Trademarks Journal

Vol. 69 No. 3522

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Goods

Class 01

(1) Chemicals and fertilizers for use in agriculture, horticulture and forestry; chemicals for use in the treatment and conditioning of water and liquid manure; emulsifiers for use in the manufacture of foods and pharmaceuticals; refrigerants; grease-removing preparations for use in manufacturing processes; reagents used for the quantitative determination of nitrogen and other elements in chemical substances; antibody reagents; reagents for use in polymerase chain reaction for DNA sequencing; additives for use in the food processing and pharmaceuticals industries; unprocessed artificial resins; unprocessed plastics; fire extinguishing compositions; chemical substances for preserving foodstuffs; synthetic resin adhesives for industrial purposes

Class 02

(2) Livestock markers, namely spray cans and markers for the color marking of animals; tracer dye for use in weed killing and in agriculture

Class 03

(3) Cleaning preparations for use in agriculture (other than for office use), namely acid based cleaning preparations for removing milkstone, water scale and rust from pipelines, bulk tanks, milking machines, and inflations and liners in the dairy industry; cleaning preparations for milkers, milk-handling equipment and systems for dairy farms and food contact surfaces; cleaning preparations for milking installations, milking stalls and milk-conveying components; cleaning preparations, namely purging agents for removing protein deposits from dairy milking equipment; cleaning preparations (hygienic products) for milking installations, milking parlours and their parts, milk conveying components, milk producing animals as well as for buildings for milk producing animals; detergents for use in the dairy industry; laundry additives for water softening; disinfectant soaps; skin care preparations; cloths impregnated with a detergent for cleaning; chemical agents for use in cleaning processes in the food processing industry, namely the dairy industry

Class 04

(4) Industrial oils and greases; mineral and non-mineral oil for industrial purposes, namely for machinery; all purpose lubricants; industrial lubricating oils; mineral lubricating oils; dust binding compositions for industrial purposes, namely, dust binding compositions to control dust pollution

and dust binding compositions for sweeping; motor fuel; illuminants, namely illuminating wax and greases for industrial purposes; candles and wicks for lighting

Class 05

(5) All purpose disinfectants and antiseptics preparations; bactericides; disinfectants for dairy animals, for milkers and for machines, devices and other equipment used in the dairy industry; teat disinfectants; veterinary pharmaceutical preparations for treatment of respiratory and reproductive diseases affecting dairy animals; bacteria poisons; antiseptic sprays in aerosol form; mineral supplements for animal feed; dietary supplements for general health and well-being and for promoting weight-loss; iodine; animal feed additives; fodder additives for medical purposes; milking grease; antiparasitic preparations; algaecides; preparations in the form of liquids or powders for removing moss; fly combating preparations; lice destroying preparations; insect repellents; biocides; preparations for destroying vermin; germicides for use in the food processing industry, namely the dairy industry; acid and germicidal detergents for use in clean-in-place (CIP) systems in the food industry and the dairy industry

Class 06

(6) Common metals and their alloys; materials of metal for railway tracks; non-electrical elevator cables, non-electrical lifting cables, wire of common metal; irons and steels; metal pipes for liquid and gas transfer; water-pipes of metal; common metals, unwrought and semi-worked, for further manufacture; water-pipe valves of metal; metal expansion joints, namely metal expansion joints for piping and ducting, metal expansion joints for floors and walls; industrial water tanks of metal; metal storage tanks; steel rods; ground tubes of steel; pipework, fittings of metal for pipes, and flanges of metal; fittings of metal for compressed air ducts; animal stalls of metal, milking parlours of metal, milk storage containers of metal, milk cooling tanks, animal stall drainage channels of metal, animal crowding tubs of metal, animal stall gates of metal, animal stall guards of metal, animal stall doors of metal, animal stall portals of metal, animal stall barriers of metal, animal stall grates of metal, and their parts and fittings; earmarks of metal for livestock; packaging containers of metal; containers of metal for chemicals, compressed gases and liquids; closures of metal for containers; containers of metal for compressed gas or liquid air; pipe jackets of metal; tubes of metal for transferring water, waste and gas

Class 07

(7) Motors and engines used in industrial applications; emulsifying machines and homogenizers for chemical processing and food production; brewing machines, namely beer brewing machines for commercial purposes; kneading machines; fodder mixing machines; food mixing machines for commercial use; drills for the mining industry; electrical drills; well drilling machines; electric knives; blade holders being parts of electric food slicers and for shear processors in the pharmaceutical industry; shaping machines for metalworking; compression moulding machines; centrifugal mills, feed mills, grinding mills for chemical processing, tubing mills for metalworking; electric ice crushing machines; motors, pumps and compressors for refrigerators and freezers; centrifugal mixers; electric powder mixers; reverse osmosis machines for increasing the concentration of dissolved substances in liquids, oil filters, gas filters for motors, decanters and centrifuges; cartridges for milk filtering machines; rotating sieve cleaning brush; cyclones; oil separators; filters, namely air filters, gas filters, oil filters, for engines and motors; membrane filters for use as parts of machines; sieve trays for use in industrial machines used for sieving, screening, sorting and separating bulk materials; compressors as parts of machines, motors and engines; fans for motors and engines; fans for the compression, sucking and carrying of grain; pumps as parts of machines, motors and engines; hydraulic pumps; pneumatic pumps; blowing machines for the compression, exhaustion and transport of gases; blowing machines for the compression, sucking and carrying of

grain; pump diaphragms; industrial suction machines for the extraction of solid, liquid and gaseous substances, namely suction pumps, gas suction machines, oil suction machines, air-suction machines, dust suction machines, vacuum suction machines; suction cups for milking machines; food and beverage processing and preparation equipment, namely butter machines, computer-operated and non-computer-operated machines and installations for the processing, further processing and packaging of foodstuffs, namely meat, poultry, fish, cheese, potatoes, vegetables and other vegetarian products, in particular electric knives, grain mills, mixers (machines), emulsifying machines, machines for sausage production, flour mill machines, power-operated flour mills, bread cutting machines, as well as automatic machines for the storage and packaging of foodstuffs, vacuum packing machines and machines for the production, processing and refining of foodstuffs, the manufacture, processing and refining of food and beverages; cutting machines for metalworking; fodder cutting machines; food cutting machines for commercial use; electric food slicers; sausage making machines; labelling machines (other than for office use), namely, label guns; earth moving scrapers; agitators for chemical processing; palletisers; elevators; bottle filling machines; bottle washing machines; bottle capping machines; conveyors; belt conveyors; manure augers; vacuum packing machines; packaging machines; wrapping machines; foil wrapping machines; engines for industrial machinery; motors and engines used in industrial applications; crankcases for machines, motors and engines; pistons (parts of machines and engines); steam traps; valves being parts of machines; multi-purpose steam cleaner; electric power generators and steam heated evaporation plants; electricity generators; machines for the energy technology in the nature of electric generators (machines), thermal energy converters, namely thermoelectric generators for converting thermal energy into electricity, steam engines (machines), centrifugal separators for separating fuel oils and lube oils for turbines and diesel engines in power plants, solid-wall bowl separators for power plants, machines for removing water, solid particles, catalytic fines from fuel oils in engines, fuel oil conditioning systems consisting of centrifuges, feed pumps, mixing units for diluting crude oil with wash water, and chemical dosing units for dehydrating and desalting crude oil, decanter centrifuges for sludge dewatering, decanter centrifuges for wastewater purification, machines for separation of solids, namely clarifying, dewatering, separating, classifying, extraction and dilution decanter centrifuges for the removal of solids, decanter centrifuges for water separating; compressors for refrigerators; granulating machines for use in the food processing and pharmaceutical industry; agglomerator machines for use in the foods processing and pharmaceutical industry; laminating machines for use in the food processing and pharmaceutical industry; water distillers for use in food processing and pharmaceutical industry; machine tools, namely metal working machine tools; machines and installations composed thereof for applying the spraying technology and for spray drying technology for commercial purposes, namely spray dryers, rotary atomizers for spray drying, paint spraying machines, spray granulators and spray cleaning machines; wheel tractor-scrapers for earth moving; agricultural land fertilizing equipment; agricultural equipment for seeding; electric machines for the processing of foodstuffs, namely electric pasta making machines; fodder presses; rotary milking parlors for cow milking; semi-automatic and automatic milking machines; component parts for milking machines; cow milking pumps; udder washing and spraying machines; electronic feeder for livestock; milking parlor equipment, namely manure scrapers; tractor-towed farm implements, namely trailers, manure spreaders; waste management systems, processing systems and recovery systems for manure, slurry and other animal waste, namely pumps or scrapers for the transport of solid and liquid animal excretions as well as presses for the separation of undigested solid elements; mechanized livestock feeders; machines and machine-operated equipment for cleaning and disinfecting purposes for use in the processing industry, namely the food processing industry, in particular the dairy industry, namely machines for the disinfection of teats and hooves; installations and components for processing and the disposal of manure and

slurry for the generation of energy, namely pumps and conveyors; sweeping machines and cleaning machines, namely steam cleaning machines; stable cleaning machines, namely machines for blast cleaning a surface and cleaning appliances utilizing steam; road rollers; industrial robots; aerocondensers; mechanical watering systems for livestock; vacuum packaging machines; vacuum installations being parts of milking machines; bottling machines for the bottling of solid, pasty and liquid substances and of heterogeneous substance mixtures; pumps for the food processing industry, namely milking machine pumps; extractors for milking clusters, namely machines for removing the milking equipment from the udder; thermostatic control valves for machines; angle valves for use with machines; farm milking machinery, namely milk transfer hoses

Class 08

(8) Shovels; pliers

Class 09

(9) Automatic valves, pressure indicating plugs for valves; temperature sensors; thermostats; electronic controllers for food (e.g. milk) pipeline washers; electronic tags for use in automatic recognition of animals; electric control panels for monitoring and operating milking systems; instruments for measuring milk quality parameters; time and temperature recorders; industrial apparatus for use in visual inspection of food; telemeters; electroacoustic transducers; flow meters; pressure gauges; refractometers; spectrometers; infra-red thermometers; meat thermometers; laboratory thermometers; remote controls for operating cow milking equipment; dosage dispensers; electronic animal identification apparatus; vacuum gauges; scales, namely truck scales, lever scales; laboratory scales and balances; instruments for climate monitoring and climate control, namely, thermostats and hygrometers; data processing equipment, namely computers; motions sensors; optical sensors; pressure sensors; proximity sensors; sensors for determining temperature; timing sensors; electromagnetic measuring detectors; computer scanners (other than for office use); image scanners (other than for office use); laser scanners; optical scanners (other than for office use); luminescence scanners; responders for monitoring cow fertility, eating times, mobility; transmitters attached to cows for automatic recognition of animals, for supply of feed and fodder concentrate, for cow estrous detection, for determination of milk quantities and quality, for determination of milk temperatures, and for determination of washing temperatures; receivers attached to cows for automatic recognition of animals, for supply of feed and fodder concentrate, for cow estrous detection, for determination of milk quantities and quality, for determination of milk temperatures, and for determination of washing temperatures; transponders attached to cows for automatic recognition of animals, for supply of feed and fodder concentrate, for cow calendar, for determination of milk quantities and quality, for determination of milk temperatures, and for determination of washing temperatures; current converter; neck tags (electronic transmission and reception apparatus) and responders for livestock, namely, RFID tags; safety boots; disposable gloves for use in agriculture; insulated clothing for protection against accidents or injury; safety goggles; computer software for setting up and configuring local area networks; computer software to enable the transmission of computer data in the field of dairy industry and plant control, digital images and photographs to portable computers, mobile computers, mobile phones, smart phones, portable telephones via a global computer network; computer software for use in remotely controlling of manufacturing processes in the fields of metalworking, agriculture, horticulture, dairy industry, food industry; computer software for use in troubleshooting of computer hardware and software problems in the fields of metalworking, agriculture, horticulture, dairy industry, food industry via mobile phones, smartphones, and computers; dairy herd management software and computer hardware for use in connection with the dairy herd management; optical lenses; optical amplifiers; closed-circuit video observation systems comprised of closed circuit television camera and video monitor; electric relays; electronic

publications regarding agriculture, horticulture and forestry, downloadable; printed circuit boards; load cells; pressure relief valves; chromatography apparatus for industrial purposes

Class 10

(10) Apparatus for stimulating the udder of dairy cattle; apparatus for monitoring the health status of livestock, namely, thermometers, blood pressure monitors

Class 11

(11) Apparatus for lighting, heating, steam generating, cooking, refrigerating, drying, ventilating, water supply as well as sanitary installations, namely, heating pumps, electric radiant heaters, gas water heaters, electric space heaters, steam generating installations, gas stoves, electric refrigerators, air drying apparatus in the nature of air drying machines for agriculture, ventilating fans, water fountain machines, sanitary bath installations, lighting fixtures, heat generators and cooking stoves; air treatment apparatus, namely, industrial air purifiers, air filtering installations, electric air deodorizers, air filters for industrial installations, filters and filter devices gas conditioning, filters for air conditioning, filters for refrigerators; electric air deodorizers; air purifying units; ventilation hoods; commercial and industrial dehumidifiers; air filtering units for removing dust from the air; heating, ventilating and air conditioning (HVAC) systems consisting of industrial furnaces, air conditioners, thermostats, ventilation ducts, ventilating fans; heat-recovery units for use in the dairy industry and for air conditioning; air conditioners; electric fans for industrial purposes; air valves for steam heating installations; level controlling valves in tanks; wet cooling towers and dry cooling towers with natural ventilation and forced ventilation for the cooling of liquid and vaporous media; gas burners, industrial boilers, heating boilers, electric boilers, water heaters, filaments for electric space heaters, furnace grates, furnace ash boxes, heat accumulators, gas generating furnaces for industrial purposes, immersion heaters, pipes for heating boilers, coal, gas and electric stoves, incinerators and thermostatic valves, radiators, heating elements; heat exchangers, not parts of machines; heat regenerators; industrial furnaces; air preheaters (APH) as part of industrial installations for use in the field of plant engineering; heat pumps; steam accumulators; heat accumulators; stoves; incinerators; electric refrigerators for industrial purposes; refrigerators; cooling units for use in food processing and food producing industry, namely wet water cooling towers and dry air cooling towers with natural ventilation and forced ventilation for the cooling of liquid and vaporous media, water cooling apparatus, cooling installations, in particular for foodstuffs, namely milk cooling installations, cooling and refrigerating installations for the construction industry for the cooling of concrete, and cooling and refrigerating installations for the mining industry, namely air conditioning installations and refrigerators; refrigerating chambers; ice machines; refrigerating condensers; water cooling machines; cooling units for the cooling of concrete; cooling and refrigerating installations for sports and leisure facilities, namely air conditioning installations and refrigerators; refrigerating shipping containers; ice making machines; led luminaires; electric discharge tubes for lighting; infrared and ultraviolet lamps not for medical purposes; sinks; flexible pipes being parts of basin plumbing installations, flexible pipes being parts of bath plumbing installations, flexible pipes being parts of shower plumbing installations, flexible pipes being parts of sink plumbing installations; milk sterilizers, sterilizers for waste treatment, sterilizers for water treatment; urinals; milk sterilizers; autoclaves for industrial purposes; water sterilizers; desalination plants; water conditioning units; electric water purifiers for industrial purposes; reverse osmosis water purification units; agricultural irrigation units; water treatment chlorinator units; water treatment plant filters; filters for drinking water; sterilizers for milk (not for medical purposes); sterilizers for water and waste water treatment (not for medical purposes); bread oven; bread baking machine; bread toasters; electric cooking appliances as part of industrial food processing installations; electric apparatus for making yoghurt; electric coffee percolators; electric coffee machines; electric pressure cooking saucepans; heating plates; electric hotplates;

structural plates for ovens; industrial cooking ovens; electric deep fryers; cooker hoods for industrial use, namely ventilation hoods; electric cooking pots for industrial purposes; electric kettles; coffee bean roasting machines; food dehydrators; infrared and microwave ovens for industrial purposes; pasteurizers; industrial microwave ovens and furnaces, not for food or beverages; heat exchangers for chemical processing; water distillation units; water treatment equipment for industrial use, namely, water filtration units and reverse osmosis units, water desalination plants, water purifying apparatus, sewage treatment plants, water cooling towers and level controlling valves in tanks; gas purification machines; water filtering units for domestic use; sewage treatment plants; waste milk purification units for waste milk; freeze dryers, namely apparatus for freezing food by means of low temperature dehydration; rotary dryers; air dryers, namely apparatus for use in removing water vapor from compressed air; apparatus for drying materials by using the flash drying technology; heating elements; heating radiators; electrical control systems for heating and air conditioning systems; water heaters; desiccating units for removing water from the air in dehumidification systems; humidifiers; membrane water filtering units for industrial use; separators for the cleaning and purification of air; water purification, water treatment, water supply and water desalination installations and equipment, namely, water purification machines, water desalination plants and water conditioning units, all for industrial use; evaporators for chemical processing; separators for the cleaning and purification of gaseous and liquid media; waste heat recovery ventilators (HRVs) and energy recovery ventilators (ERVs); fluidized bed reactors (FBR); fluid bed processors for use in the pharmaceutical industry; spray-dryers and spray-granulators, namely apparatus for producing a dry powder from liquids; automatic watering installations for use in the livestock farming; pressure water tanks; water softening units; water heaters; germicidal lamps for purifying air; electric coffee filters; filters for air conditioning units; chimney blowers; chimney flues; flues for heating boilers; oven gas igniters; air ionizers for use in the field of plant engineering and agriculture; flue gas condensers; valves being parts of sanitary, heating, steam generating, cooking, refrigerating, drying, ventilating and water supply installations, namely air valves for steam heating installations, flushometer valves; microwave ovens for industrial purposes; fabric steamers; heat exchangers; heat exchangers for chemical processing; water desalination systems; ice making machines for use in food processing industry; machines for the energy technology in the nature of heat exchangers and heat recovery units

Class 17

(12) Crude rubber, raw rubber, rubber derivatives, rubber for use in the manufacture, gutta-percha, raw gum, semi-worked gum, unprocessed gum, asbestos, mica; plastic packing for shipping containers; plastic pellets for packing; teat rubber, namely, silicone rubber for teats for the dairy industry; flexible plastic pipes, tubes, hoses for conveying natural gas and for plumbing purposes, and fittings thereof and manually operated valves of rubber; seals of metal for pipes; seals of metal for preventing leakage of fluids; insulation jackets for industrial pipes

Class 18

(13) Leads, straps, chains and harness of leather and imitation leather, for animals

Class 19

(14) Rigid plastic tubes for use in the field of plant engineering and agriculture; building construction materials for construction of animal stalls in the nature of timber, adhesive mortar, bonding mortar, building boards not of metal, building cardboard, building stone, common sheet glass, concrete poles, concrete slabs, concrete walls, logs, planks of wood, plaster

Class 20

(15) Mirrors, picture frames; water-pipe valves of plastic for use in the field of plant engineering; cupboards for the dairy industry; tanks, not of metal nor of masonry, namely, plastic storage tanks and wood storage tanks; boxes made of wood and plastic; fodder racks

Class 21

(16) Water troughs; feeding troughs; troughs for livestock; cookware; food storage containers; beverage containers; cups; paper and plastic cups; plastic bottles; rotating cylindrical brush for livestock

Class 25

(17) Shirts, t-shirts, jackets, wind-resistant jackets, sweatshirts, vests, sweaters, sweat pants, ties, gloves and overalls; hats; caps

Class 27

(18) Floor coverings and artificial ground coverings for use in dairy industry, namely, dairy animal stall floor mats and cushioned bedding mats for livestock which are laid on the floor of animal stalls; stall mats, bedding mats and cushioned bedding mats for livestock which are laid on the floor of animal stalls; mats for use in cattle sheds

Services

Class 35

(1) Advertising agencies; marketing analysis services; publication of publicity texts; public relations; market studies; market analysis; computerized inventory control; business appraisals; business administration and management; business management consultancy; business administration consultancy; business consulting services for dealers and dealership personnel in the dairy production industry in the field of dealership route management, namely, sales territory development planning, sales and marketing planning, sales techniques, sales route management planning, business manpower management, and business operations management; business consulting in the field of general business management for dealers and dealership personnel in the dairy production and herd health industry; accountancy and book keeping; consulting services in business organization and management; business planning; business advisory services for traders and the branch office staff in the milk-producing industry in the field of branch management, namely planning of the sales area development, sales planning and marketing planning, distribution techniques, distribution route management planning, personnel management and operational management; updating and maintenance of data in computer databases; business project management services for construction projects; business strategy development services; management and compilation of computerized databases; business feasibility studies; import-export agency services; retail and wholesale services of pharmaceutical, veterinary and sanitary preparations

Class 36

(2) Insurance; trust company services; financial trust management

Class 37

(3) Building construction; installation, repair and maintenance of emission control systems for use in controlling and treating industrial emissions, namely gas cleaning systems and gas scrubbers, pressure gauges, thermometers, level detection probes in tanks, freeze dryers, instruments for measuring milk quality parameters, in piping systems to monitor the production process, namely optical character recognition apparatus, intelligent copiers, bar code readers, and bar code scanners, electronic monitors for use in monitoring maintenance intervals for industrial purposes, LCD panels, touch panels, electronic control systems for use in automated manufacturing,

beverage process automation, dairy process automation, food process automation, electric control panels, energy management, plant irrigation, plant nutrient management; installation, repair and maintenance of electrical systems; building construction supervision; automobile cleaning and car washing; retrofitting of industrial plants; repair and maintenance of industrial plants; repair and maintenance of valves and pumps for industrial purposes; installation, maintenance and repair of plants on farms; leasing of construction equipment; leasing of heavy equipment; installation maintenance and repair of industrial machines and equipment for use in chemical, pharmaceutical, cosmetic, food and beverage, agriculture, dairy, oil extracting and oil processing, energy production, waste water treatment, metal processing industries, namely, motors and engines used in industrial applications, emulsifying machines and homogenizers for chemical processing and food production, brewing machines, namely beer brewing machines for commercial purposes, kneading machines, fodder mixing machines, food mixing machines for commercial use, drills for the mining industry, electrical drills, well drilling machines, electric knives, blade holders being parts of electric food slicers and for shear processors in the pharmaceutical industry, shaping machines for metalworking, compression moulding machines, centrifugal mills, feed mills, grinding mills for chemical processing, tubing mills for metalworking, ice making machines for use in food processing industry, electric ice crushing machines, motors, pumps and compressors for refrigerators and freezers, centrifugal mixers, electric powder mixers, reverse osmosis machines for increasing the concentration of dissolved substances in liquids, oil filters, gas filters for motors, decanters and centrifuges, cartridges for milk filtering machines, rotating sieve cleaning brush, cyclones, oil separators, filters, namely air filters, gas filters, oil filters, for engines and motors, membrane filters for use as parts of machines, sieve trays for use in industrial machines used for sieving, screening, sorting and separating bulk materials, compressors as parts of machines, motors and engines, fans for motors and engines, fans for the compression, sucking and carrying of grain, pumps as parts of machines, motors and engines, hydraulic pumps, pneumatic pumps, blowing machines for the compression, exhaustion and transport of gases, blowing machines for the compression, sucking and carrying of grain, pump diaphragms, industrial suction machines for the extraction of solid, liquid and gaseous substances, namely suction pumps, gas suction machines, oil suction machines, air-suction machines, dust suction machines, vacuum suction machines, suction cups for milking machines, food and beverage processing and preparation equipment, namely butter machines, computer-operated and non-computer-operated machines and installations for the processing, further processing and packaging of foodstuffs, namely meat, poultry, fish, cheese, potatoes, vegetables and other vegetarian products, in particular electric knives, grain mills, mixers (machines), emulsifying machines, machines for sausage production, flour mill machines, power-operated flour mills, bread cutting machines, as well as automatic machines for the storage and packaging of foodstuffs, vacuum packing machines and machines for the production, processing and refining of foodstuffs, the manufacture, processing and refining of food and beverages, cutting machines for metalworking, fodder cutting machines, food cutting machines for commercial use, electric food slicers, sausage making machines, labelling machines (other than for office use), namely, label guns, earth moving scrapers, agitators for chemical processing, palletisers, elevators, bottle filling machines, bottle washing machines, bottle capping machines, conveyors, belt conveyors, manure augers, vacuum packing machines, packaging machines, wrapping machines, foil wrapping machines, engines for industrial machinery, motors and engines used in industrial applications, crankcases for machines, motors and engines, pistons (parts of machines and engines), steam traps, valves being parts of machines, multi-purpose steam cleaner, electric power generators and steam heated evaporation plants, electricity generators, machines for the energy technology in the nature of electric generators (machines), thermal energy converters, namely thermoelectric generators for converting thermal energy into electricity, steam engines (machines), centrifugal separators for separating fuel oils and lube oils

for turbines and diesel engines in power plants, solid-wall bowl separators for power plants, machines for removing water, solid particles, catalytic fines from fuel oils in engines, fuel oil conditioning systems consisting of centrifuges, feed pumps, heat exchangers, mixing units for diluting crude oil with wash water, heat recovery units, and chemical dosing units for dehydrating and desalting crude oil, decanter centrifuges for sludge dewatering, decanter centrifuges for wastewater purification, machines for separation of solids, namely clarifying, dewatering, separating, classifying, extraction and dilution decanter centrifuges for the removal of solids, decanter centrifuges for water separating, compressors for refrigerators, granulating machines for use in the food processing and pharmaceutical industry, agglomerator machines for use in the foods processing and pharmaceutical industry, laminating machines for use in the food processing and pharmaceutical industry, water distillers for use in food processing and pharmaceutical industry, machine tools, namely metal working machine tools, machines and installations composed thereof for applying the spraying technology and for spray drying technology for commercial purposes, namely spray dryers, rotary atomizers for spray drying, paint spraying machines, spray granulators and spray cleaning machines, wheel tractor-scrapers for earth moving, agricultural land fertilizing equipment, agricultural equipment for seeding, electric machines for the processing of foodstuffs, namely electric pasta making machines, fodder presses, rotary milking parlors for cow milking, semi-automatic and automatic milking machines, component parts for milking machines, cow milking pumps, udder washing and spraying machines, electronic feeder for livestock, milking parlor equipment, namely manure scrapers, tractor-towed farm implements, namely trailers, manure spreaders, waste management systems, processing systems and recovery systems for manure, slurry and other animal waste, namely pumps or scrapers for the transport of solid and liquid animal excretions as well as presses for the separation of undigested solid elements, mechanized livestock feeders, machines and machine-operated equipment for cleaning and disinfecting purposes for use in the processing industry, namely the food processing industry, in particular the dairy industry, namely machines for the disinfection of teats and hooves, installations and components for processing and the disposal of manure and slurry for the generation of energy, namely pumps and conveyors, sweeping machines and cleaning machines, namely steam cleaning machines, stable cleaning machines, namely machines for blast cleaning a surface and cleaning appliances utilizing steam, road rollers, industrial robots, aerocondensers, mechanical watering systems for livestock, vacuum packaging machines, vacuum installations being parts of milking machines, bottling machines for the bottling of solid, pasty and liquid substances and of heterogeneous substance mixtures, pumps for the food processing industry, namely milking machine pumps, extractors for milking clusters, namely machines for removing the milking equipment from the udder, thermostatic control valves for machines, angle valves for use with machines, farm milking machinery, namely milk transfer hoses, automatic valves, pressure indicating plugs for valves, temperature sensors, thermostats, electronic controllers for food (e.g. milk) pipeline washers, electronic tags for use in automatic recognition of animals, electric control panels for monitoring and operating milking systems, instruments for measuring milk quality parameters, time and temperature recorders, industrial apparatus for use in visual inspection of food, telemeters, electroacoustic transducers, flow meters, pressure gauges, refractometers, spectrometers, infra-red thermometers, meat thermometers, laboratory thermometers, remote controls for operating cow milking equipment, dosage dispensers, electronic animal identification apparatus, vacuum gauges, scales, namely truck scales, lever scales, laboratory scales and balances, instruments for climate monitoring and climate control, namely, thermostats and hygrometers, data processing equipment, namely computers, motions sensors, optical sensors, pressure sensors, proximity sensors, sensors for determining temperature, timing sensors, electromagnetic measuring detectors, computer scanners (other than for office use), image scanners (other than for office use), laser scanners,

optical scanners (other than for office use), luminescence scanners, responders for monitoring cow fertility, eating times, mobility, transmitters attached to cows for automatic recognition of animals, for supply of feed and fodder concentrate, for cow estrous detection, for determination of milk quantities and quality, for determination of milk temperatures, and for determination of washing temperatures, receivers attached to cows for automatic recognition of animals, for supply of feed and fodder concentrate, for cow estrous detection, for determination of milk quantities and quality, for determination of milk temperatures, and for determination of washing temperatures, transponders attached to cows for automatic recognition of animals, for supply of feed and fodder concentrate, for cow calendar, for determination of milk quantities and quality, for determination of milk temperatures, and for determination of washing temperatures, current converter, neck tags (electronic transmission and reception apparatus) and responders for livestock, namely, RFID tags, safety boots, disposable gloves for use in agriculture, insulated clothing for protection against accidents or injury, safety goggles, computer software for setting up and configuring local area networks, computer software to enable the transmission of computer data in the field of dairy industry and plant control, digital images and photographs to portable computers, mobile computers, mobile phones, smart phones, portable telephones via a global computer network, computer software for use in remotely controlling of manufacturing processes in the fields of metalworking, agriculture, horticulture, dairy industry, food industry, computer software for use in troubleshooting of computer hardware and software problems in the fields of metalworking, agriculture, horticulture, dairy industry, food industry via mobile phones, smartphones, and computers, dairy herd management software and computer hardware for use in connection with the dairy herd management, optical lenses, optical amplifiers, closed-circuit video observation systems comprised of closed circuit television camera and video monitor, electric relays, electronic publications regarding agriculture, horticulture and forestry, downloadable, printed circuit boards, load cells, pressure relief valves, chromatography apparatus for industrial purposes, apparatus for lighting, heating, steam generating, cooking, refrigerating, drying, ventilating, water supply as well as sanitary installations, namely, heating pumps, electric radiant heaters, gas water heaters, electric space heaters, steam generating installations, gas stoves, electric refrigerators, air drying apparatus in the nature of air drying machines for agriculture, ventilating fans, water fountain machines, sanitary bath installations, lighting fixtures, heat generators and cooking stoves, air treatment apparatus, namely, industrial air purifiers, air filtering installations, electric air deodorizers, air filters for industrial installations, filters and filter devices gas conditioning, filters for air conditioning, filters for refrigerators, electric air deodorizers, air purifying units, ventilation hoods, commercial and industrial dehumidifiers, air filtering units for removing dust from the air, heating, ventilating and air conditioning (HVAC) systems consisting of industrial furnaces, air conditioners, thermostats, ventilation ducts, ventilating fans, heat-recovery units for use in the dairy industry and for air conditioning, air conditioners, electric fans for industrial purposes, air valves for steam heating installations, level controlling valves in tanks, wet cooling towers and dry cooling towers with natural ventilation and forced ventilation for the cooling of liquid and vaporous media, gas burners, industrial boilers, heating boilers, electric boilers, water heaters, filaments for electric space heaters, furnace grates, furnace ash boxes, heat accumulators, gas generating furnaces for industrial purposes, immersion heaters, pipes for heating boilers, coal, gas and electric stoves, incinerators and thermostatic valves, radiators, heating elements, heat exchangers, not parts of machines, heat regenerators, industrial furnaces, air preheaters (APH) as part of industrial installations for use in the field of plant engineering, heat pumps, steam accumulators, heat accumulators, stoves, incinerators, electric refrigerators for industrial purposes, refrigerators, cooling units for use in food processing and food producing industry, namely wet water cooling towers and dry air cooling towers with natural ventilation and forced ventilation for the cooling of liquid and vaporous media, water cooling apparatus, cooling installations, in particular for

foodstuffs, namely milk cooling installations, cooling and refrigerating installations for the construction industry for the cooling of concrete, and cooling and refrigerating installations for the mining industry, namely air conditioning installations and refrigerators, refrigerating chambers, ice machines, refrigerating condensers, water cooling machines, cooling units for the cooling of concrete, cooling and refrigerating installations for sports and leisure facilities, namely air conditioning installations and refrigerators, refrigerating shipping containers, ice making machines, led luminaires, electric discharge tubes for lighting, infrared and ultraviolet lamps not for medical purposes, sinks, flexible pipes being parts of basin plumbing installations, flexible pipes being parts of bath plumbing installations, flexible pipes being parts of shower plumbing installations, flexible pipes being parts of sink plumbing installations, milk sterilizers, sterilizers for waste treatment, sterilizers for water treatment, urinals, milk sterilizers, autoclaves for industrial purposes, water sterilizers, desalination plants, water conditioning units, electric water purifiers for industrial purposes, reverse osmosis water purification units, agricultural irrigation units, water treatment chlorinator units, water treatment plant filters, filters for drinking water, sterilizers for milk (not for medical purposes), sterilizers for water and waste water treatment (not for medical purposes), bread oven, bread baking machine, bread toasters, electric cooking appliances as part of industrial food processing installations, electric apparatus for making yoghurt, electric coffee percolators, electric coffee machines, electric pressure cooking saucepans, heating plates, electric hotplates, structural plates for ovens, industrial cooking ovens, electric deep fryers, cooker hoods for industrial use, namely ventilation hoods, electric cooking pots for industrial purposes, electric kettles, coffee bean roasting machines, food dehydrators, infrared and microwave ovens for industrial purposes, pasteurizers, industrial microwave ovens and furnaces, not for food or beverages, heat exchangers for chemical processing, water distillation units, water treatment equipment for industrial use, namely, water filtration units and reverse osmosis units, water desalination plants, water purifying apparatus, sewage treatment plants, water cooling towers and level controlling valves in tanks, gas purification machines, water filtering units for domestic use, sewage treatment plants, waste milk purification units for waste milk, freeze dryers, namely apparatus for freezing food by means of low temperature dehydration, rotary dryers, air dryers, namely apparatus for use in removing water vapor from compressed air, apparatus for drying materials by using the flash drying technology, heating elements, heating radiators, electrical control systems for heating and air conditioning systems, water heaters, desiccating units for removing water from the air in dehumidification systems, humidifiers, membrane water filtering units for industrial use, separators for the cleaning and purification of air, water purification, water treatment, water supply and water desalination installations and equipment, namely, water purification machines, water desalination plants and water conditioning units, all for industrial use, evaporators for chemical processing, separators for the cleaning and purification of gaseous and liquid media, waste heat recovery ventilators (HRVs) and energy recovery ventilators (ERVs), fluidized bed reactors (FBR), fluid bed processors for use in the pharmaceutical industry, spray-dryers and spray-granulators, namely apparatus for producing a dry powder from liquids, automatic watering installations for use in the livestock farming, pressure water tanks, water softening units, water heaters, germicidal lamps for purifying air, electric coffee filters, filters for air conditioning units, chimney blowers, chimney flues, flues for heating boilers, oven gas igniters, air ionizers for use in the field of plant engineering and agriculture, flue gas condensers, valves being parts of sanitary, heating, steam generating, cooking, refrigerating, drying, ventilating and water supply installations, namely air valves for steam heating installations, flushometer valves, microwave ovens for industrial purposes, fabric steamers, heat exchangers, heat exchangers for chemical processing, water desalination systems; rental of oil extracting machines and mining machines

Class 39

(4) Merchandise packaging; packaging of articles for transportation; storage of refuse; storage of trash; storage of waste; refrigeration storage; providing information in the field of renting machines and apparatus for foodstuff packaging; rental of refrigerators

Class 40

(5) Technical consulting in the field of food processing; photographic processing; custom manufacture and assembly of industrial machines for use in the agricultural, chemical, pharmaceutical, cosmetic, food and beverage industries, namely agricultural machines, harvesting machines, chemical processing machines, machines for manufacture of pharmaceuticals and cosmetics, machines for manufacture of food and beverages; rental of oil processing machines, waste water treatment machines, metal-treating machines; rental of heating boilers; rental of food processing machines; providing information related to the rental of air conditioning apparatus and of chemical processing machines; providing information related to the rental of machines for use in the manufacture of food and beverages; providing information in the field of rental of room cooling units for commercial or industrial purposes; providing information in the field of rental of water purification apparatus

Class 41

(6) Providing of training in the fields of agricultural, chemical, pharmaceutical, cosmetic industries, food industry and beverage industry; arranging and conducting of seminars in the fields of food industry, beverage industry, pharmaceutical industry, chemical industry; training services for dairy producers and dealers and dealership personnel in the dairy production industry, namely, conducting workshops, seminars and classes, and individualized training in the field of dairy farm hygiene, namely, dairy farm equipment hygiene and animal hygiene, animal health, milking system analysis, and milking management; training services for dealers and dealership personnel in the dairy production industry, namely, conducting workshops, seminars and classes in the field of dealership route management and general business management, namely, financial planning and management, territory development planning, sales and marketing planning, sales techniques, route management planning, manpower management, and operations management; educational services, namely, arranging and conducting classes, seminars, symposiums, colloquiums, conferences, and workshops in the field of general business management for dealers and dealership personnel in the dairy production and herd health industry; computer training; translation services; publication and editing of printed matter; publication of brochures and catalogs; publication of periodicals and books in electronic form, namely on the Internet; publication of scientific reports on the fields of agriculture, horticulture, food and beverage products and chemical processing

Class 42

(7) Monitoring of computer system by remote access; mechanical engineering services, namely conversion and retrofitting of industrial technical devices and parts for the aforesaid devices, technical planning and monitoring, and engineering for controlling, managing and monitoring technical processes in industrial installations, all in the field of agricultural, chemical, pharmaceutical, cosmetic, food and beverage industry; physics research; construction drafting; architectural and urban planning services; medical research; consultancy in the field of energy-saving; research in the field of agricultural chemistry; design and development of computer hardware; data encryption services; computer network security services; software design, development, programming and implementation; computer programming; data mining; preparation of data processing programs; rental of computer software and computer hardware; validation and quality assurance with respect to software components and hardware components; technical

consultancy services in the nature of scientific analysis services to assist dairy producers in optimizing milk production performance and in maximizing milking efficiency by analyzing data related to milking vacuum levels, pulsation rates, ratios and characteristics, liner design and composition, milk production and dairy operator routines; industrial design; design and development of computer hardware and software; consultancy services for dairy producers in the field of water quality testing and analysis and maintenance assessment of the performance and reliability of milking and cooling systems and of the udder washing system function; technical consultancy services to assist dairy producers in optimizing milk production performance and in maximizing milking efficiency by analyzing data, namely, milking vacuum levels, pulsation rates, ratios and characteristics, liner design and composition, milk production and dairy operator routines; consultancy in the field of dairy parlor and dairy facilities by providing technological consultation on milking equipment, water quality monitoring, design and planning of milking boxes; consultancy in the field of numerical fluid mechanics and development of fluid-mechanical computer models; consultancy regarding technical research in the field of foodstuffs and beverages; consultancy in the field of biotechnology; consultancy in the field of pharmaceutical research; consultancy in the field of veterinary research; consultancy in the field of renewable energy; technical consultancy in the field of environmental science; chemical analysis for the optimization of hygiene in the food processing industry, namely on dairy farms; chemical analysis for trade and industry, namely the food processing industry and the dairy industry; provision of scientific information, advice and consultancy related to carbon offsetting; material testing; technical project management for the projection of industrial installations and machines, namely, consultancy services for others in the field of design, planning, and implementation project management of industrial installations; industrial design; electronic storage of computer data in the field of agriculture and plant engineering; data programming, namely, computer software programming; development of data processing programs by order of third parties; data programming for others, namely, computer software programming; technical consultancy and providing of expertise; construction planning; product design consulting services; research laboratories and laboratory testing services in the processing industries, namely the food, beverage, dairy, chemical, energy and pharmaceutical industries; electrical engineering services; chemical engineering; research, development and design of new machines and installations for others in the field of food processing and packaging; research in the processing industries, namely the food, beverage, dairy, chemical, energy and pharmaceutical industries; conducting chemical analyses; analysing of manufacturing processes; greenhouse gas emission measuring and analysis; materials testing and evaluation; calibration of electronic equipment

Class 44

(8) Horticulture services; livestock and cattle farming services; farming services in the field of fruits and vegetables; veterinary and agricultural advisory services; pest control and extermination in agriculture, horticulture and forestry; rental of agricultural equipment

Class 45

(9) Legal administration of licenses; granting of software licenses

Position

Visual Representation

Trademark Description

The trademark consists of the position of a label design applied to a three-dimensional bottle, as shown in the visual representation. The bottle shown in dashed lines does not form part of the trademark but is included merely to show the positioning of the design.

Colour Claim

Colour is claimed as a feature of the trademark. The trademark consists of the colour blue at the base of the design, followed by a strip of red, followed by yellow, which extends up the bottleneck. There is a blue, red, and yellow AMRIT mark on this bottleneck. The word AMRIT is in white on a blue banner and the circle and tree design are in blue on a yellow background. The top of the design is blue, followed by yellow. There is a blue, red, and yellow AMRIT mark on the top of the design. The word AMRIT is in white on a blue banner and the circle and tree design are in blue on a yellow background. These colours are applied to the visible surface of portions of the particular object, namely the bottle.

Three-dimensional (3-D)

Visual Representation

Trademark Description

The trademark consists of a three dimensional octagon-shaped martial arts fighting cage as depicted in the accompanying drawing. The lining is not intended to indicate colour or any feature of the trademark but rather to show depth perception. The doors into the ring and the chain link fencing shown in dotted lines do not form part of the distinguishing guise.

centralizers for downhole tools being centralizers for probe positioning, and software and firmware for use in data collection and data reporting of data collected by downhole tools, and system control of downhole exploration and production processes and downhole tools, downhole measurement and logging tools comprising sensors and data telemetry components, and parts and fittings for all of the foregoing goods; computer software for collecting, processing, reporting, and reviewing data collected by downhole sensors in hardware and equipment for oil and gas exploration and production; kits comprising hardware and equipment for oil and gas exploration and production, namely data telemetry transmitters; kits comprising hardware and equipment for oil and gas exploration and production, namely data telemetry receivers; kits comprising hardware and equipment for oil and gas exploration and production, namely surface equipment for transmitting and receiving data telemetry, namely data telemetry transmitters, data telemetry receivers, display computers, surface decoder and encoder software for processing telemetry data signals, surface antenna rods, surface downlink stakes made of conductive materials, electronic cables and connections; kits comprising hardware and equipment for oil and gas exploration and production, namely automated control systems comprising electrical control modules and software and firmware for use in data collection and data reporting of data collected by downhole tools and system control of downhole exploration and production processes and downhole tools; kits comprising hardware and equipment for oil and gas exploration and production, namely electronic display units for control systems of downhole exploration and production processes and downhole tools; kits comprising hardware and equipment for oil and gas exploration and production, namely pulse valves, namely electronic valves for controlling fluids; kits comprising hardware and equipment for oil and gas exploration and production, namely short hop transmitters and receivers; kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for temperature; kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for pressure; kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for formation evaluation properties such as gamma sensors and resistivity sensors; kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for current and voltage measurement of transmitted telemetry signals; kits comprising hardware and equipment for oil and gas exploration and production, namely inclination sensors; kits comprising hardware and equipment for oil and gas exploration and production, namely azimuth sensors; kits comprising hardware and equipment for oil and gas exploration and production, namely RPM sensors; kits comprising hardware and equipment for oil and gas exploration and production, namely acceleration sensors; kits comprising hardware and equipment for oil and gas exploration and production, namely shock sensors; kits comprising hardware and equipment for oil and gas exploration and production, namely vibration sensors; kits comprising hardware and equipment for oil and gas exploration and production, namely telemetry reception sensors; kits comprising hardware and equipment for oil and gas exploration and production, namely connectivity devices for establishing downhole networks namely, data telemetry transmitters and receivers, tool-to-tool interface probes, surface equipment for transmission and reception of telemetry, namely, display computers, surface decoder and encoder software for processing telemetry data signals, surface antenna rods, surface downlink stakes made of conductive materials, probes and downhole drill collars for downhole tools namely gap subs, probes and tool centralizers for downhole tools being centralizers for probe positioning, and software and firmware for use in data collection and data reporting of data collected by downhole tools, and system control of downhole exploration and production processes and downhole tools; kits comprising hardware and equipment for oil and gas exploration and production, namely downhole measurement and logging tools comprising sensors and data telemetry components; kits comprising hardware and equipment for oil and gas exploration and production, namely computer software for collecting, processing, reporting, and reviewing data

collected by downhole sensors in hardware and equipment for oil and gas exploration and production.

Services

Class 37

(1) Repair, maintenance and cleaning of hardware and equipment for oil and gas exploration and production, namely data telemetry transmitters, data telemetry receivers, centralizers for downhole tools being centralizers for probe positioning, surface equipment for transmitting and receiving data telemetry, namely data telemetry transmitters, data telemetry receivers, display computers, surface antenna rods, surface downlink stakes made of conductive materials, electronic cables and connections, automated control systems comprising electrical control modules, electronic display units for control systems of downhole exploration and production processes and downhole tools, pulse valves, namely electronic valves for controlling fluids, short hop transmitters and receivers, sensors, namely sensors for temperature, sensors for pressure, sensors for formation evaluation properties such as gamma sensors and resistivity sensors, sensors for current and voltage measurement of transmitted telemetry signals, inclination sensors, azimuth sensors, RPM sensors, acceleration sensors, shock sensors, vibration sensors, and telemetry reception sensors, downhole drill collars, and gap subs, lifting and hoisting equipment for lifting downhole tools, connectivity devices for establishing downhole networks namely, data telemetry transmitters and receivers, tool-to-tool interface probes, surface equipment for transmission and reception of telemetry, namely, display computers, surface antenna rods, and surface downlink stakes made of conductive materials, probes and hoisting connectors for transporting downhole probes, probes and tool centralizers for downhole tools being centralizers for probe positioning, downhole measurement and logging tools comprising sensors and data telemetry components; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely data telemetry transmitters; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely data telemetry receivers; repair, maintenance and cleaning of kits comprising oil and gas exploration and production, namely centralizers for downhole tools being centralizers for probe positioning; repair, maintenance and cleaning of kits comprising surface equipment for transmitting and receiving data telemetry, namely, data telemetry transmitters, data telemetry receivers, display computers, surface antenna rods, surface downlink stakes made of conductive materials, and electronic cables and connections; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely automated control systems comprising electrical control modules; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely electronic display interfaces for control systems of downhole exploration and production processes and downhole tools; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely pulse valves, namely electronic valves for controlling fluids; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely short hop transmitters and receivers; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for temperature; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for pressure; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for formation evaluation properties such as gamma sensors and resistivity sensors; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for current and voltage measurement of transmitted telemetry signals; repair, maintenance and cleaning of kits comprising hardware and

equipment for oil and gas exploration and production, namely inclination sensors; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely azimuth sensors; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely RPM sensors; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely acceleration sensors; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely shock sensors; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely vibration sensors; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely telemetry reception sensors; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely downhole drill collars, and gap subs; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely lifting and hoisting equipment for lifting downhole tools; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely connectivity devices for establishing downhole networks namely, data telemetry transmitters and receivers, tool-to-tool interface probes, surface equipment for transmission and reception of telemetry, namely, display computers, surface antenna rods, surface downlink stakes made of conductive materials, probes and hoisting connectors for transporting downhole probes, probes and tool centralizers for downhole tools being centralizers for probe positioning; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely downhole measurement and logging tools comprising sensors and data telemetry components; oil and gas well drilling services; rental of hardware and equipment for oil and gas exploration and production, namely centralizers for downhole tools, pulse valves namely electronic valves for controlling fluids, downhole drill collars, and gap subs, lifting and hoisting equipment for lifting downhole tools, probes and hoisting connectors for transporting downhole probes, probes and tool centralizers for downhole tools being centralizers for probe positioning; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely centralizers for downhole tools being centralizers for probe positioning; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely pulse valves, namely electronic valves for controlling fluids; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely downhole drill collars, and gap subs; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely lifting and hoisting equipment for lifting downhole tools; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely probes and hoisting connectors for transporting downhole probes, probes and tool centralizers for downhole tools being centralizers for probe positioning.

Class 42

(2) Repair, maintenance and cleaning of hardware and equipment for oil and gas exploration and production, namely surface equipment for transmitting and receiving data telemetry, namely surface decoder and encoder software for processing telemetry data signals, and automated control systems comprising software and firmware for use in data collection and data reporting of data collected by downhole tools and system control of downhole exploration and production processes and downhole tools, surface equipment for transmission and reception of telemetry, namely, surface decoder and encoder software for processing telemetry data signals and software and firmware for use in data collection and data reporting of data collected by downhole tools, and system control of downhole exploration and production processes and downhole tools; repair, maintenance and cleaning of kits comprising surface equipment for transmitting and receiving data

telemetry, namely surface decoder and encoder software for processing data telemetry signals; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely automated control systems comprising software and firmware for use in data collection and data reporting of data collected by downhole tools and system control of downhole exploration and production processes and downhole tools; repair, maintenance and cleaning of kits comprising hardware and equipment for oil and gas exploration and production, namely connectivity devices for establishing downhole networks namely, surface equipment for transmission and reception of telemetry, namely surface decoder and encoder software for processing telemetry data signals, and software and firmware for use in data collection and data reporting of data collected by downhole tools, and system control of downhole exploration and production processes and downhole tools; mechanical, electrical and software engineering services in the field of developing hardware, equipment and software for the oil and gas industry; custom design and development of hardware, equipment and software for the oil and gas industry; oil and gas well logging services; customer support services, namely, troubleshooting in the nature of diagnosing problems with hardware and equipment for oil and gas exploration and production; tracking and analyzing data relating to the performance, reliability, location and troubleshooting of hardware and equipment for oil and gas exploration and production; oil and gas well production and completion monitoring services; rental of hardware and equipment for oil and gas exploration and production, namely data telemetry transmitters, data telemetry receivers, surface equipment for transmitting and receiving data telemetry, namely data telemetry transmitters, data telemetry receivers, display computers, surface decoder and encoder software for processing telemetry data signals, surface antenna rods, surface downlink stakes made of conductive materials, electronic cables and connections, automated control systems comprising electrical control modules and software and firmware for use in data collection and data reporting of data collected by downhole tools and system control of downhole exploration and production processes and downhole tools, electronic display units for control systems of downhole exploration and production processes and downhole tools, short hop transmitters and receivers, sensors, namely sensors for temperature, sensors for pressure, sensors for formation evaluation properties such as gamma sensors and resistivity sensors, sensors for current and voltage measurement of transmitted telemetry signals, inclination sensors, azimuth sensors, RPM sensors, acceleration sensors, shock sensors, vibration sensors, and telemetry reception sensors, connectivity devices for establishing downhole networks namely, data telemetry transmitters and receivers, tool-to-tool interface probes, surface equipment for transmission and reception of telemetry, namely, display computers, surface decoder and encoder software for processing telemetry data signals, surface antenna rods, surface downlink stakes made of conductive materials, and software and firmware for use in data collection and data reporting of data collected by downhole tools, and system control of downhole exploration and production processes and downhole tools, and downhole measurement and logging tools comprising sensors and data telemetry components; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely data telemetry transmitters; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely data telemetry receivers; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely centralizers for downhole tools being centralizers for probe positioning; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely surface equipment for transmitting and receiving data telemetry, namely data telemetry transmitters, data telemetry receivers, display computers, surface decoder and encoder software for processing telemetry data signals, surface antenna rods, surface downlink stakes made of conductive materials, electronic cables and connections; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely automated control systems comprising electrical control modules and software and firmware for use in data collection and data

reporting of data collected by downhole tools and system control of downhole exploration and production processes and downhole tools; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely electronic display units for control systems of downhole exploration and production processes and downhole tools; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely short hop transmitters and receivers; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for temperature; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for pressure; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for formation evaluation properties such as gamma sensors and resistivity sensors; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely sensors for current and voltage measurement of transmitted telemetry signals; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely inclination sensors; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely azimuth sensors; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely RPM sensors; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely acceleration sensors; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely shock sensors; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely vibration sensors; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely telemetry reception sensors; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely connectivity devices for establishing downhole networks namely, data telemetry transmitters and receivers, tool-to-tool interface probes, surface equipment for transmission and reception of telemetry, namely, display computers, surface decoder and encoder software for processing telemetry data signals, surface antenna rods, surface downlink stakes made of conductive materials, and software and firmware for use in data collection and data reporting of data collected by downhole tools, and system control of downhole exploration and production processes and downhole tools; rental of kits comprising hardware and equipment for oil and gas exploration and production, namely downhole measurement and logging tools comprising sensors and data telemetry components; oil and gas well services providing downhole-to-surface, surface-to-downhole and downhole-to-downhole data telemetry and data processing for the oil and gas industry, namely guidance and geological feedback and telemetric communication for telemetry tool utilization and optimization consulting, and monitoring of data during oil and gas exploration and production for scientific research purposes.

(1) Bathroom and plumbing products, namely, accessories therefor specifically door handles of metal; Water pipes of metal, clips of metal for pipes, elbows of metal for pipes, metal pipe couplings, water-pipe valves of metal, drain pipes of metal, all for use in bath plumbing installations; HVAC and hydronics equipment, namely, ducts of metal for ventilating and air conditioning installations, and specially adapted parts therefor.

Class 07

(2) HVAC and hydronics equipment, namely, central vacuums, cleaning installations, and specially adapted parts therefor; Pumps, namely, sump pumps, sewage pumps, reverse osmosis water pumps and submersible water utility pump, chemical feed pumps, gas powered pumps as parts of machines, jet pumps, level controls and alarms, pressure switches, pressure tanks, variable speed pumps.

Class 09

(3) HVAC and hydronics equipment, namely, electromechanical controls for boiler and gas furnaces, air conditioners, air handlers, condensation pumps, heating boilers, heat recovery ventilators, ducts of metal for ventilating and air conditioning installations, air duct heaters, fireplaces, heat pumps, humidifiers, dehumidifiers, air purifying units, heat registers, electric and gas grills, home heating oil tanks, baseboard heaters, infrared heaters, ventilation hoods and heating radiators, flexible radiant heating pipes, can central vacuum cleaning installations; Electrical equipment, namely, circuit breakers, electrical cables, internal cooling fans for computers, fire alarms, electricity meters and electrical transformers, and specially adapted parts therefor; Water level overflow alarms; Bath items namely, bath accessories, namely, bathroom scales.

Class 11

(4) Electric and LED flashlights; Bathroom and plumbing products, namely, sinks, faucets, faucet and bidet taps, bath tubs, whirlpool tubs, showers, shower heads, shower doors, shower

enclosures, toilets, bathroom vanities, bathroom furniture, flush valves for toilets, whirlpool baths, and bidets, and parts therefor; Level controlling valves in tanks, shower and faucet mixing valves, and floor drains, all for use in bath plumbing installations; Drinking fountains, and parts and accessories therefor; Water heaters; HVAC and hydronics equipment, namely, boiler and gas furnaces, air conditioners, air handlers, condensation pumps, heating boilers, heat recovery ventilators, air duct heaters, fireplaces, heat pumps, humidifiers, dehumidifiers, air purifying units, heat registers, electric and gas grills, home heating oil tanks, baseboard heaters, infrared heaters, ventilation hoods and heating radiators and specially adapted parts; Filters for drinking water, water softening units, wastewater purification installations, level controlling valves in water tanks, hydrants, and parts and accessories therefor; Waterworks equipment, namely water filters for household tap-water, water filtering units for domestic use, water fileting units for industrial use, and specially adapted parts therefor; Lighting products for home, office, indoor, outdoor, and industrial use, namely, ceiling lights, wall sconces, overhead lamps, exterior security lights for buildings, incandescent and LED landscape lights, bathroom lighting fixtures, table lamps, floor lamps, luminaires, chandeliers and flush and semi-flush mounts for ceiling lights, and parts and fittings therefor.

Certification Mark Standard

The Bonner method consists of a microscopically controlled antiparasitic treatment used to cure parodontal diseases. The use of the "MÉTHODE BONNER" certification mark by an individual or business is meant to guarantee that the method used by that individual or business to cure parodontal diseases is the Bonner method, described in the attached certification and user guide. Users of the certification mark have committed to comply with the standards outlined in the certification and user guide, which is summarized in detail as follows: the certification mark can be used by any holder of a licence from the Institut international de parodontie. The Bonner method consists of ten visits conducted in three phases over a year, during which these four treatment modules are carried out: initial diagnostic assessment followed by intermediary and end-of-treatment tests, medication therapy for intestinal microflora restoration, mechanical therapy related to brushing and scaling, therapeutic education through the transmission of the skills required to successfully carry out the therapeutic process. The standard protocol follows the following schedule: the goal of the first four sessions is to clean the periodontal pockets and sulci; during the four next sessions, an intermediary test is conducted and the subgingival calculus is removed; three months later, an intermediary test is conducted, and the patient's skills are assessed; three months later, the last session is meant to check whether the goal has been achieved and plan the next follow-up tests. The users of the certification mark can use it once their licence application is approved and their licence fees have been paid. The approval process includes the initial Bonner method training, a post-training assessment day and a visit during the year to the office to provide the Institut international de parodontie with anonymized patient records. If these steps are successfully completed, the applicant has the right to use the certification mark. Every year, the licence holder must undergo an assessment by the Institut international de parodontie to determine whether they are complying with the Bonner method and the use of the certification mark. The Bonner method is based on current scientific knowledge and can be updated to account for scientific progress and technological advances. The details regarding the established standard have been filed with CIPO and are publicly available. The users of the certification mark have committed to comply with the standards outlined in the guide.
