

Introduction

This inventory was developed and updated in response to the need expressed by organizations representing official language minority communities (OLMCs) to have access to an inventory of federal programs that may be of interest to their members. The document will also provide federal officials, including national and regional coordinators responsible for the implementation of section 41 of the Official Languages Act, with an overview of federal programs. The purpose of this document is to provide readers with a starting point for their research.

The list of programs and initiatives included in the inventory is the result of a search of Government of Canada Web pages and consultations with the federal institutions responsible for them. By clicking on the hyperlinks in the document, the user will be able to access the program or initiative's website, where they can find more information about the program or initiative, such as application or funding criteria, contact information and application forms.

Each federal institution is responsible for the management of its programs, submission process, deadlines and requirements. All program-related questions should be directed to the institution responsible for the program.

This tool was assembled by the Interdepartmental Relations and Accountability Directorate of the Official Languages Branch of Canadian Heritage. To suggest additions or corrections, or to obtain a copy of the document, please contact us by e-mail at portail41-gateway41@pch.gc.ca.
