Definitions and Acronyms

Quantity Pending: quantity notified for which the notice has been sent for approval to the competent authorities and for which no reply has been received.

Quantity Consented: quantity notified for which all of the competent authorities have granted consent to the proposed movement of hazardous wastes or hazardous recyclable materials.

Quantity Objected: quantity notified for which any of the competent authorities have refused to grant consent to the proposed movement of hazardous wastes or hazardous recyclable materials.

Canadian Transit: transboundary movement generated and received in Canada, passing through a foreign country.

CCME: Canadian Council of Ministers of the Environment

EIHWHRMR: *Export and Import of Hazardous Waste and Hazardous Recyclable Material Regulations*

OECD: Organisation for Economic Co-operation and Development

TDGR: *Transportation of Dangerous Goods Regulations*

Waste: for the purposes of this report, means hazardous waste or hazardous recyclable material as defined by EIHWHRMR.

Fast Facts

The requirements for publication of notice information can be found under Part 7, Division 8, Section 187 of the *Canadian Environmental Protection Act, 1999* (CEPA). *Resilog* volume 33 tables 1, 2, and 3 describe notifications for proposed export, import and transit of hazardous wastes and hazardous recyclable materials received by Environment and Climate Change Canada during the year 2018. Notification status and notified quantities are summarized below.

Notified Quantities, January 1 – December 31, 2018

	Exports	Imports	Transits	Canadian Transits	Total
Number of duly completed notices received	694	1167	58	0	1 919
Number of waste streams involved	6108	9956	989	0	17 053
Total quantity notified (tonnes)	10 728 424	42 557 555	1 513 405	0	54 799 384
Quantity consented (tonnes)	7 829 691	36 695 926	1 347 016	0	45 872 633
Quantity objected (tonnes)	641 008	921 235	101 638	0	1 663 881
Quantity pending (tonnes)	2 257 726	4 940 394	64 751	0	7 262 871

The quantity notified reflects the maximum quantity of waste or material that is intended to be shipped. It therefore may not be the same as the actual quantity shipped. Exporters and importers routinely overestimate waste or material quantities on their notices, given that they must forecast the quantity and the physical and chemical nature of hazardous wastes and hazardous recyclable materials that might be shipped over a period of one year. Actual quantities of waste or material in movement are tracked through movement documents. An annual statistical report on the actual specifications of transboundary movements of hazardous wastes and hazardous recyclable materials in Canada is available on the Government of Canada Publications Website.

How to read Resilog

Waste Groups

1. **Battery Wastes:** waste whole or crushed batteries, including acid batteries.
2. **Biomedical Wastes:** as defined in the *CCME Guidelines for the Management of Biomedical Wastes in Canada*, plus infectious wastes (TDGR class 6.2 and Schedule 3 of EIIHWHRM).
3. **Corrosive Liquids:** waste acidic or basic liquids and solutions (TDGR class 8).
4. **Corrosive Solids:** waste acids and bases in solid form (TDGR class 8).
5. **Environmental Hazards:** liquid and solid wastes that could pose a danger to the environment.
6. **Flammable Liquids:** waste liquids that are ignitable (TDGR class 3).
7. **Flammable Solids:** waste ignitable, pyrophoric or water reactive solids (TDGR class 4).
8. **Gases:** waste aerosols, compressed and liquefied gases (TDGR class 2).
9. **Halogenated Organic Wastes:** waste halogenated organic solvents, liquids and solids.
10. **Inorganic Wastes:** waste inorganic substances and solutions.
11. **Leachable Toxic Wastes:** wastes that come within Schedule 6 of the EIIHWHRM.
12. **Metal and Mineral Wastes:** metal/mineral bearing wastes, metal treatment and processing wastes.
13. **Non-halogenated Organic Wastes:** waste non-halogenated organic solvents, liquids and solids.
14. **Oils/Fuels:** waste gasoline, diesel, petroleum processing wastes, used lubricating oils and filters and anti-knock mixtures.
15. **Oxidizers:** oxidizing wastes and organic peroxide wastes (TDGR class 5).
16. **Paint-related Wastes:** waste paints, resins, lacquers, inks, paint thinners and adhesives.
17. **Pesticide Wastes:** waste biocides and wastes contaminated with pesticides.
18. **Toxic Liquids:** waste liquids and solutions that are toxic/poisonous (TDGR class 6.1).
19. **Toxic Solids:** wastes in a solid form that are toxic/poisonous (TDGR class 6.1).
20. **Polychlorinated Biphenyls:** wastes that contain more than 50mg/kg of PCBs.

Tables

In the tables, the waste groups are listed across the top row by number. The names of Canadian companies that notified Environment and Climate Change Canada of intended imports, exports or transits (notifiers) are entered alphabetically in the left column. Although a Canadian company may have submitted many notices for the period covered by this *Resilog* edition, their name appears only once in each table. Therefore, each notifier may have more than one permit per waste group.

For exports and imports, a two-letter code representing the name of the country of origin (imports) or destination (exports) is used.:

For transits, the two-letter code represents the name of the country of origin and destination. If the countries of origin and destination are different, then a one-letter code is used.

The legend of country codes is provided at the bottom of each table.
