STATISTICAL TABLES

## METHODOLOGY

## METHODOLOGY

### Questionnaire

One English and one French version of the questionnaire including mainly closed questions were used for data collection for CROP Report 80-4 Omnibus.

### Interviewing Dates

Interviews took place in the homes of respondents from June 10 to June 30, 1980.

### Sampling and Validity

A national sample of 1923 men and women aged 18 and over was interviewed in their home. The sample interviewed in this study is a representative sample of the population of Canada, aged 18 and up - exclusive of institutionalized segments of the population (Army camps, nursing homes, prisons, etc). and those residing in the Northwest and Yukon Territories.

The sampling technique includes five steps based on probability techniques (stratification by geographic region, stratification by community size, selection of interviewing locations, selection of census tracts and selection of blocks). The selection of households takes place starting with a specified household within the block. Strict quotas are imposed concerning age group, sex and women working outside the home in order to ensure proportional representation of each group in the sample.

The stratification of the sample by six regions and by four community sizes enhances the accuracy of results for key subgroups, such as smaller regions and francophones. The data for each region and community size stratum are weighted by the computer proportionate to population so that the results as a whole are truly representative.

Ten per cent of each interviewer's work is validated by CROP's field department to ensure that the interviews were conducted courteously and completely.

Prior to inaugurating the CROP Report, we previously presented tables indicating the completion rate and the distribution of non-respondents (refusals, prolonged absence, illness, etc.) in all CROP in-home surveys. We no longer do so for in-home surveys because of our decision to use a modified probability sample, as described above, rather than a strict probability sample. There is increasing evidence which leads us to believe that the use of the former sampling technique can diminish the problems which result from an increasing non-response rate which is common to all North American survey research. Unfortunately, mathematical science is not sufficiently advanced to determine precisely the margin of error of data derived from such samples. The reader may therefore wish to use margins of error based on strict probability samples as an estimate of the variation inherent in the sample. Thus, a national sample of this size provides an estimated accuracy of results within  $\pm 3\%$  in 19 cases out of 20. The error margin is somewhat larger for sub-groups of the sample.

#### Socio-Demographic Data

Fourteen standardized breakdowns used for the CROP Report are shown for every substantive question asked in this study. Most of these socio-demographic breakdowns require no explanation. Income is the annual income of all family members living in the same household. Geographic areas are established by provincial boundaries. Community size is defined by stratum according to city size: A - 1,000,000 inhabitants and more; B - 100,000 to 999,999 inhabitants; C - 5,000 to 99,999 inhabitants and D - under 5,000 inhabitants. Federal political orientation is based on how people regard their own political leanings at the time of the interview. Union membership is based on information supplied by the respondent. The language is that used most frequently at home.

#### Percentages Not Totaling 100%

The computer rounds off each percentage to the nearest whole percent. As a result, the percentages in a given column of figures frequently add to 99 or 101 rather than 100. Note that the percentages reflect weighting factors for each region and community size stratum so that results be truly representative. On the following pages, the sample of respondents shown for each group represents the actual number of respondents interviewed in this survey.

34.C Here is a list of foods and services many people use. Please tell me, if compared to a year ago, you are using more, less or about the same of each item or service or if you don't use it at all.

(ROTATE)	Using more	Using less	Using same amount	Don't use	Don't know	
( ) beef . . . . .	1	2	3	4	9	(21)
( ) pork . . . . .	1	2	3	4	9	(22)
( ) poultry . . . . .	1	2	3	4	9	(23)
( ) fish . . . . .	1	2	3	4	9	(24)
( ) butter . . . . .	1	2	3	4	9	(25)
( ) cheese . . . . .	1	2	3	4	9	(26)
( ) cereal, bread and bakery products .	1	2	3	4	9	(27)
( ) convenience foods (frozen meals, canned stews) . . . . .	1	2	3	4	9	(28)
( ) take-out foods, i.e. deli, hot pizzas, hot chicken, chinese foods . . . . .	1	2	3	4	9	(29)

35.C In the last twelve months, food prices were going up quite rapidly. Which of the following, if any, did you do?

(30)

CARD "E"

- a) No change, you bought and ate the same kinds and same amounts of foods you had before . . . . . 1
- b) You bought some less expensive foods, that you did not like as much but you ate the amounts you wanted . . . . . 2
- c) You ate the same kinds of food, but you decreased the amounts you bought . . . . . 3
- d) You sometimes could not afford to buy the kinds and the amounts of foods you wanted, and did without. . . . . 4
- none of these. . . . . 5
- other. . . . . 6
- don't know . . . . . 9

DO NOT READ

36.C In your opinion, is the issue of rising food prices one that you have learned to cope with, is it one that greatly worries you, or is it someplace in between?

(31)

- learned to cope. . . . . 1
- greatly worries. . . . . 2
- someplace in between . . . . . 3
- don't know . . . . . 9

37.C Could you tell me if, in the past 12 months when you were buying food, your concern about choosing a nutritious diet was the same, greater or less than last year, or if you were not concerned at all? (32)

the same concern. . . . .	1
greater concern . . . . .	2
less concern. . . . .	3
not concerned . . . . .	4
does not apply. . . . .	5
don't know. . . . .	9

38.C Do you make it a practice to look for newspaper food ads on weekly specials, do you just happen to see the ads or do you practically never look for them? (33)

practice to look at ads. . . . .	1
just happen to see ads . . . . .	2
practically never look for them. . . . .	3
don't know . . . . .	9

39.C Could you tell me, in general, how many meals you buy away from home:

a) During a five day week? \_\_\_\_\_ /15 times (34)(35)  
b) During a two-day week-end? \_\_\_\_\_ /6 times (36)

40.C Would you say, in total, that this is more, fewer or about the same number of meals bought away from home as last year? (37)

more meals. . . . .	1
fewer meals . . . . .	2
about the same number . . . . .	3
don't know. . . . .	9
