

# How cannabis use changed in Canada, 2018 to 2020

An analysis using data from the 2018, 2019 and 2020 National Cannabis Survey

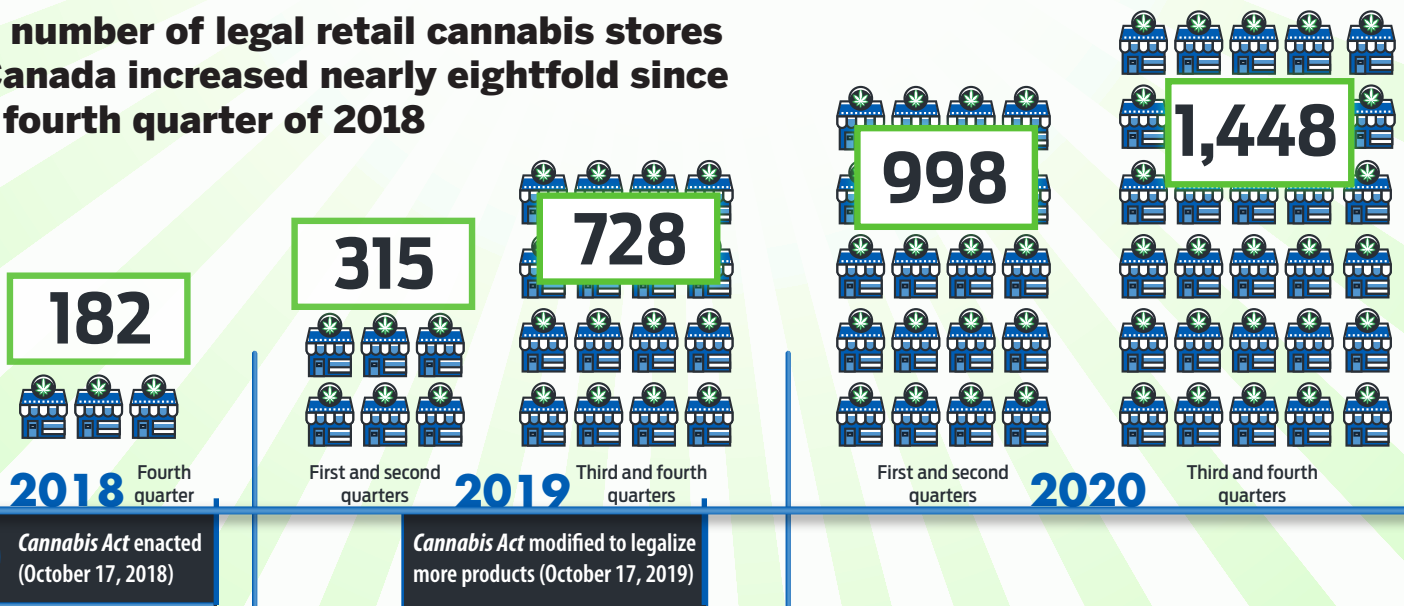

## By 2020, more consumers reported getting cannabis from legal sources or growing it, and fewer from illegal sources or from family and friends

Note: Because cannabis consumers could select more than one source, the sum of the categories does not add up to 100%. Source: Statistics Canada, National Cannabis Survey, first quarters of 2018 and 2019 and fourth quarter of 2020.

## The number of legal retail cannabis stores in Canada increased nearly eightfold since the fourth quarter of 2018

Note: The data are the most complete at the time of analysis. Counts are subject to multiple revisions and may include e-commerce-only entities. Source: Statistics Canada, Business Register.
