# Directory of Canadian Trading Houses for Chemicals

(aussi disponible en français)

Chemicals and Bio-Industries Branch  
March 1996

Canada

## INTRODUCTION

The *Directory of Canadian Trading Houses for Chemicals* has been developed, in response to requests by small and medium-sized chemical companies, to assist them in addressing international market opportunities and expanding exports.

Canada, like industrial countries, is facing the challenge of promoting economic growth and job creation in an environment characterized by increasing international trade and rapid technological change. Within such an environment, Canada needs to develop more exporters of goods and services, and to diversify into additional markets. The Government of Canada is working with Canadians to achieve the target of doubling the number of firms doing business successfully in international markets by the year 2000.

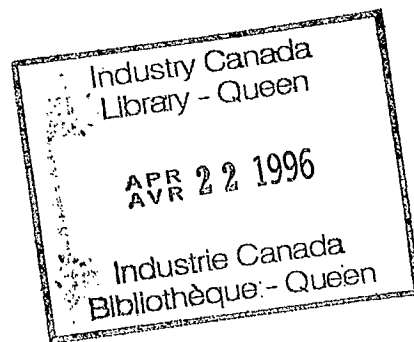

This first edition of the *Directory of Canadian Trading Houses for Chemicals* has been compiled from a list of trading houses registered with Industry Canada's BOSS (Business Opportunities Sourcing System) database. The trading houses identified were contacted to indicate the chemical sectors of interest to them.

Future editions of this directory will be expanded to include trading houses and agents in other countries to further enhance international trade and business opportunities for Canadians.

Also, we would welcome any comments or suggestions to improve the usefulness of the *Directory of Canadian Trading Houses for Chemicals*. Your suggestions can be sent to:

Suresh Khandelwal
