed organic sub-In the middle of the Province, the middle Fraser, Thompson and stances. Okanagan Districts, the soil is light, generally a sandy loam, of no great depth usually immediately superimposed on gravel beds (northern drift) occasionally of very great thickness, and always affording perfect drainage-comparatively destitute of trees or underbrush, covered with a thin but very nutritious grass (bunch grass.) As the great difference in the quantity and nature of the vegetable growth is an effect of the climate, so also it probably reacts powerfully upon it.

> The second important consideration is, the very great difference of level; the open country round Okanagan varies from 1,500 feet above the sea level; round Nicola Lake, from 2,000 feet upwards; round Lake Lahache, from 2,500 feet upwards, while the plateau between Clinton and the Bridge Creek, is nearly level at 3,500 to 4,000 feet. I give these figures from memory and in round numbers.

> The third and fourth considerations are, in a great degree, intermixed, being the geographical considerations arising from the greater or less distance from the sea, and the direction and vicinity of the mountain ranges, by which the equalizing currents of air from the ocean, or the intensifying currents from the arctic regions, or the superheated plains to the south of British Columbia, are checked or invited.

Climate near sea coast (low lying lands) and Vancouver Island

Climate in Central Columbia.

The range of climate, therefore, is extremely great. Generally speaking the low portions near the sea and Vancouver Island have a moderate thermometrical range, rarely exceeding 80° Fahrenheit in the shade on the hottest day in summer, and rarely falling to 20° Fahrenheit in winter. The summers are generally dry, although with occasional showers; the winters generally bring much rain or snow; although I have known brilliant weather in winter for a month at a time. There is generally a good deal of wind, not however, of exceeding violence.

In the middle districts, both summers and winters are very dry, not so as to destroy vegetation by any means, for the country is covered with grass; but at most of the farms artificial irrigation is found desirable. The summer heat is intense, and in winter, mercury commonly freezes. In the winter of 1868, a tolerable thermometer at Quesnel Mouth was reported to me to have marked—57° $\mathbf{F} = 89^\circ \mathbf{F}$. below freezing point.

As to the effect of winter in freezing up harbors, I can only speak of State of har-The the winter. three: Victoria (and Esquimalt), Fraser River and Burrard Inlet. former and probably all the inlets to the S. and W. of the island, are quite open. Fraser River is generally open all winter; but in the course of thirteen winters, I have known it nipped early in November (in November, 1859 or 1860), and once continuously from January to March (about 7th January to

about 21st March, 1862), during which time cattle were habitually driven across the ice to be butchered at New Westminster. Fraser River is generally closed for a few days only. On the other hand, in the majority of winters it is so obstructed. At Burrard Inlet (nine miles from New Westminster) there is in many winters a thin film of ice, but nothing, I should think, to impede navigation. Nanaïmo, I believe, is more seriously frozen, but probably never so as to obstruct steamers much.

The winds up the country are not important, nor generally strong; Force and although, of course, there are occasional outbursts. Upon the sea coast, of direction of course, they are very important, especially as like the currents, they vary very and river cur suddenly both in strength and direction. But as to this, both winds and sea rents. currents will probably be found most fully described in Admiral Richard's sailing directions.

There is nothing especial about the inland rivers except, 1st, their swiftness; 2nd (for the most part) their unnavigability; 3rd, the absence of all valley; they generally run in a mere groove, with but a small portion of alluvial soil.

In the upper country my experience is limited to the six travelling Direction of months—from May to November. During those months, the wind is almost winds in upper country. always from the W. or N. W., and this accompanies dry weather. Owing to the conformation of the country, probably, and the vicinity of mountains in many parts, the surface wind may be in a very different direction from that in the upper strata. It is of course almost or quite impossible to observe this when the sky is perfectly clear, or uniformly overcast.

The existence of these different directions is well established at New Direction of Westminster, and at Victoria, for certain winds and states of the weather. wind in low At New Westminster, from November to May, much rain falls ; nine-tenths country. of it with a surface wind from S. E. to N. E. Yet whenever during rain the motion of the clouds is visible, I have always noticed them to be driving from the S. or S. W.; which current (perhaps operated on by the mountains northward from Pitt Lake), appears to engender the counter current from the east, along which the rain seems to be borne, though it evidently comes in fact from the S. or S. W., i. e., from the Pacific Ocean. When at New Westminster the rain comes on a surface current from the west (as it does occasionally), this surface current is a true wind, generally of considerable force (6-8) and almost always clearing up fine in four or five hours. At Victoria, in like manner (where the prevailing winds are S. W. and S. E.—the latter the only stormy wind), a S. W. wind in the summer especially is well known to be generally a sort of counter current to a N. W. wind blowing outside the straits.

September 5th, 1871.

M. B. B.

A. 1872

APPENDIX B.

MEMORANDUM FROM THE PROVINCIAL SECRETARY'S DEPARTMENT.

Climate. Its effect on harbors.

Snowfall.

Q. Are harbors open the year round ? When closed ?

A. Harbors open throughout the year, except New Westminster, (fifteen miles up Fraser River, - fresh water); floating ice here makes harbor dangerous for shipping from January to March.

Q. Is there snow? Where? How much? Where does it fall? How long does it remain?

A. Very little snow in Victoria. One fall in 1870, about an inch; little more at Nanaïmo and Comox, but does not remain long on the ground. At New Westminster, snow commences about January, and is all gone by March —not continuous. In the higher altitudes, more snow falls; but, in the open country, it seldom exceeds two feet in depth. In all the pastoral districts throughout the Province, cattle, as a rule, can obtain feed at any season of the year. Some unusually severe winters, farmers have had to depend on provender for their cattle, that had been stored up previously. A farmer who provides one month's forage, is considered a very careful, safe man.

Q. Is there any difference on Vancouver Island, and what?

A. The temperature on Vancouver Island in summer, is lower than on the mainland, owing to the prevailing southerly winds blowing from the direction of the snow-capped mountains, on the American side, and across the Sound. The waters of the sound are peculiarly cold at this season, caused, it is supposed, by the currents running from the north, and by the melted snow finding its way into the Sound from the mountain tops.

Temperature of Vancouver Teland,

58

The cistern of the barometer is about 54 feet above the level of the sea. All the observations were made at 9.30 a.m. and 3.30 p.m. daily throughout the year.

There were slight frosts nearly every night in the month of April, and once in May (16th); they did not re-commence until the 9th of October. The severe frosts of January and February, have been unknown for many years.

Thunder and lightning occurred on the 24th May, 24th July, and 22nd, 29th, and 30th August.

Rain fall.

Table shewing the depth of rain, the number of days on which it fell, the mean humidity, (9.30 a.m., and 3.30 p.m.,) mean temperature of the air in shade, and the lowest temperature on the grass in each month.

Rain fell on 8 days when the wind was south, 4—S.W., 3-W., 5 N.-W., 8—N.E., 43 - E., 26—S.E., and 38 when calm.

The greatest fall of rain in twenty-four hours, measured 2.260 inches, and was on the 20th March. The average fall for every day of the year, was (.130 inches, and, for each wet day, it was 0.352.

The amount of ozone this year was very small; its mean daily number would be represented by 3 on the scale, and it seldom exceeded 6. During the greater part of October, November, and December, there was little indication of its presence. For November, and the early part of December, there were heavy fogs, during which there was no ozone.

Ozone.

Rain was more equally distributed throughout all the month's this year, than in 1860 or 1861.

In the winter months, January to March, and October to December, 31,682 inches of rain fell, in 1862; 41,230, in 1861; and 13,834, in 1860.

60

The prevailing direction of the wind during rain in each year, was E. Wind and and S.-E. The absolute limiting nights of frost, in the three years, was Frost. nearly the same.

Year.	Highest Level.	Lowest Level.	Difference of Level.	Remarks.
1861	8th June	17th March.	9.5 feet	From 22nd May to 12th Aug., ships did not swing to the flood tide. From 19th May to 10th Aug., ships did not swing to the flood tide. From 1st May to 2nd Nept., ships did not swing to the flood tide.

Ice appeared on the 1st of January, 1862; and the river at New West-Formation of minster was unnavigable on the 4th; it was completely frozen over on the ice. 9th, and the ice attained a thickness of thirteen inches in the channel, opposite the R. E. camp, on the 12th of February. Sleighs were running from Langley, to several miles below New Westminster; and persons walked from Hope to the latter place, a distance of eighty miles, on the ice, at the end of January. Lake Harrison and the other lakes were frozen. Navigation from New Westminster was open to the mouth of the river, on the 11th March; and from Yale, on the 12th April. Again, on the 5th December, there was ice in the river at New Westminster for one day. In January, 1861, there was ice at New Westminster, but the navigation to the mouth of the river was not impeded. In 1860 there was no ice.

The observations were taken by second Corporal P. J. Leech, and Lance Corporal J. Conroy, R.E.

(Signed)

R. M. PARSONS, Captain, R.E.

APPENDIX F.

EXTRACT FROM COLONIZATION CIRCULAR 1870.

British Columbia and Vancouver Island.

Climate

The climate of the Western Colonies is stated to be excellent, and has been compared to the climate of the milder parts of England, or to that in the south of France. Indeed, it is said to be preferable to that of England, as it has more fine steady weather, is far less changeable, and on the whole milder.

The days in summer are warm, but not oppressive, and free from glare; the evenings are cool, with a gentle sea breeze.

Heavy rains generally fall in December or January.

The winter is a little cold, but not severe.

There are occasional frosts and falls of snow, but they rarely last long.

The climate of British Columbia may compare favorably with most colonies, more particularly with those on the American Continent, in similar latitudes.

It is remarkably healthy both in summer and winter, there being nothing like malaria or ague, either in the hottest summer weather, or the dampest localities.

The climate varies considerably according to the height from the level of the sea.

On the western and eastern side of the Cascade Range the climate is quite different.

The western is heavily timbered, and subject to heavy rains in spring and autumn, while on the eastern side the country consists of rolling grassy plains lightly timbered, the summer heat more intense, the rain light.

Tomatoes and melons ripen readily in the open air, and the winters are comparatively mild.

Again, at William's Creek, Cariboo District, situate in latitude 53° , or 5° north of New Westminster, the site of our most extensive gold mines, and at an altitude of 4,200 feet above the level of the sea, the weather of all seasons is most variable, subject to violent storms of rain and thunder, both in summer and winter.

The winter begins in October and lasts till April, the thermometer varying from ten above to twenty below zero; snow generally falling in January and February to a depth of seven to ten feet.

The present meteorological observations may be taken to represent chiefly the features of the climate of that portion of the Colony occupying the southern corner of the Cascade Range.

Snow not exceeding a foot in depth except in extraordinary winters; and the summer season very much like that of England, with less rain in June, July and August.

Extract of meteorological observations taken at the Government House, New Westminister. B. C., during the year 1865 :---

The day on which most rain fell, and which measured 1.64 inches, was on the 28th November.

The prevailing direction of wind was E. and N. E.

Ozone, registered for nine months only, gave a greater quantity than Ozone, former years, as shewn by the test papers; its mean daily number would be represented by five on the scale, and often indicated as high as nine.

An earthquake was felt a few minutes after nine p.m. on the 25th August.

Heavy thunder and vivid lightning occurred. on June 20th, July 15th, August 6th and September 12th.

Cómparison of COMPARISON of Mean Results for three Years; also Mean Result for the results. Year 1865.

> The observations for the above three years were taken by the Royal Engineers, and were discontinued on the disbandment of the detachment in 1863, and were not resumed till January, 1865.

> Rain was more equally distributed throughout all the months in 1862, than in 1860 or 1861.

In the winter months, January to March, and October to December, 31.682 inches of rain fell in 1862, 41.230 in 1861. and 40.586 in 1860.

In the remaining months, 15 785 inches fell in 1862, 19,255 in 1861, and 13 834 in 1860.

The prevailing direction of the wind during rain in each year, was E. and S. E. The absolute limiting nights of frost in the three years were nearly the same.

The observations were taken by second Corporal P. J. Leech, and Lance Corporal J. Conroy, R. E.

> R. M. PARSONS, Captain, R. E.

MEMO.:—The meteorological observatory at the camp, New Westminster, was discontinued in 1866 for lack of funds.

APPENDIX G.

EXTRACT FROM PAMPHLET BY HENRY DE GROOT,

Published in 1859.

The climate of the Pacific coast, as is well known, is no where so severe Climate. in the same parallel of latitude, as that of the Atlantic, the difference varying from fifteen to twenty degrees, that is, we have to go some 1,200 miles further south on the Atlantic side of the continent, to find a mean winter temperature corresponding to that on the Pacific side. And though the climate of British Columbia forms no exception to this rule, it is somewhat varied, certain belts of country being warm and dry, while others are moist and of a more equable temperature. Thus we have a district extending from the mouth of the Fraser River inland, about 150 miles, characterized by a humid climate, and in which the thermometer of Fahrenheit rarely falls below ten or rises above ninety degrees in the course of the year.

Throughout this region rain is abundant during the spring. During Rain fall, summer and autumn, falling not only in frequent showers, but continuing sometimes for several days together.

Snow also falls here in the winter from one to two feet, often more in Snow fall. the northern part of the district, though hardly so much near the sea.

It is not apt to lie more than a week or two at a time, it then melting and the ground remaining bare for a like interval, to be again succeeded by another fall, and so on throughout the winter, which generally breaks up in the early part of March. The damp and cloudy weather here prevalent during the summer prevents the heat reaching so high a point as further in the interior.

When the atmosphere is clear heavy dews fall at night, and fogs at all Dews and Fogs.

Beyond this wet section of country, the northern limits of which cross the Lillouet route in the vicinity of Anderson's Lake, and the Fraser between the Upper Canon and the Forks, lies a district of about equal breadth characterized by greater heat and aridity, and which though situate further north, and generally more elevated, is scarcely any colder in the winter, and has even less snow than the country further south along the lower Fraser.

North of this, again, is another belt having a more humid climate, showers being frequent in the summer, and the winters somewhat more rigorous.

Taken altogether then, the climate of British Columbia, though subject to much fluctuation, and varying with locality, cannot be considered one of great severity; neither the heat of summer nor the cold of winter reaching such extremes as in Canada, or the Northern States of the Union.

As evidence on this point, it may be stated that the snow along the valleys of the Upper Fraser and its tributaries, rarely ever exceeds eighteen inches in depth, and for the most part does not even reach six inches, while a great portion of the time there is none at all on the ground during winter.

The larger lakes never freeze over, nor do the Fraser or other large streams ever close entirely up.

Stock is able to subsist on the bunch grass throughout the winter, and Food of Cattle

even work animals keep in tolerable condition on the rushes that grow in the bottoms without other feed.

On the divides and more elevated places, the depth of snow as well as the degree of cold, depends of course on the height of the locality; the traveller encountering snow in some places he may have to pass, twice as deep as that found in the valleys.

Climate of the

There was no snow or frost of any consequence on the Upper Fraser Upper Fraser. river last year, until about the first of December, when the weather suddenly became cold, the snow falling to a depth of five or six inches, and even a foot, on the lower part of the river.

> The smaller streams and the ditches at the same time became covered with ice, and the ground froze to the depth of several inches, interfering seriously with, and for the most part putting a stop to, mining operations.

> This weather after continuing for two or three weeks, moderated, and for the next five weeks, but little snow fell, while the thermometer in two or three instances only, went below twenty degrees, fluctuating between that point and forty-five degrees.

> After this mild period came another spell of cold and varying weather, which held for three or four weeks, when the snow and ice mostly disappeared, and the Indians leaving their winter houses, declared that season at an end.

> The miners also get to work in their claims, and have not since been interrupted.

> This was early in the month of March, since which time the weather has been constantly growing warmer, the thermometer having fallen but a few times below the freezing point.

> During March the weather was showery, with some slight frosts and falls of snow in the early part of the month. Much the same kind of climate as above described, prevails throughout the regions lying between and bordering on the Kamloops and Great Okanagan Lakes, as well as the extensive districts to the north and east,

APPENDIX H.

EXTRACT FROM PAMPHLET BY DR. CHARLES FORBES, M.R.C.S. ENGLAND, SURGEON ROYAL NAVY.

Published by the Colonial Government, Vancouver Island, 1862.

The following meteorological observations having reference to the tables Causes of difappended, will show the character of the seasons which have prevailed on the ference of clicoast generally, for the last fifteen years, and will further elucidate the subject mate. by pointing out the causes of the difference observable between the littoral and inland insular climates.

On the western side of the North American Continent, the summer heats are modified by the boreal currents and melting snows of the watersheds, while the severity of winter is not increased by a sweeping Arctic current such as washes the eastern shores.

Arctic currents do sweep down, however, and in summer are felt far south, below the latitude of San Francisco. but, more diffused, they do not lower the temperature in a corresponding degree, and the coast, open to the warm rays of the western sun, and the moist westerly winds, presents to equal latitudes on the eastern side, very unequal isothermal conditions.

A more extended series of observations is needed, before any general deductions can be made whereby to recognize the existence of any cycle, or predicate the possible recurrence of any particular season.

Enough, however, is known to give the general character already assigned to the climate of Vancouver, viz. :---a dry, warm summer, a bright and beautiful autumn, an open, wet winter, and spring. Severe and exceptional seasons occurring at irregular intervals.

The winter of 1846 was remarkably severe, the cold setting in on the Winters. 5th of January, and continuing with severity until the middle of March, during which time the Columbia River was frozen, the thermometer ranging five degrees below zero.

1847.—Verv mild throughout.

1848.—The cold weather began on the 17th December, the Columbia River froze over, but the ice broke up before New Year's Day, the river remaining open.

1849.—The cold weather set in on the 27th November, when the moon was at full; clear days and sharp frosty nights continued till the 10th December, when the Columbia was covered with floating ice, and snow began to fall heavily.

This continued till the 18th (seven inches of snow on the ground), when it became mild, with S.E. winds and rain, and open weather continued to the end of the month.

These remarks apply to the coast generally; the following have reference specially to Vancouver :---

The year 1850, as shewn by a thermometric register, kept at Fort The year 1850, Victoria, (see tabular statement, page 71), was fine throughout. It shows that on V. I. there were in that year 201 fine days, 96 overcast and foggy, 97 rainy, and 17 and weather. days on which snow fell.

This, however, is not critically correct, as respects doing justice to the

fine weather, for under the two last heads are included all days on which rain or snow fell, although the amount might be triffing.

Maximum temperature of air in shade

At 8 a.m., 65° Fahr., on 20th June, 1850.

At 2 p.m., 84° ,, 26th ,,

At 8 p.m., 73° ,, 28th July ,

Minimum temperature of air in Shade

At 3 a.m., 14¹° Fahr., on 4th December, 1850.

At 2 p.m., 24⁵ ,, ,,

At 8 p.m., 16° "

Mean daily temperatures given in Abstract Appendix No. 1 (see page 72.) Snow began to fall on the 5th January. On the 24th there were 17 inches on the ground, which, however, was all gone by the 28th. The maximum temperature for January was 47° Fahr. The minimum temperature 21° Fahr., on the 23rd.

February was open and mild. On the 12th gooseberry buds were opening; some hail showers and frost towards the end of the month. Maximum temperature 58°. Minimum temperature 26° Fahr.

March.—Variable weather, slight snow storms in early part, but so partial, that on the 2nd, early plants were coming into leaf in sheltered spots, native hemp was three inches high, elder bush putting out leaves. On the 7th, the catkins of the palm willow in full bloom. On the 29th there was still snow on the ground, and buttercups in flower. Maximum temperature 60°. Minimum 35° Fahr.

April.—High winds, altering with calms. Strawberries coming into bloom on 13th. Maximum temperature 69°. Minimum 35° Fahr.

May.—Fifteen fine clear days, twelve overcast, four rainy. On the 1st, plains covered with verdure, the turn-cup lily, heartsease, crowsfoot, jonquil, and many other flowers in full bloom, camass flowering, spring wheat and peas rising, early potatoes above ground. On the 4th, campaniola and lupin coming into flower, wild cherry and serviceberry coming into blossom, and wild vetch flowering in warm places. On the 6th, apple tree in blossom, strawberries forming. 7th, potatoes planted in March and April coming up. 12th, early beans in bloom. 18th, wild rose coming into bloom. 25th, strawberries ripening. 31st, wild gooseberries ripening. Maximum temperature 79°. Minimum 39° Fahr.

June.—Twenty-three fine clear days, seven overcast and foggy. On the 14th, queen of the meedow and golden rod in bloom. 17th, potatoes flowering. Maximum temperature 84°. Minimum 47° Fahr.

July.—Twenty-two fine days, nine overcast. Maximum temperature 82°. Minimum 52° Fahr. 11th, barberry and raspberries ripe. On the 17th, first double rose on Vancouver Island came into flower.

August.—Twenty-six fine days, five overcast. Maximum temperature 79°. Minimum 53° Fahr. On the 16th, distant thunder, high wind, N.E.

September. — Twenty-four fine days, six overcast. Maximum temperature 74°. Minimum 45° Fahr. On the 7th, heavy dews.

October.—Twenty fine days, ten overcast. Maximum temperature 70°. Minimum 38° Fahr.

November.—Thirteen fine days, fourteen overcast, three rainy. On the 19th, a heavy gale of wind, felt simultaneously along the whole coast. Maximum temperature 55°. Minimum 32° Fahr.

December.—Ten fine days, sixteen overcast, four rainy, one snowy-Fraser River frozen on the 4th, ice quickly broke up. Maximum temperature 48°. Minimum $14\frac{1}{2}^{\circ}$ Fahr.

Other years,

The above gives the general character of the year 1850, and may be taken as a good type of a season, intermediate between the severity of 18±6,

70

143 24 16

and the mild open winters, which prevailed until 1859-60; when the cold set in in November, and continued for some months with heavy falls of snow.

From March, 1860, the weather was mild throughout, and continued so through the winter, and into the spring of 1861.

The summer of this latter year was very hot and dry, the early autumn was very fine and clear, with occasional cold, south-easterly winds, heavy rains in November, and early part of December.

The tabulated statement at page 72, for the year 1860-61, shows the ranges of the barometer, thermometer, (wet and dry bulbs), number of days fine, rainy, &c., and furnishes a good comparative estimate of climatorial variation.

Care must be taken, however, to bear in mind, that in consequence of Special inits insular position, washed by an ocean having a remarkably low temperature, fluences in V the littoral climate of Vancouver, differs materially from that of the inland plains and valleys, therefore the register No. 2, for 1860-61, kept on board one of H.M. ships, is peculiarly interesting, as showing what range the thermometer takes in the shade, when removed from all possible influences of radiated or reflected heat.

To this cause is to be assigned the differences in the mean daily temperatures, observable on comparison of the different months in the two years, both ashore and afloat, and not simply to change or variation of climate.

Barometer. Meteorological observations.

In the quarter ending 30th June, 1860, the highest barometric range was in April, 30.33; the lowest 29.25. In the same month, there were seventeen fine days, seven rainy, and six overcast, with variable and light winds from east and south. Sea water 50° Fahr., the hygrometric observations show an average difference of 3° 7-10 Fahr., between the wet and dry bulbs. Average temperature 511° Fahr.

In May the barometer had an average range of 30.04. There were eighteen fine days, nine rainy, and four overcast, with variable winds, chiefly from south-west. Sea water 51° Fahr. The thermometer average 551° with 4°1-10 Fahr., difference between wet and dry bulbs.

June.-- Twenty fine clear days, six rainy, and four overcast. Barometric range, average 30.02. Average of thermometer 61°, and difference of bulbs 4°7-10. Sea water 55° Fahr.

July .-- Sixteen fine days, six foggy, seven rainy. Average range of barometer 29 93, thermometer 60°1-10 Fahr., hygrometer 31° Fahr. Sea water 581° Fahr. Prevailing winds, south and south-east, with calms.

August .--- Twenty-four fine days, seven rainy. Average range of barometer 30.01, thermometer 63¹/₂° Fahr., hygrometer 1°. Sea water 58¹/₂° Fahr. Winds S.W., S. and S.S.E.

September .-- Eighteen fine days, seven rainy, five overcast. Average range of barometer, 30.12, thermometer 57⁴,° Fahr., hygrometer 1°. Sea water 55° Fahr. Prevailing winds S. and S.S.E.

October.—Thirteen fine days, eleven rainy, seven overcast Average range of barometer 30.01° , thermometer 54° Fahr., hygrometer 103-155. Sea water 50° Fahr. Winds N.E., variable, calms.

November.—Ten fine days, twelve rainy, eight overcast. Average range of barometer 30.18, thermometer $49\frac{1}{2}^{\circ}$ Fahr., hygrometer 1°1-30 Fahr. Sea water $47\frac{1}{2}^{\circ}$ Fahr. Prevailing winds N. and S. W., to E.S.E.

December.—Fifteen fine days, nine rainy, seven overcast. Average range of barometer 29.96, thermometer, 42° Fahr., hygrometer, $1^{\circ}5.6$ Fahr. Sea water $45\frac{1}{2}^{\circ}$ Fahr. Winds N. and N.E., variable, frequent calms.

January.—Ten fine days, eleven rainy, ten overcast. Average range of barometer 30.01, thermometer 38° Fahr., hygrometer 3° Fahr. Sea water 431° Fahr. Winds variable, frequent calms.

February.—Nine fine clear days, seven rainy, eleven overcast, one snowy. Average range of barometer, 29.94, thermometer $44\frac{1}{2}^{\circ}$ Fahr., hygrometer 3° Fahr. Sea water $43\frac{1}{2}^{\circ}$ Fahr. Winds light, variable, frequent calms.

March.—Fifteen fine days, four rainy, nineteen overcast, three snowy. Average range of barometer 25.02, thermometer 46° Fahr., hygrometer $2\frac{1}{2}^{\circ}$ Fahr. Sea water $44\frac{1}{2}^{\circ}$ Fahr. Winds, light, variable.

The importance of a knowledge of the remarkable differences observable in these registers, kept one on shore, the other afloat, is obvious both in a sanitary and agricultural point of view.

The humidity of the atmosphere can be only estimated by the above average difference between the wet and dry bulbs.

The absence of thunderstorms is a remarkable fact. Distant thunder is heard at times, but very rarely does the electrical discharge take place over Vancouver.

APPENDIX I.

EXTRACT FROM WORK ON VANCOUVER ISLAND AND BRITISH COLUMBIA,

By J. Despard Pemberton, Esq., Published in 1860.

Proposed British Emigrant and Postal route from Canada to the Pacific through British Columbia.

Climate.

As some very erroneous impressions, regarding the climate of the different localities through which the proposed line must pass, prevail, I may be excused for making the following remarks.

It is commonly said that in point of temperature, in North America, the same effect is experienced by travelling through 1° of longitude westward, as by travelling through 1° of latitude southward.

This is manifestly an exaggeration; still it is a fact that, as we move westward, the climate becomes milder, and the average annual temperature is increased.

This increase of temperature, in the region we are speaking of, on the same latitude, amounts probably from side to side of the continent, to 15° Fahr., an effect, perhaps, produced by the summer winds of the Pacific, which blow almost constantly from west or north-west, wafting warmth and moisture through the passes of the rocky chain. But whatever the cause, the fact is certain ; the south part of Vancouver Island, for instance, having a climate much milder than in England, is a hundred miles north of Quebec.

An isothermal line drawn across the continent would, of course, be far from straight, but the general obliquity of such a line may be judged of in this way:—If such a line were drawn from New York it would pass through Lake Winnepeg to Fort Simpson; in other words, if New York were with respect to latitude, similarly placed on the West Coast, Fort Simpson, a thousand miles north of it, would enjoy a temperature equally favorable with it.

Mr. Blodget, who has published an extensive work on the Climatology of the United States, remarks that nine-tenths of European Russia,—the main seat of population and resources—is farther north than St. Paul; that, in fact, Pembina is the climate equivalent of Moscow, and for that of St. Petersburg (which is in 60° north) we may reasonably go to latitude 55° on the American continent. Like European Russia, also, the Sascatchewan district has a climate of extremes, the thermometer having a wide range; but it is well understood that the growth of the cereals, and of the most useful vegetables, depends chiefly on the intensity and duration of the summer heats, and is comparatively little influenced by the severity of winter cold, or lowness of the mean temperature during the year.

Therefore, it is important to observe that the Northern shore of Lake Huron has the mean summer heat of Bordeaux, in Southern France, namely 70° Fahr., while Cumberland House, in latitude 54°, longitude 102°, on the Sascatchewan, exceeds, in this respect, Brussels and Paris.

The United States Army Meteorological Register has ascertained that the line of 70° mean summer heat, crosses the Hudson River at West Point, thence descends to the latitude of Pittsburg, bu twestward is traced through

Increase of temperature towards the west.

Comparison with Russia.

Isothermal line.

Sandusky, Chicago, Fort Snelling, and Fort Union, into British America. "It is warmer," he says, "at Fort Benton on the Missouri, in long. 1101° " west, and lat. 47¹° north for every season, than at St. Paul, Minnesota.

"The mean winter temperature at Fort Benton is 25°, and the same " as that of Chicago, Toronto, Albany, and Portland, Maine.

"At St. Paul it is but 15°, or 10° less. It is not so cold as this on the " main (south) branch of the Sascatchewan."

Allowing the 15° Fahr. before mentioned; considering 1° latitude south equal to 1° Fahr. ; also as usual, 300 feet of altitude equal to 1° Fahr. ; the average climate of the Vermilion Pass would probably resemble that of Moose or York factories, in the southern part of Hudson's Bay, of which Dr Rae says the summer there extends from early in June to early in November,-five Mr. A. C. Anderson's opinion on this subject, from his long resimonths. dence in the country, is entitled to attention: of the Upper Fraser he says :---

"The regular freshets begin at the latter end of April, and last during Freshets " May and June.

"About the 15th of June may be regarded as the culminating point; and " by the middle of July the waters are generally greatly subsided.

"There is rarely a freshet of much consequence at any other season; but " this sometimes happens, and I have known a sudden freshet from heavy rains " in October, raise the river beyond the summer limit.

"Snow begins to fall in the mountains early in October.

Snow.

"In July there is still snow for a short distance on the summit of the "Fort Hope trail, but not to impede the passage of horses. From the " middle of October, however, to the middle of June, this track is not to be " depended upon for transport with pack animals.

"The summer climate about the Forks is dry, and the heat is great.

"During winter, the thermometer indicates occasionally from 20° to 30° Climatic " of cold below zero of Fahr. ; but such severe cold seldom lasts on the upper variation. " parts of Fraser's River for more than three days; the thermometer will "then continue to fluctuate between zero and the freezing point, until " possibly, another interval of cold arrives.

" But the winters are extremely capricious throughout these regions, and " no two resemble each other very closely.

"In general the snow does not not fall deep enough along the banks of " main streams to preclude winter travelling with pack animals. The quality " of the pasture is such (a kind of bunch grass in most places) that animals " feed well at all seasons.

"There are many spots between the Similikameen Valley and Okanagan " that are specially favorable for winter ranches.

" In some the snow never lies, however deep it may be around."

Mr. John Miles, on May 1st, found the Sascatchewan country completely free from snow, and the river very full of water.

Of a climate known to be capricious, whether we compare seasons or localities, it is of course impossible to speak with certainty; but, we have evidence enough to justify the inference that Vermilion Pass would be open at least five or six months, (perhaps seven) out of the twelve, and the remaining portions of the route much longer.

One peculiarity of the climate of the country, it requires in England an effort to realise. Surrounded by snowy peaks, the air is often not only warm but sultry. Even at Victoria, where snow seldom exceeds a few inches, or Langley, we have evidence of this every day. The snow itself is not of the damp, compact nature we are accustomed to, it is light, dry, and drifting ; on

this account, when it does come to thaw, it disappears with astonishing rapidity. The annexed data extracted from the reports of the Secretary of War, Secretary of U.S., 1853-1854, record some particularly interesting facts on this point.

War.

"Mr. Pinkham crossed the mountains from Walla-Walla to Seattle, by "the Yakima pass, the summit of which he crossed on the 21st of January. "For about six miles on the summit, the snow was found to vary from four "feet to six feet in depth, occasionally seven feet.

"The area covered by snow exceeding twelve inches in depth, was some-"what less than seventy miles; of this forty five miles were two feet, and "upwards; twenty miles were four feet, and upwards; and five miles were "six feet and upwards.

"All the snow was light and dry; it was the accumulated snows of the "winter to January 21st; deposited in successive layers of two inches to two "feet, which have generally lain undisturbed since their fall; and they present "little obstruction to removal in comparison with the compact drifted snows "of the Atlantic States. The winter and spring temperatures of the Yakima "pass, 3000 to 4000 feet elevation, are given as follows :--November, 36°; "December, 28°; January, 28°; February, 30°; March, 31°; April, 38°.

"The mean temperature at Puget Sound, from observations extending "over four years, is exactly 10° higher than these; at the Sound the winter "rain is 20.6 inches, and since more rain usually falls in the neighborhood of "mountains than on plains, and snow occupies from ten to twelve times the "bulk of an equal quantity of rain, it is probable that the accumulated snows "of winter, in the Vermilion Pass, would exceed twenty or twenty-one feet, "but that the Pass would frequently be open in December. and passable "in May."

5 7 ġ 4 METEOROLOGICAL ABSTRACT for Escuimelt Van

In the table on the two preceeding pages will be found a statement of the Weather at prevailing weather, at Esquimalt, for one year, viz., from the 1st April, 1860, Esquimalt. to the 1st April, 1861, inclusive, which may be taken as a fair specimen from which to form an average conclusion.

This goes far to prove that we enjoy, as a rule, fine weather. Of the 365 days of the year, no fewer than 187, or 51 per cent., were fine, the remainder being dull, showery, rainy, &c.

During the winter months, fine weather accompanying frost is by no means uncommon, or of short duration.

Rain fell on 118 days, or once every $3\frac{1}{11}$ days; most heavily and fre-Rain. quently during the winter months, from October to February. Snow fell on twelve days only, and then neither heavily nor for any length of time. The thermometer fell only eleven times below freezing, during the year, a good indication of the mildness of the winter.

Heavy and prolonged fogs prevail during October and November. In the summer, mists are usually rare, partial, and transitory.

The highest summer temperature shown in the table was 72° (9th Temperature. August); June, July, and August, being the warmest months of the year. The lowest, 23¹/₂°, the coldest months being December, January, and February. The annual thermometric range was $48\frac{1}{2}^{\circ}$, while the greatest daily range (23°), occurred in March, and the smallest during October.

The extremes of temperature are, therefore, by no means great, a good index of the equable character of the climate, and of the absence of sudden and violent changes.

The columns indicating the difference between the wet and dry bulb thermometers (a good criterion of the amount of moisture in the atmosphere), shew that during the entire year, even during the winter months and the rainy and foggy weather of October and November, the air is not unfrequently very dry. The greatest difference between the wet and dry bulbs was 83° (June)—it has been observed as high as 13°, (5th May, 1861,) and the least maximum difference, $2\frac{1}{2}^{\circ}$ (September).

The dampest months of the year were from September to January Moisture. inclusive, the dampest of all being October, when fogs are often prevalent.

The barometric variations are neither great nor frequent, the range for . he entire year being only 1.50 inch.

The wind columns shew the great frequency of calm mornings and Wind. evenings, while entire calm days occurred about once in every ten.

The average force of wind for the entire year was only $1\frac{7}{10}$, scarcely equal to a light breeze, the highest being nine. High winds and squally weather are unusual in summer, they chiefly visit us in the spring and winter months.

The following table will shew the direction of those winds which occurred during the year with a force equal to a fresh breeze :-

Esquimalt, Vancouver Island, 1860--61. Table of Winds with a force at and above 5, (fresh breeze).

Rain.

۸

Thus it appears that high winds are commonest in April, and blow chiefly from the south and south-west, forming sixty-seven per cent. of the strong breezes which occur during the entire year. Strong northerly winds are rare even in winter. The per-centage from the west is, however, unusually large. When westerly winds do occur, they are often violent.

Southerly winds prevail, as a rule, during the year, and occur in the proportion of sixty-seven per cent.

Next to these in the order of frequency are the northern, eastern, and western. The southerly winds, which blow nearly all the year round, and those in winter from the north, may be said to prevail in the southern extremity of Vancouver Island.

The less prevalent easterly and westerly winds usually occur during the winter months, especially December and January; in the summer, very rarely.

The above table shows that the winds which most frequently accompany rain are southerly or sea breezes, principally S.W. These almost invariably accompany the showers of spring and summer, and often occur with the heavier and more prolonged winter rains—although northerly and easterly winds, both land breezes, are those which usually follow the latter, and together form about one-third of the winds which succeed rain.

The following are the usual characteristics of the different seasons:----

The spring is short, and lasts from the beginning or middle of March to the end of April or beginning of May. In early March the weather undergoes a marked change, and a drier and milder atmosphere forms a decided contrast to that of the cold and wet winter months that precede it. Trees bud and come into leaf, and, towards its close, various wild plants, e.g., the Colinsia Tullium, &c., are in flower. The prevailing weather is characterized by fine mild days, still alternated, however, with occasional rain and squalls. Towards the latter end of April, fine weather has fairly set in, with mild dry south and south-west winds, but farming operations may usually be commenced with the utmost safety in the beginning or middle of March, as the keen biting "March winds" of the English climate, so detrimental to the

Characteristics of seasons. Spring.

80

budding fruit and vegetation generally, are seldom, and never severely, felt here.

Our beautiful and more protracted summer begins with Mayjand ends with Summer. September. During these glorious months we are cheered by a bright sun, a clear and often cloudless sky, lasting frequently for days together, with gentle sea and land breezes. Rain falls seldom, and never heavily; fogs and mists are rare; the season is delightful. Sometimes, indeed, the power of the sun becomes excessive, and the soil very arid from the want of rain; but these drawbacks are but trifling, and do not interfere, to any appreciable extent, either with individual arrangements, or agricultural or horticultural operations. The heavy English "harvest rains" of August and September are unknown in Vancouver Island, and the crops are usually sown, reared, cut, and housed with fine weather.

The autumn, which lasts during October and November, presents a Autumn. marked change. Cold and moist northerly winds succeed the dry southerly breezes of summer; fogs begin in October, and occasionally during the latter end of September, with a moist atmosphere and frequent rains. These, however, alternate with periods of fine mild weather, sometimes lasting for ten days or a fortnight, and forming what, in the aggregate, is termed the "Indian summer." So mild, however, is the temperature, comparatively speaking, even at the latter end of November, that wild strawberries may occasionally be seen in bloom.

During the winter, which lasts from the beginning of December to the Winter. end of February, cold moist northerly and southerly winds prevail, with frequent rains and occasional fogs, the latter, however, less common than in the autumn. This state of things is often pleasantly varied by periods of fine, clear, frosty weather, lasting from two to four, or even eight or ten days. The thermometer is seldom much below zero, snow is uncommon, and neither falls heavily nor lies long, nor are the frosts intense or long continued, ice being seldom more than one inch thick. So mild is the usual winter weather of this colony, that most farmers leave their stock unhoused and at large during the entire season. More severe and prolonged winters occasionally occur, however, as during the past year of 1861-62, and during 1852-53, but these are exceptional, and do not happen more frequently here than in England and other countries with similar climates.

In the British

Timber.

height. No pines have been met with as large as these. Near Humboldt, I noticed a forest of firs (which resembled the Douglas, but had smaller foliage and cones), in which a diameter of from 14 to 15 feet, and a corres-Douglas pine. ponding height, was not uncommon. A few trees of the Douglas kind, of similar size, are found on the banks of the Columbia. Colonies, trees exceeding 9 or 10 feet in diameter, and 270 or 300 feet in height, are rarely met with. In the very large trees, alluded to as being found south of 49°, the annual rings are large and soft, and the timber

comparatively weak. In this respect, the timber north of 49° being of more moderate dimensions, has decidedly an advantage. There the Douglas fir, which, with the silver fir (grandis), is the most abundant on the coast, will, I should think, prove, on being properly tested, to be the strongest fir or pine in existence. Broken in a gale, the stem is splintered to a height of 20 feet at least, and when being hewn down, it is astonishing to observe how small a portion of the trunk will withstand the leverage of the whole tree. On account of the quantity of resin it contains, the timber is exceedingly durable. The bark resembles cork, is often 8 or 9 inches thick, and makes a capital fire. H. M. S. Thetis was sparred with it,-I am not aware with what result. If the wood is not too heavy, I should think it will make the best spars in the service.

Monzies and other pine.

On the banks of the Nitinat Inlet and elsewhere, forests of the Menzies pine occur, very suitable in point of size for first-class spars. This wood appears to work beautifully. Hemlock spruce (Canadensis), from which laths are made, is very common. The banks of the Columbia, near Colville, appear to grow *ponderosa* almost exclusively. A small pine (*inops*), a portion of the bark of which Indians eat, is constantly met with near The water, whether in the lowest swamps, or basins on mountain tops. Weymouth pine (Strobus), is common everywhere. The P. Nootkatensis I have not met with. These are but a few of the firs or pines which are generally met with. A series of experiments to test their physical properties has been commenced, but is as yet too incomplete for publication.

Although spar-timber is common everywhere, the trees grow larger and straighter in the still valleys bordering on the Gulf of Georgia, than where more exposed on the coast.

There are two occasions on which touring in a pine forest is far from entertaining, viz. :--In a storm ; when tree after tree, with a noise like thunder, comes crashing to the ground; and, secondly, when the forest is on fire. It is difficult to conceive anything more dismal than the appearance of charred and branchless forests where fires have swept. It is not uncommon in autumn \clubsuit see the country in this way illuminated by a blaze extending for miles in every direction.

Of oak there are two kinds; the timber is weak, and the trees usually Oak. show symptoms of decay.

If curled maple is in England valuable for furniture, as I am told it is, Maple and it may be of service to some one to know that it grows in abundance on arbutus. the banks of the rivers in these Colonies. The trunks of the *Arbutus* grow very large, and the wood in color and texture so much resembles box, that for many purposes it might supply the uses of the latter. It is, however, specifically lighter.

The country also produces cedar, or rather cypress (*Cupressus thyoides*), Other timber³ juniper, yew, birch, poplar, sorbis, &c., but I never noticed ash, beech or elm.

APPENDIX L

EXTRACT FROM DR. A. RATTRAY'S WORK ON VANCOUVER ISLAND AND BRITISH COLUMBIA, 1862.

TIMBER PRODUCE.

Timber: its value and uses.

The timber produce of Vancouver Island and British Columbia, will soon be of great value in the colonies themselves, especially in the former, likely to possess a large mercantile navy.

In addition to this, the increasing scarcity in many countries of timber adapted for mast and spar-making, and for ship-building purposes generally, makes the produce of these colonies of peculiar value, especially to extensive ship-building countries like Great Britain. Both colonies are, for the most part, forest-clad, and much fine timber exists.

The pine, or cone-bearing family, predominates throughout, and forms a marked feature in the scenery.

The following list comprises the most useful and important trees :--

Varieties.

1. Coniferæ (Cone-bearing family).

- - Balsamea Canada Balsam Pine. ,,
 - ,,
 - ,,
 - Mitis ••
 - Nigra Black Spruce. ,,
 - NobilisNoble Fir. ,, Grandis.....
 - ,, Monticola

2. Amentaceae (Catkin-bearing family).

Platanus Acerifolia	Plane.
Populus Tremula	Aspen.
, Balsamea	Cotton Wood.
Quercus Nigra	
" Alba	White Oak.

3. Ericacea.

Arbutus Laurifolia......Arbutus.

The Douglas pine preponderates at the southern end of Vancouver Island, and along its east and west coasts, with occasional patches of oak, and a few maple, cypress, arbutus, yew, and other varieties.

Maple is said to abound towards its north end. Many of the trees on the hilly ground are of stunted growth ; but, in the valleys and low ground, especially along the west coast, heavy timber is plentiful, especially the lofty Douglas pine, admirably adapted for mast and spar-making. Measrs. Stamp & Co., at Barclay Sound. are actively pushing the timber trade, and

Pine.

Maple.

are exporting cut timber to Australia, &c.; and are also under contract to supply the English Government with spars.

Much of the oak of this colony is of good size and quality, and well Oak. adapted for knee-timber and general ship-building purposes.

Their wood has been of incalculable utility to these young colonies, where it still forms the principal fuel, and the most generally employed material for house-building, land-fencing, &c., &c.

Saw mills are much required at the southern end of Vancouver Island, to supply the colony with sawn timber; much of that now in use is imported from the neighbouring American territory. The principal difficulty in this colony, is the scarcity of labor.

The timber produce of British Columbia is both varied and valuable; the country along the Lower Fraser especially is densely wooded.

The forests of this colony may be said to be inexhaustible, and will long Inexhaustible yield timber in abundance when the timber produce of Vancouver Island has forests. been consumed. British Columbia has superior facilities for the development of an export trade in timber. By its large and rapid rivers, especially the Fraser and its tributaries, and the Harrison and other lakes, which usually communicate with them, the timber of the north-east, east, and southern parts of the interior, and of the whole of the extensive tract of wooded country which the Fraser River drains, may be floated down to New Westminster or Victoria for shipment : while that of the hilly region, which lies between the western coast and the Cascade and Harrison Lake ranges, may be similarly transported by the smaller streams, and those numerous arms of the sea, which are found in that direction, e.q.:—Bentinck Arm, Howe Sound, Bute Inlet, &c., where saw mills may easily be established for the manufacture of spars and timber, similar to that now in operation at Barclay Sound. The timber found in British Columbia, though more varied than that of

Vancouver Island, is even less used, except for fuel and house-building.

Several markets may be found for the manufactured timber of Van- Markets for couver Island and British Columbia; in England, spars, oak, and other timber. woods are much required for ship-building; in Australia and South America, timber is scarce; and in China, especially in the south, whose teeming population are compelled to sacrifice everything to agriculture, and where wood is therefore scarce, valuable, and in great demand for house, junk, and boat building, the soft woods of Vancouver Island will find a ready sale ; and also charcoal, the principal fuel used by the Chinese for culinary and general domestic purposes.

The collection of turpentine, an exudation from various species of pine, Turpentine. might be profitable in these colonies. The Douglas pine yields it in considerable quantities, though probably not so abundantly as the Carolina pine, the ordinary source of the turpentine of English commerce.

The manufacture of tar, invaluable to Vancouver Island as a commercial Tar and pitch. and fishing colony with a numerous shipping, has not yet been attempted in either colony.

In the southern states of America, it is made from the heart-wood of dead pines, which becomes charged with resinous juice long after the tree has died, from which it is extracted by an easy process, usually carried on in the forest. From tar thus obtained, pitch may be procured by distillation.

The manufacture of potash, or pearlash, (the blacks salts of commerce,) Potash and now extensively carried out in the forests of Canada, might be attempted pearlash. in those of British Columbia and Vancouver Island with their surplus wood.

In Canada, the hard woods yield it in greatest abundance, especially elm, ash, birch, beech, and maple; and the salt is made by dissolving and evaporating the ashes left on burning the trees. This salt will be useful in the colony for soap, candle, and other manufactures.

APPENDIX M.

COPY OF LETTER FROM ROBERT DUNSMUIR, Esq.

Nanaïmo, B. C., September 20, 1871.

THE HONORABLE H. L. LANGEVIN, C. B. Minister of Public Works.

Coal Mining on Vancouver Island.

SIR,-Being informed by Captain Spalding that you wished to have a few remarks from me relative to the seam of coal which we are about to work on Vancouver Island, and not knowing the exact points on which you would feel most interested, as very little has been done so far towards its developement, I have considered it not amiss to state in the first place how it was discovered.

When I was in the bush about three miles from the sea, in the month of October 1869, not exactly for the purpose of prospecting for coal, but being thoroughly acquainted from past experience with all the coal formation in this country, I came across a ridge of rock, which I knew to be the strata overlying the lowest seam that had as yet been discovered here. A short time afterwards, I sent two men to prospect, and in three days discovered a seam of coal 3¹/₆ feet in thickness, 30 feet below the tops of the ridge, dipping S.E., one foot in six.

After procuring from government a right to further prospect, I sunk a slope $97\frac{2}{3}$ yards in the seam, and mined therefrom about 500 tons, twenty-five tons of which were taken on board of H. M. S. Boxer, for trial. The same quantities were taken from the Vancouver Coal Company's Douglas' Pit and Newcastle Mine. A copy of the report of said trial, I herewith enclose.

While working the slope, I had a party of men prospecting in the same ridge, about half a mile nearer the sea, and found the same seam about 27 feet from the surface. I afterwards had a bore put down about $\frac{3}{4}$ of a mile from the beach, and struck the seam 8 feet in thickness, at a depth of 132 This place was as far to the dip of the field, as the grant from Governfeet. ment allowed me to go. Hence you will observe that the distance between where I first discovered the coal, and the bore is 23 miles, with an average width of $\frac{1}{2}$ mile, which I believe contains coal, although there may be a few "faults" met with, as is the case in all coal fields, but considering the depth of the bore in such a distance from the "out crop" they cannot be of much consequence.

It was my intention to have worked, for the present, the second place where the coal was found, merely because it would have shortened the length of the tram-road; but as I was again strolling through the bush about ten weeks ago, about 200 yards from the place I had determined to work, I chanced to come upon the root of a fallen tree, which I thought had a peculiar appearance. On examination I found coal sticking on the upturned root, and digging a little under it, Isaw that coal had been there, but was now removed by the action of fire.

I then sent for two of the workmen, who brought picks and shovels, and in half-an hour, we discovered a seam of coal left 3 feet thick, the top of course having been consumed. I set the men to work about 80 yards further to the dip, and 9 feet below the surface found the scam of 9 feet in thickness.

Discovery of

mine.

Trial of the coal.

A. 1872

For a distance of 54 yards by 2 yards wide, I have had the surface removed, and from the cut intend to "open cast" some acres to the rise, where the surface to be removed will only average about $4\frac{1}{2}$ feet.

I expect to find a rock roof to the dip of this, in which case the coal will have to be mined, this I may remark is rather a remarkable discovery, no machinery being required for a considerable time. The quality of the coal appears to myself and others to be superior to the other.

It is my opinion that the average yield of this field, per acre, will be Anticipated about 7,000 tons; but should the thickness of 9 feet continue, it will be much yield of the more. H. M. ships have been supplied with most of the coal procured from the first opening, and under considerable difficulties, as the coal had to be teamed to the beach and put alongside in lighters.

At present I am constructing a tram-road to, and building a wharf at, Departure Bay (one of the finest harbors on the coast, where vessels of any draught can enter), and intend to be able to supply coal within two months. There are about forty men employed at present, twenty-five whites, seven Chinese, and the remainder Indian.

Should you wish information regarding coal or coal mining in this Province at any future time, I shall always feel it an honor to do what I can in supplying it to the best of my ability,

I have the honor to be, Sir,

Your obedient servant,

(Signed) ROBERT DUNSMUIR.

APPENDIX N.

EXTRACT FROM LETTER ON GOLD MINING AT GERMANSEN CREEK.

GEBMANSEN CREEK, August 16th, 1871.

Nature and I did not think the country sufficiently prospected to vield of gold justify me in writing definitely about the mines before this. There are two diggings. and a half miles of this stream that will pay from \$10 to \$75 per day to the hand; the diggings are shallow, and will be speedily worked out. Of course there may be some few claims that will prove blanks, but they cannot be many, as prospects have been obtained in a majority. South-east from this Mansen River place there has been a stream called Mansen River discovered. So far the stream, with few exceptions, has proved a blank, but on both sides of the creek there are many benches and joints of bare rock and gravel, that pay well; in some instances they pay as high as \$75 per day to the man. I think if there was water to be had to wash the flats, the yield of gold from that section would be very heavy indeed. There are several small creeks and gulches putting into Mansen Creek that prospect well, two of which pay remarkably. Lost Creek, for five days' work, with five men, cleaned up 192 oz. of gold dust. The new company below them consider their ground equally as good. The companies above them have not got their claims opened, but think the pay will be found as good there as below. The next is Black Duck Gulch. The best pay is from \$40 to \$50 per day to the man, four companies working. There are some of the oldest and best miners in the mountains prospecting. One of them, who came in for a fresh supply of provisions, thinks they are going to develop some rich mines fifty miles north-west from here. I think there is a lively future for this section of British Columbia. I consider there are mines enough found at present to justify a population of 2,000 in risking the country. The only drawback to the old route will be the road tolls. If they can be removed I have no doubt the Proposed pack travel and merchandise will come that way. The trail cut by the packers can be made a splendid road for pack animals at a little expense; at least, all who have travelled over the route say so. From this town to Stewart's Lake the distance will not exceed 115 miles; from thence to Quesnel 175 miles. Good feed can be had all the way. There is some talk of gold quartz being found. I cannot trace the report to reliable men. Next week almost every company, for a distance of two miles, will be washing. I cannot give you an idea as to how many men there are here. There are quite a number leaving, and of course they will give the country a bad name, but I feel certain time will prove this to be a great mining region. We need a weekly mail to the place. Cannot something be done to induce the new Government to send us a mail twice a month in winter, and as often as it is sent to Cariboo in the summer? There are about twenty houses erected here, many of which compare favorably with the mercantile houses in Barkerville. About three miles of this creek are abandoned by the miners, but many contend the pay will be found in the flats where it is not in the stream. I believe the largest pieces found in Mansen River district weigh \$80 and \$100. Nothing so heavy has been found in this creek this season.

Black Duck Gulch.

road.

Necessity for a mail.

APPENDIX O.

AN ORDINANCE TO AMEND THE LAWS RELATING TO GOLD MINING.

[2nd April, 1867.]

WHEREAS it is expedient to amend and assimilate the laws relating to Preamble. Gold Mining in this Colony :

1. From and after the passing of this Ordinance "The Gold Mining Repeals for "Ordinance, 1865," and the proclamations, rules and regulations and ordi-mer Acts. nances repealed thereby, are hereby repealed; provided, however, that such repeal shall not in any manner affect any rights acquired, or any liabilities or penalties incurred thereunder, or any remedies or punishments prescribed thereby, but such remedies and punishments may still for the purposes of such enforcement, but not further or otherwise, be available and capable of imposition.

2. In the construction of this Ordinance the following expressions shall Interpretation have the following interpretation respectively, unless there be something clause. inconsistent or repugnant thereto in the context :---

The words "Her Majesty" or "the Crown" shall mean Her Majesty, Her Majesty, Her heirs and successors; the word "Governor" shall mean and include any the Crown. person administering the Government of this Colony; "Gold Commissioner" Gold Comshall include Chief Gold Commissioner, Assistant Gold Commissioners and missioner. others lawfully acting as Gold Commissioners, either under special authority or the authority of this Ordinance;

The word "Mine" shall mean any locality in which any vein, stratum or Mine. natural bed of auriferous earth or rock shall be mined; and the verb "to mine" shall include any mode or method whatsoever of working the same for the purpose of obtaining gold therefrom;

"The word "Claim" shall mean the personal right of property or Claim. interest in any mine: and in the term "Mining Property" shall be included Mining every claim, ditch, or water privilege used for mining purposes, and all other property. matters and things thereto belonging, or used in the working thereof;

"Bar Diggings" shall mean every mine over which a river extends Bar diggings. when in its flooded state;

"Dry Diggings " shall mean any mine over which a river never extends ; Dry diggings.

The mines on benches shall be known as "Bench Diggings," and shall Benchdiggings for the purpose of ascertaining the size of claims therein be excepted out of the class of "Dry Diggings;"

"Streams and Ravines" shall include water-courses, whether usually Streams and containing water or not, and all rivers, creeks and gulches; Ravines.

"Hill Claims" shall include all claims located on the surface of any hill ; Hill claims.

"Ditch" shall include a flume or race, or other artificial means for Ditch.

conducting water by its own weight, to be used for mining purposes ;

"Ditch Head" shall mean the point in a natural watercourse or lake Ditch head. where water is first taken into a ditch;

"Free Miner" shall mean a person named in, and lawfully possessed of Free Miner. a valid existing Free Miner's Certificate, and no other;

10 - 12

And words in the singular number shall include the plural, and the masculine gender shall include the feminine gender ;

The words "Record," "Register," and "Registration," as hereinafter used, shall be synonymous.

3. This Ordinance shall be divided into twelve parts :----

The first part relating to the appointment of Gold Commissioners and their jurisdiction;

The second part to Free Miners and their privileges;

The third part to the registration of claims and Free Miners' general rights :

The fourth part to the nature and size of claims;

The fifth part to bed-rock flumes ;

The sixth part to the drainage of mines ;

The seventh part to mining partnerships and limited liability ;

The eighth part to administration;

The ninth part to leases ;

The tenth part to ditches;

The eleventh part to Mining Boards and their constitution ;

The twelfth part to the penal and saving clauses.

PART I.

Appointment of Gold Commissioners and their Jurisdiction.

Gold Commissioner to be appointed by the Gover. nor.

Mining Court in eachDistrict

Jurisdiction of Gold Commissioner.

Same powers as Judge of the Supreme Court in enforcing decision.

Prescribed forms unnecessary.

Cases.

4. The Governor may from time to time appoint such persons as he shall think proper to be Chief Gold Commissioner and Gold Commissioners either for the whole Colony or for any particular Districts therein, and from time to time in like manner fix and vary the limits of, and subdivide such Districts, and make and revoke all such appointments.

5. Within every such District or Districts there shall be a Court to be called the "Mining Court," in which the Gold Commissioner of the District shall preside as judge thereof.

6. Such "Mining Court" shall have original jurisdiction as a Court of Law and Equity to hear and determine all mining disputes arising within its District, and shall be a Court of Record with a specific seal; and in determining suits or actions brought therein, the Gold Commissioner may render such judgment, or make such order or decree as he shall deem just, and for the purposes thereof, and for enforcing the same he shall have and exercise, save as hereinafter excepted, the same powers and authority, legal and equitable, as are now exercised in the Supreme Court of Civil Justice of British Columbia, by any Judge thereof; Provided, however, that the Gold Commissioner shall, if desired by both parties to a cause in cases of liquidated damages, or if desired by either party to a cause in case of unliquidated damages, summon a jury of from three to five Free Miners to assess the amount of such damages.

7. No prescribed forms shall be necessary, provided that the substance of the matter complained of be properly expressed in writing and embodied in a summons to be issued from the Court, and served on the opposite party, or as may be directed, and such summons may, by leave of the Gold Commissioner, be amended, if requisite, by either party, upon such terms as he may impose, and the sum of ten dollars shall be charged for every summons so issued.

8. Where disputes arise concerning mining property, portions whereof Jurisdiction beyond disare situated in adjoining or different districts, the Gold Commissioners of trict in certain either of such districts before whom the dispute is first brought shall determine it.

90

Record, &c.

Ordinance divided into twelve parts. 9. The Gold Commissioner may, in cases of disputed boundaries or Mining surmeasurements, employ a surveyor to mark and define the same, and cause the veyor. reasonable expense thereof to be paid by either or both of the parties interested therein.

10. He shall also have the power to lay over any or all claims within Laying over his district, for such period and under such circumstances as he may think claims. proper.

11. He shall have power to order any mining works to be so carried on Protection as to ensure the safety of the public, or protect the interests of claim holders against dangerous or bed rock drains; and any abandoned works may by his order be either works. filled up or guarded to his satisfaction, at the cost of the parties who may have constructed the same, or in their absence then upon such terms as he shall deem expedient.

12. It shall be lawful for him, upon being so requested, to mark out Plots for for business purposes or gardens, on or near any mining ground, a plot of traders and ground of such size as he shall deem advisable; subject, however, to all the existing rights of Free Miners then lawfully holding such mining ground, and their assignees. And any building erected, or improvements made thereon for any such purposes, shall in every such case be erected and made at the risk of the persons erecting and making the same; and they shall not be entitled to any compensation for damage done thereto by such Free Miners so entitled in working their claims *bona fide*.

13. It shall be lawful for him, upon being so requested, to mark out Compensation for business purposes or gardens, on or near any mining ground not previously how allotted. pre-empted, a plot of land of such size as he shall deem advisable, to be held subject to all the rights of Free Miners to enter upon and use such lands for mining purposes, upon reasonable notice to quit being given to the occupier, such notice to be subject to the approval of the Gold Commissioner; and, further, upon the payment of due compensation for any crops thereon, and for the buildings and improvements erected on such plots; such compensation to be assessed by the Gold Commissioner previous to entry, with or without a jury of not less than three.

A monthly rent of five dollars shall in every such case be payable by Rent for same. the grantees of such plot, or their assignees, to the Gold Gommissioner.

14. Any judge of the Supreme Court of Civil Justice of British Forms of Columbia may, with the advice and consent of the Gold Commissioner of any proceeding particular district, from time to time make, repeal, and alter any rules and regulations for the conduct of the business before such Gold Commissioner, and for the costs incident thereto.

15. Where any mining cause, wherein the sum of damages sought to Cause under be recovered shall be less than two hundred and fifty dollars, is brought in \$250. the first instance before the Supreme Court of Civil Justice of British Columbia, it shall be lawful for the court, after issue joined, to direct the cause to be tried before any particular Gold Commissioner, upon such terms as the court shall think fit.

16. All jurors and witnesses summoned under and by virtue of the Jurors' and powers contained in this Ordinance, shall be entitled for their attendance to witnesses' fees. receive such compensation as the court may direct,

17. When in civil cases, the subject matter in any mining dispute is Appealin civil in value more than two hundred and fitty dollars, an appeal shall, cases over save as hereinafter excepted, lie from the decision, ruling, judgment, order, or decree of the Gold Commissioner, to the Supreme Court of Civil Justice of British Columbia; provided, however, that the decision of the Gold Commissioner, or of a jury summoned under the provisions of this ordinance, upon all matters of fact, shall be final and conclusive, and no appeal shall lie therefrom. No appeal shall be allowed in any cause, unless notice thereof be given

No.--

in writing to the opposite party, or his attorney, within four days after the decision complained of, and also security be given, to the approval of the Gold Commissioner, for the costs of the appeal, and the amount (if any) payable under the judgment. And the said Court of Appeal may make such order as it shall think fit. Such appeal may be in the form of a case settled and signed by the parties, their counsel, or attorneys.

PART II.

Who may be Free Miners, and their privileges.

Who may be a 18. Every person over but not under sixteen years of age shall be entitled to hold a claim. Minors, who shall become Free Miners, shall, as regards their mining property and liabilities contracted in connexion therewith, be treated as adults.

19. Every Gold Commissioner, upon payment of the sums hereinafter mentioned, shall deliver to any person applying for the same, a certificate, to be called a Free Miner's Certificate, which may be in the following form :-

BRITISH COLUMBIA.

Free Miner's Certificate, not Transferable.

Date,-

Valid for — years.

This is to certify that A.B., of ---- has paid me this day the sum of -and is entitled to all the rights and privileges of a Free Miner, for ----- year from the date thereof.

(Signed) G. B.

Chief Gold Commissioner, or Gold Commissioner (as the case may be.)

Certificate for one or three vears.

Three days' grace to renew certificate. Lost certificate.

20. Such Free Miner's Certificate shall, at the request of the applicant, be granted and continue in force for a period of one year, or three years, from the date thereof, upon payment by such applicant, to the use of Her Majesty, of the sum of five dollars for one year, and fifteen dollars for three years. Such certificate shall not be transferable, and only one person shall be And every holder of a certificate shall have three clear days named therein. after the expiration thereof, and no longer, to renew the same.

21. If any Free Miner's Certificate shall be accidentally destroyed or lost, the same may, upon evidence thereof and upon payment by the applicant of two dollars and fifty cents, be replaced by a true copy thereof, signed by the Gold Commissioner of the district wherein the original certificate was Every such new Certificate shall be marked "Substituted Certificate." issued. And unless some material irregularity be shewn in respect thereof every original or substituted Free Miner's Certificate shall be evidence of all the matters therein contained.

22. Every Free Miner shall during the continuance of his certificate, and no longer, have the right to enter and mine upon any of the waste lands of the Crown, not for the time being occupied by any other person.

23. In the event of such entry being made upon lands already lawfully occupied for other than mining purposes, previous to entry full compensation shall be made to the occupant or owner for any loss or damages he may sustain by reason of any such entry; such compensation to be determined by the nearest stipendiary magistrate or Gold Commissioner, with or without a jury of not less than five.

24. No person shall be recognized as having any right or interest in or to any mining claim or ditch, or any of the gold therein, unless he shall be,

Right to enter and mine.

Compensation

to prior occu-

pants.

Must be a Free Miner in certain cases.

Free Miner. Free Miners under age to be treated as adults. Miner's Certificate.

Sessional Papers (No. 10.)

or in case of disputed ownership, unless he shall have been at the time of the dispute arising, a Free Miner.

PART III.

Registration of Claims and Free Miners' General Rights.

25. Every Free Miner locating a claim must record the same at the Registration office of the Gold Commissioner of the district within which the same is of claim. situated, within three days after the location thereof, if located within ten miles of the said office. One additional day shall be allowed for such record for every additional ten miles, or fraction thereof. Such record shall be made in a book to be kept for the purpose, in which shall be inserted the name of the claim, the name of each locator, the number of his certificate, the locality of the mine, the date of his recording the same, and such other matters and things as may be deemed requisite by the Gold Commissioner.

26. All claims must be re-recorded annually, but any Free Miner Re-registrashall, upon application, be entitled to record his claim for a period of two or tion. more years, upon payment of the sum of two dollars and fifty cents for each and every year included in such record; and such record shall, without renewal, and for and during the time therein mentioned, but for no further period, have the same force and effect as if the same had been recorded annually.

27. It shall be lawful for the Gold Commissioner to demand from any Production of Miner, applying to record a claim, the production of his certificate, and upon certificate his neglect or refusal to produce the same, to refuse to record such claim or tration. interest therein.

28. In case of any dispute, the title to claims will be recognized Priority of according to the priority of registration, subject to any question which may rights recog-be raised as to the validity of the record itself, and, subject further to the ing to priority terms, conditions and privileges contained in Clause 25.

29. No transfer of any claim, or of any interest therein, shall be tion. Transfersmust enforceable, unless the same or some memorandum thereof shall be in writing, be in writing signed by the transferrer, or by his lawfully authorized agent, and registered and registered. with the Gold Commissioner.

30. For every record made, and leave of absence granted, or any General fee on other matter or thing whatever relating to mining, for which a special fee recording mining mat-shall not have been provided, the Gold Commissioner shall charge a registra- ters. tion fee of two dollars and fifty cents as herein defined.

31. The books of record shall, during reasonable hours, be open to Fee for search. public inspection, and the sum of one dollar, and no more, shall be charged for every search made therein.

32. Every copy of, or extract from, any record or register kept under Certified copy this ordinance, and certified to be a true copy or extract, under the hand of of any record the Gold Commissioner or other person entrusted to take and keep such to be evidence. record or register, shall, in the absence of the original register, be receivable in any judicial proceeding as evidence of the matters and things therein contained; and the sum of one dollar and twenty-five cents shall be charged Charge therefor each copy of a record so certiled.

33. Every Free Miner shall be allowed to hold, at the same time, any Free Miner number of claims acquired by purchase, but only two claims by pre-emption may hold any in the same locality, save as hereafter provided, viz. —one quartz claim, and claims by pur-one other claim; subject, however, to the laws as to record, occupation, and chase, and two otherwise, for the time being in force. And every Free Miner may sell by pre-emp-tion, and more mortgage, or dispose of the same. He shall also be entitled, in addition to than two by

of registra-

pre-emption in above, to hold a pre-emption claim on each (but not on the same) hill. certain cases. creek, ravine, or bench.

> 34. The interest which a Free Miner has in a claim shall be deemed and taken to be a chattel interest equivalent to a lease, for such period as the same may have been recorded, renewable at the end thereof, and subject to the conditions as to forfeiture, working, representation, registration, and otherwise, for the time being in force with respect to such claim.

35. Every Free Miner shall, during the continuance of his certificate. have the exclusive right of entry upon his own claim, for the minerlike working thereof, and the construction of a residence thereon, and shall be entitled exclusively to all the proceeds realized therefrom ; provided that his claim be duly registered, and faithfully and not colorably worked, but he shall have no surface rights therein.

Provided also that the Gold Commissioner may, upon application made to him, allow adjacent claim-holders such right of entry thereon as may be absolutely necessary for the working of their claims, and upon such terms as may to him seem reasonable.

36. In addition to the above rights, every registered Free Miner shall covers not only be entitled to the use of so much of the water naturally flowing through or past his claim, and not already lawfully appropriated as shall, in the opinion of the Gold Commissioner, be necessary for the due working thereof.

37. No claim located and recorded in any district, within fourteen days Claims record before, or at any time after the claims therein shall have been laid over to the ensuing season or other specific date, shall be deemed to be so laid over, unless so much work shall have been bond fide expended thereon by the holder thereof as shall, in the opinion of the Gold Commissioner, fairly entitle him to have such claim laid over.

> 38. A claim shall be deemed to be abandoned and open to the occupation of any Free Miner, when the same shall have remained unworked by the registered holder thereof for the space of seventy-two hours, unless sickness or other reasonable cause be shewn; Sundays, and such holidays as the Gold Commissioner may think fit to proclaim, are to be omitted in reckoning the time of non-working.

39. Every full-sized claim, as defined in this Ordinance, shall be repreclaims must be sented and bona fide worked by the owner thereof, or by some person on his behalf.

> 40. The Gold Commissioner shall have the power to regulate the number of miners who shall be required to work in prospecting a claim, or set of claims, until gold in paying quantities is found.

41. Every forfeiture of a claim shall be absolute, any rule of law or equity to the contrary notwithstanding.

42. Where any undivided mining interest in a Company shall be claimed by any Free Miner, by reason of any defect in the title or representation thereof, which defect shall be first established to the satisfaction of the Gold Commissioner, the Company shall be bound-

Either to admit the claimant as a member of the Company to the extent of such defective interest,

Or, to stake off, to the separate use of the claimant, any portion of claim for him. ground in the joint ground of the Company, equal in extent to such defective interest.

> In such latter event, the claimant shall not be entitled to any interest whatever in the remaining ground of the company, or be considered a member thereof, by reason of such appropriation. In either case, the company shall pay all costs and expenses, incurred by reason of allowing the non-representation aforesaid. The Gold Commissioner may make such order as to costs as he may deem just.

PART IV.

Nature and Size of Claims.

43. From and after the date hereof, the size of claims shall be as Size of claim. follows :-For "Bar diggings," a strip of land 100 feet wide at high-water Bar diggings. mark, and thence extending into the river to its lowest water-level.

44. For "Dry diggings," 100 feet square.

45. "Creek claims" shall be 100 feet long, measured in the direction Creek claims. of the general course of the stream, and extending in width from base to base of the hill on each side. Where the bed of the stream or valley is more than 300 feet in width, each claim shall be only 50 feet in length, extending 600 feet in width. Where the valley is not 100 feet wide, the claims shall be 100 feet square.

46. "Bench claims" shall be 100 feet square.

Bench dig-47. The Gold Commissioner shall have authority, in cases where benches gings. are narrow, to mark the claims in such manner as he shall think fit, so as to include an adequate claim.

48. Every claim situated on the face of any hill, and fronting on any Hill claims. natural stream or ravine, shall have a base line or frontage of 100 feet, drawn parallel to the main direction thereof. Parallel lines drawn from each end of the base line at right angles thereto, and running to the summit of the hill, shall constitute the side lines thereof. Posts of the legal size shall be planted, 100 feet apart, on both the base line and the side lines. The whole area included within such boundary lines shall form a "Hill Claim."

49. In tunnelling under hills, on the frontage of which angles occur, or Tunnelling which may be of an oblong or elliptical form, no party shall be allowed under hills. to tunnel from any of the said angles, nor from either end of such hills, so as to interfere with parties tunnelling from the main frontage.

50. The Gold Commissioner shall have power to refuse to record any Gold commishill or tunnel claim on any creek, which claim, or any part thereof, shall sioner may re-include or come within 100 feet of any guich car tributony of such areas include or come within 100 feet of any gulch or tributary of such creek. certain tunnel

51. Tunnels and shafts shall be considered as appurtenant to the claim claims. to which they are annexed, and be abandoned or forfeited by the abandon- claim involves ment or forfeiture of the claim itself. tunnel, &c.

52. For the more convenient working of back claims on benches or slopes, the Gold Commissioner may, upon application made to him, permit the owners thereof to drive a tunnel through the claims fronting on any creek, ravine, or water-course, and impose such terms and conditions upon all parties as shall seem to him expedient.

53. Quartz claims shall be 150 feet in length, measured along the lode Quartz claims. or vein, with power to follow the lode or vein and its spurs, dips, and angles anywhere on or below the surface included between the two extremities of such length of 150 feet, but not to advance upon or beneath the surface of the earth more than 100 feet in a lateral direction from the main lode or vein, along which the claim is to be measured.

54. In quartz claims and reefs, each successive claimant shall leave Regulation for three feet unworked, to form a boundary wall between his claim and that of working. the last previous claimant, and shall stake off his claim accordingly, not commencing at the boundary peg of the last previous claim, but three feet further on. If any person shall take out his claim contrary to this rule, the Gold Commissioner shall have the power to remove the first boundary peg of such wrong-doer three feet further on, notwithstanding that other claims may then be staked out beyond him, so that such wrong-doer shall then have but 147 feet. And, if such wrong-doer shall have commenced work immediately at the boundary peg of the last previous claim, the Gold Commissioner may remove his boundary peg six feet further on than the open work of such wrong-doer,

Dry diggings.

claim.

and all such open work, and also the next three feet of such space of six feet, shall belong to and form part of the last previous claim, and the residue of such space of six feet shall be left as a boundary wall. Every such boundary shall be deemed the joint property of the owners of the two claims between which it stands, and may not be worked or injured, save by the consent of both owners.

55. If any Free Miner, or party of Free Miners, shall discover a new mine, and such discovery shall be established to the satisfaction of the Gold Commissioner, the first discoverer, or party of discoverers, if not more than two in number, shall be entitled to a claim double the established size of claims in the nearest mines of the same description (i.e., dry, bar, or quartz diggings). If such party consist of three men, they shall collectively be entitled to five claims of the established size on such nearest mine ; and if of four or more men, such party shall be entitled to a claim and a half per man, in addition to any other claims legally held by pre-emption or otherwise. A new stratum of auriferous earth or rock, situated in a locality where the claims are abandoned, shall, for this purpose, be deemed a new mine, although the same locality shall have been previously worked at a different level. And dry diggings discovered in the vicinity of bar diggings, shall be deemed a new mine, and vice versa. A discoverer's claim shall, for all purposes, be reckoned as one ordinary claim.

feet above the surface, and firmly fixed in the ground. No boundary peg shall be concealed, moved, or injured without the previous permission of the Gold Commissioner. Any tree may be used as a stake, provided that it be cut down to at least the legal height, and the stump squared as above. 57. In defining the size of claims, the same shall be measured horizontally, irrespective of inequalities on the surface of the ground.

marked by four pegs, at least four inches square, standing not less than four

56. All claims shall be as nearly as possible in rectangular forms, and

58. The Gold Commissioner may, where deemed advisable, mark out a space in the vicinity for deposits of leavings and deads from any tunnel, claim, or mining ground whatsoever, upon such terms and conditions as he may impose.

PART V.

Bed-rock Flumes.

59. It shall be lawful for the Gold Commissioner, upon the application more than five hereinafter mentioned, to grant to any Bed-rock Flume Company, for any term not exceeding five years, exclusive rights of way through and entry upon any mining ground in his district, for the purpose of constructing, laying, and maintaining bed-rock flumes.

60. Three or more Free Miners may constitute themselves into a Bedrock Flume Company, and every application by them for such grant shall be in writing, and shall state the names of the applicants, and the nature and extent of the privileges sought to be acquired. Ten clear days' notice thereof shall be given between the months of June and November; and between the winter months of November and June, one month's notice shall be given, by affixing the same to some conspicuous part of the ground, and a copy thereof upon the walls of the Gold Commissioner's office of the district. Prior to such application, the ground included therein shall be marked out by posts of the legal size, placed at intervals of 150 feet along the proposed main line or course of the Flume, with a notice affixed thereto stating the number of feet of ground claimed on either side of such main line. And it shall be competent to any Free Miner to protest before the Gold Commissioner, within such times as aforesaid, but not afterwards, against

Grant for not years.

Rights of way

Where so con structed and abandoned.

64. Claim-holders so constructing their own flumes at their own expense, through their respective claims, shall also keep their flume clear of obstruction. and they shall be entitled to all the gold found therein, but they shall be subject to the same rules and regulations with regard to cleaning up the flume. repairs and other matters in which both parties are interested, as may be adopted by such Bed-rock Flume Company; and such claim-holders shall have the right at any time before the abandonment of their claim or claims, to become members of the Bed-rock Flume Company, by uniting their claims and flume with the ground and flume of the Company, and taking an interest proportionate to that which they shall cede to the company; or should they so desire, they may abandon their claims and flume, and such abandonment shall enure to the use and benefit of the Bed-rock Flume Company.

65. Every Bed-rock Flume Company shall, for each of the men constituting the same, construct and lay at least fifty feet of flume during the first year, and 100 feet annually thereafter.

66. Any Free Miner or Miners lawfully working any claims where a entitled to use Bed-rock Flume may be constructed, shall be entitled to tail their sluices, hydraulics, and ground sluices into such flume, but so as not to obstruct the free working of such flume by rocks, stones, boulders, or otherwise.

67. All Bed-rock Flume Companies shall register their grant when obtained, and a registration fee of twenty-five dollars shall be charged therefor ; and they shall also pay an annual rent of twelve dollars and fifty cents for each quarter of a mile of right of way legally held by such Company. No re-registration of a grant shall be necessary.

68. Bed-rock Flumes and any interest or interests therein, and all fixtures are hereby declared to be personal property, and may be sold, mortgaged, transferred, or otherwise dealt with as such.

PART VI.

Drainage of Mines.

69. It shall be lawful for the Gold Commissioner to grant to any Free sioner may grant rights of Miner, company of Free Miners, or joint stock companies, for any term not exceeding ten years, exclusive rights of way through and entry upon any mining ground mining ground in his district, for the purpose of constructing a drain or drains for the drainage thereof.

> 70. Every application for such grant shall be in writing, and shall state the names of the applicants, the nature and extent of the proposed drain or drains, the amount of toll (if any) to be charged, and the privileges sought to be acquired.

> 71. Upon such application a notice, similar to that required upon application for the right of way for Bed-rock Flumes, shall be given.

> 72. Every application for such grant shall be accompanied by a deposit of \$125, which shall be refunded in case the application shall be refused by the Government; and if the application shall be entertained, then such sum of \$125 shall be retained and paid into the Treasury of the Colony, to the use of Her Majesty, whether the application be afterwards abandoned or not.

> 73. Such grants shall be made upon such conditions as the Gold Commissioner shall deem reasonable, and shall be embodied in writing.

> 74. The rights of way and entry above mentioned, the power to assess, levy, and collect tolls (not exceeding in amount that mentioned in the application) from all Free Miners using such drain or benefited thereby, shall be given to the grantees.

The grantees shall also covenant therein as follows :----

(a.) That they will construct such drain or drains of sufficient size to meet all requirements within a time (if any) therein named.

Number of feet to be completed within certain times

Free miners flume for tailings.

Ten clear days' notice to be given. Deposit of \$125

Grants to be in writing.

Covenants.

(b.) And have and keep the same in thorough working order and repair. and free from all obstructions, and in default thereof that the Gold Commissioner, for the time being, may order all necessary alterations or repairs to be made by any Free Miners, other than the grantees, at the cost and expense of the latter. Such cost and expense to be levied by sale (subject however to the conditions of the grant), of all or any part of the drainage works, materials, and tolls.

(c.) That they will within a reasonable time construct proper tap drains from or into any adjacent claims, upon being required so to do by the owners thereof, and in default thereof suffer such parties to make them themselves, in which case such parties shall only be chargeable with one-half the usual rates of drainage toll, or such other proportion of toll as the Gold Commissioner shall in that behalf prescribe.

(d.) That they will not in the construction and maintenance of such drains and tap drains, in any way, injure or damage the property of adjacent claimholders, and in the event thereof, that they will make good any damage so sustained.

75. In the construction of drains to be used as tap drains only, three Tap-drains. days' notice given as above shall only be necessary.

76. The Gold Commissioner alone, or if desired by either party, with Damages. the assistance of a jury of five Free Miners, which he is hereby authorized to summon for that purpose, may ascertain whether any and what compensation shall be paid for any damage which may be caused by any such entry or construction as aforesaid.

77. Such grant shall be duly registered as hereinbefore provided, and Registration. the sum of five dollars shall be charged therefor, save when such grant gives the grantees the power and right of collecting tolls, in which case the sum of twenty-five dollars shall, instead of five dollars, be paid as a registration fee. No re-registration of any such grant shall be necessary. An annual rent of twenty-five dollars for each quarter mile, and fraction thereof, shall be paid by Drain Companies collecting tolls, to the Gold Commissioner, such rent to commence from the date of their grant.

PART VII.

Mining Partnerships.

78. All Mining Companies shall be governed by the provisions hereof, Co-partnerunless they shall have other and written articles of co-partnership, properly ship rules if no articles are signed, attested, and recorded.

79. No mining co-partnership shall continue for a longer time than Partnership 79. No mining co-partnership shall continue for a longer time that to continue one year, unless otherwise specified in writing by the parties; but such co- for one year. partnership may be renewed at the expiration of each year.

80. The business of co-partners herein referred to shall be mining, and Co-partnersuch other matters as pertain solely thereto.

81. A majority of the co-partners, or their legally authorized agents, Majority of may decide the manner of working the claims of the co-partners, the number the partners of men to be employed, and the extent and manner of levying assessments to defray the expenses incurred by the company. Such majority may also choose a foreman or local manager, who shall represent the company, and sue Foreman. and be sued in the name of the company for assessments and otherwise; and he shall have power, with the consent of a majority of the company, to bind them by his contracts; and the partnership or company name must be inserted in the record of the company's claims. Any co-partner, or his duly authorized agent, shall be entitled to represent his interest in the co-partnership property to the extent thereof, by work and labor, and so long as such work and labor shall be done and performed to the satisfaction of the

drawn up.

ship business to be mining.

In the event of such workman being discharged by the foreman, foreman. the Gold Commissioner, upon application to him, may summon the foreman before him, and upon hearing the facts, may make such order as he shall deem just.

82. During the time of working, all assessments when levied, shall when leviable. be payable within five days thereafter.

83. In default of payment within such time, the debtor, after having received any notice specifying the amount due by him, shall, upon such amount being ascertained by the Gold Commissioner to be correct, be personally liable to the company therefor, and his interest in the company, if so ordered, shall be sold by the Sheriff in the usual way, for the payment of the debt and costs; and should the amount realized be insufficient to meet the same, the Gold Commissioner shall have the power to issue an order, directed to the Sheriff, to sell such other personal property (if any) belonging to the debtor as may be sufficient therefor.

84. Notices of sale of such debtor's mining or other property, or such part thereof as shall suffice to pay the debt and costs, shall be conspicuously posted up ten clear days prior to the day of sale, in the vicinity of such mining or other property, and at the Court House nearest thereto. Such sale shall be by public auction, and the bidder offering to pay the amount due for the smallest portion of the mining or other property, shall be entitled to such portion. The purchaser, on payment of the purchase money, shall acquire therein all the right and title of the debtor, and shall be entitled to the immediate possession thereof. A bill of sale of the mining property so sold, signed by the Gold Commissioner, and duly recorded, shall confer a good legal title thereto upon the purchaser.

85. After a notice of abandonment in writing shall have been served on the foreman of the company by any member thereof, such abandonment shall be considered absolute, and operate as a discharge against all debts contracted by the company after such notice has been given, and no such member shall be deemed to have abandoned such interest without having served such notice as aforesaid.

Limited Liability.

86. Any mining company, composed of two or more Free Miners, may limit the liabilities of its members, upon complying with the requirements following, that is to say :---

Upon filing with the Gold Commissioner of the district a declaratory statement, containing the name of the company, the area of the ground claimed, the location of the claim, and the particular interest of each member of the company; and also placing upon a conspicuous part of the claim, in large letters, the name of the company, followed by the word "Registered." After such conditions have been complied with, no member of such company shall be liable for any indebtedness accruing thereafter, exceeding an amount proportioned to his interest in the company.

87. No person shall locate, purchase, hold, or enjoy less than onefourth of one full interest of 100 feet, in any company so constituted. This section shall not apply to gold quartz mining claims.

88. All mining companies so constituted shall keep a correct account of their assets and liabilities, together with the names of the shareholders, and the interest held by each, and shall make out a monthly balance-sheet, showing the names of the creditors, and the amounts due to each, and file the same among the papers of the company; and such balance-sheet and all the books of the company shall be open to the inspection of creditors of the company at all reasonable hours.

Assessments, Penalty for default.

89. No member of such company shall, after a bill of sale conveying Cessation of his interest, or some portion thereof, has been duly recorded, or after notices liability. of abandonment, in writing, of his interest shall have been left with the foreman of the company and the Gold Commissioner, be liable for any indebtedness of the company accruing thereafter.

90. No such company shall declare any dividend until all liabilities When dividue shall have been paid.

91. No such company shall be liable for any indebtedness contracted Foreman only by any member thereof, other than its foreman or agent duly authorised.

92. If any such company fail to comply with any of the foregoing Penalty for provisions, such company shall be liable to a fine of not less than twenty-five non-compliance herein. dollars, nor more than one hundred and twenty-five dollars.

93. The Gold Commissioner in each mining district shall keep a book Declaratory exclusively for the purpose, in which he shall record all declaratory state- statement, how filed. ments filed in his office, and another book in which he shall record all notices of abandonment.

94. There shall be paid to the Gold Commissioner, for the use of Her Fee for filing. Majesty, upon the filing of each declaratory statement, the sum of two dollars and fifty cents; and upon the filing of each notice of abandonment, the sum of one dollar, and no more.

95. All other matters not herein provided for shall, as far as is When in practicable, be governed by the provisions of the "Mining Joint Stock force. Companies' Act, 1864," but nothing in the nine preceeding sections contained shall be construed so as to repeal or vary any of the prior or subsequent sections of this ordinance.

96. In the case of any Mining Joint Stock Company, duly registered When persons in this Colony under the provisions of the "Mining Joint Stock Companies' not free miners may Act. 1864," and not under this Ordinance, every shareholder of such company, hold interests though not a Free Miner, shall be entitled to buy, sell, hold, or dispose of any in companies. mining shares therein, anything to the contrary notwithstanding herein contained.

PART VIII.

Administration.

97. In case of the death of any Free Miner, while registered as the Deceased terholder of any mining property, his claim shall not be open to the occupation est. of any other person for non-working or non-representation, either after his decease, or during the illness which shall have terminated in his decease.

98. The Gold Commissioner shall in all such cases take possession of Power of Gold Commisthe mining property of the deceased, and may cause such mining property sioner. to be duly represented, or dispense with the same at his option; and he shall sell and dispose of the same by private sale, or, upon giving ten days' notice thereof, by public auction, upon such terms as he shall deem just, and out of the proceeds pay all costs and charges incurred therein.

99. The Gold Commissioner shall take into his custody and safe keeping, Custody of or order some person so to do, all the property of deceased miners until proper deceased miner letters of administration be obtained.

PART IX.

Leases.

100. All grants under this ordinance for any mining ground, ditch All grants to be in writing. privileges, or otherwise, shall be in writing, in the form of a lease to be signed by the Gold Commissioner, and by the grantees or lessces.

declared. liable for

Except other-101. Save where the contrary is expressed in this Ordinance, the wise expressed following clauses shall apply :- Applications for leases, accompanied by a plan in this Ord-following clauses shall apply :- Applications for leases, accompanied by a plan of the proposed undertaking, are to be sent in duplicate to the Gold Cominance. Applications missioner of the district wherein the ground desired to be taken is situated, must be in duwho shall immediately forward it, with his report, to the Governor for his plicate. sanction, excepting in cases where the lease does not exceed five years; but the ground shall be secured to the applicant until the Governor's decision has Ground must been received. Prior to such application, the ground applied for shall be be marked out marked out by posts of the legal size, and written notice of application, signed and notices by the applicant, shall be fixed to any post nearest to mining claims then being posted up. worked. A copy of such notice shall also be put up at the Gold Commissioner's office.

Deposit of \$125

102. Every application for a lease shall be accompanied by a deposit of of one hundred and twenty-five dollars, which shall be refunded if the application be refused; and if it be entertained, such sum of one hundred and twenty-five dollars shall be retained and paid into the treasury of the Colony, for the use of Her Majesty, whether the application be afterwards abandoned or not. 103. Leases will not in general be granted for a longer term than ten

Leases for ten years.

In Dry Diggings, ten acres.

In Bar Diggings, unworked, half a mile in length along the high water mark. In Bar diggings worked and abandoned, one mile and-a-half in length along the high water mark.

years, or for a quantity of ground greater than that herein prescribed, that

is to say :-

In Quartz Reefs, unworked, half a mile in length.

In Quartz Reefs, worked and abandoned, one mile and a half in length.

With liberty in the two last cases to follow the spurs, dips, and angles on and within the surface for two hundred feet on each side of the main lead or seam.

104. Leases as above will not in general be granted of any land, alluvium or quartz, which shall be considered to be immediately available for being worked by Free Miners as holders of individual claims. Nor will such a lease be granted in any case where individual Free Miners are in previous actual occupation of any part of the premises unless by their consent.

105. Every such lease shall, without expressing the same, be understood rights of the to contain a reservation of all rights of the Crown, and all reasonable prostood, also pub visions for securing to the public, rights of way and water, save in so far as shall be necessary for the minerlike working of the premises thereby The premises demised shall be granted for mining purposes only, Grant to mine demised. and it shall not be competent to the lessee to assign or sub-let the same or

any part thereof, without the previous licence in writing of the Gold Com-Covenants by missioner. Every such lease shall contain a covenant by the lessee to mine the said premises in a minerlike way, and also, if it shall be thought fit, to perform the works therein defined within a time therein limited. And it shall also contain a clause by virtue whereof the said lease may be avoided, provided that the lessee shall refuse or neglect to observe and perform all or any of the covenants therein contained.

shall be bound to supply water to all applicants being Free Miners, in a fair proportion, and shall not demand more from one person than another, except where the difficulty of supply is enhanced.

117. Unless otherwise specially arranged, an annual rent of five annum on fifty dollars shall be paid for every fifty inches of water used for mining purposes, when not sold, and when sold, the rent to be paid for any water privilege shall be in each month one average day's receipts from the sale thereof, to be estimated by the Gold Commissioner, with the assistance, if he shall so think fit, of a jury.

118. Any person desiring to bridge across any stream, or claim, or other place, for any purpose, or to mine under or through any ditch or flume, or to carry water through or over any land already occupied by any other person, may, in proper cases, do so with the sanction of the Gold Commissioner. In all such cases the right of the party first in possession, whether of the mine or of the water privilege, is to prevail, so as to entitle him to compensation and indemnity, if the same be just.

119. In measuring water in any ditch or sluice, the following rules shall be observed :--

The water taken into a ditch shall be measured at the ditch head, with a pressure of seven inches. No water shall be taken into a ditch except in a trough placed horizontally at the place at which the water enters it. The aperture through which the water passes shall not be more than ten inches high. The same mode of measurement shall be applied to ascertain the quantity of water running out of any ditch into any other ditch or flume.

120. Whenever it shall be intended in forming or upholding any ditch, to enter upon and occupy any part of a registered claim, or to dig or loosen any earth or rock, within four feet of any ditch not belonging solely to the registered owner of such claim, three days notice in writing of such intention shall be given before entering or approaching within four feet of such other property.

121. Any person heretofore or hereafter engaged in the construction of any road or work may, with the sanction of the Gold Commissioner, cross, divert, or otherwise interfere with any ditch, water privilege, or other mining rights whatsoever, for such periods as the said Commissioner shall direct.

122. The Gold Commissioner shall order what (if any) compensation for every such damage or interference shall be paid, and when, and to whom, and whether any and what works damaged or affected by such interference as aforesaid, shall be replaced by flumes or otherwise repaired, and in what manner, by the person or persons inflicting any such damage.

123. Upon compliance with the requirements aforesaid, the Gold Commissioner shall certify in writing under his hand that the person or persons named therein were duly authorized to create the damage or interference aforesaid, and have duly fulfilled the requirements herein mentioned, and have also duly satisfied and discharged all damages by him or them occasioned to any persons whatsoever, in respect of the damage or interference rèferred to.

124. Every such certificate shall be recorded by the said Gold Commissioner, in a book to be kept by him for that purpose at his office, and shall be at all times open to inspection, upon payment of a fee of one dollar for every inspection.

125. Every such certificate so recorded shall be sufficient evidence in any court of judicature in the Colony, of all matters and things therein contained or referred to, and shall discharge the person or persons to or for whom the same is granted, from all liability with respect to the damage or interference therein mentioned.

135. No Free Miner or other person shall be eligible as a candidate, unless he shall have been a registered owner of a mining interest in the district, for at least three months previous to the election.

136. Each voter shall have nine votes, but shall not be allowed to give more than one vote to each candidate.

137. The votes of the electors shall be given in person by the voter, and the Gold Commissioner of the district shall act as the returning officer, and shall decide all questions as to qualification and disqualification of the members elect. The first election shall take place on such day as the Gold Commissioner may appoint.

138. If any member shall cease to be a registered Free Miner in the district, or shall be convicted of any misdemeanor, or felony, or of any wilful and malicious contravention of this Ordinance, or of any by-law in force in the district, he shall ipso facto vacate his seat in each case, and not be reeligible, save that a member vacating his seat, only by reason of ceasing to be a registered Free Miner, shall be again eligible at any time upon his becoming a registered Free Miner.

139. Whenever any member shall absent himself from three or more consecutive meetings of the board, whether regular or adjourned meetings, he shall, upon a resolution passed by the Board to that effect, be considered to have vacated his seat therein.

140. The Gold Commissioner shall fill by appointment all vacancies which may arise in the said Board, when the same may occur, and such appointees shall hold office until the next general election.

141. The Mining Board shall, subject to the previous provisions hereof, by laws, &c., have power by resolution to make by laws, which shall be submitted for the approved by approval of the Gold Commissioner, (any by-laws so approved by the Gold the Governor. Commissioner, shall be immediately posted in the Gold Commissioner's Office), and also from time to time to suggest any alteration or repeal of existing laws for regulating the size of claims and sluices, the mode in which claims may be worked, held, and forfeited, and all other matters relating to mining in the district; and any by-laws so made shall be binding in such district, until the same shall have been disapproved by the Governor.

142. Any resolution of such Mining Board may be passed by a bare majority of the members of such Board. The Gold Commissioner shall, within seven days after the receipt of the copy of any such resolution, signed by the Chairman of the Board, concerning any by-law or general regulation which he shall on any grounds deem expedient to lay before the Governor, make and send a fair copy thereof signed by such Gold Commissioner, with his opinion thereon.

143. The Mining Board shall meet at such times as a majority of the said Board shall decide, and one-half of the members of the said Board shall constitute a quorum. Provided, nevertheless, that it shall be lawful for the Gold Commissioner, and so often as in his opinion occasion shall require, to call together such Mining Board.

144. The votes on all resolutions of the Mining Board shall be given by the members personally, and by word of mouth.

145. All questions of order, and of the time and manner of conducting the business of such Mining Board, and of the times and places of meeting after the first meeting thereof, may be decided by the majority of the said Mining Board, either from time to time as any questions shall arise, or by any fixed rules, and others as may be thought advisable.

146. It shall be lawful for the Governor, by an order under the Public Seal of the Colony, at any time to declare the Mining Board in any district dissolved, at a day to be named in such order, and if no day be therein named in that behalf, then as from the date of such order.

106

PART XII.

Penal Clauses and Clauses of Indomnity.

147. 148. All penalties imposed under this Ordinance may be recovered Penalties how forthwith, or at any such reasonable interval after conviction, and non-pay- recovered. ment as shall be allowed, by distress and sale of any mining or other personal property of the offender.

149. All fines and fees whatsoever payable under this Ordinance, All fines and except otherwise expressly appropriated, shall be paid into the Treasury of into the the Colony, as portion of the revenue thereof, to the use of Her Majesty, Her Treasury. Heirs, and Successors.

150. Any person convicted and sentenced to any term of imprisonment Appeal to the beyond thirty days, or to pay any fine beyond \$100 over and above the costs SupremeCourt of conviction, may appeal to the Supreme Court of Civil Justice; provided and Summary that such person do, within forty-eight hours after such conviction, enter into Cases. recognizance with two sufficient sureties, conditioned personally to appear to try such appeal, and to abide the further judgment of the court, and to pay such costs as shall be by such last mentioned court awarded. And the convicting Gold Commissioner may bind over any witness or informant under sufficient recognizances to attend and give evidence at the hearing of such appeal.

151. On any such appeal, no objections shall be allowed to the con-No merely viction on any matter of form or insufficiency of statement, provided it shall formal objec-aupear to the said Supreme Court that the defendent has here in the shall tion allowed. appear to the said Supreme Court, that the defendant has been sufficiently informed of the charge made against him, and that the conviction was proper on the merits of the case.

152. Any person who shall wilfully damage, destroy, or alter any Free Certain Miners' Certificate, or who shall falsely pretend that he is the person named offences. therein, or who shall wilfully destroy or falsify any of the records and registers hereby directed to be kept, shall be guilty of felony, and being duly convicted thereof, shall be liable, at the discretion of the Supreme Court of Civil Justice, to penal servitude for not more than ten years.

153. Any person who shall steal, or sever with intent to steal, any Stealing gold gold or gold dust from any claim, or from any ground comprised in any lease dust from granted under this Ordinance, shall be guilty of felony, and being convicted thereof, shall be liable to be punished in the same manner as in case of larceny.

154. Any person who shall with intent to defraud his co-partner (or in Defrauding cases of agency, his principal) in any claim, secrete, keep back, or conceal any co-partner or gold found in such claim, shall be guilty of felony, and upon conviction felony. thereof, shall be punished in the same manner as if he had feloniously stolen the same.

155. Nothing herein contained shall, save where such intention is Saves existing expressly stated, be so construed as to affect prejudicially any mining rights mining rights. and interests acquired prior to the passing of this Ordinance; and all rights and privileges heretofore and hereunder acquired shall, without the same being expressly stated, be deemed to be taken and held subject to the rights of Her Majesty, Her Heirs and Successors, and to the public rights of way and water of this Colony.

156. This Ordinance may be cited for all purposes as "The Gold Short Title. Mining Ordinance, 1867."

APPENDIX P.

AN ORDINANCE TO FACILITATE THE WORKING OF MINERAL LANDS.

[10th March, 1869.]

Preamble.

HEREAS it is expedient to develope the resources of the colony by affording facilities for the effectual working of silver, lead, tin, copper, coal, and other minerals, other than gold :

Be it enacted by the Governor of British Columbia, with the advice and consent of the Legislative Council thereof, as follows :-

1. From and after the proclamation in this Colony of Her Majesty's Assent to Act, assent to this Ordinance, every person, or association, or company of persons an inineral lands open for whomsoever, shall be free to enter and explore for silver and all the baser metals and minerals, including coal, in and under the mineral lands hereinafter defined, subject nevertheless to the provisions and conditions of this Ordinance, and any other regulations affecting the acquisition and tenure thereof, which may from time to time hereafter be prescribed by law.

2. Every person, association of persons, or company, desirous of acquirlicense for two ing a mine or mining claim under this Ordinance, shall, before entering into possession of the particular part of the said mineral lands he or they may wish to acquire and work for minerals, make application in writing to the Assistant Commissioner of Lands and Works for the district within which the land required is situate, for a prospecting license over such land, for any term not exceeding two years from the date of such application.

3. Every such applicant shall give to such Assistant Commissioner the send place and best practicable written description of the plot of land over which the privilege description to is sought, after having located the same, together with a proper plan or diagram thereof shewing the position of the boundary posts to be set up by the applicant in and upon the land, and by stating in the description any other land marks of a noticeable character; and such application and plans shall be in duplicate, one of which shall be filed of record in the office of the said Assistant Commissioner at the time of its being received by him, and the other transmitted forthwith by the said Assistant Commissioner to the Chief Commissioner of Lands and Works, and retained by him for general reference.

4. Every piece of land sought to be acquired under the provisions of this Ordinance shall, save as hereinafter mentioned, be of a rectangular shape, and the shortest line thereof shall be at least two-thirds the length of the longest line.

5. Where the land sought to be acquired is in whole or in part bounded by mountains, rocks, lakes, swamps, or the margin of a river, or by other natural boundaries, then such natural boundaries may be adopted as the boundaries of the land sought to be acquired, and in such case it shall be sufficient for the claimant to show to the satisfaction of the Assistant Commissioner of the district that the said form conforms as nearly as circumstances permit to the provisions of this Ordinance.

6. If the land sought to be acquired be bounded by land already held under this Ordinance, the line of such land may be adopted by the person so seeking to acquire, notwithstanding any irregularity in such line, which may have been occasioned by the adoption of a natural boundary by the claimant of the adjacent land.

After Queen's mining.

Prospecting years.

Applicant to land office.

Shape of land.

Natural boundaries may be adopted in certain cases.

Lines of adja. cent claims may be adopted.

7. Where a piece of land is partially or entirely enclosed between two Enclosed or more claims, the claimant may acquire such enclosed piece, notwithstand adopted, not-ing any irregularity of form on dimensionation in length of the title ing any irregularity of form or disproportion in length of any of the sides.

8. No applicant shall be entitled to receive a prospecting license until any irregu-larity of shape. he shall have proved to the satisfaction of the said Assistant Commissioner, Application that before making such application he has caused a written or printed notice for prospecof his intention to apply for such a license to be posted on some conspicuous ting license. part of the land applied for by him, and of any adjacent (if any) sett or mining claim, and on the Court House of the district (if any) for fourteen clear days, or if the ground applied for, or any part thereof, has been previously recorded, then for one calendar month previous to his application, and that no valid opposition to his claim has been substantiated before the said Assistant Commissioner, as hereinafter mentioned.

9. Such Assistant Commissioner is hereby empowered and required, On proof of upon receiving satisfactory proof of the said applicant having complied with prospecting the preliminary requirements in that behalf hereinbefore contained, to grant license to issue. to such applicant a prospecting license as aforesaid.

10. Every applicant, upon proving to the satisfaction of such Assistant Extension Commissioner that he has bona fide explored or worked for coal (or other thereof. minerals, as the case may be) during the said term of two years, shall be entitled to an extension of the said term for a second period of one year, and such further time as the Governor shall think fit.

11. A prospecting license may include within the general limits Quantity of therein defined, the following quantities of mineral land, that is to say :---

(1.) In the case of a prospecting license for coal alone, not exceeding 500 in license. acres to each individual applicant, or 2,500 acres to any Association or Company consisting of not less than ten persons.

(2.) In the case of a prospecting license for any other minerals than coal or gold, not exceeding 100 acres to each individual applicant, or 500 acres to any association or company consisting of not less than ten persons.

Out of the above lands the licensee may, at or before the expiration of Licensee may such license, or of any prolongation thereof, select for purchase the portion of select land for Crown Grant, mineral land to be included in a Crown Grant, as hereinafter mentioned.

12. Such license may be in the form marked A. or B. (as the case may Powers of be) in the schedule hereto (which schedule is hereby made part of this license. Ordinance), and shall include full and exclusive power and authority to search for, raise, get, make merchantable, and sell for the use of the licensee, all metals and minerals in such license specified, and none other, within the prescribed limits, to make and erect the necessary roads, works and buildings, for profitably or conveniently carrying on the mining operations therein; with a power to the licensee, at or before the expiration of such license, or any prolongation thereof, upon compliance with the terms and conditions in this Ordinance contained, to claim a Crown Grant of such portion of the mineral land included in his license, as is hereinafter in that behalf more particularly described.

13. The interest of every licensee under this Ordinance shall be deemed On expiry to have absolutely ceased and determined on the expiration or other sooner of license land determination of his license, or any prolongation thereof, unless he shall have comers. prior to such expiration or determination made application for a Crown Grant, as herein provided; and on such expiration or determination a new prospecting license over the same mineral land, or any part thereof, may be made to any new applicant entering into possession, and complying with the requirements of this Ordinance.

14. Every person, Association, or Company, lawfully holding a prospect-Licensee may ing license under this Ordinance, and complying with its provisions, shall, use stone, sand, lime, and until the determination of such his or their holding, and for the purpose of timber.

A. 1872

withstanding

more effectually carrying on mining operations on the premises, be entitled to the free use, without compensation, of a reasonable quantity of any unoccupied and unappropriated stone, sand, lime, and timber which may be on the premises included in such license, and may erect such buildings and machinery, and make and use such roads and works, within such limits, as he shall find necessary for the profitable conduct of his or their mining operations.

Priority of record, priority of right.

Quantity of land in Crown Grant. Coal.

Prospecting license to include right of road or railway to sea.

Compensation to parties affected. Amount how determined.

Commissioner's certificate of amount final.

Saving of right to make any public roads over lands derived from the Crown.

Other minerals. 15. In case of any dispute, the right or title to or in a prospecting ing license, and the possession of any claim or privilege under this Ordinance, will be recognized according to the priority of record or registration with the Assistant Commissioner, subject to any question which may be raised as to the validity of the record itself.

16. The quantity of mineral land for coal mining to be granted to any licensee duly applying for a Crown Grant, and fulfilling the conditions hereinafter in that behalf more particularly mentioned, will be for each Association or Company of ten or more persons not exceeding 1,000 acres, selected out of the premises included in such license.

17. It shall be lawful for the Chief Commissioner of Lands and Works and Surveyor General, upon proof to his satisfaction of the necessity of such grant, and upon approval by him of the plan and sections of the proposed works, which must be submitted to him, and with the sanction of the Governor, to give to any person, association, or company holding a prospecting license or Crown grant under this Ordinance, by any writing under the hand of such Commissioner, a right of way for a road, canal, or railway, from his mining claim to the sea shore, or other line of communication, for any purpose connected with such licensee's or grantee's mining operations, with full power, by himself or themselves, his or their agents, servants, and workmen, and with and without horses, cattle, boats, waggons, carriages, or other conveyances, to enter upon, across, and into any lands or waters between the premises included in such license or Crown grant, and such shore, river, or other line of communication, upon paying reasonable compensation to the owner of such intermediate land for the portions so taken, or for the use so made.

18. The amount, time, and manner of such compensation, and the mode of distribution thereof among the parties claiming to be entitled thereto, shall, upon the application of either party, be fixed by the Assistant Commissioner of the district, and at his discretion, either with or without a jury, consisting of not less than three, nor more than five, persons, which he is hereby empowered to summon for the purpose.

19. The decision of such Assistant Commissioner or jury (as the case may be), certified under the hand and seal of such Commissioner, shall be final, and without appeal; and every such certificate shall be *prima facie* evidence, for all purposes whatsoever, of all the matters and things therein contained, in all courts of the Colony.

20. Provided that nothing herein contained shall be deemed or taken to limit or affect the right of the said Chief Commissioner acting on behalf of the Crown, to lay out and make public highways in or over such intermediate lands or matters aforesaid, or other lands, whenever it shall be deemed for the public interest to create, alter, or maintain public highways, or to vary the same, through lands derived from the Crown.

21. The quantity of mineral land to be granted for mining for all metals and minerals, other than coal and gold, to any licensee duly applying for a Crown grant, and fulfilling the conditions hereinafter in that behalf more particularly mentioned, shall, for each individual applicant, not exceed three chains long by two chains wide; and for each Association or Company of ten persons shall not exceed thirty chains long by six chains wide.

22. Before any such Crown grant shall issue, the licensee applying for Preliminaries the same shall :----

A. 1872

to Crown

(a.) Leave with the said Assistant Commissioner of Lands and Works, and post on a conspicuous part of the premises sought for, and on the Court House of the said district, if any, for at least two calendar months previous to the record of his application for such Crown grant, and prior to the expiration of the term included in his license, or any prolongation thereof, a notice of his intention to apply for such Crown grant, with a diagram of the premises; and shall, for the same space, publish such notice in the Government Gazette, and a newspaper published nearest to the said mine and premises.

(b.) The said Assistant Commissioner shall thereupon post such notice in his office, for a period of two calendar months.

(c.) The said Assistant Commissioner shall (if no adverse claim be filed with him, or if filed, shall have been finally decided), give a certificate to such licensee to that effect.

(d.) Upon the application of the licensee, and delivery of such certificate, the Chief Commissioner of Lands and Works and Surveyor General, shall upon payment to him by the said applicant of such amounts as the said Chief Commissioner may estimate as the probable cost of surveying such premises, cause a survey and plan thereof to be made, to be endorsed with his approval, designating such land by its number on the official records, with the estimated value of the improvements and labor expended on the said land.

23. Upon proof, satisfactory to the said Chief Commissioner, of com-Issue of pliance with the aforegoing provisions, and payment of the amounts next Crown grant. hereinafter in that behalf prescribed, together with the balance (if any) remaining unpaid of the actual cost of survey, a Crown grant shall be issued by the said Chief Commissioner to the licensee applying for the same.

24. For coal lands the price shall be as follows :-

For any quantity up to and including one thousand acres, at the rate of containing coal. five dollars per acre; provided that on proof, to the satisfaction of Government, that 10,000 dollars has been beneficially expended on any land held under prospecting license for coal, a grant of 1,000 acres of the land included in such prospecting license, shall be issued to the company holding such prospecting license, without payment of the upset price of such land.

25. For mineral lands containing other than coal and gold, the price Other minerals. shall be as follows :-

For any quantity of land not exceeding three chains long by two chains wide, the sum of \$100, together with the costs of survey; for any quantity of land not exceeding thirty chains long by six chains wide, in the case of a company of not less than ten persons, the sum of \$250, together with the costs of survey.

26. Upon proof satisfactory to the Chief Commissioner of Lands and Remission of Works and Surveyor General, or other the person appointed for the time being price on proof in that behalf by the Governor and a certificate in writing from such Governor of effectual in that behalf by the Governor, and a certificate in writing from such Commis- work for baser sioner, or other person, to the effect that any licensee or licensees applying for minerals. a Crown grant, has expended in bona fide mining for minerals, other than coal and gold in and under the sett or mining claim for a grant of which he is applying, to the extent of not less in any case than \$1,000, or (if an association or company of three or more persons) of not less than \$5,000, it shall be lawful for a Crown grant to issue to such person, association, or company, without the payment of any, or of only a portion, of the upset price herein fixed for the land to be included in such grant, should the Governor in his discretion so determine.

27. Upon the said survey, or at any time before the actual issue of any Rectification Crown grant under this Ordinance, it shall be lawful for the Chief Commis- of boundaries.

Price of and

grant.

sioner of Lands and Works and Surveyor General, or his agent, or other person specially authorized by the Governor, in writing, in that behalf, upon payment of the actual expenses connected therewith, to rectify boundaries, and to settle finally, on the spot, any dispute which may from time to time arise, as to the actual or proper boundaries between adjacent or conflicting mining claims under this Ordinance. Every such decision, expressed in writing, and filed of record in the Head Lands and Works Office, with a plan or diagram of the proper boundaries as rectified, shall be final and without appeal, any rule of law or equity to the contrary notwithstanding, and shall be evidence in all courts in the Colony, of the several matters and things therein continued.

28. Whenever any adverse claimants to a mine or mining claim, under this Ordinance as aforesaid (in any other respect than as to boundaries, as next hereinbefore mentioned), shall appear before the approval of the survey by the Lands and Works, as hereinbefore mentioned, all proceedings shall be stayed until a final settlement and adjudication in the courts of competent jurisdiction, of the rights of possession to such mine or claim has been obtained, when a Crown grant may issue as in other cases.

29. The issue of a Crown grant to any applicant under this Ordinance, save where obtained by fraud or wilful misrepresentation, shall confer and be deemed to confer on the person or persons named therein, an indefeasible and incontestable title in fee simple absolute to all the land specified in such grant, save as hereinafter excepted.

30. The Assistant Commissioner in every district, shall have jurisdiction to hear and determine all cases of dispute between adverse claimants, to prospecting licenses and Crown grants under this Ordinance (subject, however, as to rectification and settlement of boundaries, to clause 27 of this Ordinance); and it shall be lawful for such Assistant Commissioner, and he is hereby required, on the written application of either party to a dispute, to summon a jury, to consist of not less than three, nor more than five, persons, to decide all questions of fact; and the said Commissioner may award such costs (including the costs of such jury) as he shall deem just and reasonable, and in case of default, enforce his judgment by warrant of distress of the goods and chattels of the person so making default. For the purposes of this Ordinance, and to enforce his orders and decisions, the Assistant Commissioner, in addition to the jurisdiction hereby conferred, shall have all the powers, authority, and jurisdiction now by law possessed by County Court Judges in the Colony.

31. In cases of dispute as to the right of possession to any mineral lands, the institution of proceedings therein may be commenced by a claim in the Form marked D, in the schedule to this Ordinance; and upon the service of such claim on the opposite party, the Assistant Commissioner shall have power to decide thereon (subject to appeal as hereinafter mentioned), with full power to place the party who shall be found entitled into possession of the land in question; and upon proper cause shewn to issue and enforce an injunction to abate any intrusion or otherwise pending any proceedings, and to appoint a receiver if necessary. Provided always, that either party to any such proceedings may require a jury to be summoned to try any question of fact (other than disputed boundary as hereinbefore mentioned) as in the last clause provided.

32. Provided always, that any person dissatisfied with the decision of such Assistant Commissioner, on matter of law only and not on matter of fact, may appeal therefrom to the Supreme Court, and no appeal shall be allowed in any case unless notice thereof be given in writing to the opposite party, his counsel or attorney, within four days after the decision complained of, and also security be given, to the approval of the Assistant Commissioner,

APPENDIX Q.

AN ORDINANCE TO AMEND AND CONSOLIDATE THE LAWS AFFECTING CROWN LANDS IN BRITISH COLUMBIA.

[1st June, 1870.]

Preamble,

WHEREAS it is expedient to amend and consolidate the Laws affecting Crown Lands in British Columbia.

Be it enacted by the Governor of British Columbia, with the advice and consent of the Legislative Council thereof, as follows:---

Interpretation

1. In the construction and for the purposes of this Ordinance (if not inconsistent with the context or subject matter), the following terms shall have the respective meanings hereinafter assigned to them :---

"The Governor" shall mean the Governor of British Columbia or any person for the time being lawfully exercising the authority of a Governor of British Columbia.

"Chief Commissioner of Lands and Works and Surveyor General," shall mean and include the Chief Commissioner of Lands and Works and Surveyor General, and any person for the time being lawfully acting in that capacity.

"Commissioner" shall mean the Chief Commissioner of Lands and Works and Surveyor General of this Colony, or the person acting as such for the time being, and shall include every stipendiary magistrate for the time being in charge of any district, and every person duly authorized by the Governor to act as and for the Chief Commissioner of Lands and Works and Surveyor General, as Assistant Commissioner of Lands and Works in any district in which the land that may be referred to lies, other than that in which the chief office of the Lands and Works Department is situated, and any other district or districts for which no such Assistant Commissioner of Lands and Works as aforesaid has been appointed.

"Supreme Court" shall mean the Supreme Court of British Columbia.

"The Crown" shall mean Her Majesty, Her Heirs and Successors.

"Crown Lands" shall mean all lands of this Colony held by the Crown in fee simple.

"Act" shall mean any proclamation or Ordinance having the force of law in this Colony.

Words importing the singular number shall include more persons, parties, or things, than one, and the converse.

2. The following Acts, Ordinances, and Proclamations relating to the disposal and regulation of the Crown Lands of the Colony are hereby repealed: An Act dated February 14th, 1859;

An Act dated January 4th, 1860;

An Act dated January 20th, 1860;

The "Pre-emption Amendment Act, 1861;"

The "Country Land Act, 1861;"

The "Pre-emption Purchase Act, 1861;"

The "Pre-emption Consolidation Act, 1861;"

The "Mining District Act, 1863;"

The "Land Ordinance, 1865;"

The "Pre-emption Ordinance, 1866;"

The "Pre-emption Payment Ordinance, 1869;" and,

The "Vancouver Island Land Proclamation, 1862;"

Repeals former Act. but such repeal shall not prejudice or affect any rights acquired or payments Saving existdue, or forfeitures or penalties incurred prior to the passing of this Ordinance ing rights. in respect of any land in this Colony.

Pre-emption.

3. From and after the date of the proclamation in this Colony of Her Who may pre-Majesty's assent to this Ordinance, any male person, being a British subject, empt as of of the age of eighteen years or over, may acquire the right to pre-empt any tract of unoccupied, unsurveyed, and unreserved Crown Lands (not being an How much. Indian settlement), not exceeding 320 acres in extent in that portion of the Colony situate to the northward and eastward of the Cascade or Coast Range of Mountains, and 160 acres in extent in the rest of the Colony. Provided that such right of pre-emption shall not be held to extend to any of the Aborigines of this continent, except to such as shall have obtained the Governor's special permission in writing to that effect.

4. Any chartered or incorporated company may acquire such right by And who by obtaining a special permission in writing from the Governor to that effect, but special pernot otherwise; and the Governor may grant or refuse such permission at his mission. discretion.

5. Any person desiring to pre-empt as aforesaid, shall first apply to and Application to obtain from the Commissioner permission in writing to enter upon such land, locate. which must be fully described in writing by the applicant, and a plan thereof must be deposited with the Commissioner, and such description and plan shall be in duplicate.

6. After such permission has been obtained, and within such time, not Entry and exceeding thirty days thereafter, as shall be specified by the Commissioner application to in such permission, such person shall enter into possession of the land so described, and place at each corner thereof a post marked with his name, or other distinguishing sign, and thereupon shall apply in writing to the said Commissioner to have his claim recorded to such tract of land, not exceeding 320 acres, or 160 acres, as the case may be, as hereinbefore provided.

7. If such land has not been previously recorded, the Commissioner Pre-emption shall, upon the fulfilment by the applicant of the preceding requirements, and record. upon payment by him of a fee of two dollars, record such land in his favor as a pre-emption claim, and give him a certificate of such pre-emption record, in the Form A. in the schedule hereto, and such record shall be made by the Form A. Commissioner in triplicate, the original to be handed to the pre-emptor, a duplicate to be retained by the Commissioner for local reference, and the triplicate to be forwarded forthwith to the head office of the Lands and Works Department, to be there examined, and if found in all respects (or if necessary after having been amended by the Chief Commissioner of Lands and Works and Surveyor General, so as to be) in accordance with the provisions of this Ordinance, to be finally registered in the Land Office Pre-emption Register.

8. Every piece of land sought to be acquired as a pre-emption claim, Rectangular under the provisions of this Ordinance, shall, save as hereinafter excepted, be shape of claim. of a rectangular shape, and the shortest line thereof shall be at least two-thirds of the length of the longest line. Such line shall run as nearly as possible north and south, and east and west.

9. Where such land is in whole or in part bounded by any mountain, Natural rock, lake, river, swamp, or other natural boundary, or by any public highway, boundaries. or by any pre-empted or surveyed land, such natural boundary, public highway, pre-empted or surveyed land, may be adopted as the boundary of such land, and it shall be sufficient for the claimant to show to the Commissioner that the form of the land conforms as nearly as circumstances permit to the P isions of this Ordinance.

done in compliance with the provisions of this Ordinance.

10. The Chief Commissioner of Lands and Works and Surveyor

11. A pre-emptor shall be entitled to receive from the Commissioner a

General may, however, in carrying out any government survey, if in his opinion circumstances require it, survey pre-emption claims or purchased lands recorded previous to the date of this Ordinance, by such metes and bounds as he may think proper, and every survey so made and certified by him in writing shall be binding upon all parties affected thereby, and the survey so certified shall be deemed, in any court of this Colony, to have been

Rectification of Survey.

Certificate of improvement. Form B.

certificate, to be called a "Certificate of Improvement," in the Form B., in the schedule hereto, upon his proving to the Commissioner, by the declarations in writing of himself and two other persons, that he has been in occupation of his pre-emption claim from the date of the record thereof, and has made permanent improvements thereon, to the value of two dollars and fifty cents per acre. Such certificate shall be in triplicate, the original to be handed to the pre-emptor, the duplicate retained by the Commissioner for local reference, and the triplicate transmitted forthwith to the head office of the Lands and Works Department, and it shall be the duty of the Commissioner to note the issue of such certificate on the original pre-emption record, which must be produced to him at the time of applying for the certificate by the pre-emptor, and on the duplicate thereof retained in the Commissioner's office.

12. Every such declaration shall be subscribed by the person making the same, and shall be filed with the Commissioner, who is hereby fully authorized and empowered to take the same, and such declaration shall be in the Form C. in the schedule, and shall be made before such Commissioner, under and subject to the provisions and penalties of the "Oaths Ordinance, 1869."

13. After the grant of the certificate of improvement, but not before, the pre-emption right in the land referred to in such certificate may be transferred to any person entitled to hold a pre-emption claim under this Ordinance, subject, however, to the continuance of all the provisions of this Ordinance as to occupation, forfeiture, and payment of purchase money due or to become due to the Crown.

14. Every such transfer must be made in writing, signed by the person making the same, or his attorney in fact, in the form D. in the Schedule, or in words to that effect, and in the presence of the commissioner, and if not so made shall be void, and such transfer shall be in triplicate, the original to be retained by the person in whose favor the transfer is made, the duplicate to be retained as a record in the office of the Commissioner, and the triplicate forwarded forthwith to be registered in the head office of the Lands and Works. Upon the examination of such transfer in the manner and form so prescribed, and on payment of the fee of two dollars, the Commissioner shall cancel the previous record of such pre-emption right, and record the same anew, in the manner prescribed un section 7, in the name of the person in favor of whom such transfer shall have been made, subject to the completion of the period of occupation required by this Ordinance, and to all other the terms and conditions thereof.

15. Whenever any pre-emptor shall permanently cease to occupy his pre-emption claim, save as hereinafter provided, the Commissioner may in a summary way, upon being satisfied of such permanent cessation of occupapation, cancel the claim of the pre-emptor so permanently ceasing to occupy the same, and all deposits paid, and all improvements and buildings made and erected on such land, shall be absolutely forfeited to the Crown, and the said land shall be open to pre-emption and may be recorded anew by the Commissioner as a pre-emption claim, in the name of any person satisfying the requirements in that behalf of this Ordinance.

Declaration. Form C.

Right may be transferred.

Mode of transfer. Form D.

Cessation of occupation cancels claim. 16. The occupation herein required shall mean a continuous *bona fide* Meaning of personal residence of the pre-emptor on his pre-emption claim. Provided, how-occupation. ever, that the requirement of such personal occupation shall cease and determine after a period of four years of such continuous occupation shall have been fulfilled.

17. Every holder of a pre-emption claim shall be entitled to be absent Leave of from his claim for any one period not exceeding two months during any one absence for year. As an ordinary rule he shall be deemed to have permanently ceased to two months. occupy his claim when he shall have been absent continuously, for a longer period than two months, unless leave of absence have been granted by the Commissioner, as hereinafter provided.

18. If any pre-emptor shall show good cause to the satisfaction of the Special leave Commissioner, such Commissioner may grant to the said pre-emptor leave of for four absence for any period of time, not exceeding four months in any one year, inclusive of the two month's absence from his claim, provided for in clause 17. Such leave of absence shall be in the Form E. in the Schedule hereto, FormE. and shall be made out in duplicate, the original to be handed to the preemptor, and the duplicate to be retained of record in the office of the Commissioner.

19. If any pre-emptor shall show good cause to the satisfaction of the License to Commissioner, he may grant him a "license to substitute," for any period not substitute. exceeding six calendar months, in the Form F. in the Schedule hereto, in Form F. duplicate, the original to be handed to the pre-emptor, and the duplicate to be retained of record in the office of the Commissioner. The continuous personal residence of the person named in such license (such person not being or becoming subsequently to the date of the license a claimant of land under any law or proclamation regulating the pre-emption of land within the Colony) shall, during the continuance of the license, and after the record thereof with the Commissioner, be as effectual as the continuous personal residence of the claimant himself.

20. No person shall be entitled to hold, at the same time, two claims One claim to by pre-emption; and any person so pre-empting more than one claim shall be held at a forfeit all right, title, and interest to the prior claim recorded by him, and to all improvements made and erected thereon, and deposits of money paid to Government on account thereof; and the land included in such prior claim shall be open for pre-emption.

21. When the Government shall survey the land included in a pre-Purchase of emption claim, the person in whose name the said claim stands registered in the pre-emption register of the land office shall, provided a certificate of improvement shall have been issued in respect of such land, and that the condition of four years occupation required by this Ordinance has been duly fulfilled, be entitled to purchase the said land at such rate, not exceeding one dollar per acre, as may be determined upon by the Governor for the time being, payable by four equal annual instalments, the first instalment to be paid to the Commissioner, at his office, within three calendar months from the date of the service on the said pre-emptor of a notice from the Chief Commissioner of Lands and Works and Surveyor General requiring payment for the said land, or within six calendar months after the insertion of a notice to such effect, to be published for and during such period in the Government Gazette, or in such other newspaper, published in the Colony, as the Commissioner may direct.

If the purchase money for such land be not paid, according to the terms of such notice, the pre-emption claim over such land may, at the discretion of the Commissioner, be cancelled, and all such land, and the improvements thereon, and any instalments of the purchase money paid thereon, may be forfeited absolutely to the Crown.

10 - 16

Notice of intention to apply for

Certificate of payment.

From G.

Crown Grant may issue.

Form H.

Reservation

Heirs of preemptor entitled to

Extent of claim N. and E. of Cascade range.

22. The Crown Grant to a pre-emption claim will not be issued unless it shall have been proved to the Commissioner that written or printed notices of Grown Grant. the intended application for such grant have been posted for a period of sixty days prior to such application, upon some conspicuous part of the said preemption claim, and upon the adjacent claims (if any), and upon the Court House of the district wherein the land lies.

23. Upon payment of the whole of the purchase money for such land, and upon production to the Chief Commissioner of Lands and Works and Surveyor General of a certificate in Form G. in the Schedule hereto, from the Commissioner of the district in which such land is situated, that the notices of intended application for a Crown Grant of such land have been duly posted as required in the previous section, without any objection to the issue of such grant having been substantiated, a Crown Grant or Conveyance, in the Form H. of the Schedule hereto, of the fee simple of the said land shall be executed in favor of the purchaser.

Provided, that every such Crown Grant shall be deemed to include, to the Crown. among the reservations therein contained, a reserve in favor of the Crown, its assignees, and licensees, of the right to take from any such land, without compensation, any gravel, sand, stone, lime, timber, or other material which may be required in the construction, maintenance, or repair of any roads, ferries, bridges, or other public works.

24. In the event of the death of any pre-emptor under this Ordinance, his heirs or devisees (as the case may be) if resident in the Colony, shall be Grown Grant. entitled to a Crown Grant of the land included in such pre-emption claim, if lawfully held and occupied by such pre-emptor at the time of his decease, but subject to payment of the full amount of purchase money for such land then due or to become due; but if such heirs or devisees be absent from the Colony at the time of such decease, the Chief Commissioner of Lands and Works and Surveyor General is hereby authorized and empowered to make such disposition of the pre-emption claim, and such provision for the person (if any) entitled thereto, or interested therein, as he may deem just and proper.

> 25. Every person lawfully occupying a pre-emption claim situated to the northward and eastward of the Cascade or Coast range of mountains, at the date of the passing of this Ordinance, if less than 320 acres, may, with the permission of the Commissioner, pre-empt land liable to pre-emption, and immediately contiguous to or abutting on his said existing claim, so as to make up the total amount of his claim to 320 acres, and thereupon such total claim shall be deemed to have been and to be taken up and held under the provisions of this Ordinance.

Leases.

Leases for pastoral purposes.

Hay leases,

26. Leases of any extent of unpre-empted and unsurveyed land may be granted for pastoral purposes by the Governor in Council, to any person or persons whomsoever, being bond fide pre-emptors or purchasers of land in the vicinity of the land sought to be leased, at such rent as such Governor in Council shall deem expedient; but every such lease of pastoral land shall, among other things, contain a condition making such land liable to pre-emption, reserve for public purposes, and purchase by any persons whomsoever, at any time during the term thereof, without compensation, save by a proportionate deduction of rent; and to a further condition that the lessee shall, within six months from the date of such lease, stock the property demised in such proportion of animals to the 100 acres, as shall be specified by the Commissioner.

27. Leases of unoccupied and unsurveyed land, not exceeding 500 acres in extent, may be granted by the Governor in Council, for the purpose of cutting hay thereon, to any person or persons whomsoever, being bona file 122

pre-emptors or purchasers of land, at such rent as such Governor in Council shall deem expedient. The term of such lease shall not exceed five years ; but every such lease shall, among other things, contain a condition, making such land liable to pre-emption, reserve for public purposes, and purchase by any persons whomsoever, at any time during the term thereof, with such compensation for improvements made thereon, to be paid to the lease-holders, as shall be fixed by the Commissioner of the District.

28. Leases of any extent of unpre-empted Crown Lands may be granted Timber leases. by the Governor in Council, to any person, persons, or corporation duly authorized in that behalf, for the purpose of cutting spars, timber or lumber, and actually engaged in those pursuits, subject to such rent, terms, and provisions as shall seem expedient to the Governor in Council: Provided, however, that any person may hereafter acquire a pre-emption claim to or upon any part of such leased land by complying with the requirements of this Ordinance. Such pre-emptor shall, however, only be entitled to cut such timber as he may require for use upon his claim; and if he cut timber on the said land for sale, or for any purpose other than for such use as aforesaid, or for the purpose of clearing the said land, he shall absolutely forfeit all interest in the land acquired by him, and the Commissioner shall cancel his claim thereto.

29. The application for any such lease must be in writing, in duplicate, Applications addressed to the Commissioner, who shall retain the original in his office, and for leases. transmit the duplicate, through the head office of the Lands and Works, to the Governor in Council, who shall alone decide on any such lease.

Water.

30. Every person lawfully entitled to hold a pre-emption under this Pre-emptors Ordinance, and lawfully occupying and bona fide cultivating lands, may divert may utilize any unrecorded and unappropriated water from the natural channel of any water. stream, lake, or river, adjacent to or passing through such land, for agricultural and other purposes, upon obtaining the written authority of the Commissioner of the District to that effect, and a record of the same shall be made with him, after due notice as hereinafter mentioned, specifying the name of the applicant, the quantity sought to be diverted, the place of diversion, the object thereof, and all such other particulars as such Commissioner may require ; for every such record, the Commissioner shall charge a fee of two dollars; and no person shall have any exclusive right to the use of such water, whether the same flow naturally through or over his land, except such record shall have been made.

31. Previous to such authority being given, the applicant shall, if the Notice to be parties affected thereby refuse to consent thereto, post up in a conspicuous given. place on each person's land through which it is proposed that the water should pass, and on the District Court House, notices in writing, stating his intentions to enter such land, and through and over the same take and carry such water, specifying all particulars relating thereto, including direction, quantity, purpose, and term.

32. Priority of right to any such water privilege, in case of dispute, Priority of right. shall depend on priority of record.

33. The right of entry on and through the lands of others, for carrying Compensation water for any lawful purpose upon, over, or under the said land, may be for damage. claimed and taken by any person lawfully occupying and bona fide cultivating as aforesaid, and (previous to entry) upon' paying or securing payment of compensation, as aforesaid, for the waste or damage so occasioned, to the person whose land may be wasted or damaged by such entry or carrying of water.

34. In case of dispute, such compensation or any other question con- May be assessed by nected with such water privilege, entry, or carrying, may be ascertained by jury.

123

the Commissioner of the District in a summary manner, without a jury, or if desired by either party, with a jury of five men.

35. Water privilege for mining or other purposes, not otherwise lawfully appropriated, may be claimed, and the said water may be taken upon, under, or over any land so pre-empted or purchased as aforesaid, by obtaining a grant or license from the Commissioner of the District; and, previous to taking the same, paying reasonable compensation for waste or damage to the person whose land may be wasted or damaged by such water privilege, or carriage of water.

36. All assignments, transfers, or conveyances of any pre-emption right, right transfers heretofore or hereafter acquired, shall be construed to have conveyed and transferred, any and all recorded water privileges in any manner attached to or used in the working of the land pre-empted.

> 37. Every owner of a ditch or water privilege shall be bound to take all reasonable means for utilizing the water taken by him; and if he shall wilfully take and waste any unreasonable quantity of water, it shall be lawful for the Commissioner to declare all rights to the water forfeited.

Ejectment.

38. Any person awfully occupying a pre-emption claim, or holding a Ejectment by lease under this Ordinance may, in respect thereof, institute and obtain redress in an action of ejectment or of trespass in the same manner and to the same extent as if he were seized of the legal estate in the land covered by such claims; but either party thereto may refer the cause of action to the Stipendiary Magistrate of the District wherein the land lies, who is hereby authorized to proceed summarily, and make such order as he shall deem just. Provided, however, that if requested by either party, he shall first summon a jury of five persons to hear the cause, and their verdict or award on all matters of fact shall be final.

Jury.

39. It shall be lawful for any Magistrate, by an order under his hand, to summon a jury of five persons for any purpose under this Ordinance, and in the event of non-attendance of any persons so summoned, he shall have the power to impose a fine not exceeding twenty-five dollars.

Appeal.

40. Any person affected by any decision of a Magistrate or Commissioner under this Ordinance, may, within one calendar month after such decision, but not afterwards, appeal to the Supreme Court in a summary manner, and such appeal shall be in the form of a petition, verified by affidavit, to any Judge of such court, setting out the points relied upon ; and a copy of such petition shall be served upon the Commissioner whose decision is appealed from, and such time shall be allowed for his answer to the said petition, as to the Judge of the Supreme Court may seem advisable; but no such appeal shall be allowed, except from decisions on points of law.

41. Any person desirous of appealing in manner aforesaid, may be required, before such appeal be heard, to find such security as may be determined by the Commissioner whose decision is appealed from, and such appeal shall not be heard until after security to the satisfaction of the Commissioner shall have been given for the due prosecution of such appeal and submission thereto.

Surveyed Lands.

Reserves.

in any newspaper of the Colony, any lands that may not have been either sold or legally pre-empted.

43. The upset price of surveyed lands, not being reserved for the sites Price of land, of towns, or the suburbs thereof, and not being reputed to be mineral lands, shall be one dollar per acre; and the upset price of town and suburban lots shall be such as the Governor may in each case specially determine.

44. Except as aforesaid, all the land in British Columbia will be Land offered exposed in lots for sale by public competition, at the upset price above for sale by mentioned, after the same shall have been surveyed, and made ready for sale. public competition. Due notice shall be given of all such sales; notice at the same time shall be given of the upset price, and terms of payment, when they vary from those above stated, and also of the rights specially reserved (if any) for public convenience.

45. All lands which shall remain unsold at any such auction, may be Unsold lands sold by private contract at the upset price, and on the terms and conditions by private herein mentioned, on application to the Chief Commissioner of Lands and Works and Surveyor General, or other person for the time being, duly authorized by the Governor in that behalf.

46. Unless otherwise specially notified at the time of sale, all Crown Land sold, Lands sold shall be subject to such public rights of way as may at any time subject to after such sale be specified by the Chief Commissioner of Lands and Works roads, &c. and Surveyor General, and to the right of the Crown to take therefrom, without compensation, any stone, gravel, or other material to be used in repairing the public roads, and to such private rights of way, and of leading or using water for animals, and for mining and engineering purposes, as may at the time of such sale be existing.

47. Unless otherwise specially announced at the time of sale, the con-Conveyance veyance of the land shall include, except as provided in section 23, all trees, includes trees, mines, &c. and all mines, and minerals within and under the same (except mines of gold and silver).

Free Miners' Rights.

48. Nothing herein contained shall exclude Free Miners from entering Free Miners upon any land in this Colony, and searching for and working minerals; may search for Provided that such Free Miner prior to so doing shall give full sufficient for minerals. Provided, that such Free Miner prior to so doing shall give full satisfaction or adequate security to the satisfaction of the Commissioner, to the preemptor or tenant in fee simple, for any loss or damage he may sustain by reason thereof. If the amount of compensation (if any) cannot be agreed upon, the Stipendiary Magistrate or Gold Commissioner of the district wherein the land lies, with the assistance, if desired by either party, of a jury of five persons to be summoned by him, shall decide the amount thereof, and such decision and award shall be final. If there be no such Stipendiary Magistrate or Gold Commissioner in the said District, the Supreme Court shall have jurisdiction in the matter.

Free Grants.

49. It shall be lawful for the Governor in Council to make such special Free grants for immigrant free or partially free grants of the unoccupied and unappropriated Crown &c. Lands of the Colony, for the encouragement of immigration or other purposes of public advantage, with and under such provisions, restrictions, and privileges, as to the Governor in Council may seem most advisable for the encouragement and permanent settlement of immigrants, or for such other public purposes as aforesaid.

50. Nothing in this Ordinance contained, shall be construed so as to Saves Miners' interfere prejudicially with the rights granted to Free Miners under the rights. "Gold Mining Ordinance, 1867."

Schedule. Books to be Lept.	51. The Schedule hereto shall form part of this Ordinance. 52. Each Commissioner appointed under this Ordinance, shall keep a book or books in which he shall enter the date and particulars of every pre- emption record, certificate of improvement, license to substitute, transfer, or other document relating to or in any manner affecting any pre-emption claim within his district.
Application of fines and fees. Suspending clause. Short title.	 53. All fines and fees payable under this Ordinance shall be deemed to be made payable to the use of the Crown. 54. This Ordinance shall not take effect until Her Majesty's assent thereto shall have been proclaimed in the Colony. 55. This Ordinance may be cited for all purposes, as the "Land Ordinance, 1870."

, and in the

By command.

APPENDIX R.

EXTRACT FROM DR. RATTRAY'S WORK ON VANCOUVER ISLAND AND BRITISH COLUMBIA, 1862.

Coal.

The frequent occurrence of iron in connection with coal in other Iron. countries, and the probable prevalence of the coal formation over a large part, perhaps the greater portion of Vancouver Island, appear to indicate that this, the most useful of all the metals, which is said to have been lately discovered along the west coast, will be found in abundance. It is to her insular position, her coal fields, and her iron, that England owes much of her greatness. Two of these this colony possesses; the third she may, and probably does possess, and it ought therefore to be well searched for. With iron for machinery, coal to work it, and eminent commercial capabilities, Vancouver Island might become second only to England in manufacturing and commercial prosperity.

Coal, unquestionably the most important of the known minerals of this Where coal is colony, crops out at various parts, e.g., at Cape Bonilla, near Port San Juan, found. at Nespod, to the north of Nootka Sound, both on the west coast; at Fort Rupert, and at Nanaïmo, on its north-east and east coasts ; and these indications of its presence near the north and south extremities of the Island, and on her east and west coasts, render it probable that this fossil is very generally distributed, especially along its east coast, where the seams are apparently extensive and valuable, although Nanaimo is the only place where it has been ascertained, as yet, that mines can be readily, profitably, and extensively worked.

The coal of Vancouver Island is of fair quality, decidedly superior to Comparative some of the Scotch coal, but cannot be compared with that of the North of value of the England, or more especially with the Welch. The collowing in the source of the coal. England, or more especially with the Welsh. The following is an analysis and comparison of it with other varieties :--

Variety.	Specific gravity.	Carbon.	Hydrogen.	Nitrogen.	Sulphur.	Oxygen.	Ash,	Per cent of coke.
Welsh (Craigola) Newcastle (Can's Hartly) Scotch (Fordel Splint) Borneo (Labuan) Chili (Conception Bay) Sydney Vancouver Island.	$1^{\cdot}25 \\ 1^{\cdot}28 \\ 1^{\cdot}29 \\ \cdots$	84 · 87 79 · 83 79 · 58 64 · 52 70 · 55 82 · 39 66 · 93	3.84 5.11 5.50 5.74 5.76 5.32 5.32 5.32	0.41 1.17 1.13 0.80 0.95 1.23 1.02		7.19 7.86 8.33 20.75 13.24 8.32 8.70	$\begin{array}{r} 3 \cdot 24 \\ 5 \cdot 21 \\ 4 \cdot 00 \\ 7 \cdot 74 \\ 7 \cdot 52 \\ 2 \cdot 04 \\ 15 \cdot 83 \end{array}$	85 ^{.5} 60 ^{.63} 52 ^{.03}

TABLE 19.-Analysis of Vancouver Island, and other varieties of coal.

It is a bituminous coal, lighter than Welsh coal by about ten per cent., Nature and consumes rapidly, and answers well for steaming purposes, especially with quality of the fires and boilers made to suit it. Although a good gas coal, it is apt to form clinker, leave a large ash, and does not coke well for smelting purposes, or foundries. The large portion of sulphur it contains is a disadvantage; that of Fort Rupert, where the coal was first discovered, is said to contain less. All hitherto raised, however, of which the above is an analysis, is little else than surface coal, and cannot be fairly taken as a criterion of the Nanaimo coal, which is perceptibly improving as the mines deepen. An extensive 129 10 - 17

seam has lately been discovered of superior quality. Unfortunately no general survey of the coal formations of the island has yet been made.

For developing the manufactures, commerce, and mines of the colony, the importance of an unlimited supply of cheap coal must be obvious. Machinery may be generally introduced, and many manufactures and processes in the arts originated, which would otherwise be impossible. Instead of tedious sailing craft, the colony may have steamers, railways, and greatly facilitated land and water carriage, machinery for cotton spinning, saw and flour mills, and many manufactures.

Her minerals, both native and imported, may be smelled and made available on the spot, instead of being sent in the rough state to a foreign market, and sold at a great disadvantage; while by these means her commerce will receive an impulse, and the traffic of her merchant steamers will be greatly increased.

The exportation of Vancouver Island coal is increasing, and will soon be valuable in itself, besides aiding the development of commerce and shipping by its carriage. Nanaïmo fortunately possesses a commodious, safe and easily accessible harbor, in which vessels of 1,500 tons can lie close to the mines, and load with facility, and will soon become an important coal-exporting depot—the Newcastle of the colony. Energetic measures are now in progress to develope the resources of its mines.

The export of coals from Nanaïmo will be immensely increased when a supply can be furnished commensurate with the demand, and the price be somewhat reduced. The following statement of the imports of coal into San Francisco, will show that the quantity of Nanaïmo coal imported during the first three months of 1862, nearly equalled that for the whole of the previous year :--

Variety.	Jan. 1st to Dec. 16th, 1861.	Jan. 1st, to March 15th, 1862
English Cumberland Chili Sydney Japan Coos and Bellingham Bay (imported free of duty) Anthracite, (New York) Vancouver Island (Nanaïmo)	$\begin{array}{r} 2.662 \\ 12,254 \\ 12,304 \\ 25 \\ 16,183 \\ 26,291 \end{array}$	Tons. 5,036 2,876 3,942 125 2,535 5,176 4,235

Advantages resulting from it.

Exportation of

coal.

Her proximity to the markets of the Pacific, and the ultimate cheapness Prospect of an of her coal, will enable Vancouver Island to compete successfully in supplying in coal, the greater part of that ocean, in many parts of which colonies are springing. China, and Eastern Asia generally, are being opened up to commerce; steamers now ply frequently across its previously little traversed waters, and the consumption of coal is daily increasing. The demand has hitherto been supplied at high prices by the coal-fields of the Pacific itself, but principally by

England. The more important coal-fields of the Pacific are those of Panama, Chili, Australia, and New Zealand, Labuan, and the more recently discovered mines of Nanaïmo. The Labuan coal is of inferior quality; moreover, the climate being unhealthy, the mines are imperfectly worked, and are not likely ever to rival those of this colony. The coal of Panama, Chili, New Zealand, and Australia, is good, but the many obvious advantages which this island possesses for exporting coal, together with it abundance, cheapness, and quality, will ultimately enable it in a great-measure to supplant the English, Chilian, and other coals now sold in the San Francisco, and other markets, and Vancouver Island will thus become the chief source of supply, if not for the entire Pacific, at least for all but the countries in the more immediate neighbourhood of these other mines.

The Coos Bay coal is a lignite or brown tertiary coal, similar to that found in a thin seam on the south bank of the Fraser River, near its mouth; and the Bellingham Bay coal, now imported into San Francisco in considerable quantities, is inferior to that of Nanaïmo, so that neither of these can prevent the latter from monopolising the supply.

One of the principal markets for the coal of Nanaïmo, will be the coast Market for of Eastern Asia, and the large and rapidly increasing steam fleets, naval and coal in Eastern mercantile, which ply along that coast, which now draw their supply prin-Asia. cipally from England at high prices.

(On the 31st August, 1861, the British Fleet in China consisted of eleven gun-boats and nineteen of larger size, making a total of thirty vessels and 6,340 horse power.)

APPENDIX S

AN ORDINANCE TO AMEND THE LAW RELATING TO JOINT STOCK COMPANIES.

[8th March, 1866.]

Preamble.

WHEREAS it is expedient that the laws relating to the Incorporation, Regulation, and Winding-up of Trading Companies and other Associations should be consolidated and amended:

Be it therefore enacted by the Governor of British Columbia, by and with the advice and consent of the Legislative Council thereof, as follows :----

1. The "British Columbia Joint Stock Companies' Act," and the "Mining Joint Stock Companies' Ordinance, 1864," are hereby repealed.

2. An Act of the Imperial Parliament, passed in the Session of Parliament, holden in the 25th and 26th years of the reign of Her Majesty Queen Victoria, chap. 89, initialed "The Companies' Act, 1862," shall, from and after the passing of the Ordinance, be and have, as far as practicable, and save as hereinafter altered and modified, the force of law in this Colony.

3. The expression "the Court," as used therein, shall, instead of the interpretation given thereto in clause 81 of such Act, mean the Supreme Court of Civil Justice of British Columbia, and any judge of such last mentioned court shall have and exercise all the powers in and by the said Act conferred upon the Lord Chancellor and Vice Chancellor.

4. The power given to companies to empower any person as their Judge thereof attorney, to execute deeds in their behalf, in any place not situate in the to have powers United Kingdom, shall apply to the execution of deeds in this Colony, and of Lord Chansuch authority shall include a power to companies in this Colony to empower Power to execute deeds out 5. All former of the United Kingdom.

5. All fees payable under this Ordinance shall be the same as those payable under "The Companies' Act, 1862," provided, however, that such shall be collected in the ordinary way, and not by stamps, and be paid into the Treasury of this Colony to the use of Her Majesty, her Heirs and Successors.

6. Until some other person or persons shall be appointed in that behalf by the Governor, the Colonial Secretary of British Columbia shall have and exercise all the powers and duties of the Board of Trade, in the said Act mentioned. The Official Liquidator therein mentioned shall be appointed by the said Supreme Court of Civil Justice.

7. Notices, by the said Act required to be published in the gazettes and newspapers therein mentioned, shall, instead thereof, be published in the *Government Gazette*, and in such other newspapers as may be ordered.

8. When companies are formed in this Colony for mining purposes, all papers and documents required to be registered under the said Act with the Registrar of Joint Stock Companies may, instead thereof, be registered with any Gold Commissioner or Assistant Gold Commissioner; provided, that in such cases, every such document shall be delivered to him in duplicate, and upon receipt of the same, and of the fees for registration, and upon the requirements of the Act being fulfilled, such company shall receive from the said Gold Commissioner the usual Certificate of Registration, and upon such certificate being granted, the company shall be deemed to be duly incorpo-

Repeal of B. C. Joint Stock Co.'s Act, and Mining J. S. Ordinance, 1864. Imperial Act. The Companies' Act, 1862, in force.

The expression "The Court," shall mean the Sapreme Court of Civil Justice of British Columbis. Judge thereof to have powers of Lord Chancellor. Power to execute deeds out of the United Kingdom-Fees payable the same as those in Encland.

Colonial Secretary to be substituted for Board of Trade.

Public notices, how given.

•Mining Companies formed here may be incorporated by obtaining Certificate of Registration from a Gold Commissioner. rated, and the duplicate of all such documents above mentioned, and of the Certificate of Registration shall be forthwith transmitted by such Gold Commissioner to the Registrar of Joint Stock Companies, and such Certificate of Registration shall have the same force and effect as if it had been granted by such Registrar, and shall be received in any court as evidence, in like manner as the Certificate of Registration of such Registrar.

9. All the requirements of the said Act as to Registration thereunder, Requirements of companies already/registered, shall apply as well to mining companies now as to Regis-tration of formed in this Colony under the "Mining Joint Stock Companies' Ordinance, Companies' 1864," as to all other Joint Stock Companies formed under the Joint Stock Acts, 1862, and Companies' Act hereby repealed; and all the provisions of Part IX. of the apply to all said Act, save as hereinbefore altered, shall apply to all Mining companies incorporated heretofore or hereafter incorporated.

10. Nothing herein contained shall in any way be construed to inter Except to Vifere with the provisions of the "Gold Mining Ordinance, 1865;" but all the companies reprovisions for winding up companies under this Ordinance shall be extended the Gold and applied to Mining Companies registered under the provisions of Part Mining Ordi-VII. of the said "Gold Mining Ordinance, 1865."

11. The General Orders and Rules for regulating the practice and mode General Orof procedure under this Ordinance in this Colony, shall be those of the High ders and Rules of 25th No-Court of Chancery of England, bearing date the 25th day of November, vember, 1862, 1862; provided, that it shall be lawful for the Judge of the Supreme Court in force here. of Civil Justice of British Columbia, with the sanction of the Governor, to modify or alter the same when expedient.

12. This Ordinance shall be cited as "The Companies' Ordinance, Short Title. 1866."

These prices do not apply to the interior or the mines. Prices increase from 10 to 50 per cent., as the mines are reached.

Average rate of Wages for Labor:-

 Predial
 Per mensem.

 \$30 to \$50

 Domestic

 Chinese, \$15 to \$30

These rates only apply to Vancouver Island and to the Lower Fraser. In the mining districts, the labor rate is much higher, ranging from 6 to 8per day, and 50 to 75 per month.

The settlement of land, and agricultural enterprise and improvement, both on Vancouver Island, and the Mainland on the Lower Fraser, are steadily on the increase.

Fish of Columbia

Herrings.

Houlicans.

Salmon.

Silver or Spring Salmon,

Time of arrival.

No coasts or rivers are more abundantly supplied with fish than those of British Columbia. These are so numerous and so varied that to become thoroughly acquainted with their habits would almost involve the study of a life-time. Taking them in their order, the first fish that visit our shores are the herrings, that come in shoals into the harbors in the month of March. The herring caught in Burrard Inlet is small, but good. There are larger and finer fish, equal indeed to those of our own seas, in the Gulf of Georgia, were there only skilful fishermen to catch them. Next, in the month of April, come the famous houlicans. They enter the river in millions, and their presence is at once made known by the sea-gulls which wheel above the shoals, and dart about among them for their prey, startling the usually still Fraser with their shrill cries. The houlican is somewhat larger than the sprat, and is a very delicate and delicious fish, so full of oil that it is said those caught in the north will burn like a candle. There can be little doubt that they would make excellent sardines; they could be preserved in their own oil.

The salmon begin to enter the river in March, and species after species continue to arrive until October, the successors mixing for a time with the last of their forerunners. There is a greater degree of certainty in periodical arrivals of each kind in this stream, than at the coast and islands.

The most valuable kind, the Silver or Spring Salmon, is sure to make his appearance. It is impossible to say how many species there are. During the summer of 1861, five or six different kinds passed up the Fraser to a greater or lesser distance from the mouth. A considerable portion of them (chiefly those of the silver and hook-bill species), make their way up the river to a distance of a thousand miles, even forcing themselves up the streams on the sides of the Rocky Mountains. With such rapidity do they travel, that they have been known to reach Lillouet within ten days of their arrival at the mouth of the river.

Many perish on their toilsome journey; faint and weary they will not pause nor turn back, but press onward and upward, battling still with the mighty current, until at length exhausted with the contest, they are driven ashore to die.

Their grand object is to propagate their species, and an instinct impels them to deposit their spawn in the very head waters of the stream; whereby they fulfil the design of Providence, supplying food on their way to thousands of human beings in the in erior.

The spring or silver salmon begins to arrive in the river in March, or early in April; it is most plentiful in June, and by the early part of July has mostly passed up the river. It is a remarkably fine fish, weighing four to twenty-five pounds; it has been known to reach as high as seventy-two pounds. The fish sent to the exhibition of 1862 weighed forty pounds. Of those that arrive first, the greater portion are red, the next are red and white (the flesh of the back above the side lines red, belly white), the last are principally white. This fish is easily cured, and stands well at market.

The second kind arrives in June, continuing till August, a small handsome fish, back green, belly white, flesh red, average size five to six pounds, easily cured, and brings the highest price at market. The third, coming in August, weighs on an average seven pounds,—also an excellent fish.

Next, the hoan or humpback salmon, which comes every other year, Humpback arriving in August and remaining until winter, size six pounds, seldom four-Salmon. teen pounds. The male has a hump or arched back, and hooked upper jaw, the back is covered with skin, the belly with small scales. The hoan is not much esteemed when pickled, but dried and smoked it does well.

The fifth is the hookbill, a hideous animal, which arrives in September, Hookbill remaining until winter, when many of them return to the sea (size twelve to Salmon. fifteen pounds, they even attain to forty-five pounds); the flesh is white, the female is without the extraordinary hooked snout and teeth, which characterise the male (not edible).

The smelt arrives in the Lower Fraser early in spring, and after spawn-Smelt. ing, returns to the sea.

An excellent trout is caught in the Lower Fraser, weighing seven and Trout. eight pounds; a smaller one, of three or five pounds, abounds in its tributaries. Twenty mountain trout were recently caught in a stream near Hope, whose aggregate weight was 146 pounds; two of them weighed eleven pounds a piece. Trout of various species are found in most of the lakes, rivers, and streams of the country.

Nor is the royal fish wanting in these waters. The sturgeon abounds in Sturgeon. the rivers and lakes throughout the year; he has been found as far up as Fraser's Lake and near the Rocky Mountains. In winter he retires to the bottom in deep water, and sometimes goes out to sea to return in spring. They attain a size ranging from 100 to 500 pounds and upwards. The female is the larger—as she lies in the deep water she is rarely caught, hence the comparative rarity of caviare, which is made from her roc. A demale sturgeon contains great quantities. From one killed in the Fraser recently, a bushel was taken. The flesh also of the sturgeon is by some considered good, when properly cooked.

It is believed that there are extensive cod-banks in the Gulf of Georgia. Cod, Whales, In the northern seas whales and seals abound. Indeed, the extent and and Seals. variety of the fisheries of British Columbia are immense.

Oysters abound in Burrard Inlet, good, but small—they only require a Oysterslittle care—transplantation, feeding,—to equal those for which Britain has so long been famous.

It is evident that in these fisheries British Columbia possesses a source Value of the of immense wealth. Her countless salmon (to speak of them alone) must Fisheries. form one day a very important article of export. Unfortunately no one has as yet taken up this branch of trade. Here, as elsewhere, it is capital that fails. The process of curing is a work of care and time. But there must come ere long to these shores men of practical knowledge and capital sufficient to give this business a start, and there is no fear that a market will be wanting. In California there is a good market, for her own rivers do not supply all the salmon she needs; so-too eventually, no doubt, the colony will be able to export its fish to the Sandwich Islands, Australia, and New Zealand, perhaps even to England.

APPENDIX W.

EXTRACT FROM J. D. PEMBERTON'S WORK ON VANCOUVER ISLAND AND BRITISH COLUMBIA.

GAME.

Foremost among the inducements to the middle classes to emigrate to Game in these colonies, is the consideration that they can there enjoy many recreations, Columbia. such as horse exercise, shooting, fishing, &c., which at home are attended with so much expense.

All the pleasures that can be derived from renting a moor, or owning a deer park in Scotland, from supporting game keepers, resisting poachers, or incurring licences, from tipping whips, or feeing ostlers, are trivial, compared with the sport within the reach of a settler with moderate means on the Pacific Coast; to say nothing of game being there, in an economical point of view, a very important item.

For simplification sake, let us omit the buffalo as too distant, grizzlies or brown bears as too fierce, and mountain goats and sheep as too wild and inaccessible in their retreats among the mountains.

If large game is an attraction, elk, the size of a Kerry cow, can readily Elk. be met with on the coast. Keeping to windward of them, they are not difficult to approach, and once within the band, and a shot fired, they become confused, and an easy prey to the hunter. The antlers are five feet or so in width, and weigh upwards of thirty pounds; the meat is excellent. Like all the deer tribe, they are found in winter in valleys near the coast, and in the heat of summer prefer central lakes and hill tops, where they can catch the breeze, and avoid the flies, which would otherwise torment them.

Deer, being capital swimmers, prefer the groups of small islands to the mainland, and a party of half a dozen hunters will, after an absence of a fortnight or three weeks, occasionally bring back to Victoria as many as thirty or forty, weighing 100 pounds, to 150 pounds each. The Indians snare them in pitfalls, and kill them in traps. But the slaughter is greatest in snow crusted over with ice, strong enough to bear a man, but which the pointed foot of the deer, aided by its spring, too readily penetrates, and the animal is soon overtaken. The venisen is seldom so good as that of the parks of England.

The black bear too is easily met with, and is never known to attack Black Bear. till wounded, or in defence of cubs; some are very large. If young, the flesh is excellent, but rather too like pork; but old bear is tough, and the strong smell, which no amount of cooking can neutralise, is far from enticing. They are generally seen where berries are abundant, or among charred stumps of their own colour, and usually stand up to look at an intruder before decamping, presenting a capital mark to fire at. They are difficult to kill, and even when shot through the heart, are active for some time after.

To see one of these animals steeple-chasing over the fallen timber of the

forest, or spring up a tree in its native state, it is difficult to conceive its being similar to that we have seen so tame and spiritless in the menagerie, and conclude that there, though the body was living, "the heart must have been dead."

The puma, formidable as it looks, is far from courageous; it will dart up a tree from the smallest dog. To sheep, it is very destructive; once within the fold it seizes them successively by the throat, and rapidly sucks the blood; even a man would be in danger if asleep in the vicinity of one.

The wolves are of different colours, and larger than a Newfoundland dog; they are excessively shy.

To meet with any large game, the sportsman has now, as might be expected, to go several miles from the settlement. His equipment for this purpose should consist of a double rifle with one sight, adjusted for point blank shooting only, with strong charge, up to one hundred yards, a hunting knife, and ammunition, and oil skin and blanket, and an Indian or two, to carry the game and keep the track, retracing, if required, in which department they excel. Dogs, unless remarkably well trained, are better dispensed with.

Of feathered game the duck shooting is decidedly the best sport upon the coast. Of these, there are fifteen or more different kinds; the best are found at river deltas, and in swamps, where, as you walk, they continue to rise straight up, often at the sportsman's feet. Away from the settlement a good shot has killed thirty and forty in a day. A good retriever is indispensable, and I may add that there is nothing like an Eley cartridge and large bore for taking them down.

Geese of several sorts are also abundant, so much so, that in places I have seen Indian boys stalk, and kill them with bows and arrows. At night too they sometimes steal upon a flock, rush light in hand, and wring the necks of a considerable number. But the greatest numbers of wild fowl are killed in this curious way: The Indians observe the path in air, at the entrance of a river or elsewhere, through which dense flocks of wild fowl pass. While the birds are at rest or feeding, a net is fixed vertically at the proper level, being attached to poles planted some hundreds of feet apart. The birds are suddenly startled, and fly against the net with such rapidity, that they fall stupefied, and are easily clubbed by Indians, who rush upon them from an ambush close by. A punt, gun, and swivel, with which to supply the market, would even as a speculation succeed.

Swans are very wary and difficult to bag; they are found sometimes on the lakes, sometimes on salt water. At the head of Alberni Canal, I saw five together.

The coast shooting has this great advantage over the grouse shooting, that the inconvenience of struggling through the bush is avoided.

The dusky grouse is large, two and a half pounds weight, sits all day drumming in a pine top, or cleft in a rock, and at night and morning comes down to feed.

The willow grouse is smaller, of a brown colour, and is generally found in the neighbourhood of water.

Both are scarce near the settlements, being very easily shot, as if missed on rising, they settle in the nearest tree. Of either, even far from the settlement, is difficult to bag more than five to ten brace. A good pointer is indispensable, as they lie very close. Snipe, on the contrary, increase with cultivation; in one field I put up forty or fifty. Besides the above, tall buff cranes, standing four or five feet high, are stalked in the plains, and make good soup.

It is interesting to observe the rapid increase of small birds near the

Puma.

settlements, in proportion as birds of prey, such as eagles, hawks, kites, &c., are scared away.

In this way flocks of wild pigeons, doves of two kinds, three varieties of thrush, meadow larks, several kinds of sparrows, wrens, humming birds, tomtits, and a bird that sings at night, evidently prefer quarters near a homestead, to a precarious subsistence in the wilderness. EXTRACT FROM BLUE-BOOK, 1870.¹

RETURN of the Population of British Columbia; also showing the Births, Deaths, and Marriages, for the year. 1870.

APPENDIX AA.

MEMORANDUM BY THE HON. J. W. TRUTCH,

Commissioner of Land and Works, in reply to a letter, treating on the condition of the Indians in Vancouver Island, addressed to the Secretary of the Aborigines Protection Society, by Mr. William S. Sebright Green.

Mr. Green's letter contains a series of allegations against the Govern-Reply to Mr. ment, most of which are so entirely inconsistent with facts, and in the Green's letter. remainder of which the truth is so strangely distorted, that his statements in this matter, and the deductions drawn by him therefrom, urgently require to be met with the most distinct and positive refutation.

It is not true, as he avers, that in this Colony we have "no Indian Policy whatever," that "there are no Indian Agents," and that the only friends the Indians have in the Colony, are the Missionaries.

On the contrary, for the past ten years at least, during which I have Policy of the resided in this Colony, the Government appears to me to have striven to the Government extent of its power, to protect and befriend the native race; and its declared in respect of policy has been that the Aborigines should in all material respects be on the Indians. same footing in the eye of the law as people of European descent, and that they should be encouraged to live amongst the white settlers in the country, and so, by their example, be induced to adopt habits of civilization.

In the more settled districts, the Indians do now reside mostly in the settlements, working for the white settlers, eating similar food, and wearing similar clothing, and having, to a great extent, relinquished their former wild primitive mode of live.

In these respects the native race has undoubtedly derived very material benefit from their contact with white people, whilst it is unhappily equally certain that it has thence contracted a large share of the vices, and attendant disease, which have ever been inevitably entailed by the European races on the Indians of this continent, amongst whom they have settled.

This policy towards the Indians has been consistently carried out, so far as I am aware, by successive Governors, and under it the Indians have assuredly, as Mr. Green states, "been made amenable to English laws," but it is somewhat more than exaggeration to write, as he has done, that the Indians have been suffered to shoot and kill one another within rifle shot of the city, without interference.

It may be, and I believe is a fact, that during the past ten years there have been instances of Indians having shot and killed one another in the outskirts of Victoria, without having been apprehended, but they certainly have not been suffered to do so.

On the contrary, had they been detected in the commission of such crimes, they would most assuredly have been tried and punished according to English law. In fact, Indians have been tried for this very crime in Victoria, and hanged.

At the trial of all such offenders counsel have been assigned by the Indians pro-Judge for their defence, unless specially provided by themselves or their texts when friends, precisely as though they had been white men.

10-20

For it must be pointed out, that Mr. Green is again positively incorrect in stating, as he has done, that the defence of Indians "is a mere matter of chance." There is no more of the element of chance in this respect as regards an Indian on his trial, than would affect a white man similarly circumstanced.

Money must of course always have its effect in securing the services of able counsel, and in other ways, when a man is under trial for any offence against the law; but in this respect a poor Indian is no worse off than a poor white man; indeed, he is probably not so friendless, as the Judges in this Colony have always made it their special care that Indians on trial should be at least at no disadvantage on account of their being Indians. The Magistrates too, throughout the Colony, are the specially constituted protectors of the Indians against injustice. They are in fact "Indian Agents" in all but the name; and I am confident that they have so performed this well understood branch of their duty, that as full a measure of protection and general advantage has been bestowed on the Indians, through their agency, by Government, out of the pecuniary means at its disposal for this purpose, as could have been afforded to them through the medium of a special Indian Department. The Indians have in fact been held to be the special wards of the Crown, and in the exercise of this guardianship Government has, in all cases where it has been considered desirable for the interests of the Indians, set apart such portions of the crown lands as were deemed proportionate to, and amply sufficient for the requirements of each tribe; and these Indian reserves are held by the Government, in trust, for the exclusive use and benefit of the Indians resident thereon.

Titles to land.

Duties of

Magistrates.

But the title of the Indians in the fee of the public lands, or any portion thereof, has never been acknowledged by Government, but, on the contrary, is distinctly denied.

• In no case has any special agreement been made with any of the tribes of the mainland, for the extinction of their claims of possession.

But these claims have been held to have been fully satisfied by securing to each tribe, as the progress of the settlement of the country seemed to require, the use of sufficient tracts of land for their wants, for agricultural and pastoral purposes.

In 1850 and 1851, shortly after the first settlement of Victoria, by the Hudson's Bay Company, at that time grantees from the Crown of the whole of Vaucouver Island, with full executive powers of Government, their agent, Governor Douglas, made agreements with the various families of Indians then occupying the south-eastern portion of the Island for the relinquishment of their possessory claims in the district of country around Fort Victoria, in consideration of certain blankets and other goods presented to them. But these presents were, as I understand, made for the purpose of securing friendly relations between these Indians, and the settlement of Victoria, then in its infancy, and certainly not in acknowledgement of any general title of the Indians to the lands they occupy.

In reference to the Cowichan settlement, it appears from the records, for I cannot speak of this matter from personal knowledge, as I had no official connection with Vancouver Island until the year before last, that portions of the Cowichan Valley were surveyed by Government, and sold in 1859. The settlement dates therefore from that year, although the unoccupied lands in this district were not thrown open for pre-emption until 1862. When these lands were surveyed certain sections, containing in all 4,635 acres, were set apart as reserves for the use of the Cowichan Indians, and are now held in trust by Government, for that purpose, with the exception of about 500 acres, which have been since withdrawn from this reservation with the consent, as appears from the recorded correspondence in this office, of the Indians interested therein.

Agreements with Indians.

Cowichan settlement.

I can find no record of any promise having been made to these Indians No promise of that they should be paid for the lands in the Cowichan Valley, which they compensation on record. may have laid claim to, nor can I learn that any such promise has ever been made, but it is probable that the Cowichan Indians, when the white people began to settle amongst them, may have expected, and considered themselves entitled to receive for the lands which they held to be theirs, similar donations to those which had been presented to their neighbours, the Saanich Indians years previously, as before mentioned, on their relinquishing their claims to the lands around their villages. It is further very likely that it was Governor Douglas' intention that such gratuities should be bestowed on this tribe, although no direct promise to that effect had been made, and, in effect, presents of agricultural implements and tools were authorized to be made to them through this Department last year, although no demands for payment for their lands had to my knowledge been made by these Indians from Government.

It is unfortunately only too true that the law forbidding the sale of Sale of liquor. liquor to Indians, although efficacious in the country districts, especially on the mainland, is virtually inoperative in Victoria and its neighbourhood, as its provisions, strict as they are, are evaded by an organized system between white men, who make the vile liquor for this trade, and the Indian traders, who purchase it in quantities to be retailed to their Indian customers on Government has endeavoured to suppress this most baneful the reserves. traffic, but the profits are so considerable, that those engaged in it in a wholesale way cannot be tempted to become informers, and it is only occasionally that even the minor agents are apprehended and punished, whilst the principal offenders, some of whom it is hinted are "most respectable" persons, cannot be traced.

It is easy for Mr. Green to say "he could point out at least a dozen men known to be engaged in this nefarious traffic, but it would no doubt have been difficult for him to have proved this which he asserts as a known fact, otherwise he would surely have evidenced his earnestness in the cause of those on whose behalf he writes, by giving such information to the police as might have led to the punishment of these offenders.

Prostitution is another acknowledged evil prevailing, to almost an Prostitution. unlimited extent among the Indian women, in the neighbourhood of Victoria; but the prevention of this vice is at least as difficult to effect here as in more civilized communities, and the only direct step towards this result that appears open to the Government to take, would be to remove the entire Indian population to a distance of some miles from Victoria; a course against which both the Indians themselves, and the majority of the white inhabitants would most strenuously protest for a variety of reasons. But this course must be adopted before any measures for the improvement, in this respect, of the moral and social condition of the Indian population can be carried into effect with any hope of success.

In direct refutation of the charges of utter neglect and inhuman treat- Treatment of ment of the Indians at Victoria, during the prevalence of small pox in Indians suffer-1868, which Mr. Green makes against the Government, it will be sufficient pox. for me to recount what came under my own observation in reference to this subject.

Some time during the autumn of that year, whilst this disease was at its height, Mr. Young, at that time Acting Colonial Secretary, called my attention to a leading article in that morning's "British Colonist," of which Mr. Green was then Editor, which contained most exaggerated representations of the horrible condition of the Indians on the reserve of Victoria, under this visitation, and charges against Government of having utterly failed to take any steps to prevent the spread of the fell contagion, or to alleviate

the sufferings of those attacked by it, or even to provide for the burial of its victims; statements, in fact, of a character and tenor identical with the charges which are so broadly made in the letter now under reference. Mr. Young informed me that although he knew these statements had no foundation in fact, he was then going to investigate the matter thoroughly, and would be glad if I would accompany him. Accordingly, Mr. Young, Mr. Pemberton, Police Magistrate of Victoria, and myself, went at once to the Indian reserve, and spent some hours in inspecting the Indians' houses, hospital, graveyard, &c., and in inquiring into the arrangements that had been made by the Police Magistrate, with the assistance of the Rev. Mr. Owens, at that time residing on the Reserve, in charge of the Church of England Indian Mission thereon, and who also joined in our inspection. We found but few, only three, cases of small pox then existing on the reserve, and these patients were in care of an attendant paid by Government, in a building erected by Government specially as a small pox hospital, and under medical treatment, also provided by Government. Those who had died on the reserve, and in the town of Victoria, had been decently buried, to the number of about fifty, that being the number of newly made graves.

We could not verify whether these represented all the deaths up to that time from small-pox, among the Indians, but we certainly saw no dead bodies of Indians left unburied on the reserve, or elsewhere in the neighbourhood of the town, nor did we learn that even one such dead body had been found "on the rocks outside the harbor," where Mr. Green says "hundreds of bodies were left unburied." The shanties which had been occupied by the small-pox patients, together with their clothes and bedding, had been carefully burnt, and from all that we saw on the reserve, and from the information furnished to us by the Rev. Mr. Owens, Mr. Pemberton, and others, we were satisfied that all practicable measures were being taken for the proper care of the Indian sufferers from small pox, and for the prevention of the spread of the disease.

Statements of Dr. Davie.

I will only add in confirmation of the correctness of the impressions then formed to the above effect, that this subject was brought under discussion during the last session of the Legislative Council, by the late Dr. Davie, then Member for Victoria District, who speaking of his own knowledge, as he had been unremitting in his professional services to the Indians, as well as to white persons afflicted with small-pox, and who, being one of the medical officers appointed by Government for this purpose, had frequently visited this reserve on such charitable errands, bore testimony to the zeal and unshrinking disregard of the danger of contagion, which has been exhibited by those to whom the duty of taking care of the Indians during the late visitation had been entrusted, and especially by Sergeant Bowden, the Inspector of Police, whose services in this respect he solicited the Government to acknowledge by some complimentary gratuity; and the rest of the Council having joined in this representation, after a discussion, in which the treatment of the Indians during the prevalence of the small-pox was fully debated and approved ofthe Governor was pleased to comply with their request.

Deaths from small pox. I have since ascertained that the deaths from small-pox among the Indians in 1868, as reported by the Police Magistrate, amounted, including children, to eighty-eight (88), and that about \$2,000 were expended by Government, in the care of, and medical attendance on these sufferers, and in the burial of the dead.

Unhappily indeed, the disease was fatal enough in reality to the white as well as the Indian population, to need no such imaginative exaggeration as Mr. Green, from motives which I will not undertake to determine, although they are, I believe, sufficiently apparent in the conclusion of his letter, has allowed his pen to picture. Most of the Indians from the outlying districts along the coast fied from Communica the city in their cances, by the advice of the authorities, but under no comtagion, at the first outbreak of the contagion, but unfortunately not in time to escape its ravages, for they carried its infection with them, and those attacked with the dreaded disease on their way homeward, were left by their friends on the shore to perish untended.

Many Indians died in this way, in addition to those whose deaths at Victoria were registered, but I am unable to perceive what measures it was in the power of the Government to take, other than those which were adopted, for the protection and succour of the white and Indian population alike.

I will only remark further on the general subject of the condition of the Views of the Indians in this Colony, that it is unhesitatingly acknowledged to be the question. peculiar responsibility of Government to use every endeavour to promote the civilization, education, and ultimate christianization of the native races within our territory, and that any practical scheme for advancing this object, which it would be within the scope of the pecuniary ability of the Colony to carry into effect, would be adopted with alacrity. At present this good work is almost exclusively in the hands of Missionaries of various denominations, and much has been effected by their labors in those stations where the Indians under their teaching are not subject to those temptations which seem almost inevitably to overcome them when brought into close contact with the white population in the towns. But Government, although giving cordially to these Missions every countenance and moral support in its power, has found it impracticable to grant them any pecuniary aid, from the consideration that by so doing, it would be involved in the invidious position of appearing to give a special state aid to particular religious bodies.

13th January, 1870.

(Signed)

JOSEPH W. TRUTCH.

157

APPENDIX BB.

LETTER FROM HIS LORDSHIP THE BISHOP OF MILETOPOLIS AND VICAR APOSTOLIC OF BRITISH COLUMBIA.

To THE HONORABLE H. L. LANGEVIN, Minister of Public Works, Ottawa.

SIR,—Your visit to this distant land has shown us what a lively interest the Federal Government takes in the Province of British Columbia, which, though the last annexed to the Dominion of Canada, will not, we hope, be the least productive of good results.

You came to this Province to fulfil an honorable and important mission, and with that object in view you were pleased to see for yourself, and to examine everything attentively in order to acquire a better knowledge of individuals and to obtain correct ideas as to the country.

I believe that I shall meet your wishes and perform a duty by submitting to you my humble opinion as to the most advantageous system to be adopted by the Federal Government in its relations with the Indians in this Province; I shall then address you on the subject of certain projects; which have doubtless not failed to attract the attention of the Federal Government.

With regard to the system which might be adopted by the Government in connection with the Aborigines, opinion is divided; some persons speak of compelling the Indians of this Province, to collect on certain general reserves which would be set apart for them *ad hoc*; if I do not mistake, that is the system which the Americans have adopted in their dealings with the Indians who inhabit the territory bordering upon this Province.

I am astonished, Sir, that those who know, or who have been in a position to know the deplorable consequences of such a system, can be desirous of seeing it adopted and carried into operation in British Columbia. It appears to me that experience has sufficiently proved : 1st. That if it is difficult to compel wandering tribes, who live in tents, to leave the land of their ancestors, to reside upon distant reserves, it is almost impossible to induce Indians who live in permanent villages to consent to leave their houses, their fields and their burying places to which they are as attached as to life itself. 2nd. That to endeavour to compel these Indians, against their will, to leave the land of their birth would be, at the least, imprudent and impolitic; such a system might entail misfortune upon the settlers as well upon the Indians; who can say that the latter, considering themselves molested, would not seek to avenge themselves, as has already occurred in the case of the Americans? It is true that the Indians would inevitably ultimately succumb, they being the weaker, but it is no less true that a war with them would entail immense expenditure upon the Federal Government. and would retard for years the progress of this Province.

It is an historical fact that the system adopted by the Americans in their relations with the Indians has cost them millions of dollars, and has been productive of barely a single good result. Who does not know that after the frightful wars which cost so much blood and so much money, the Americans were compelled, at least in the adjoining territory, to conform to the wishes of the Indians and leave them upon the land which they had demanded? I take pleasure in believing, Sir, that the Federal Government would be un-

Opinions divided as to treatment of Indians.

Disadvantages of American system.

Cost of the American system.

willing to imitate our Yankee neighbors and to take as their rule the law of the strongest, a law which in our day is but too much in vogue; I am satis fied that it will prefer to adopt a system which will prove more favorable, less costly and less productive of inconvenience, and which will at the same time have the advantage of securing for the Government the confidence of the Indians and in that way ensuring for it powerful auxiliaries in case of war. To attain this most desirable end, it would be sufficient, it appears to me :---1st. That the Federal Government should set apart in each Indian village, a Suggestions reserve of land proportionate to the number of the inhabitants. 2nd. That for the treata treaty should be made with the Indians for the extinction at the earliest Indians. possible period of their titles to their lands. 3rd. That the sum of money to be allowed to the Indians by the Government, should be applied to supplying them, annually, either with agricultural implements and others such as axes, large saws, planes, &c., or with clothing and blankets as they may require and select.

If fears are entertained that certain Indians who still follow the old customs of savage life, would abuse such gifts, we are in a position to assert that a large majority of those who are under our influence, far from making a bad use of them, would derive the greatest advantages from them. The progress which a large number of them have already made in civilization, left as they were, so to speak, to themselves, proves what might be expected from them if the Government came to their assistance and took their interests to heart.

It is the intention of the Federal Government, I believe, to appoint Appointment agents whose special duty it will be to attend to the interests of the of Agents. Aborigines. As an immense majority of the Christian Indians profess the Catholic faith, would it not be expedient that the local superintendent with whom they will have to communicate, should be a Catholic, a similar advantage being granted to the Protestants? The Federal Government will, I trust, be pleased to take into consideration the wish expressed by about 20,000 Indians, who are either Catholics or uninstructed, to have a Catholic superintendent with whom they may treat respecting their affairs. You will readily observe, Sir, that by complying with their earnest desire, a way will be found for acquiring their entire confidence.

It is also, without doubt, the intention of the Federal Government to Education of take some steps for the education of the Aborigines. Indians.

On this subject I may here be allowed to remark that, for the present, Day Schools. day-schools for the Indians would entail great expense without producing satisfactory results. The fact is that the Indians have been in contact with the whites for too short a time to enable them to understand or appreciate the advantages of purely elementary education; besides, being compelled to go upon hunting and fishing expeditions to provide food and sustenance for their families, they have not yet entirely abandoned their slightly nomadic way of life, so that it is difficult, not to say impossible, to exact from each child that regular attendance at a day-school which is necessary to enable him to derive real benefit from it; the parents also are not disposed to send their children to the schools and the children are too fond of liberty not to prefer accompanying their parents on their hunting and fishing expeditions to attending to receive instruction. The American Government have established day-schools for the Indians in the adjacent territory, and not one of them has proved a success. Experience has shown that the schools which are best adapted to the wants of the Indians and to their way of life, are industrial and agricul- Industrial and tural schools, where the children are lodged, boarded and clothed, and at Agricultural which they spend several years in acquiring regular habits of order and dis-Schools. cipline and a taste and liking for work, while they receive elementary instruction at the same time. It is a school or establishment of this description that

we have founded at St. Marie, in the mission district of St. Charles. This mission district includes the civil district of New Westminster, a part of the civil district of Yale, and a part of that of Lillouet. This establishment, which receives Indian children from the above mentioned civil districts is divided into two departments, one of which, for boys, is under the management of two Brothers; the other, for girls, is under the management of two Sisters of St. Anne. Very satisfactory results have been obtained, but our means being very much restricted, we are able to receive but a limited number of pupils. If the Federal Government would grant us assistance, as we trust it will, and as we humbly request, we should be able to receive a larger number of children. It is also our intention, if the Government can extend aid to us, to found an establishment similar to that at St. Marie, in each of our mission districts, that is to say, in the district of the Immaculate Conception, Okanagan Lake, which comprises the civil districts of Okanagan and Kootenay, and a part of that of Yale-Lytton; in the district of St. Joseph, William's Lake, which comprises a part of the civil district of Lillouet and that of Cariboo; in the district of N. D. de Bonne Esperance (Stuarts's Lake) which comprises the numerous civil districts of the north-east; and in the district of St. Michael which comprises the Kakouals (Fort Rupert District).

I have the honor to be, Sir,

Your very humble and obedient servant,

A. LOUIS, O. M. I.

Bishop of Miletopolis, Vicar Apostolic of British Columbia.

New Westminster, 29th September, 1871.

APPENDIX CC.

A DICTIONARY OF THE [CHINOOK JARGON, OR] INDIAN TRADE LANGUAGE OF THE NORTH PACIFIC COAST.

Published by T. N. HIBBEN AND CO., Victoria, B.C.

PART I.

Chinook-English.

Α.

Ah-ha, adv. Yes.

- Ahn-kut te, or Ahn-kot-tie. Formerly; before now. With the accent pro-longed on the first syllable—A long time ago. Ex. Ahnkutte lakit sun, four days ago; Tenas ahnkutte, a little while since.
- Al-ah. Expression of surprise. Ex. Alah mika chahko! Ah! you've come! Al-kie. Presently; in a little while; hold on; not so fast.
- Al-ta. Now; at the present time.

A-mo-te. The strawberry.

- An-ah, interj. An exclamation denoting pain, displeasure or depreciation. Ex. Anah nawitka mika halo shem-Ah!; indeed you are without shame.
- Ats, n. A sister younger than the speaker.

A-yah-whul, v. To lend; borrow.

B.

Be-be. A word used towards children; a kiss; to kiss.

Bed, n. A bed.

Bit or Mit. A dime.

Bloom, n. A broom. Mamook bloom, to sweep.]

Boat. A boat, as distinguished from a canoe.

Bos-ton, n. adj. An American. Boston illahie, the United States.

Bur-dash. An hermaphrodite.

C.

Cal-li-peen, n. A rifle.

Ca-nim, n. A canoe. Canim stick, the cedar or wood from which canoes are usually made.

Ca-po. A coat.

Chah-ko. To come; to become. Ex. Kansih mika chaco? when did you come? Chahko kloshe, to get well.

Chak-chak. The bald eagle.

Chee. Lately; just now; new. Chee nika ko, I have just arrived. Hyas chee, entirely new.

Chet-lo or Jet-lo, n. An oyster. Chik-a-min, n. adj. Iron; metal; metallic. T'kope chikamin, silver; Pil chikamin, gold or copper. Chikamin lope, wire ; a chain.

Chik-chik. A wagon or cart,

10 - 21

Chil-chil. Buttons.

Chitsh, n. A grandmother.

Chope, n. A grandfather.

Cho-tub, n. A flea. Chuck, n. Water; a river or stream. Salt chuck, the sca; Skookum chuck, a rapid ; Solleks chuck, a rough sea; Chuck chahko or kalipi, the tide rises or falls; Saghilli and keekwillie chuck, high and low tide.

Chuk-kin. To kick.

Close. See Klose.

Cly, v. To cry.

Cole, adj. Cold. Cole iliahie, winter; Icht cole, a year; Cole siek waum sick, the fever and ague.

Comb. A comb. Mamook comb, to comb; Mamook comb iliahie, to harrow.

Coo-ley. To run. Cooley kiuatan, a race-horse; Yahka hyas kumtuks cooley, he can, *i.e.* knows how to run well.

Coop-coop, n. Shell money. See Hykwa.

Co-sho, n. A hog; pork. Siwash cosho, a seal. Cultus, adj. Worthless; good-for-nothing; without purpose. Ex. Cultus man, a worthless fellow; Cultus potlatch, a present or free gift; Cultus heehee, a jest, merely laughing; Cultus nannitsh, to look around; Cultus mitlite, to sit idle; Cultus klatawa, to stroll. Ques. What do you want ? Ans. Cultus-i. e. nothing.

D

Straight; direct. Ex. Klatawa delate, go [straight; Delate De-late. wauwau, tell the truth.

Di-aub. The devil.

D'ly. Dry. Chako dely, to become dry ; Mamook dely, to dry.

Doc-tin. A doctor.

Dol-la. A dollar; money. Chikamin dolla, silver; Pil dolla, gold; Dolla siaghost, spectacles.

E.

Eh-kah-nam, n. A tale or story.

Eh-ko-li, n. A whale.

Ee-na, n. A beaver. Eena stick (literally beaver wood), the willow.

Ee-na-poo or In-a-poo. A louse. Sopen inapoo, a flea.

Ek-keh. A brother-in-law.

E-la-han. Aid; assistance; alms. Mamook elann, to help.

E-lip. First; before; Elip lolo chuck, in the first place carry water; Elip kloshe, best; Elip tillikum, the first people.

E-li-te. A slave.

E-salt'h. Indian corn or maize.

G.

Get-up. To get up ; rise.

Grease. Hyiu glease, very fat; Too-toosh glease, butter.] Glease.

H.

Hah-lakl. Wide; open. Ex. Mamook hahlakl la pote, open the door. Haht-haht, n. The mallard duck.

162

Hak-at-shum, n. A handkerchief.

Ha-lo. None; absent. Q. Halo salmon mika? have you no fish? A. Halo, none. Q. Kah mika papa? where is your father? A. Halo, he is out. Halo wind, breathless; dead. Halo glease, lean. Halo iktas, poor; destitute.

Haul, v. To haul or pull.

- Hee-hee, n. Laughter; amusement. Cultus heehee, fun; Mamook heehee, to amuse; Heehee house, any place of amusement, as a tavern, bowling alley, &c.
- Hoh-hoh, n., v. To cough.

Hool-Hool, n. A mouse. Hyas hoolhool, a rat.

House, n. A. house. Mahkook house, a store.

Howh. Turn to ; hurry.

How-kwutl. Inability. Ex. Howkwutl nika klatawa? how could I go ?

Hul-lel, v.n. To shake.

Hul-o-i-ma. Other; another; different. Ex. Huloima tillikum, a different tribe or people; Hyas huloima, very different.

Humm, n., v. A stink or smell; to stink. Humm opootsh, a skunk.

Hunl-kih. Curled or curly ; knotted ; crooked.

- Huy-huy, n. v. To barter or trade. Ex. Huyhuy la sile, change the saddle ; Huyhuy tumtum, to change one's mind.
- Hwah. Surprise or admiration ; also earnestness.
- Hy-ak. Swift, fast, quickly, hurry, make haste.
- Hy-as. Large, great, very. Hyas tyhee, a great chief; Hyas malcook, a great price; dear; Hyas ahnkutte, a long time ago; Hyas closhe, very good.

APPENDIX DD.

TWO OF THE TREATIES CONCLUDED WITH INDIAN TRIBES.

Know all men,---We, the chiefs and people of the "Teechamitsa" Tribe, Treaty with who have signed our names and made our marks to this deed, on the 29th day Teech **Teechamitsa** of April, 1850, do consent to surrender entirely and for ever to James Douglas, the agent of the Hudson's Bay Company in Vancouver Island, that is to say, for the Governor, Deputy Governor and Committee of the same, the whole of the lands situate and lying between Esquimalt Harbor and Point Albert, including the latter, on the Straits of Juan de Fuca, and extending backward from thence to the range of mountains or the Saanich Arm, about ten miles distant. The condition of or understanding of this sale is this : That our village sites and enclosed fields are to be kept for our own use, for the use of our children, and for those who may follow after us, and the land shall be properly surveyed hereafter. It is understood, however, that the land itself, with these small exceptions, becomes the entire property of the white people for ever.

It is also understood that we are at liberty to hunt over the unoccupied lands, and to carry on our fisheries as formerly.

We have received as payment twenty-seven pounds ten shillings sterling. In token whereof, we have signed our names and made our marks at Fort Victoria, 29th April, 1850.

FINLAYSON,

(Signed),

JOSEPH WM. MCKAY.

Know all men,-We, the chiefs and people of the Kosampsom Tribe, Treaty with who have signed our names and made our marks to this deed, on the 30th Kosampson Tribe. day of April, 1850, do consent to surrender entirely and forever to James Douglas, the agent of the Hudson's Bay Company, in Vancouver Islandthat is to say, for the Governor, Deputy Governor and Committee of the same, the whole of the land situate and lying between the Island of the Dead, in the arm or inlet of Camoson, and the head of the said inlet embracing the

lands on the west side and north of that line to Esquimalt, beyond the inlet, three miles of the Colquils Valley, and the land on the east side of the arm enclosing Christmas Hill and Lake, and the lands west of those objects. The condition of or understanding of this sale is this :--That our village sites and enclosed fields are to be kept for our own use, for the use of our children, and for those who may follow after us, and the lands shall be properly surveyed hereafter. It is understood, however, that the land itself, with these small exceptions, becomes the entire property of the white people for ever. It is also understood that we are at liberty to hunt over the unoccupied land, and to carry on our fisheries as formerly.

We have received as payment $\pounds 52$ 10s. sterling.

In token whereof, we have signed our names and made our marks at Fort Victoria, on the 30th day of April, 1850.

APPENDIX EE.

MEMORANDUM OF TREATIES MADE WITH INDIAN TRIBES FOR PURCHASE OF THEIR LANDS.

I append hereto an abstract of all treaties made by the authorities with Abstract of the Indians, for the purchase of their lands, in order that same might be Treaties. thrown open to settlement by the whites. These treaties embrace the country from Victoria to a few miles beyond Socke Harbor, and from Victoria to North Saanich; also the lands around Nanaïmo. The total area might probably be about one-fortieth of the whole Island. I am not aware of any similar treaties having been made with the natives on the mainland.

APPENDIX GG.

MEMORANDUM ON THE VICTORIA HARBOR DREDGE,

By the Chief Commissioner of Lands and Works and Surveyor General of British Columbia.

16th September, 1871.

In the autumn of 1861, a commission was appointed under the provisions Commission of the "Victoria Harbor Act, 1860," consisting of the following gentlemen : appointed. George Henry Richards, Captain, R.N., Joseph Despard Pemberton, Esq., Surveyor General, V. I., Joseph William Trutch, Esq., C. E., John Gastineau, Esq., C. E., Wm. Alexander Mouatt, Captain, Hudson Bay Company Service, John James Cochrane, Esq., C. E., whose duty consisted of a thorough examination of the harbor of Victoria, its depth of water, whether it was shoaling or silting up, the nature of the bottom, and other points bearing on the question of the improvement of the navigation of the harbor, and its depth of water.

This commission continued its sittings and deliberations until 28th Report with February, 1862, on which day the chairman addressed a letter to the Colonial recommenda-Secretary, enclosing a report (a copy of which I annex hereto) marked schedule tions. A. Clause 11 of that report recommends that a dredging machine, consisting of a series of buckets on an endless chain should be procured. On the 29th August, 1861, the commissioners resolved :

"That it is expedient as a preliminary measure to procure a steam dredg-"ing machine and diving bell from some firm of eminence in the United "Kingdom, and that application be made to His Excellency the Governor to "authorize the commission to order the same without delay.

On the 11th October, 1861, the commissioners resolved :

"That on reconsideration of the subject, and especially to save the time "which must elapse before a dredging machine could be obtained from Scot-"land, the commission recommend the executive to obtain the same from "San Francisco, and that a competent and reliable engineer be sent down to "order and superintend its construction."

On 12th September, 1861, Captain Richards, then in San Francisco, in-Estimated formed the Surveyor General, that the cost of all the gear and engines for a cost. dredger with sixteen buckets, two engines of sixteen horse power each (one English horse power-two American), would be \$10,000.

On 27th December, 1861, tenders were called for, for the machinery for Agent sent to a dredger, but I can find no record of the results, except in a letter from the England. Surveyor General to the Colonial Secretary, under date of 7th May, 1864, in which he quotes an offer made by Peter Donahue for a dredge complete for \$33,000. It would appear that no steps were taken from 20th February, 1862, until 3rd April, 1863, when the late Surveyor General Mr. J. D. Pemberton, was instructed to proceed to England and procure the machinery requisite for a steam dredger, and also for a screw propeller to be used in towing the punts outside the harbour, to discharge the mud dredged from the bottom.

On his arrival in England, he investigated all the latest improvements Proceedings of and advertised for tenders through the Crown Agents, for the machinery for agent.

189

a dredger, extra punts, iron work for mud punts, engines for steam tug, and extra punts and bearings; and the tender of Messrs. Blyth, of London, was accepted, for the sum of £5,070 13—\$24,592 $\frac{65}{100}$; all this machinery was shipped via Cape Horn, and with it, came on two engineers who were engaged for six years at a mean salary of £250 per annum, to erect the machinery and engines on their respective hulls. The vessels arrived from England in July, 1864, with all these on board. In March of that year, contracts had been let for building the steamer's hull for \$16,800 $\frac{00}{100}$ and for dredger and four mud punts for \$34,564 $\frac{00}{100}$. These prices appear very high, but only bear a fair proportion to the wages paid to mechanics and ship carpenters at the time, viz.: \$5 per day. The total first cost of the dredger, steamer, "Sir James Douglas," and the four mud punts, may be estimated at about \$92,000 $\frac{00}{100}$. On the 18th February, 1865, a superintendent who was under my orders, was appointed by Governor Kennedy. I gave him written instructions for his guidance. He failed entirely in working the machinery in a satisfactory manner. He was not an engineer, nor even a man of ordinary education and intelligence. On the 14th June, 1865, in consequence of a resolution passed by the House of Assembly, the Superintendent and all the crew were paid off, and the dredger moored in James' Bay. Very shortly afterwards the "Sir James Douglas" was put on, at my suggestion, to carry the mails, passengers and freight, from Victoria along the east coast of Vancouver Island, and has continued to fulfil this duty to the present time. On two occasions I tried the dredger, the first time for five hours, when the machinery all worked well, with the exception of keeping up the steam, which we attributed to the fact that the induction pipe was too near the ladders and was liable to be choked by the *débris* of sand, &c., stirred up by the buckets. If it were removed further forward, this would be obviated. The dredge itself is most strongly built and fastened, and all the machinery is of the most massive kind. I append drawings marked schedules B. C. D., to illustrate how the machinery is built and placed.*

Description of the dredge.

Present use of "Sir James

Douglas.

fuel two tons per diem. She has a good number of spare and duplicate parts and some tools, bellows and portable forge, also a diving dress and air pump. She would require an expenditure of about \$1,500 to put her into working order as the

require an expenditure of about \$1,500 to put her into working order, as the buckets and endless chains have been taken off the ladders, and all the machinery has been removed as far as possible. She has been lying unemployed since June, 1865. Her decks and upper works would require to be caulked, and all wood work and iron work well painted.

She is 118 feet on keel, 122 feet over all; beam 22.10; depth of hold

8.6; has side lever condensing marine engine of 25 horse power (English), two flue boilers, and can dredge to a depth of sixteen feet; consumption of

To work her efficiently, she should have 1 engineer; 1 stoker; 1 foreman and 4 labourers.

The four punts are too large and unwieldy for the work of removing the dirt dredged to the outside of the harbour. They all require caulking, one is lying at New Westminister, and one in Victoria harbour. Two are at the Hastings Mill in Burrard Inlet; these were lent to the owners of the mill by the government. The expense of this would be about \$500 $\frac{00}{100}$. The punts cost \$1,200 $\frac{00}{100}$ each. I think that four smaller and more handy ones could be built complete for \$2,000 $\frac{00}{100}$.

The steamer "Sir James Douglas," was built with the view of towing the punts outside the harbour and back to the dredge, and also of towing vessels, and acting as a Government despatch boat generally. She is a fast and

strongly built vessel with oak frame, well fastened and strengthened with iron knees. She is 110 feet long, breadth 20 feet, copper fastened, two condensing engines of forty horse power (English). Had new boilers in 1870, which will probably last for another five years.

The following estimate would be a fair one for working the dredger and Cost of work a small steamer for towing the punts. ing.

DREDGER.				
Pay of engineer in charge of works (per annum)	\$2.425	00

Supposing that the dredger removed and placed into punts alongside, Estimate of 400 cubic yards per diem, and that this were taken outside the harbour in two possible work. punts, whilst the other two were filling, this would give a total quantity removed during the year equal to 106,200 cubic yards, on the assumption that she would work 263 days in the year; this would show a cost of 221 cents per cubic yard. The cost per cubic yard of the five dredgers on the Clyde for four years, gives a mean of 27 cents, but perhaps the distance to which the mud had to be carried was greater, or possibly it may have had to be shovelled out of the punts, which would greatly increase the cost.

My estimate is based on the supposition that the mud would be discharged by hoppers through the bottom of the punts. Now supposing the dredger to be employed as originally intended, viz : in improving the harbor of Victoria, the following estimate will be found very close indeed to the truth, unless the harbor should be rapidly silting up.

To remove the bar at the entrance to a depth of 14 feet (low)	Cubic y'ds. Time required
To remove the bar at the entrance to a depth of 14 feet (low) water springs), as shown on plan annexed, marked E* } To deepen from line of wharves to Indian Village	349,269 to deepen Vic-

Total	415,934
en l'	
*See note on preceding page	

Say 500,000 cubic yards. At the above mentioned rate of work, it would thus take 41 years to complete it, at a total cost of \$108,036 $\frac{00}{100}$. This estimate does not take into consideration the cost of removing any racky obstructions in the harbor, or of the cost of new punts, estimated at \$2,000 $\frac{00}{100}$, or repairing the dredge which would be \$1,500 $\frac{00}{100}$.

The Harbor Commissioners recommended in their report that Beaver Rock should be removed. I have made no estimate of this because I have no data to go upon, and the shortness of time will not allow of a thorough survey. By aid of the diving dress which belongs to the dredge, however, I can safely say that the cost should not exceed \$2,500 $\frac{00}{100}$.

The whole question of the harbor improvement works would require in my opinion to be well considered.

There is a great natural scouring power to be obtained at a comparatively small cost, by digging a small canal through the portage, and using the water in Esquimalt harbour, which is high an hour or two earlier than it is in the Victoria side of the portage. The difference of level is about 18 inches, quite sufficient to create a good current downwards to Victoria. I forbear to enlarge upon this point, as I have only made a preliminary survey and given it a small consideration many years ago. This would involve some blasting at the gorge, possibly amounting to 400 or 500 cubic yards, which would represent an additional expenditure of about \$2,000 to \$2,500.

> (Signed,) B. W. PEARSE, Chief Commissioner of Lands and Works and Surveyor General,

Lands and Works Department, Victoria. B. C. 16th September, 1871.

SCHEDULE A.

COLONIAL SECRETARY'S OFFICE, VICTOBIA, 18th February, 1865.

His Excellency the Governor directs the publication, for general information, of the following report of the Victoria Harbour Commission. Harbor Com-By His Excellency's command,

HENRY WAKEFORD, Acting Colonial Secretary.

VICTORIA, 28th February, 1862.

Chairman.

SIB,-The Victoria Harbour Commission having brought their labours to a conclusion, I have the honor to enclose the following report, which I request you will be good enough to lay before His Excellency the Governor.

I have, &c.

GEORGE HENRY RICHARDS. (Signel)

W. A. G. YOUNG, Esq.,

Colonial Secretary, Vancouver Island.

Removal of the Beaver Rock.

Canal from Esquimalt Harbor.

Report of

Victoria

mission.

VICTORIA, 28th February, 1862.

SIR,-In pursuance of the commission issued by your Excellency, consti- Proceedings of tuting us a Board with power to enquire into the defects and impediments the Commiswhich exist in Victoria Harbour, and to report on the most desirable means to be adopted for remedying and permanently removing the same ; we have called before us such persons as we considered most competent to afford information on the subject, and have likewise carefully compared the Admiralty charts of former dates with those more recently constructed, and personally examined the harbour by taking soundings and borings of the bed of the channel, and the different rocks which obstruct and limit the accommodation for shipping, and we have now the honor to submit for your consideration the following report:

1. The harbour in its present condition will only admit of the entrance Present state of vessels of eighteen feet draught at the highest stage of the water, while of harbor. more commonly those of fifteen feet encounter delay as well as risk of grounding. The rise and fall of the tide rarely exceeds ten feet, and is more frequently less.

2. The entrance is narrow and turns a sharp angle, which renders it Entrance. difficult for a long ship to enter at the highest tide without getting on shore, and across the narrowest part a bar extends for a considerable distance, with as little as eight feet on it at low water.

3. The accommodation for shipping within the harbour and alongside the Accommodawharves is very limited, owing to the western half of the pool between tion for ship-Songhies point and the old bridge, having a bed of rocks, the tops of which ping. in several instances are uncovered at low tides, or nearly so, as also to the general shallowness of the water, which obliges ships to lie on the ground during certain stages of the tide, a circumstance very detrimental to merchant vessels with heavy cargoes.

4. By a comparison of the old with more recent surveys, the depth of Water on the water on the bar appears to have decreased between two and three feet during bar. the last fifteen years, while at the anchorage and alongside the wharves there has been a filling up to a much greater extent; this may probably be attributed to the throwing overboard of rubbish, ashes, &c., from the numerous vessels which have frequented the port during the last few years,---to the drainage of a large and increasing town, as well as to natural causes.

5. As regards the means desirable to be adopted for the removal of these Removal of impediments, we are of opinion that although it may not be practicable to impediments. widen the channel at the entrance to any very considerable extent, yet that it may be materially improved by removing the sand spit which now extends off Shoal Point, and thus doing away with the sudden turn, which constitutes one of the greatest difficulties to the entrance of large ships.

6. That it is also practicable to deepen the channel by six feet or pro-Deepening of bably more by means of dredging. The bar, so far as we have been able to channel. ascertain by boring, is composed of small stones, sand, and shells, covered by a layer of mud, from one to two feet in depth, and although it is impossible to state with positive certainty, we believe that there are no impediments in the bed of the harbor which will materially interfere with the formation of a channel of fourteen or fifteen feet in depth at the lowest stage of the tide.

7. Except on the bar and in the neighborhood of the rocky ledges, the Nature of the bottom appears to be composed of soft mud, into which the boring-rod bottom. penetrated generally to the depth of ten feet without difficulty; therefore it would seem to be quite practicable to provide the necessary depth and accommodation at the anchorage and alongside the wharves.

8. The entire removal of the rocky bed which occupies one half the pool Rocky bed at between Songhies point and the old bridge, would seem to be neither practicable Songhies Point. nor necessary, and under any circumstances would be attended with an

10 - 25

enormous outlay of money; but we think it would be highly desirable to blast away such portions as rise so near the surface as to endanger vessels entering or leaving near high water, and thus to obtain a uniform depth over this bed; and the first of these which should be removed is that part of the ledge known as the Beaver Rock, which has only two or three feet on it at low tides, and is very much in the way of ships entering or leaving the harbor.

James Bav.

9. James Bay, though at present very shoal, is capable of being very considerably deepened, its bed being composed of soft mud; there is considerable accommodation for wharfage on both its shores, as well as anchorage in the centre, and we consider this a very important part of the harbor. It may be here remarked that its head, above the bridge, dries at low water, and is likely, as the town increases, to become extremely offensive and injurious in a sanitary point of view; and it seems worthy of consideration whether this portion might not be reclaimed by filling in, and thus become a source of revenue to be applied to the improvement of the harbor.

10. The removal of the old bridge, which we understand is immediately to take place, will add considerably to the accommodation for shipping, and the facilities for constructing lines of wharves; and, looking to the comparatively limited extent of the harbor, no piers or wharves should be allowed to extend further into the stream than those already in existence, and in the construction of any new ones, either above or below the bridge, the projection should be limited to the smallest extent consistent with a due regard to a sufficient depth, either existing or to be obtained by dredging, and should moreover exhibit one uniform line of water frontage, closed in by strong planking or masonry from high water mark to the rock bed of the harbor, and this latter recommendation should be applied to all wharves, whether now in existence or to be hereafter constructed.

11. To carry out the improvements thus specified, or indeed, with the rapidly increasing traffic, to preserve the harbor in its present state, it will be necessary to procure a dredging machine; and taking into consideration the extensive nature of the work to be performed we recommend that it should be constructed on the best and most approved principle, viz: that generally adopted in the harbors of the United Kingdom—a series of buckets on an endless chain.

12. For the removal of rocks by blasting a diving-bell is an indispensable aid, and is also actually necessary in conjunction with the dredging machine. A small tug steamer would be required to tow the punts with the soil removed by the dredge, in order to deposit it at a sufficient distance outside the harbor; this would be far more economical than landing it on any part of the shore.

13. Before concluding this part of the subject, we would desire to impress on your Excellency the extensive nature of the undertaking here proposed. and to guard against the expectation, that any permanent results can be looked for under a series of years. To effectually remove the bar at the entrance, to deepen the channel to the extent necessary, to scoop out the whole basin of the anchorage, as proposed, and to remove the rocks scattered over it, would doubtless involve a very considerable outlay, and would require the undivided attention and superintendence of an engineer, experienced in such operations, and it does not seem to us probable that such a work could be completed, under favourable circumstances, with one dredging machine within a period of six or seven years; but whether it is decided to undertake the greater operation of permanently enlarging and deepening the harbor, or whether it will be deemed sufficient, so far to improve it by deepening the bar so as to allow vessels of fourteen feet draught to enter at all times of tide, or even to preserve it in its present state of efficiency, the dredging machine and divingbell will be equally necessary; indeed under either of the circumstances considered, they will be indispensable.

Removal of old bridge.

Necessity for a dredging machine and

Diving bell.

Extensive nature of undertaking.

14. In order to make this statement the more plain, and to give a more Tracing, exact idea of the work contemplated, we append a tracing of the harbor with to be done. the different portions of the work required, marked in sections, showing the number of cubic yards to be dredged in each to reduce the bottom to the uniform depth of fourteen feet on the bar, and sixteen feet within the harbor at low water, together with an approximate estimate, of the first outlay to obtain the necessary plant, with the probably annual expense of working the same.* We also append an extract from a report of a work of a similar character now carrying out in the river Clyde in Scotland, where five dredging machines are constantly employed; from which it will be seen that during a period of four years the average amount of soil removed was 57,200 cubic vards per annum for each machine at an average cost of tenpence per cubic yard.

15. It will be observed that in the accompanying estimates, no provision Removal of has been made for the removal of rocks, an operation in itself entirely distinct rocks. from the dredging.

16. There are a few other points, which though not involving any considerable outlay of money, are only second in importance to the essential ones just enumerated, and will go far to maintain the efficiency and convenience of Victoria as a commercial port when once so established; there are likewise some matters of detail, which, though perhaps not generally included in a report of this nature, may not be considered out of place in this particular instance.

17. A harbor light would be of great assistance to vessels entering at Harbor light. night, especially passenger steamers from Fraser River, and we consider Colville Island to be the most eligible site for it; we recommend on account of the numerous Indian fires and other lights constantly exposed near the harbor, that the light should be a colored one, or what is preferable a combination of bright and red by two lanterns; the light in this position would not interfere with the sea lights outside, nor could it be mistaken for that on Fisgard Island, by vessels bound for Esquimalt.

18. The practice of throwing into the harbor or under the wharves, Throwing rubbish, ashes, &c., from the different vessels should be strictly prohibited, harbor. and a suitable boat or lighter should be provided for the purpose of receiving such refuse, a place being appointed in some part of the harbor, above high water mark, for its final reception.

19. The want of a public landing place is severely felt, and we strongly Public landrecommend that one be established at an early period in such a position that ing-place. boats may land at all times of the tide, and that no vessels or boats be permitted to lie alongside of it, or to impede the landing of passengers, &c.

20. We have made ourselves acquainted with the Harbor Proclamation Non compliof 1858, and we consider that it provides, in almost every respect, for the ance with harbor reguproper regulation of all matters falling within the province of the harbour lations. master; but its provisions appear to have been totally disregarded, and we cannot learn that any penalty has ever been enforced or conviction taken place for a breach of the laws therein laid down. Finally, we are of opinion that the appointment of the harbor master, as it at present exists in conjunction with another office, is totally incompatible with the due performance of the important functions which should devolve on him in the former capacity, viz; the rigid enforcement of the regulations before alluded to, as well as the general direction of the improvements recommended, in conjunction with the Superintending Engineer; and we recommend that he should have at his disposal a boat and crew in order that he may keep himself personally acquainted

	with the depth of the harbor, and perform his various efficient manner. We have the honor to be your Excellency's obedi (Signed) George Her JOSEPH W. JOHN GASTH J. DESPARD W. A. MOU. JOHN J. APPENDIX HH.

GENERAL REPORT OF THE STEAMER "SIR JAMES DOUGLAS," THE PROPERTY OF THE GOVERNMENT OF THE DOMI-NION OF CANADA, RUNNING IN THE PROVINCE OF BRITISH COLUMBIA.

Description of the Steamer "Sir James Douglas."

Employment of vessel.

of The Steamer was built in Victoria Harbor, in 1864, by Robert Ewing, Government Contractor, in connection with a scheme for the purpose of dredging Victoria Harbor.

Dimensions.—Length of keel, 110 feet; extreme length, 120 feet; extreme beam, 18 feet 8 inches; depth of hold, 10 feet; draught of water, 10 feet 6 inches; measurement in tons, $153\frac{39}{24}$.

Material of Hull.—The best Douglas pine, with the exception of alternate floor timbers, which are of natural crooks of Vancouver Island oak, coppered to 10 feet 9 inches with 20 ounce copper,

Fastenings.—Copper and iron, also locust treenails.

Stern Posts.—Secured below with heavy gun-metal shoe and through copper bolts, and above with iron knees, and a wooden transom, natural crock.

Deck.—Flush for 90 feet, from thence a poop deck, raised 2 feet high to taffrail, to give cabin room.

Accommodation.—Cabin 14 feet long by 15 feet wide, abaft this is a cabin on each side, with double berths and steward's pantry amidships, with storerooms right abaft. Captain and engineer's cabins 4 feet by beam of ship, forward of the main cabin. Forecastle to berth eight hands.

Engines.—A pair of diagonal, condensing, direct-acting; diameter of cylinder 27 inches, length of stroke of piston, 16 inches, average revolutions 95 per minute, nominal power 40 horses.

Boiler.—Tubular, length 9 feet 4 inches, breadth 10 feet, and height 13 feet, fitted with three furnaces and 190 three inch tubes, 5 feet 6 inches long; extreme working pressure 20 lbs. to the square inch, and average pressure 15 lbs.; built for and placed in vessel by Messrs. Spratt and Kriemler, of Victoria, July, 1870.

Bunkers.—Iron, capable of holding 22 tons of coal. Consumption per hour 9 cwt.

Propeller.—Composition, two bladed, 11 feet pitch and 7 feet diameter. Speed.—Average from 8 to 9 knots.

Spare parts of Engines.—One piston and rod complete, one connecting rod, and one air-pump bucket.

Masts.-Two in number. Taper spars, 50 feet from deck to truck.

Rigging.—Hemp.

Sails.-Gaff fore and mainsail, and stay foresail.

Anchors.-Two bower, two stream, and one kedge.

Chain Cables.—Two three-quarter inch, 60 fathoms each, not studded.

Boats.—Two in number, one four oared and 22 feet long, and one two oared 16 feet long.

Pumps.- One Downton's patent deck pump.

Employment of Vessel.—From January, 1865, to January, 1866, towing punts and attending on dredge, lighthouses, lightships, &c.

From January, 1866, to present date, carrying mails, passengers and

freight along the east coast of Vancouver Island from Victoria to Comox calling at the following settlements, viz. : Cowichan, Maple Bay, Admira Island, Chernainus, and Nanaïmo, weekly, and to Comox fortnightly. The rates of fare are as follows : From Victoria to—	1
Cowichan, Maple Bay, and Admiral Island, single ticket, two dollars and fifty cents (\$2 50), return ditto, four dollars (\$4). Chernainus, single ticket, three dollars (\$3), return ditto, five	
dollars (\$5). Nanaïmo, single ticket, four dollars (\$4), return ditto, six dollar and fifty cents (\$6.50).	S
Comox, single ticket, six dollars (\$6), return ditto, ten dollars (\$10). <i>Freight</i> .—To all places between Victoria and Nanaïmo, three dollars (\$3 per ton of forty feet.	
From Victoria to Comox four dollars (\$4) per ton. All cattle to Cowichan, Maple Bay, and Admiral Island three dollar	8
(\$3) per head. To Chernainus four dollars (\$4); Nanaïmo, five dollars (\$5); and to	
Comox, six dollars (\$6). Small animals, such as calves, sheep, pigs, &c., from fifty cents (50 cts.	
to one dollar and fifty cents (\$1.50). <i>Mileage.</i> —From Victoria to Cowichan, 36 miles; thence to Maple Bay	
9 miles; thence to Admiral Island, 5 miles; thence to Chernainus, 7 miles thence to Nanaïmo, 22 miles; and thence to Comox, 55 miles.	·
VictuallingThe vessel is provisioned by the steward, who has a contract from the Government of one hundred and seventy-five dollars (\$175))
per month, for which sum he has to provide food for officers and crew finding his own and cook's labor; he has also to find the vessel in water and lights. The Government, to compensate him for the smallness of his allow	Ĺ
ance, permits him to furnish food for, and charge passengers at the following rates, viz.: For breakfast and tea, fifty cents (50 cts.), and for dinner	5
seventy-five cents (75 cts.); he is also allowed to supply liquors to the passengers while running, at the usual charge, without paying a license.	
Salaries and Wages.— William Clarke, Master	Salaries and wages.

The sum of \$4,200 per annum is included, being allowed to the credit of the ship, for carrying the mails, that being the lowest sum tendered for this mail service by a steamer of inferior power and accommodation. The expenditure column dows not cover interest on cost of vessel, or depreciation.

Repairs.

Necessary repairs wanted.—Keel will require immediate attention, the vessel having struck on an unknown rock in June last; new rudder head; copper getting very thin, will require renewing; caulking outside; to do this it will be necessary to haul the vessel on ways. Estimated cost as follows, viz.:

Hauling on ways, and launching	\$550	00
Stripping, caulking and re-coppering	410	00
Repairing keel	100	00
New rudder head	100	00
Slight repairs to machinery	150	00
Material	1,500	00
	2,810	00

(Signed)

W. CLARKE, Master in charge.

APPENDIX I L

COPY OF LEASE FROM WESTERN UNION TELEGRAPH CO., TO BRITISH COLUMBIA GOVERNMENT, OF ITS TELEGRAPH LINES IN THAT PROVINCE.

THIS INDENTURE made the eleventh day of February, in the year of Our Lease of Lord One thousand eight hundred and seventy-one, between the Western telegraph line Union Telegraph Company of the one part, and the Government of British to Government Columbia of the other part.

Columbia.

Whereas certain negotiations have taken place between the said parties hereto, respecting the maintenance and repair of the telegraphic lines hereinafter mentioned: And whereas it was agreed by and between the said parties Terms of on the twentieth day of May last past, that the said Western Union Telegraph agreement Company, should make to the said Government of British Columbia, a per-recited. petual lease of its telegraphic lines, instruments and appurtenances for working the same from Swinomish, Washington territory, to Quesnel, British Columbia, upon conditions that the said Government of British Columbia should during the existence of such lease, maintain and keep in repair and in good working order at their own proper cost and expense the submerged or cable portions of the telegraph lines of the said Western Union Telegraph Company between Victoria, Vancouver Island, and Swinomish, Washington Territory, and it was also agreed by and between the said parties hereto, that all messages offered by the said Government of British Columbia whether on Government business or otherwise, destined for any point north of Swinomish, should be transmitted by the said Western Union Telegraph Company free of expense between Victoria and Swinomish; and it was also agreed that the obligation to pay the cost of keeping the said cable lines in repair might be terminated by the said Government of British Columbia on giving one month's previous notice in writing to the said Western Union Telegraph Compeny, at San Francisco, California, in which case the lease of the telegraph lines and appurtenances, from Swinomish to Quesnel and other points in British Columbia should terminate, as also the privilege of free messages between Swinomish and Victoria : And it was also agreed that the telegraph line so leased, should upon the termination of such lease, be delivered to the said Western Union Telegraph Company, by the said Government of British Columbia in as good order and condition as the same were in when the said Government received the same-reasonable wear and tear excepted :

And it was also agreed by and between the said parties hereto that the said Western Union Telegraph Company, would execute such instruments or assurances as might be deemed necessary to effectuate the agreement now being recited : And whereas since the date of the said agreement the terms thereof have been faithfully observed by both parties thereto :

And whereas it has been considered advisable that the said Western 10 - 26201

Union Telegraph Company, should grant a formal lease to the said Government of British Columbia, of the telegraphic line above mentioned :

Formal lease granted.

Governmentto

maintain Sub-

in repair.

Now this Indenture Witnesseth that in performance of the said agreement and for the considerations aforesaid, the said Western Union Telegraph Company, doth hereby demise and lease unto the said Government of British Columbia, their successors, and assigns, all their telegraphic lines, instruments and appurtenances for working the same, from the Town of Swinomish, in Washington Territory, to the Town of Quesnel in British Columbia, and to all other points in British Columbia, in extension of the said line, to have and to hold the same unto the said Government of British Columbia for the term of nine hundred and ninety nine years from the said twentieth day of May, in the year of our Lord One thousand eight hundred and seventy.

Provided always and these presents are made upon this express condition marine Cable that the said Government of British Columbia their successors or assigns shall, during the continuance of the term hereinbefore created, or intended so to be. maintain and keep in repair, and in good working order at the proper cost and expense of the said Government of British Columbia, their successors or assigns, the submerged or cable portions of the telegraphic lines belonging to the said Western Union Telegraph Company, between the City of Victoria in Vancouver Island, and the Town of Swinomish, in Washington Territory; and it is hereby agreed by and between the said parties hereto that during the continuance of the term hereby created, or intended so to be, all messages offered by the said Government of British Columbia, whether on Government business or otherwise, for any points north of the said Town of Swinomish, shall be transmitted by the said Western Union Telegraph Company, from the said City of Victoria, to the said Town of Swinomish, free of any cost or charge to the said Government of British Columbia.

And it is hereby also agreed and declared by and between the said parties ernment to terhereto, that the obligation assumed by the said Government of British Columbia, as aforesaid, as a consideration for the grant of the term hereby created, or intended so to be, to pay the cost of keeping the said cable lines in repair between the said City of Victoria and the said Town of Swinomish, may be terminated by the said Government of British Columbia, their successor or assigns, on giving one month's previous notice in writing to the said Western Union Telegraph Company, by leaving the same at or sending the same to the office of the said Company, in the City of San Francisco, in the State of California, at the expiration of which notice these presents, and the term hereby created, and all the rights and privileges hereby granted, and all the liabilities of both parties hereto, or their or either of their successors or assigns, shall absolutely cease and determine.

Lines to be delivered in good order.

Power to Gove

minate lease.

Provided nevertheless, and it is hereby declared, that upon the expiration, or other sooner determination of the term hereby created, the said telegraph lines, so demised and leased as hereinbefore mentioned, by the said Western Union Telegraph Company, to the said Government of British Columbia, shall be delivered up by the said Government of British Columbia their successors or assigns, to the said Western Union Telegraph Company. their successors or assigns, in as good order and condition as the same were in when handed over by the said Western Union Telegraph Company, to the said Government of British Columbia, reasonable wear and tear excepted.

In witness whereof the said Western Union Telegraph Company, have caused their corporate seal to be hereunto affixed and Anthony Musgrave, Esq., the Governor of the Colony of British Columbia, has hereunto set his hand on behalf of the Government of British Columbia, and has caused the public seal of the Colony to be hereunto affixed.

THE WESTERN UNION TELEGRAPH COMPANY,

By GEO. H. MUMFORD,

Genl. Agent,

Signed, sealed, and delivered on behalf of the Western Union Telegraph Company, by the said Geo. H. Muniford, in the presence of,

(Signed) GEO. S. LADD, Secretary, COL. SLATE, Tel. Co.,

[L.S.] (Signed) A. MUSGRAVE, Governor.

Signed, sealed, and delivered on behalf of the said Government of British Columbia, by the said Anthony Musgrave, in the presence of

> (Signed) GEORGE PHILLIPP, Attorney General, British Columbia.

Certified correct copy,

CHARLES GOOD, Colonial Secretary.

[L.S.]

APPENDIX 11.

JAMES BAY, VICTORIA.

Embankment

In reference to the tenders for the construction of a new bridge across at James Bay. James Bay, forwarded herewith for His Excellency's consideration, I take the opportunity of remarking that I have approximately calculated the cost of building an embankment, faced with a stone wall, and having a 20 feet roadway on top, across the bay on the same line as and instead of the proposed bridge, with the view of reclaiming that portion of James' Bay which lies to the eastward of the said line, and which might then be filled up with material dredged from the harbor. This measure was suggested in the report of the Victoria Harbor Commissioners, dated 28th February, 1862, and offers many prospective advantages in connection with the general scheme then advised for the improvement of the harbor.

Advantages to accrue.

Cost of the work and delay advisable,

By it the wharf and harbor accommodation would be considerably increased, whilst the head of James Bay, ten acres in extent, now at low water a bank of offensive mud, a nuisance to the neighborhood, and injurious to the general health, would be converted into a valuable piece of land available either for business purposes or as a public square.

But the cost of this embankment alone, irrespective of the filling great, necessary for reclaiming the land, would not be less than \$15,000 (fifteen thousand dollars), and as the benefits of the proposed plan could only be fully realized in connection with the resumption of the expensive operation of dredging the harbor, I am of opinion that this work should be deferred until the colony can better afford the outlay necessary to carry the project into execution, and the value of the land to be reclaimed has increased so as to more amply counterbalance such outlay.

24th November, 1868. The Colonial Secretary. (Signed,) JOSEPH W. TRUTCH.

APPENDIX KK.

CORRESPONDENCE ON THE SUBJECT OF A GRAVING DOCK, AT ESQUIMALT.

Rear Admiral Hastings to Governor Seymour.

ZEALOUS, IN ESQUIMALT, 20th August, 1867.

SIR,-Having received instructions from the Lords Commissioners of From Admiral the Admiralty to report upon the facilities afforded on this station for Hastings to docking vessels the size of my flag ship, I beg to acquaint Your Excellency mour. that having failed to find such, I have directed a Board of officers to select the most eligible site in this harbor for the construction of a dock.

I now enclose for Your Excellency's information, the report I have received from them, and the services of Mr. Pearse, Assistant Surveyor-General, having been kindly rendered in consequence of my application to the Colonial Secretary, during your Excellency's absence, I am glad to be enabled to inform you that so far as the borings have yet been carried, the nature of the bottom is most favorable for such a work.

Before making my report to their lordships, I shall communicate further with Your Excellency.

I have, &c.,

(Signed,) GEO. F. HASTINGS. Rear-Admiral, Commander-in-Chief.

His Excellency

Governor Seymour, &c., &c.

Report on the most convenient site for erecting a Dock at Esquimalt, for the Report as to accommodation of Ships of the Squadron.

(No. 53.)

H. M. S. "ZEALOUS,"

ESQUIMALT, 31st July, 1867.

SIR,-In compliance with your memorandum of the 27th instant, we have proceeded to examine the Harbor of Esquimalt for the purpose of fixing on the most favorable site for building a dock calculated to receive such a ship as the "Zealous," or even larger, and beg to report as follows :---

1st. We find, on examination of the charts, that "Lang Cove" offers Recommendaevery facility for the formation of a graving dock, and would give twenty- tions. four feet over the sill at high water.

2nd. Before a decisive opinion can be given, we require that the cove at the upper end should be bored, and a survey taken of the surrounding land. Captain Hamp, of Victoria, is we believe the owner or part owner of the property referred to.

3rd. To effect this recommendation, a civil engineer should in our opinion be employed.

site of dock at Esquimalt.

4th. As in the formation of a graving or other dock, labor would in most part have to be supplied from England, we would beg to offer as our suggestion that reference be made to the system in use at San Francisco for docking ships by means of iron pontoons; as although a graving dock would in our opinion be in all respects superior to any other, time in the erection of a dock (especially as our report has special application to the "Zealous") should be considered.

> We have the honor to be, Sir, Your obedient servants.

tour obcarent ber valus,
, R. B. OLDFIELD, Captain,
H. M. S. " Melacca."
R. DAWKINS, Captain,
H. M. S. " Zealous."
W. A. LIDDELL, Commander,
H. M. S. "Zealous."
GEO. L. CARR, Staff Commander,
H. M. S. " Zealous."
DANL. PENDER, Master,
Commanding "Beaver."
THOMAS ROGERS, Carpenter,
H. M. S. " Zealous."

Rear-Admiral

The Hon. George F. Hastings, C.B., Commander-in-Chief.

Rear-Admiral Hastings to Governor Seymour.

Rear-Admiral Hastings to Governor Seymour.

"ZEALOUS," AT ESQUIMALT,

16th October, 1867.

His Excellency Governor Seymour, &c., &c., British Columbia.

SIR,—Referring to former correspondence and communications which have passed between Your Excellency and myself respecting the construction of a dock in this colony, I beg to acquaint you that having visited lately the Port of Nanaïmo and also Burrard Inlet, both of which localities have been pointed out as offering the best sites for such a work, I am still more confirmed in my opinion that in Esquimalt Harbor is to be found the most eligible situation for a dock.

The geographical position of this harbor, the facilities of ingress and egress at any time of the day or night for sailing vessels, and the depth of water and nature of the bottom in Lang Cove—the best site therein—give it such indisputable advantages over every other port in this colony with which I am acquainted, that I have strongly urged upon the Lords Commissioners of the Admiralty the importance of such a work being therein undertaken by the Imperial Government.

The benefit that would thereby accrue to the colony under Your Excellency's Government must be so apparent as not to require comment from me, and I trust you may find yourself in a position to make such representation thereon to the Colonial Secretary of State as may tend to strengthen those which I have already made to the Admiralty.

I have, &c.,

(Signed,) GEO. F. HASTINGS, Rear-Admiral, Commander-in-Chief, Governor Seymour to Rear-Admiral Hastings.

NEW WESTMINSTER,

Rear-Admiral

31st October, 186

The Hon. G. F. Hastings, C.B.

SIR,—I have had the honor to receive your letter of the 16th instant, informing me that after having inspected the three ports of Esquimalt, Nanaïmo, and Burrard Inlet you have come to the conclusion that the first named possesses the greatest advantages for the establishment of a dock.

The proposed work would be so extremely advantageous to the colony, that I shall be happy to write to the Secretary of State in support of the advice you have already tendered to the Lords of the Admiralty. In a professional matter of this kind I shall not venture to set my own judgment against yours; but I have no doubt that the striking advantages of the head of the north arm of Burrard Inlet have not escaped your attention.

There is even ground, abundance of fresh water, a position unassailable by land, and which might be made equally so against an enemy's fleet.

However, since you have arrived at a conclusion, I will support that conclusion with His Grace the Duke of Buckingham.

> I have, &c., (Signed),

FREDERICK SEYMOUR.

6th February, 1868.

NEW WESTMINSTER,

Governor Seymour to the Secretary of State.

Governor Seymour to Secretary of State.

[Copy. No. 7.] The Right Honorable

The Duke of Buckingham and Chandos.

My LORD DUKE,—I have the honor to forward copies of a correspondence which has passed between Admiral Hastings and myself respecting the construction of a dock of considerable size in this colony.

2. I hardly like to place myself in opposition to Admiral Hastings in a matter of which his professional knowledge makes him a much better judge than myself. There is no doubt but that Esquimalt possesses an admirable harbor. My only objection to it was its extreme accessibility—day or night any ship might run in; but it is not even necessary to run in, as a vessel lying outside might shell any buildings in the dockyard or any vessel in the harbor.

3. Admiral Hastings appears to believe in the supremacy of the English fleet in the North Pacific under any circumstances. If such supremacy always exists, Esquimalt is clearly the place most desirable for the establishment of a dock. I cannot but consider, on the other hand, the possibility of our being worsted. In such a case, Burrard Inlet would have immense advantages, inasmuch as ships might run fifteen or sixteen miles up the inlet, having a certain number of men or guns at the entrance where a hill one hundred and eighty (180) feet high runs immediately over the deep channel. In Burrard Inlet are to be found abundance of fine timber and plenty of fresh water.

4. A dock in Esquimalt or Burrard Inlet would however be equally valuable to the colony in time of peace, and I hope that no hesitation I may feel as to the wisdom of Admiral Hastings' selection may stand in the way of his recommendation.

I have, &c., (Signed,) FREDERICK SEYMOUR. 20? Governor Seymour to Rear-Admiral Hastings.

Sessional Papers (No. 10.)

A. 1872

Colonial Secretary to Governor Seymour.

[Copy. No. 27.] The Colonial Secretary to Governor Seymour.

> DOWNING STREET, 15th May, 1868.

Governor Seymour, &c., &c.

SIR,-I have the honor to transmit to you, for your information, and in reply to your despatch of the 6th February, No. 7, a copy of a letter from the Admiralty enclosing copy of one from the hydrographer, in which he expresses his opinion that Esquimalt is the fittest place in the colony for a naval dock.

I have, &c., BUCKINGHAM AND CHANDOS. (Signed.)

Mr. Romaine to the Under Secretary of State.

The Admiralty [Copy.] to Under-Secretary of State.

The Under Secretary of State, Colonial Office.

SIR,-I am commanded by my Lords Commissioners of the Admiralty to acknowledge the receipt of your letter of the 27th ultimo, transmitting the copy of a despatch from Governor Seymour respecting the construction of a dock in British Columbia.

In reply, I am commanded by my Lords Commissioners to transmit to you, for the information of the Secretary of State for the Colonies, the copy of a report from the hydrographer on this subject, and I am to request that you will inform the Duke of Buckingham that my Lords Commissioners entirely concur in the hydrographer's views of the advantages of Esquimalt Harbor over Burrard Inlet.

I am, &c., W. G. Romaine. (Signed,)

Memorandum by the Hydrographer.

29th April, 1868.

I have considered this question so maturely, and so often expressed an opinion on it, after a personal experience of the positions extending over many years, that I have no hesitation in repeating my opinion that Esquimalt Harbor is the fittest place for a naval dock, and that the spot recommended by Admiral Hastings is the best that could be selected.

Esquimalt is and always must be the principal seaport in these colonies. What naval works we have are there. Esquimalt is easy of defence, and an enemy could not injure a dock there unless he got possession of the placeand there is no reason why he could not get possession of Burrard Inlet as easily as Esquimalt.

A vessel arriving at Esquimalt damaged would have to be towed one hundred (100) miles before she would reach Burrard Inlet.

Unless Esquimalt is abandoned as the naval head quarters, and all the establishments removed to Burrard Inlet, which I do not contemplate as possible, then I do not think it possible to entertain the question of a Government dock at Burrard Inlet.

(Signed,)

GEORGE HENRY RICHARDS, Hydrographer.

Memorandum by Captain Richards.

ADMIRALTY, 9th May, 1868.

APPENDIX LL.

COMMISSIONER OF LANDS AND MINUTE OF THE CHIEF WORKS.

On the subject of an Overland Coach Road through British Territory, between the Pacific Coast and Canada, comparing the merits of the various Passes through the Rocky Mountains, and shewing the extent of this Road already built in British Columbia, and what remains to be done to complete it beyond the eastern boundary of the Colony to the head of steamboat navigation on the Saskatchewan.

Little has hitherto been done towards the construction of trails or Present condi-tion of trails roads across the Rocky Mountains, north of the 49th parallel.

The primitive paths through the various passes of this mountain range, Rocky Mounoriginally tracked out by Indians, and only kept open, year by year, by their taine. travel along them, are still the sole means of communication between British Columbia and the North West Territory.

Some little work was indeed done, years ago, by the Hudson's Bay Company in opening trails through the Leather and Athabasca Passes to facilitate the passage of their brigades, which at that time carried supplies from the depots east of the Rocky Mountains to Jasper's House, and thence westwards, by the Tête Jaune Cache, down the Fruser River to the various posts in the region of country now included in British Columbia; or southwards, by the Athabasca Pass, to the Boat Encampment, and down the Columbia to the posts in Washington and Oregon. But soon after the company established posts at Fort Vancouver and Victoria, supplied by ships direct from England, communication by these passes was discontinued, and the trails through them lapsed into disuse, and were* soon in no better condition than before they were improved by the Hudson Bay Company's employés. At present. except when travelled over by occasional parties of prospectors or scientific explorers, these, as well as all the other Rocky Mountain passes in British Territory, are made use of by Indians only.

Many of these passes are, however, even in their primitive condition, so easy of passage that horses carry heavy loads over them with facility, and through the Vermilion Pass loaded carts have been driven on the natural roadway unimproved by labor.

But although the work of building a road over the Rocky Mountains Work already has yet to be commenced, much has already been effected by this colony to Colony. wards the consummation of the much desired line of road communication, through British Territory, between the Sea Coast of British Columbia and In fact more than one-half (in cost) of this work within the limits Canada. of the colony is now complete.

The Cascade Range of Mountains, the great barrier between the sea coast Two lines of road through of this colony and its interior districts, which presented a far more difficult Cascade Range engineering obstacle to road-making, and one more expensive to overcome, than the Rocky Mountains themselves, has been pierced by two lines of coach road. which, commencing at Yale and Douglas respectively, the limits of steam-boat navigation on the Lower Fraser and its tributary Harrison Lake, unite at Clinton, 136 miles from Yale, on the high rolling plateau in the interior of the colony, from which junction point the road extends 242 miles further north-

10 - 27

209

across the

wards to Cameronton, in the heart of the Cariboo District, distant altogether 378 miles from Yale.

Branch road from Yale to Savona's.

Nature and cost of the roads.

Variety of routes for selection.

A branch road twenty-three miles long, has also been built from the main line.

at a point on the Buonaparte River 110 miles from Yale, to Savona's at the lower (western) end of Kamloops Lake, from which place uninterrupted steamboat navigation extends through Kamloops Lake, and up the South Thompson River to the upper (eastern) end of Great Shuswap Lake, a distance of 115 miles, and also up the North Branch of Thompson River, which joins the South Thomp. son at Fort Kamloops, to a distance of eighty-five miles from the latter post.

These roads, constructed at a total cost of \$1,339,915 (about £275,000). of which amount the section from Yale to Savona's cost \$830,000 (about $\pounds 166,000$), are of a character very superior to that of public roads in most They are eighteen feet wide, the surface being covered with young countries. broken stone, where (as in most parts along the Fraser and Thompson Rivers) such material is at hand, or with gravel well cambered up in the centre, with ditches on one or both sides where required.

With the exception of some short pitches as steep as one foot in ten, the sharpest inclines throughout this road are of one foot in twelve, the curves being easy, and the bridges and culverts substantially built of timber.

Loads of seven and eight tons are hauled along them by mules or oxen, at an average draught load of 1,200 lbs. or 1,300 lbs. to each team animal ; and the mail coach drawn by six horses travels between Yale and Cariboo at the rate of nine miles an hour.

From the Cariboo terminus of this road, and from Savona's, as well as from intermediate points along the road, various routes may be traced to the different passes of the Rocky Mountains. But before a judicious selection can be made of the line for a waggon road to the territory east of the Rocky Mountains, it will be necessary to determine by more exact and detailed engineering explorations and surveys than have yet been made, which of these passes presents the least obstacles to the construction and maintenance of a road through it, as well as the greatest advantages in its approaches, not only as regards engineering facilities, but with respect also to the character of the country to be passed through on either side of the mountains, its soil, climate, freedom from inroads of hostile Indians, and general capabilities for settlement, and especially in relation to its accessibility from the existing lines of communication in this colony and to the eastward.

The following remarks embody the most reliable information extant on this subject ; and the accompanying opinions and estimates based thereon are advanced in anticipation of the results of such a detailed survey as has just been suggested.

Passes through the Rocky Mountains.

The passes through the Rocky Mountains at present known from the reports of various explorers, commencing with the Leather Pass, the most northerly point by which it would be practicable for a road connecting the Fraser River Valley with the navigable waters of the Saskatchewan to cross this range, and enumerating thence southward to the 49th Parallel, are as follows, with their respective altitudes as far as they have been reliably determined by actual observation :

1.	Leather Pass	Altitude	3,760	feet.
2.	Athabasca	**	7,000	"
	Howse's		4,500	"
4.	Kicking Horse	77	5,210	,,

Of these the Athabasca Pass, although otherwise very favorably situated, Objections to is so elevated, steep, and rugged as to be quite impracticable for a coach road. the six sou The six last enumerated passes although generally easy of passage, and in other respects available for road communication, are too far south for the purpose of such a line of connection between the sea-coast of British Columbia and the Canadas as is now under consideration, it having been determined by actual survey that no practicable route exists for the road through the three parallel-ranges of mountains lving between the Lower Fraser Valley and the Rocky Mountains, viz : The Cascades immediately east of the Fraser; the Gold Range west of the Columbia; and the Selkirk Range in the Big Bend of the Columbia, and between that river and the Kootenay River, except that on which the road is now built, from Yale up the Fraser and Thompson River valleys to Savona's, thence by Kamloops, through the Eagle Pass, at the upper end of Great Shuswap Lake, to the Columbia River at the Great Eddy below the Little Dalles, and northward along the valley of the river, by the Boat Encampment, and round the Big Bend southward past the mouth of Howse's Pass, of which line a more detailed description will be given further on, in connection with the Howse's Pass Route.

The position of these southern passes is therefore, as regards their acces- Southern sibility from the west coast, very disadvantageous when compared with that passes comof Howse's Pass. But they are still more ineligibly placed in respect to the Howse's pass. approaches to them from the eastward; for these passes all debouch to the east into valleys, the waters of which are tributary to the South Saskatchewan, passing through a region of country beset with predatory Indians, and sterile and unattractive in comparison with the rich belt of land further north, through which the North Saskatchewan flows.

Through this rich district along the North Saskatchewan, a line of com- Route by munication between British Columbia and the Red River Settlement must chewan. pass, by whatever route it may cross the great watershed of the continent; indeed it may safely be taken as an established fact that such a line of communication must intersect the North Saskatchewan at Fort Edmonton, or some point higher up stream, so as to take advantage to the utmost of the long extent of navigable water of that river.

From such point, however, the southern passes are entirely cut off. They may, therefore, be dismissed from further consideration in relation to an overland route through British Territory, the choice for which is thus narrowed down, as to the point of crossing the Rocky Mountains, to an alternative between the Leather Pass and Howse's Pass.

Leather Pass Route.

The summit of the Leather Pass is the least elevated of all the known Leather Pass passes of the Rocky Mountains north of the 49th Parallel, being only, accord- Route? ing to Dr. Rae, 3,760 feet above the level of the sea. From Tête Jaune Cache at the western end of this pass on the Fraser River, in latitude 52° 48' north, longitude (about) 119° 50', to Henry's House nearly due east, the distance is about ninety-five miles, the watershed being situated twenty-five miles west of Henry's House.

From Henry's House the pass turns nearly due north, and follows this course along the Athabasca River twenty-five miles to Jasper's House, at the eastern outlet of the pass. The total length of this pass is thus about 120 miles, in which distance no great obstacles to the construction of a road are presented by the natural formation of the ground, the chief difficulties being the swampy nature of the soil in places, and the frequent crossing of mountain streams.

From Jasper's House to Fort Edmonton, the distance by the present line

the six south-

of travel is about 250 miles, through a rolling country gradually descending to the east, but in great part swampy, very deficient in grass or other feed for stock, and offering but little inducement for settlement. The distance from Jasper's House to the navigable water of the Saskatchewan may, however, be reduced to about 160 miles, by adopting a line intersecting that river at its junction with the Brazeau River. This line would pass through a country materially the same as that between Jasper's House and Edmonton, and on which the chief road-making difficulties would be the great extent of swamps to be passed through.

The whole distance from Tête Jaune Cache to steamboat navigation on the Saskatchewan thus appears to be 280 miles, and the cost of constructing this length of road, of the character of those above described already built in this colony, may be approximately estimated at \$650,000.

From Tête Jaune Cache the Fraser River is stated to be navigable for steamers with some three or four interruptions where falls and rapids occur, necessitating portages at these points, to Quesnel Mouth, 320 miles from Yale, on the coach road between Yale and Cameronton.

The information obtained from persons who have travelled along this portion of the Fraser in cances is too incomplete and wanting in detail to form the basis of any just estimate of its facilities for steamboat navigation; enough is known, however, to warrant the conclusion that the impediments to navigation will on practical investigation be found far more numerous and serious than they are now supposed to be by those who favor this line of route. At all events it is certain that this long line of water carriage, even if practicable at any time, can be made available only for a short period during the summer and autumn; and as the construction of a road along the Fraser from Quesnel Mouth to Tête Jaune Cache is out of the question, not only on account of the distance between these points (330 miles), but especially because of the numerous steep and rugged bluffs which oppose the passage of a road along the banks of the river, it is evident that the Upper Fraser, cannot be depended on as a permanent route of communication across the continent.

The distance from Tête Jaune Cache to Cameronton (nearly due west) the terminus of the coach road from Yale, is not more than eighty miles as the crow flies, and it would therefore appear at first glance a matter of course that an overland route through the Leather Pass should be built by this route. But the intervening space is a sea of high rugged mountains, so broken up into deep valleys and steep ridges that from present information it seems impossible to connect the two points by a road of practical curves and gradients, and we have therefore to seek in some other direction for a line of road between Tête Jaune Cache and the Lower Fraser.

The most practicable route for such a road appears to be by a line running due south from the "the Cache," across the upper waters of Canoe River (which falls into the Columbia at the Boat Encampment), over the divide (about 2,800 feet above the sea level), between that stream and the North Thompson, and down the valley of the latter river by Fort Kamloops, to a junction with the present terminus of the coach road at Savona's.

The distance from Tête Jaune Cache to Savona's by this route is 235 miles, the last 130 miles of which run through an open or lightly timbered bunch grass country along the banks of the North Thompson River and Kamloops Lake, which are navigable for steamers throughout this distance, and on which waters in fact a substantial and powerful steamboat of 200 tons burden, built by the Hudson's Bay Company, is now plying.

The upper portion of this road between the Cache and the open country on the Lower Thompson (a distance of 105 miles), would pass through a dense forest most of the way, but no high or steep summits have to be crossed, nor are there any serious engineering obstacles to be encountered.

Distance and Cost.

Fraser River.

Tête Jaune Cache to Cameronton.

Most practic-

The cost of a road between Tête Jaune Cache and Savona's may therefore Cost. be safely estimated at not more than \$400,000.

There may exist routes (as some persons have stated) branching from the Other routes. line just described, by way of the Wentworth or the Clearwater tributaries of the Thompson, and intersecting the present coach road somewhere about Lake La Hache (210 miles from Yale). But the advantages which either of such deviations would offer in any respect over the route just described to Savona's are, to say the least, extremely doubtful, whilst on the other hand their disadvantages are obvious enough, of which it will be sufficient to specify one, namely:—that, whilst these routes must cross over to Lake La Hache through a district generally rough and timbered, and much intersected by swamps, the line to Savona's passes almost entirely through a nearly level prairie country.

In reference to this route from Tête Jaune Cache to Savona's, it should also be mentioned that besides the continuous navigation from Savona's extending thence 120 miles up the North Thompson as before described, there are stretches of navigable water of some fifty miles in extent to the upper portion of this river, which would be found of great avail both in the construction of the road and in assisting traffic along it.

It may therefore be assumed that should a road from the North West Distance and Territory cross the Rocky Mountains by the Leather Pass, it would follow Cost. this route down the Thompson to Savona's, to reach the Lower Fraser; and taking Yale as the western, and the junction of the Brazeau River with the North Saskatchewan as the eastern terminus, the distances by this line, and probable cost of constructing along it a coach road of a similar character to that already built in this colony may be thus recapitulated :---

	Distance.	Of which steamboat navigation.	Estimated cost of road.
Yale to Savona's	133 miles.	None.	Already made at a cost of \$830,000.
Savona's to Tête Jaune Cache Tête Jaune Cache to mouth of Brazeau	235 miles.	130 & 50 miles.	
River	280 miles.	None.	\$650,000.
Total	648 miles.	180 miles.	\$1,050,000.

Of this line 305 miles remain to be built within the limits of this colony, at an estimated cost of \$610,000.

Howse's Pass Route.

Rocky Mountain House (3,200 feet above the sea level) in latitude 52° Howse's pass 20' north, longitude 115° 10' west, and sixty miles up stream from the mouth route. of Brazeau River, may be taken as virtually the eastern terminus of the route by way of Howse's Pass, as from that point the Saskatchewan is navigable for stern wheel steamers of light draught throughout its entire course to the Great Rapids, twelve miles from its embouchure into Lake Winnipeg; and from thence also the country eastward is so open, and descends in so gradual and even a plain to Fort Garry, that a road may be led across it in any direction, with but little expense.

The line of this route would follow up the Saskatchewan to its source, Route by this and cross the watershed 145 miles from Rocky Mountain House, at an elevation of 4,500 feet (740 feet higher than the summit of the Leather Pass). In this distance the only material engineering difficulties occur in the last

213

Nature of the

pass.

twenty miles, along parts of which the road would require to be protected from the force of the mountain torrents, which at certain seasons inundate the river valley.

The crossing of the divide by this pass in latitude 51° 00' north, is stated by Dr. Hector to be very easy, indeed almost imperceptible, and he had but little difficulty in taking his loaded pack-horses through to the Columbia, although no trail now exists through this pass, that formerly used by the North West Fur Company having long since become overgrown and obliterated.

The descent towards the Columbia, although less gradual than the ascent on the eastern slope, is described as by no means precipitous or broken, but quite practicable for a road. The distance from the summit to the Columbia at the mouth of Blaeberry River is about thirty miles, and the only obstructions noted by Dr. Hector in this section were the heavy forest trees and dense undergrowth and fallen timber which rendered the passage of his horses very tedious.

The entire distance from Rocky Mountain House to the Columbia is 175 miles, and the cost of constructing this section of road may be set down at \$360,000.

The distance from Blaeberry River down the Columbia to The Eddy, (in latitude 51° 00' N., longitude about 118° 30' west), at the eastern end of the Eagle Pass through the Gold Range, which divides the Columbia Valley from Great Shuswap Lake, is 165 miles.

This section was carefully examined in 1866 by Mr. Moberley, Assistant Surveyor General of this colony, with a special view to the construction of a coach road, and his report established the fact that such a road may be built without great expense along either bank of the Columbia; no extensive bluffs occur to oppose the passage of a road, and at several points the river is so contracted that it may be spanned by a bridge of not more than 150 feet in length. The cost of such a road from Blaeberry River to the Eagle Pass has been estimated at \$412,000.

Mr. Moberley reports however that this portion of the Columbia River did not at the season when he examined it (September) appear to him so available for steamboat navigation as had been supposed. The steamer "Forty-nine" now plies between Colville, in Washington Territory, and Death Rapids, forty miles above the Eagle Pass; and above Death Rapids the river is again navigable to the neighborhood of The Boat Encampment, a distance of forty miles more.

But above this point there are several rapids which Mr. Moberley considered quite impassable by steamers, and which would therefore render further continuous navigation below the mouth of Blaeberry River impracticable.

The Eagle Pass was discovered in 1865 by Mr. Moberley, and has been subsequently surveyed by Government, and a line of road marked out through it.

Previous to Mr. Moberley's discovery of this pass, it had been supposed that the Gold Range was a continuous chain of high mountains, opposing an insuperable barrier to any road between the Columbia and Fraser River Valleys.

The summit of Eagle Pass is however only 280 feet above high-water in the Columbia River, and 407 feet above the level of Great Shuswap Lake, and the snow disappears from it in the beginning of April. From the Columbia River to the point where the Eagle River empties into Great Shuswap Lake is a distance of thirty-seven miles, over which a road can be made for about \$80,000. From this point there is, as before mentioned, uninterrupted steamboat navigation 115 miles to Savona's, and steamers may also run six or eight miles up Eagle River.

To continue this route by land however to Savona's, the line of road would leave the Eagle River Valley at the Three Valley Lake (twenty miles 214

Distance and

Report of Mr.

Moberlev.

cost.

Columbia River.

Eagle pass.

Route,

from the Columbia), and run nearly due south through a wide grassy valley across a low divide to the head waters of the Spillemeechene or Shuswa River, which it would follow down past the mouth of Cherry Creek to a point about seventy miles from the Columbia. Thence leaving the Shuswap it would run through a district of open prairie and sparsely timbered land, abounding in rich pasturage, and along which are scattered several farming settlements, by a course about west, twenty-five miles to the head of Okanagan Lake, and then forty-five miles northwest to the South Thompson, and down the southern banks of that river, and of Kamboops Lake, forty miles through an open grass country, very easy to make a road over, to Savona's.

The distances by this route, and the estimated cost of constructing a road Distances and by it, are therefore as follows :-cost.

	Distance.	Of which are navigable by steamers.	Cost of constructing a road.
Yale to Savona's Savona's to the Columbia River at "The Eddy"	180 miles.	None. 110 miles.	Already made at a cost of \$830,000. \$240,000.
Along the Valley of the Columbia River to the mouth of the Blaeberry River From the Columbia River at the mouth of Blaeberry River, to the Rocky	165 miles.	80 miles.	412,000.
Mountain House, head of naviga- tion on North Saskatchewan		None.	360,000.
Total from Yale to Rocky Mountain House	653 miles,	190 miles.	\$1,012,000.

Of this line 375 miles lie within the limits of this colony, a road for which distance would cost \$722,000.

It thus appears that there is very little difference in the distances by two routes. these two routes between the head of navigation on the Lower Fraser, and the navigable waters of the North Saskatchewan, and that the expense of connecting these two points by road is materially the same by either route. The choice between them must therefore depend on more general considerations, in respect of which their rival merits can only be determined after more exact enquiry has been made, and fuller information obtained, and as to which it would therefore be premature to hazard any conjecture at present.

Although in the foregoing remarks the head of navigation on the Lower Possible exten-Fraser has been treated as the western terminus of an overland route, there sion of the road is nothing to prevent the line of road being continued, whenever the requirements of traffic call for its construction, from Yale down either bank of the river to New Westminster (a distance of ninety-five miles), which town is already connected by a road nine miles in length with Burrard Inlet, a harbor of great extent and ample depth of water, accessible at all times by vessels of the largest class.

A narrow road has in fact been built along the line of telegraph on the left bank of the Fraser River for about thirty miles from Yale, and this line of road is partially opened the rest of the way to New Westminster.

It is only necessary in concluding these observations to refer to the routes. through the Cascade Range, from Bentinck Arm and Bute Inlet, by which it has been proposed to establish more direct communication between the sea coast and the Upper Fraser, in the neighborhood of Alexandria and Quesnel Mouth.

These lines have as yet been but imperfectly surveyed, and are therefore Remarks as to only partially known. It is however certain that the distance from Quesnel other routes.

Mouth to the coast is less by either of these lines than by way of the Fraser River. There is also but little doubt that either line is practicable for a road, although presenting obstacles to road making, the difficulties and cost of which have been greatly under estimated, especially in the case of the Bute But when it is taken into consideration that the construction of Inlet route. this latter road from Bute Inlet to Quesnel Mouth, a distance of 230 miles, is advocated as a competing line to the coach road already built from that point to Yale, the character and capacity of which have been above described, it can hardly be believed that in the present state and prospect of business in this colony, such an undertaking can be seriously contemplated, nor is it reasonable to suppose that so unnecessary a section of new road from Quesnel Mouth, running through wild tracts of land without a single white inhabitant, to a harbor of inferior character at the mouth of a narrow valley, affording hardly space for the site of a town, and but little land fit for cultivation, should, in place of the well established line to Yale, be made part of a scheme for connecting the sea coast of British Columbia with the Canadas, or that this latter most important object should be weighted down with the superfluous cost of its construction.

The various lines of route above referred to, are shown on the accompanying sketch map.*

JOSEPH W. TRUTCH.

Lands and Works Office, New Westminster, B. C., 19th February, 1868.

*The sketch map here mentioned is not printed with this report, but is of record in the Department of Public Works.

Objections to such routes.

APPENDIX MM.

EXTRACT FROM THE "VANCOUVER ISLAND PILOT,"

By Captain G. H. Richards, R.N.

Tides.

In the outer part of Juan de Fuca Strait, there is no very great strength Tide in the of tide; it varies from one to four knots, seldom so much as the latter, unless Strait of Fuca. near Cape Flattery; but when approaching the more contracted part, in the neighbourhood of the Race Islands, which receives the first rush of the pent up waters of the Strait of Georgia, strengthened and diverted by the labyrinth of islands, which choke up its southern entrance, it is not surprising that eddies, races, and irregularities occur which almost baffle any attempt at framing laws which may not rather embarrass than assist the seaman; the result, however, of observations continued throughout an entire year at Esquimalt, and partially on other parts of the coast, during three seasons, appears to warrant the following conclusions, viz :—

The flood tide sets to the northward, along the outer coast of the conti-Direction and nent and Vancouver Island. It enters the Strait of Fuca, at Cape Flattery, tides. running with considerable velocity, sometimes three or four knots, over Duncan and Duntze rocks; it then turns sharply into the strait, passing through the various channels among the Haro Archipelago, into the Strait of Georgia, and within about five miles of Cape Mudge, where it is met by a flood from the northward, which, sweeping the western coast of Vancouver Island, enters Goleta's Channel and Queen Charlotte Sound, at its northern extremity, in latitude 51°; thence southerly down the narrow waters of Johnstone Strait and Discovery Passage, meeting the tide which enters by Fuca Strait, and reaches about midway between the northern and southern extremes of Vancouver Island, or close to the spot where the broad expanse of the Strait of Georgia merges into the narrow channels adjoining it.

On the western side of the island, the tides were found to be regular Tides on the flood and ebb of six hours' duration; the times of high water on the full and westside of the change, at Nootka Sound, and at the entrance of Goleta's Channel, varying very little, and occurring near noon—the greatest range, thirteen feet; nor is any marked irregularity observable in Johnstone Strait and Discovery Passage, except the not unusual circumstance, that the ebb stream continues to run to the northward for two hours after it is low water by the shore, the water rising at the same time; the ebb stream being of seven hours' duration, the flood about five hours.

The great and perplexing tidal irregularities may therefore be said to be Tidal irregembraced between the Strait of Fuca, near the Race Island, and Cape Mudge, ^{ularities.} a distance of 150 miles; and careful investigation of the observations made at Esquimalt, and among the islands of the Haro Archipelago, shows that during the summer months, May, June, and July, there occurs but one high Tides in the and one low water during the twenty-four hours; high water at the full and Summer. change of the moon happening about midnight, and varying but slightly from that hour during any day of the three months; the springs range from eight to ten feet, the neaps from four to five feet. The tides are almost stationary

10 - 28

Autumn.

Winter.

Spring.

for two hours on either side of high or low water, unless affected by strong winds outside.

During August, September, and October, there are two high and low waters in twenty-four hours—a superior and an inferior tide; the high water of the superior varying between one hour and three hours A.M., the range during these months being from three to five feet, the night tide the highest.

During winter almost a reversal of these rules appears to take place; thus, in November, December, and January, the twelve-hour tides again occur, but the time of high water is at or about noon, instead of midnight.

In February, March, and April, there are two tides—the superior high water occurring from one hour to three hours P.M. Thus it may be said that in the summer months the water is low during the day, and in winter low during the night.

The ebb stream has always been found to run southward through the Haro Archipelago, and out of Fuca Strait, for two and a half hours after it is low water by the shore, the water rising during that time ; the ebb is stronger than the flood, and generally of two hours longer duration.

The tides during those months when two high and two low waters occur in twenty-four hours, are far more irregular than when there is only one twelve-hour tide; and another anomaly exists, viz., the greatest range not unfrequently occurs at the first and last quarters, instead of at the full and change of the moon.

APPENDIX QQ.

AN ORDINANCE TO REGULATE EXCISE IN ALL PARTS OF THE COLONY.

[2nd April, 1867.]

Whereas it is expedient to assimilate the Law of Excise in all parts of the Colony;

Be it enacted by the Governor of British Columbia, with the advice and consent of the Legislative Council thereof, as follows :

I. The British Columbian "Distillers' Excise Act, 1861," and "The Distillers' Ordinance, 1865," are hereby repealed, but such repeal shall not affect any rights acquired or penalties or liabilities incurred under such Act or Ordinance, but the same shall be respectively held enforceable and recoverable as if such repeal had not taken place.

Il. No person, other than a person licensed in the manner hereinafter provided, shall act as a Distiller in British Columbia, or shall distil, manufacture, rectify, or make therein any Spirits from vegetable or saccharine matter. under a penalty of Fifty Dollars for each day on which any such offence is committed, and on pain also of forfeiting, over and above the penalty aforesaid, all Spirits distilled, brewed, manufactured, or made in contravention to this Ordinance, and every still, mash-tub, fermenting-tun, or other vessel, machinery, or utensil of any kind used by him or in his possession, or on his premises.

III. Any establishment or place used for the rectifying of Spirits, by any process, shall be deemed a Distillery within the meaning of this Ordinance.

IV. Every Stipendiary Magistrate in British Columbia may issue a for one year at License to act as a Distiller in some certain premises situate at some certain place, to be approved by such Magistrate, within such Magistrate's District, and to be described in the license, to any person or partnership of persons requiring the same, and being residents or having his or their place of business in such district, and having previously complied with the requirements of this Ordinance in that behalf; and each such license shall remain in force for one year from the date thereof, and no longer.

> , V. The party in whose favor a license to act as Distiller is granted shall, on requiring such license, pay to the Magistrate issuing the same the sum of Twenty-five Dollars as a duty to Her Majesty upon such license.

> VI. No license to act as a Distiller shall be granted to any party except on a written requisition addressed to the Magistrate and signed by the party requiring such license, or, if it be required by a partnership, then by one of the partners.

VII. No such license shall be granted to any party until such party has jointly and severally, with two good and sufficient sureties to the satisfaction taken by bond of the Magistrate issuing the license, entered into a bond to Her Majesty, Her Heirs and Successors, in the sum of One Thousand Dollars, and such bond shall be taken before the said Magistrate, and shall be conditioned for the rendering of all accounts, and the payment of all duties and penalties which the party to whom the license is to be granted will become liable to render or pay under the provisions of this Ordinance, and that such party will

Security to the extent of \$1.000 to be with sureties.

VIII. The bond aforesaid shall remain in force as long as any duties upon Duration of any Spirits distilled, manufactured, or made, while the license to which the until full bond relates is in force, or any penalty incurred during the said time by any satisfaction breach of the conditions of the bond, remain due and unpaid by the party to of all accounts, duties, and whom such license was granted.

IX. Whenever any new license is granted to any party, a new bond shall New bond likewise be entered into with reference to such new license.

X. A new bond shall also be given whenever, during the period for New bond on which the license to which it relates is in force, either of the sureties dies, death, insolbecomes insolvent, or removes permanently out of the Colony; in any of vency, or bank-which cases the license shall become wild from the time the most in the protocol of any which cases the license shall become void from the time the party is required surely. by the Magistrate to enter into a new bond until the time when such new bond is given, during which time the party neglecting to enter into such new bond shall be held to be without a license.

XI. Every party licensed as a Distiller shall have his name and calling Name and as such inscribed in legible characters and exposed on some conspicuous part calling of dis-of the front of the building or premises in which such calling is exercised, publicly ex-under a penalty not exceeding Fifty Dollars for each day on which he hibited. exercises such calling without complying with the requirements of this Section.

XII. All such Spirits as aforesaid lawfully distilled, manufactured or Duty of \$1 per made within the Colony shall be respectively subject to the duty to Her gallon on Majesty hereinafter mentioned, that is to say: on every gallon, imperial measure, of Spirits of any kind, not exceeding the strength of proof by Syke's Hydrometer, and so in proportion for any greater strength than the strength of proof, and for any greater or less quantity than a gallon, One Dollar; and such duty shall be computed and charged upon the quantity of Spirits to be ascertained after the first process of rectification, and shall be paid by the party distilling, manufacturing, or making such Spirits, to the Magistrate, in the manner hereinafter mentioned.

XIII. Every person or party licensed as a Distiller shall keep a book or Book detailing books (in a form to be approved by the Collector of Customs) and to be open the products used and the at all reasonable hours to the inspection of any Magistrate, or Customs or spirite ob-Excise Officer, or of any person authorized by a Magistrate to inspect such tained by distillation. book, in British Columbia, wherein such Distiller shall enter from day to day the quantities of grain or other vegetable production or other substance put by him into the mash-tub, or otherwise used by him for the purpose of producing Spirits, or otherwise disposed of ; and also the quantity of Spirits by him distilled, manufactured, or made, showing the quantity produced at each separate time if there have been any distinct set or sets of operations by reason of which duties have become payable. And for any wilfully false entry, or any wilful neglect to make any entry hereby required, the Distiller shall incur a penalty not exceeding Two Hundred and Fifty Dollars, and the Magistrate, Customs or Excise Officer, or other authorized person, may at all times demand to be shown all the stock of such grain, vegetable production, or other substance as aforesaid, then on the premises mentioned in the license.

XIV. Every party licensed to act as a Distiller and acting as such shall, Accounts to within ten days after the first day of each of the months in each year, render the magisto the nearest Magistrate a just and true account in writing, extracted from trate. the books to be kept by such person as aforesaid, and signed by such party, or his agent, or chief clerk, showing :

1. The total quantity in gallons of each kind of Spirits (with the strength thereof) on which a duty is payable, by him distilled, manufactured, or made.

with fresh license.

spirits.

2. The quantity produced at each separate time, if there have been any distinct set or sets of operations, by reason of which duty became payable.

3. The quantities of each kind of grain or other vegetable production or substance used by such party in his business as a Distiller.

4. And such account shall be attested by the person signing the same by an affidavit in the following form :

, do solemnly swear that the account above written, to "I. "which I have also subscribed my name, contains a true account of the "total quantity of every kind of Spirits or Strong Waters, or Spirituous "Liquors, distilled, manufactured, or made by me (or by as the case "may be) within the time mentioned in the same account, and on which "duty is payable, and of the quantities of each kind respectively, and the "strength thereof; and also of the quantities produced at each separate time "therein mentioned by a distinct set of operations, and also of the quan-"titles of all grain or other vegetable production or substance consumed by "me (or by the said) during the same time. So help me God."

XV. Such affidavit shall be made before the said Magistrate, and shall be delivered with such account to the said Magistrate, who may put to the person making it such questions as he may deem necessary to the elucidation and full understanding of the account, and for ascertaining whether such person has had the means of knowing the same to be correct, and may require his answers to be sworn to before him, and may reject the account if such account or the answers so given are insufficient according to the true intent and meaning of this Ordinance.

XVI. And any wilfully false statement in any affidavit or answer to a question required by this Ordinance, shall be deemed wilful and corrupt perjury, and punishable accordingly.

XVII. Every licensed Distiller shall, at the time of rendering such account as aforesaid to the Magistrate, pay over to that officer the amount of duties which by such account appear to be payable, other than such duties which may be payable in respect of Spirits deposited in a bonded or certified warehouse as hereinafter mentioned.

XVIII. If any licensed Distiller refuses or neglects to render such account or to pay over such duties as aforesaid, according to the true intent and meaning of this Ordinance, he shall by such refusal or neglect in either case incur a penalty not exceeding Two Hundred and Fifty Dollars, and the Magistrate may also at his discretion cause a notice to be inserted in one or more of the local papers, or the Government Gazette, declaring the party so refusing or neglecting to have forfeited his license as a Distiller, and such license shall be forfeited accordingly, and shall be null and void from and after the date of such notice, nor shall any new license be granted to the defaulter until after the debt and penalty aforesaid have been paid and satisfied.

XIX. Any Spirits subject to duty under this Ordinance may be deposited in a bonded or certified warehouse as hereinafter mentioned.

XX. A certified warehouse shall be some place approved by the Magistrate within his district for the storage of Spirits on which the duty is unpaid.

XXI. The key to the certified warehouse shall be kept by the said Magistrate, and he or his agents may at any time, either in the day or night, enter therein and inspect the Spirits therein contained, and may test and examine the same, and take such other steps for the protection of the Revenue as in his absolute discretion he may think proper.

XXII: No Spirits shall be removed from a certified warehouse after person by him having been placed therein without the presence either of the Magistrate or of some person nominated by him in that behalf, and the amount of duty

APPENDIX TT.

RELINQUISHMENT,

By the Hudson's Bay Company to Her Majesty the Queen of Great Britain of their rights on Vancouver Island.

This Indenture made this third day of April, one thousand eight hundred Indenture of and sixty-seven, between the Governor and Company of Adventurers of Eng- relinquishment land, trading into Hudson's Bay, who with their successors, are hereinafter called "the said Company," of the one part, and Her Most Gracious Majesty Queen Victoria, of the other part : Whereas, previous to January, one thousand eight hundred and forty-nine, the said Company had occupied certain portions of land in Vancouver Island, for the purpose of carrying on their trading and commercial operations under a Royal Charter of Incorporation, granted to them by His late Majesty King Charles the Second, and dated the second day of May, in the twenty-second year of His reign; and, whereas, by a Royal License, bearing date the thirteenth day of May, one thousand eight hundred and thirty-eight, the said Company were invested for the full period of twentyone years from the date thereof with the sole and exclusive privilege of trading with the Indians in such part of North America to the Northward and Westward of the Territories of the United States as did not form part of any of Her said Majesty's Provinces in North America, or of any Territories belonging to the United States, or to any European Government, State or Power, subject nevertheless as therein mentioned; And, whereas, by Letters Patent, dated the thirteenth day of January, one thousand eight hundred and fortynine, Her said Majesty was pleased to grant unto the said Company, and their successors, the said Vancouver Island, together with all Royalties of the Seas, upon the Coasts within the limits therein mentioned, and all mines Royal thereto belonging, to be holden of Her said Majesty, Her Heirs and Successors, in free and common soccage at the yearly rent of seven shillings, and upon the condition and for the purpose of colonizing the said Island as therein mentioned : And in the said Letters' Patent Her said Majesty reserved to Herself and Her Successors full power, at the expiration of the said Company's hereinbefore recited License for the exclusive privilege of trading with the Indians, to repurchase and take from the said Company, the said Vancouver Island, and premises thereby granted, on payment by Her said Majesty to the said Company, of the sum or sums of money theretofore laid out and expended by them in and upon the said Island and premises, and of the value of their establishments, property and effects then being thereon : And, whereas, after the said hereinbefore recited License, of the thirteenth day of May, one thousand eight hundred and thirty-eight, had come to an end, it seemed fit to Her said Majesty to exercise the power reserved to Her in the said Letters Patent of re-purchasing the said Vancouver Island, whereupon an investigation of accounts and a negociation with the said Company took place, and finally the said Company agreed to accept the sum of fifty-seven thousand five hundred pounds, in full discharge of all their claims in respect of the said Island under the said Letters Patent, of the thirteenth day of January, one thousand eight hundred and forty-nine. And, whereas, the said sum of fifty-seven thousand five hundred pounds hath accordingly been paid to the said Company, by or

on behalf of Her said Majesty, in two instalments of twenty-five thousand pounds, and thirty-two thousand five hundred pounds, on the twenty-ninth day of June, one thousand eight hundred and sixty, and the sixth day of October, one thousand eight hundred and sixty two, as the said Company do hereby admit and acknowledge : And, whereas, the said Company have agreed to re-convey to Her said Majesty, Her Heirs and Successors, the said Vancouver Island, and premises, except such portions thereof as may have been sold by the said Company previous to the first day of January, one thousand eight hundred and sixty-two, and except also such other portions thereof as are hereinafter mentioned, which last mentioned portions are with the assent of Her said Majesty to remain the property of the said Company and their successors : Now this Indenture witnesseth that in pursuance of such agree-Consideration for relinquishment, and in consideration of the sum of fifty-seven thousand five hundred pounds, so paid by or cn behalf of Her said Majesty to the said Company as aforesaid, in full discharge of all the claims of the said Company in respect of all sums expended by them in and upon the said Vancouver Island and premises, and of the value of their establishment, property and effects now being thereon, and of all other their claims under the said Letters Patent, of the thirteenth day of January, one thousand eight hundred and forty-nine, in respect of the said Island, they the said Company do for themselves and their successors by these presents, grant, convey, yield up, and surrender unto Her said Majesty, Her Heirs and Successors, all that the said Island called Vancouver Island, together with all Royalties of the Seas, upon the Coasts thereof, and all mines Roval, and all rights, members, and appurtenances whatsoever to the said Island, and hereditaments belonging, and which were conveyed or passed to, and are now vested in the said Company, under or by virtue of the said hereinbefore recited Letters Patent, of the thirteenth day of January, one thousand eight hundred and forty-nine, or otherwise, howsoever, and also the said Letters Patent of the thirteenth day of January, one thousand Certain lands eight hundred and forty-nine, and all the estate, right, title, interest and by property whatsoever of the said Company, in to and out of the same premises; the company. except and always reserved out of the grant and surrender hereby made as follows, that is to say :--

retained

nent.

Lands in Victoria.

Uplands Farm.

North Dairy Farm.

Spring and land adjoining.

Fort property.

1. Certain pieces or parcels of land in the Town of Victoria, containing in the whole twenty two acres and forty-one hundredth parts of an acre, and known as the Church Reserve, which lands have lately been conveyed by the said Company, to Trustees for certain ecclesiastical and scholastic purposes. And also all land situate in the Victoria District, which may have been sold by the said Company previous to the first day of January, one thousand eight hundred and sixty-two, together with the water frontages and spaces between high and low water mark abutting on any portions of such lands, provided such water frontages and spaces were also sold by the said Company, before the said first day of January, one thousand eight hundred and sixty-two, but not otherwise.

2. The farm known as the Uplands Farm, containing about one thousand one hundred and forty-four acres, and being section thirty-one on the Colonial official plan, of the said Victoria District.

3. The farm known as the North Dairy Farm, containing about four hundred and sixty acres, being section thirty-two on the said official plan.

4. The old spring and adjoining land (except one well set apart and appropriated to public use), and marked 68, 69, 70, 71, 72, $\frac{73}{2078}$, in section eighteen of the plan of the Town of Victoria, heretofore delivered to the Colonial Government by the said Company.

5. All that portion of land in the said Victoria District, heretofore known as the Fort Property, including the site of the fort and the adjoining land yet unsold, with water frontage and foreshore immediately in front of the fort, 238

but not including the several lots marked respectively, H, Harbor Master's Lot No. 15, block 70, situated at the foot of Broughton Street; V, Police Barracks, and Nos. 1,603, 1,605 and 1,607, Post Office colored green, on the said last mentioned plan, on which lots the Harbor Master's office, the Police Barracks and the Post office, are respectively situated, and which lots are hereby (among other things) granted and conveyed to Her said Majesty and Her Successors.

6. Eight lots or parcels of land numbered on the said last mentioned plan Beckley or 3, 4, 5, 8, 10, 14, 17 and 20, containing in the whole fifty acres, more or less, Dutnells recently selected by the said Company, out of a certain farm lying to the south and west of James Bay, and heretofore known as "Beckley" or "Dutnells" Farm : All which said excepted lands (save the lands comprised under the first head of exceptions), are and are to remain the absolute property of the said Company, and their successors, freed and discharged from any rent, trusts or conditions contained in the said Letters Patent, of the thirteenth day of January, one thousand eight hundred and forty-nine, and, as regards the lands comprised under the foregoing heads of exceptions, numbered 4, 5 and 6, are colored pink and marked on the several blocks and lots into which the same are divided with the letters H. B. C. on the map or plan thereof hereunto annexed.*

To have and to hold the said Vancouver Island, and all and singular Lands conother, the hereditaments and premises hereinbefore granted, conveyed and veyed to Her surrendered or intended so to be with their appurtenances (except as afore said) unto Her said Majesty, Her Heirs and Successors, as of Her former estate and Dominion, therein freed and absolutely discharged from any title, rights or claims of the said Company and their successors and the said Company do hereby for themselves and their successors covenant with Her said Majesty, Her Heirs and Successors in manner following, that is to say:—that they the said Company have not at any time heretofore made, done, committed, or executed, or willingly suffered any act, deed, matter or thing whatsoever whereby the said hereditaments and premises hereby granted, conveyed and surrendered, or intended so to be, or any part thereof, are or is in any wise charged, affected or incumbered, or by reason whereof the said Company are in anywise prevented from granting the said hereditaments and premises in manner aforesaid.

And further that they the said Company and their successors will at any time or times hereafter upon the request and at the cost of Her said Majesty, Her Heirs and Successors, make, do and execute or cause to be made done and executed all such further and other lawful acts, deeds and assurances for more perfectly and absolutely conveying the said Island, hereditaments and premises with their appurtenances (except as aforesaid) unto Her said Majesty, Her Heirs and Successors, as Her said Majesty, Her Heirs and Successors shall require.

IN WITNESS WHEREOF the said Governor and Company of Adventurers of England trading into Hudson's Bay have caused their corporate seal to be hereunto affixed, and Thomas William Clinton Murdoch, and Stephen Walcott, Esquires, Her Majesty's Emigration Commissioners, have hereunto set their hands and seals, on behalf of Her Majesty, the day and year first above written.

By order of the Governor, Deputy Governor, and Committee of the said Company. (Signed.) W. G. SMITH, Secretary.

APPENDIX UU.

COPY OF THE TREATY BETWEEN HER MAJESTY AND THE UNITED STATES OF AMERICA,

For the Settlement of the Oregon Boundary, signed at Washington, June 15th, 1846. Ratifications exchanged at London, July 17th, 1846. Presented to both Houses of Parliament by Command of Her Majesty, 1846.

Her Majesty the Queen of the United Kingdom of Great Britain and Boundary Ireland, and the United States of America, deeming it to be desirable for the treaty. future welfare of both Countries, that the state of doubt and uncertainty which has hitherto prevailed respecting the Sovereignty and Government of the Territory on the North-West Coast of America, lying westward of the Rocky or Stony Mountains, should be finally terminated by an amicable compromise of the rights mutually asserted by the two parties over the said Territory, have respectively named Plenipotentiaries to treat and agree concerning the terms of such settlement, that is to say :--

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, has, on Her part, appointed the Right Honorable Richard Pakenham a Member of Her Majesty's Most Honorable Privy Council, and Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the United States; and the President of the United States of America, has, on his part, furnished with full powers, James Buchanan. Secretary of State of the United States; who, after having communicated to each other their respective full powers, found in good and due form, have agreed upon and concluded the following Articles:—

ARTICLE I.

From the point on the forty-ninth parallel of north latitude, where the Boundary of j boundary laid down in existing Treaties and Conventions between Great the Strait of Britain and the United States terminates, the line of boundary between the territories of Her Britannic Majesty and those of the United States, shall be continued westward along the said forty-ninth parallel of north latitude, to the middle of the Channel which separates the Continent from Vancouver's Island ; and thence southerly, through the middle of the said Channel, and of Fuca's Straits, to the Pacific Ocean : Provided, however, that the navigation of the whole of the said Channel and Straits, south of the forty-ninth parallel of north latitude, remain free and open to both parties.

ARTICLE II.

From the point at which the forty ninth parallel of north latitude shall Navigation be found to intersect the great northern branch of the Columbia River, the Columbia navigation of the said branch shall be free and open to the Hudson's Bay Company, and to all British subjects trading with the same, to the point where the said branch meets the main stream of the Columbia ; and thence down the said main stream to the ocean, with free access into and through

10-31

the said river or rivers; it being understood that all the usual portages along the line thus described, shall in like manner be free and open.

In navigating the said river or rivers, British subjects, with their goods and produce, shall be treated on the same footing as citizens of the United States; it being, however, always understood that nothing in this Article shall be construed as preventing or intended to prevent the Government of the United States from making any regulations respecting the navigation of the said river or rivers, not inconsistent with the present Treaty.

ARTICLE III.

In the future appropriation of the territory south of the forty-ninth parallel of north latitude, as provided in the Article I. of this Treaty, the possessory right of the Hudson's Bay Company, and of all British subjects who may be already in the occupation of land or other property, lawfully acquired, within the said territory, shall be respected.

ARTICLE IV.

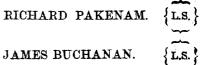

The farms, lands, and other property of every description, belonging to the Puget's Sound Agricultural Company, on the north side of the Columbia River, shall be confirmed to the said company. In case, however, the situation of those farms and lands should be considered by the United States to be of public and political importance, and the United States' Government should signify a desire to obtain possession of the whole or of any part thereof, the property so required shall be transferred to the said Government at a proper valuation, to be agreed upon between the parties.

ARTICLE V.

The present treaty shall be ratified by Her Britannic Majesty, and by the President of the United States, by and with the advice and consent of the Senate thereof; and the ratifications shall be exchanged at London at the expiration of six months from the date hereof, or sooner if possible.

In witness whereof, the respective Plenipotentiaries have signed the same, and have affixed thereto the Seals of their Arms.

Done at Washington, the fifteenth day of June, in the year of our Lord one thousand eight hundred and forty six.

APPENDIX YY.

RETURN SHOWING THE COST OF ESTABLISHING THE ASSAY DEPARTMENT OF BRITISH COLUMBIA.

ay .	Buildings { Offices		
		6,834	
	Plant and Apparatus Mint Machinery	10,000 8,609	00 00
	Total New Westminster Assay Office and Mint	25,443	00
	Establishing Cariboo Branch, including pur- chase of Lot and Building	6,000	00
	Total	31,443	00

Amount of gold assayed from the opening of the Office up to the present time—431,686 oz. = \$7,300,000 value.

Establishment of a Mint.

Cost of Assa

REMARKS.—The desirability of establishing a Mint in this Colony was brought before the Government in an Address from the House of Assembly of Vancouver Island to Governor Douglas, dated 31st day of March, 1859. The officers were appointed in October by the Master of the Mint, and left England in December, arriving in the Colony in February, 1860, about the same time as the plant and apparatus for the Assay Office, which had been purchased under their supervision. The coining apparatus was obtained in San Francisco, at the latter end of 1861, and was put up at New Westminster, in working condition, in the spring of 1862. Part of it was subsequently taken to pieces and stowed away.

The cost of cleaning it and replacing it into working condition would be about \$300. It is in good order.

The whole of the apparatus is worked by steam power, with the exception of the coining press, which is turned by hand. If the Mint were to be again used, it would be advisable to connect this machine with the other apparatus, and work it by steam power also, which could be done at a moderate cost. The machinery is a fac-simile of that used by the South American Government Mints.

Coins struck.

Fees.

The coins struck were \$20 and \$10 pieces, of the same diameter as those of the United States, and of the same value in gold. They were of unrefined gold, of a fineness of 850, and the \$20 piece weighed $546\frac{1}{3}$ grains, and contained about 20 cents worth of silver.

The United States coins are made from refined gold, alloyed with copper, the weight of the \$20 piece being 516 grains, and the fineness 900; refining, however, can only be carried on profitably when the operations are on a large scale.

The assay fees are $\frac{1}{4}$ per cent., and it was proposed to charge $\frac{1}{2}$ per cent. for coining.

The buildings are situated on Lots 1, 2 and 3, Block XIV. on the official map of New Westminster.

C. J. CLAUDET,

Superintendent of the Assay Office.

TO THE COMMONS OF CANADA

IN

PARLIAMENT ASSEMBLED.

THE REPORT OF THE LIBRARIAN UPON THE STATE OF THE LIBRARY OF PARLIAMENT,

Respectfully Sheweth :---

That since his last Report, the construction of the new building intended for the reception of the Library has been steadily advancing towards completion, but it is not yet possible to state, with certainty, when it will be finished. Meanwhile, by a careful arrangement of the available space in the present apartments, accommodation has been found for the additions of the past year.

These additions have been greater than usual, owing to the necessity for making good deficiencies in the French department, which had unavoidably fallen into arrear during the continuance of the War in Europe. The outlay for French books during the past twelve months has consequently exceeded the ordinary appropriation for that purpose, which has occasioned an excess of expenditure beyond the actual grant for the augmentation of the Library; a deficiency, however, which will be made good by greater economy during the ensuing year.

Pursuant to directions contained in a Report from the Joint Library Committee last Session, which was concurred in by the two Houses, the Librarian applied to the Secretary of State for a sufficient number of copies of certain works recently published in the Dominion for presentation to Foreign and Colonial Libraries, with which the Library of Parliament exchanges. Whereupon he received a supply of the undermentioned works for this purpose, viz :--

Report of the Geological Survey of Canada, from 1866 to 1869.

Lovell's Dominion Directory, for 1871.

Report of the Commissioners on Inland Navigation in Camada.

- Les Œuvres de Champlain.
- Le Journal des Jésuites.

These volumes have been duly forwarded to the respective Libraries abroad, together with the Statutes, Journals, and Papers of the last Session of this Parliament.

The Librarian regrets that an application, made by him through His Excellency the Governor General, to the Colonial Office, for copies of Ordnance Maps issued by the Imperial Government since 1855, (in continuation of the series presented to the Library in that year) has been unsuccessful. The Lords of the Treasury state that they have been unable to comply with this request, "in accordance with regulations which have been some time in force, that such maps should not be supplied at the public expense, except under very special circumstances."

The Library, however, has been enriched during the year with some donations of considerable value, particularly through the liberality of the Trustees of the British Museum, who have presented us with various historical and artistic publications, issued under their own auspices, which are enumerated in the list hereunto appended. By special favor they have included in this munificent gift, a copy of the *fac-simile* of the Codex Alexandrinus, which was executed at the cost of the British Government, 250 copies only being printed of the work ; likewise, a copy of the photographic *fac-similes* of the Epistles of Clement of Rome. These volumes are now exceedingly difficult to obtain, and thanks are especially due to the Trustees for their kindness in presenting them to the Dominion Library.

Mention should also be made of the reception from the Corporation of the City o¹ London of a Bronze Medal, struck to commemorate the visit of Her Majesty the Queen to London, on 6th November, 1869, to open Blackfriar's Bridge and the Holborn Valley Viaduct.

A complete list of the donations received, and of books and pictures deposited under the Copyright law since the 15th February, 1871, is appended to this Report.

The number of volumes in the Library last year was estimated at 65,150. Since then about 2,600 volumes have been added, making a total of 67,750 volumes.

All which is respectfully submitted.

ALPHEUS TODD, Librarian.

Library of Parliament, April 11, 1872.

(No. 14.)

MESSAGE

From the Governor General, transmitting information of the Census Returns for the year 1871, taken under the Act 33 Vict., Cap. 31.

(No. 14.)

REPORT

Of things done under "The Census Act," pursuant to the 27th section of the said Act.

[In accordance with the recommendation of the Joint Committee on Printing, the above Returns are not printed.]

STATEMENT

Of Expenditure made on account of "Manitoba Expedition," under authority of a Special Warrant issued by His Excellency the Governor General, according to provisions of Act 31 Vic., Cap. 5, Sec. 35.

COPY of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 17th October, 1871.

15 On a memorandum, dated 16th October, 1871, from the Hon. the Minister of Militia and Defence, recommending that a Special Order of Your Excellency in Council do issue, directing that an appropriation of One hundred thousand dollars (\$100,000) be made, and placed at the disposal of his Department, to meet the expenditure of the Expeditionary Force about to proceed to the Province of Manitoba, the necessity for the same being urgent.

The Hon. the Minister of Finance reports that there is no appropriation by Parliament against which this expenditure can be charged, and recommends that a Warrant be issued by Your Excellency. in favor of the Receiver General, for One hundred thousand dollars, to be placed to a Special Account, in accordance with the Act 31 Vic., Cap. 5, Sec. 35 (2).

The Committee advise that a Special Warrant issue accordingly.

(Certified,)

W. A. HIMSWORTH, Assistant Clerk, P.C

DEPARTMENT OF MILITIA AND DEFENCE. OTTAWA, October 16th, 1871.

The undersigned has the honor to submit for the consideration of His Excellency the Governor General in Council, that a Special Order in Council may

issue, directing that an appropriation of \$100,000 be placed at the dis-\$100,000 posal of this Department to meet the expenditure of the Expeditionary Force about to proceed to the Province of Manitoba, the necessity for the same being urgent.

GEO. E. CARTIER, (Signed,) Minister of Militia and Defence.

The undersigned has the honor to report that there is no appropriation by Parliament against which this expenditure can be charged ; and it is therefore respectfully recommended that His Excellency be requested to issue a Warrant in favor of the Receiver General for One hundred thousand dollars, to be placed to a Special Account, in accordance with the Act 31 Vic., Cap. 5, sec. 35 (2). F. HINCES.

(Signed,)

Minister of Finance

OTTAWA, October 17th, 1871. 15 1

STATEMENT of Expenditure made on account of "Manitoba Expedition," under authority of a Special Warrant issued by His Excellency the Governor General, according to provisions of Act 31st Vic., Cap. 5, Sec. 35, Clause 2; and Order in Council, 17th October, 1871.

	*Total payments made on account of the above, from 1st July, 1870, to 31st March, 1872 Total receipts from the tax on salaries, from 1st July, 1870, to 31st March, 1872	33,991		\$1,904 2,120	

*The excess of payments for gratuities over the amounts granted is caused by these two circumstances: The gratuity of \$250 to P. Duane has not yet been paid; and that of \$466 66, to J. Strachan, was, on reconsideration of the case, cancelled, and an annual allowance made him. The gratuity had, in the meantime, been paid him, and security was taken for re-payment in the event of death occurring before the annuity equals the amount paid.

[LISGAR.]

The Governor-General transmits, for the information of the SENATE and the HOUSE OF COMMONS, certain Despatches and Minutes of the Privy Council having reference to the Treaty of Washington.

GOVERNMENT HOUSE,

OTTAWA, April 18, 1872.

CORRESPONDENCE RESPECTING THE APPOINTMEN'I OF A JOINT HIGH COMMISSION TO CONSIDER THE VARIOUS QUESTIONS AFFECTING THE RELATIONS BETWEEN GREAT BRITAIN AND THE UNITED STATES OF AMERICA.

No. 1.

Sir E. Thornton to Earl Granville.--(Received February 19.)

(Extract.)

WASHINGTON, February 6, 1871.

I have the honor to inclose copies of a correspondence which has passed between Mr. Fish and myself relative to the appointment of a Joint High Commission to sit at Washington for the purpose of considering the questions which have lately arisen relative to the Canadian Fisheries, and any others which affect the relations of the United States towards Her Majesty's possessions in North America,—the so-called "Alabama" claims, —and any other claims of British subjects or citizens of the United States arising out of acts committed during the late Civil War in this country.

Inclosure 1 in No. 1.

Sir E. Thornton to Mr. Fish.

WASHINGTON, January 26, 1871.

SIR,—In compliance with an instruction which I have received from Earl Granville, I have the honor to state that Her Majesty's Government deem it of importance to the good relations which they are ever anxious should subsist and be strengthened between the United States and Great Britain, that a friendly and complete understanding should be come to between the two Governments as to the extent of the rights which belong to the citizens of the United States and Her Majesty's subjects respectively, with reference to the fisheries on the coast of Her Majesty's Possessions in North America, and as to any other questions between them which affect the relations of the United States towards those Possessions.

18-1

As the consideration of these matters would, however, involve investigations of a somewhat complicated nature, and as it is very desirable that they should be thoroughly examined, I am directed by Lord Granville to propose to the Government of the United States the appointment of a Joint High Commission, which shall be composed of members to be named by each Government, shall hold its Session at Washington, and shall treat of and discuss the mode of settling the different questions which have arisen out of the Fisheries, as well as all those which affect the relations of the United States towards Her Majesty's Possessions in North America.

I am confident that this proposal will be met by your Government in the same cordial spirit of friendship which has induced Her Majesty's Government to tender it, and I cannot doubt that in that case the result will not fail to contribute to the maintenance of the good relations between the two countries which I am convinced the Government of the United States, as well as that of Her Majesty, equally have at heart

> (Signed) I have, &c., (EDWD. THORNTON,

Inclosure 2 in No. 1.

Mr. Fish to Sir E. Thornton.

DEFARTMENT OF STATE, WASHINGTON,

January 30, 1871.

SIR,-Ihave the honor to acknowledge the receipt of your note of the 26th January. in which you inform me, in compliance with instructions from Earl Granville, that Her Majestv's Government deem it of importance to the good relations which they are ever anxious should subsist and be strengthened between the United States and Great Britain, that a friendly and complete understanding should be come to between the two Governments as to the extent of the rights which belong to the citizens of the United States and Her Majesty's subjects respectively, with reference to the Fisheries on the coasts of Her Majesty's Possessions in North America, and as to any other questions between them which affect the relations of the United States towards those Possessions ; and farther, that as the consideration of these questions would involve investigations of a somewhat complicated nature; and as it is very desirable that they should be thoroughly examined, you are directed by Lord Granville to propose to the Government of the United States the appointment of a Joint High Commission, which shall be composed of members to be named by each Government, shall hold its sessions at Washington, and shall treat of and discuss the mode of settling the different questions which have arisen out of the Fisheries, as well as all those which affect the relations of the United States towards Her Majesty's Possessions in North America.

I have laid your note before the President, who instructs me to say that he shares with Her Majesty's Government the appreciation of the importance of a friendly and complete understanding between the two Governments with reference to the subjects specially suggested for the consideration of the proposed Joint High Commission, and he fully recognizes the friendly spirit which has prompted the proposal.

The President is, however, of the opinion that without the adjustment of a class of questions not alluded to in your note, the proposed High Commission would fail to establish the permanent relations, and the sincere, substantial, and lasting friendship between the two Governments, which, in common with Her Majesty's Government, he desires should prevail. He thinks that the removal of the differences which arose during the rebellion in the United States, and which have existed since then, growing out of the acts committed by the several vessels which have given rise to the claims generally known as the "Alabama Claims," will also be essential to the restoration of cordial and amicable relations between the two Governments.

He directs me to say that, should Her Majesty's Government accept this view of this matter, and assent that this subject also may be treated of by the proposed High Commission, and may thus be put in the way of a final and amicable settlement, this Government will, with much pleasure, appoint High Commissioners on the part of the United States to meet those who may be appointed on behalf of Her Majesty's Government, and will spare no efforts to secure, at the earliest practicable moment, a just and amicable arrangement of all the questions which now, unfortunately, stand in the way of an entire and abiding friendship between ths two nations.

> I have, &c., (Signed) HAMILTON FIGH.

Inclosure 3 in No. 1.

Sir E. Thornton to Mr. Fish.

WASHINGTON, February 1. 1871.

SIR,—I have the honor to acknowledge the receipt of your note of the 30th ultimo, and to offer you my sincere and cordial thanks for the friendly and conciliatory spirit which pervades it.

With reference to that part of it in which you state that the President thinks that the removal of the differences which arose during the rebellion in the United States, and which have existed since then, growing out of the acts committed by the several vessels which have given rise to the claims generally known as the "Alabama" claims, will also be essential to the restoration of cordial and amicable relations between the two Governments, I have the honour to inform you that I have submitted to Earl Granville the opinion thus expressed by the President of the United States, the friendliness of which I beg you to believe I fully appreciate.

I am now authorized by his Lordship to state that it would give Her Majesty's Government great satisfaction if the claims commonly known by the name of the "Alabama" claims were submitted to the consideration of the same. High Commission by which Her Majesty's Government have proposed that the questions relating to the British Possessions in North America should be discussed, provided that all other claims, both of British subjects and citizens of the United States, arising out of acts committed during the recent civil war in this country, are similarly referred to the same Commission.

The expressions made use of in the name of the President in your above-mentioned note with regard to the "Alabama" claims convince me that the Government of the United States will consider it of importance that these causes of dispute between the two countries should also and at the same time be done away with, and that you will enable me to convey to my Government the assent of the President to the addition which they thus propose to the duties of the High Commission, and which cannot fail to make it more certain that its labours will lead to the removal of all differences between the two countries.

I have, &c.

(Signed) EDWD. THORNTON.

3

Inclosure 4 in No. 1.

Mr. Fish to Sir E. Thornton.

DEPARTMENT OF STATE,

WASHINGTON, February 3, 1871.

SIR,—I have the honour to acknowledge the receipt of your note of the 1st instant, in which you inform me that you are authorized by Earl Granville to state that it would give Her Majesty's Government great satisfaction if the claims commonly known by the name of the "Alabama" claims were submitted to the consideration of the same High Commission by which Her Majesty's Government have proposed that the questions relating to the British Possessions in North America should be discussed, provided that all other claims, both of British subjects and citizens of the United States, arising out of acts committed during the recent civil war in this country, are similarly referred to the same Commission.

I have laid your note before the President, and he has directed me to express the satisfaction with which he has received the intelligence that Earl Granville has authorized you to state that Her Majesty's Government has accepted the views of this Government as to the disposition to be made of the so-called "Alabama" claims.

He also directs me to say, with reference to the remainder of your note, that if there be other and further claims of British subjects or of American citizens growing out of acts committed during the recent civil war in this country, he assents to the propriety of their reference to the same High Commission; but he suggests that the High Commissioners shall consider only such claims of this description as may be presented by the Governments of the respective claimants at an early day, to be agreed upon by the Commissioners.

I have, &c.

(Signed) HAMILTON FISH.

No. 2.

Earl Granville to Sir E. Thornton.

FOREIGN OFFICE,

February 23, 1871.

SIR,—I received on the 19th instant your despatch of the 6th instant, inclosing copies of letters exchanged between yourself and the Secretary of State of the United States, relative to the appointment of a Joint High Commission to sit at Washington for the purpose of considering pending questions between this country and the United States.

Her Majesty's Government, having been regularly informed by you by telegraph of the satisfactory character of this correspondence, did not hesitate at once to send out the British Members of the Commission, and Lord de Grey and Mr. Bernard accordingly embarked for New York on the 11th, and Sir Stafford Northcote on the 18th instant; and it now only remains for me to acquaint you formally that Her Majesty's Government entirely approve of the tenor of your letters to Mr. Fish.

> I am, &c. (Signed)

GRANVILLE.

4

No. 3.

Full Power to the Earl de Grey and Ripon, Sir Stafford Henry Northcote, Sir Edward Thornton, Sir John Alexander Macdonald, and Montague Bernard, Esq., to negotiate with Plenipotentiaries of the United States.

VICTORIA R.

VICTORIA, by the grace of God, Queen of the United Kingdom of Great Britain and Ireland, Defender of the Faith. &c., &c., &c. To all and singular to whom these Presents shall come, Greeting. Whereas, for the purpose of discussing in a friendly spirit with Commissioners to be appointed on the part of Our Good Friends the United States of America, the various questions on which differences have arisen between Us and Our said Good Friends, and of treating for an Agreement as to the mode of their amicable settlement, We have judged it expedient to invest fit persons with full power to conduct on Our part the discussions in this behalf : Know ye, therefore, that We, reposing especial trust and confidence in the wisdom, loyalty, diligence, and circumspection of Our right trusty and right well-beloved Cousin and Councillor George Frederick Samuel, Earl de Grey and Ripon, Viscount Goderich, a Peer of Our United Kingdom, President of Our Most Honorable Privy Council, Knight of Our Most Noble Order of the Garter, &c., &c., of Our right trusty and well-beloved Councillor Sir Stafford Henry Northcote, Baronet, a Member of Parliament, Companion of Our Most Honorable Order of the Bath, &c., &c.; of Our trusty and well-beloved Sir Edward Thornton, Knight Commander of Our Most Honorable Order of the Bath, Our Envoy Extraordinary and Minister Plenipotentiary to Our Good Friends the United States of America, &c., &c.; of Our trusty and well-beloved Sir John Alexander Macdonald, Knight Commander of Our Most Honourable Order of the Bath, a Member of Our Privy Council for Canada, and Minister of Justice and Attorney-General in Our Dominion of Canada, &c., &c. ; and of Our trusty and well-beloved Montague Bernard, Esquire, Chichele Professor of International Law in the University of Oxford :- have named, made, constituted, and appointed, as We do by these presents name, make, constitute, and appoint them Our undoubted High Commissioners, Procurators, and Plenipotentiaries: Giving to them, or to any three or more of them, all manner of power and authority to treat, adjust, and conclude with such Minister or Ministers as may be vested with similar power and authority on the part of Our Good Friends the United States of America, any Treaties, Conventions, or Agreements that may tend to the attainment of the above-mentioned end, and to sign for Us and in Our name everything so agreed upon and concluded, and to do and transact all such other matters as may appertain to the finishing of the aforesaid work in as ample manner and form, and with equal force and efficacy, as We Ourselves could do if personally present: Engaging and promising upon Our Royal Word, that whatever things shall be so transacted and concluded by Our said High Commissioners, Procurators, and Plenipotentiaries shall be agreed to, acknowledged. and accepted by Us in the fullest manner, and that We will never suffer, either in the whole or in part, any person whatsoever to infringe the same, or act contrary thereto, as far as it lies in Our power.

In witness whereof We have caused the Great Seal of Our United Kingdom of Great Britain and Ireland to be affixed to these Presents, which We have signed with Our Royal Hand.

Given at Our Court at Windsor Castle, the sixteenth day of February, in the year of Our Lord one thousand eight hundred and seventy-one, and in the thirty-fourth year of Our reign. The Earl of Kimberley to Lord Lisgar.

(Copy-Canada.)

DOWNING STREET,

16th February, 1871.

My LORD,—You have already been informed by telegram of the views of Her Majesty's Government upon the Fishery Questions, but I think it will be convenient, with reference to the pending negotiations, that a somewhat fuller statement of those views should now be placed on record.

It would not be possible for Her Majesty's Government to pledge themselves to any foregone conclusion upon any particular point connected with these negotiations, but they have anxiously considered the questions which concern Canada; and they feel confident that the Canadian Government, will agree with them that a satisfactory termination of the difficulties which have arisen with the United States, can only be attained by taking as broad and liberal a view as is consistent with the just rights and real interests of the Dominion.

As at present advised, Her Majesty's Government are of opinion that the right of Canada to exclude Americans from fishing in the waters within the limits of three marine miles of the coast, is beyond dispute, and can only be ceded for an adequate consideration.

Should this consideration take the form of a money payment, it appears to Her Majesty's Government, that such an arrangement would be more likely to work well than if any conditions were annexed to the exercise of the privilege of fishing within the Canadian waters.

The presence of a considerable number of cruisers would always be necessary to secure the performance of such conditions and the enforcement of penalties for the nonobservance of them would be certain to lead to disputes with the United States.

With respect to the question, what is a Bay or Creek, within the meaning of the first Article of the Treaty of 1818, Her Majesty's Government adhere to the interpretation which they have hitherto maintained of that Article, but they consider that the difference which has arisen with the United States on this point, might be a fit subject for compromise.

The exclusion of American fishermen from resorting to Canadian Ports, "except for "the purpose of shelter, and of repairing damages therein, of purchasing wood and "of obtaining water," might be warranted by the letter of the Treaty of 1818, and by the terms of the Imperial Act, 59, Geo. III., chap. 38, but Her Majesty's Government feel bound to state that it seems to them an extreme measure—inconsistent with the general policy of the Empire, and they are disposed to concede this point to the United States Government, under such restrictions as may be necessary to prevent smuggling, and to guard against any substantial invasion of the exclusive rights of fishing which may be reserved to British Subjects.

In conclusion I have to state that Her Majesty fully appreciated the loyal and prompt manner in which the Canadian Government have assented to the appointment of the Commission which is about to sit at Washington.

The high character and recognized ability of the British Commissioners afford ample security that the interests of Canada will be carefully protected during the forthcoming negotiations,

> 1 have, &c., (Signed) KIMBERLEY.

The Earl of Kimberley to Lord Lisgar.

(Copy-Canada-No. 374.)

DOWNING STREET,

17th March, 1871.

My LORD,—In answer to your telegram received on the 10th instant, stating that in the opinion of your Government, the Canadian Fisheries cannot be sold without the consent of the Dominion, I have already informed your Lordship by Telegraph that Her Majesty's Government never had any intention of advising Her Majesty to part with those fisheries without such consent.

When the Reciprocity Treaty was concluded, the Acts of the Nova Scotian and New Brunswick Legislatures relating to the Fisheries were suspended by Acts of those Legislatures, and the Fishery rights of Canada are now under the protection of a Canadian Act of Parliament, the repeal of which would be necessary in case of the cession of those rights to any Foreign Power.

I think it right however to add that the responsibility of determining what is the true construction of a Treaty, made by Her Majesty with any foreign power, must remain with Her Majesty's Government, and that the degree to which this Country would make itself a party to the strict enforcement of Treaty Rights may depend not only on the literal construction of the Treaty, but on the moderation and reasonableness with which those rights are asserted.

> I have, &c., (Signed)

KIMBERLEY.

Governor General

The Right Honorable Lord Lisgar, G. C. B., G. C. M. G., &c., &c., &c.

(Copy-Canada-No. 444.)

The Secretary of State for the Colonies to the Governor General.

DOWNING STREET,

17th June, 1871.

My LORD,---I have the honor to enclose, herewith, copies of the Treaty signed at Washington, on May 8th, by the Joint High Commissioners, which has been ratified by Her Majesty and by the President of the United States, and of the Instructions to Her Majesty's High Commissioners and Protocols of the Conferences held by the Commission. The Dominion is, from its geographical position as the immediate neighbour of the United States, so peculiarly interested in the maintenance of cordial relations between that Republic and the British Empire, that it must be a source of satisfaction to the Canadian Government, that Her Majesty has been able to conclude a Treaty for the amicable settlement of differences which might have seriously endangered the good understanding between the two countries.

Moreover, the Rules laid down in Article VI, as to the international duties of neutral governments are of special importance to the Dominion which carries on such an extensive and increasing maritime commerce, and possesses such a considerable merchant navy.

But independently of the advantages which Canada must derive from the removal of the causes of difference with the United States, arising out of occurrences during the civil war, Her Majesty's Government believe that the settlement which has been arrived

at of the questions directly affecting British North America, cannot fail to be beneficial to the Dominion. I need not refer to the well known history of the Fishery question, further than to observe that ever since the termination, by the British Government in consequence of the war of 1812, of the liberty enjoyed under the Treaty of 1783, by American citizens of fishing in the territorial waters of the British Colonies, and the renunciation by the United States, in the Treaty of 1818, of all claim to that liberty, this question has in different forms been the subject of controversy with the United States. Her Majesty's Government have always contended for the rights of the Colonies, and they have employed the British Naval forces in the protection of the Colonial fisheries; but they could not overlook the angry feelings to which this controversy has given rise. and the constant risk that in the enforcement of the exclusion of American fishermen from the Colonial waters a collision might take place which might lead to the most serious consequences, and they would have been wanting in their duty, if they had not availed themselves of the opportunity presented by the late negotiation to remove a cause of perpetual irritation and danger to the relations of this country and the Dominion with the United States.

The Canadian Government itself took the initiative in suggesting that a Joint British and American Commission should be appointed, with a view to settle the disputes which had arisen as to the interpretation of the Treaty of 1818, but it was certain that however desirable it might be, in default of any complete settlement, to appoint such a Commission, the causes of the difficulty lay deeper than any question of interpretation, and the mere discussion of such points as the correct definition of bays could not lead to a really friendly agreement with the United States. It was necessary, therefore, to endeavour to find an equivalent which the United States might be willing to give in return for the fishery privileges, and which Great Britain, having regard both to Imperial and Colonial interests, could properly accept. Her Majesty's Government are well aware that the arrangement which would have been most agreeable to Canada was the conclusion of a Treaty similar to the Reciprocity Treaty of 1854, and a proposal to this effect was pressed upon the United States Commissioners, as you will find in the 36th Protocol of the Conferences. This proposal was, however, declined, the United States Commissioners stating "that they could hold out no hope that the Congress of the United States would "give its consent to such a tariff arrangement as was proposed, or to any extended plan " of reciprocal free admission of the products of the two countries." The United States Commissioners did indeed propose that coal, salt and fish, should be reciprocally admitted free, and lumber after the 1st of July, 1874; but it is evident that looked at as a tariff arrangement this was a most inadequate offer, as will be seen at once when it is compared with the long list of articles admitted free under the Reciprocity Treaty. Moreover. it is obvious from the frank avowal of the United States Commissioners, that they only made this offer because one branch of Congress had recently more than once expressed itself in favor of the abolition of duties on coal and salt, and because Congress had partially removed the duty from lumber, and the tendency of legislation in the United States was towards the reduction of taxation and of duties, so that to have ceded the Fishery rights in return for these concessions would have been to exchange them for commercial arrangements, which there is reason to believe may before long be made without any such cession, to the mutual advantage of both the Dominion and the United States : and Her Majesty's Government are bound to add that whilst in deference to the strong wishes of the Dominion Government they used their best efforts to obtain a renewal in principle of the Reciprocity Treaty, they are convinced that the establishment of free trade between the Dominion and the United States is not likely to be promoted by making admission to the fisheries dependent upon the conclusion of such a Treaty; and that the repeal by Congress of duties upon Canadian produce on the ground that a Protective Tariff is injurious to the country which imposes it, would place the commercial relations of the two countries on a far more secure and lasting basis than the stipulations of a Convention framed upon a system of reciprocity. Looking, therefore, to all the circumstances, Her Majesty's Government found it their duty to deal separately with the

Fisheries, and to endeavour to find some other equivalent; and the reciprocal concession of free fishery with free import of fish and fish oil, together with the payment of such a sum of money as may fairly represent the excess of value of the Colonial over the American concession, seems to them to be an equitable solution of the difficulty. It is perfectly true that the right of fishery on the United States coasts, conceded under Article XIX, is far less valuable than the right of fishery in Colonial waters, conceded under Article XVIII, to the United States, but on the other hand, it cannot be denied that it is most important to the Colonial fishermen to obtain free access to the American market for their fish and for fish oil, and the balance of advantage on the side of the United States will be duly redressed by the Arbitrators ur der Article XXII. In some respects a direct money payment is perhaps a more distinct recognition of the rights of the Colonies than a tariff concession, and there does not seem to be any difference in principle between the admission of American fishermen for a term of years in consideration of the payment of a sum of money in gross, and their admission under the system of Licenses, calculated at so many dollars per ton, which was adopted by the Colonial Government for several years after the termination of the Reciprocity Treaty. In the latter case, it must be observed, the use of the Fisheries was granted without any tariff concession whatever on the part of the United States, even as to the importation of fish.

Canada could not reasonably expect that this country should, for an indefinite period, incur the constant risk of serious misunderstanding with the United States; imperilling, perhaps, the peace of the whole Empire, in order to endeavour to force the American Government to change its commercial policy; and Her Majesty's Government are confident that, when the Treaty is considered as a whole, the Canadian people will see that their interests have been carefully borne in mind, and that the advantages, which they will derive from its provisions, are commensurate with the concessions which they are called upon to make. There cannot be a question as to the great importance to Canada of the right to convey goods in bond through the United States, which has been secured to her by Article XXIX; and the free navigation of Lake Michigan, under Article XXVIII; and the power of transhipping goods, under Article XXX, are valuable privileges which must not be overlooked in forming an estimate of the advantages which Canada will obtain. Her Majesty's Government have no doubt that the Canadian Government will readily secure to the citizens of the United States, in accordance with Article XXVII. the use of the Canadian Canals, as, by the liberal policy of the Dominion, those Canals are already opened to them on equal terms with British subjects; and they would urge upon the Dominion Parliament and the Legislature of New Brunswick, that it will be most advisable to make the arrangement as to duties on lumber floated down the St. John River, upon which the execution of Article XXX as to the transhipment of goods, is made contingent.

The freedom to navigate the St. Lawrence, which is assured to the United States by Article XXVI, has long existed in fact, and its recognition by Treaty cannot be prejudicial to the Dominion, which moreover, obtains in return, the free use of certain rivers on the Pacific side of the Continent.

I must not omit to notice that, by Article XXXIV., the dispute as to the Island of St. Juan, is to be submitted to arbitration; and provision has thus happily been made for the amicable termination of a long-standing and difficult controversy at a time when, in consequence of the union of British Columbia with the Dominion, this boundary question has become matter of interest to the whole Confederation of British Provinces.

I have thus gone through those parts of the Treaty which immediately touch the Dominion; but a question of much moment remains as to the course which should be taken during the present fishing season, pending the enactment by the respective Legislatures of the Laws necessary to bring the Fishery Articles into operation.

I find that on the conclusion of the Reciprocity Treaty, in June. 1854, and previous to its ratification, the then American Secretary of State (Mr. Marcy) expressed the hope of his Government that American Fishermen would not be molested if they should at

once attempt to use the privileges granted by that Treaty. A despatch was therefore addressed to the Governor of the North American Colonies, recommending that the wish of the United States Government should be acceded to, and that the American fishermen should be immediately admitted to the Colonial fisheries. The result was that the various Colonial Governments at once admitted the American fishermen to the fisheries, although the Legislative Acts necessary to give effect to the Treaty were not passed till late in the autumn. It is evidently most desirable that a similar course should be pursued on the present occasion; and you will perceive from the notes which have passed between Sir E. Thornton and Mr. Fish, copies of which I enclose, that the United States Government have made an application similar to that which they made in 1854; and that Her Majesty's Government have engaged to recommend to the Colonial Governments that it should be acceded to. Her Majesty's Government are of course aware that the Colonial Governments have no power to set aside the fishery statutes by their own authority ; but it is entirely within their power to take no active steps to enforce those statutes and to suspend the instructions to the Colonial Cruisers to exclude American citizens from the fisheries, just as it is in the power of Her Majesty's Government to suspend the action of Her Majesty's Cruisers, although the Imperial Fishery Statute is still in force.

Her Majesty's Government have no desire whatever to attempt to interfere with the entire right of the Colonial Legislatures to refuse to pass the acts necessary to give effect to the Treaty, though they would deeply deplore that a course which they believe would be most impolitic should be taken; but, on the other hand, they have too much confidence in the wisdom of those free Assemblies, to anticipate any such result; and they are confident that the Canadian Government would be as desirous as Her Majesty's Government that no untoward collision should occur during the present season which might prejudice the fair consideration of the Treaty, both by the American Congress and the Colonial Parliaments; and that, on a full consideration of the circumstances, they will see that the responsibility of incurring the risk of such a collision would be far heavier than that of removing, so far as they have the power, the obstacles to the provisional enjoyment by American citizens of the privileges which it is intended by the Treaty to secure to them for a longer time.

I cannot conclude this Despatch without expressing the gratification which it has given Her Majesty's Government to have had the valuable assistance of Sir J. Macdonald, in the negotiation of this Treaty. Whatever view may be taken in Canada of the merits of the Treaty, it must be an unqualified cause of satisfaction to the Canadians to know that they were represented by a Statesman holding so distinguished a position in the Canadian Government, and so well able, from his knowledge and experience, to put forward with the greatest force and authority the arguments best suited to promote the claims and interests of the Dominion.

I have, &c.,

(Signed)

KIMBERLEY.

Governor-General The Right-Honorable Lord Lisgar,

G.C.B, &c., &c., &c.

INSTRUCTIONS TO HER MAJESTY'S HIGH COMMISSIONERS, AND PRO-TOCOLS OF CONFERENCES HELD AT WASHINGTON BETWEEN FEBRUARY 27 AND MAY 6, 1871.

Nc. 1.

Earl Granville to Her Majesty's High Commissioners.

FOREIGN OFFICE, February, 9, 1871.

My LORD AND GENTLEMEN,—The Queen having been graciously pleased to appoint you to be Her Majesty's High Commissioners to proceed to Washington for the purpose of discussing, in a friendly spirit, with Commissioners to be appointed by the Government of the United States, the various questions on which differences have arisen between Great Britain and that country, and of treating for an agreement as to the mode of their amicable settlement, I inclose the necessary full powers, and have the honour to convey to you the following instructions for your guidance.

It is the earnest desire of Her Majesty's Government that the important negotiation with which you are entrusted should be conducted in a mutually conciliatory disposition, and with unreserved frankness in your communications with the High Commissioners or Members of the Government of the United States with whom you may be placed in communication, and they believe that this object cannot be better attained than by leaving you full discretion as to the manner in which the subjects which may engage your attention should be discussed.

The principal subjects will probably be :---

1. The Fisheries.

2. The free navigation of the River St. Lawrence and privilege of passage through the Canadian Canals.

3. The transit of goods through Maine, and lumber trade down the River St. John. 4. The Manitoba boundary.

5. The claims on account of the "Alabama," "Shenandoah," and certain other cruizers of the so-styled Confederate States.

6. The San Juan water boundary.

7. The claims of British subjects arising out of the Civil War.

8. The claims of the people of Canada on account of the Fenian raids.

9. The revision of the rules of Maritime Neutrality.

Copies of all the correspondence which has been presented to Parliament respecting the questions will be forwarded for your use.

1. The Fisheries.

On the termination of the Reciprocity Treaty of the 5th of June, 1854, by the United States' Government, the discussions respecting the rights of American fishermen under Article I of the Convention of the 20th of October, 1818, which had been set at rest by the Reciprocity Treaty, were revived, and, although temporary measures were taken to avoid pressing with severity upon American fishermen by the adoption of a system of licenses, it has been found impracticable to continue that system indefinitely; and, on^{*}its withdrawal, much excitement has been occasioned among the coast population of the Eastern States of the Union by the capture of boats engaged in illegal fishing, contrary to the Convention of 1818.

The correspondence will put you in possession of the facts of the several captures,

and enable you to judge, and explain if necessary, how far the pretensions of the American fishermen are exaggerated, and the leniency with which they have been treated under the directions of Her Majesty's Government and of the Government of the Dominion by the officers charged with the protection of the British Fisheries.

Irrespective, however, of the captures and confiscations of boats during the recent fishing season, there are. and have been for many years, differences of interpretation put upon the Convention of 1818 by the respective Governments, which might, at any time, rise into serious importance.

The two chief questions are : As to whether the expression "three marine miles of any of the coasts, bays, creeks, or harbours of His Britannic Majesty's dominions" should be taken to mean a limit of three miles from the coast line or a limit of three miles from a line drawn from headland to headland ; and whether the proviso that "the American fishermen shall be admitted to enter such bays or harbours for the purpose of shelter, and of repairing damages therein, of purchasing wood, and of obtaining water, and for no other purpose whatever," is intended to exclude Americain vessels from coming inshore to traffic, tranship fish, purchase stores, hire scamen, &c.

Her Majesty's Government would be glad to learn that you were able to arrive at a conclusive understanding with the Commissioners of the United States upon the disputed interpretation of the Convention of 1818; but they fear that you will find it expedient that a settlement should be arrived at by some other means, in which case they will be prepared for the whole question of the relations between the United States and the British Possessions in North America, as regards the Fisheries, being referred for consideration and inquiry to an International Commission, on which two Commissioners to be hereafter appointed, in consultation with the Government of the Dominion, should be the British Representatives.

Should the Government of the United States concur in this, it would be advisable that no time should be lost in appointing Commissioners on their side, and in the Commission commencing its labours; and, as it is scarcely probable that the Commissioners will be able to report, and a Treaty be framed, before the commencement of the next fishing season, it would be also desirable that you should agree upon some means, by license or otherwise, by which disputes may be avoided in the meanwhile.

2. Free Navigation of the River St. Lawrence, and Privilege of Passage through the Canadian Canals.

The President of the United States, in his Message at the opening of Congress in December last, referred to the claim of free navigation of the River St. Lawrence as being an occasion of difference between the two countries.

The IVth Article of the Reciprocity Treaty provided that the citizens and inhabitants of the United States should be allowed to navigate the River St. Lawrence and the canals of Canada ; and Her Majesty's Government are not aware that any practical difficulty as to the free navigation of the St. Lawrence has arisen since the abrogation of that Treaty.

The exclusive right to the navigation of the St. Lawrence was maintained by this country throughout the discussions between the two Governments on the subject in 1824-27, and has been acknowledged as existing by this Article of the Reciprocity Treaty, under which the British Government retained the right of suspending the privilege.

Her Majesty's Government are, nevertheless, now willing to admit the principle of the navigation of the St. Lawrence being free to the citizens of the United States, subject to such tolls and regulations as may be imposed equally on British subjects.

This, however, cannot extend, except as a special privilege, to the passage through the canals constructed by Canadian enterprize through British territory, without which, from the strength of the current and dangerous rapids, the navigation of the St. Lawrence cannot be profitably conducted; and the best course will probably be found to be to refer these questions for detailed examination and mutual arrangement in relation to the transit of goods in bond through Maine, St. John River lumber trade, navigation of Lake Michigan, passage through the canals in United States' territory, and other similar matters, to the Commission to be appointed to consider and report upon the Fisheries.

4. The Manitoba Boundary.

The President has already intimated to Congress that he is of opinion that the survey of the boundary along the 49th parallel, which has only been carried out across the Rocky Mountains to the Gulf of Georgia, should be completed from the Lake of the Woods to the foot of the Rocky Mountains.

In this Her Majesty's Government concur, and will be ready to appoint a Commission for the purpose whenever the United States' Government think fit.

5. The "Alabama," " Shenandoah," &c., Claims.

Under this head are comprised the claims against Great Britain for damages sustained by the depredations of the "Alabama," "Shenandoah," and "Georgia," the vessels which were furnished on account of the so-styled Confederate States, and armed outside of British jurisdiction, and of the "Florida" which, though built in England, was armed and equipped in the port of Mobile.

The history of these vessels is so fully explained in the long correspondence which has taken place with regard to them, that it is unnecessary for me now to do more than point out that the claims which have been preferred on account of the "Alabama" stand on a different footing to those arising from the captures made by the other cruizers; in so far as the "Alabama" escaped from Liverpool after evidence had been supplied by the United States' Minister of the service for which she was intended.

Her Majesty's Government adhere to the principle of arbitration for the settlement of these claims, which was recognized and adopted in the Convention signed by Lord Clarendon and Mr. Reverdy Johnson as being, in their opinion, the most appropriate mode of settling this question; and, should arbitration be adopted, Her Majesty's Government would concur, if the United States' Government proposed it, in Jurists properly selected being made the Arbitrators instead of a Sovereign or State, as provided in the late Convention.

Although, however, Her Majesty's Government are of opinion that arbitration is the most appropriate mode of settlement, you are at liberty to transmit for their consideration any other proposal which may be suggested for determining and closing the question of these claims.

For the escape of the "Alabama" and consequent injury to the commerce of the United States, Her Majesty's Government authorize you to express their regret in such terms as would be agreeable to the Government of the United States and not inconsistent with the position hitherto maintained by Her Majesty's Government as to the international obligations of neutral nations.

6. The San Juan Water Boundary.

The line of water boundary under the 1st Article of the Treaty of June 15th 1846, upon which the British and American Commissioners appointed for its demarcation differed, was proposed by Lord Russell as a fit subject for arbitration in 1859; but, owing to the Civil War, the negotiations then instituted were not brought to a conclusion, and it was not until the 14th of January, 1869, that a Convention was signed between Lord Clarendon and Mr. Reverdy Johnson for referring the matter to an Arbitrator; the President of the Swiss Confederation being selected at the instance of the Government of the United States.

Although this Convention was recommended by the Senate Committee of Foreign Affairs for ratification,* it has not been brought before the Senate, and the period within which its ratification should have taken place has now expired.

This delay has been accounted for by the United States' Government as having been occasioned by the delay, necessarily unavoidable, in carrying through the Imperial Parliament the measures required for enabling the Naturalization Treaty to be concluded; the two Treaties having been in the first instance included in the same negotiation under the Protocol of the 10th of November, 1868, upon which the Treaty of the 14th of January, 1869, was framed.

The Naturalization Treaty having been ratified some months ago, Her Majesty's Government trust that the Government of the United States will no longer hesitate to act upon the Water Boundary Treaty, which should in that case be appended to and form part of the General Treaty for the mode of settlement of all outstanding differences which you are empowered to sign.

Should, however, a form of arbitration admitting of more free discussion be preferred, Her Majesty's Government would assent to such a proposal.

7. The Claims of British Subjects.

Throughout the negotiations on the "Alabama," "Shenandoah," &c., claims, Her Majesty's Government have always urged that any satisfactory settlement of those claims must be accompanied by a simultaneous settlement of the claims of British subjects arising out of the civil war, and provision was made for this purpose in the Claims Convention.

Her Majesty's Government would expect that the Government of the United States would readily consent to all claims of British subjects against the United States, or of United States' citizens against Great Britain, being referred to a Mixed Commission, formed of one Commissioner from each country and an Umpire, as was done under the Convention of the 8th of February, 1853.

8. The Claime of the People of Canada on account of the Fenian Raid.

In connection with the claims of British subjects there is a claim on the part of the people of the Dominion of Canada for losses in life and property and expenditure, occasioned by the filibustering raids on the Canadian frontier, carried on from the territory of the United States in the years 1866 and 1870.

The Government of the Dominion having solicited Her Majesty's Government to bring this claim before the Government of the United States, were requested some time ago to prepare a statement to be submitted to that Government, but it has not yet been received.

In the meanwhile the accompanying account of the Fenian Brotherhood, which has been drawn up by Lord Tenterden, will supply you with full information as to the encouragement and support rendered in the United States to this and other Irish American revolutionary societies.

9. Revision of Rules of Maritime Neutrality.

It would be desirable to take this opportunity to consider whether it might not be the interest of both Great Britain and the United States to lay down certain rules of inter-"See "North America." No., 1 (1869), page 44. national comity in regard to the obligations of maritime neutrality, not only to be acknowledged for observance in their future relations, but to be recommended for adoption to the other Maritime Powers.

I have thus touched briefly upon the subjects likely principally to engage your attention, and have indicated the manner in which they may be possibly treated; but Her Majesty's Government wish you to understand that you are not thereby precluded from entertaining the consideration of other questions or making any suggestions you may think proper for their settlement.

Her Majesty's Government request, however, that if the mode of dealing with any particular matter which you may be disposed to agree to, should vary materially from the manner of settlement to which I have informed you Her Majesty's Government are prepared at once to assent, or, in case of any disagreement of importance occurring between yourselves and the American High Commissioners, you should at once report by telegraph and await further instructions.

> I am, &c., (Signed,) 0

GRANVILLE.

No. 2.

Earl Granville to Her Majesty's High Commissioners.

FOREIGN OFFICE, February 9th, 1871.

MY LORD AND GENTLEMEN,—With reference to my other despatch of this day's date, in which I have adverted to the revision of the rules of maritime neutrality as being one of the subjects which will probably be presented for your consideration, I have to state to you that the extent to which a neutral country may be hereafter held justly liable for the despatch, after notice, of a vessel under similar circumstances to those in the case of the "Alabama" cannot be precisely defined in the present stage of the controversy; but there are other points in which it may be convenient to you to be informed beforehand that this Government are willing to enter into an agreent.

These are :---

That no vessel employed in the military or naval service of any belligerent which shall have been equipped, fitted out, armed, or dispatched contrary to the neutrality of neutral State, should be admitted into any part of that State.

That prizes captured by such vessels, or otherwise captured in violation of the neutrality of any State, should, if brought within the jurisdiction of that State, be restored.

That in time of war, no vessel should be recognized as a ship of war, or received in any port of a neutral State as a ship of war, which has not been commissioned in some port in the actual occupation of the Government by whom her commission is issued.

The first of these Rules has been incorporated into the Foreign Enlistment Act, passed during the last year, and both the first and second were included in the Report of the Royal Commission for inquiring into the Neutrality Laws.

> I am, &c., (Signed) GRANVILLE

(Signed) GRANVILLE.

No. 4.

PROTOCOLS OF CONFERENCES BETWEEN THE HIGH COMMISSIONERS ON THE PART OF GREAT BRITAIN AND THE HIGH COMMISSIONERRS ON THE PART OF THE UNITED STATES OF AMERICA.

1st. Protocol of Conference between the High Commissioners on the part of Great Britain and the High Commissioners on the part of the United States of America.

WASHINGTON, February 27, 1871.

The High Commissioners having met, their full powers were respectively produced, which were found satisfactory, and copies thereof exchanged, as follows :---

"VICTORIA R.

"Victoria, by the grace of God, Queen of the United Kingdom of Great Britain and Ireland, Defender of the Faith, &c., &c., &c. To all and singular to whom these Presents shall come, Greeting:

"Whereas, for the purpose of discussing in a friendly spirit with Commissioners to be appointed on the part of Our Good Friends the United States of America, the various questions on which differences have arisen between Us and Our said Good Friends, and of treating for an Agreement as to the mode of their amicable settlement, We have judged it expedient to invest fit persons with full power to conduct on Our part the discussions in this behalf:

"Know ye, therefore, that We, reposing especial trust and confidence in the wisdom, loyalty, diligence, and circumspection of Our right trusty and right well-beloved Cousin and Councillor George Frederick Samuel, Earl de Grey and Ripon, Viscount Goderich, a Peer of Our United Kingdom, President of Our Most Honourable Privy Council, Knight of Our Most Noble Order of the Garter, &c., &c.; of Our right trusty and well-beloved Councillor Sir Stafford Henry Northcote, Baronet, a Member of Parliament, Companion of Our Most Honourable Order of the Bath, &c., &c.; of Our trusty and well-beloved Sir Edward Thornton, Knight Commander of Our Most Honourable Order of the Bath, Our Envoy Extraordinary and Minister Plenipotentiary to Our Good Friends the United States of America, &c., &c.; of Our trusty and well-beloved Sir John Alexander Macdonald, Knight Commander of Our Most Honourable Order of the Bath, a Member of Our Privy Council for Canada, and Minister of Justice and Attorney-General in Our Dominion of Canada, &c., &c.; and of Our trusty and well-beloved Montague Bernard, Esquire, Chichele Professor of International Law in the University of Oxford ;--have named, made, constituted, and appointed, as We do by these presents name, make, constitute, and appoint them Our undoubted High Commissioners, Procurators, and Plenipotentiaries:

Giving to them, or to any three or more of them, all manner of power and authority to treat, adjust, and conclude with such Minister or Ministers as may be vested with similar power and authority on the part of Our Good Friends the United States of America, any Treaties, Conventions, or Agreements that may tend to the attainment of the abovementioned end, and to sign for Us and in Our name everything so agreed upon and concluded, and to do and transact all such other matters as may appertain to the finishing of the aforesaid work in as ample manner and form, and with equal force and efficacy, as We Ourselves could do if personally present : Engaging and promising upon Our Royal Word, that whatever things shall be so transacted ond concluded by Our said High Commissioners, Procurators, and Plenipotentiaries shall be agreed to, acknowledged, and accepted by Us in the fullest manner, and that We will never suffer, either in the whole or in part, any person whatsoever to infringe the same, or act contrary thereto, as far as it lies in Our power.

"In witness whereof We have caused the Great Seal of Our United Kingdom of Great Britain and Ireland to be affixed to these Presents, which We have signed with Our Royal Hand.

"Given at Our Court at Windsor Castle, the sixteenth day of February, in the year of Our Lord one thousand eight hundred and seventy.one, and in the thirty-fourth year of Our reign."

"Ulysses S. Grant, President of the United States of America, To all who shall see these presents, Greeting:

"Know ye that, reposing special trust and confidence in the integrity and ability of Hamilton Fish, Secretary of State; Robert C. Schenck, Envoy Extraordinary and Minister Plenipotentiary to Great Britain; Samuel Nelson, an Associate Justice of the Supreme Court of the United States; Ebenczer R. Hoar, of Massachusetts; and George H. Williams of Oregon; I have nominated and, by and with the advice and consent of the Senate, do appoint them jointly and severally, to be Commissioners on the part of the United States, in a Joint High Commission between the United States and Great Britain; hereby empowering them, jointly and severally, to meet the Commissioners appointed or to be appointed on behalf of Her Britannic Majesty, and with them to treat and discuss the mode of settlement of the different questions which shall come before the said Joint High Commission, and the said office to hold and exercise during the pleasure of the President of the United States for the time being.

"In testimony whereof I have caused these letters to be made patent, and the seal of the United States to be hereunto affixed.

"Given under my hand at the city of Washington, this 10th day of February, in the year of our Lord one thousand eight hundred and seventy-one, and of the Independence of the United States of America the ninety-fifth.

[Seal.]

(Signed) "U. S. GRANT.

" By the President :

(Signed) "HAMILTON FISH, Secretary of State."

It was proposed by the British High Commissioners that Mr. Fish, Secretary of State of the United States, should preside.

The United States Commissioners stated that although appreciating the proposal, they did not consider it necessary that a President should be named.

The High Commissioners, on the suggestion of Mr. Fish, requested that Lord Tenterden, Secretary of the British High Commission, and Mr. Bancroft Davis, 18-3 17 Assistant-Secretary of State of the United States, acting as Secretary to the United States High Commission, to undertake the duties of Joint Protocolists.

The High Commissioners then agreed that the subjects for discussion should be those mentioned in the following correspondence which had taken place between the two Governments.

I. Sir E. Thornton to Mr. Fish, January 26, 1871.

[See "North America, No. 1 (1871)," Inclosure 1 in No. 1.]

2. Mr. Fish to Sir E. Thornton, January 30, 1871.

[Ibid., Inclosure 2 in No. 1.]

3. Sir E. Thornton to Mr. Fish, February 1, 1871.

[Ibid., Inclosure 3 in No. 1.]

4. Mr. Fish to Sir E. Thornton, February 3, 1871.

[Ibid., Inclosure 4 in No. 1.]

The Commissioners further determined that the discussion might include such other matters as might be mutually agreed upon.

The meeting of the High Commissioners was then adjourned to the 4th of March.

(Signed,)

Tenterden,

J. C. BANCROFT DAVIS.

2nd Protocol of Conference between the High Commissioners on the part of Great Britain and the High Commissioners on the part of the United States of America.

WASHINGTON, March 4, 1871.

The High Commissioners having met, the Protocol of the Conference held on the 27th of February was read and confirmed.

At the commencement of the Conference the United States' High Commissioners called attention to the provision in the Constitution of the United States by which the advice and consent of the Senate is required for the ratification of any Treaty which may be signed under the authority of the President.

The British High Commissioners stated that they were acquainted with this provision.

The High Commissioners then proceeded with the consideration of the matters referred to them.

(Signed,)

The Conference was adjourned to the 6th of March.

TENTERDEN.

J. C. BANCROFT DAVIS.

35 Victoria.

3rd Protocol of Conference between the High Commissioners on the part of Great Britain and the High Commissioners on the part of the United States of America.

WASHINGTON, March 6, 1871.

The Commissioners having met, the Protocol of the Conference held on the 4th of March was read and confirmed.

`The High Commissioners then proceeded with the consideration of the matters referred to them.

The Conference was adjourned to the 8th of March.

(Signed,)

TENTERDEN. J. C. BANCROFT DAVIS.

[The subsequent Protocols to No. XXXIV are to the same effect as Protocol No. III.]

35th Protocol of Conference between the High Commissioners on the part of Great Britain and the High Commissioners on the part of the United States of America.

WASHINGTON, May 3, 1871.

The High Commissioners having met, the Protocol of the Conference held on the 25th of April was read and confirmed.

The High Commissioners then proceeded with the consideration of the matters referred to them.

The American Commissioners produced the following further full-power, under the seal of the United States, authorizing them to conclude and sign a Treaty :---

"Ulysses S. Grant, President of the United States of America, to all to whom these presents shall come, —GREETING :

"Know ye that whereas by my power bearing date the 10th day of February last, Hamilton Fish, Secretary of State, Robert C. Schenck, Envoy Extraordinary and Minister Plenipotentiary to Great Britain, Samuel Nelson, an Associate Justice of the Supreme Court of the United States, Ebenezer R. Hoar, of Massachusetts, and George H. Williams, of Oregon, were authorized to meet the Commissioners appointed, or to be appointed, on behalf of Her Britannic Majesty, and with them to treat and discuss the mode of settlement of the different questions which should come before them;

"And whereas that meeting and discussion have taken place, and the said mode of settlement has been agreed upon ;

"Now, therefore, I, Ulysses S. Grant, President of the United States, do hereby appoint the said Hamilton Fish, Robert C. Schenck, Samuel Nelson, Ebenezer R. Hose, and George H. Williams, jointly and severally, Plenipotentiaries for and in behalf of the United States, and do authorize them, and any or either of them, to conclude and sign any Treaty or Treaties touching the premises, for the final ratification of the President of the United States, by and with the advice and consent of the Senate, if such advice and consent be given.

"In witness whereof I have caused the seal of the United States to be hereunto affixed.

"Given under my hand at the City of Washington, the second day of May, in the year of Our Lord One thousand eight hundred and seventy-one, and of the Independence of the United States of America the ninety-fifth.

(Signed,) "U. S. GRANT.

"By the President : (Signed,) "HAMILTON FISH, Secretary of State." A 1872

This full-power was examined by the British Commissioners, and found satisfactory. The Joint High Commissioners determined that they would embody in a Protocol a statement containing an account of the negotiations upon the various subjects included in the Treaty, and they instructed the Joint Protocolists to prepare such an account in the order in which the subjects are to stand in the Treaty.

The Conference was adjourned to the 4th of May.

(Signed,)

TENTERDEN. J. C. BANCROFT DAVIS.

36th Protocol of Conference between the High Commissioners on the part of "Great Britain and the High Commissioners on the part of the United States of America.

WASHINGTON, May 4, 1871.

The High Commissioners having met, the Protocol of the Conference held on the **3rd of May was read** and confirmed.

The High Commissioners then proceeded with the consideration of the matters referred to them.

The statement prepared by the Joint Protocolists, in accordance with the request of the Joint High Commissioners at the last Conference, was then read as follows :----

Statement.

ARTICLES I TO XI.

At the Conference held on the 8th of March, the American Commissioners stated that the people and Government of the United States felt that they had sustained a great wrong, and that great injuries and losses were inflicted upon their commerce and their material interests by the course and conduct of Great Britain during the recent rebellion in the United States; that what had occurred in Great Britain and her Colonies during that period had given rise to feelings in the United States which the people of the United States did not desire to cherish toward Great Britain ; that the history of the "Alabama" and other cruizers which had been fitted out, or armed, or equipped, or which had received augmentation of force in Great Britain or in her colonies, and of the operations of those versels, showed extensive direct losses in the capture and destruction of a large number of vessels with their cargoes, and in the heavy national expenditures in the pursuit of the enzizers, and indirect injury in the transfer of a large part of the American commercial marine to the British flag, in the enhanced payments of insurance, in the prolongation of the war, and in the addition of a large sum to the cost of the war and the suppression of the rebellion ; and also showed that Great Britain, by reason of failure in the proper observance of her duties as a neutral, had become justly liable for the acts of those cruigers and of their tenders; that the claims for the loss and destruction of private property which hed thus far been presented amounted to about fourteen millions of dollars, without interest, which amount was liable to be greatly increased by claims which had not been presented ; that the cost to which the Government had been put in the pursuit of cruisers could easily be ascertained by certificates of Government accounting officers; that in the hope of an amicable set!lement no estimate was made of the indirect losses, without prediadice, however, to the right to indemnification on their account in the event of no such settlement being made.

The American Commissioners further stated that they hoped that the British Commissioners would be able to place upon record an expression of regret by Her Majesty's Government for the depredations committed by the vessels whose acts were now under discussion. They also proposed that the Joint High Commission should agree upon a sum which should be paid by Great Britain to the United States, in satisfaction of all the claims and the interest thereon.

The British Commissioners replied, that Her Majesty's Government could not admit that Great British had failed to discharge toward the United States the duties imposed on her by the rules of international law, or that she was justly liable to make good to the United States the losses occasioned by the acts of the cruisers to which the American Commissioners had referred. They reminded the American Commissioners that several vessels, suspected of being designed to cruise against the United States, including two iron-clads, had been arrested or detained by the British Government, and that that Government had in some instances not confined itself to the discharge of international obligations, however widely construed; as, for instance, when it acquired at a great cost to the country the control of the Anglo-Chinese Flotilla, which, it was apprehended, might be used against the United States.

They added, that although Great Britain had, from the beginning, disavowed any responsibility for the acts of the "Alabama" and the other vessels, she had already shown her willingness, for the sake of the maintenance of friendly relations with the United States, to adopt the principle of arbitration, providing that a fitting arbitrator could be found, and that an agreement could be come to as to the points to which arbitration should apply. They would, therefore, abstain from replying in detail to the statement of the American Commissioners, in the hope that the necessity for entering upon a lengthened controversy might be obviated by the adoption of so fair a mode of settlement as that which they were instructed to propose; and they had now to repeat, on behalf of their Government, the offer of arbitration.

The American Commissioners expressed their regret at this decision of the British Commissioners, and said further that they could not consent to submit the question of the liability of Her Majesty's Government to arbitration unless the principles which should govern the Arbitrator in the consideration of the facts could be first agreed upon.

The British Commissioners replied, that they had no authority to agree to a submission of these claims to an Arbitrator with instructions as to the principles which should govern him in the consideration of them. They said that they should be willing to consider what principles should be adopted for observance in future; but that they were of opinion that the best mode of conducting an arbitration was to submit the facts to the Arbitrator, and leave him free to decide upon them after hearing such arguments as might be necessary.

The American Commissioners replied, that they were willing to consider what principles should be laid down for observance in similar cases in future, with the understanding that any principles that should be agreed upon should be held to be applicable to the facts in respect to the "Alabama" claims.

The British Commissioners replied, that they could not admit that there had been any violation of existing principles of international law, and that their instructions did not authorize them to accede to a proposal for laying down rules for the guidance of the Arbitrator, but that they would make known to their Government the views of the American Commissioners on the subject.

At the respective Conferences on March 9, March 10, March 13, and March 14, the Jeint High Commission considered the form of the declaration of principles or rules which the American Commissioners desired to see adopted for the instruction of the Arbitrator and laid down for observance by the two Governments in future.

At the close of the Conference of the 14th of March the British Commissioners reserved several questions for the consideration of their Government.

At the Conference on the 5th of April the British Commissioners stated, that they were instructed by Her Majesty's Government to declare that Her Majesty's Government could not assent to the proposed rules as a statement of principles of international law which were in force at the time when the "Alabama" claims arose, but that Her Majesty's Government, in order to evince its desire of strengthening the friendly relations between the two countries, and of making satisfactory provision for the future, agreed that in deciding the questions between the two countries arising out of those claims, the Arbitrator should assume that Her Majesty's Government had undertaken to act upon the principles set forth in the rules which the American Commissioners had proposed, viz. :

That a neutral Government is bound, first, to use due diligence to prevent the fitting out, arming, or equipping, within its jurisdiction, of any vessel, which it has reasonable ground to believe is intended to cruise or carry on war against a Power with which it is at peace; and also to use like diligence to prevent the departure from its jurisdiction of any vessel intended to cruise or carry on war as above, such vessel having been specially adapted, in whole or in part, within such jurisdiction, to warlike use.

Secondly. Not to permit or suffer either belligerent to make use of its ports or waters as the base of naval operations against the other, or for the purpose of the renewal or augmentation of military supplies or arms, or the recruitment of men.

Thirdly. To exercise due diligence in its own ports or waters, and as to all persons within its jurisdiction, to prevent any violation of the foregoing obligations and duties.

It being a condition of this undertaking that these obligations should in future be held to be binding internationally between the two countries.

It was also settled that in deciding the matters submitted to him, the Arbitrator should be governed by the foregoing rules, which had been agreed upon as rules to be taken as applicable to the case, and by such principles of international law, not inconsistent therewith, as the Arbitrator should determine to have been applicable to the case.

The Joint High Commission then proceeded to consider the form of submission and the manner of constituting a tribunal of arbitration.

At the Conferences on the 6th, 8th, 9th, 10th, and 12th of April, the Joint High Commission considered and discussed the torm of submission, the manner of the award, and the mode of selecting the Arbitrators.

The American Commissioners, referring to the hope which they had expressed on the 8th of March, inquired whether the British Commissioners were prepared to place upon record an expression of regret by Her Majesty's Government for the depredations committed by the vessels whose acts were now under discussion; and the British Commissioners replied that they were authorized to express, in a friendly spirit, the regret felt by Her Majesty's Government for the escape, under whatever circumstances, of the "Alabama" and other vessels from British ports, and for the depredations committed by those vessels.

The American Commissioners accepted this expression of regret as very satisfactory to them and as a token of kindness, and said that they felt sure it would be so received by the Government and people of the United States.

In the Conference on the 13th of April, the Treaty Articles I to XI were agreed to.

ARTICLES XII TO XVII.

At the Conference on the 4th March it was agreed to consider the subjects referred to the Joint High Commission by the respective Governments in the order in which they appeared in the correspondence between Sir Edward Thornton and Mr. Fish, and to defer the consideration of the adjustment of "all other claims, both of British subjects and citizens of the United States, arising out of acts committed during the recent civil war in this country," as described by Sir Edward Thornton in his letter of February 1, until the subjects referred to in the previous letters should have been disposed of.

The American Commissioners said that they supposed that they were right in their opinion that British laws prohibit British subjects from owning slaves; they therefore inquired whether any claim for slaves, or for alleged property or interest in slaves, can or will be presented by the British Government, or in behalf of any British subject, under the Treaty now being negotiated, if there be in the Treaty no express words excluding such claims. The British Commissioners replied, that by the law of England British subjects had long been prohibited from purchasing or dealing in slaves, not only within the dominions of the British Crown, but in any foreign country; and that they had no hesitation in saying that no claim on behalf of any British subject, for slaves or for any property or interest in slaves, would be presented by the British Government.

Referring to the paragraph in Sir Edward Thornton's letter of January 26, relating to "the mode of settling the different questions which have arisen out of the Fisheries, as well as all those which affect the relations of the United States towards Her Majesty's Possessions in North America," the British Commissioners proposed that the Joint High Commission should consider the claims for injuries which the people of Canada had suffered from what were known as the Fenian raids.

The American Commissioners objected to this, and it was agreed that the subject might be brought up again by the British Commissioners in connection with the subjects referred to by Sir Edward Thornton in his letter of February 1.

At the conference on the 14th of April the Joint High Commission took into consideration the subjects mentioned by Sir Edward Thornton in that letter.

The British Commissioners proposed that a Commission for the consideration of these claims should be appointed, and that the Convention of 1853 should be followed as a precedent. This was agreed to, except that it was settled that there should be a third Commissioner instead of an Umpire.

At the Conference on the 15th of April, the Treaty Articles XII to XVII were agreed to.

At the Conference on the 26th of April the British Commissioners again brought before the Joint High Commission the claims of the people of Canada for injuries suffered from the Fenian raids. They said that they were instructed to present these claims, and to state that they were regarded by Her Majesty's Government as coming within the class of subjects indicated by Sir Edward Thornton in his letter of January 26, as subjects for the consideration of the Joint High Commission.

The American Commissioners replied, that they were instructed to say that the Government of the United States did not regard these claims as coming within the class of subjects indicated in that letter as subjects for the consideration of the Joint High Commission, and that they were without any authority from their Government to consider them. They therefore declined to do so.

The British Commissioners stated that, as the subject was understood not to be within the scope of the instructions of the American Commissioners, they must refer to their Government for further instructions upon it.

At the Conference on the 3rd May the British Commissioners stated that they were instructed by their Government to express their regret that the American Commissioners were without authority to deal with the question of the Fenian raids, and they inquired whether that was still the case.

The American Commissioners replied, that they could see no reason to vary the reply formerly given to this proposal; that in their view the subject was not embraced in the scope of the correspondence between Sir Edward Thornton and Mr. Fish under either of the letters of the former; and that they did not feel justified in entering upon the consideration of any class of claims not contemplated at the time of the creation of the present Commission, and that the claims now referred to did not commend themselves to their favour.

The British High Commissioners said that under these circumstances they would not urge further that the settlement of these claims should be included in the present Treaty, and that they had the less difficulty in doing so as a portion of the claims were of a constructive and inferential character.

ARTICLES XVIII TO XXV.

At the Conference on the 6th of March the British Commissioners stated that they were prepared to discuss the question of the Fisheries, either in detail or generally, so as either to enter into an examination of the respective rights of the two countries under the Treaty of 1818, and the general law of nations, or to approach at once the settlement of the question on a comprehensive basis.

The American Commissioners said, that with the view of avoiding the discussion of matters which subsequent negotiation might render it unnecessary to enter into, they thought it would be preferable to adopt the latter course, and inquired what, in that case, would be the basis which the British Commissioners desired to propose.

The British Commissioners replied, that they considered that the Reciprocity Treaty of 5th June, 1854, should be restored in principle.

The American Commissioners declined to assent to a renewal of the former Reciprocity Treaty.

The British Commissioners then suggested that, if any considerable modification were made in the Tariff arrangements of that Treaty, the coasting trade of the United States and of Her Britannic Majesty's possessions in North America should be reciprocally thrown open, and that the navigation of the River St. Lawrence and of the Canadian Canals should be also thrown open to the citizens of the United States on terms of equality with British subjects.

The American Commissioners declined this proposal, and objected to a negotiation on the basis of the Reciprocity Treaty. They said that that Treaty had proved unsatisfactory to the people of the United States, and consequently had been terminated by notice from the Government of the United States, in pursuance of its provisions. Its renewal was not in their interest, and would not be in accordance with the sentiments of their people. They further said that they were not at liberty to treat of the opening of the coasting trade of the United States to the subjects of Her Majesty residing in her possessions in North America. It was agreed that the questions relating to the navigation of the River St. Lawrence, and of the Canadian Canals, and to other commercial questions affecting Canada, should be treated by themselves.

The subject of the Fisheries was further discussed at the Conferences on the 7th, 20th, 22nd, and 25th of March. The American Commissioners stated that if the value of the inshore fisheries could be ascertained, the United States might prefer to purchase, for a sum of money, the right to enjoy, in perpetuity, the use of these inshore fisheries in common with British fishermen, and mentioned 1,000,000 dollars as the sum they were prepared to offer. The British Commissioners replied that this offer was, they thought, wholly inadequate, and that no arrangement would be acceptable of which the admission into the United States, free of duty, of fish the produce of the British fisheries, did not form a part; adding that any arrangement for the acquisition by purchase of the inshore fisheries in perpetuity was open to grave objection.

The American Commissioners inquired whether it would be necessary to refer any arrangement for purchase to the Colonial or Provincial Parliaments.

The British Commissioners explained that the fisheries within the limits of maritime jurisdiction were the property of the several British Colonies, and that it would be necessary to refer any arrangement which might affect Colonial property or rights to the Colonial or Provincial Parliaments; and that legislation would also be required on the part of the Imperial Parliament. During these discussions the British Commissioners contended that these inshore fisheries were of great value, and that the most satisfactory arrangement for their use would be a reciprocal tariff arrangement, and reciprocity in the coasting trade; and the American Commissioners replied that their value was over-estimated; that the United States desired to secure their enjoyments, not for their commercial or intrinsic value, but for the purpose of removing a source of irritation; and that they could hold out no hope that the Congress of the United States would give its consent to such a tariff arrangement as was proposed, or to any extended plan of reciprocal free admission of the products of the two countries; but that, inasmuch as one branch of Congress had recently, more than once, expressed itself in favour of the abolition of duties on coal and salt, they would propose that coal, salt, and fish be reciprocally admitted free; and that, inasmuch as Congress had removed the duty from a portion of the lumber heretofore subject to duty, and as the tendency of legislation in the United States was towards the reduction of taxation and of duties in proportion to the reduction of the public debt and expenses, they would further propose that lumber be admitted free from duty from and after the 1st of July, 1874, subject to the approval of Congress, which was necessary on all questions affecting import duties.

The British Commissioners, at the Conference on the 17th of April, stated that they had referred this offer to their Government, and were instructed to inform the American Commissioners that it was regarded as inadequate, and that Her Majesty's Government considered that free lumber should be granted at once, and that the proposed tariff concessions should be supplemented by a money payment.

The American Commissioners then stated that they withdrew the proposal which they had previously made of the reciprocal free admission of coal, salt, and fish, and of lumber after July 1, 1874; that that proposal had been made entirely in the interest of a peaceful settlement, and for the purpose of removing a source of irritation and of anxiety; that its value had been beyond the commercial or intrinsic value of the rights to have been acquired in return; and that they could not consent to an arrangement on the basis now proposed by the British Commissioners; and they renewed their proposal to pay a money equivalent for the use of the inshore fisheries. They further proposed that, in case the two Governments should not be able to agree upon the sum to be paid as such an equivalent, the matter should be referred to an impartial Commission for determination.

The British Commissioners replied, that this proposal was one on which they had no instructions, and that it would not be possible for them to come to any arrangement except one for a term of years and involving the concession of free fish and fish-oil by the American Commissioners; but that if free fish and fish-oil were conceded, they would inquire of their Government whether they were prepared to assent to a reference to arbitration as to money payment.

The American Commissioners replied, that they were willing, subject to the action of Congress, to concede free fish and fish-oil as an equivalent for the use of the inshore fisheries, and to make the arrangement for a term of years; that they were of opinion that free fish and fish-oil would be more than an equivalent for those fisheries, but that they were also willing to agree to a reference to determine that question and the amount of any money payment that might be found necessary to complete an equivalent, it being understood that legislation would be needed before any payment could be made.

The subject was further discussed in the Conferences of April 18 and 19, and the British Commissioners having referred the last proposal to their Government and received instructions to accept it, the Treaty Articles XVIII to XXV were agreed to at the Conference on the 22nd of April.

ARTICLES XXVI TO XXXIII.

At the Conference en the 6th of March the British Commissioners proposed that the Beciprocity Treaty of June 5, 1854, should be restored in principle, and that, if any considerable modifications in the Tariff arrangements in force under it were made, the coasting trade of the United States and of Her Britannic Majesty's Possessions in North America should be reciprocally thrown open, and that the navigation of the River St. Lawrence and of the Canadian Canals should be thrown open to the citizens of the United States on terms of equality with British subjects.

The American Commissioners declined this proposal, and in the subsequent negotiations the question of the Fisheries was treated by itself.

18-4

25

At the Conference on the 17th March the Joint High Commission considered the subject of the American improvement of the navigation of the St. Clair Flats.

At the Conference on the 18th March the questions of the navigation of the River St. Lawrence and the Canals and the other subjects connected therewith were taken up.

The American Commissioners proposed to take into consideration the question of transit of goods in bond through Canada and the United States, which was agreed to.

The British Commissioners proposed to take into consideration the question of opening the coasting trade of the lakes reciprocally to each party, which was declined.

On the proposal of the British Commissioners it was agreed to take the question of transhipment into consideration.

The British Commissioners proposed to take into consideration the reciprocal registration of vessels, as between the Dominion of Canada and the United States, which was declined.

At the Conference on the 23rd March the transhipment question was discussed and postponed for further information on the motion of the American Commissioners.

The transit question was discussed, and it was agreed that any settlement that might be made should include a reciprocal arrangement in that respect for the period for which the Fishery Articles should be in force.

The question of the navigation of the River St. Lawrence and the Canals was taken up.

The British Commissioners stated that they regarded the concession of the navigation of Lake Michigan as an equivalent for the concession of the navigation of the River St. Lawrence.

As to the Cauals they stated that the concession of the privilege to navigate them in their present condition, on terms of equality with British subjects, was a much greater concession than the corresponding use of the Canals offered by the United States.

They further said that the enlargement of the Canals would involve the expenditure of a large amount of money, and they asked what equivalent the American Commissioners proposed to give for the surrender of the right to control the tolls for the use of the Canals, either in their present state or after enlargement.

The American Commissioners replied that, unless the Welland Canal should be enlarged so as to accommodate the present course of trade, they should not be disposed to make any concessions ; that in their opinion the citizens of the United States could now justly claim to navigate the River St. Lawrence in its natural state, ascending and descending, from the 45th parallel of north latitude, where it ceases to form the boundary between the two countries, from, to, and into the sea; and they could not concede that the navigation of Lake Michigan should be given or taken as an equivalent for that right; and they thought that the concession of the navigation of Lake Michigan and of the Canals offered by them was more than an equivalent for the concessions as to the Canadian Canals which were asked. They proposed, in connection with a reciprocal arrangement as to transit and transhipment, that Canada should agree to enlarge the Welland and St. Lawrence Canals, to make no discriminating tolls, and to limit the tolls to rates sufficient to maintain the Canals, pay a reasonable interest on the cost of construction and enlargement, and raise a sinking fund for the repaying within a reasonable time the cost of enlargement ; and that the navigation of the River St. Lawrence, the Canadian Canals, the Canals offered by the United States, and Lake Michigan should be enjoyed reciprocally by citizens of the United States and by British subjects. This proposal was declined by the British Commissioners, who repeated that they did not regard the equivalent offered by the United States as at all commensurate with the concessions esked from Great Britain.

At the Conference on the 27th of March the proposed enlargement of the Canadian Canals was further discussed. It was stated on the part of the British Commissioners that the Canadian Government were now considering the expediency of enlarging the capacity of the Canals on the River St. Lawrence, and had already provided for the enlargement of the Welland Canal, which would be undertaken without delay. The subject of the export duty, in New Brunswick, on American lumber floated down the River St. John, was proposed for consideration by the American Commissioners.

At the Conference on the 22nd of April the British Commissioners proposed that the navigation of Lake Michigan should be given in exchange for the navigation of the River St. Lawrence; and that Her Majesty's Government should agree to urge upon the Dominion of Canada to give to the citizens of the United States the use of the Canadian Canals on terms of equality with British subjects; and that the Government of the United States should agree to urge upon the several States to give to British subjects the use of the several State Canals on terms of equality with citizens of the United States. They also proposed, as part of the arrangement, a reciprocal agreement as to transit and transhipment, and that the Government of Great Britain should urge upon New Brunswick not to impose export duties on the lumber floated down the River St. John for shipment to the United States.

The American Commissioners repeated their views as to the navigation of the River St. Lawrence in its natural state.

The British Commissioners replied, that they could not admit the claims of American citizens to navigate the River St. Lawrence as of right; but that the British Government had no desire to exclude them from it. They however pointed out that there were certain rivers running through Alaska which should on like grounds be declared free and open to British subjects, in case the River St. Lawrence should be declared free.

The American Commissioners replied, that they were prepared to consider that question. They also assented to the arrangement as to the Canals which was proposed by the British Commissioners, limiting it, as regarded American Canals, to the Canals connected with the navigation of the lakes or rivers traversed by or contiguous to the boundary line between the British and American possessions. They likewise agreed to give the right of navigating Lake Michigan for a term of years. They desired, and it was agreed, that the transhipment arrangement should be made dependent upon the non-existence of discriminating tolls or regulations on the Canadian Canals, and also upon the abolition of the New Brunswick export duty on American lumber intended for the United States. It was also agreed that the right of carrying should be made dependent upon the non-imposition of export duties on either side on the goods of the other party passing in transit.

The discussion of these subjects was further continued at the Conferences of the 24th, 25th, and 26th of April, and the Treaty Articles XXVI to XXXIII were agreed to at the Conference on the 3rd of May.

In the course of these discussions the British Commissioners called attention to the question of the survey of the boundary line along the forty-ninth parallel, which still remained unexecuted from the Lake of the Woods to the Rocky Mountains, and to which reference had been made in the President's Message.

The American Commissioners stated, that the survey was a matter for administrative action, and did not require to be dealt with by a Treaty provision. The United States' Government would be prepared to agree with the British Government for the appointment of a Boundary Survey Commission, in the same manner as had been done in regard to the remainder of the boundary along the forty-ninth parallel as soon as the legislative appropriations and other necessary arrangements could be made.

ARTICLES XXXIV TO XLII.

At the Conference on the 15th of March the British Commissioners stated that it was proposed that day to take up the North-West Water Boundary question; that the difference was one of long standing, which had more than once been the subject of negotiations between the two Governments, and that the negotiators had, in January, 1869, agreed upon a Treaty. They then proposed that an arbitration of this question should be made upon the basis of the provisions of that Treaty. The American Commissioners replied that, though no formal vote was actually taken upon it, it was well understood that that Treaty had not been favorably regarded by the Senate. They declined the proposal of the British Commissioners, and expressed their wish that an effort should be made to settle the question in the Joint High Commission.

The British Commissioners assented to this, and presented the reasons which induced them to regard the Rosario Straits as the channel contemplated by the Treaty of June 15, 1846.

The American Commissioners replied, and presented the reasons which induced them to regard the Haro Channel as the channel contemplated by that Treaty. They also produced in support of their views some original correspondence of Mr. Everett with his Government, which had not been alluded to in previous discussions of the question.

The British Commissioners replied, that they saw in that correspondence no reason to induce them to change the opinion which they had previously expressed. They then asked whether the American Commissioners had any further proposal to make.

The American Commissioners replied that, in view of the position taken by the British Commissioners, it appeared that the Treaty of June 15, 1846, might have been made under a mutual misunderstanding, and would not have been made had each party understood at that time the construction which the other party puts upon the language whose interpretation is in dispute; they therefore proposed to abrogate the whole of that part of the Treaty, and re-arrange the boundary line which was in dispute before that Treaty was concluded.

The British Commissioners replied that the proposal to abrogate a Treaty was one of a serious character, and that they had no instructions which would enable them to entertain it; and at the Conference on the 20th of March the British Commissioners declined the proposal.

At the Conference on the 19th of April the British Commissioners proposed to the American Commissioners to adopt the Middle Channel (generally known as the Douglas Channel) as the channel through which the boundary line should be run, with the understanding that all the channels through the Archipelago should be free and common to both Parties.

The American Commissioners declined to entertain that proposal. They proposed that the Joint High Commission should recognize the Haro Channel as the channel intended by the Treaty of June 15, 1846, with a mutual agreement that no fortifications should be erected by either Party to obstruct or command it, and with proper provisions as to any existing proprietary rights of British subjects in the Island of San Juan.

The British Commissioners declined this proposal, and stated that, being convinced of the justice of their view of the Treaty, they could not abandon it except after a fair decision by an impartial Arbitrator. They therefore renewed their proposal for a reference to arbitration, and hoped that it would be seriously considered.

The American Commissioners replied, that they had hoped that their last proposal would be accepted. As it had been declined, they would, should the other questions between the two Governments be satisfactorily adjusted, agree to a reference to arbitration to determine whether the line should run through the Haro Channel or through the Rosario Straits, upon the condition that either Government should have the right to include in the evidence to be considered by the Arbitrator such documents, official correspondence, and other official or public statements bearing on the subject of the reference as they may consider necessary to the support of their respective cases. This condition was agreed to.

The British Commissioners proposed that the Arbitrator should have the right to draw the boundary through an intermediate channel. The American Commissioners declined this proposal, stating that they desired a decision, not a compromise.

The British Commissioners proposed that it should be declared to be the proper construction of the Treaty of 1846 that all the channels were to be open to navigation by both Parties. The American Commissioners stated that they did not so construe the Treaty of 1846, and therefore could not assent to such a declaration. The discussion of this subject was continued during this Conference, and in the Conference of the 22nd of April the Treaty Articles XXXIV to XLII were agreed to.

The Joint High Commissioners approved this Statement, and directed it to be entered in the Protocol.

The Conference was adjourned to the 6th of May.

(Signed)

TENTERDEN. J. C. BANCROFT DAVIS.

37th Protocol of the Conference between the High Commissioners on the part of Great Britain and the High Commissioners on the part of the United States of America.

Washington, May 6, 1871.

The High Commissioners having met, the Protocol of the Conference held on the 4th of May was read and confirmed.

Lord de Grey said that, as the Joint High Commission would not meet again after to-day, except for the purpose of signing the Treaty, he desired, on behalf of himself and his colleagues, to express their high appreciation of the manner in which Mr. Fish and his American colleagues had, on their side, conducted the negotiations. It had been most gratifying to the British Commissioners to be associated with colleagues who were animated with the same sincere desire as themselves to bring about a settlement, equally honourable and just to both countries, of the various questions of which it had been their duty to treat, and the British Commissioners would always retain a grateful recollection of the fair and friendly spirit which the American Commissioners had displayed.

Mr. Fish, in behalf of the American Commissioners, said that they were gratefully sensible of the friendly words expressed by Lord de Grey, and of the kind spirit which had prompted them. From the date of the first Conference the American Commissioners had been impressed by the earnestness of desire manifested by the British Commissioners to reach a settlement worthy of the two Powers who had committed to this Joint High Commission the treatment of various questions of peculiar interest, complexity, and delicacy. His colleagues and he could never cease to appreciate the generous spirit and the open and friendly manner in which the British Commissioners had met and discussed the several questions that had led to the conclusion of a Treaty which it was hoped would receive the approval of the people of both countries, and would prove the foundation of a cordial and friendly understanding between them for all time to come.

Mr. Fish further said that he was sure that every member of the Joint High Commission would desire to record his appreciation of the ability, the zeal, and the unceasing labour which the Joint Protocolists had exhibited in the discharge of their arduous and responsible duties, and that he knew that he only gave expression to the feelings of the Commissioners in saying that Lord Tenterden and Mr. Bancroft Davis were entitled to, and were requested to accept, the thanks of the Joint High Commission for their valuable services, and the great assistance which they had rendered with unvarying obligingness to the Commission.

Lord de Grey replied, on behalf of the British Commissioners, that he and his colleagues most cordially concurred in the proposal made by Mr. Fish, that the thanks of the Joint High Commission should be tendered to Mr. Bancroft Davis and Lord Tenterden for their valuable services as Joint Protocolists. The British Commissioners were also quite as sensible as their American colleagues of the great advantage which the Commission had derived from the assistance which those gentlemen had given them in the conduct of the important negotiations in which they had been engaged.

Monday, the 8th of May, was appointed for the signature of the Treaty.

(Signed)

J. C. BANCROFT DAVIS.

TENTERDEN.

DESPATCH FROM HER MAJESTY'S HIGH COMMISSIONERS, WITH COPY ANNEXED OF THE TREATY SIGNED AT WASHINGTON, MAY 8, 1871.

Her Majesty's High Commissioners to Earl Granville.-(Received May 21.)

WASHINGTON, MAY 8, 1871.

DE GREY AND RIPON. STAFFORD H. NORTHCOTE. EDWD. THORNTON. JOHN A. MACDONALD. MOUNTAGUE BERNARD.

My Lord,—We have the honour to report that we have this day signed the Treaty with the United States' High Commissioners at the State Department.

Copies of the Treaty are inclosed. The original will be conveyed to London by Lord Tenterden.

As the duties of Her Majesty's High Commission have now been completed, we desire to bring to your Lordship's notice in a very special manner the valuable assistance which we have received from Lord Tenterden throughout our negotiations. We cannot speak too highly of the remarkable knowledge and ability which he has displayed, or of the zeal with which he has devoted himself to his duties, and we feel ourselves under the greatest obligations to him.

We further wish to place upon record our strong appreciation of the services which have been rendered to us by Mr. Henry Howard, and our sense of the great advantage which we have derived from them.

Our thanks are also due to Mr. H. S. Northcote, of whose special aptitude for business we have formed a high opinion, as well as to Viscount Goderich, who has rendered us most willing assistance.

> We have, &c. (Signed) DE STA ED Jon Mo

INCLOSURE.

Treaty between Her Majesty and the United States of America. Signed at Washington, May 8, 1871. Ratifications exchanged at London, June, 1871.

HER Britannic Majesty and the United States of America, being desirous to provide for an amicable settlement of all causes of difference between the two countries, have for that purpose appointed their respective Plenipotentiaries, that is to say :---

Her Britannic Majesty on her part has appointed as Her High Commissioners and Plenipotentiaries, the Right Honourable George Frederick Samuel Earl de Grey and Earl of Ripon, Viscount Goderich, Baron Grantham, a Baronet, a Peer of the United Kingdom, Lord President of Her Majesty's Most Honourable Privy Council, Knight of the Most Noble Order of the Garter, &c., &c. ; the Right Honourable Sir Stafford Henry Northcote, Baronet, one of Her Majesty's Most Honourable Privy Council, a Member of Parliament, a Companion of the Most Honourable Order of the Bath, &c., &c. ; Sir Edward Thornton, Knight Commander of the Most Honourable Order of the Bath, Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the United States of America ; Sir John Alexander Macdonald, Knight Commander of the Most Honourable Order of the Bath, a Member of Her Majesty's Privy Council for Canada, and Minister of Justice and Attorney-General of Her Majesty's Dominion of Canada ; and Mountague Bernard, Esq., Chichele Professor of International Law in the University of Oxford ; And the President of the United States has appointed on the part of the United States as Commissioners in a Joint High Commission and Plenipotentiaries, Hamilton Fish, Secretary of State; Robert Cumming Schenck, Envoy Extraordinary and Minister Plenipotentiary to Great Britain; Samuel Nelson, an Associate Justice of the Supreme Court of the United States; Ebenezer Rockwood Hoar, of Massachusetts; and George Henry Williams, of Oregon;

And the said Plenipotentiaries, after having exchanged their full powers, which were found to be in due and proper form, have agreed to and concluded the following Articles:

ARTICLE I.

Whereas differences have arisen between the Government of the United States and the Government of Her Britannic Majesty, and still exist, growing out of the acts committed by the several vessels which have given rise to the claims generically known as the "Alabama" claims:

And whereas Her Britannic Majesty has authorized Her High Commissioners and Plenipotentiaries to express, in a friendly spirit, the regret felt by Her Majesty's Government for the escape, under whatever circumstances, of the "Alabama" and other vessels from British ports, and for the depredations committed by those vessels :

Now, in order to remove and adjust all complaints and claims on the part of the United States, and to provide for the speedy settlement of such claims, which are not admitted by Her Britannic Majesty's Government, the High Contracting Parties agree that all the said claims, growing out of acts committed by the aforesaid vessels, and generically know as the "Alabama" claims, shall be referred to a Tribunal of Arbitration to be composed of five Arbitrators to be appointed in the following manner, that is to say : one shall be named by Her Britannic Majesty ; one shall be named by the President of the United States ; His Majesty the King of Italy shall be requested to name one ; the President of the Swiss Confederation shall be requested to name one ; and His Majesty the Emperor of Brazil shall be requested to name one.

In case of the death, absence, or incapacity to serve of any or either of the said Arbitrators, or in the event of either of the said Arbitrators omitting or declining or ceasing to act as such, Her Britannic Majesty, or the President of the United States, or His Majesty the King of Italy, or the President of the Swiss Confederation, or His Majesty the Emperor of Brazil, as the case may be, may forthwith name another person to act as Arbitrator in the place and stead of the Arbitrator originally named by such head of a State.

And in the event of the refusal or omission for two months after receipt of the request from either of the High Contracting Parties of His Majesty the King of Italy, or the President of the Swiss Confederation, or His Majesty the Emperor of Brazil, to name an Arbitrator either to fill the original appointment or in the place of one who may have died, be absent, or incapacitated, or who may omit, decline, or from any cause cease to act as such Arbitrator, His Majesty the King of Sweden and Norway shall be requested to name one or more persons, as the case may be, to act as such Arbitrator or Arbitrators.

ABTICLE II.

The Arbitrators shall meet at Geneva, in Switzerland, at the earliest convenient day after they shall have been named, and shall proceed impartially and carefully to examine and decide all questions that shall be laid before them on the part of the Governments of Her Britannic Majesty and the United States respectively. All questions considered by the Tribunal, including the final award, shall be decided by a majority of all the Arbitrators.

Each of the High Contracting Parties shall also name one person to attend the Tribunal as its Agent to represent it generally in all matters connected with the arbitration.

ARTICLE III.

The written or printed case of each of the two Parties, accompanied by the documents, the official correspondence, and other evidence on which each relies, shall be delivered in duplicate to each of the Arbitrators and to the Agent of the other Party as soon as may be after the organization of the Tribunal, but within a period not exceeding six months from the date of the exchange of the ratifications of this Treaty.

ARTICLE IV.

Within four months after the delivery on both sides of the written or printed case, either Party may, in like manner, deliver in duplicate to each of the said Arbitrators, and to the Agent of the other Party, a counter case and additional documents, correspondence, and evidence, in reply to the case, documents, correspondence, and evidence, so presented by the other Party.

The Arbitrators may, however, extend the time for delivering such counter case, documents, correspondence, and evidence, when, in their judgment, it becomes necessary, in consequence of the distance of the place from which the evidence to be presented is to be procured.

If in the case submitted to the Arbitrators either Party shall have specified or alluded to any report or document in its own exclusive possession without annexing a copy; such Party shall be bound, if the other Party thinks proper to apply for it, to furnish that Party with a copy thereof; and either Party may call upon the other, through the Arbitrators, to produce the originals or certified copies of any papers adduced as evidence, giving in each instance such reasonable notice as the Arbitrators may require.

ARTICLE V.

It shall be the duty of the Agent of each Party, within two months after the expiration of the time limited for the delivery of the counter case on both sides, to deliver in duplicate to each of the said Arbitrators and to the Agent of the other Party a written or printed argument showing the points and referring to the evidence upon which his Government relies; and the Arbitrators may, if they desire further elucidation with regard to any point, require a written or printed statement or argument or oral argument by counsel upon it; but in such case the other Party shall be entitled to reply either orally or in writing, as the case may be.

ARTICLE VI.

In deciding the matters submitted to the Arbitrators they shall be governed by the following three rules, which are agreed upon by the High Contracting Parties as rules to be taken as applicable to the case, and by such principles of international law not inconsistent therewith as the Arbitrators shall determine to have been applicable to the case :--

RULES.

A neutral Government is bound-

First :—To use due diligence to prevent the fitting out, arming, or equipping, within its jurisdiction, of any vessel which it has reasonable ground to believe is intended to cruise or to carry on war against a Power with which it is at peace ; and also to use like diligence to prevent the departure from its jurisdiction of any vessel intended to cruise or carry on war as above, such vessel having been specially adapted, in whole or in part, within such jurisdiction, to warlike use.

Secondly :----Not to permit or suffer either belligerent to make use of its ports or waters as the base of naval operations against the other, or for the purpose of the renewal or augmentation of military supplies or arms, or the recruitment of men. Thirdly :—To exercise due diligence in its own ports and waters, and, as to all persons within its jurisdiction, to prevent any violation of the foregoing obligations and duties.

Her Britannic Majesty has commanded her High Commissioners and Plenipotentiaries to declare that Her Majesty's Government cannot assent to the foregoing rules as a statement of principles of international law which were in force at the time when the claims mentioned in Article I arose, but that Her Majesty's Government, in order to evince its desire of strengthening the friendly relations between the two countries and of making satisfactory provision for the future, agrees that, in deciding the questions between the two countries arising out of those claims, the Arbitrators should assume that Her Majesty's Government had undertaken to act upon the principles set forth in these rules.

And the High Contracting Parties agree to observe these rules as between themselves in future, and to bring them to the knowledge of other maritime Powers and to invite them to accede to them.

ARTICLE VII.

The decision of the Tribunal shall, if possible, be made within three months from the close of the argument on both sides.

It shall be made in writing and dated, and shall be signed by the Abitrators who may assent to it.

The said Tribunal shall first determine as to each vessel separately whether Great Britain has, by any act or omission, failed to fulfil any of the duties set forth in the foregoing three rules, or recognized by the principles of international law not inconsistent with such rules, and shall certify such fact as to each of the said vessels. In case tho Tribunal find that Great Britain has failed to fulfil any duty or duties as aforesaid, it may, if it think proper, proceed to award a sum in gross to be paid by Great Britain to the United States for all the claims referred to it; and in such case the gross sum so awarded shall be paid in coin by the Government of Great Britain to the Government of the United States at Washington within twelve mouths after the date of the award.

The award shall be in duplicate, one copy whereof shall be delivered to the Agent of Great Britain for his Government, and the other copy shall be delivered to the Agent of the United States for his Government.

ARTICLE VIII.

Each Government shall pay its own Agent and provide for the proper remuneration of the Counsel employed by it, and of the Arbitrator appointed by it, and for the expense of preparing and submitting its case to the Tribunal. All other expenses connected with the arbitration shall be defrayed by the two Governments in equal moieties.

ARTICLE IX.

The Arbitrators shall keep an accurate record of their proceedings, and may appoint and employ the necessary officers to assist them.

ARTICLE X.

In case the Iribunal finds that Great Britain has failed to fulfil any duty or duties as aforesaid, and does not award a sum in gross, the High Contracting Parties agree that a Board of Assessors shall be appointed to ascertain and determine what claims are valid, and what amount or amounts shall be paid by Great Britain to the United States on account of the liability arising from such failure as to each vessel, according to the extent of such liability as decided by the Arbitrators.

18 - 5

33

The Board of Assessors shall be constituted as follows : One member thereof shall be named by Her Britannic Majesty, one member thereof shall be named by the President of the United States, and one member thereof shall be named by the Representative at Washington of His Majesty the King of Italy ; and in case of a vacancy happening from any cause, it shall be filled in the same manner in which the original appointment was made.

As soon as possible after such nominations the Board of Assessors shall be organized in Washington with power to hold their sittings there, or in New York, or in Boston. The members thereof shall severally subscribe a solemn declaration that they will impartially and carefully examine and decide, to the best of their judgment and according to justice and equity, all matters submitted to them, and shall forthwith proceed, under such rules and regulations as they may prescribe, to the investigation of the claims which shall be presented to them by the Government of the United States, and shall examine and decide upon them in such order and manner as they may think proper, but upon such evidence or information only as shall be furnished by or on behalf of the Governments of Great Britain and of the United States respectively. They shall be bound to hear on each separate claim, if required, one person on behalf of each Government as Counsel or Agent. A majority of the Assessors in each case shall be sufficient for a decision.

The decision of the Assessors shall be given upon each claim in writing, and shall be signed by them respectively, and dated.

Every claim shall be presented to the Assessors within six months from the day of their first meeting; but they may, for good cause shown, extend the time for the presentation of any claim to a further period not exceeding three months.

The Assessors shall report to each Government, at or before the expiration of one year from the date of their first meeting, the amount of claims decided by them up to the date of such report; if further claims then remain undecided, they shall make a further report at or before the expiration of two years from the date of such first meeting; and in case any claims remain undetermined at that time, they shall make a final report within a further period of six months.

The report or reports shall be made in duplicate, and one copy thereof shall be delivered to the Representative of Her Britannic Majesty at Washington, and one copy thereof to the Secretary of State of the United States.

All sums of money which may be awarded under this Article shall be payable at Washington, in coin, within twelve months after the delivery of each report.

The Board of Assessors may employ such clerks as they shall think necessary.

The expenses of the Board of Assessors shall be borne eqally by the two Governments, and paid from time to time, as may be found expedient, on the production of accounts certified by the Board. The remuneration of the Assessors shall also be paid by the two Governments in equal moieties in a similar manner.

ARTICLE XI.

The High Contracting Parties engage to consider the result of the proceedings of the Tribunal of Arbitration and of the Board of Assessors, should such Board be appointed, as a full, perfect, and final settlement of all the claims hereinbefore referred to; and further engage that every such claim, whether the same may or may not have been presented to the notice of, made, preferred, or laid before the Tribunal or Board, shall, from and after the conclusion of the proceedings of the Tribunal or Board, be considered and treated as finally settled, barred, and thenceforth inadmissible.

ARTICLE XII.

The High Contracting Parties agree that all claims on the part of Corporations, Companies, or private individuals, citizens of the United States, upon the Government of Her Britannic Majesty, arising out of acts committed against the persons or property of citizens of the United States during the period between the 13th April, 1861, and the 9th of April, 1865, inclusive, not being claims growing out of the acts of the vessels referred to in Article I of this Treaty; and all claims, with the like exception, on the part of Corporations, Companies, or private in lividuals, subjects of Her Britannic Majesty, upon the Government of the United States, arising out of acts committed against the persons or property of subjects of Her Britannic Majesty during the same period, which may have been presented to either Government for its interposition with the other, and which yet remain unsettled, as well as any other such claims which may be presented within the time specified in Article XIV of this Treaty, shall be referred to three Commissioners, to be appointed in the following manner, that is to say :- One Commissioner shall be named by Her Britannic Majesty, one by the President of the United States, and a third by Her Britannic Majesty and the President of the United States conjointly; and in case the third Commissioner shall not have been so named within a period of three months from the date of the exchange of the ratifications of this Treaty, then the third Commissioner shall be named by the Representative at Washington of His Majesty the King of Spain. In case of the death, absence, or incapacity of any Commissioner, or in the event of any Commissioner omitting or ceasing to act, the vacancy shall be filled in the manner hereinbefore provided for making the original appintment, the period of three months in case of such substitution being calculated from the date of the happening of the vacancy.

The Commissioners so named, shall meet at Washington at the earliest convenien period after they have been respectively named; and shall, before proceeding to any business, make and subscribe a solemn declaration that they will impartially and carefully examine and decide, to the best of their judgment, and according to justice and equity, all such claims as shall be laid before them on the part of the Governments of Her Britannic Majesty, and of the United States, repsectively; and such declaration shall be entered on the record of their proceedings.

ARTICLE XIII.

The Commissioner shall then forthwith proceed to the investigation of the claims which shall be presented to them. They shall investigate and decide such claims in such order and such manner as they may think proper, but upon such evidence or information only as shall be furnished by or on behalf of their respective Governments. They shall be bound to receive and consider all written documents or statements which may be presented to them by or on behalf of their respective Governments in support of, or in answer to any claim ; and to hear, if required, one person on each side, on behalf of each Government, as Counsel or Agent for such Government, on each and every separate claim. A majority of the Commissioners shall be sufficient for an award in each case The award shall be given upon each claim in writing, and shall be signed by the Comnissioners assenting to it. It shall be competent for each Government to name one person to attend the Commissioners as its Agent to present and support claims on its behalf, and to answer claims made upon it, and to represent it generally in all matters connected with the investigation and decision thereof.

The High Contracting Parties hereby engage to consider the decision of the Commissioners as absolutely final and conclusive upon each claim decided upon by them, and to give full effect to such decisions without any objection, evasion, or delay whatsoever.

ARTICLE XIV.

Every claim shall be presented to the Commissioners within six months from the day of their first meeting, unless in any case where reasons for delay shall be established to the satisfaction of the Commissioners; and then, and in any such case, the period for presenting the claim may be extended by them to any time not exceeding three months longer. The Commissioners shall be bound to examine and decide upon every claim within two years from the day of their first meeting. It shall be competent for the Commissioners to decide in each case whether any claim has or has not been duly made, preferred, and laid before them, either wholly or to any and what extent, according to the true intent and meaning of this Treaty.

ARTICLE XV.

All sums of money which may be awarded by the Commissioners on account of any claim shall be paid by the one Government to the other, as the case may be, within twelve months after the date of the final award, without interest, and without any deduction save as specified in Article XVI of this Treaty.

ARTICLE XVI.

The Commissioners shall keep an accurate record, and correct minutes or notes of all their proceedings, with the dates thereot, and may appoint and employ a Secretary and any other necessary officer or officers, to assist them in the transaction of the business which may come before them.

Each Government shall pay its own Commissioner and Agent or Counsel. All other expenses shall be defrayed by the two Governments in equal moieties.

The whole expenses of the Commission, including contingent expenses, shall be defrayed by a rateable deduction on the amount of the sums awarded by the Commissioners; provided always that such deduction shall not exceed the rate of 5 per cent. on the sums so awarded.

ARTICLE XVII.

The High Contracting Parties engage to consider the result of the proceedings of this Commission as a full, perfect, and final settlement of all such claims as are mentioned in Article XII of this Treaty upon either Government; and further engage that every such claim, whether or not the same may have been presented to the notice of, "nade, preferred, or laid before the said Commission, shall, from and after the conclusion of the proceedings of the said Commission, be considered and treated as finally settled, barred, and thenceforth inadmissible.

ARTICLE XVIII.

It is agreed by the High Contracting Parties that, in addition to the liberty secured to the United States' fishermen by the Convention between Great Britain and the United States, signed at London on the 20th day of October, 1818, of taking, curing, and drying fish on certain coasts of the British North American Colonies therein defined, the inhabitants of the United States shall have, in common with the subjects of Her Britannic Majesty, the liberty, for the term of years mentioned in Article XXXIII of this Treaty, to take fish of every kind, except shell-fish, on the sea-coasts and shores, and in the bays, harbours, and creeks, of the Provinces of Quebec Nova Scotia and New Brunswick, and the Colony of Prince Edward Island, and of the shore, with permission to land upon the said coasts and shores and islands, and also upon the Magdalen Islands, for the purpose of drying their nets and curing their fish; provided that, in so doing, they do not interfere with the rights of private property, or with British fishermen, in the peaceable use of any part of the said coasts in their occupancy for the same purpose.

It is understood that the above-mentioned liberty applies solely to the sea fishery, and that the salmon and shad fisheries, and all other fisheries in rivers and the mouths of rivers, are hereby reserved exclusively for British fishermen.

ARTICLE XIX.

It is agreed by the High Contracting Parties that British subjects shall have, in common with the citizens of the United States, the liberty, for the term of years mentioned in Article XXXIII of this Treaty, to take fish of every kind, except shell-fish, on the eastern sea-coasts and shores of the United States north of the thirty-ninth parallel of north latitude, and on the shores of the several islands thereunto adjacent, and in the bays, harbours, and creeks of the said sea-coasts and shores of the United States and of the said islands, without being restricted to any distance from the shore, with permission to land upon the said coasts of the United States and of the islands aforesaid, for the purpose of drying their nets and curing their fish; provided that, in so doing, they do not interfere with the rights of private property, or with the fishermen of the United States, in the peaceable use of any part of the said coasts in their occupancy for the same purpose.

It is understood that the above mentioned liberty applies solely to the sea fishery, and that salmon and shad fisheries, and all other fisheries in rivers and mouths of rivers are hereby reserved exclusively for fishermen of the United States.

ARTICLE XX.

It is agreed that the places designated by the Commissioners appointed under the first Article of the Treaty between Great Britain and the United States, concluded at Washington on the 5th of June, 1854, upon the coasts of Her Britannic Majesty's dominions, and the United States as places reserved from the common right of fishing under that Treaty, shall be regarded as in like manner reserved from the common right of fishing under the preceding Articles. In case any question should arise between the Governments of Her Britannic Majesty and of the United States as to the common right of fishing in places not thus designated as reserved, it is agreed that a Commission shall be appointed to designate such places, and shall be constituted in the same manner, and have the same powers, duties, and authority as the Commission appointed under the said first Article of the Treaty of the 5th of June, 1854.

ARTICLE XXI.

It is agreed that, for the term of years mentioned in Article XXXIII of this Treaty, fish-oil and fish of all kinds, (except fish of the inland lakes, and of the rivers falling into them, and except fish preserved in oil,) being the produce of the fisheries of the Dominion of Canada, or of Prince Edward's Island, or of the United States, shall be admitted nto each country, respectively, free of duty.

ARTICLE XXII.

Inasmuch as it is asserted by the Government of Her Britannic Majesty that the privileges accorded to the citizens of the United States under Article XVIII of this Treaty are of greater value than those accorded by Articles XIX and XXI of this Treaty to the subjects of Her Britannic Majesty, and this assertion is hot admitted by the Government of the United States; it is further agreed that Commissioners shall be appointed to determine, having regard to the privileges accorded by the United States to the subjects of Her Britannic Majesty, as stated in Articles XIX and XXI of this Treaty, the amount of any compensation which, in their opinion, ought to be paid by the Government of the United States to the Government of Her Britannic Majesty in return for the privileges accorded to the citizens of the United States under Article XVIII of this Treaty; and that any sum of money which the said Commissioners may so award shall be paid by the United States Government, in a gross sum, within twelve months after such award shall have been given.

ARTICLE XXIII.

The Commissioners referred to in the preceding Article shall be appointed in the following manner, that is to say : One Commissioner shall be named by Her Britannic Majesty, one by the President of the United States, and a third by Her Britannic Majesty and the President of the United States conjointly; and in case the third Commissioner shall not have been so named within a period of three months from the date when this Article shall take effect, then the third Commissioner shall be named by the Representative at London of His Majesty the Emperor of Austria and King of Hungary. In case of the death, absence, or incapacity of any Commissioner, or in the event of any Commissioner omitting or ceasing to act, the vacancy shall be filled in the manner hereinbefore provided for making the original appointment, the period of three months in case of such substitution being calculated from the date of the happening of the vacancy.

The Commissioners so named shall meet in the city of Halifax, in the Province of Nova Scotia, at the earliest convenient period after they have been respectively named, and shall, before proceeding to any business, make and subscribe a solemn declaration that they will impartially and carefully examine and decide the matters referred to them to the best of their judgment, and according to justice and equity; and such declaration shall be entered on the record of their proceedings.

Each of the High Contracting Parties shall also name one person to attend the Commission as its agent, to represent it generally in all matters connected with the Commission.

ARTICLE XXIV.

The proceedings shall be conducted in such order as the Commissioners appointed under Articles XXII and XXIII of this Treaty shall determine. They shall be bound to receive such oral or written testimony as either Government may present. If either Party shall offer oral testimony, the other Party shall have the right of cross-examination, under such rules as the Commissioners shall prescribe.

If in the case submitted to the Commissioners either Party shall have specified or alluded to any report or document in its own exclusive possession, without annexing a copy, such Party shall be bound, if the other Party thinks proper to apply for it, to furnish that Party with a copy thereof; and either Party may call upon the other, through the Commissioners, to produce the originals or certified copies of any papers adduced as evidence, giving in each instance such reasonable notice as the Commissioners may require.

The case on either side shall be closed within a period of six months from the date of the organization of the Commission, and the Commissioners shall be requested to give their award as soon as possible thereafter. The aforesaid period of six months may be extended for three months in case of a vacancy occurring among the Commissioners under the circumstances contemplated in Article XXIII of this Treaty.

ARTICLE XXV.

The Commissioners shall keep an accurate record and correct Minutes or notes of all their proceedings, with the dates thereof, and may appoint and employ a Secretary and any other necessary officer or officers to assist them in the transaction of the business which may come before them.

Each of the High Contracting Parties shall pay its own Commissioner and Agent or Counsel; all other expenses shall be defrayed by the two Governments in equal moieties.

ARTICLE XXVI.

The navigation of the River St. Lawrence, ascending and descending, from the fortyfifth parallel of north latitude, where it ceases to form the boundary between the two countries, from, to, and into the sea, shall for ever remain free and open for the purposes of commerce to the citizens of the United States, subject to any laws and regulations of Great Britain, or of the Dominion of Canada, not inconsistent with such privilege of free navigation.

The navigation of the Rivers Yukon, Porcupine, and Stikine, ascending and descending from, to, and into the sea, shall for ever remain free and open for the purposes of commerce to the subjects of Her Britannic Majesty and to the citizens of the United States, subject to any laws and regulations of either country within its own territory, not inconsistent with such privilege of free navigation.

ARTICLE XXVII.

The Government of Her Britannic Majesty engages to urge upon the Government of the Dominion of Canada to secure to the citizens of the United States the use of the Welland, St. Lawrence, and other canals in the Dominion on terms of equality with the inhabitants of the Dominion; and the Government of the United States engages that the subjects of Her Britannic Majesty shall enjoy the use of the St. Clair Flats Canal on terms of equality with the inhabitants of the United States, and further engages to urge upon the State Governments to secure to the subjects of Her Britannic Majesty the use of the several State canals connected with the navigation of the lakes or rivers traversed by or contiguous to the boundary line between the possessions of the High Contracting Parties, on terms of equality with the inhabitants of the United States.

ARTICLE XXVIII.

The navigation of Lake Michigan shall also, for the term of years mentioned in Article XXXIII of this Treaty, be free and open for the purposes of commerce to the subjects of Her Britannic Majesty, subject to any laws and regulations of the United States or of the States bordering thereon not inconsistent with such privilege of free navigation.

ARTICLE XXIX.

It is agreed that, for the term of years mentioned in Article XXXIII of this Treaty, goods, wares, or merchandize arriving at the ports of New York, Boston, and Portland, and any other ports in the United States which have been or may from time to time be specially designated by the President of the United States, and destined for Her Britannic Majesty's Possessions in North America, may be entered at the proper Customs-house and conveyed in transit, without the payment of duties, through the territory of the United States, under such rules, regulations, and conditions for the protection of the revenue as the Government of the United States may from time to time prescribe ; and, under like rules, regulations, and conditions, goods, wares, or merchandize may be conveyed in transit, without the payment of duties, from such possessions through the territory of the United States for export from the said ports of the United States.

It is further agreed that for the like period goods, wares, or merchandize arriving at any of the ports of Her Britannic Majesty's Possessions in North America and destined for the United States may be entered at the proper Custom-house and conveyed in transit, without the payment of duties, through the said Possessions, under such rules and regulations, and conditions for the protection of the revenue, as the Governments of the said Possessions may from time to time prescribe; and under like rules, regulations, and conditions, goods, wares, or merchandize may be conveyed in transit, without payment of duties, from the United States through the said Possessions to other places in the United States, or for export from ports in the said Possessions.

ARTICLE XXX.

It is agreed that, for the term of years mentioned in Article XXXIII of this Treaty, subjects of Her Britannic Majesty may carry in British vessels, without payment of duty, goods, wares, or merchandize from one port or place within the territory of the United States upon the St. Lawrence, the Great Lakes, and the rivers connecting the the same, to another port or place within the territory of the United States as aforesaid : Provided, that a portion of such transportation is made through the Dominion of Canada by land carriage and in bond, under such rules and regulations as may be agreed upon between the Government of Her Britannic Majesty and the Government of the United States.

Citizens of the United States may for the like period carry in United States' vessels, without payment of duty, goods, wares, or merchandize from one port or place within the Possessions of Her Britannic Majesty in North America, to another port or place within the said Possessions : Provided, that a portion of such transportation is made through the territory of the United States by land carriage and in bond, under such rules and regulations as may be agreed upon between the Government of Her Britannic Majesty and the Government of the United States.

The Government of the United States further engages not to impose any export duties on goods, wares, or merchandize carried under this Article through the territory of the United States ; and Her Majesty's Government engages to urge the Parliament of the Dominion of Canada and the Legislatures of the other Colonies not to impose any export duties on goods, wares, or merchandize carried under this Article ; and the Government of the United States may, in case such export duties are imposed by the Dominion of Canada, suspend, during the period that such duties are imposed, the right of carrying granted under this Article in favour of the subjects of Her Britannic Majesty.

The Government of the United States may suspend the right of carrying granted in favour of the subjects of Her Britannic Majesty under this Article in case the Dominion of Canada should at any time deprive the citizens of the United States of the use of the canals in the said Dominion on terms of equality with the inhabitants of the Dominion, as provided in Article XXVII.

ARTICLE XXXI.

The Government of Her Britannic Majesty further engages to urge upon the Parliament of the Dominion of Canada and the Legislature of New Brunswick, that no export duty, or other duty, shall be levied on lumber or timber of any kind cut on that portion of the American territory in the State of Maine watered by the river St. John and its tributaries, and floated down that river to the sea, when the same is shipped to the United States from the province of New Brunswick. And, in case any such export or other duty continues to be levied after the expiration of one year from the date of the exchange of the ratifications of this Treaty, it is agreed that the Government of the United States may suspend the right of carrying herein before granted under Article XXX of this Treaty for such period as such export or other duty may be levied.

ARTICLE XXXII.

It is further agreed that the provisions and stipulations of Articles XVIII to XXV of this Treaty, inclusive, shall extend to the Colony of Newfoundland, so far as they are applicable. But if the Imperial Parliament, the Legislature of Newfoundland, or the Congress of the United States, shall not embrace the Colony of Newfoundland in their laws enacted for carrying the foregoing Articles into effect, then this Article shall be of no effect; but the omission to make provision by law to give it effect, by either of the Legislative Bodies aforesaid, shall not in any way impair any other Articles of this Treaty.

ARTICLE XXXIII.

The foregoing Articles XVIII to XXV inclusive, and Article XXX of this Treaty shall take effect as soon as the laws required to carry them into operation shall have been passed by the Imperial Parliament of Great Britain, by the Parliament of Canada, and by the Legislature of Prince Edward Island on the one hand, and by the Congress of the United States on the other. Such assent having been given, the said Articles shall remain in force for the period of ten years from the date at which they may come into operation, and further, until the expiration of two years after either of the High Contracting Parties shall have given notice to the other of its wish to terminate the same ; each of the High Contracting Parties being at liberty to give such notice to the other at the end of the said period of ten years or at any time afterward.

ARTICLE XXXIV.

Whereas it was stipulated by Article I of the Treaty concluded at Washington on the 15th of June, 1846, between Her Britannic Majesty and the United States, that the line of boundary between the territories of Her Britannic Majesty, and those of the United States, from the point on the forty-ninth parallel of north latitude up to which it had already been ascertained, should be continued westward along the said parallel of north latitude "to the middle of the channel which separates the continent from Vancouver's Island, and thence southerly, through the middle of the said channel and of Fuca Straits. to the Pacific Ocean;" and whereas the Commissioners appointed by the two High Contracting Parties to determine that portion of the boundary which runs southerly through the middle of the channel aforesaid were unable to agree upon the same ; and whereas the Government of Her Britannic Majesty claims that such boundary line should, under the terms of the Treaty above recited, be run through the Rosario Straits, and the Government of the United States claims that if should be run through the Canal de Haro. it is agreed that the respective claims of the Government of Her Britannic Majesty and of the Government of the United States shall be submitted to the arbitration and award of His Majesty the Emperor of Germany, who, having regard to the above-mentioned Article of the said Treaty, shall decide thereupon, finally and without appeal, which of those claims is most in accordance with the true interpretation of the Treaty of June 15, 1846.

ARTICLE XXXV.

The award of His Majesty the Emperor of Germany shall be considered as absolutely final and conclusive; and full effect shall be given to such award without any objection, evasion, or delay whatsoever. Such decision shall be given in writing and dated; it shall be in whatsoever form His Majesty may choose to adopt; it shall be delivered to the Representatives or other public Agents of Great Britain and of the United States respectively, who may be actually at Berlin, and shall be considered as operative from the day of the date of the delivery thereof.

ARTICLE XXXVI.

The written or printed case of each of the two Parties, accompanied by the evidence offered in support of the same, shall be laid before His Majesty the Emperor of Germany within six months from the date of the exchange of the ratifications of this Treaty, and a copy of such case and evidence shall be communicated by each Party to the other, through their respective Representatives at Berlin.

The High contracting Parties may include in the evidence to be considered by the Arbitrator, such documents, official correspondence, and other official or public statements bearing on the subject of the reference as they may consider necessary to the support of their respective cases.

After the written or printed case shall have been communicated by each Party to the other, each Party shall have the power of drawing up and laying before the Arbitrator a second and definitive statement, if it think fit to do so, in reply to the case of the other Party so communicated, which definitive statement shall be so laid before the Arbitrator, and also be mutually communicated in the same manner as aforesaid, by each

18-6

party to the other, within six months from the date of laying the first statement of the case before the Arbitrator.

ARTICLE XXXVII.

If, in the case submitted to the Arbitrator, either Party shall specify or allude to any report or document in its own exclusive possession without annexing a copy, such Party shall be bound, if the other Party thinks proper to apply for it, to furnish that Party with a copy thereof, and either party may call upon the other, through the Arbitrator, to produce the originals or certified copies of any papers adduced as evidence, giving in each instance such reasonable notice as the Arbitrator may require. And if the Arbitrator should desire further elucidation or evidence with regard to any point contained in the statements laid before him, he shall be at liberty to require it from either Party, and he shall be at liberty to hear one counsel or agent for each Party, in relation to any matter, and at such time, and in such manner, as he may think fit.

ARTICLE XXXVIII.

The Representatives, or other public Agents of Great Britain and of the United States at Berlin respectively, shall be considered as the Agents of their respective Governments to conduct their cases before the Arbitrator, who shall be requested to address all his communications, and give all his notices, to such Representatives or other public Agents, who shall represent their respective Governments generally in all matters connected with the Arbitration.

ARTICLE XXXIX.

It shall be competent to the Arbitrator to proceed in the said Arbitration, and all matters relating therto, as and when he shall see fit, either in person, or by a person or persons named by him for that purpose, either in the presence or absence of either or both Agents, and either orally or by written discussion, or otherwise.

ARTICLE XL.

The Arbitrator may, if he think fit, appoint a Secretary or Clerk, for the purposes of the proposed arbitration, at such rate of remuneration as he shall think proper. This, and all other expenses of and connected with the said arbitration, shall be provided for as hereinafter stipulated.

ARTICLE XLI.

The Arbitrator shall be requested to deliver, together with his award, an account of all the costs and expenses which he may have been put to, in relation to this matter, which shall forthwith be repaid by the two Governments in equal moieties.

ABTICLE XLII.

The Arbitrator shall be requested to give his award in writing as early as convenient after the whole case on each side shall have been laid before him, and to deliver one copy thereof to each of the said Agents.

ARTICLE XLIII.

The present Treaty shall be duly ratified by Her Britannic Majesty, and by the President of the United States of America, by and with the advice and consent of the Senate thereof, and the ratifications shall be exchanged either at London or at Washington within six months from the date hereof, or earlier if possible.

In faith whereof, we, the respective Plenipotentiaries, have signed this Treaty, and have hereunto affixed our seals.

Done in duplicate at Washington, the eighth day of May, in the year of Our Lord one thousand eight hundred and seventy-one.

FOREIGN OFFICE,

May 26th, 1871.

E. HAMMOND.

SIR,—I am directed by Earl Granville to transmit to you, for the information of the Earl of Kimberley, a copy of a despatch from Sir E. Thornton, enclosing copies of his correspondence with Mr. Fish relative to the immediate application of the stipulations of the Fishery Treaty pending its ratification.

I am, &c.,

The Under Secretary of State, Colonial Office.

Sir E. Thornton to Earl Granville.

(Copy.—No. 155.)

WASHINGTON, May 12th, 1871.

My Lond,—With reference to my despatches, Nos. 146 and 147, of the 8th instant, I have the honor to enclose copy of a note addressed to me by Mr. Fish, expressing the hope entertained by the Government of the United States that Her Majesty's Government will urge the Governments of the Dominion of Canada, of Prince Edward Island, and of Newfoundland; to consent that American fishermen should be allowed to fish in the waters of the above Colonies during the coming season.

Your Lordship will observe that at the beginning of the second paragraph of the draft of the note which I forwarded in my despatch, No. 146, the following words have been added: "The Government of the United States would be prepared at the same time "to admit British subjects to the right of fishing in the waters of the United States "specified in the Treaty"; but I also enclose copy of my answer to Mr. Fish, and hope your Lordship will find that his note, with the addition above mentioned and my answer, are in accordance with the terms your Lordship's telegram of 9th instant, transmitted through Earl de Grey.

His Lordship has seen both the enclosed notes and approves of their contents.

I have, &c.,

EDWARD THORNTON.

The Earl Granville, K.C.G., &c., &c., &c.

Sessional Papers (No. 18.)

(Copy.)

Mr. Fish to Sir E. Thornton.

DEPARTMENT OF STATE, WASHINGTON, May 8th, 1871.

SIR,-As several articles of the Treaty which has been signed this day, relating to the admission of citizens of the United States to fish within the Territorial Waters of Her Britannic Majesty on the coasts of Canada, Prince Edward Island, and Newfoundland, cannot come into full operation until the legislation contemplated in that instrument shall have taken place, and as it seems to be in accordance with the interests of both Governments, in furtherance of the objects and spirit of the Treaty, that the citizens of the United States should have the enjoyment of that liberty during the present season, I am directed by the President to express to you his hope that Her Majesty's Government will be prepared, in the event of the ratification of the Treaty, to make on their own behalf, and to urge the Governments of the Dominion of Canada, of Prince Edward Island and of Newfoundland, to make for the season referred to within their respective jurisdictions such relaxations and regulations as it may respectively be in their power to adopt, with a view to the admission of American fishermen to the liberty which it is proposed to secure to them by the Treaty. The Government of the United States would be prepared at the same time to admit British subjects to the right of fishing in the waters of the United States specified in the Treaty; but as the admission into the United States, free of duty, of any articles which are by law subject to duty cannot be allowed without the sanction of Congress, the President will, in case the above suggestion meets with the views of the British Government, recommend and urge upon Congress, at their next Session, that any duties which may have been collected on and after the first day of July next, on fish-oil and fish (except fish of the inland Lakes and of the Rivers falling into the same, and except fish preserved in oil) the produce of the fisheries of the Dominion of Canada and of Prince Edward Island, shall be returned and refunded to parties paying the same, if a similar arrangement is made with respect to the admission into the British Possessions of fish-oil and fish (with the like exception) being the produce of the Fisheries of the United States.

I have, &c.,

HAMILTON FISH.

Sir E. Thornton, K.C.B., &c., &c., &c.

(Copy.)

Sir E. Thornton to Mr. Fish.

WASHINGTON,

May 9th, 1871.

SIR,—I have the honor to acknowledge the receipt of your note of yesterday's dates and to inform you in reply that I have been authorized by Earl Granville to state that in the event of the ratification of the Treaty signed yesterday, Her Majesty's Government will be prepared to recommend to the Governments of the Dominion of Canada, of Prince Edward Island, and of Newfoundland, that the provisional arrangement proposed in your note above mentioned with regard to the right of fishing by United States citizens on the coasts of those British possessions, and by British subjects in the waters of the United States, described in Article XIX of the Treaty, shall take effect during the coming season, on the understanding that the ultimate decision of this question must rest with the above mentioned Colonial Governments, who would be asked to grant the immediate and certain right of fishing within the territorial waters of those colonies, whilst the return of the import duties on fish from the 1st of July next, promised by the United States, is prospective and contingent on the action of Congress.

I have, &c.,

EDWARD THORNTON,

The Honorable Hamilton Fish,

(Copy-Canada-No. 445.)

The Secretary of State for the Colonies to the Governor General.

DOWNING STREET,

20th June, 1871.

My LORD,—In accordance with the strong wish expressed by the Dominion Government, that a representation should be made to the United States with reference to the losses inflicted on Canada by the Fenian raids; Her Majesty's Government instructed the British High Commissioners to bring the claims arising out of those raids before the Joint High Commission.

Your Lordship will observe from the Protocols of Conferences, copies of which were transmitted to you in my despatch No. 444 of the 17th inst., that the American Commissioners declined to entertain the proposal made by the Commissioners to include these claims in the Treaty.

Her Majesty's Government were well aware of the serious difficulties in the way of settling this question, and they could not, therefore, feel surprised at this result. At the same time, it was with much regret that they acquiesced in the omission of these claims from the general settlement of outstanding questions between Great Britain and the United States.

But it seemed to them evident that the British Commissioners were right in thinking that there was no reasonable probability that by further pressing the point an agreement would be come to upon it with the American Commissioners, and when the choice lay between the settlement of all the other differences between the two countries on terms which Her Majesty's Government believed to be honorable to both, and beneficial alike to Canada and to the rest of the Empire, and the frustration of all hope of bringing the negotiations to a satisfactory issue, they could not hesitate as to the course which it was their duty to take.

> I have, &c., (Signed) KIMBERLEY.

Governor General, The Right Honorable Lord Lisgar, G.C.B., G.C.M.G., &c., &c., &c.

(Copy-No. 149.)

The Governor General to the Secretary of State for the Colonies.

Cacouna,

August 15th, 1871.

My LORD,—With reference to Your Lordship's despatch No. 444, of the 17th June, which I duly referred to the Privy Council of the Dominion; I have the honor to transmit herewith the report of a Committee of that body, containing their views on the subject of the Treaty of Washington, in so far as it affects the interests of Canada.

I have, &c.,

(Signed) LISGAR.

The Right Honorable, The Earl of Kimberley, &c., &c., &c.

45

(No. 444.)

Copy of a Report of a Committee of the Privy Council, dated 28th July, 1871, submitted to His Excellency the Governor General.

The Committee of the Privy Council have had under their consideration the Earl of Kimberley's despatch to Your Excellency, dated the 17th June ult., transmitting copies of the Treaty signed at Washington on the 8th May last, by the Joint High Commissioners, and which has since been ratified by Her Majesty, and by the United States of America; of the instructions to Her Majesty's High Commissioners, and of the No. 445. protocols of the Conferences held by the Commission; and likewise the Earl of Kimberley's despatch of the 20th June ultimo, explaining the failure of Her Majesty's Government to obtain the consideration by the United States Commissioners of the claims of Canada for the losses sustained owing to the Fenian raids of 1866 and 1870. The Committee of the Privy Council have not failed to give their anxious consideration to the important subject discussed in the Earl of Kimberley's despatches, and they feel assured that they will consult the best interests of the Empire, by stating frankly for the information of Her Majesty's Government the result of their deliberations, which they believe to be in accordance with public opinion in all parts of the Dominion. The Committee of the Privy Council readily admit that Canada is deeply interested in the maintenance of cordial relations between the Republic of the United States and the British Empire, and they would therefore have been prepared without hesitation to recommend the Canadian Parliament to co-operate in procuring an amicable settlement of all differences likely to endanger the good understanding between the two Countries. For such an object they would not have hesitated to recommend the concession of some valuable rights, which they have always claimed to enjoy under the Treaty of 1818, and for which, as the Earl of Kimberley observes, Her Majesty's Government have always contended, both Governments having acted on the interpretation given to the Treaty in question by high legal authorities. The general dissatisfaction which the publication of the Treaty of Washington has produced in Canada, and which has been expressed with as much force in the Agricultural Districts of the West as in the Maritime Provinces, arises chiefly from two causes :---

1st. That the principal cause of difference between Canada and the United States has not been removed by the Treaty, but remains a subject for anxiety.

2nd. That a cession of territorial rights of great value has been made to the United States, not only without the previous assent of Canada, but contrary to the expressed wishes of the Canadian Government.

The Committee of the Privy Council will submit their views on both those points for the information of Her Majesty's Government, in the hope that by means of discussion, a more satisfactory understanding between the two Governments may be arrived at. The Earl of Kimberley has referred to the rules laid down in Article VI of the Treaty of Washington, as to the international duties of neutral Governments, as being of special importance to the Dominion, but the Committee of the Privy Council, judging from past experience, are much more apprehensive of misunderstanding, owing to the apparent difference of opinion between Canada and the United States, as to the relative duties of friendly States in a time of peace. It is unnecessary to enter into any lengthened discussion of the conduct of the United States during the last six or seven years, with reference to the organization of considerable numbers of the citizens of those states under the designation of Fenians. The views of the Canadian Government on this subject are in possession of Her Majesty's Government, and it appears from the protocol of conference between the High Commissioners, that the British Commissioners presented the claims of the people of Canada, and were instructed to state that they were regarded by Her Majesty's Government as coming within the class of subjects indicated by Sir Edward Thornton, in his letter of 26th January last, as subjects for the consideration of the Joint High Commissioners. The Earl of Kimberley states that it was with much

regret that Her Majesty's Government acquiesced in the omission of these claims from the general settlement of outstanding questions between Great Britain and the United States, and the Committee of the Privy Council, while fully participating in that regret, must add the fact that this Fenian organization is still in full vigour, and that there seems no reason to hope that the United States Government will perform its duty as a friendly neighbour any better in the future than in the past, leads them to entertain a just apprehension that the outstanding subject of difference with the United States is the one of all others which is of special importance to the Dominion. They must add that they are not aware that during the existence of this Fenian organization, which for nearly seven years has been a cause of irritation and expense to the people of Canada, Her Majesty's Government have made any vigorous effort to induce the Government of the United States to perform its duty to a neighbouring people who earnestly desire to live with them on terms of amity, and who during the civil war loyally performed all the duties of neutrals to the expressed satisfaction of the Government of the United States. On the contrary, while in the opinion of the Government, and the entire people of Canada, the Government of the United States neglected, until much too late, to take the necessary measures to prevent the Fenian invasion of 1870. Her Majesty's Government hastened to acknowledge by cable telegram, the prompt action of the President, and to thank him The Committee of the Privy Council will only add on this painful subject that for it. it is one on which the greatest unanimity exists among all classes of the people throughout the Dominion, and the failure of the High Commissioners to deal with it has been one cause of the prevailing dissatisfaction with the Treaty of Washington. The Committee of the Privy Council will proceed to the consideration of the other subject of dissatisfaction in Canada, viz., the cession to the citizens of the United States of the right to the use of the inshore fisheries, in common with the people of Canada. The Earl of Kimberley after observing that the Canadian Government took the initiative in suggesting that a joint British and American Commission should be appointed with a view to settle the disputes which had arisen as to the interpretation of the Treaty of 1818, proceeds to state, that "the causes of the difficulty lay deeper than any question of inter-" pretation, that the discussion of such points as the correct definition of bays could not " lead to a friendly agreement with the United States," and that "it was necessary there-" fore to endeavour to find an equivalent which the United States might be willing to "give in return for the fishery privileges." In the foregoing opinion of the Earl of Kimberley, the Committee of the Privy Council are unable to concur, and they cannot but regret that no opportunity was afforded them of communicating to Her Majesty's Government their views on a subject of so much importance to Canada prior to the meeting of the Joint High Commission.

When the Canadian Government took the initiative of suggesting the appointment of a Joint British and American Commission they never contemplated the surrender of their territorial rights, and they had no reason to suppose that Her Majesty's Government entertained the sentiments expressed by the Earl of Kimberley in his recent despatch. Had such sentiments been expressed to the delegate appointed by the Canadian Government to confer with His Lordship a few months before the appointment of the Commission it would at least have been in their power to have remonstrated against the cession of the inshore fisheries, and it would, moreover, have prevented any member of the Canadian Government from acting as a member of the Joint High Commission unless on the clear understanding that no such cession should be embodied in the treaty without their consent. The expediency of the cession of a common right to the inshore fisheries has been defended on the ground that such a sacrifice on the part of Canada should be made in the interests of peace.

The Committee of the Privy Council, as they have already observed, would have been prepared to recommend any necessary concession for so desirable an object, but they must remind the Earl of Kimberley that the original proposition of Sir Edward Thornton, as appears by his letter of 26th January was, that "a friendly and complete understanding

should be come to between the two Governments, as to the extent of the rights which belong to the citizens of the United States and Her Majesty's subjects respectively, with reference to the fisheries on the coasts of Her Majesty's Possessions in North America." In his reply, dated 30th January last, Mr. Secretary Fish informs Sir Edward Thornton that the President instructs him to say that "he shares with Her Majesty's Government the appreciation of the importance of a friendly and complete understanding between the two Governments with reference to the subjects specially suggested for the consideration of the proposed Joint High Commission." In accordance with the explicit understanding, thus arrived at between the two Government, Earl Granville issued instructions to Her Majesty's High Commission, which, in the opinion of the Committe of the Privy Council, covered the whole ground of controversy. The United States had never pretended to claim a right on the part of their citizens to fish within three marine miles of the coasts and bays, according to their limited definition of the latter term, and although the right to enjoy the use of the inshore Fisheries might fairly have been made the subject of negotiation, with the view of ascertaining whether any proper equivalents could be found for such a concession, the United States was precluded by the original correspondence from insisting on it as a condition of the Treaty. The abandonment of the exclusive right to the inshore Fisheries without adequate compensation was not therefore necessary in order to come to a satisfactory understanding on the points really at issue. The Committee of the Privy Council forbear from entering into a controversial discussion as to the expediency of trying to influence the United States to adopt a more liberal commercial policy. They must, however, disclaim most emphatically the imputation of desiring to imperil the peace of the whole empire in order to force the American Government to change its commerical policy. They have for a considerable time back ceased to urge the United States to alter their commercial policy; but they are of opinion that when Canada is asked to surrender her inshore Fisheries to foreigners, she is fairly entitled to name the proper equivalent. The Committee of the Privy Council may observe that the opposition of the Government of the United States to reciprocal free trade in the products of the two countries, was just as strong for some years prior to 1854, as it has been since the termination of the Reciprocity Treaty, and that the Treaty of 1854 was obtained chiefly by the vigorous protection of the Fisheries which preceded it, and that but for the conciliatory policy on the subject of the Fisheries, which Her Majesty's Government induced Canada to adopt after the abrogation of the Treaty of 1854, by the United States, it is not improbable that there would have been no difficulty in obtaining its renewal. The Committee of the Privy Council have adverted to the policy of Her Majesty's Government because the Earl of Kimberley has stated that there is no difference in principle between a money payment and "the system of licenses calculated at so many dollars a ton, which was adopted by the Colonial Government for several years after the termination of the Reciprocity Treaty." Reference to the correspondence will prove that the license system was reluctiantly adopted by the Canadian Government, as a substitute for the still more objectionable policy pressed upon it by Her Majesty's Government, it having been clearly understood that the arrangement was of a temporary character. In his despatch of the 3rd March, 1866, Mr. Secretary Cardwell observed :--- "Her Majesty's Government do not feel disinclined to allow the United States, for the season of 1866, the freedom of fishing granted to them in 1854, on the distinct understanding that unless some satisfactory arrangement between the two countries be made during the course of the year this privilege will cease, and all concessions made in the Treaty of 1854, will be liable to be withdrawn." The principle of a money payment for the concession of territorial rights has ever been most repugnant to the feelings of the Canadian people, and has only been entertained in deference to the wishes of the Imperial Government. What the Canadians were willing under the circumstances to accept as an equivalent, was the concession of certain commercial advantages, and it has therefore been most unsatisfactory to them that Her Majesty's Government should have consented to cede the use of the inshore Fisheries to foreigners, for considerations which are deemed wholly inadequate.

The Committee of the Privy Council need not enlarge further on the objectionable

48

features of the treaty, as it bears on Canadian interests. These are admitted by many, who think that Canada should make sacrifices for the general interests of the Empire. The people of Canada, on the other hand, seem unable to comprehend that there is any existing necessity for the cession of the right to use their inshore fisheries without adequate compensation. They have failed to discover that in the settlement of the so called Alabama Claims, which was the most important question in dispute between the two nations, England gained such advantages, as to be required to make further concessions at the expense of Canada, nor is there anything in the Earl of Kimberley's despatch to support such a view of the question. The other parts of the treaty are equally, if not more advantageous to the United States than to Canada, and the fishery question must consequently be considered on its own merits; and if so considered no reason has yet been advanced to induce Canada to cede her inshore fisheries for what Her Majesty's Government have admitted to be an inadequate consideration. Having thus stated their views on the two chief objections to the late Treaty of Washington, the Committee of the Privy Council will proceed to the consideration of the correspondence between Sir Edward Thornton, and Mr. Fish, transmitted in the Earl of Kimberley's despatch of the 17th June, and of His Lordship's remarks thereon. This subject has already been under the consideration of the Committee of the Privy Council, and a report dated the 7th June, embodying their views on the subject was transmitted to the Earl of Kimberley by your Excellency. In his despatch of the 26th June, acknowledging the receipt of that report, the Earl of Kimberley refers to his despatch of the 17th of that month, and "trusts that the Canadian Government will on mature consideration " accede to the proposal of the United States Government, on this subject." The committee of the Privy Council, in expressing their adherence to their report of the 7th June, must add, that inapplicability of the precedent of 1854, under which the action of the Canadian Parliament was anticipated by the Government, to the circumstances now existing, appears to them manifest. The treaty of 1854 was negotiated with the concurrence of the Provincial Governments represented at Washington, and met with the general approbation of the people, whereas the fishery clauses of the late treaty were adopted against the advice of the Canadian Government and have been generally disapproved of in all parts of the Dominion. There can hardly be a doubt that any action on the part of the Canadian Government in anticipation of the decision of Parliament would increase the discontent which now exists. The Committee of the Privy Council request that Your Excellency will communicate to the Earl of Kimberley the views which they entertain on the subject of the Treaty of Washington in so far as it affects the interests of the Dominion.

(Certified)

Wm. H. LEE, Clerk Privy Council,

(Copy.-Canada-No. 561.)

The Secretary of State for the Colonies to the Governor General.

Downing Street, 23rd November, 1871.

Mv LORD,—Her Majesty's Government have not failed to consider with attention the Report of the Committee of the Privy Council of the Dominion on the Treaty of Washington, which was enclosed in Your Lordship's despatch, No. 143, of August 15th. I need scarcely say that Her Majesty's Government regret that your Ministers should have found so much to object to in the provisions of the Treaty, but they remain themselves of opinion, for the reasons which were fully stated in my despatch of June 17 last, that, looked at as a whole, the Treaty is beneficial to the interests of the Dominion.

I shall endeavor, as far as possible, to avoid entering into further discussion of the clauses of the Treaty which apply especially to Canada, as I cannot think that any

18--7

advantage would result from a prolonged controversy between the two Governments as to the details of the Treaty, and the manner in which the negotiation was conducted. There are, however, two or three statements in the Report which it is necessary that I should not leave unnoticed.

The Committee seem to be under the impression that the right to participate in the Colonial Inshore Fisheries has been conceded to the United States without the previous consent of Canada. On this I have to observe that provision has been made for obtaining the assent of Canada in the manner which is strictly in accordance with constitutional usage, namely by stipulating that the fishery articles shall not come into force without the previous assent of the Dominion Parliament. If the Crown were to conclude a similar Treaty as regards the Fisheries of the United Kingdom, the assent of the Imperial Parliament would be reserved in no other manner.

I must also point out that the Committee are under an entire misapprehension in supposing that the cession of the Fishery rights is to be made for "what Her Majesty's "Government have admitted to be an inadequate consideration." If you will refer to my Despatch of June 17th, you will find that it was there stated that "the reciprocal concession of free fishing with free import of fish and fish-oil together with the payment of such a sum of money as may fairly represent the excess of value of the Colonial over the American concession seems to Her Majesty's Government to be an equitable solution of the difficulty."

Lastly, I must advert to the statement that "when the Canadian Government took the initiative in suggesting the appointment of a Joint British and American Commission, they never contemplated the surrender of their territorial rights, and they had no reason to suppose that Her Majesty's Government entertained the sentiments expressed by the Earl of Kimberley in his recent despatch. Had such sentiments been expressed to the delegate appointed by the Canadian Government to confer with His Lordship a few months before the appointment of the Commission, it would at least have been in their power to have remonstrated against the cession of the inshore fisheries, and it would moreover have prevented any member of the Canadian Government from acting as a member of the Joint High Commission, unless on the clear understanding that no such cession should be embodied in the Treaty without their consent."

It is true, no doubt, that in the conversation which I had with Mr. Campbell on the subject of the appointment of a joint British and American Commission, I did not allude to the possibility of such a Commission leading to an arrangement by which United States' fishermen should be admitted to participation in the Colonial inshore fisheries; but I could not then anticipate that an extended negotiation embracing all the questions at issue between Great Britain and the United States would arise out of the proposal to appoint a Commission upon the Fisheries; and when the Joint High Commission was appointed, it was distinctly intimated through Your Lordship to Sir John Macdonald, with reference to the Fisheries, before he accepted the office of Commissioner, that it was impossible for Her Majesty's Government to pledge themselves to a foregone conclusion on any particular point before entering into the negotiation.

I have, &c.,

(Signed,)

KIMBERLEY.

Governor General

The Right Honorable Lord Lisgar, G.C.B., &c., &c. (Copy-No. 13.)

The Governor General to the Secretary of State for the Colonies.

OTTAWA, January 22, 1872.

My LORD,—I have the honor to enclose for Your Lordship's consideration a Minute of the Privy Council of the Dominion, which conveys the reply of that

20th January, 1872. body to Your Lordship's Despatch, No. 561, of the 23rd of November last, and urges the request for an Imperial guarantee to a Canadian loan,

not to exceed four millions, *i.e.*, half the amount to be expended on the railway to the Pacific, and the enlargement of the St. Lawrence Canals.

2. This proposal the Council recommend, as in their opinion, the best mode of adjusting all demands on the score of the Fenian claims, and of surmounting the difficulties in the way of obtaining the consent of the Canadian Parliament to the measures necessary to give effect to the Treaty of Washington.

I have, &c.,

(8igned) LISGAR.

The Right Honorable The Earl of Kimberley.

COPY of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 20th January, 1872.

The Committee of the Privy Council have had under their consideration the Earl of Kimberley's Despatch to Your Excellency, dated the 23rd of November, 1871, on the subject of the Report of the Privy Council dated the 28th of July, and transmitted in Your Excellency's Despatch of the 15th of August. The object of that Report was to explain to Her Majesty's Government that much dissatisfaction prevailed in Canada owing to the absence of all provision in the Freaty of Washington for the settlement of the losses incurred by Canada, in consequence of the raids of citizens of the United States on British Territory, and also owing to the cession of the Canadian fisheries for an inadequate consideration. The Committee of Council were aware, from the Earl of Kimberley's Despatch of the 17th of June, 1871, that Her Majesty's Government were very desirous that the Acts necessary to give effect to the fishery clauses of the Treaty of Washington should be passed by the Canadian Parliament, and they had hoped that some proposition might be made by Her Maiesty's Government, in reply to their Report, that would enable them to propose such measures with a fair prospect of success.

In the Earl of Kimberley's Despatch to Your Excellency, dated 23rd of November, no reference whatever is made to the subject of the Fenian Raids, and with regard to the fishery clauses of the Treaty the only inference to be drawn from the despatch is that the objections raised by the Committee of Council are of very little weight.

The Committee of Council readily admit that further controversial discussion on the points on which differences of opinion unfortunately exist between the two Governments would be unprofitable. It is, however, due both to Her Majesty's Government and to themselves that they should frankly explain to the former the conclusion at which they have arrived on the two questions discussed in their Report of 28th of July last.

They maintain that Canada has a just claim to compensation for the expenses incurred in consequence of the Fenian Raids. It seems unnecessary to support this opinion by further argument.

Although the Committee of Council deem it unnecessary to dwell on the objections which they entertain to the Fishery clauses in the Treaty, they desire to offer an explanation with reference to the Statement in their former Report, to which the Earl of Kimberley has taken exception, and which was to the effect that Her Majesty's Government had ceded the rights of Fishery for what they admitted to be an inadequate consideration.

In the course of the negotiations, the United States Commissioners had offered as an equivalent for the rights of Fishery, to admit Canadian Coal and Salt, free of duty, and Lumber after the 1st of July, 1874. This was deemed both by the Imperial and Canadian Governments an inadequate offer, and a counter proposition was made by the British Commissioners, that lumber should be admitted free immediately, and that in consideration of the continued exclusion of cereals, live stock and other articles, admitted under the Treaty of 1854, a sum of money should be paid to Canada. The United States Commissioners, not only refused the counter proposition, but withdrew their former offer substituting one which the Committee of Council infer, from the Earl of Kimberley's Despatch, was in the opinion of Her Majesty's Government, more favorable to Canada, that that which had been rejected as inadequate. Wide, however, as are the differences of opinion on this Continent regarding the Treaty, there is but one opinion on the point under consideration. It is clear that the United States preferred paying a sum of money to the concession of commercial advantages to Canada, and the Committee of Council feel assured that there is not a single member of the Canadian Parliament, who would not have much preferred the rejected proposition to that which was finally adopted.

The Committee of Council cannot, with the Earl of Kimberley's Despatch before them, continue to affirm that Her Majesty's Government are of opinion that the cession of the Fishery rights was made for an inadequate consideration, but they regret that they are themselves of a different opinion.

While still adhering to their expressed opinions as to the Fishery Articles of the Treaty of Washington, they are yet most anxious to meet the views of Her Majesty's Government and to be placed in a position to propose the necessary legislative measures, and they will therefore proceed to make a suggestion which they earnestly hope may receive a favorable response.

The adoption of the principle of a money payment in satisfaction of the expenses incurred by the Fenian raids, would not only be of no assistance with reference to the Treaty, but might lead to some complications. It is not improbable that differences of opinion would arise in the discussion of the details of those claims between the two Governments, which might lead to mutual dissatisfaction. Again, such a solution of the question, would necessitate a discussion in the Imperial Parliament, in the course of which opinions might be expressed by members, which might irritate the people of Canada and might moreover encourage the Fenian leaders in the United States, who have not ceased their agitation.

There is in the opinion of the Committee of Council a mode by which their hands might be so materially strengthened that they would be enabled not only to abandon all claims on account of the Fenian raids, but likewise to propose, with a fair prospect of success, the measures necessary to give effect to those clauses in the Treaty of Washington which require the concurrence of the Dominion Parliament. That mode is by an Imperial Guarantee to a portion of the loan which it will be necessary for Canada to raise in order to procure the construction of certain important public works, which will be highly beneficial to the United Kingdom as well as to Canada. It is not pretended that the construction of these works is contingent on an Imperial guarantee. The credit of Canada has never stood so high in the money market as at the present time, its 5 per cent. securities being at a premium. But there is no doubt that with the Imperial Guarantee, a considerable saving of interest could be effected.

The Committee of Council feel assured that Her Majesty's Government will recognize the scrupulous good faith which has invariably been observed by Canada under Governments of various shades of politics. Her Majesty's Government are aware that one of the conditions on which British Columbia joined the Confederation, was that Canada, should procure the construction of an Interoceanic Railroad. In order to procure the construction of this gigantic work, a cash subsidy will have to be granted to the Company undertaking it, to the extent in all probability of five millions sterling. This Railroad will open up for settlement the vast prairies of the North-West, which will sustain an enormous population. According to the most reliable statistics, the immigration from the United Kingdom to Canada, is in about the proportion of one to six to that from the United Kindom to the United States, the population of the United States being more than ten times as great as that of Canada. On the other hand, the imports into Canada of staple articles of British manufacture, such as cottons, woollens, and iron and hardware, are about three times as large in proportion to population as those into the United States. It is therefore clearly the interest of the United Kindom that the British North West Territories should be opened for settlement as speedily as possible, and to effect this object, the Canadian Pacific Railroad is indispensably necessary. That Railroad, it may be added, would in all probability be found the most eligible mode of conveying a portion of Her Majesty's mails to the East.

The time has arrived when the enlargement and extension of the Canadian Canals, so earnestly desired by the United States, as appears by the protocols attached to the Treaty of Washington, can no longer be postponed.

The required works must be constructed by the Government, and will cost about three millions sterling, the aggregate for the Railroad and Canals being eight millions. The revenues of Canada are in a most satisfactory condition, and fully able to bear the increased charge which will be gradually thrown upon them. The taxes are much less than in the adjoining republic, and are cheerfully borne by the people.

The Committee of Council are of opinion that Her Majesty's Government might fairly be urged to propose to Parliament a guarantee for a Canadian loan, not to exceed four millions sterling, on the condition that such guaranteed loan should be raised at the same time, and in equal proportion with a Canadian unguaranteed loan for the same objects. The Committee of Council do not believe that any other mode can be suggested by which they would be enabled to surmount the difficulties in the way of their obtaining the consent of the Canadian Parliament to the measures necessary to give effect to tho Treaty of Washington, than that which they have felt it their duty to recommend. The Committee of Council trust, that should other difficulties be removed, Her Majesty's Government will enable them to assure the Canadian Parliament, that any recommendation made by Canada to terminate the articles of the Treaty of Washington, numbered 18 to 25 inclusive, and likewise Article 30, in conformity with Article 33, would be acted on.

Certified,

WM. H. LEE, Clerk Privy Council, Canada.

The Secretary of State for the Colonies to the Governor General.

(Copy-Canada-No. 58.)

DOWNING STREET, 18th March, 1872.

My LORD,—Her Majesty's Government have given their most careful attention to the report of the Committee of the Canadian Privy Council enclosed in your Lordship's despatch No. 13, of January 22.

The Committee state that, while adhering to their opinion as to the Fishery Articles of the Treaty of Washington, they are yet most anxious to meet the views of Her Majesty's Government, and to be placed in a position to propose the necessary legislative measures. They maintain that Canada has a just claim for compensation for expenses incurred in consequence of the Fenian raids, but they are of opinion that the adoption of the principle of a money payment in satisfaction of those expenses would be of no assistance with reference to the Treaty, and would be open to objection on other grounds. They therefore suggest another mode of settlement by which in their opinion their hands might be so materially strengthened that they would be enabled, not only to abandon all claims on account of Fenian raids, but likewise to propose to the Dominion Parliament, with a fair prospect of success, the measures necessary to give effect to the Treaty. Their suggestion is, that Her Majesty's Government should propose to Parliament a guarantee for a Canadian Loan, not exceeding four millions sterling, being half the amount ($\pounds 8,000,000$) which it is intended to raise for the purpose of constructing the railroad through British territory to the Pacific, and of enlarging and extending the Canadian Canals.

Her Majesty's Government have considered this suggestion with an earnest desire to remove the difficulties which are felt by the Canadian Government, and I have now to convey to you the conclusions at which they have arrived.

They are of opinion that the most convenient course will be that it should be provided in the Acts to be passed by the Dominion Parliament to give effect to the Treaty that such acts should only come into force upon the issue of a Proclamation by the Governor General in Council bringing them into operation. On their part Her Majesty's Government will engage that when the Treaty shall have taken effect by the issue of such proclamation they will propose to Parliament to guarantee a Canadian Loan of £2,500,000, such loan to be applied to the purposes indicated by the Council, namely, the construction of the railroad through British Territory from Canada to the Pacific, and the improvement and enlargement of the Canadian Canals, and to be raised at the same time and in equal proportion with the Canadian unguaranteed loan for the same objects, on the understanding that Canada abandon all claims on this country on account of the Fenian raids.

As regards the request of the Privy Council that Her Majesty's Government will enable them to assure the Dominion Parliament that any recommendation made by Canada to terminate the articles of the Treaty numbered 18 to 25 inclusive, and likewise article 30 in conformity with article 33, would be acted on; I may observe that no such assurance was asked or given in the case of the Reciprocity Treaty, but Her Majesty's Government recognize that it is not unreasonable that Canada should desire some assurance on this point, and they have therefore no hesitation in declaring that the greatest deference would be paid to the expression of the wishes of the Dominion, signified by Addresses from both Houses of the Dominion Parliament, and that those wishes would certainly be attended to; subject, of course, to the necessary reservation of Her Majesty's discretion to take into consideration in the interest of the whole empire the state of her relations with foreign powers at the particular juncture.

I have already conveyed to your Lordship by telegraph the substance of this despatch.

I have, &c.,

(Signed,)

KIMBERLEY.

Governor General, The Rt.-Honble. LORD LISGAR, G. C. B., G. C. M. G., &c., &c., &c.

Government House,

OTTAWA, April 15, 1872.

My LORD,—With reference to Your Lordship's despatch, No. 58, of March 18th, 1872, I have now the honor to forward herewith a copy of a Minute of the Privy Council of the Dominion, from which Your Lordship will perceive that the Ministers announce their intention of proposing to the Canadian Parliament the measures necessary to give effect to those clauses of the Treaty of Washington which relate to Canada.

I have, &c., (Signed,) LISGAR.

54

Copy of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 15th day of April, 1872.

The Committee of the Privy Council have had under their consideration the Earl of Kimberley's despatch to Your Excellency, dated the 18th ult., communicating the views of Her Majesty's Imperial Government on the proposition submitted in the report of the Privy Council transmitted in Your Excellency's despatch of 22nd January last.

From the despatch it appears that Her Majesty's Government are of opinion, that the most convenient course will be that it should be provided in the Acts to be passed by the Dominion Parliament to give effect to the Treaty, that such Acts should only come into force upon the issue of a Proclamation by the Governor General in Council bringing them into operation; that on their part Her Majesty's Government will engage that when the Treaty shall have taken effect by the issue of such Proclamation, they will propose to Parliament to guarantee a Canadian loan of £2,500,000, such loan to be applied to the purposes indicated by the Council, namely, the construction of the railroad through British Territory from Canada to the Pacific, and the improvement and enlargement of the Canadian Lands, and to be raised at the same time and in equal proportions with the Canadian unguaranteed loan for the same objects, on the understanding that Canada abandon all claims on England on account of the Fenian Raids.

The Earl of Kimberley further observes, that Her Majesty's Government will enable the Canadian Government to assure the Dominion Parliament that any recommendation made by Canada to terminate the Articles of the Treaty numbered XVIII to XXV inclusive, and likewise Article XXX in conformity with Article XXXIII, will be acted on, that they have no hesitation in declaring that the greatest deference would be paid to the expression of the wishes of the Dominion signified by Addresses from both Houses of the Dominion Parliament, and that those wishes would certainly be attended to, subject, of course, to the necessary reservation of Her Majesty's discretion to take into consideration in the interests of the whole Empire, the state of her relations with foreign powers at the particular juncture.

The Committee of the Privy Council feel that although Her Majesty's Government have been unable to accede to their proposition in full, it is nevertheless their duty, in the interests both of Canada and the Empire at large, to accept the modified proposition of the Earl of Kimberley, and they will accordingly be prepared to propose to the Canadian Parliament, the measures necessary to give effect to those clauses of the Treaty relative to Canada.

> Certified, WM. H. LEE. Clerk, Privy Council, Canada.

LISGAR.

MESSAGE.

The Governor General transmits for the information of the SENATE, and the HOUSE OF COMMONS, certain despatches and correspondence between the Governments of Nova Scotia, Newfoundland and Prince Edward Island and the Imperial Government, in reference to the Fishery Clauses of the Treaty of Washington.

GOVERNMENT HOUSE,

OTTAWA, 29th April, 1872.

The Governor of Newfoundland to the Governor General.

(Copy-No. 28.)

GOVERNMENT HOUSE, NEWFOUNDLAND, 20th March, 1871.

My LORD,—I have the honor to transmit herewith to your Lordship the Copy of a correspondence which has recently taken place between Mr. Vail, Provincial Secretary, N.S., and Mr. Bennett, the Premier of my Government, relative to a Resolution which was passed on the 17th February last, in the House of Assembly N.S.

I have transmitted copies of the correspondence in question to the Secretary of State for the Colonies, and to the Lieut. Governor of Nova Scotia.

> I have, &c, (Signed,)

STEPHEN J. HILL.

His Excellency Governor General The Right Hon. Lord Lisgar, G.C.B., G.C.M.G., &c., &c., &c.

Correspondence between Mr. Vail, of Halifax, Province of Nova Scotia, and Mr. Bennettr of Newfoundland.

(Copy.)

TELEGRAM FROM HALIFAX,

18th February, 1871.

"Passed resolution yesterday, thirty to three, protesting against transfer Fisheries "or sacrificing them to Imperial or Canadian interests, you better join."

(Signed,) W. B. VAIL,

To the Hon. C. F. Bennett. 18-8 Reply to foregoing.

(Copy.)

21st February, 1871.

" Cannot see at present the propriety or utility of protesting ; will write by mail."

(Signed,) C. F. BENNETT.

To the Hon. W. B. Vail, &c. &c. &c.

Mr. Bennett to Mr. Vail.

(Сору.)

SAINT JOHN'S,

2nd March, 1871.

SIR,—I sent you the other day a telegram in reply to yours of the 18th ult., to the effect that this Government could not then see the propriety or utility of joining in a protest upon the subject referred to in your telegram. We are ignorant of the whole circumstances which led to the action you took in the matter, and should we find them such as call forth our sympathies on behalf of the course you deemed proper to take, the question would still arise with us, as to the propriety or utility of our joining you in that protest.

It is the desire of this Government to avoid any collision with the Imperial wishes that do not necessarily demand our interference. We view England as our actual Protector—She has always acted not only justly but generously towards us—We have no apprehension that she will, in any way, prejudice those rights and privileges which she so liberally granted to the people of this Colony under their valued Constitutional Charter. She has left us to exercise our own discretion and free-will to enter the Confederation of the North American Provinces under the Dominion or not. And we have every confidence that she will protect us in the enjoyment of those rights and privileges which are so essential to our prosperity and happiness.

> 1 remain, &c., (Signed,)

C. F. BENNETT.

The Secretary of State for the Colonics to the Governor General. (Copy--Canada-No. 503.)

DOWNING STREET,

3rd September, 1871.

My LORD,--I have the honor to transmit to your Lordship for your information, Newfoundland-No. copies of Despatches, dated the 14th and 25th of July, which I 55-14 July, 1871. have received from the Governor of Newfoundland, and the Lieu-P. E. Island - No. tenant-Governor of Prince Edward Island, apprizing me that their 59-25 July, 1871. Governments have acceded to the wishes of Her Majesty's Government that United States Fishermen should be admitted during the present season to the provisional use of the privileges granted to them by the Treaty of Washington, so far as concerns those Islands, together with copies of the answers which I have returned to those despatches.

I have, &c., (Signed,)

KIMBERLEY.

Governor The Right Honorable The Lord Lisgar, G.C.B., &c., &c., &c. Governor Hill to the Earl of Kimberley.

(Copy-No. 55.)

GOVERNMENT HOUSE,

NEWFOUNDLAND, 14th July, 1871.

My LORD,—1. I have the honor to acknowledge the receipt of your Lordship's Despatch No. 28, of the 17th June, enclosing copies of the Treaty, signed at Washington, on the 8th May, by the Joint High Commissioners, which has been ratified by Her Majesty and by the President of the United States,—of the Instructions to Her Majesty's High Commissioners and Protocols of the Conferences held by the Commission,—of two notes which have passed between Sir E. Thornton and Mr. Fish,—and of a Despatch of 17th June, which your Lordship has addressed to the Governor General of Canada, stating the views of Her Majesty's Government on these important documents.

2. I observe in the copy now before me, of the Despatch of Mr. Secretary Fish, (8th May, 1871,) to Sir E. Thornton, an omission which bears very materially upon the peculiar interests of this Colony, respecting the immediate acquiescence of the Government of Newfoundland, in the opinions of Her Majesty's Government, as regards the prompt admission of American Fishermen to the provisional use, so far as this Island is concerned, of the privileges granted to them by the Treaty.

3. Respecting the immediate admission of American Fishermen into British Waters. Mr. Fish writes, "As several articles of the Treaty which has been signed this day, " relating to the admission of citizens of the United States to fish within the territorial " waters of Her Britannic Majesty, on the coast of Canada, Prince Edward's Island, and "Newfoundland, cannot come into full operation until the Legislation contemplated in " that instrument shall have taken place, &c., &c., &c., " and again in writing of the restoration to British subjects of certain duties by Congress, Mr. Fish observes " that any duties which may have been collected on and after the first day of July next. " on fish oil and fish, (except fish of the inland lakes and of the rivers falling into the " same, and except fish preserved in oil) the produce of the Fisheries of the Dominion " of Canada, and of Prince Edward's Island, shall be returned and refunded to the " parties paying the same, if a similar arrangement is made with respect to the admission " into the British possessions of fish-oil and fish (with the like exception) being the pro-" duce of the Fisheries of the United States," the word Newfoundland, included in the first extract of Mr. Fish's Despatch is excluded from the latter, and if intentional, the omission in question may act detrimentally towards the future acceptance of the terms of the Treaty by the Colonial Legislature.

4. My Ministers, however, to whom I have communicated the whole of the important documents respecting the Washington Treaty, are willing to consider this omission as unintentional, and although anxious to obtain information on this point, have resolved to comply at once with the wishes of Her Majesty's Government as regards the admission, during the present season, of citizens of the United States to the povisional use of the privileges granted to them by the Treaty, so far as lies in the jurisdiction of the Government of Newfoundland to bestow.

5. There is another point in reference to the correspondence relative to the Treaty to which my Advisers invite your Lordship's attention. The copy of Sir E. Thornton's reply (9th May, 1871,) to Mr. Fish, contains, in connection with the re-payment of Import Duties by Congress, the following words, "the above mentioned Colonial Gor-"ernments, who would be asked to grant the immediate and certain right of fishing "within the territorial waters of those Colonies whilst the return of the Import Duties "on fish from the 1st July next, promised by the United States, is prospective and "contingent on the action of Congress," the words, "on fish toil" following the words, "that any duties which may have been collected on and after the first day of July next," in Mr. Fish's note to Sir E. Thornton, are in the reply thereto (from which the above extract is taken) omitted. The Executive Council beg to 'be advised on this head.

6. I beg to transmit to your Lordship, copy of a Minute of Council, signifying 7th July. 1871. assent on the part of the Government of Newfoundland, to the request contained in your Lordship's Despatch, No. 28, of 17th June, respecting the Treaty of Washington.

> I have, &c., (Signed,) STEPHEN J. HILL.

The Right Honorable The Earl of Kimberley, &c., &c., &c.

Copy of Minute of Council.

(Copy.)

In compliance with the request made by Earl Kimberley in his Despatch of 17th June to His Excellency the Governor, it is agreed to accede thereto.

(Signed,) STEPHEN J. HILL.

Council Room. 7th July, 1871.

The Earl of Kimberley to Governor Hill.

(Copy-Newfoundland-No. 38.)

DOWNING STREET,

3rd September, 1871.

SIR,---I have the honor to acknowledge the receipt of your Despatch, No. 55, of the 14th of July, communicating to me the consent of your Government to the provisional admission of United States Fishermen during the present season to the privileges granted by the Treaty of Washington so far as concerns the Colony under your Government.

Her Majesty's Government have learnt with much satisfaction that the Newfoundland Government have so willingly acceded to their wishes in this respect.

I have drawn Lord Granville's attention to the two questions raised in your Despatch on the correspondence which passed on this subject between Sir Edward Thornton and Mr. Fish.

> I have &c., (Signed,)

KIMBERLY.

Governor Hill, C.B., &e., &c., &c.

Lieut. Governor Robinson to Lord Kimberley.

(Copy-Prince Edward Island-No. 59.)

GOVERNMENT HOUSE,

July 25th, 1871.

My LORD,-In continuation of my Despatch No. 55, of the 12th instant, I have now the honor to forward a Minute prepared by my Advisers in which they record the result of their deliberations on the subject of the Treaty of Washington and the other important documents which were forwarded to me with your Lordship's Despatch No. 22, of the 17th June, last.

2. It is stated in the Minute that "the different Governments and Legislatures of "this Colony have always hoped that these Fisheries (the Fisheries of Prince Edward "Island) would have done much to secure the advantages of another Reciprocity Treaty,

True copy

"or of some Tariff concessions authorizing the free admission (into the United States) of "the products of our Agriculturists who form the majority of our population, and which would have resulted in promoting the prosperity of the Colony,"-and that in the opinion of the Council the Inhabitants of Prince Edward Island are now asked to "surrender "to the Citizens of the United States these invaluable Fisheries without receiving in "return any just or fair equivalent such as was hoped to be obtained.

In deference, however, to the strongly expressed wish of Her Majesty's Government in the matter, the Committee of the Executive Council (without giving any pledge as to "the ultimate action of the Legislature), recommend that the application made by the "United States Government be acceded to, so that American Fishermen may be at once "allowed during the present season the provisional use of the privileges granted to them "by the Treaty;"-and I have the honor to report that the Custom House Officers were yesterday instructed to discontinue the enforcement of the Fishery Laws for the present season, and until further orders.

3. I caused the United States Consul at this Port to be notified accordingly, and I simultaneously dispatched a similar notice to Sir Edward Thornton by telegraph.

4. I may add that in the event of the Acts necessary to give effect to the Treaty being passed by the Legislature of Prince Edward Island, my Government will apply to your Lordship for permission to send a representative to Halifax, for the purpose of conferring with the Agents of the Imperial Government, whose appointment is provided for in the concluding paragraph of Article 23 of the Treaty, and of urging upon him the claims of this Island to a just share, proportionate to the value of our Fisheries, of whatever compensation may be awarded as an equivalent for the privileges which the Colonists are asked to surrender. My Government are of course aware that Great Britain and the United States are to be represented before the Halifax Commission, each by one agent only, but they believe that it would be competent to Her Majesty's Government to authorize the Imperial agent as aforesaid to receive information on the subject of our Fisheries from a representative to be appointed by the Government of Prince Edward Island, and this, should the Legislature assent to the Treaty, is what my Government hope that your Lordship will be pleased to accord.

5. I am confident that your Lordship will receive with much satisfaction the intimation contained in this despatch and that the prompt and loyal action of the Government of Prince Edward Island will predispose Her Majesty's Government to comply as far as possible with any reasonable request which my Advisers may consider it to be their duty to prefer.

> I have &c., (Signed,)

WILLIAM ROBINSON, Lieut. Governor.

The Right Honorable,

The Earl of Kimberley, &c., &c., &c.

COUNCIL CHAMBER, July 17th, 1871.

At a meeting of a committee of the Executive Council of Prince Edward Island,

PRESENT ;

The Honorable Mr. Pope,

Mr. Colonial Secretary, ,,

Mr. Attorney General, ,,

- Mr. Owen, "
- Mr. Richards. ,,

The Committee of Council having under consideration despatch No. 22, dated at Downing Street, the 17th of June, 1871, from the Right Honorable Earl Kimberley, Her Majesty's Principal Secretary of State, for the Colonies to His Honor Lieutenant Governor Robinson, together with copies of the Treaty signed at Washington, on the 8th day of May, and of Protocols of Conferences held by the Commission, of two notes which have passed between Sir Edward Thornton and Mr. Secretary Fish, and of a despatch addressed to the Governor General of Canada, stating the views of H ϵ r Majesty's Government on these important documents. Her Majesty's Government in the despatch first referred to, strongly urge upon the Government of this Island that, for reasons stated in the despatch from Earl Kimberley to Lord Lisgar, the same course should be pursued as in 1854, and the application made by the United States Government acceded to by Prince Edward Island, so that American Fishermen may be at once allowed, during the present season, the provisional use of the privileges granted to them by the Treaty.

I have respectfully to submit that Prince Edward Island is the most fertile and productive Province in British North America, in proportion to its extent-that the natural market for its principal productions is to be found in the United States, as was very satisfactorily proved during the continuation of the Reciprocity Treaty of 1854-that the fisheries of this Island are the best and most valuable in America, and are much appreciated by the fishermen of the United States—that the different Govern nents and Legislatures of this Colony have always hoped that these fisheries would have done much to secure the advantages of another Reciprocity Treaty, or of some Tarriff Concessions authorizing the free admission of the products of our Agriculturists, who form the majority of our population, and which would have resulted in promoting the prosperity of the Colonythat by the Treaty now under consideration, the inhabitants of this Island are asked to surrender to the citizens of the United States, these invaluable fisheries, without receiving in return any just or fair equivalent, such as was hoped to be obtained-Earl Kimberley, in his despatch to Lord Lisgar, alludes to the great importance to Canada of the right to convey goods in bond through the United States, which has been secured to her by Article 29, and the free navigation of Like Michigan, under Article 28, and the power of transhipping goods under Article 30, as valuable privileges which must not be "overlooked in framing an estimate of the advantages which Canada will obtain."

Valuable to Canada as may be these privileges, the Committee submit that they do not at all affect Prince Edward Island—that the chief benefit to this Island would be the admission of fish and fish oil into the Markets of the United States, and this would not be generally felt by the people inasmuch as this trade is now principally in the hands of a few American Citizens—that the surrender by the United States of the right of fishing down to the 39th degree of latitude is comparatively worthless to the people of this Island, and as the United States Government assert that the privileges accorded to the citizens of the United States under Article 18, of this Treaty, are of no greater value than those accorded by Articles 19, and 21, to the subjects of Her Britannic Majesty, the amount of any money compensation that would be given to this Island would be insignificant.

Earl Kimberley in his despatch to Lord Lisgar, says, "In some respects a direct "money payment is perhaps a more distinct recognition of the rights of the Colonies than "a Tariff Concession, and there does not seem to be any difference in principle between "the admission of American fishermen, for a term of years, in consideration of the pay-"ment of a sum of money in gross, and their admission under the system of licenses cal-"culated at so many dollars per ton, which was adopted by the Colonial Government for "several years after the termination of the Reciprocity Treaty. In the latter case it "must be observed, the use of the fisheries was granted without any tariff concession "whatever on the part of the United States, even as to the importation of fish."

The Committee submit that a Commercial arrangement with the United States, in consideration of the use of the fisheries, would have been most acceptable, but as the Royal High Commissioners were unable to induce the American Government to change its Commercial policy the people of this Island being extremely loyal, and devotedly attached to British Institutions, would be most unwilling to throw any obstacle in the way of an amicable settlement of all causes of difference between Great Britain and the United States, and would therefore willingly accept any reasonable money compensation in addition to the privileges granted as an equivalent, but under the Treaty nothing of the kind is guaranteed them.

The Committee deem it to be their duty further to state that the system referred to of granting licences to American fishermen, for a money consideration, was never approved of by the Government of this Island, but merely sanctioned in deference to the strongly expressed wish of the British Government in the matter, and for the same reason the Committee now recommend that the application made by the United States Government be acceded to, so that American fishermen may be at once allowed during the present season the provisional use of the privileges granted to them by the Treaty, without any pledge, however, on the part of the Government, that the Legislature will pass the Acts to give effect to the Treaty, in which they feel that the interests of Prince Edward Island have not been fairly considered.

Adopted in Council,

July, 24th, 1871.

Certified.

(Signed,)

WILLIAM C. DES BRISAY, Assistant Clerk Ex. Council.

The Earl of Kimberley to Lieutenant Governor Robinson. (Copy-Prince Edward Island-No. 32.)

DOWNING STREET,

3rd September, 1871.

SIR,—I have the honor to acknowledge the receipt of your Despatch, No. 59, of the 25th of July, communicating to me the consent of your Government to the provisional admission of United States Fishermen during the present season to the privileges granted by the Treaty of Washington so far as concerns the Colony under your Government.

Her Majesty's Government have learnt with much satisfaction that the Prince Edward Island Government have so willingly acceded to their wishes in this respect.

With regard to the observations contained in the Minutes of Council, which you have forwarded, to the effect that the l'rince Edward Island Government would readily accept any reasonable money compensation in addition to the privileges granted as an equivalent, but that under the Treaty nothing of the kind is guaranteed, I do not understand why the Prince Edward Island Government should object to the reference of the question of the money compensation to arbitration which seems to be the fairest way of determining such a point, more especially as the fact stated in the Minute that the rights of fishing conceded by the United States are comparatively worthless, is, it must be presumed, capable of distinct proof.

I will communicate with Lord Granville as to the wish of your Government, in the event of the Act necessary to give effect to the Treaty being passed, to appoint a Representative to give information to the Commission which is to meet at Halifax.

I have &c.,

(Signed,) KIMBERLEY.

Lieutenant Governor Robinson, &c., &c., &c.

The Secretary of State for the Colonies to the Governor General. (Copy-Canada-No. 504.)

Downing Street, 5th September, 1871.

My LORD,—With reference to my Despatch of the 3rd inst., forwarding copies of a correspondence between the Governor of Newfoundland and the Lieutenant-Gevernor of

Prince Edward Island, and myself, relating to the Treaty of Washington and to the 31 August, 1871. Fisheries, I have the honor to transmit to you, for your information, a copy of a letter from the Foreign Office, on certain points raised in that correspondence.

I have communicated a copy of the Foreign Office letter to the Governor of Newfoundland and to the Lieutenant-Governor of Prince Edward Island.

> I have, &c., (Signed.)

KIMBERLEY.

Governor General The Right Honorable Lord Lisgar, G.C.B., &c., &c., &c.

Mr. Russell to the Hon. Secretary of State, Colonial Office.

(Copy.)

FOREIGN OFFICE,

August, 31st, 1871.

SIR,—I have laid before Earl Granville, your letter of the 21st instant, enclosing copies of correspondence with the Governor of Newfoundland and the Lieutenant-Governor of Prince Edward's Island, respecting the provisional admission of American fishermen to the inshore fisheries of those Islands, and I am, in reply, to request that you will state to the Earl of Kimberley that Lord Granville has no doubt that the Government of Newfoundland is right in assuming that the omission of the mention ot Newfoundland in the passage in Mr. Fish's note to Sir E. Thornton, referred to, was unintentional.

Her Majesty's Chargé d'Affaires at Washington will, however, be instructed to call Mr. Fish's attention to the omission as being understood to be by inadvertence.

His Lordship wishes the Government of Newfoundland to be informed that the intention of the two notes was that pending reciprocal legislation, in return for the immediate provisional admission of American Fishermen to the inshore Fisheries, drawbacks should be granted on the Import Duties taken in the United States on the fish oil and fish which are to be hereafter admitted free for a term of years under the 21st Article of the Treaty.

I am to add that as regards the desire expressed by the Government of Prince Edward Island that some person should be appointed to attend the Commission at Halifax, it appears to Lord Granville that it would not only be permissible but highly desirable that Prince Edward Island and the other Provinces should furnish the fullest information before the Commission as to the value of the inshore Fisheries on their Coasts. The 24th Article of the Treaty provides that the Commissioners shall be bound to receive such oral or written testimony as either Government may present, and it will consequently be competent for the Government of Prince Edward Island to send to Halifax any person who may be selected as best capable of giving evidence on its behalf.

I am &c.,

(Signed,)

ODO RUSSELL.

The Under Secretary of State, Colonial Office, &c., &c., &c. The Secretary of State for the Colonies to the Governor General. (Copy-Canada-No. 585.)

> DowNING STREET, 30th November, 1871,

MY LORD,—With reference to my Despatch, No. 444, of the 17th June, 1871, I Lt.-Gov. P. E. 1.— have the honor to transmit to you, for your information, and for that No. 72—Sep. 30 71. of your Government, copies of a correspondence between the Lieu-S. of S. to Lt.-Gov. tenant-Governor of Prince Edward Island and myself, on the question of the refund of duties collected in the United States, on fish and fish oil, the produce of the Fisheries of Prince Edward Island and Newfoundland.

I have, &c.,

(Signed,)

Governor General The Right Honorable Lord Lisgar, G.C.B.

Lieutenant-Governor Robinson to the Earl of Kinberley.

(Copy—Prince Edward Island—No. 72.)

GOVERNMENT HOUSE,

30th September, 1871.

KIMBERLEY.

My LORD,—I have the honor to submit a copy of a letter addressed to me by Mr. I. C. Hall, an American merchant, largely engaged in the exportation of fish from Prince Edward Island to the United States, together with a copy of my reply thereto.

2. Mr. Hall is apprehensive that the refusal of Canada to assent to the provisional arrangement proposed by the United States and assented to by this Colony, as reported in my despatch No. 59, of the 25th July, may work adversely to the interests of those persons in Prince Edward Island, who have this year made large investments in the fishing business, in the expectation of receiving back the duties collected in the United States, on fish oil and fish exported from this Island into that country, during the present fishing season.

3. I do not in the least apprehend that the action of Canada withholding assent from an arrangement in respect of which it was necessary that each Colony concerned should decide for itself, will in any way prejudice the interests of Prince Edward Island, or that the Government of the United States will be hereby deterred from recommending and urging upon Congress to refund the duties collected during the stipulated period on fish oil and fish from this Colony, and I felt justified in informing Mr. Hall, that I considered his apprehensions unfounded.

4. An assurance to this effect from your Lordship, if one could be procured in time from the United States Government, and your Lordship should think proper to ask for it, would be most satisfactory and re-assuring to that section of the mercantile community to which Mr. Hall belongs, and would serve to counteract the depressing influence which the apprehension now entertained may otherwise have on the late autumn trade of the Colony.

S. of S. to Lt.-Gov. 5. For previous correspondence on the subject of the provisional -No. 22, of June arrangement mentioned in this communication, I beg to refer your 17, 1871. Lt.-Gov. to S. of S. Lordship to the Despatches of the number and dates noted in the -No. 59, of July margin. 25, 1871.

> I have, &c., (Signed,)

WILLIAM ROBINSON. Lieutenant-Governor.

The Right Honorable The Earl of Kimberly.

18-9

Sessional Papers (No. 18.)

(Copy.)

Mr. I. C. Hall to Lieutenant-Governor Robinson.

CHARLOTTETOWN, P. E. I., 26th September, 1871.

SIR.—After the action of your Government giving effect to the Treaty of Washington, so far as the fisheries are concerned, admitting fish from the United States, as but or otherwise, free of duty into this Colony, and giving to United States fishing vessels free access to the shore fisheries around this Island, those persons here who are engaged in the fishing business had supposed that their right, on the meeting of Congress, to receive back the duties paid on all fish and fish oils exported by them to the United States since the 1st day of July, could not be questioned.

Recent reports from the United States would, however, lead to the belief that the refusal of the Dominion of Canada, to give effect to the Treaty of Washington, may work adversely to the interests of this Island, and prejudice her claim to such return of duties.

As your Honor is probably aware, large investments have this year been made in the fishing business, based on the expectation of receiving the benefit of this Treaty, and a heavy loss to this Island must result if the duties are not returned.

I would therefore esteem it as a great favor if your Honor can give me any infor mation bearing upon this subject.

> I have, &c., (Signed,)

I. C. HALL.

His Honor Wm. C. F. Robinson, Esq., Lieutenant-Governor, &c., &c., &c.

Mr. Robinson to Mr. Hall.

(Copy--No. 102.)

GOVERNMENT HOUSE,

29th September, 1871.

SIR,—I am directed by the Lieutenant Governe, to acknowledge the receipt of your letter of the 26th instant, on the subject of the Treaty of Washington.

2. The Government of the United States requested Her Majesty's Government to urge the Government of Canada, Newfoundland, and Prince Edward Island, to make for the present season within their present jurisdiction, such relaxations and regulations as it might be in their power to adopt, with a view to the provisional admission of American Fishermen the liberty which is proposed to be secured to them by the Treaty of Washington ; the Government of the United States undertaking in return to recommend and urge upon Congress, at their next Session, to refund to the parties paying the same, any duties collected in the United States on and after the 1st July, on fish oil and fish (with certain exceptions) the produce of the fisheries of the above Colonies respectively, if a similar arrangement should be made with respect to the admission into the above Colonies as aforesaid, of fish oil and fish (with like exceptions) being the produce of the fisheries of the United States.

3. Prince Edward Island assented to the proposed arrangement, Canada did not assent to it, and you are apprehensive that such refusal on the part of Canada may work adversely to the interests of those persons in Prince Edward Island who have this year made large investments in the Fishing business in the expectation of receiving back the duties paid by them on fish oil and fish exported from this Island into the United States during the present fishing season.

4. The Lieutenant Governor is of opinion that your apprehensions are unfounded, an arrangement sanctioned by Her Majesty's Government has been entered into between the Governments of the United States and Prince Edward Island, and the Lieutenant Governor does not apprehend that the action of Canada in withholding her assent from a similar arrangement will be attended with the prejudicial result which you have recently been led to anticipate.

> I have &c., (Signed,)

KILDARE C. ROBINSON. Private Secretary.

Isaac C. Hall, Esq., &c., &c., &c.

Lord Kimberley to Licut. Governor Robinson.

(Copy-No. 48.)

Downing Street, 30th December, 1871.

SIR,—I have been in communication with the Secretary of State for Foreign Affairs on the subject of your Despatch, No. 72, of the 30th September, in which you enclosed copies of correspondence between yourself and Mr. I. C. Hall, respecting the question of the refund of the duties collected in the United States on fish oil and fish exported from Prince Edward Island during the Fishing season.

Enquiry has been made of the United States Government on the subject of the introduction of a Bill into Congress to provide for the refunding of duties paid upon fish and fish oil, the produce of the Fisheries of Prince Edward Island and Newfoundland, but Her Majesty's Government regrets that the United States Government have replied that the proposal made in May last contemplated the united action of all the British North American Colonies, and that it would not be practicable to separate them or carry into effect for one what the President was willing to recommend for all those Colonies.

> I have &c., (Signed,)

KIMBERLEY.

RETURN.

SCHEDULE OF CLAIMS arising out of the late Insurrection at Red River, reported on by the Honorable the Recorder of Manitoba.

(Copy.)

LOWER FORT GARRY, 21st December, 1871.

SIR,—I had the honor to receive from Mr. Meredith, while I was in Montreal on the 22nd of July last, a letter from Governor Archibald of the 26th of May, covering copy of a despatch from the Hon. the Secretary of State for the Provinces on the 2nd of May, and also a copy of an extract from minutes of a meeting of the Treasury Board at Ottawa, of the 25th of April, 1871, referring to me for investigation the claims of sufferers by the insurrection in Ruperts Land in 1869-70.

I immediately repaired to this Province, where I arrived on the 6th of August. In furtherance of the objects contemplated by the Treasury Minute, I caused on the 7th of August, printed notices in French and English to be published and extensively circulated in the different Parishes of the Province, intimating that I should be in attendance at the place therein designated from 9 a.m. to 6 p.m. every day, for the purpose of receiving claims and such evidence in support of them as the several claimants might offer. I also caused similar notices to be published in both languages, in all the local newspapers. I have daily since then during the whole month of August, and whenever afterwards they presented themselves, received and heard evidence in support of various claims, far exceeding the number and amount what I imagined to be possible.

Every claim intended to be presented, has, I have reason to believe, been received, with all the evidence within the power of the several parties to procure.

There may be a very few, but not more, I think than five or six at the utmost that have not yet been brought forward owing to the absence of the claimants, but these should not, in my judgement, further delay my report.

Many, and indeed most of the claims presented, did not seem to me included in the terms of the vote in supply: but as they were usually mixed with demands grounded on imprisonment or loss of property, which did come within those terms, the course I adopted was to receive all the evidence that the parties desired to bring forward, and to consider, in forming my conclusions, only such testimony as was applicable under the terms of the vote.

In every instance the claimant and his witnesses have been duly sworn, and I have taken their evidence with my own hand.

Referring to the terms of the extract from the Treasury Minute communicated, I find that I am requested "after an examination and enquiry into such claims, to report "the evidence taken, in regard thereto and my conclusions thereon."

I have therefore the honor to report that all claims made before me, together with the evidence in support of each, and my conclusions thereon, will be found in the sealed packet intended to accompany this letter. Every case is numbered and docketed with the name of the claimant; and contains the claim, the evidence, and my conclusions upon it. 19-1 I have also the honor to enclose a list containing the number distinguishing each claim, the name of the claimant, the amount cl.imed, and the amount indicated by my conclusions upon the evidence.

In the execution of an office of such difficulty and delicacy, 1 have considered it my duty to be guided by equitable principles rather than by technical rules. I have reserved to myself, however, as the only possible means of disposing of the demands, many of them conscientious, and some, I believe the reverse, the discretionary power of judging as a juryman would do in a matter that I consider fair and right under circumstances not always fully appearing on the face of the proceeding. If I have adopted a proper view of the duty required at my hands in this matter, I see a prospect, and I must add, the only prospect of an end to demands which, in their nature, irritate to some extent a portion of the public mind.

I was, I must confess, unable to perceive any other mode of proceeding open to me. It appeared to me that I was called upon, (however imperfect the means afforded,) to hear and judge, and not to put myself in a position of resisting or questioning.

I therefore heard all the evidence in every case that the party claimant desired to adduce. In all cases the claimants were represented by professional advisers, who placed their demands in the most advantageous position possible; while the public interest may be said to have been entirely unrepresented, unless I am right in the supposition upon which I have acted, that I was called upon to judge ϵx equo et bono, and to consider all the circumstances of every case, whether arising immediately from the evidence which the claimant chose to adduce, or from events of a public nature, of which I was personally and officially cognizant.

The principles I have applied to all cases are :---

lst. To require all reasonable proof of every essential fact upon which the claim was founded.

2nd. To allow for all proved losses, which were the direct and immediate consequence of the insurrection, and not attributable to the fault or negligence of the claimant.

3rd. To take the claimant's own sworn estimate of the value of property lost, where such value was, ex-necessitate within his exclusive knowledge.

4th. To have regard to facts of a public and general nature, such as the official, or assumed official character of individuals who notoriously and openly acted either under, or against the authority of the so-called Provisional Government.

I have restricted my attention to, 1st. claims for loss of property, 2nd. to claims for imprisonment, and 3rd. to claims for forced emigration from the Territory.

The two first heads of enquiry seem to want no comment. With reference to the third, I have considered the word "forced" implied not preference, or mere alarm, but compulsion arising from serious danger to life or liberty.

In applying these principles, I have of course excluded from my consideration claims for damage in the legal sense, as contra-distinguished from actual loss. The brief text of Law that regulates my proceedings, not including claims for any description of damages. If these should ever be the subject of investigation, I fear it would open a field of endless controversy, and require an appropriation many times larger than that already made.

With reference to case No. 10 (Narcisse Marion), I should wish to call to it the attention of the Government, as being one of some hardship. He is a man who rendered service on the side of law and order. His service to the insurgents in the Fort was certainly rendered reluctantly, and under a species of duress, tho' not such as to entitle him strictly to compensation for imprisonment under the vote, as I understood it. If the Government see fit to compensate him, I should strongly recommend his being granted say \$100.

I have the honour to be, Sir,

Your most obedient Servant,

F. G. JOHNSON,

Commissioner.

To the Hon.

The Secretary of State for the Provinces.

Extract from the Minutes of a meeting of the Treasury Board, held at Ottawa, on the 5th day of April. 1872.

Compensation for losses. The Treasury Red River Board have had under their consideration, the report of the Recorder of Manitoba, on the several claims presented to him for compensation to the sufferers during the Insurrection in Ruperts Land in 1869-'70, and for which the sum of \$40,000 00 was voted by Parliament during the Session of 1871.

The Treasury Board submit a Schedule of the claims, and of the Recorder's awards; the former amounting to \$336,260 65, the latter to \$85,755 95.

In addition to this latter amount, the Treasury Board have to report, that in the early part of the year 1870, the sum of \$800 00 was advanced in aid of the Refugees then in Canada, from the North West, who were represented as being in a necessitous condition at the time.

The Treasury Board recommend to the favourable consideration of Council, that the sum of \$2,000 (two thousand dollars) be voted for the parents of the late Thomas Scott, and they further recommend that in addition a sum of \$48,000 or in all \$50,000 (fifty thousand dollars) be placed in the Supplementary'Estimates of the current year, to cover the excess over the vote of \$40,000 (forty thousand dollars) granted by Parliament in 1871.

Respectfully submitted.

F. HINCKS,

Minister of Finance, and Chairman of the Treasury Board

Treasury, Ottawa, 5th April, 1872.

Copy of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council, on the 9th April, 1872.

The Committee have had before them, an extract from the minutes of a Meeting of the Treasury Board, held on the 8th of April, 1872, stating that they have had under their consideration the Reports of the Recorder of Manitoba, on the several claims presented to him for compensation to the sufferers, during the Insurrection in Ruperts Land, in 1869-'70, and for which the sum of \$40,000 was voted by Parliament during the Session of 1871.

That they submit a Schedule of the claims, and of the Recorder's awards, the former amounting to \$336,260 65 and the latter to \$85,755 95.

That in addition to this latter amount they report that in the early part of 1870, the sum of \$800 was advanced in aid of the Refugees then in Canada, from the North West, who were represented as being in a necessitous condition at the time.

They recommend to the favourable consideration of Your Excellency in Council, that the sum of two thousand dollars (\$2,000) be voted for the parents of the late Thomas Scott, and they further recommend that in addition a sum of \$48,000, or in all \$50,000 be placed in the Supplementary Estimates of the current year, to cover the excess over the vote of \$40,000 granted by Parliament in 1871.

The Committee concur in the above recommendations and submit the same for Your Excellency's approval.

Certified.

W. H. LEE, Clerk. P.C.

RETURN

No. 19.)

To an ADDRESS of the HOUSE OF COMMONS, dated 3rd June, 1872 : For a statement in detail of all the claims made by the different persons named in the Report of F. G. Johnson, Commissioner, to whom were referred for investigation the claims of sufferers by the insurrection in Rupert's Land, in 1869-70; shewing, item by item, the nature of these claims;--the proof produced by each person in support of his claims, as well as the names of the Witnesses heard, and on whose behalf heard, and copies of their deposition; and copies of all correspondence between the several parties making claims, and the Government with reference to these claims; also copies of the instructions which were given to the said Commissioner Johnson, or to any other person regarding these claims; and copies of all papers or other documents having reference to the said claims.

By command.

J. C. AIKINS,

Secretary of State.

DEPARTMENT OF THE SECRETARY OF STATE, OTTAWA, 5th June, 1872.

RETURN

(No. 19.)

To an ADDRESS of the House or COMMONS, dated 23rd of May, 1872; For a statement in detail cf all the claims made by John Schultz, Esquire, and filed either with the Government or with Recorder Johnson, shewing, item by item, the nature of these claims, the proof produced in their behalf, as well as the names of witnesses heard, and copies of their depositions, and copies of all correspondence between the said John Schultz and the Government with reference to these claims; also, copies of the instructions which were given to the said Recorder Johnson, or to any other person regarding these claims; and copies of all the papers or other documents having reference to the claims of the said John Schultz, Esquire.

By command.

J. C. AIKINS,

Secretary of State.
